ABSTRACT

This report of Senate committee hearings on legislation to amend the Higher Education Act of 1965, the Vocational Educational Act 1963, and related acts and bills presents testimony by various senators, the Secretary of H.E.W., the U.S. Commissioner of Education, and other persons in the field of education, and letters from college and university administrators regarding the proposals. The proposals deal with Federal assistance to higher education, the creation of the National Institute of Education, the creation of the National Foundation on Higher Education, Indian education, and other educational matters deemed to require consideration. EDUCATION AMENDMENTS OF 1971

WEDNESDAY, MARCH 3, 1971

U.S. SENATE,
SUBCOMMITTEE ON EDUCATION OF THE
COMMITTEE ON LABOR AND PUBLIC WELFARE,
Washington, D.C.

The Subcommittee met at 10 a.m., in room 4232, New Senate Office Building, Senator Claiborne Pell (Chairman of the subcommittee) presiding.

Present: Senators Pell, Javits, and Beall.

Staff members present: Stephen J. Wexler, Counsel; Richard D. Smith, Associate Counsel; and Roy H. Millenson, Minority professional staff member.

Senator PELL. The Subcommittee on Education hearings on the Education Amendments of 1971 will come to order.

Today the subcommittee will hear the views of the administration on the problems of higher education, vocational education, the proposed National Institute of Education, the proposed National Foundation on Higher Education, Indian education, and other education matters that are deemed to require action this year.

Our hearing today will deal specifically with Federal assistance to higher education. Present authorizations expire June 30 of this year. In order to be timely and discharge our responsibilities, both to the Congress and to the country, we should enact a bill not only before the expiration of the fiscal year but in good time so that the Appropriations Committees can take the results of our action into their purview in order to make funds available for the next school year. And I say this with cognizance of the automatic extension legislation enacted in Public Law 91-230.

The higher education portions of the bills will in all possibility generate the most controversy. My own bill, S. 659, cosponsored by Messrs. Williams, Randolph, Kennedy, Mondale, Nelson, Eagleton, Cranston, Hughes, and Stevenson, and the administration's proposal which has not yet been introduced, appear to take two different approaches and views as to the role and scope of Federal assistance to higher education.

(A copy of S. 659 and related bills and other pertinent information follow:)

92D CONGRESS
1ST SESSION

S. 659

IN THE SENATE OF THE UNITED STATES

FEBRUARY 8 (legislative day, JANUARY 26), 1971

Mr. PELL (for himself, Mr. WILLIAMS, Mr. RANDOLPH, Mr. KENNEDY, Mr. NELSON, Mr. MONDALE, Mr. EAGLETON, Mr. CRANSTON, Mr. HUGHES, and Mr. STEVENSON) introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To amend the Higher Education Act of 1965, the Vocational Educational Act of 1963, and related Acts, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That this Act, with the following table of contents, may be
4 cited as the "Education Amendments of 1971".

TABLE OF CONTENTS

TITLE I—HIGHER EDUCATION

PART A—AMENDMENTS RELATING TO COMMUNITY SERVICE AND CONTINUING EDUCATION PROGRAMS

Sec. 101. Extension of authorization of appropriations.
Sec. 102. Special programs and projects relating to national and regional problems.
Sec. 103. Metropolitan area programs.
Sec. 104. Evaluation of activities.

87

PART B—COLLEGE LIBRARY PROGRAMS

Sec. 121. Authorization of appropriations.
Sec. 122. Waiver of maintenance of effort requirement.
Sec. 123. Increase in maximum amount of supplemental grants.
Sec. 124. Authorization of appropriations for college and research library resources.

PART C—DEVELOPING INSTITUTIONS

Sec. 131. Extension of authorization.
Sec. 132. Revision of title III (strengthening developing institutions).

PART D—STUDENT ASSISTANCE

Sec. 141. Authorization for educational opportunity grants.
Sec. 142. Basic educational opportunity grants.
Sec. 143. Identifying qualified low-income students; preparing them for postsecondary education; special services for such students in institutions of higher education.
Sec. 144. Insured student loans—extension of program.
Sec. 145. Secondary market for student loans.
Sec. 146. Extension of the Emergency Insured Student Loan Act of 1969.
Sec. 147. College work study program.
Sec. 148. Cooperative education.
Sec. 149. Federal loans to students in institutions of higher education.
Sec. 150. Eligibility for student assistance.

PART E—EDUCATION PROFESSIONS DEVELOPMENT

Sec. 151. Extension of authorization of appropriations.
Sec. 152. Functions of, and compensation for, the Director of the Teacher Corps.

PART F—INSTRUCTIONAL EQUIPMENT

Sec. 171. Extension of authorization of appropriations.

PART G—ACADEMIC FACILITIES

Sec. 161. Transfer of the provisions of the Higher Education Facilities Act of 1963.

Sec. 205. Cooperative vocational education.
Sec. 206. Work-study programs.
Sec. 207. Curriculum development.

TITLE III—ESTABLISHMENT OF A NATIONAL FOUNDATION FOR HIGHER EDUCATION AND A NATIONAL INSTITUTE FOR EDUCATION

Sec. 301. Amendment to the General Education Provisions Act.

TITLE IV—MISCELLANEOUS

Sec. 401. Administration of programs and projects.
Sec. 402. Extension of authorization of appropriations of title III of the National Defense Education Act of 1958.
Sec. 403. Study and report on rules and regulations.

1 TITLE I—HIGHER EDUCATION

2 PART A—AMENDMENTS RELATING TO COMMUNITY

3 SERVICE AND CONTINUING EDUCATION PROGRAMS

4 EXTENSION OF AUTHORIZATION OF APPROPRIATIONS

5 SEC. 101. (a) Section 101 of the Higher Education Act

6 of 1965 is amended by striking out all that follows "author-

7 ized to be appropriated" and inserting in lieu thereof the

8 following: "$60,000,000 for the fiscal year ending June 30,

9 1972, and for each of the succeeding fiscal years ending prior

10 to July 1, 1976.".

11 (b) The amendment made by subsection (a) shall be

12 effective after June 30, 1971.

13 SPECIAL PROGRAMS AND PROJECTS RELATING TO

14 NATIONAL AND REGIONAL PROBLEMS

15 SEC. 102. (a) (1) Sections 106, 107, 108, 109, 110,

1 and 111 of the Higher Education Act of 1965, and all ref-
2 erences thereto, are redesignated as sections 107, 108, 109,
3 110, 111, and 112, respectively. Title I of such Act is
4 amended by inserting after section 105 the following new
5 section:

6 "SPECIAL PROGRAMS AND PROJECTS RELATING TO
7 NATIONAL AND REGIONAL PROBLEMS

8 "SEC. 106. (a) The Commissioner is authorized to
9 reserve from the sums appropriated pursuant to section 101
10 for any fiscal year an amount not in excess of 10 per centum
11 of the sums so appropriated for that fiscal year for grants
12 pursuant to subsection (b).

13 "(b) (1) From the sums reserved under subsection (a),
14 the Commissioner is authorized to make grants to, and con-
15 tracts with, institutions of higher education (and combina-
16 tions thereof) to assist them in carrying out special programs
17 and projects which are designed to seek solutions to national
18 and regional problems relating to urbanization, technological
19 and social changes, and environmental pollution.

20 "(2) No grant or contract under this section shall exceed
21 66⅔ per centum of the cost of the program or project for
22 which application is made.".

23 (2) Section 103 (a) of such title I is amended by strik-
24 ing out that part of the language which precedes ", the Com-

1 missioner" and by inserting in lieu thereof "From the sums
2 appropriated pursuant to section 101 for any fiscal year
3 which are not reserved under section 106 (a)".
4 (b) The amendments made by subsection (a) shall be
5 effective with respect to appropriations for fiscal years be-
6 ginning after the enactment of this Act and then only to the
7 extent that the appropriation for any such fiscal year exceeds
8 $9,500,000.
9 METROPOLITAN AREA PROGRAMS
10 SEC. 103. (a) Sections 110, 111, and 112 (as so desig-
11 nated by section 102) of the Higher Education Act of 1965,
12 and all references thereto, are redesignated as sections 111,
13 112, and 113, respectively. Title I of such Act is amended
14 by inserting after section 109 the following new section:
15 "METROPOLITAN AREA PROGRAMS
16 "SEC. 110. (a) The Commissioner is authorized to make
17 grants to institutions of higher education (and combinations
18 thereof) which are located within, or adjacent to, standard
19 metropolitan statistical areas to assist such institutions in
20 planning, developing, and carrying out comprehensive pro-
21 grams specifically designed to apply the resources of higher
22 education to the problems of the urban communities within
23 standard metropolitan statistical areas.
24 "(b) For the purposes of making grants under this sec-

1 tion, there are authorized to be appropriated $5,000,000
2 for the fiscal year ending June 30, 1972, and for each of the
3 succeeding fiscal years ending prior to July 1, 1976.".
4 (b) The amendments made by subsection (a) shall be
5 effective after June 30, 1971.
6 EVALUATION OF ACTIVITIES
7 SEC. 104. (a) During the period beginning with the date
8 of enactment of this Act and ending July 1, 1973, the Com-
9 missioner shall conduct a review of the programs and projects
10 carried out with assistance under title I of the Higher Educa-
11 tion Act of 1965 prior to July 1, 1971. Such review shall
12 include an evaluation of specific programs and projects with
13 a view toward ascertaining which of them have shown (1)
14 the greatest promise in achieving the purposes of such title,
15 and (2) the greatest return for the resources devoted to
16 them. Such review shall be carried out by direct evaluations
17 by the Commissioner, by the utilization of other agencies,
18 institutions, and groups, and by the use of independent ap-
19 praisal units.
20 (b) Not later than July 1, 1974, the Commissioner shall
21 submit to the Chairman of the Committee on Labor and
22 Public Welfare of the Senate and the Chairman of the Com-
23 mittee on Education and Labor of the House of Represent-
24 atives a report on the review conducted pursuant to sub-
25 section (a). Such report shall include (1) an evaluation

1 of the program authorized by title I of the Higher Educa-
2 tion Act of 1965 and of specific programs and projects as-
3 sisted under such title, (2) a description and an analysis of
4 programs and projects which are determined to be most suc-
5 cessful, and (3) recommendations with respect to the means
6 by which the most successful programs and projects can be
7 expanded and replicated.

8 (c) Sums appropriated under section 401 (c) of the
9 General Education Provisions Act for the purposes of section
10 402 of such Act shall be available to carry out the purposes
11 of this section.

12 PART B—COLLEGE LIBRARY PROGRAMS

13 AUTHORIZATION OF APPROPRIATIONS

14 SEC. 121. (a) Title II of the Higher Education Act of
15 1965 is amended by striking out "PART A—COLLEGE
16 LIBRARY RESOURCES" and by striking out all of section 201
17 and inserting in lieu thereof the following:

18 "COLLEGE LIBRARY PROGRAMS; TRAINING; RESEARCH

19 "SEC. 201. (a) The Commissioner shall carry out a
20 program of assistance—

21 "(1) to assist and encourage institutions of higher
22 education in the acquisition of library resources, in ac-
23 cordance with part A; and

24 "(2) to assist with research and training persons
25 in librarianship, in accordance with part B.

1 "(b) For the purpose of making grants under parts
2 A and B, there are authorized to be appropriated $130,000,-
3 000 for the fiscal year ending June 30, 1972, and for each
4 of the succeeding fiscal years ending prior to July 1, 1976.
5 Of the sums appropriated pursuant to the preceding sentence
6 for any fiscal year, 70 per centum shall be for the purposes
7 of part A and 30 per centum shall be for the purposes of
8 part B, except that the amount available for the purposes of
9 part B for any fiscal year shall not be less than the amount
10 appropriated for such purposes for the fiscal year ending
11 June 30, 1971.
12 "(c) For the purposes of this title—
13 "(1) the term 'library resources' means books, peri-
14 odicals, documents, magnetic tapes, phonograph records,
15 audiovisual materials, and other related library mate-
16 rials, including necessary binding; and
17 "(2) the term 'librarianship' means the principles
18 and practices of the library and information sciences, in-
19 cluding the acquisition, organization, storage, retrieval,
20 and dissemination of information, and reference and re-
21 search use of library and information resources.
22 "PART A—COLLEGE LIBRARY RESOURCES".
23 (b) Section 202 of such title II is amended by striking
24 out that part of the first sentence which precedes "institutions

1 of higher education" and inserting in lieu thereof the follow-
2 ing: "From the amount available for grants under this part
3 pursuant to section 201 for any fiscal year, the Commissioner
4 shall make basic grants for the purposes set forth in section
5 201 (a) (1) to".

6 (c) Section 203 of such title II is amended by striking
7 out that part of the first sentence which precedes "supple-
8 mental grants" and inserting in lieu thereof the following:
9 "From that part of the sums appropriated pursuant to section
10 201 for the purposes of this part for any fiscal year which
11 remains after making basic grants pursuant to section 202,
12 and which is not reserved for the purposes of section 204, the
13 Commissioner shall make", and by striking out "section 201"
14 where it appears after "set forth in" and inserting in lieu
15 thereof "section 201 (a) (1)".

16 (d) (1) Section 204 (a) (1) of such title II is amended
17 to read as follows:

18 "(1) From the sums appropriated pursuant to section
19 201 for the purposes of this part for any fiscal year, the
20 Commissioner is authorized to reserve not to exceed 25 per
21 centum thereof for the purposes of this section.".

22 (2) Section 204 (a) (2) of such title II is amended
23 by striking out that part of the first sentence which precedes
24 "may be used to make" and inserting in lieu thereof "sums
25 reserved pursuant to paragraph (1)".

1 (3) Section 204 (a) of such title II is amended by
2 striking out paragraph (3).
3 (e) (1) Part B of such title II is amended by striking
4 out sections 221 and 222 and inserting in lieu thereof the
5 following:
6 "TRAINING AND RESEARCH PROGRAMS
7 "SEC. 221. From the amount available for grants under
8 this part pursuant to section 201 for any fiscal year, the
9 Commissioner shall carry out a program of making grants
10 in accordance with sections 222 and 223. Of such amount,
11 $66\frac{2}{3}$ per centum shall be available for the purposes of section
12 222 and $33\frac{1}{3}$ per centum shall be available for the purposes
13 of section 223."
14 (2) Such part B is further amended by striking out sec-
15 tion 225; and sections 223 and 224 of such part, and all
16 references thereto, are redesignated as sections 222 and 223,
17 respectively.
18 (f) The amendments made by this section shall be
19 effective after, and only with respect to appropriations for
20 fiscal years beginning after, June 30, 1971.
21 WAIVER OF MAINTENANCE OF EFFORT REQUIREMENT
22 SEC. 122. (a) Section 202 of title II of the Higher
23 Education Act of 1965 is amended by redesignating clauses
24 (c) and (d), and all references thereto, as clauses (2) and

1 (3), respectively, and by striking out clauses (a) and (b)
2 and inserting in lieu thereof the following:
3 "(1) provides satisfactory assurance that the appli-
4 cant will expend during the fiscal year for which the
5 basic grant is sought, from funds other than funds re-
6 ceived under this part—
7 "(A) for all library purposes (exclusive of con-
8 struction), an amount not less than the average
9 annual amount it expended for such purposes during
10 the two fiscal years preceding the fiscal years for
11 which assistance is sought under this part, and
12 "(B) for library resources, an amount not less
13 than the average amount it expended for such re-
14 sources during the two fiscal years preceding the
15 fiscal year for which assistance is sought under this
16 part,
17 except that if the Commissioner determines, in accord-
18 ance with regulations, that there are special and unusual
19 circumstances which prevent the applicant from making
20 the assurances required by this clause (1), he may
21 waive the requirement for one or more of such assur-
22 ances;".
23 (b) The second sentence of such section 202 is amended
24 by striking out "not exceed" and inserting in lieu thereof

the following: ", for any fiscal year, be equal to the amount expended by the applicant for library resources during that year from funds other than funds received under this part, except that no basic grant shall exceed".

(c) The amendments made by this section shall be effective after, and only with respect to appropriations for fiscal years beginning after, June 30, 1971.

INCREASE IN MAXIMUM AMOUNT OF SUPPLEMENTAL GRANTS

SEC. 123. (a) Section 203 (a) of the Higher Education Act of 1965 is amended by striking out "$10" and inserting in lieu thereof "$20".

(b) The amendment made by subsection (a) shall be effective with respect to appropriations made for fiscal years beginning after June 30, 1971.

AUTHORIZATION OF APPROPRIATIONS FOR COLLEGE AND RESEARCH LIBRARY RESOURCES

SEC. 124. (a) Section 231 of the Higher Education Act of 1965 is amended by striking out "and the succeeding fiscal year" and inserting in lieu thereof "and $15,000,000 for each of the succeeding fiscal years ending prior to July 1, 1976".

(b) The amendment made by subsection (a) shall be effective after June 30, 1971.

1 PART C—DEVELOPING INSTITUTIONS

2 EXTENSION OF AUTHORIZATION

3 SEC. 131. Section 301 (b) (1) of the Higher Educa-
4 tion Act of 1965 is amended by inserting "each" after
5 "$91,000,000" and by inserting after "1971," the following:
6 "and the fiscal year ending June 30, 1972,".

7 REVISION OF TITLE III (STRENGTHENING DEVELOPING
8 INSTITUTIONS)

9 SEC. 132. (a) Title III of the Higher Education Act of
10 1965 is amended to read as follows:

11 "TITLE III—STRENGTHENING DEVELOPING
12 INSTITUTIONS

13 "AUTHORIZATION

14 "SEC. 301. (a) The Commissioner shall carry out a
15 program of special assistance to strengthen the academic
16 quality of developing institutions which have the desire and
17 potential to make a substantial contribution to the higher
18 education resources of the Nation but which are struggling for
19 survival and are isolated from the main currents of academic
20 life and which enroll a high percentage of students who have
21 been educationally deprived.

22 "(b) (1) For the purpose of carrying out this title,
23 there are authorized to be appropriated $100,000,000 for the
24 fiscal year ending June 30, 1972, and each if the succeeding
25 fiscal years ending prior to July 1, 1976.

1 "(2) Of the sums appropriated pursuant to this subsec-
2 tion for any fiscal year, 23 per centum shall be available only
3 for carrying out the provisions of this title with respect to
4 developing institutions which are community or junior col-
5 leges, and not less than 50 per centum shall be available only
6 for carrying out the provisions of this title with respect to
7 developing institutions which the Commissioner determines
8 meet the criterion set forth in clause (4) (C) of section
9 302 (a).

10 "ELIGIBILITY FOR SPECIAL ASSISTANCE

11 "SEC. 302. (a) For the purposes of this title, the term
12 'developing institution' means an institution of higher educa-
13 tion in any State which—

14 "(1) is legally authorized to provide, and provides
15 within the State, an educational program for which it
16 awards a bachelor's degree, or is a junior or community
17 college;

18 "(2) is accredited by a nationally recognized ac-
19 crediting agency or association or is, according to such
20 an agency or association, making reasonable progress to-
21 ward accreditation;

22 "(3) in the case of an institution awarding a bache-
23 lor's degree, has admitted as regular students only per-
24 sons having a certificate of graduation from a secondary
25 school, or the recognized equivalent thereof, and has

1 awarded such degree during the five academic years pre-
2 ceding the academic year for which it seeks assistance
3 under this title; and
4 "(4) meets such other requirements as the Commis-
5 sioner shall, with the advice of the Council, prescribe by
6 regulation, which requirements shall include at least a
7 consideration of whether the institution—
8 "(A) is making a reasonable effort to improve
9 the quality of its teaching and administrative staffs
10 and of its student services,
11 "(B) is, for financial or other reasons, strug-
12 gling for survival and is isolated from the main cur-
13 rents of academic life, and
14 "(C) enrolls a high percentage of students
15 who may have had inadequate secondary school
16 preparation and who come from educationally, cul-
17 turally, or economically deprived backgrounds.
18 "(b) Any institution desiring special assistance under
19 the provisions of this title shall submit an application for
20 eligibility to the Commissioner at such time, in such form,
21 and containing such information, as may be necessary to
22 enable the Commissioner to evaluate the need of the appli-
23 cant for such assistance. The Commissioner shall, with the
24 advice of the Council, approve any application for eligibility
25 under this subsection, which indicates that the applicant is

1 a developing institution meeting the requirements set forth
2 in subsection (a) and, not later than thirty days after the
3 beginning of any fiscal year ending after June 30, 1970,
4 establish a list of developing institutions eligible for special
5 assistance under the provisions of this title.

6 "(c) For the purposes of clause (1) of subsection (a)
7 and of paragraph (2) of section 301(b), the term 'junior
8 or community college' means an institution of higher educa-
9 tion which does not provide an educational program, for
10 which it awards a bachelor's degree but (1) does provide
11 an educational program of not less than two years which
12 is acceptable for full credit toward such a degree, or (2)
13 offers a two-year program in engineering, mathematics, or
14 the physical or biological sciences, which is designed to pre-
15 pare a student to work as a technician and at the semipro-
16 fessional level in engineering, scientific, or other technologi-
17 cal fields, which require the understanding and application
18 of basic engineering, scientific, or mathematical principles
19 of knowledge.

20 "ADVISORY COUNCIL ON DEVELOPING INSTITUTIONS

21 "SEC. 303. (a) There is hereby established an Ad-
22 visory Council on Developing Institutions (in this title
23 referred to as the 'Council') consisting of fifteen members
24 appointed by the Commissioner with the approval of the
25 Secretary.

1 "(b) The Council shall advise the Commissioner with
2 respect to policy matters arising in the administration of this
3 title, and, in particular, it shall assist the Commissioner—
4 "(1) in developing the criteria for defining devel-
5 oping institutions under clause (4) of section 302 (a);
6 "(2) in establishing the list of eligibles under sec-
7 tion 302 (b);
8 "(3) in identifying developing institutions through
9 which the purposes of this title may be achieved; and
10 "(4) in establishing the priorities and criteria to
11 be used in making grants under section 304 (a).
12 "USES OF FUNDS: COOPERATIVE ARRANGEMENTS, NA-
13 TIONAL TEACHING FELLOWSHIPS, AND PROFESSORS
14 EMERITUS
15 "SEC. 304. (a) The Commissioner is authorized to make
16 grants and awards, in accordance with the provisions of this
17 title, for the purpose of strengthening developing institutions.
18 Such grants shall be used solely for the purposes set forth
19 in subsection (b).
20 "(b) Funds appropriated pursuant to section 301 (b)
21 shall be available for—
22 "(1) grants to institutions of higher education pay-
23 ing part of the cost of planning, developing, and carrying
24 out cooperative arrangements between developing insti-
25 tutions and other institutions of higher education, and

1 between developing institutions and other organizations,
2 agencies, and business entities, which show promise, as
3 effective measures for strengthening the academic pro-
4 gram, and the administrative capacity of developing in-
5 stitutions, including such projects and activities as—
6 "(A) exchange of faculty or students, including
7 arrangements for bringing visiting scholars to de-
8 veloping institutions,
9 "(B) faculty and administration improvement
10 programs, utilizing training, education (including
11 fellowships leading to advanced degrees), intern-
12 ships, research participation, and other means,
13 "(C) introduction of new curriculums and cur-
14 ricular materials.
15 "(D) development and operation of cooperative
16 education programs involving alternate periods of
17 academic study and business or public employment,
18 "(E) joint use of facilities such as libraries or
19 laboratories, including necessary books, materials,
20 and equipment;
21 "(2) National Teaching Fellowships to be awarded
22 by the Commissioner to highly qualified graduate stu-
23 dents and junior faculty members of institutions of higher
24 education for teaching at developing institutions; and
25 "(3) Professors Emeritus Grants to be awarded by

1 the Commissioner to professors retired from active serv-
2 ice at institutions of higher education to encourage them
3 to teach and to conduct research at developing institu-
4 tions.

5 "(c) (1) Applications for assistance of the type de-
6 scribed in subsection (b) (1) shall be approved only if
7 they—

8 "(A) set forth a program for carrying out one or
9 more of the activities described therein, and set forth
10 such policies and procedures for the administration of
11 the program as will insure the proper and efficient opera-
12 tion of the program and the accomplishment of the
13 purposes of this title;

14 "(B) set forth such policies and procedures as will
15 insure that Federal funds made available under this
16 section for any fiscal year will be so used as to supple-
17 ment and, to the extent practical, increase the level of
18 funds that would, in the absence of such Federal funds,
19 be made available for the purposes of the activities
20 described in subsection (b) (1), and in no case supplant
21 such funds;

22 "(C) set forth policies and procedures for the eval-
23 uation of the effectiveness of the program in accomplish-
24 ing its purpose;

25 "(D) provide for such fiscal control and fund ac-

1 counting procedures as may be necessary to insure
2 proper disbursement of accounting for funds made avail-
3 able under this title to the applicant; and
4 "(E) provide for making such reports, in such
5 form and containing such information, as the Commis-
6 sioner may require to carry out his functions under this
7 title, and for keeping such records and affording such
8 access thereto, as he may find necessary to assure the
9 correctness and verification of such reports.
10 "(2) (A) Applications for awards of the type described
11 in subsection (b) (2) and (3) may be approved only
12 upon a finding by the Commissioner that the program of
13 teaching and research set forth therein is reasonable in the
14 light of the qualifications of the applicant and of the educa-
15 tional needs of the institution at which the applicant intends
16 to teach.
17 "(B) No application for a National Teaching Fellow-
18 ship or a Professors Emeritus Grant shall be awarded for
19 a period exceeding two academic years.
20 "(C) Each person awarded a National Teaching Fellow-
21 ship or a Professors Emeritus Grant shall receive a stipend
22 for each academic year of teaching of not more than $6,500,
23 as determined by the Commissioner upon the advice of the
24 Council, plus an additional amount of $400 for each such year
25 for each dependent of such person.

1 "ASSISTANCE TO DEVELOPING INSTITUTIONS UNDER OTHER
2 PROGRAMS

3 "SEC. 305. (a) Each institution which has been placed
4 on the list of eligible developing institutions shall be eligible
5 for priority consideration and waivers in accordance with sub-
6 section (d).

7 "(b) (1) In the case of an application by a developing
8 institution for assistance under any program specified in
9 paragraph (2), the Commissioner is authorized, if such
10 application is otherwise approvable, to waive any require-
11 ment for a non-Federal share of the cost of the program or
12 project, or to give, or require to be given, priority considera-
13 tion of the application in relation to applications from institu-
14 tions which are not developing institutions.

15 "(2) The provisions of this section shall apply to any
16 program authorized by title II, IV, VI, or VII of this Act.".

17 (b) The amendments made by subsection (a) shall be
18 effective only with respect to appropriations made for fiscal
19 years beginning after June 30, 1972.

20 PART D—STUDENT ASSISTANCE

21 AUTHORIZATION FOR EDUCATIONAL OPPORTUNITY GRANTS

22 SEC. 141. The first sentence of section 401 (b) of the
23 Higher Education Act of 1965 is amended by striking out
24 that part which precedes "to enable the Commissioner" and
25 inserting in lieu thereof: "There are hereby authorized to

1 be appropriated $170,000,000 for the fiscal year ending
2 June 30, 1972, and for each of the succeeding fiscal years
3 ending prior to July 1, 1976,".
4 (b) The amendments made by subsection (a) shall be
5 effective after June 30, 1971.
6 BASIC EDUCATIONAL OPPORTUNITY GRANTS
7 SEC. 142. (a) (1) Section 401 (a) of the Higher Edu-
8 cation Act of 1965 is amended to read as follows:
9 "SEC. 401. (a) It is the purpose of this part to assist
10 in making available the benefits of higher education to
11 qualified high school graduates by providing (1) basic edu-
12 cational opportunity grants (hereinafter referred to as 'basic
13 grants') to all eligible high school graduates, and (2) sup-
14 plementary educational opportunity grants (hereinafter re-
15 ferred to as 'supplementary grants') to those high school
16 graduates of exceptional need who, for lack of financial
17 means of their own or of their families, would be unable to
18 obtain such benefits without a supplementary grant."
19 (2) (A) Section 401 of such Act is amended by re-
20 designating subsection (b) thereof, and all references there-
21 to, as subsection (c) and by inserting after subsection (a)
22 the following new subsection:
23 "(b) There are hereby authorized to be appropriated
24 for the fiscal year ending June 30, 1972, and for each of
25 the succeeding fiscal years ending prior to July 1, 1976,

1 such sums as may be necessary for basic grants under this
2 part."
3 (B) Subsection (c) of such section 401 (as designated
4 in this section (A)) is amended by striking out "educational
5 opportunity" each time it appears therein and inserting in
6 lieu thereof "supplementary".
7 (b) (1) Section 402 of such Act is amended to read as
8 follows:
9 "BASIC EDUCATIONAL OPPORTUNITY GRANTS AND SUP-
10 PLEMENTARY EDUCATIONAL OPPORTUNITY GRANTS;
11 AMOUNTS AND DETERMINATIONS
12 "SEC. 402. (a) (1) The Commissioner shall pay to each
13 student who is in good standing at an institution of higher
14 education (according to the prescribed standards, regulations,
15 and practices of that institution) for each academic year dur-
16 ing which that student is in full-time attendance (as deter-
17 mined by the Commissioner by regulation) at that institution,
18 as an undergraduate, a basic grant in the amount for which
19 that student is eligible, as determined under paragraph (2).
20 "(2) (A) The amount of the basic grant for which a
21 student is eligible under this part for any academic year
22 shall be $1,200, less an amount equal to the amount of the
23 tax imposed for the tax year by chapter I of the Internal
24 Revenue Code of 1954 on the taxpayer.
25 "(B) For the purposes of this paragraph, the term—

1 "(i) 'tax year' means the taxable year used by the
2 taxpayer for the purposes of subchapter A of chapter I
3 of the Internal Revenue Code of 1954 which ends prior
4 to the beginning of the academic year for which the
5 basic grant is awarded; and
6 "(ii) 'taxpayer' means the individual upon whom
7 the student receiving a basic grant is dependent for the
8 purposes of section 152 of the Internal Revenue Code
9 of 1954 or, in the case of such a student who is not so
10 dependent upon another individual, the student.
11 "(b) (1) Each eligible institution which awards a sup-
12 plementary grant to a student under this part shall pay to
13 that student for each academic year during which he is in
14 need of such a grant to pursue a course of study at the insti-
15 tution an amount determined by the institution for such stu-
16 dent with respect to that year, in accordance with para-
17 graph (2).
18 "(2) The amount of a supplementary grant under this
19 part shall not exceed the lesser of $1,000 or one-half the sum
20 of the amount of student financial aid (including assistance
21 under other parts of this title and compensation paid under a
22 work-study program assisted under part C of this title) pro-
23 vided such student under any scholarship program established
24 by a State or a private institution or organization, as deter-
25 mined in accordance with regulations of the Commissioner. If

1 the amount determined under paragraph (1) for any aca-
2 demic year is less than $200 for a student, no payment shall
3 be made for a supplementary grant for that year.
4 "(3) The Commissioner shall, subject to the limita-
5 tions of this subsection, prescribe, for the guidance of par-
6 ticipating institutions, basic criteria or schedules (or both)
7 for the determination of the amount of any such supplemen-
8 tary grants, taking into account the objective of limiting sup-
9 plementary grants to students of exceptional financial need
10 and such factors, including the number of dependents in the
11 family, as the Commissioner may deem relevant.
12 "(4) Payments to students for supplementary grants
13 under this section shall be made from funds received by the
14 institution under an agreement pursuant to section 407 and
15 shall be made only in accordance with the terms of such
16 agreement."
17 (2) Section 406 of such Act is amended to read as
18 follows:
19 "APPLICATIONS; ALLOCATIONS OF ALLOTMENTS OF FUNDS
20 TO INSTITUTIONS
21 "SEC. 406. (a) The Commissioner shall from time to
22 time set dates by which eligible institutions and students must
23 file applications for funds under this part.
24 "(b) (1) Each student desiring a basic grant for any
25 year must file an application therefor containing such infor-

1 mation and assurances as the Commissioner may deem nec-
2 essary to enable him to carry out his responsibilities under
3 this part.

4 "(2) If the appropriations pursuant to section 401 (b)
5 for any fiscal year are insufficient to pay the full amount of
6 the basic grants for which all students are eligible in that
7 year, the payment to each student shall be ratably reduced,
8 except that if such payment is reduced to an amount less
9 than $200 for any student no payment shall be made to
10 that student.

11 "(c) (1) The eligible institutions of each State desir-
12 ing funds for supplementary grants must file an application
13 for an allocation to such institutions of funds from the allot-
14 ment to that State (including any reallotment thereto) for
15 any fiscal year pursuant to section 405 to be used for the
16 purposes specified in the first sentence of section 401 (c).
17 The Commissioner shall allocate the allotments in accord-
18 ance with equitable criteria which he shall prescribe in order
19 to achieve such distribution of funds among eligible institu-
20 tions within a State as will most effectively carry out the
21 purposes of this part.

22 "(2) The Commissioner shall further, in accordance
23 with regulations, allocate to eligible institutions, in any State,
24 from funds apportioned or reapportioned pursuant to section

1 405 (b), funds to be used for supplementary grants specified
2 in the third sentence of section 401 (b).
3 "(3) The Commissioner shall, subject to the limitations
4 of this subsection, prescribe, for the guidance of participating
5 institutions, basic criteria or schedules (or both) for the de-
6 termination of the amount of any such supplementary grant,
7 taking into account the objective of limiting supplementary
8 grants to students of exceptional financial need and such
9 other factors, including the number of dependents in the
10 family, as the Commissioner may deem relevant.
11 "(d) Payments under this section shall be made in
12 accordance with regulations promulgated by the Commis-
13 sioner."
14 (3) (A) The caption heads of sections 403, 404, and
15 405 of such Act are each amended by striking out "EDU-
16 CATIONAL OPPORTUNITY" and inserting in lieu thereof
17 "SUPPLEMENTARY".
18 (B) Such sections 403, 404, 405, and 407 are each
19 amended—
20 (i) by striking out "educational opportunity"
21 wherever it appears before "grant" or "grants" and
22 inserting in lieu thereof "supplementary"; and
23 (ii) by striking out "section 406" wherever it
24 appears and inserting in lieu thereof "section 406 (c)".

1 (c) (1) Part A of title IV of such Act is amended by
2 redesignating section 409, and all references thereto, as
3 section 410 and by inserting after section 408 the following
4 new section:

5 "COST OF INSTRUCTION ALLOWANCES

6 "SEC. 409. In addition to the amounts paid to institu-
7 tions for supplementary grants, the Commissioner shall pay
8 to each eligible institution a cost of instruction allowance
9 for each student in attendance at such institution who is a
10 recipient of a grant under this part. No cost of instruction
11 allowance paid under this section shall exceed $1,200, less
12 any tuition charged to the student for whom the allowance
13 is paid."

14 (2) Section 401 of such Act is amended by adding at
15 the end thereof the following new subsection:

16 "(d) There are authorized to be appropriated for the
17 fiscal year ending June 30, 1972, and for each of the suc-
18 ceeding fiscal years ending prior to July 1, 1976, such sums
19 as may be necessary to carry out the purposes of section
20 409.".

21 (d) The amendments made by this section shall be effec-
22 tive after June 30, 1971.

1 IDENTIFYING QUALIFIED LOW-INCOME STUDENTS; PRE-
2 PARING THEM FOR POSTSECONDARY EDUCATION;
3 SPECIAL SERVICES FOR SUCH STUDENTS IN INSTITU-
4 TIONS OF HIGHER EDUCATION

5 SEC. 143. Section 408 (d) of the Higher Education Act
6 of 1965 is amended by striking out "the fiscal year ending
7 June 30, 1971" and inserting in lieu thereof "each of the
8 succeeding fiscal years ending prior to July 1, 1976".

9 INSURED STUDENT LOANS—EXTENSION OF PROGRAM

10 SEC. 144. (a) Section 424 (a) of the Higher Education
11 Act of 1965 is amended by striking out "three succeeding
12 fiscal years" and inserting in lieu thereof "succeeding fiscal
13 years ending prior to July 1, 1976".

14 (b) Such section 424 (a) is further amended by strik-
15 ing out "June 30, 1975" and inserting in lieu thereof
16 "June 30, 1980".

17 (c) Paragraph (4) of section 428 (a) of such Act is
18 amended (A) by striking out "June 30, 1971" and inserting
19 in lieu thereof "June 30, 1980" and (B) by striking out
20 "shall end at the close of June 30, 1975" and inserting in
21 lieu thereof "shall end at the close of June 30, 1980".

22 (d) Section 433 (c) of such Act is amended by striking
23 out "two succeeding fiscal years" and inserting in lieu thereof
24 "succeeding fiscal years ending prior to July 1, 1976".

1 SECONDARY MARKET FOR STUDENT LOANS

2 SEC. 145. Part B of title IV of the Higher Education
3 Act of 1965 is amended by adding at the end thereof the
4 following new section:

5 "EDUCATION WAREHOUSE LOANS

6 "SEC. 438. (a) (1) The Commissioner is authorized to
7 make an education warehouse loan to an eligible lender
8 under the conditions set forth in this section. No such loan
9 shall be made after June 30, 1973.

10 "(2) An education warehouse loan may be made only
11 to an eligible lender who is determined by the Commissioner,
12 in accordance with criteria established by regulation—

13 "(A) to hold qualifying insured loans;

14 "(B) to have issued to the Commissioner an edu-
15 cational warehouse certificate evidencing the loan; and

16 "(C) to have entered into a satisfactory agreement
17 with the Commissioner which meets the requirements set
18 forth in the second sentence of this paragraph.

19 An agreement pursuant to clause (c) of the first sentence
20 of this paragraph must—

21 "(i) identify the qualifying student loans covered
22 by the agreement;

23 "(ii) set forth such policies, procedures, and as-
24 surances as the Commissioner may deem necessary to
25 insure that the eligible lender will use the proceeds of

1 the educational warehouse loan for making insured
2 student loans;
3 "(iii) provide for such reports and amendments as
4 may be necessary in order to meet the requirements of
5 paragraph (4);
6 "(iv) include such provisions as the Commissioner
7 determines necessary to protect the financial interest of
8 the United States;
9 "(v) provide for making such reports, in such form
10 and containing such information as the Commissioner
11 may require, and for keeping such records and affording
12 such access thereto as the Commissioner may find neces-
13 sary; and
14 "(vi) contain an assurance that the lender will
15 not use any practice, policy, or procedure which has
16 the effect of discriminating against particular classes or
17 categories of students, including the requirement that,
18 as a condition to the receipt of an insured student loan,
19 the student or his family maintain a business relationship
20 with the lender other than a relationship necessary for
21 the servicing and repayment of the loan.
22 "(3) An education warehouse loan shall be repaid in
23 such manner and at such time or times as the Commissioner
24 may agree to in the loan agreement, and shall bear interest
25 at a rate prescribed by the Commissioner at the time the

1 loan agreement is signed, taking into consideration the yield
2 on education warehouse certificates negotiated, assigned, or
3 sold by the Commissioner under subsection (b).
4 "(4) If one or more insured student loans identified for
5 the purposes of clause (A) of paragraph (2) in the educa-
6 tion warehouse loan agreement cease to be qualifying insured
7 student loans during any month (or are not held by such
8 lender at the close of such month), then the eligible lender
9 to whom the education warehouse loan is made shall at the
10 close of such month make a report to the Commissioner with
11 respect to such insured student loans, and shall, prior to the
12 end of the succeeding month, either (A) repay a portion of
13 such education warehouse loan equal to 80 per centum of the
14 outstanding principal balance (determined at the beginning
15 of such preceding month) of the insured student loans which
16 ceased to be qualifying insured students (or are no longer
17 held), or (B) substitute for purposes of the requirement of
18 such clause (A) one or more qualified insured student loans,
19 the aggregate principal amount of which is not less than the
20 aggregate principal amount of the insured student loans for
21 which they were substituted. Any loan so substituted shall
22 be identified in an amendment to the loan agreement and
23 shall, for purposes of applying this paragraph in any month
24 after the month of substitution, be considered to be a loan
25 identified in the loan agreement.

1 "(b) For the purposes of obtaining funds to finance
2 his operations under subsection (a) and of establishing a
3 secondary market for education warehouse certificates, the
4 Commissioner is hereby authorized—
5 "(1) to assign, negotiate, or sell education ware-
6 house certificates which he has acquired under subsection
7 (a); and
8 "(2) to reacquire such certificates.
9 The terms upon which such certificates are assigned, negoti-
10 ated, sold, or reacquired shall be determined by the Com-
11 missioner in accordance with regulations promulgated by
12 him.
13 "(c) (1) There is hereby created within the Treasury
14 an education warehouse revolving fund which shall be
15 available to the Commissioner without fiscal year limitation
16 as a revolving fund for the purposes of this section.
17 "(2) The Commissioner is authorized, in order to obtain
18 capital for the fund, to issue to the Secretary of the Treasury
19 notes or other obligations in such forms and denominations,
20 bearing such maturities, and subject to such terms and condi-
21 tions as may be prescribed by the Commissioner with the
22 approval of the Secretary of the Treasury. Such notes or
23 other obligations shall bear interest at a rate determined by
24 the Secretary of the Treasury, taking into consideration the
25 average yield to maturity, on the basis of daily closing mar-

1 ket bid quotations or prices during the month preceding the
2 issuance of the notes or other obligations, on all outstanding
3 marketable obligations of the United States having a ma-
4 turity date of five years from any day of such month, and by
5 adjusting such estimated average annual yield to the nearest
6 one-eighth of 1 per centum. The Secretary of the Treasury
7 is authorized and directed to purchase any notes and other
8 obligations issued under this subsection and for that purpose
9 he is authorized to use as a public debt transaction the pro-
10 ceeds from the sale of any securities issued prior to July 1,
11 1972, under the Second Liberty Bond Act, as amended, and
12 the purposes for which securities may be issued under that
13 Act, as amended, are extended to include any purchase of
14 such notes and obligations. Any securities issued for purposes
15 of this subsection by the Secretary of the Treasury under the
16 Second Liberty Bond Act shall be known as education bonds.
17 The Secretary of the Treasury may at any time sell any of
18 the notes or other obligations acquired by him under this
19 paragraph. All redemptions, purchases, and sales by the
20 Secretary of the Treasury of such notes or other obligations
21 shall be treated as public debt transactions of the United
22 States. Sums borrowed under this paragraph shall be de-
23 posited in the fund and redemption of such notes and obliga-
24 tions shall be made by the Commissioner from such fund. The
25 aggregate principal amount of education bonds issued in a

1 fiscal year may not exceed any limitation placed thereon in
2 an appropriation Act for such fiscal year.
3 "(3) All amounts received by the Commissioner as
4 interest payments or repayments of principal on education
5 warehouse loans, and any other moneys, property, or assets
6 derived by him from his operations in connection with this
7 section shall be deposited in the fund.
8 "(4) All loans, expenses, and payments pursuant to
9 operations of the Commissioner under this section shall be
10 paid from the fund. If at any time the Commissioner deter-
11 mines that moneys in the fund exceed the present and any
12 reasonably future requirements of the fund, such excess may
13 be transferred to the general fund of the Treasury.
14 "(d) The following definition apply to terms used in
15 this section:
16 "(1) 'Insured student loan' means a student loan—
17 "(A) insured by the Commissioner under this
18 section; or
19 "(B) insured by a State or nonprofit private
20 loan insurance program covered by an agreement
21 made under section 428(b).
22 "(2) 'Qualifying insured student loan' means an
23 outstanding insured loan on which repayment of prin-
24 cipal has neither been made nor been required to be
25 made under the loan agreement between the lender and
26 the student.".

1 EXTENSION OF THE EMERGENCY INSURED STUDENT LOAN
2 ACT OF 1969

3 SEC. 146. Section 2 (a) (7) of the Emergency Insured
4 Student Loan Act of 1969 is amended by striking out
5 "July 1, 1971" and inserting in lieu thereof "July 1, 1973".

6 COLLEGE WORK STUDY PROGRAM

7 SEC. 147. Section 441 (b) of the Higher Education Act
8 of 1965 is amended by striking out "the fiscal year ending
9 June 30, 1971" and inserting in lieu thereof "each of the
10 succeeding fiscal years ending prior to July 1, 1976".

11 COOPERATIVE EDUCATION

12 SEC. 148. (a) Section 451 (a) of the Higher Education
13 Act of 1965 is amended by striking out "the fiscal year end-
14 ing June 30, 1971" and inserting in lieu thereof "each of the
15 succeeding fiscal years ending prior to July 1, 1976".

16 (b) Section 451 (b) of such Act is amended by striking
17 out "two succeeding fiscal years" and inserting in lieu
18 thereof "succeeding fiscal years ending prior to July 1,
19 1976".

20 FEDERAL LOANS TO STUDENTS IN INSTITUTIONS OF HIGHER
21 EDUCATION

22 SEC. 149. (a) Section 201 of the National Defense Edu-
23 cation Act of 1958 is amended by inserting "each" after
24 "$375,000,000", and by inserting after "June 30, 1971,"

1 the following: "and for the fiscal year ending June 30,
2 1972,".
3 (b) Title IV of the Higher Education Act of 1965 is
4 amended by striking out part F. Part E and sections 461,
5 462, 463, 464, and 469 of such title IV, and all references
6 thereto, are redesignated as part F and sections 491, 492,
7 493, 494, and 499, respectively. Such title IV is further
8 amended by inserting after part D the following new part:
9 "PART E—FEDERAL LOANS TO STUDENTS IN INSTITU-
10 TIONS OF HIGHER EDUCATION
11 "APPROPRIATIONS AUTHORIZED
12 "SEC. 461. (a) The Commissioner shall carry out a
13 program of stimulating and assisting in the establishment and
14 maintenance of funds at institutions of higher education for
15 the making of low-interest loans to students in need thereof
16 to pursue their courses of study in such institutions.
17 "(b) For the purpose of enabling the Commissioner
18 to make contributions to loan funds established under this
19 part, there are hereby authorized to be appropriated $375,-
20 000,000 for the fiscal year ending June 30, 1972, and for
21 each of the succeeding fiscal years ending prior to July 1,
22 1976.
23 "(c) In addition, there are hereby authorized to be
24 appropriated such sums for the fiscal year ending June 30,

1 1977, and each of the three succeeding fiscal years as may
2 be necessary to enable students who have received loans for
3 school years ending prior to July 1, 1976, to continue or
4 complete courses of study.
5 "(d) Any sums appropriated pursuant to this section
6 for any fiscal year shall be available for apportionment pur-
7 suant to section 462 and for payments of Federal capital
8 contributions thereform to institutions of higher education
9 which have agreements with the Commissioner under sec-
10 tion 463. Such Federal capital contributions and all con-
11 tributions from such institutions shall be used for the
12 establishment, expansion, and maintenance of student loan
13 funds.
14 "APPORTIONMENT OF APPROPRIATIONS
15 "SEC. 462. (a) (1) From the sums appropriated pur-
16 suant to section 461 (b) for any fiscal year, the Commis-
17 sioner shall apportion to each State an amount which bears
18 the same ratio to the amount so appropriated as the number
19 of persons enrolled on a full-time basis in institutions of
20 higher education, as determined by the Commissioner for
21 the most recent year for which satisfactory data are avail-
22 able to him, in such State bears to the total number of
23 persons so enrolled in all the States.
24 "(2) Any sums appropriated pursuant to section 461
25 (c) for any fiscal year shall be apportioned among institu-

1 tions of higher education in such a manner as the Commis-
2 sioner determines will best accomplish the purpose for which
3 they were appropriated.

4 "(b) (1) Any institution of higher education desiring to
5 receive payments of Federal capital contributions from the
6 apportionment of the State in which it is located for any fiscal
7 year shall make an agreement under section 463 and shall
8 submit an application therefor to the Commissioner, in ac-
9 cordance with the provisions of this part. The Commissioner
10 shall, from time to time, set dates before which such institu-
11 tions must file applications under this section.

12 "(2) The Commissioner shall pay to each applicant
13 under this subsection which has an agreement with him under
14 section 463, from the amount apportioned to the State in
15 which it is located, the amount requested in such application.
16 Such payment may be made in such installments as the Com-
17 missioner determines will not result in unused accumulations
18 of capital in the student loan fund of the applicant established
19 under its agreement under section 463.

20 "(c) (1) (A) If the total amount of Federal capital
21 contributions requested in the applications from a State for
22 any fiscal year exceeds the amount apportioned to that State,
23 the request from each institution shall be reduced ratably.

24 "(B) In case additional amounts become available for
25 payments to student loan funds in a State in which requests

1 have been ratably reduced under subparagraph (A), such
2 requests shall be increased on the same basis as they were
3 reduced, except that no request shall be increased above the
4 request submitted under subsection (c) (1).
5 "(2) If the amount of an apportionment to a State for
6 any fiscal year exceeds the total amount of Federal capital
7 contributions requested in applications from that State, such
8 excess shall be available for reapportionment from time to
9 time on such date or dates as the Commissioner shall fix.
10 From the aggregate of such excess for any fiscal year, the
11 Commissioner shall reapportion to each State in which re-
12 quests suffered a reduction under paragraph (1) (A) an
13 amount which bears the same ratio to such aggregate as the
14 total amount of reductions so suffered in that State bears to
15 the total amount of such reductions in all the States.
16 "(d) The aggregate of the amounts of Federal capital
17 contributions paid under this section for any fiscal year to
18 proprietary institutions of higher education may not exceed
19 the amount by which the sums appropriated pursuant to
20 section 461 (b) for that fiscal year exceed $190,000,000.
21 "AGREEMENTS WITH INSTITUTIONS OF HIGHER EDUCATION
22 "SEC. 463. (a) An agreement with any institution of
23 higher education for the payment of Federal capital contri-
24 butions under this part shall—
25 "(1) provide for the establishment and maintenance

1 of a student loan fund for the purposes of this part;
2 "(2) provide for the deposit in such fund of—
3 "(A) the Federal capital contributions,
4 "(B) a capital contribution by such institution
5 in an amount equal to not less than one-ninth of
6 the amount of such Federal contributions,
7 "(C) collections of principal and interest on
8 student loans made from such fund,
9 "(D) charges collected pursuant to regulations
10 under section 464 (c) (1) (G), and
11 "(E) any other earnings of the fund;
12 "(3) provide that such student loan fund shall be
13 used only for—
14 "(A) loans to students, in accordance with the
15 provisions of this part,
16 "(B) administrative expenses, as provided in
17 subsection (b),
18 "(C) capital distributions, as provided in sec-
19 tion 466, and
20 "(D) costs of litigation, and other collection
21 costs authorized by the Commissioner by regulation
22 in connection with the collection of a loan from the
23 fund (and interest thereon) or a charge assessed
24 pursuant to regulations under section 464 (c) (1)
25 (G), and

1 "(4) include such other provisions as may be nec-
2 essary to protect the financial interest of the United
3 States and promote the purposes of this part as are
4 agreed to by the Commissioner and the institution.
5 "(b) An institution which has entered into an agree-
6 ment under subsection (a) shall be entitled, for each fiscal
7 year during which it makes student loans from a student loan
8 fund established under such agreement, to a payment in lieu
9 of reimbursement for its expenses in administering its student
10 loan program under this part during such year. Such pay-
11 ment shall be made in accordance with section 493.

12 "TERMS OF LOANS

13 "SEC. 464. (a) (1) Loans from any student loan fund
14 established pursuant to an agreement under section 463 to
15 any student by any institution shall, subject to such condi-
16 tions, limitations, and requirements as the Commissioner shall
17 prescribe by regulation, be made on such terms and condi-
18 tions as the institution may determine.
19 "(2) The total of such loans for any academic year (or
20 its equivalent) made by institutions from student loan funds
21 assisted under this part shall not exceed—
22 "(A) $2,500, in the case of any graduate student
23 or professional student (as defined by regulation); or
24 "(B) $1,000, in the case of any other student.
25 The aggregate of the loans for all years from such funds shall

1 not exceed $10,000 in the case of any such graduate or pro-
2 fessional student, or $5,000 in the case of any other student.
3 "(3) Regulations of the Commissioner under paragraph
4 (1) shall be designed to prevent the impairment of the
5 capital of student loan funds to the maximum extent prac-
6 ticable.
7 "(b) A loan from a student loan fund assisted under
8 this part may be made only to a student who—
9 "(1) is in need of the amount of the loan to pursue
10 a course of study at such institution;
11 "(2) is capable, in the opinion of the institution,
12 of maintaining good standing in such course of study;
13 "(3) has been accepted for enrollment as an under-
14 graduate, graduate, or professional student in such insti-
15 tution or, in the case of a student already in attendance
16 at such institution, is in good standing; and
17 "(4) is carrying at least one-half the normal aca-
18 demic workload, as determined by the institution.
19 In any case in which a student has been determined to be
20 eligible for a loan under the preceding sentence, and such
21 student thereafter fails to maintain good standing, the eligi-
22 bility of such student shall be suspended, and further pay-
23 ments to, or on behalf of, such student shall not be made
24 until such student regains good standing.
25 "(c) (1) Any agreement between an institution and a

1 student for a loan from a student loan fund assisted under
2 this part—
3 "(A) shall be evidenced by a note or other written
4 instrument which, except as is provided in paragraph
5 (2), provides for repayment of the principal amount of
6 the loan, together with interest thereon, in installments
7 over a period (i) beginning nine months after the stu-
8 dent ceases to carry at least one-half the normal full-time
9 academic workload at an institution of higher education
10 and (ii) ending ten years and nine months after such
11 date;
12 "(B) shall include provision for acceleration of re-
13 payment of the whole, or any part, of such loan, at the
14 option of the borrower;
15 "(C) may provide, at the option of the institution
16 in accordance with regulations of the Commissioner, that
17 during the repayment period of the loan, payments of
18 principal and interest by the borrower with respect to
19 all outstanding loans made to him from student loan
20 funds assisted under this part shall be at a rate equal to
21 not less than $15 per month;
22 "(D) shall provide that the loan shall bear interest,
23 on the unpaid balance of the loan, at the rate of 3 per
24 centum per annum, except that no interest shall accrue
25 (i) prior to the beginning date of repayment determined

1 under clause (A) (i), or (ii) during any period in which
2 repayment is suspended by reason of paragraph (2);
3 "(E) unless the borrower is a minor and the note or
4 other evidence of obligation executed by him would not,
5 under applicable law, create a binding obligation, shall
6 provide that the loan shall be made without security and
7 without endorsement;
8 "(F) shall provide that no note or evidence of obli-
9 gation may be assigned by the lender, except upon the
10 transfer of the borrower to another institution participat-
11 ing under this part (or, if not so participating, is eligible
12 to do so and is approved by the Commissioner for such
13 purpose), to such institution; and
14 "(G) may, pursuant to regulations of the Com-
15 missioner, provide for an assessment of a charge with
16 respect to the loan for failure of the borrower (i) to
17 pay all or part of an installment when it is due or (ii)
18 to file timely and satisfactory evidence of an entitle-
19 ment of the borrower to a deferment of repayment
20 benefit or a cancellation benefit provided under this part.
21 "(2) (A) No repayment of principal of, or interest
22 on, any loan from a student loan fund assisted under this
23 part shall be required during any period in which the
24 borrower—
25 "(i) is carrying at least one-half the normal full-

1 time academic workload at an institution of higher
2 education or at a comparable institution outside the
3 United States which is approved for this purpose by
4 the Commissioner;
5 "(ii) is a member of the Armed Forces of the
6 United States;
7 "(iii) is in service as a volunteer under the Peace
8 Corps Act; or
9 "(iv) is in service as a volunteer under title VIII
10 of the Economic Opportunity Act of 1964.
11 The period during which repayment may be deferred by
12 reason of clause (ii), (iii), or (iv) shall not exceed three
13 years.
14 "(B) Any period during which repayment is deferred
15 under subparagraph (A) shall not be included in comput-
16 ing the ten-year maximum period provided for in clause
17 (A) of paragraph (1).
18 "(3) The Commissioner is authorized, when good cause
19 is shown, to extend, in accordance with regulations, the ten-
20 year maximum repayment period provided for in clause
21 (A) of paragraph (1) with respect to individual loans.
22 "CANCELLATION OF LOANS FOR CERTAIN PUBLIC SERVICE
23 "SEC. 465. (a) (1) The per centum specified in para-
24 graph (3) of the total amount of any loan made after

1 June 30, 1972, from a student loan fund established under
2 this part shall be canceled for each complete year of service
3 after such date by the borrower under circumstances de-
4 scribed in paragraph (2).
5 "(2) Loans shall be canceled under paragraph (1) for
6 service—
7 "(A) as a full-time teacher in a public or other non-
8 profit elementary or secondary school in a State, in an
9 institution of higher education, or in an elementary or
10 secondary school overseas of the Armed Forces of the
11 United States;
12 "(B) as a full-time teacher in a public or other non-
13 profit elementary or secondary school in the school dis-
14 trict of a local educational agency receiving assistance
15 under title I of the Elementary and Secondary Education
16 Act of 1965 if such school is determined (according to
17 criteria established by regulation which shall permit
18 such determination with respect to not more than 50 per
19 centum of such schools in any State) to be serving an
20 attendance area in which there is a high concentration of
21 children from low-income families;
22 "(C) as a full-time teacher of handicapped children
23 in a public or other nonprofit elementary or secondary
24 school system;

1 "(D) as a member of the Armed Forces of the
2 United States, and notwithstanding the provisions of
3 paragraph (1).
4 For the purposes of this paragraph, (i) the term 'handi-
5 capped children' means children who are mentally retarded,
6 hard of hearing, deaf, speech-impaired, visually handicapped,
7 seriously emotionally disturbed, or other health-impaired chil-
8 dren who by reason thereof require special education, and
9 (ii) the term 'children from low-income families' means chil-
10 dren from families with a family income which is not in
11 excess of the low-income factor determined under section 103
12 of title I of the Elementary and Secondary Education Act of
13 1965.
14 "(3) (A) The per centum of a loan which shall be can-
15 celed under paragraph (1) is—
16 "(i) in the case of service described in paragraph
17 (2) (A), not to exceed a total of 50 per centum of such
18 loan at the rate of 10 per centum for each year of such
19 service;
20 "(ii) in the case of service described in paragraph
21 (2) (B), (2) (C), or (2) (D), 15 per centum for the
22 first or second year of such service, 20 per centum for the
23 third or fourth year of such service, and 30 per centum
24 for the fifth year of such service; and
25 "(iii) in the case of service described in paragraph

1 (2) (E), not to exceed a total of 50 per centum of such
2 loan at the rate of 12½ per centum for each year of con-
3 secutive service.
4 "(B) If a portion of a loan is canceled under this sub-
5 section for any year, the entire amount of interest on such
6 loan which accrues for such year shall be canceled.
7 "(C) Nothing in this subsection shall be construed to
8 authorize refunding any repayment of a loan.
9 "(4) For the purposes of this subsection, the term
10 'year' where applied to service as a teacher means academic
11 year as defined by the Commissioner.
12 "(b) The Commissioner shall pay to each institution
13 each fiscal year an amount equal to the aggregate of the
14 amounts of loans from its student fund which are canceled
15 by this section. The Department of Health, Education, and
16 Welfare, in its annual budget request, shall submit an esti-
17 mate of appropriations necessary to make payments pursu-
18 ant to this subsection. None of the funds appropriated pur-
19 suant to section 461 shall be available for payments pursu-
20 ant to this subsection.
21 "DISTRIBUTION OF ASSETS FROM STUDENT LOAN FUNDS
22 "SEC. 466. (a) After June 30, 1981, and not later than
23 December 31, 1981, there shall be a capital distribution of
24 the balance of the student loan fund established under this
25 part by each institution of higher education as follows:

1 "(1) The Commissioner shall first be paid an
2 amount which bears the same ratio to the balance in
3 such fund at the close of June 30, 1981 as the total
4 amount of the Federal capital contributions to such fund
5 by the Commissioner under this part bears to the sum
6 of such Federal contributions and the institution's cap-
7 ital contributions to such fund.
8 "(2) The remainder of such balance shall be paid
9 to the institution.
10 "(b) After December 31, 1981, each institution with
11 which the Commissioner has made an agreement under this
12 part, shall pay to the Commissioner the same proportionate
13 share of amounts received by the institution after June 30,
14 1975, in payment of principal and interest on student loans
15 made from the student loan fund established pursuant to
16 such agreement (which amount shall be determined after
17 deduction of any costs of litigation incurred in collection of
18 the principal or interest on loans from the fund and not
19 already reimbursed from the fund or from such payments
20 of principal or interest), as was determined for the Com-
21 missioner under subsection (a).".
22 (c) (1) Upon enactment of this Act, the program au-
23 thorized by part E of title IV of the Higher Education Act
24 of 1965 as added by subsection (b) is, and shall be deemed
25 to be, a continuation of the program authorized by title II

1 of the National Defense Education Act of 1958. In accord-
2 ance with regulations of the Commissioner of Education,
3 all rights, privileges, duties, functions, and obligations under
4 such title II prior to the enactment of this Act shall be
5 deemed to be vested, as may be appropriate, under such
6 part E. Any student loan fund established under an agree-
7 ment under such title II shall, in accordance with regulations,
8 be deemed to have been established under such part E; and
9 any assets of any such student loan fund of any institution
10 shall be deemed to be the assets of a student loan fund
11 established under an agreement of that institution with the
12 Commissioner under such part E.

13 (2) Title II of the National Defense Education Act of
14 1958 is amended by striking out section 206.

15 ELIGIBILITY FOR STUDENT ASSISTANCE

16 SEC. 150. (a) Part F of title IV of the Higher Educa-
17 tion Act of 1965 is amended by inserting after section 464,
18 the following new section:

19 "ELIGIBILITY FOR STUDENT ASSISTANCE

20 "SEC. 495. (a) If an institution of higher education de-
21 termines, after affording notice and opportunity for hearing to
22 an individual attending, or employed by, such institution, that
23 such individual has been convicted by any court of record of
24 any crime which was committed after the date of enactment
25 of this Act and which involved the use of (or assistance to

1 others in the use of) force, disruption, or the seizure of prop-
2 erty under control of any institution of higher education to
3 prevent officials or students in such institution from engag-
4 ing in their duties or pursuing their studies, and that such
5 crime was of a serious nature and contributed to a substantial
6 disruption of the administration of the institution with respect
7 to which such crime was committed, then the institution
8 which such individual attends, or is employed by, shall deny
9 for a period of two years any further payment to, or for the
10 direct benefit of, such individual under any of the programs
11 specified in subsection (c). If an institution denies an indi-
12 vidual assistance under the authority of the preceding sen-
13 tence of this subsection, then any institution which such indi-
14 vidual subsequently attends shall deny for the remainder of
15 the two-year period any further payment to, or for the direct
16 benefit of, such individual under any program authorized by
17 this title.

18 "(b) If an institution of higher education determines,
19 after affording notice and opportunity for hearing to an indi-
20 vidual attending, or employed by, such institution, that such
21 individual has willfully refused to obey a lawful regulation or
22 order of such institution after the date of enactment of this
23 Act, and that such refusal was of a serious nature and con-
24 tributed to a substantial disruption of the administration of
25 such institution, then such institution shall deny, for a period

of two years, any further payment to, or for the direct benefit of, such individual under any program authorized by this title.

"(c) (1) Nothing in this Act, or any Act amended by this Act, shall be construed to prohibit any institution of higher education from refusing to award, continue, or extend any financial assistance under any such Act to any individual because of any misconduct which in its judgment bears adversely on his fitness for such assistance.

"(2) Nothing in this section shall be construed as limiting or prejudicing the rights and prerogatives of any institution of higher education to institute and carry out an independent, disciplinary proceeding pursuant to existing authority, practice, and law.

"(3) Nothing in this section shall be construed to limit the freedom of any student to verbal expression of individual views or opinions.".

(b) Effective July 1, 1971, section 504 of Public Law 90–575 is repealed.

PART E—EDUCATION PROFESSIONS DEVELOPMENT

EXTENSION OF AUTHORIZATION OF APPROPRIATIONS

SEC. 151. (a) (1) Section 501 of the Higher Education Act of 1965 is amended by inserting "(a)" after "SEC. 501." and by adding at the end thereof the following new subsection:

1 "(b) For the purpose of carrying out the provisions of
2 this title, there are authorized to be appropriated $600,-
3 000,000 for the fiscal year ending June 30, 1972, and for
4 each of the succeeding fiscal years ending prior to July 1,
5 1976, of which—
6 "(1) not less than $500,000 shall be for the pur-
7 poses of section 504;
8 "(2) not less than 25 per centum or $37,500,000,
9 whichever is greater, shall be for the purposes of sub-
10 part 1 of part B;
11 "(3) not less than 2 per centum shall be for the
12 purposes of subpart 2 of part B;
13 "(4) not less than 15 per centum shall be for the
14 purposes of part C;
15 "(5) not less than 10 per centum shall be for the
16 purposes of part D;
17 "(6) not less than 10 per centum shall be for the
18 purposes of part E; and
19 "(7) not less than 10 per centum shall be for the
20 purposes of part F.".
21 (2) The amendments made by paragraph (1) shall be
22 effective after, and only with respect to appropriations for
23 fiscal years beginning after, June 30, 1971.
24 (b) (1) Effective on and after July 1, 1971, title V

of the Higher Education Act of 1965 is amended by striking out the following provisions:

(A) Section 502 (f);

(B) Section 504 (b);

(C) Section 511 (b) and "(a)" where it appears after "SEC. 511.";

(D) Section 518 (b) and "(a)" where it appears after "SEC. 518.";

(E) Section 528;

(F) Section 532;

(G) Section 543; and

(H) Section 555.

(2) Section 519 (a) of such title V is amended by striking out that part of the first sentence which precedes ", the Commissioner" and inserting in lieu thereof the following: "From the amount available for grants under this subpart for any fiscal year".

(3) The Department of Health, Education, and Welfare shall, under the authority of section 401 (c) and of part C of the General Education Provisions Act, submit to the Congress an estimate of the sums necessary to carry out section 502 of such title V.

(4) The amendments made by this section shall be effective with respect to fiscal years beginning after June 30, 1971.

1 FUNCTIONS OF, AND COMPENSATION FOR, THE DIRECTOR
2 OF THE TEACHER CORPS

3 SEC. 152. (a) Section 512 of the Higher Education Act
4 of 1965 is amended by striking out "grade 17" and inserting
5 in lieu thereof "grade 18" and by striking out "grade 16"
6 and inserting in lieu thereof "grade 17".

7 (b) The third sentence of such section 512 is amended
8 by inserting before the period at the end thereof the follow-
9 ing: ", except that (1) the Commissioner may delegate his
10 functions under this subpart only to the Director, and (2)
11 the Director and Deputy Director shall not be given any
12 duty, function, authority, or responsibility other than those
13 imposed or granted by this subpart".

14 PART F—INSTRUCTIONAL EQUIPMENT

15 EXTENSION OF AUTHORIZATION OF APPROPRIATIONS

16 SEC. 171. Subsections (b) and (c) of section 601 and
17 the Higher Education Act of 1965 are each amended by
18 striking out "two succeeding fiscal years" and inserting in
19 lieu thereof "succeeding fiscal years ending prior to July 1,
20 1976".

21 PART G—ACADEMIC FACILITIES

22 TRANSFER OF THE PROVISIONS OF THE HIGHER EDUCATION
23 FACILITIES ACT OF 1963

24 SEC. 161. (a) Title VII of the Higher Education Act
25 of 1965 is amended to read as follows:

1 "TITLE VII—CONSTRUCTION OF ACADEMIC
2 FACILITIES

3 "PART A—GRANTS FOR THE CONSTRUCTION OF UNDER-
4 GRADUATE ACADEMIC FACILITIES

5 "AUTHORIZATION OF APPROPRIATIONS

6 "SEC. 701. (a) The Commissioner shall carry out a
7 program of grants to institutions of higher education for
8 the construction of academic facilities in accordance with
9 this part.

10 "(b) For the purpose of making grants under this
11 part, there are hereby authorized to be appropriated $936,-
12 000,000 for the fiscal year ending June 30, 1972 and for
13 each of the succeeding fiscal years ending prior to July 1,
14 1976.

15 "(c) Of the sums appropriated pursuant to section 701
16 (b), not less than 25 per centum nor more than 33⅓ per
17 centum shall be reserved by the Commissioner and allotted
18 among the States under section 702. The remainder of such
19 sums shall be available for allotment among the States under
20 section 703.

21 "PUBLIC COMMUNITY COLLEGES AND PUBLIC
22 TECHNICAL INSTITUTES

23 "SEC. 702. (a) Sums reserved pursuant to the first
24 sentence of section 701 (c) shall be available for allotments
25 to States for providing academic facilities for public com-
26 munity colleges and public technical institutes.

1 "(b) From the sums available for any fiscal year for
2 the purposes of this section, the Commissioner shall allot to
3 each State an amount which bears the same ratio to such
4 sums as the product of—
5 "(1) the number of high school graduates of the
6 State, and
7 "(2) the State's allotment ratio,
8 bears to the sum of the corresponding products for all the
9 States, except that the amount allowed to any State shall
10 not be less than $50,000.
11 "(c) (1) Except as is provided in paragraph (2), the
12 amount allotted to a State under this section shall be avail-
13 able for the payment of the Federal share of the develop-
14 ment cost of approved projects for the construction of aca-
15 demic facilities within such State for public community
16 colleges and public technical institutes.
17 "(2) Any portion of a State's allotment under this
18 section for any fiscal year for which applications from an
19 institution qualified to receive grants under this section have
20 not been received by the State Commissioner prior to
21 January 1 of such fiscal year, shall, if the State Commissioner
22 so requests, be available for payment of the Federal share
23 of the development cost of approved projects under section
24 703.
25 "(d) All amounts allotted under this section for any

1 fiscal year which are not reserved as provided in section
2 109 by the close of the fiscal year for which they are allotted
3 shall be reallotted by the Commissioner, on the basis of
4 such factors as he determines to be equitable and reasonable,
5 among the States which, as determined by the Commissioner,
6 are able to use without delay any amounts so reallotted
7 for the purpose set forth in subsection (c) (1). Amounts
8 reallotted under this subsection shall be available for reser-
9 vation until the close of the fiscal year next succeeding the
10 fiscal year for which they were originally allotted.
11 "(e) For the purposes of clause (2) of subsection (b),
12 the 'allotment ratio' for any State shall be 1.00 less the
13 product of (A) 0.50 and (B) the quotient obtained by
14 dividing the income per person for the State by the income
15 per person for all the States (not including Puerto Rico, the
16 Virgin Islands, American Samoa, and Guam), except that
17 (i) the allotment ratio shall in no case be less than 0.33⅓
18 or more than 0.66⅔, (ii) the allotment ratio for Puerto
19 Rico, the Virgin Islands, American Samoa, and Guam shall
20 be 0.66⅔, and (iii) the allotment ratio of any State shall
21 be 0.50 for any fiscal year if the Commissioner finds that
22 the cost of school construction in such State exceeds twice
23 the median of such costs in all the States as determined by
24 him on the basis of statistics and data as the Commissioner
25 shall deem adequate and appropriate. The allotment ratios

1 shall be promulgated by the Commissioner as soon as possible
2 after enactment of this Act, and annually thereafter, on the
3 basis of the average of the incomes per person of the State
4 and of all the States for the three most recent consecutive
5 calendar years for which satisfactory data are available from
6 the Department of Commerce.

7 "INSTITUTIONS OF HIGHER EDUCATION OTHER THAN PUB-
8 LIC COMMUNITY COLLEGES AND PUBLIC TECHNICAL
9 INSTITUTES

10 "SEC. 703. (a) Sums appropriated pursuant to section
11 701 (b) which remain after the reservation provided for in
12 the first sentence of section 701 (c) for any fiscal year shall
13 be available for allotments to States for providing academic
14 facilities for institutions of higher education other than insti-
15 tutions eligible for grants under section 702.

16 "(b) Sums available for the purposes of this section for
17 any fiscal year shall be allotted among the States as follows:

18 "(1) The Commissioner shall allot to each State an
19 amount which bears the same ratio to 50 per centum of
20 such sums as the number of students enrolled in institu-
21 tions of higher education in such State bears to the num-
22 ber of students so enrolled in all the States: and

23 "(2) The Commissioner shall allot to each State an
24 amount which bears the same ratio to 50 per centum of
25 such sums as the number of students enrolled in grades

60-433 O - 71 - pt. 1 -- 5

1 nine through twelve (both inclusive) of schools in such
2 State bears to the total number of students so enrolled in
3 all the States.
4 The amount allotted to any State under the preceding sen-
5 tence for any fiscal year shall not be less than $50,000.
6 "(c) (1) Any amount allotted to a State under this
7 section for any fiscal year shall, except as provided in para-
8 graph (2), be available, in accordance with the provisions
9 of this title, for payment of the Federal share of the develop-
10 ment cost of approved projects for the construction of aca-
11 demic facilities within such State for institutions of higher
12 education which are not eligible for grants under section 702.
13 "(2) Any portion of a State's allotment under this
14 section for any fiscal year for which applications from an
15 institution qualified to receive grants under this section have
16 not been received by the State Commissioner prior to
17 January 1 of such fiscal year, shall, if the State Commissioner
18 so requests, be available for payment of the Federal share
19 of the development cost of approved projects under section
20 702.
21 "STATE PLANS
22 "SEC. 704. (a) Any State desiring to participate in the
23 grant program authorized by this part for any fiscal year
24 shall submit for that year to the Commissioner through the
25 State commission a State plan for such participation. Such

1 plan shall be submitted at such time, in such manner, and
2 containing such information as may be necessary to enable
3 the Commissioner to carry out his functions under this part
4 and shall—
5 "(1) provide that it shall be administered by the
6 State commission;
7 "(2) set forth objective standards and methods,
8 which are consistent with basic criteria prescribed by
9 regulation pursuant to section 706, for—
10 "(A) determining the relative priorities of
11 eligible projects submitted by institutions of higher
12 education within the State for the construction of
13 academic facilities, and
14 "(B) determining the Federal share of the
15 development cost of each such project;
16 "(3) provide that the funds apportioned for any
17 fiscal year under section 702 or 703 shall be used only
18 for the purposes set forth therein;
19 "(4) provide for—
20 "(A) assigning priorities solely on the basis of
21 such criteria, standards, and methods to eligible proj-
22 ects submitted to the State commission and found by
23 it otherwise approvable under the provisions of this
24 part, and
25 "(B) approving and recommending to the

1 Commissioner, in the order of such priority, appli-
2 cation covering such eligible projects, and for certify-
3 ing to the Commissioner the Federal share of the
4 development cost of the project involved;
5 "(5) provide for affording to every applicant which
6 has submitted a project to the State commission an op-
7 portunity for a fair hearing before the State commission
8 as to the priority assigned to such project, or as to any
9 other determination of the State commission adversely
10 affecting such applicant;
11 "(6) provide for—
12 "(A) such fiscal control and fund accounting
13 procedures as may be necessary to assure proper
14 disbursement of, and accounting for, Federal funds
15 paid to the State commission under this part, and
16 "(B) making such reports, in such form and
17 containing such information, as may be reasonably
18 necessary to enable the Commissioner to perform his
19 functions under this part.
20 "(b) The Commissioner shall approve any State plan
21 submitted under this section if he determines that it complies
22 with the provisions of this section and other appropriate pro-
23 visions of this title.
24 "ELIGIBILITY FOR GRANTS
25 "SEC. 705. (a) Except as is provided in subsection

1 (b), an institution of higher education shall be eligible for a
2 grant under this part only if the State commission determines,
3 in accordance with criteria prescribed by regulation, that the
4 construction project for which assistance is sought will, either
5 alone or together with other construction to be undertaken
6 within a reasonable time, result in—
7 "(1) a substantial expansion of, or
8 "(2) the creation of,
9 urgently needed (A) enrollment capacity, (B) the capac-
10 ity to provide student health care or other student services,
11 or (C) capacity to carry out extension and continuing
12 education programs on the campus of such institution.
13 "(b) If the Commissioner determines, in accordance
14 with criteria established by regulation, that the student en-
15 rollment capacity of an institution of higher education would
16 decrease if an urgently needed academic facility is not con-
17 structed, the construction of such a facility may be consid-
18 ered, for the purposes of this section, to result in an expan-
19 sion of the institution's student enrollment capacity.
20 "BASIC CRITERIA FOR DETERMING PRIORITIES AND
21 FEDERAL SHARE
22 "SEC. 706. (a) (1) The Commissioner shall, by reg-
23 ulation, prescribe basic criteria to which the provisions of
24 State plans setting forth standards and methods for deter-
25 mining relative priorities of eligible construction projects,

1 and the application of such standards and methods to such
2 projects under such plans, shall be subject.
3 "(2) Such basic criteria shall, at least—
4 "(A) be such as will best tend to achieve the
5 objectives of this part, while leaving opportunity and
6 flexibility for the development of State plan standards
7 and methods that will best accommodate the varied
8 needs of institutions in the several States;
9 "(B) give special consideration to the expansion of
10 undergraduate enrollment capacity; and
11 "(C) give consideration to the expansion of capac-
12 ity to provide needed health care to students.
13 "(3) Subject to paragraph (2), such regulations may
14 establish additional and appropriate basic criteria, including—
15 "(A) provision for considering the degree to which
16 applicant institutions are effectively utilizing existing
17 facilities;
18 "(B) provision for allowing State plans to group,
19 or to allow grouping, in a reasonable manner, facilities
20 or institutions according to functional or educational type
21 for priority purposes; and
22 "(C) in view of the national objectives of this title,
23 provision for considering the degree to which applicant
24 institutions serve students from two or more States or
25 from outside the United States.

1 "(4) In no event shall such basic criteria permit the
2 readiness of an institution to admit out-of-State students to
3 be considered as a priority adverse to such institution.
4 "(b) (1) The Commissioner shall prescribe, by regu-
5 lation, the basic criteria for determining the Federal share
6 of the development cost of any eligible project under this
7 part within a State, to which criteria the applicable standards
8 and methods set forth in the State plan for such State shall
9 conform.
10 "(2) In no case shall such basic criteria permit the
11 Federal share to exceed 50 per centum of the development
12 cost of a project.
13 "(c) Section 553 of title V, United States Code shall
14 apply to the prescription of regulations under this section,
15 notwithstanding clause (2) of subsection (a) thereof.
16 "APPLICATIONS FOR GRANTS; AMOUNT OF GRANTS
17 "SEC. 707. (a) (1) Any institution of higher education
18 which desires to receive a grant under this part shall submit
19 an application therefor at such time or times, in such man-
20 ner, and containing such information as the Commissioner
21 shall prescribe by regulation.
22 "(2) The Commissioner shall approve an application
23 for a construction project under this part only if he deter-
24 mines that—

1 "(A) it meets the requirements prescribed under
2 paragraph (1);
3 "(B) the project for which assistance is sought is
4 an eligible project under section 705;
5 "(C) such project has been submitted through, and
6 been approved and recommended by, the appropriate
7 State Commission;
8 "(D) such State Commission has certified to the
9 Commissioner, in accordance with the State plan, the
10 Federal share of the development cost of the project,
11 and that sufficient funds to pay such Federal share are
12 available from the applicable apportionment of the State;
13 "(E) such project has, pursuant to the State plan,
14 been assigned a priority that is higher than that assigned
15 to all other projects within the State which are charge-
16 able to the same apportionment, and meet the require-
17 ments of this section, and for which Federal funds have
18 not yet been reserved;
19 "(F) the construction to be carried out under the
20 application will be undertaken in a timely and economic
21 manner and will not be of elaborate or extravagent de-
22 sign or materials;
23 "(G) in the case of a student health care facility,
24 no assistance will be provided for such facility under
25 title IV of the Housing Act of 1950; and

1 "(H) the application contains assurances or is sup-
2 ported by satisfactory assurances—
3 "(i) that title to the site is in accordance with
4 regulations of the Commissioner relating thereto,
5 "(ii) that Federal funds received by the appli-
6 cant will be solely used for defraying the develop-
7 ment cost of the project covered by the application,
8 "(iii) that sufficient funds will be available to
9 meet the non-Federal portion of such cost and to
10 provide for the effective use of the academic fa-
11 cility upon completion,
12 "(iv) that the facility will be used as an aca-
13 demic facility for at least the period of the Federal
14 interest therein, as provided in section 781, and
15 "(v) that the plans for such facilities comply
16 with such standards as the Secretary may prescribe,
17 or approve, in order to insure that facilities con-
18 structed with the use of Federal funds appropriated
19 under this part, shall be, to the extent appropriate
20 in view of the uses to be made of the facility, ac-
21 cessible to, and usable by, handicapped persons.
22 "(b) Amendments to applications submitted under this
23 section shall, except as the Commissioner may otherwise
24 provide by regulations, be subject to approval in the same
25 manner as original applications.

1 "(c) (1) Upon his approval of any application under
2 this section, the Commissioner shall reserve from the ap-
3 plicable apportionment available therefor, the amount of
4 such grant, which shall be equal to the Federal share of the
5 development cost of the project covered by the application,
6 and, in accordance with regulations, shall pay the amount
7 reserved to the applicant.

8 "(2) Upon approval of an amendment of an applica-
9 tion, or revision of the estimated development cost of a
10 project, for which there has been a reservation made under
11 paragraph (1), the Commissioner may adjust the amount
12 so reserved, accordingly. If an adjustment under the first
13 sentence of this section results in a greater amount being
14 reserved, he may reserve the Federal share of the added
15 cost only from the applicable apportionment available at the
16 time of such approval.

17 "ADMINISTRATION OF STATE PLANS; JUDICIAL
18 REVIEW

19 "SEC. 708. (a) (1) The Commissioner shall not finally
20 disapprove any State plan submitted under this title, or any
21 modification thereof, without first affording the State com-
22 mission submitting the plan reasonable notice and oppor-
23 tunity for a hearing.

24 "(2) Whenever the Commissioner, after reasonable
25 notice and opportunity for hearing to the State commission
26 administering a State plan approved under this title, finds—

1 "(A) that the State plan has been so changed that
2 it no longer complies with the provisions of section 704,
3 or
4 "(B) that in the adminstration of the plan there
5 is a failure to comply substantially with any such pro-
6 vision,
7 the Commissioner shall notify such State commission that
8 the State will not be regarded as eligible to participate in
9 the program under this title until he is satisfied that there
10 is no longer any such failure to comply.
11 "(b) (1) If any State is dissatisfied with the Commis-
12 sioner's final action with respect to the approval of its State
13 plan submitted under section 704, or with his final action
14 under subsection (a), such State may appeal to the United
15 States court of appeals for the circuit in which such State
16 is located. The summons and notice of appeal may be served
17 at any place in the United States. The Commissioner shall
18 forthwith certify and file in the court the transcript of the
19 proceedings and the record on which he based his action.
20 "(2) The findings of fact by the Commissioner, if sup-
21 ported by substantial evidence, shall be conclusive; but the
22 court, for good cause shown, may remand the case to the
23 Commissioner to take further evidence, and the Commis-
24 sioner may thereupon make new or modified findings of

1 fact and may modify his previous action, and shall certify
2 to the court the transcript and record of the further pro-
3 ceedings. Such new or modified findings of fact shall like-
4 wise be conclusive if supported by substantial evidence.
5 "(3) The court shall have jurisdiction to affirm the ac-
6 tion of the Commissioner or to set it aside, in whole or in
7 part. The judgment of the court shall be subject to review
8 by the Supreme Court of the United States upon certiorari
9 or certification as provided in title 28, United States Code,
10 section 1254.
11 "PART B—GRANTS FOR CONSTRUCTION OF GRADUATE
12 ACADEMIC FACILITIES
13 "AUTHORIZATION
14 "SEC. 721. (a) The Commissioner shall carry out a
15 program of making grants to institutions of higher education
16 to assist them in improving existing graduate schools and
17 cooperative graduate centers, and in establishing graduate
18 schools and cooperative graduate centers of excellence, in
19 order to increase the supply of highly qualified personnel
20 needed by communities, industries, and governments.
21 "(b) For the purpose of making grants under this part,
22 there are authorized to be appropriated $120,000,000 for the
23 fiscal year ending June 30, 1972, and for each of the succeed-
24 ing fiscal years ending prior to July 1, 1976.

1 "APPLICATION FOR, AND AMOUNT OF, GRANTS

2 "SEC. 722. (a) (1) Any institution of higher education
3 desiring to receive a grant under this part shall submit an
4 application therefor at such time, in such manner, and con-
5 taining such information as the Commissioner may require.

6 "(2) In determining whether to approve applications
7 under this section, the order in which to approve such appli-
8 cations, and the amount of grants, the Commissioner shall
9 give consideration to the extent to which the projects for
10 which assistance is sought will contribute toward achieving
11 the objectives of this part, and the extent to which they will
12 aid in attaining a wider distribution of graduate schools and
13 cooperative graduate centers throughout the States. In no
14 case shall the total of the payments from appropriations for
15 any fiscal year pursuant to section 721 made with respect
16 to projects in any State exceed an amount equal to 12½ per
17 centum of such appropriations.

18 "(3) For the purposes of this section, the term 'institu-
19 tion of higher education' includes cooperative graduate center
20 boards.

21 "(b) The Commissioner shall not approve any applica-
22 tion under this section until he has obtained the advice and
23 recommendations of a panel of specialists who are not em-
24 ployees of the Federal Government and who are competent
25 to evaluate such application.

1 "(c) No grant under this part may be in an amount in
2 excess of 50 per centum of the development cost of the
3 project covered by the application.

4 "PART C—LOANS FOR CONSTRUCTION OF ACADEMIC
5 FACILITIES

6 "AUTHORIZATION

7 "SEC. 741. (a) (1) The Commissioner shall carry out
8 a program of making loans, in accordance with the provisions
9 of this part.

10 "(2) The Commissioner is authorized to make loans to
11 institutions of higher education and to higher education build-
12 ing agencies, which have submitted approvable applications
13 under part A, for the construction of academic facilities.

14 "(b) For the purpose of making payments into the fund
15 established under section 444, there are hereby authorized
16 to be appropriated $400,000,000 for the fiscal year ending
17 June 30, 1972, and for each of the succeeding fiscal years
18 ending prior to July 1, 1976. Sums appropriated pursuant
19 to this subsection for any fiscal year shall be available without
20 fiscal year limitations.

21 "ELIGIBILITY CONDITIONS, AMOUNTS, AND TERMS OF LOANS

22 "SEC. 742. (a) No loan pursuant to this part shall be
23 made unless the Commissioner finds (1) that not less than
24 20 per centum of the development cost of the facility will be
25 financed from non-Federal sources, (2) that the applicant

1 is unable to secure the amount of such loan from other sources
2 upon terms and conditions equally as favorable as the terms
3 and conditions applicable to loans under this part, (3) that
4 the construction will be undertaken in an economical manner
5 and that it will not be of elaborate or extravagant design or
6 materials, and (4) that, in the case of a project to construct
7 an infirmary or other facility designed to provide primarily
8 for outpatient care of students and institutional personnel,
9 no financial assistance will be provided such project under
10 title IV of the Housing Act of 1950.
11 "(b) A loan pursuant to this part shall be secured in
12 such manner and shall be repaid within such period not ex-
13 ceeding fifty years, as may be determined by the Commis-
14 sioner; and it shall bear interest at (1) a rate determined by
15 the Commissioner which shall not be less than a per annum
16 rate that is one-quarter of 1 percentage point above the aver-
17 age annual interest rate on all interest-bearing obligations of
18 the United States forming a part of the public debt as com-
19 puted at the end of the preceding fiscal year, adjusted to the
20 nearest one-eighth of 1 per centum, or (2) the rate of 3 per
21 centum per annum, whichever is the lesser.
22 "GENERAL PROVISION FOR LOAN PROGRAM
23 "SEC. 743. (a) Such financial transactions of the Com-
24 missioner as the making of loans and vouchers approved by
25 the Commissioner in connection with such financial transac-

1 tions, except with respect to administrative expenses, shall
2 be final and conclusive on all officers of the Government.
3 "(b) In the performance of, and with respect to, the
4 functions, powers, and duties vested in him by this part, the
5 Commissioner may—
6 "(1) prescribe such rules and regulations as may be
7 necessary to carry out the purposes of this part;
8 "(2) sue and be sued in any court of record of a
9 State having general jurisdiction or in any district court
10 of the United States, and such district courts shall have
11 jurisdiction of civil actions arising under this part without
12 regard to the amount in controversy, and any action in-
13 stituted under this subsection by or against the Commis-
14 sioner shall survive notwithstanding any change in the
15 person occupying the office of Commissioner or any
16 vacancy in such office; but no attachment, injunction,
17 garnishment, or other similar process, mesne or final,
18 shall be issued against the Commissioner or property
19 under his control, and nothing herein shall be construed
20 to except litigation arising out of activities under this part
21 from the application of sections 507 (b) and 517 and
22 2679 of title 28 of the United States Code.
23 "(3) foreclose on any property or commence any
24 action to protect or enforce any right conferred upon
25 him by any law, contract, or other agreement, and bid for

1 and purchase at any foreclosure or any other sale any
2 property in connection with which he has made a loan
3 pursuant to this part; and, in the event of any such
4 acquisition (and notwithstanding any other provisions of
5 law relating to the acquisition, handling, or disposal of
6 real property by the United States), complete, admin-
7 ister, remodel and convert, dispose of, lease, and other-
8 wise deal with, such property: *Provided*, That any such
9 acquisition of real property shall not deprive any State
10 or political subdivision thereof of its civil or criminal
11 jurisdiction in and over such property or impair the civil
12 rights under the State or local laws of the inhabitants on
13 such property;
14 "(4) sell or exchange at public or private sale, or
15 lease, real or personal property, and sell or exchange
16 any securities or obligations, upon such terms as he may
17 fix:
18 "(5) subject to the specific limitations in this part,
19 consent to the modification, with respect to the rate of
20 interest, time of payment of any installment of principal
21 or interest, security, or any other term of any contract
22 or agreement to which he is a party or which has been
23 transferred to him pursuant to this section; and
24 "(6) include in any contract or instrument made
25 pursuant to this part such other covenants, conditions,

1 or provisions (including provisions designed to assure
2 against use of the facility, contructed with the aid of a
3 loan under this part, for purposes described in section
4 782 (1) as he may deem necessary to assure that the
5 purpose of this part will be achieved.

6 "REVOLVING LOAN FUND

7 "SEC. 744. (a) There is hereby created within the
8 Treasury a separate fund for higher education academic
9 facilities loans (hereafter in this section called 'the fund')
10 which shall be available to the Commissioner without fiscal
11 year limitation as a revolving fund for the purposes of this
12 part.

13 "(b) (1) The Commissioner shall transfer to the fund
14 available appropriations provided under section 741 (c) to
15 provide capital for the fund. All amounts received by the
16 Commissioner as interest payments or repayments of prin-
17 cipal on loans, and any other moneys, property, or assets
18 derived by him from his operations in connection with this
19 part, including any moneys derived directly or indirectly
20 from the sale of assets, or beneficial interests or participations
21 in assets of the fund, shall be deposited in the fund.

22 "(2) All loans, expenses, and payments pursuant to
23 operations of the Commissioner under this part shall be paid
24 from the fund, including (but not limited to) expenses and
25 payments of the Commissioner in connection with sale,

1 under section 302 (c) of the Federal National Mortgage
2 Association Charter Act, of participations in obligations
3 acquired under this title. From time to time, and at least
4 at the close of each fiscal year, the Commissioner shall pay
5 from the fund into the Treasury as miscellaneous receipts
6 interest on the cumulative amount of appropriations paid out
7 for loans under this title or available as capital to the fund,
8 less the average undisbursed cash balance in the fund during
9 the year. The rate of such interest shall be determined by
10 the Secretary of the Treasury, taking into consideration the
11 average market yield during the month preceding each fiscal
12 year on outstanding Treasury obligations of maturity com-
13 parable to the average maturity of loans made from the fund.
14 Interest payments may be deferred with the approval of the
15 Secretary of the Treasury, but any interest payments so
16 deferred shall themselves bear interest. If at any time the
17 Commissioner determines that moneys in the fund exceed
18 the present and any reasonably prospective future require-
19 ments of the fund, such excess shall be available for the pur-
20 poses of part A and shall be deemed to have been appropri-
21 ated pursuant to section 701 (b).

22 "ANNUAL INTEREST GRANTS

23 "SEC. 745. (a) To assist institutions of higher educa-
24 tion and higher education building agencies, which have had
25 applications projects approved under part A, to reduce the

1 cost of borrowing from other sources for the construction of
2 academic facilities, the Commissioner may make annual in-
3 terest grants to such institutions and agencies.
4 "(b) Annual interest grants to an institution of higher
5 education or higher education building agency with respect
6 to any academic facility shall be made over a fixed period
7 not exceeding forty years, and provision for such grants
8 shall be embodied in a contract guaranteeing their payment
9 over such period. Each such grant shall be in an amount
10 not greater than the difference between (1) the average
11 annual debt service which would be required to be paid,
12 during the life of the loan, on the amount borrowed from other
13 sources for the construction of such facilities, and (2) the
14 average annual debt service which the institution would have
15 been required to pay, during the life of the loan, with respect
16 to such amounts if the applicable interest rate were the maxi-
17 mum rate specified in section 743 (b): *Provided*, That the
18 amount on which such grant is based shall be approved by
19 the Secretary.
20 "(c) (1) There are hereby authorized to be appropriated
21 to the Commissioner such sums as may be necessary for the
22 payment of annual interest grants to institutions of higher
23 education and higher education building agencies in accord-
24 ance with this section.
25 "(2) Contracts for annual interest grants under this

1 section shall not be entered into in an aggregate amount
2 greater than is authorized in appropriation Acts; and in any
3 event the total amount of annual interest grants which may
4 be paid to institutions of higher education and higher educa-
5 tion building agencies in any year pursuant to contracts
6 entered into under this section shall not exceed $5,000,000
7 which amount shall be increased by $6,750,000 on July 1,
8 1969, and by $13,500,000 on July 1, 1970 and on July 1
9 of each of the four succeeding years.

10 "(d) Not more than 12½ per centum of the funds pro-
11 vided for in this section for grants may be used within any
12 one State.

13 "(e) No annual interest grant pursuant to this section
14 shall be made unless the Commissioner finds (1) that not
15 less than 10 per centum of the development cost of the
16 facility will be financed from non-Federal sources, (2) that
17 the applicant is unable to secure a loan in the amount of the
18 loan with respect to which the annual interest grant is to
19 be made, from other sources upon terms and conditions
20 equally as favorable as the terms and conditions applicable
21 to loans under this title, and (3) that the construction will
22 be undertaken in an economical manner and that it will not
23 be of elaborate or extravagant design or materials. For pur-
24 poses of this section, a loan with respect to which an interest

1 grant is made under this section shall not be considered
2 financing from a non-Federal source. For purposes of the
3 other provisions of this title, such a loan shall be considered
4 financing from a non-Federal source.

5 "PART D—ASSISTANCE IN MAJOR DISASTER AREAS

6 "AUTHORIZATION

7 "SEC. 761. (a) The Commissioner shall carry out a
8 program of financial assistance to public institutions of higher
9 education, in accordance with the provisions of this part.

10 "(b) There are authorized to be appropriated for each
11 fiscal year such sums as may be necessary to carry out the
12 provisions of this part.

13 "ASSISTANCE FOR CONSTRUCTION OF ACADEMIC
14 FACILITIES

15 "SEC. 762. (a) If the Director of the Office of Emer-
16 gency Planning determines that a public institution of higher
17 education is, in whole or in part, within an area which, after
18 June 30, 1971, and before July 1, 1976, has suffered a
19 disaster which is a major disaster, and if the Commissioner
20 determines with respect to such institution that—

21 "(1) the academic facilities of such institution have
22 been destroyed or seriously damaged as a result of the
23 disaster;

24 "(2) such institution is exercising due diligence in

availing itself of State and other financial assistance available for restoration or replacement of such facilities; and

"(3) the institution does not have sufficient funds available from such other sources, including proceeds of insurance on the facilities, to provide for the restoration or replacement of such facilities;

the Commissioner is authorized to provide such assistance to such institution as is provided in subsection (b).

"(b) (1) Assistance under this section shall be a grant to an eligible institution, as determined under subsection (a), of an amount necessary to enable the institution to carry out the construction necessary to restore or replace the academic facilities determined to be damaged or destroyed under clause (1) of subsection (a).

"(2) The maximum amount of a grant under this section shall not exceed the cost of construction incident to the restoration or replacement of the facilities determined to be damaged or destroyed under clause (1) of subsection (a) less the amount of additional assistance determined to be available under clause (3) of subsection (a).

"(c) (1) Assistance under this section may include a grant of an amount necessary to enable the institution to lease, or otherwise obtain the use of, such facilities as are

needed to replace, temporarily, facilities which have been made unavailable as a result of a major disaster.

"(2) An institution shall be eligible for assistance under this subsection if it qualifies for assistance under subsection (a), whether or not it receives assistance under subsection (b).

"EQUIPMENT AND SUPPLIES

"SEC. 763. If an institution is eligible for assistance under section 762 (a), the Commissioner is authorized, whether or not such institution receives assistance under section 762 (b), to make a grant to such institution of not in excess of an amount he determines necessary to replace equipment, maintenance supplies, and instructional supplies (including books, and curricular and program materials) destroyed or seriously damaged as a result of the major disaster.

"REPAYABLE ASSISTANCE IN LIEU OF A GRANT

"SEC. 764. If the Commissioner's determinations under clauses (2) and (3) of section 762 (a) indicate that financial resources will become available to an institution otherwise qualified for assistance under section 762 at some future date or dates, he is authorized, subject to such terms and conditions as may be in the public interest, to extend assistance to such institution under section 762 (b), 762 (c), or

1 763 (or all such sections) with an agreement with such
2 institution which provides that the institution will repay part
3 or all of the funds received by it under this part.
4 "APPLICATIONS
5 "SEC. 765. No payment may be made to a public in-
6 stitution of higher education for academic facilities under
7 this part unless an application therefor is submitted through
8 the appropriate State commission and is filed with the Com-
9 missioner in accordance with regulations prescribed by him.
10 In determining the order in which such applications shall
11 be approved, the Commissioner shall consider the relative
12 educational and financial needs of the institutions which have
13 submitted approvable applications. No payment may be
14 made under section 762 (b) unless the Commissioner finds,
15 after consultation with the State commission, that the proj-
16 ect or projects with respect to which it is made are not in-
17 consistent with overall State plans, submitted under section
18 704 (a), for the construction of academic facilities. All deter-
19 minations made by the Commissioner under this part shall be
20 made only after consultation with the appropriate State
21 commission.
22 "DEFINITIONS
23 "SEC. 766. For the purposes of this part—
24 "(1) the term 'major disaster' means a disaster
25 determined to be a major disaster as defined in section

1 2 (a) of the Act of September 30, 1950 (42 U.S.C.
2 185a (a)); and
3 "(2) an institution of higher education shall be
4 deemed to be a 'public institution of higher education' if
5 such institution is found by the Commissioner to be under
6 public supervision and control.
7 "PART E—GENERAL
8 "RECOVERY OF PAYMENTS
9 "SEC. 781. (a) The Congress hereby finds and declares
10 that, if a facility constructed with the aid of a grant or grants
11 under part A or B of this title is used as an academic fa-
12 cility for twenty years following completion of such con-
13 struction, the public benefit accruing to the United States
14 from such use will equal in value the amount of such grant
15 or grants. The period of twenty years after completion of
16 such construction shall therefore be deemed to be a period of
17 Federal interest in such facility for the purposes of this Act.
18 "(b) If, within twenty years after completion of con-
19 struction of an academic facility which has been constructed
20 in part with a grant or grants under part A or B of this
21 title—
22 "(1) the applicant (or its successor in title or
23 possession) ceases or fails to be a public or nonprofit
24 institution, or
25 "(2) the facility ceases to be used as an academic

1 facility, or the facility is used as a facility excluded
2 from the term 'academic facility',
3 the United States shall be entitled to recover from such
4 applicant (or successor) an amount which bears to the then
5 value of the facility (or so much thereof as constituted an
6 approved project or projects) the same ratio as the amount
7 of such Federal grant or grants bore to the development cost
8 of the facility financed with the aid of such grant or
9 grants. Such value shall be determined by agreement of
10 the parties or by action brought in the United States district
11 court for the district in which such facility is situated.
12 "DEFINITIONS
13 "SEC. 782. The following definitions apply to terms
14 used in this title:
15 "(1) (A) Except as provided in subparagraph (B) of
16 this paragraph, the term 'academic facilities' means struc-
17 tures suitable for use as classrooms, laboratories, libraries,
18 and related facilities necessary or appropriate for instruction
19 of students, or for research, or for administration of the edu-
20 cational or research programs, of an institution of higher
21 education, and maintenance, storage, or utility facilities es-
22 sential to operation of the foregoing facilities. For purposes
23 of parts A, C, and D, such term includes infirmaries or other
24 facilities designed to provide primarily for outpatient care
25 of students and institutional personnel.

1 "(B) The term 'academic facilities' shall not include
2 (i) any facility intended primarily for events for which
3 admission is to be charged to the general public, or (ii) any
4 gymnasium or other facility specially designed for athletic or
5 recreational activities, other than for an academic course in
6 physical education or where the Commissioner finds that the
7 physical integration of such facilities with other academic
8 facilities included under this Act is required to carry out the
9 objectives of this Act, or (iii) any facility used or to be used
10 for sectarian instruction or as a place for religious worship,
11 or (iv) any facility which (although not a facility described
12 in the preceding clause) is used or to be used primarily in
13 connection with any part of the program of a school or
14 department of divinity, or (v) any facility used or to be
15 used by a school of medicine, school of dentistry, school of
16 osteopathy, school of pharmacy, school of optometry, school
17 of podiatry, or school of public health as these terms are
18 defined in section 724 of the Public Health Service Act, or
19 a school of nursing as defined in section 843 of that Act.
20 For the purposes of this subparagraph (B), the term
21 'school or department of divinity' means an institution, or
22 a department or branch of an institution, whose program is
23 specifically for the education of students to prepare them to
24 become ministers of religion or to enter upon some other
25 religious vocation or to prepare them to teach theological
26 subjects.

1 "(2) The term 'construction' means (A) erection of
2 new or expansion of existing structures, and the acquisition
3 and installation of initial equipment therefor; or (B) ac-
4 quisition of existing structures not owned by the institution
5 involved; or (C) rehabilitation, alteration, conversion, or
6 improvement (including the acquisition and installation of
7 initial equipment, or modernization or replacement of built-
8 in equipment) of existing structures; or (D) a combination
9 of any two or more of the foregoing. For the purposes of
10 this paragraph and section 763, the term 'equipment' in-
11 cludes, in addition to machinery, utilities, and built-in equip-
12 ment and any necessary enclosures or structures to house
13 them, all other items necessary for the functioning of a par-
14 ticular facility as an academic facility, including necessary
15 furniture, except books, curricular and program materials,
16 and items of current operating expense such as fuel, supplies,
17 and the like; the term 'initial equipment' means equipment
18 acquired and installed in connection with construction as
19 defined in paragraph (2) (A) or (B) or, in cases referred
20 to in paragraph (2) (C), equipment acquired and installed
21 as part of the rehabilitation, alteration, conversion, or im-
22 provement of an existing structure, which structure would
23 otherwise not be adequate for use as an academic facility;
24 and the terms 'equipment', 'initial equipment', and 'built-in

1 equipment' shall be more particularly defined by the Com-
2 missioner by regulation.
3 "(3) (A) The term 'development cost', with respect
4 to an academic facility, means the amount found by the
5 Commissioner to be the cost, to the applicant for a grant or
6 loan under this title, of the construction involved and the
7 cost of necessary acquisition of the land on which the facility
8 is located and of necessary site improvements to permit its
9 use for such facility. There shall be excluded from the de-
10 velopment cost—
11 "(i) in determining the amount of any grant under
12 part A or B, an amount equal to the sum of (I) any
13 Federal grant which the institution has obtained, or is
14 assured of obtaining, under any law other than this title,
15 with respect to the construction that is to be financed
16 with the aid of a grant under part A or B, and (II) the
17 amount of any non-Federal funds required to be ex-
18 pended as a condition of such other Federal grant; and
19 "(ii) in determining the amount of any loan under
20 part C, an amount equal to the amount of any Federal
21 financial assistance which the institution has obtained,
22 or is assured of obtaining, under any law other than this
23 title, with respect to the construction that is to be
24 financed with the aid of a loan under part C.

1 "(B) In determining the development cost with respect
2 to an academic facility, the Commissioner may include ex-
3 penditures for works of arts for the facility of not to exceed
4 1 per centum of the total cost (including such expenditures)
5 to the applicant of construction of, and land acquisition and
6 site improvements for, such facility.

7 "(4) The term 'Federal share' means, in the case of
8 any project a percentage (as determined under the applicable
9 State plan) not in excess of 50 per centum of its develop-
10 ment cost.

11 "(5) The term 'higher education building agency'
12 means (A) an agency, public authority, or other instru-
13 mentality of a State authorized to provide, or finance the
14 construction of, academic facilities for institutions of higher
15 education (whether or not also authorized to provide or
16 finance other facilities for such or other educational institu-
17 tions, or for their students or faculty), or (B) any corpora-
18 tion (no part of the net earnings of which inures or may
19 lawfully inure to the benefit of any private shareholder or
20 individual) (I) established by an institution of higher edu-
21 cation for the sale purpose of providing academic facilities
22 for the use of such institution, and (II) upon dissolution of
23 which, all title to any property purchased or built from the
24 proceeds of any loan made under part C will pass to such
25 institution.

1 "(6) The term 'public community college and public
2 technical institute' means an institution of higher education
3 which is under public supervision and control, and is orga-
4 nized and administered principally to provide a two-year
5 program which is acceptable for full credit toward a bach-
6 elor's degree, or a two-year program in engineering, mathe-
7 matics, or the physical or biological sciences which is de-
8 signed to prepare the student to work as a technician and at
9 a semiprofessional level in engineering, scientific, or other
10 technological fields which require the understanding and ap-
11 plication of basic engineering, scientific, or mathematical
12 principles or knowledge; and the term includes a branch of
13 an institution of higher education offering four or more years
14 of higher education which is located in a community different
15 from that in which its parent institution is located.

16 "(7) The term 'cooperative graduate center' means an
17 institution or program created by two or more institutions
18 of higher education which will offer to the students of the
19 participating institutions of higher education graduate work
20 which could not be offered with the same proficiency or
21 economy (or both) at the individual institution of higher
22 education. The center may be located or the program car-
23 ried out on the campus of any of the participating institu-
24 tions or at a separate location.

25 "(8) The term 'cooperative graduate center board'

1 means a duly constituted board established to construct and
2 maintain the cooperative graduate center and coordinate
3 academic programs. The board shall be composed of repre-
4 sentatives of each of the higher institutions participating in
5 the center and of the community involved. At least one-
6 third of the board's members shall be community repre-
7 sentatives. The board shall elect by a majority vote a chair-
8 man from among its membership.".

9 (b) (1) The programs authorized by title VII of the
10 Higher Education Act of 1965 shall be deemed to be a con-
11 tinuation of the comparable programs authorized by the
12 Higher Education Facilities Act of 1963.

13 (2) Effective July 1, 1972, the Higher Education Fa-
14 cilities Act of 1963 is amended by striking out titles I and II
15 thereof.

16 (3) Effective July 1, 1971, such Act is amended by
17 striking out section 306 thereof.

18 (4) The revolving fund created by section 744 of the
19 Higher Education Act of 1965 shall be deemed to be a
20 continuation of the revolving fund created by section 305
21 of the Higher Education Facilities Act of 1963. Any funds in
22 the fund for higher education academic facilities created by
23 such section 305 on the date of enactment of this Act shall
24 be transferred to the fund created by section 744 of the
25 Higher Education Act of 1965, and all such funds shall be

1 deemed to have been made available for such fund. Notwith-
2 standing any other provision of law, unless enacted in specific
3 limitation of the provisions of this sentence, any sums appro-
4 priated pursuant to section 303 (c) for any fiscal year ending
5 prior to July 1, 1972, which have not been loaned under
6 title III of the Higher Education Facilities Act of 1963 shall
7 be deemed to have been appropriated pursuant to section
8 741 (b) of the Higher Education Act of 1965 for the fiscal
9 year ending June 30, 1972.

10 EXTENSION OF AUTHORIZATIONS OF APPROPRIATIONS FOR
11 THE HIGHER EDUCATION FACILITIES ACT OF 1963

12 SEC. 162. Sections 101 (b), 201, 303 (c), and 408 (a)
13 of the Higher Education Facilities Act of 1963 are each
14 amended by striking out "July 1, 1971" and inserting in lieu
15 thereof "July 1, 1972".

16 STATE HIGHER EDUCATION COMMISSIONS

17 SEC. 163. Section 1202 of the Higher Education Act
18 of 1965, having been superseded by section 425 of the
19 General Education Provisions Act, is hereby repealed. Title
20 XII of such Act is amended by adding after section 1201
21 the following new section:

22 "STATE HIGHER EDUCATION COMMISSIONS

23 "SEC. 1202. (a) (1) Any State desiring to participate
24 in any program authorized by this Act which requires the
25 use of a State Commission in the administration thereof

1 shall designate, for such purpose, a State agency which is
2 broadly representative of the public and of the public and
3 private institutions of higher education (including public
4 community colleges and public technical institutes) in the
5 State. If, in the case of any State, no such State agency
6 exists, such State shall create such an agency.
7 "(2) Each State commission shall be authorized to, and
8 shall carry out, such functions as may be required or author-
9 ized with respect to the program in which the State is par-
10 ticipating. The Commissioner shall pay to each State com-
11 mission the amount necessary for the proper and efficient
12 administration of each State plan which is approved by him
13 under this Act.
14 "(b) (1) The Commissioner is authorized to make
15 grants to State commissions to enable them to make com-
16 prehensive inventories of, and studies with respect to, the
17 postsecondary educational resources in the States and means
18 by which such resources may be better planned and coordi-
19 nated, improved, expanded, or altered in order to insure that
20 all persons within the States who desire, and who can benefit
21 from, postsecondary education may have an opportunity to
22 do so.
23 "(2) The Commissioner is further authorized to make
24 grants to State commissions to enable them to conduct com-
25 prehensive planning for statewide postsecondary education

1 systems which will achieve the purpose set forth in para-
2 graph (1). Such planning shall include a consideration of a
3 system of comprehensive public community colleges as a
4 means of achieving such purpose.
5 "(c) There is authorized to be appropriated such sums
6 as may be necessary to carry out the provisions of this
7 section.".
8 PART H—NETWORKS FOR KNOWLEDGE EXTENSION
9 EXTENSION OF AUTHORIZATION OF APPROPRIATIONS
10 SEC. 171. Section 802 of the Higher Education Act of
11 1965 is amended by inserting before the period at the end
12 thereof "and for each of the succeeding fiscal years ending
13 prior to July 1, 1976".
14 PART I—GRADUATE PROGRAMS AND FELLOWSHIPS
15 NEW TITLES IX AND X OF THE HIGHER EDUCATION
16 ACT OF 1965
17 SEC. 181. (a) The Higher Education Act of 1965 is
18 amended by striking out titles IX and X and inserting in lieu
19 thereof the following:
20 "TITLE IX—GRADUATE PROGRAMS
21 "PURPOSES; AUTHORIZATION
22 "SEC. 901. (a) It is the purpose of this title to make
23 financial assistance available to institutions of higher educa-
24 tion—
25 "(1) to strengthen and improve the quality of grad-

1 uate programs leading to an advanced degree in such
2 institutions and to increase the number of such programs;
3 "(2) to establish, strengthen, and support graduate
4 centers for the study of the languages and cultures of
5 foreign countries, areas, or regions;
6 "(3) to establish, strengthen, and support graduate
7 centers to serve as national and international resources
8 for research and training in international studies; and
9 "(4) to establish, strengthen, and improve pro-
10 grams designed to prepare graduate and professional
11 students for the public service.
12 "(b) The Commissioner shall carry out a program of
13 making grants to institutions of higher education to carry out
14 the purposes set forth in subsection (a).
15 "(c) There are authorized to be appropriated $100,-
16 000,000 for the fiscal year ending June 30, 1972, and for
17 each of the succeeding fiscal years ending prior to July 1,
18 1976.
19 "APPLICATIONS
20 "SEC. 902. (a) An institution of higher education desir-
21 ing to receive a grant under this title shall submit to the
22 Commissioner an application therefor at such time or times,
23 in such manner, and containing such information as the Com-
24 missioner may prescribe by regulation. Such application shall
25 set forth a program of activities carrying out one or more of

1 the purposes set forth in section 901 (a) in such detail as
2 will enable the Commissioner to determine the degree to
3 which such program will accomplish such purpose or pur-
4 poses, and such other policies, procedures, and assurances
5 as the Commissioner may require by regulation.
6 "(b) The Commissioner shall approve an application
7 only if he determines—
8 "(1) that the application sets forth a program of
9 activities which are likely to make substantial progress
10 toward achieving the purposes of this title; and
11 "(2) that the approval of the application will result
12 in a wider distribution of the programs described in
13 section 901 (a) throughout the States.
14 "TITLE X—GRADUATE FELLOWSHIPS
15 "AUTHORIZATION
16 "SEC. 1001. (a) The Commissioner shall carry out a
17 program of awarding fellowships, in accordance with the
18 provisions of this title, for graduate or professional study
19 leading to an advanced degree for persons who are planning
20 to teach in institutions of higher education or to enter the
21 public service. Such fellowships shall be awarded for such
22 periods, not to exceed three academic years, as the Com-
23 missioner may determine.
24 "(b) Fellowships shall be awarded under this title dur-
25 ing the period beginning July 1, 1972, and ending June 30,

1976. The number of fellowships awarded during any fiscal year in such period shall not exceed seven thousand five hundred. There are authorized to be appropriated such sums as may be necessary to enable the Commissioner to award such fellowships.

"ALLOCATION OF FELLOWSHIPS

"SEC. 1002. The Commissioner shall allocate fellowships under this title among institutions of higher education with programs approved under the provisions of this title for the use of individuals accepted into such programs, in such manner and according to such plan as will, insofar as practicable—

"(1) provide an equitable distribution of such fellowships throughout the United States; and

"(2) attract recent college graduates to pursue a career in public serivce or in higher education.

"APPROVAL OF PROGRAMS

"SEC. 1003. The Commissioner shall approve a graduate or professional program of an institution of higher education only upon application by the institution and only upon his findings—

"(1) that the application sets forth a program which is in effect and of high quality, or can readily be put into effect and may reasonably be expected to be of high quality; and

1 "(2) that the application contains satisfactory as-
2 surance that (A) the institution will recommend to the
3 Commissioner, for the award of fellowships under this
4 part for study in such program, only persons of superior
5 promise who have demonstrated to the satisfaction of
6 the institution a serious intent to enter the public serv-
7 ice upon completing the program, and (B) the insti-
8 tution will make reasonable continuing efforts to encour-
9 age recipients of fellowships under this part, enrolled
10 in such programs, to enter the public service upon com-
11 pleting the program.

12 "STIPENDS

13 "SEC. 1004. (a) The Commissioner shall pay to per-
14 sons awarded fellowships under this title such stipends (in-
15 cluding such allowances for subsistence and other expenses
16 for such persons and their dependents) as he may determine
17 to be consistent with prevailing practices under comparable
18 federally supported programs.

19 "FELLOWSHIP CONDITIONS

20 "SEC. 1005. A person awarded a fellowship under the
21 provisions of this title shall continue to receive the payments
22 provided in this part only during such periods as the Com-
23 missioner finds that he is maintaining satisfactory proficiency
24 and devoting full time to study or research in the field in
25 which such fellowship was awarded in an institution of higher

1 education, and is not engaging in gainful employment other
2 than employment approved by the Commissioner by or pur-
3 suant to regulation.".

4 (b) Of the sums appropriated pursuant to section 901 (c)
5 of the Higher Education Act of 1963 for any fiscal year an
6 amount equal to at least $18,000,000 shall be for the pur-
7 poses of sections 901 (a) (2) and (3).

8 EXTENSION OF TITLES IV AND VI OF THE NATIONAL DE-
9 FENSE EDUCATION ACT OF 1958 AND OF THE INTER-
10 NATIONAL EDUCATION ACT

11 SEC. 182. (a) (1) Section 402 (a) of the National De-
12 fense Education Act of 1958 is amended by striking out
13 "seven succeeding fiscal years" and inserting in lieu thereof
14 "eight succeeding fiscal years".

15 (2) Section 603 of such Act is amended by striking out
16 "for the fiscal year ending June 30, 1971," and inserting in
17 lieu thereof "for each of the fiscal years ending June 30,
18 1971, and June 30, 1972,".

19 (b) The second sentence of section 105 (a) of the Inter-
20 national Education Act of 1966 is amended by striking out
21 "July 1, 1971" and inserting in lieu thereof "July 1, 1972".

22 PART J—LAW SCHOOL CLINICAL EXPERIENCE PROGRAMS

23 SEC. 191. Section 1103 of the Higher Education Act of
24 1965 is amended by striking out "fiscal years ending June 30,

1970, and June 30, 1971" and inserting in lieu thereof "succeeding fiscal years ending prior to July 1, 1976".

TITLE II—VOCATIONAL EDUCATION GRANTS TO STATES; RESEARCH

SPECIAL PROGRAMS FOR THE DISADVANTAGED

"SEC. 201. (a) Section 102 (a) of the Vocational Education Act of 1963 is amended by inserting "ending prior to July 1, 1975," after "each succeeding fiscal year".

(b) Section 102 (b) of such Act is amended by inserting after "1972," the following: "and for each succeeding fiscal year ending prior to July 1, 1975,".

EXEMPLARY PROGRAMS AND PROJECTS

SEC. 202. Section 142 (a) of the Vocational Education Act of 1963 is amended by striking out "two succeeding fiscal years" and inserting in lieu thereof "succeeding fiscal years ending prior to July 1, 1975,".

RESIDENTIAL VOCATIONAL SCHOOLS

SEC. 203. (a) Section 151 (b) of the Vocational Education Act of 1963 is amended by striking out "the succeeding fiscal year" and inserting in lieu thereof "each of the succeeding fiscal years ending prior to July 1, 1975".

(b) Section 152 (a) (1) of such Act is amended by striking out "July 1, 1972" and inserting in lieu thereof "July 1, 1975".

(c) Section 153 (d) (2) of such Act is amended by striking out "July 1, 1971" and inserting in lieu thereof "July 1 of each of the four succeeding fiscal years".

CONSUMER AND HOMEMAKING EDUCATION

SEC. 204. (a) Section 161 (a) (1) of the Vocational Education Act of 1963 is amended by striking out "the fiscal year ending June 30, 1972" and inserting in lieu thereof "each of the succeeding fiscal years ending prior to July 1, 1975".

(b) Section 161 (c) of such Act is amended by striking out "and the two succeeding" and inserting in lieu thereof "and the five succeeding".

COOPERATIVE VOCATIONAL EDUCATION

SEC. 205. Section 172 (a) of the Vocational Education Act of 1963 is amended by striking out "the fiscal year ending June 30, 1972" and inserting in lieu thereof "each of the succeeding fiscal years ending prior to July 1, 1975".

WORK-STUDY PROGRAMS

SEC. 206. Section 181 (a) of the Vocational Education Act of 1963 is amended by inserting after "June 30, 1972," the following: "and for each of the succeeding fiscal years ending prior to July 1, 1975,".

CURRICULUM DEVELOPMENT

SEC. 207. Section 191 (b) of the Vocational Education Act of 1963 is amended by striking out "July 1, 1972" and inserting in lieu thereof "July 1, 1975".

1 TITLE III—ESTABLISHMENT OF A NATIONAL
2 FOUNDATION FOR HIGHER EDUCATION AND
3 A NATIONAL INSTITUTE FOR EDUCATION

4 AMENDMENT TO THE GENERAL EDUCATION PROVISIONS
5 ACT

6 SEC. 301. (a) The General Education Provisions Act
7 (title IV of Public Law 90–247) is amended—
8 (1) by redesignating, and all references thereto,
9 parts A, B, and C thereof, as parts B, C, and D and
10 redesignating, and all references thereto, sections 401,
11 402, 403, 404, 405, 406, 411, 412, 413, 414, 415,
12 416, 417, 418, 421, 422, 423, 424, 425, 426, 431,
13 432, 433, 434, 435, 436, 437, 438, as sections 400,
14 411, 412, 413, 414, 415, 421, 422, 423, 424, 425,
15 426, 427, 428, 431, 432, 433, 434, 435, 436, 441,
16 442, 443, 444, 445, 446, 447, and 448, respectively;
17 and
18 (2) by inserting after section 400 (as so redesig-
19 nated by clause (1)) the following new part:

20 "PART A—EDUCATION DIVISION OF THE DEPARTMENT
21 OF HEALTH, EDUCATION, AND WELFARE

22 "THE EDUCATION DIVISION

23 "SEC. 401. There shall be, within the Department of
24 Health, Education, and Welfare, an Education Division
25 which shall be composed of the Office of Education, the Na-

1 tional Foundation for Higher Education, and the National
2 Institute for Education, and shall be headed by the Commis-
3 sioner of Education.

4 "THE OFFICE OF EDUCATION

5 "SEC. 402. (a) The Office of Education shall—

6 "(1) have the primary responsibility for the ad-
7 ministration of programs of Federal assistance to educational
8 agencies, organizations, and institutions in the United States;

9 "(2) collect statistics, and other data, respecting
10 education in the United States, and disseminate infor-
11 mation relating thereto;

12 "(3) promote the improvement of educational op-
13 portunities for the people of the United States, in such
14 manner as may be specifically authorized by law; and

15 "(4) carry out such other responsibilities as may
16 be specified by law or as may be specified by the Presi-
17 dent in accordance with law.

18 Nothing in this section, or any other provision of law, shall
19 be construed to grant the Office of Education any authority
20 which is not expressly provided for by statute or implied
21 therein.

22 "(b) (1) The management of the Office of Education
23 shall, subject to the direction and supervision of the Secre-
24 tary, be entrusted to a Commissioner of Education, who shall
25 be appointed by the President by and with the advice and

1 consent of the Senate, and who shall serve at the pleasure of
2 the President.
3 "(2) There shall be a Deputy Commissioner of Educa-
4 tion (referred to in this section as 'Deputy Commissioner')
5 and six Associate Commissioners of Education (referred to
6 in this title as 'Associate Commissioners') who shall be
7 appointed by the President, by and with the advice and
8 consent of the Senate, and shall serve at the pleasure of the
9 President, and who shall perform such duties as the Com-
10 missioner may prescribe by regulation. The Deputy Com-
11 missioner shall serve as Commissioner during the absence or
12 disability of the Commissioner.
13 "(3) Persons holding the offices created by paragraphs
14 (1) and (2) shall be compensated at the following rates
15 specified for the Executive Schedule in subchapter II of
16 title 5, United States Code:
17 "(A) The Commissioner shall be compensated at
18 the rate provided for level III under section 5314
19 thereof.
20 "(B) The Deputy Commissioner shall be compen-
21 sated at the rate provided for level IV under section
22 5315 thereof.
23 "(C) Each Associate Commissioner shall be com-
24 pensated at the rate provided for level V under section
25 5316 thereof.

1 Any modification of the rates of pay specified for such
2 Executive Schedule which is the result of actions of the
3 President, after December 16, 1967, pursuant to section 225
4 of Public Law 90–206, shall be applicable to positions cre-
5 ated, and for which rates of pay are specified, by this sub-
6 section.

7 "(4) The Commissioner, the Deputy Commissioner,
8 and the Associate Commissioners may not engage in any
9 other business, vocation, or employment while serving in
10 any such position; nor may any of them, except with the
11 express approval of the President in writing, hold any office
12 in, or act in any capacity for, or have a financial interest in,
13 any organization, agency, or institution to which the Office
14 of Education makes a grant or with which it makes a con-
15 tract or other financial arrangement.

16 "NATIONAL FOUNDATION FOR HIGHER EDUCATION

17 "SEC. 403. (a) (1) The National Foundation for Higher
18 Education (referred to in this section as the 'Foundation'),
19 shall consist of a Higher Education Board (referred to in
20 this section as the 'Board') and a Director. The Foundation
21 shall have only such authority as may be vested therein by
22 this section and shall be subject to the general regulations
23 of the Commissioner promulgated for its management.

24 "(2) It shall be the purpose of the Foundation—

1 "(1) to provide a source of funds to encourage ex-
2 cellence, innovation, and reform in higher education;
3 "(2) to strengthen postsecondary educational in-
4 stitutions or courses of instruction that play a uniquely
5 valuable role in American higher education or that are
6 faced with special difficulties; and
7 "(3) to provide an organization concerned with the
8 development of national policy in higher education.
9 "(b) (1) The Board shall consist of fifteen members,
10 appointed by the President, by and with the advice and con-
11 sent of the Senate, the Director, and such other ex officio
12 members who are officers of the United States as the Presi-
13 dent may designate. Eight members (excluding ex officio
14 members) shall constitute a quorum. The Chairman of the
15 Board shall be designated by the President from among its
16 members.
17 "(2) The term of office of members of the Board (other
18 than ex officio members) shall be six years, except that (A)
19 any member appointed to fill a vacancy shall serve only such
20 portion of a term as shall not have been expired at the time
21 of such appointment, and (B) in the case of initial members,
22 five shall serve for terms of four years and five for terms of
23 two years. Any person, whose term of office is subject to
24 this paragraph, who has been a member of the Board for six

1 consecutive years shall thereafter be ineligible for appoint-
2 ment to the Board during the two-year period following the
3 expiration of such sixth year.
4 "(3) Subject to such general regulations of the Commis-
5 sioner promulgated for the management of the Foundation,
6 the Board shall—
7 "(A) establish policies for the Foundation;
8 "(B) meet at the call of the Chairman of the Board,
9 except that it shall meet (i) at least one time during
10 each fiscal year, or (ii) whenever one-third of the mem-
11 bers request a meeting in writing, in which event one-
12 third of the members (excluding ex officio members)
13 shall constitute a quorum; and
14 "(C) submit an annual report to the President on
15 the activities of the Foundation and the status of higher
16 education in the United States, which (i) shall include
17 such recommendations and comments as the Board may
18 deem appropriate, and (ii) shall be submitted to the
19 Congress as a part of the Commissioner's annual report.
20 The Board shall have the primary responsibility for the
21 powers, duties, and authorities vested in the Foundation
22 under this section and is authorized to delegate any of such
23 powers, duties, and authorities as it may deem appropriate to
24 the Director, or other officers, or permanent employees of the
25 Foundation.

1 "(c) (1) The Director of the Foundation (referred to in
2 this section as the 'Director') shall be appointed by the Presi-
3 dent, by and with the advice of the Senate, and shall serve at
4 the pleasure of the President. The Director shall be compen-
5 sated at the rate provided for level IV of the Executive
6 Schedule under section 5315 of title 5, United States Code.
7 and shall perform such duties and exercise such powers as the
8 Board, subject to general regulations of the Commissioner,
9 may prescribe.

10 "(2) There shall be a Deputy Director of the Founda-
11 tion (referred to in this section as the 'Deputy Director')
12 who shall be appointed by the President, by and with the
13 advice and consent of the Senate, and shall serve at the
14 pleasure of the President. The Deputy Director shall be
15 compensated at the rate provided for level V of the Execu-
16 tive Schedule under section 5316 of title 5, United States
17 Code, and shall exercise such powers as the Director may
18 prescribe. The Deputy Director shall serve as Director during
19 the absence or disability of the Director or in the event of a
20 vacancy in the Office of Director.

21 "(d) The Foundation is authorized to make grants to
22 institutions of higher education (including combinations of
23 such institutions) to improve educational opportunities at
24 the undergraduate and graduate levels by—

25 "(1) encouraging the reform, innovation, and im-

1 provement of higher education, and providing equal
2 educational opportunity for all;
3 "(2) the strengthening of new and developing
4 institutions of higher education that fill unmet needs,
5 as well as established institutions seeking to provide new
6 and useful services;
7 "(3) the strengthening of postsecondary institutions
8 seeking to expand enrollment of students from minority
9 groups, and from among students whose limited financial
10 resources, for whatever reason, restrict their opportuni-
11 ties for higher education;
12 "(4) the encouragement of research and experi-
13 mentation with respect to, and development of, institu-
14 tions of learning beyond high school which do not con-
15 centrate on traditional academic or vocational fields; and
16 "(5) the development and improvement of post-
17 secondary career education.
18 "(e) There is authorized to be appropriated, without
19 fiscal year limitations, $200,000,000, in the aggregate, for
20 the period beginning July 1, 1972, and ending June 30,
21 1976, to carry out the functions of the Foundation. Sums so
22 appropriated shall, notwithstanding any other provision of
23 law, unless enacted in express limitation of this subsection,
24 remain available for the purposes of this section until
25 expended.

1 "NATIONAL INSTITUTE OF EDUCATION

2 SEC. 404. (a) (1) The National Institute of Education
3 (hereinafter referred to as the 'Institute') shall consist of
4 a National Council on Educational Research (hereinafter
5 referred to as the 'Council') and a Director of the Institute
6 (hereinafter referred to as the 'Director'). The Institute
7 shall have only such authority as may be vested therein by
8 this section and subject to general regulations of the Com-
9 missioner promulgated for its management.

10 "(2) The Institute shall, in accordance with the provi-
11 sions of this section, seek to improve education in the United
12 States through—

13 "(A) helping to solve or to alleviate the problems
14 of, and achieve the objectives of American education:

15 "(B) advancing the practice of education, as an
16 art, science, and profession;

17 "(C) the strengthening of the scientific and tech-
18 nological foundations of education; and

19 "(D) building an effective educational research and
20 development system.

21 "(b) (1) The Council shall consist of fifteen members
22 appointed by the President, by and with the advice and
23 consent of the Senate, the Director, and such other ex officio
24 members who are officers of the United States as the Presi-
25 dent may designate. Eight members of the Council (exclud-

1 ing ex officio members) shall constitute a quorum. The
2 Chairman of the Council shall be designated by the President.
3 "(2) The term of office of the members of the Council
4 (other than ex officio members) shall be three years, except
5 that (A) any member appointed to fill a vacancy shall
6 serve only such portion of a term as shall not have been
7 expired at the time of such appointment, and (B) in the
8 case of initial members, five shall serve terms of two years
9 and five shall serve terms of one year. Any person who has
10 been a member of the Council for six consecutive years shall
11 thereafter be ineligible for appointment to the Council during
12 the two-year period following the expiration of such sixth
13 year.
14 "(3) Subject to general regulations of the Commissioner
15 promulgated for the management of the Institute, the Council
16 shall—
17 "(A) establish policies for, and direct the conduct
18 of, the Institute;
19 "(B) review, and advise the Commissioner on the
20 status of educational research in the United States;
21 "(C) meet at the call of the Chairman, except that
22 it shall meet (i) at least six times during each fiscal
23 year, or (ii) whenever one-third of the members request
24 a meeting in writing, in which event one-third of the

1 members (excluding ex officio members) shall constitute
2 a quorum; and
3 "(D) submit an annual report to the President on
4 the activities of the Institute, and on educational research
5 in general, which (i) shall include such recommenda-
6 tions and comments as the Council may deem appropri-
7 ate, and (ii) shall be submitted to the Congress as part
8 of the Commissioner's annual report.
9 The Council shall have the primary responsibility for the
10 powers, duties, and authorities vested in the Institute under
11 this section, and is authorized to delegate any of such powers,
12 duties, and authorities as it may deem appropriate, to the
13 Director, or other officers, or permanent employees of the
14 Institute.
15 "(c) (1) The Director of the Institute shall be ap-
16 pointed by the President, by and with the advice and con-
17 sent of the Senate, and shall serve at the pleasure of the
18 President. The Director shall be compensated at the rate
19 provided for level IV of the Executive Schedule under sec-
20 tion 5315 of title 5, United States Code, and shall perform
21 such duties and exercise such powers and authorities as the
22 Council, subject to general regulations of the Commissioner,
23 may prescribe.
24 "(2) There shall be a Deputy Director of the Institute

1 (referred to in this section as the 'Deputy Director') who
2 shall be appointed by the President, by and with the advice
3 and consent of the Senate, and shall serve at the pleasure
4 of the President. The Deputy Director shall be compensated
5 at the rate provided for level IV of the Executive Schedule
6 under section 5316 of title 5, United States Code, and shall
7 act for the Director during the absence or disability of the
8 Director and exercise such powers and authorities as the
9 Director may prescribe.

10 "(d) (1) Within the Institute, there shall be the follow-
11 ing divisions:

12 "(A) There shall be a Division of Institute Pro-
13 grams, which shall (i) identify and describe major edu-
14 cational problems and opportunities, and (ii) organize
15 and manage comprehensive national programs of re-
16 search, development, experimentation, and evaluation
17 directed toward those problems and opportunities.

18 "(B) There shall be a Division of Education
19 Studies, which shall (i) conduct studies on the state
20 of education in the United States, (ii) carry out analyses
21 and evaluations of educational policies, and (iii) assist
22 in planning and evaluating educational research and de-
23 velopment programs.

24 "(C) There shall be a Division of Research and
25 Development, which shall organize and manage pro-

1 grams designed (i) to improve education policies, prac-
2 tices, and techniques, and (ii) to strengthen the scientific
3 and technological foundations of education, and shall
4 identify the need for improvements in educational re-
5 search and development systems and carry out pro-
6 grams to improve such systems.
7 "Each of the divisions of the Institute shall be headed
8 by an Assistant Director of the Institute. Such Assistant
9 Directors shall be compensated at the rate prescribed for
10 grade GS–18 in section 5332 of title 5, United States Code,
11 and shall perform such functions as the Director may pre-
12 scribe.
13 "(e) (1) In order to carry out the objectives of the
14 Institute, the Commissioner is authorized, through the In-
15 stitute, to conduct educational research; collect and dis-
16 seminate the findings of educational research; train indi-
17 viduals in educational research; assist and foster such re-
18 search, collection, dissemination, or training through grants,
19 or technical assistance to, or jointly financed cooperative
20 arrangements with, public or private organizations, institu-
21 tions, agencies, or individuals; promote the coordination of
22 such research and research support within the Federal Gov-
23 ernment; and may construct or provide (by grant or other-
24 wise) for such facilities as he determines may be required
25 to accomplish such purposes. As used in this subsection, the

1 term 'educational research' includes research, planning, sur-
2 veys, evaluations, investigations, experiments, developments,
3 and demonstrations (including experimental schools) in the
4 field of education.

5 "(2) The Commissioner is authorized, in accordance
6 with regulations promulgated by him, to appoint, on a tem-
7 porary basis, and compensate, without regard to the pro-
8 visions of title 5, United States Code, governing appoint-
9 ments in the competitive service, and without regard to
10 chapter 51 and subchapter III of chapter 53 of such title,
11 relating to classification and General Schedule rates, such
12 technical and professioinal personnel as may be necessary
13 to accomplish the functions of the Institute.

14 "(f) There are hereby authorized to be appropriated,
15 without fiscal year limitations, $500,000,000, in the aggre-
16 gate, for the period beginning July 1, 1972, and ending
17 June 30, 1976, to carry out the functions of the Institute.
18 Sums so appropriated shall, notwithstanding any other pro-
19 vision of law unless enacted in express limitation of this
20 subsection, remain available for the purposes of this subsec-
21 tion until expended.".

22 (b) (1) The amendments made by subsection (a) shall
23 be effective after June 30, 1972.

24 (2) (A) Effective July 1, 1972, sections 516 and 517

1 of the Revised Statutes of the United States (20 U.S.C. 1, 2)
2 are repealed.
3 (B) Effective July 1, 1972, section 422 of the General
4 Education Provisions Act is amended by striking out "(as
5 set forth in section 516 of the Revised Statutes (20 U.S.C.
6 1))" and inserting in lieu thereof "(as set forth in section
7 402(a) of this Act)".
8 (3) Effective July 1, 1972, the Cooperative Research
9 Act is amended by striking out sections 2 and 3.

10 TITLE IV—MISCELLANEOUS

11 ADMINISTRATION OF PROGRAMS AND PROJECTS

12 SEC. 401. Section 434 of the General Education Provi-
13 sions Act (title IV of Public Law 90-247) is amended by—
14 (1) amending the caption head thereof to read
15 "ADMINISTRATION OF EDUCATION PROGRAMS AND
16 PROJECTS";
17 (2) striking out "(a)" after "SEC. 424." and in-
18 serting in lieu thereof "(a) (1)" and striking out "(b)"
19 and inserting in lieu thereof "(2)";
20 (3) adding at the end thereof the following new
21 subsection:
22 "(b) Each application for assistance under any appli-
23 cable program, whether such application is approved by
24 the Commissioner or by an agency administering a State plan

1 approved by him and each State plan submitted to the Com-
2 missioner under any applicable program shall, as a precondi-
3 tion for approval—
4 "(1) provide for such methods of administration as
5 are necessary for the proper and efficient administration
6 of the program or project for which application is made;
7 "(2) set forth such policies and procedures as will
8 insure that Federal funds made available under the appli-
9 cation will be so used as to supplement and, to the extent
10 practical, increase the level of funds that would, in the
11 absence of such funds, be available for the purposes of
12 the program or project for which application is made,
13 and in no case supplant such funds;
14 "(3) make provision for such fiscal control and fund
15 accounting procedures as may be necessary to assure
16 proper disbursement of, and accounting for, Federal
17 funds paid to the applicant under the application; and
18 "(4) provide for making such reports as the Com-
19 missioner may require to carry out his functions."
20 EXTENSION OF AUTHORIZATION OF APPROPRIATIONS OF
21 TITLE III OF THE NATIONAL DEFENSE EDUCATION ACT
22 OF 1958
23 SEC. 402. (a) The first sentence of section 301 of the
24 National Defense Education Act of 1958 is amended by
25 striking out "for the fiscal year ending June 30, 1971" and

1 inserting in lieu thereof "for each of the succeeding fiscal
2 years ending prior to July 1, 1976".
3 (b) The second sentence of such section 301 is amended
4 by striking out "July 1, 1971" and inserting in lieu thereof
5 "July 1, 1976".

6 STUDY AND REPORT ON RULES AND REGULATIONS

7 SEC. 403. (a) The Commissioner shall conduct a study
8 of all rules, regulations, guidelines, or other published inter-
9 pretations or orders issued by him or by the Secretary of
10 Health, Education, and Welfare (or any of their delegates)
11 in connection with, or affecting, the administration of any
12 program to which the General Education Provisions Act
13 applies. Such study shall include a review of each such rule,
14 regulation, guideline, interpretation or order as it relates to
15 the statutory or other legal authority upon which it is based,
16 and of committee reports relating to such statutory authority.
17 (b) No later than ninety days after the enactment of
18 this Act, the Commissioner shall submit a report on the
19 study conducted pursuant to subsection (a) to the Commit-
20 tee on Labor and Public Welfare of the Senate and the
21 Committee on Education and Labor of the House, which
22 report shall include the specific legal authority of each section,
23 or other division, of each rule, regulation, guideline, inter-
24 pretation, or other order to which this section applies.
25 (c) Not earlier than one-hundred twenty days after

1 the date of the enactment of this Act nor later than one-
2 hundred fifty days after such date all rules, regulations, guide-
3 lines, interpretations, or other orders to which this section
4 applies shall be published in the Federal Register. During
5 the thirty-day period following such publication, the Com-
6 missioner shall provide interested parties an opportunity for
7 a public hearing on the matters so published.
8 (d) After a study of comments and recommendations
9 offered to the Commissioner during the thirty-day period
10 specified in subsection (c), he shall submit a report to the
11 Committee on Labor and Public Welfare of the Senate and
12 the Committee on Education and Labor of the House on
13 such comments and recommendations, and any action he
14 has taken as a result thereof, and he shall, not later than
15 one-hundred eighty days after the enactment of this Act,
16 republish all rules, regulations, guidelines, interpretations
17 and orders in the Federal Register, which shall supersede
18 all preceding rules, regulations, guidelines, interpretations
19 and orders issued in connection with, or affecting, any pro-
20 gram to which the General Education Provisions Act applies,
21 and become effective thirty days after such republication.

92D CONGRESS
1ST SESSION

S. 659

IN THE SENATE OF THE UNITED STATES

MAY 11, 1971

Referred to the Committee on Labor and Public Welfare and ordered to be printed

AMENDMENT

Intended to be proposed by Mr. PELL to S. 659, a bill to amend the Higher Education Act of 1965, the Vocational Educational Act of 1963, and related Acts, and for other purposes, viz:

On page 28, strike out all that appears on lines 11, 12, and 13, and insert in lieu thereof "allowances paid under this section shall exceed $1,000.".

Amdt. No. 85

92D CONGRESS
1ST SESSION

S. 659

IN THE SENATE OF THE UNITED STATES

FEBRUARY 25 (legislative day, FEBRUARY 17), 1971

Referred to the Committee on Labor and Public Welfare and ordered to be printed

AMENDMENT

Intended to be proposed by Mr. KENNEDY (for himself, Mr. MONDALE, Mr. BYRD of West Virginia, Mr. CANNON, Mr. CRANSTON, Mr. DOMINICK, Mr. EAGLETON, Mr. HART, Mr. HUGHES, Mr. HUMPHREY, Mr. INOUYE, Mr. JAVITS, Mr. MCGOVERN, Mr. MUSKIE, Mr. PASTORE, and Mr. TUNNEY) to S. 659, a bill to amend the Higher Education Act of 1965, the Vocational Education Act of 1963, and related Acts, and for other purposes, viz: On page 120, after line 21, insert the following:

Amdt. No. 6

1 TITLE V—INDIAN EDUCATION

2 PART A—REVISION OF IMPACTED AREAS PROGRAM AS

3 IT RELATES TO INDIAN CHILDREN

4 SEC. 501. (a) The Act of September 30, 1950 (Public

5 Law 874, Eighty-first Congress), is amended by redesig-

6 nating title III as title IV, by redesignating sections 301

7 through 303 and references thereto as sections 401 through

8 403, respectively, and by adding after title II the following

9 new title:

10 "TITLE III—FINANCIAL ASSISTANCE TO LOCAL

11 EDUCATIONAL AGENCIES FOR THE EDUCA-

12 TION OF INDIAN CHILDREN

13 "SHORT TITLE

14 "SEC. 301. This title may be cited as the 'Indian

15 Elementary and Secondary School Assistance Act'.

16 "DECLARATION OF POLICY

17 "SEC. 302. (a) In recognition of the special educational

18 needs of Indian students in the United States, Congress

19 hereby declares it to be the policy of the United States to

20 provide financial assistance to local educational agencies to

21 develop and carry out elementary and secondary school pro-

22 grams specially designed to meet these special educational

23 needs.

24 "(b) During the period beginning June 1, 1972, and

25 ending June 30, 1977, the Commissioner shall, in order to

1 effectuate the policy set forth in subsection (a), carry out a
2 program of making grants to local educational agencies
3 which are entitled to payments under this title and which
4 have submitted, and had approved, applications therefor,
5 in accordance with the provisions of this title.

6 "GRANTS TO LOCAL EDUCATIONAL AGENCIES

7 "SEC. 303. (a) For the purpose of computing the
8 amount to which a local educational agency is entitled under
9 this title for any fiscal year in the period during which grants
10 are to be made, as specified in section 303 (b), the Commis-
11 sioner shall determine the number of Indian children who
12 were enrolled in the schools of a local educational agency,
13 and for whom such agency provided free public education,
14 during such fiscal year.

15 "(b) (1) The amount of the grant to which a local
16 educational agency is entitled under this title for any fiscal
17 year shall be an amount equal to (A) the average per pupil
18 expenditure for such agency (as determined under paragraph
19 (3)) multiplied by (B) the sum of the number of children
20 determined under subsection (a).

21 "(2) A local educational agency shall not be entitled to
22 receive a grant under this title for any fiscal year unless
23 the number of children under subsection (a), with respect
24 to such agency, is at least ten.

25 "(3) For the purposes of this subsection, the average

1 per pupil expenditure for a local educational agency shall
2 be the aggregate current expenditures, during the second
3 fiscal year preceding the fiscal year for which the computa-
4 tion is made, of all of the local educational agencies in the
5 State in which such agency is located, plus any direct cur-
6 rent expenditures by such State for the operation of such
7 agencies (without regard to the sources of funds from which
8 either of such expenditures are made), divided by the aggre-
9 gate number of children who were in average daily en-
10 rollment for whom such agencies provided free public edu-
11 cation during such preceding fiscal year.

12 "(c) In addition to the sums appropriated for any
13 fiscal year for grants to local educational agencies under
14 this title, there is hereby authorized to be appropriated
15 for any fiscal year an amount not in excess of 1 per centum
16 of the amount appropriated for payments on the basis of en-
17 titlements under this section for that fiscal year, for the pur-
18 pose of enabling the Commissioner to provide financial
19 assistance to schools on or near reservations which are not
20 local educational agencies or have not been local educa-
21 tional agencies for more than three years, in accordance with
22 the appropriate provisions of this title.

23 "USES OF FEDERAL FUNDS

24 "SEC. 304. Grants under this title may be used, in ac-
25 cordance with applications approved under section 305,
26 for—

1 "(a) planning for and taking other steps leading to
2 the development of programs specially designed to meet
3 the special educational needs of Indian children, includ-
4 ing pilot projects designed to test the effectiveness of
5 plans so developed; and
6 "(b) the establishment, maintenance, and operation
7 of programs, including, in accordance with special regu-
8 lations of the Commissioner, minor remodeling of class-
9 room or other space used for such programs and acqui-
10 sition of necessary equipment, specially designed to meet
11 the special educational needs of Indian children.
12 "APPLICATION FOR GRANTS; CONDITIONS FOR APPROVAL
13 "SEC. 305. (a) A grant under this title, except as pro-
14 vided in section 303 (b) (3), may be made only to a local
15 educational agency or agencies, but only upon application
16 to the Commissioner at such time or times, in such manner,
17 and containing or accompanied by such information as the
18 Commissioner deems necessary. Such application shall—
19 "(1) provide that the activities and services for
20 which assistance under this title is sought will be ad-
21 ministered by or under the supervision of the applicant;
22 "(2) set forth a program for carrying out the pur-
23 poses of section 304, and provide for such methods
24 of administration as are necessary for the proper and
25 efficient operation of the program;

1 "(3) in the case of an application for payments for
2 planning, provide that (A) the planning was or will be
3 directly related to programs or projects to be carried out
4 under this title and has resulted, or is reasonably likely
5 to result, in a program or project which will be carried
6 out under this title, and (B) the planning funds are
7 needed because of the innovative nature of the program
8 or project or because the local educational agency lacks
9 the resources necessary to plan adequately for programs
10 and projects to be carried out under this title;
11 "(4) provide that effective procedures, including
12 provisions for appropriate objective measurement of
13 educational achievement, will be adopted for evaluating
14 at least annually the effectiveness of the programs and
15 projects in meeting the special educational needs of
16 Indian students;
17 "(5) set forth policies and procedures which assure
18 that Federal funds made available under this title for any
19 fiscal year will be so used as to supplement and, to the
20 extent practical, increase the level of funds that would,
21 in the absence of such Federal funds, be made available
22 by the applicant for the education of Indian children
23 and in no case supplant such funds;
24 "(6) provide for such fiscal control and fund
25 accounting procedures as may be necessary to assure

1 proper disbursement of, and accounting for, Federal
2 funds paid to the applicant under this title; and
3 "(7) provide for making an annual report and such
4 other reports, in such form and containing such infor-
5 mation, as the Commissioner may reasonably require to
6 carry out his functions under this title and to determine
7 the extent to which funds provided under this title have
8 been effective in improving the educational opportunities
9 of Indian students in the area served, and for keeping
10 such records and for affording such access thereto as the
11 Commissioner may find necessary to assure the correct-
12 ness and verification of such reports.
13 "(b) An application by a local educational agency or
14 agencies for a grant under this title may be approved only
15 if it is consistent with the applicable provisions of this title
16 and—
17 "(1) meets the requirements set forth in subsec-
18 tion (a);
19 "(2) provides that the program or project for which
20 application is made—
21 "(A) will utilize the best available talents and
22 resources (including persons from the Indian com-
23 munity) and will substantially increase the educa-
24 tional opportunities of Indian students in the area
25 to be served by the applicant; and

1 "(B) has been developed—

2 "(i) in open consultation with parents of

3 Indian children, teachers, and, where applica-

4 ble, secondary school students, including public

5 hearings at which such persons have had a full

6 opportunity to understand the program for

7 which assistance is being sought and to offer

8 recommendations thereon, and

9 "(ii) with the participation and approval of

10 a committee composed of parents of children

11 participating in the program for which assist-

12 ance is sought, teachers, and, where applicable,

13 secondary school students, of which at least half

14 the members shall be such parents;

15 "(C) sets forth such policies and procedures as

16 will insure that the program for which assistance is

17 sought will be operated in consultation with, and

18 the involvement of, parents of the children and repre-

19 sentatives of the area to be served, including the

20 committee established for the purposes of clause (2)

21 (B) (ii).

22 "(3) has been submitted to the appropriate State

23 educational agency for comment and recommendations.

24 "(c) Amendments of applications shall, except as the

25 Commissioner may otherwise provide by or pursuant to

1 regulations, be subject to approval in the same manner as
2 original applications.

3 "PAYMENTS

4 "SEC. 306. (a) The Commissioner shall, subject to the
5 provisions of section 307, from time to time pay to each local
6 educational agency which has had an application approved
7 under section 305, an amount equal to the amount expended
8 by such agency in carrying out activities under such appli-
9 cation.

10 "(b) (1) No payments shall be made under this title
11 for any fiscal year to any local educational agency in a State
12 which has taken into consideration payments under this title
13 in determining the eligibility of such local educational agency
14 in that State for State aid, or the amount of that aid, with
15 respect to the free public education of children during that
16 year or the preceding fiscal year.

17 "(2) No payments shall be made under this title to
18 any local educational agency for any fiscal year unless the
19 State educational agency finds that the combined fiscal
20 effort (as determined in accordance with regulations of the
21 Commissioner) of that agency and the State with respect to
22 the provision of free public education by that agency for the
23 preceding fiscal year was not less than such combined fiscal
24 effort for that purpose for the second preceding fiscal year.

1 "ADJUSTMENTS WHERE NECESSITATED BY
2 APPROPRIATIONS
3 "SEC. 307. (a) If the sums appropriated for any fiscal
4 year for making payments under this title are not sufficient
5 to pay in full the total amounts which all local educational
6 agencies are eligible to receive under this title for that fiscal
7 year, the maximum amounts which all such agencies are
8 eligible to receive under this title for such fiscal year shall
9 be ratably reduced. In case additional funds become avail-
10 able for making such payments for any fiscal year during
11 which the first sentence of this subsection is applicable, such
12 reduced amounts shall be increased on the same basis as
13 they were reduced.
14 "(b) In the case of any fiscal year in which the maxi-
15 mum amounts for which local educational agencies are eligi-
16 ble have been reduced under the first sentence of subsection
17 (a), and in which additional funds have not been made
18 available to pay in full the total of such maximum amounts
19 under the second sentence of such subsection, the Commis-
20 sioner shall fix dates prior to which each local educational
21 agency shall report to him on the amount of funds available
22 to it, under the terms of section 306 (a) and subsection (a)
23 of this section, which it estimates, in accordance with reg-
24 ulations of the Commissioner, that it will expend under
25 approved applications. The amounts so available to any local

1 educational agency, or any amount which would be available
2 to any other local education agency if it were to submit an
3 approvable application therefor, which the Commissioner
4 determines will not be used for the period of its availability,
5 shall be available for allocation to those local educational
6 agencies, in the manner provided in the second sentence of
7 subsection (a), which the Commissioner determines will
8 need additional funds to carry out approved applications,
9 except that no local educational agency shall receive an
10 amount under this sentence which, when added to the amount
11 available to it under subsection (a), exceeds its entitlement
12 under section 303.

13 "DEFINITION

14 "SEC. 308. As used in this title, the term 'Indian' means
15 any individual who is an enrolled member of a tribe, band,
16 or other organized group of Indians, or who is a descendant
17 of any such enrolled member, or who is considered by the
18 Secretary of the Interior to be an Indian."

19 (b) (1) Paragraph (1) of section 103 (a) of title I of
20 the Elementary and Secondary Education Act of 1965 is
21 amended—

22 (A) by striking out subparagraph (B), and by
23 striking out "(A)" where it appears after "SEC. 103.
24 (a) (1)";

1 (B) in the fourth sentence thereof, by striking out
2 "and the terms upon which payment shall be made to
3 the Department of Interior"; and
4 (C) by striking out the third sentence thereof.
5 (2) Paragraph (1) of section 303 of the Act of
6 September 30, 1950, is amended—
7 (A) in the second sentence, by striking out "(A)
8 except for the purposes of section 6, real property held
9 in trust by the United States for individual Indians or
10 Indian tribes, and real property held by individual
11 Indians or Indian tribes which is subject to restrictions
12 on alienation imposed by the United States," and by
13 redesignating clauses (B), (C), and (D) therein, and
14 all references thereto, as clauses (A), (B), and (C),
15 respectively; and
16 (B) in the fourth sentence, (i) by inserting before
17 the period at the end thereof the following: ", or (C)
18 Indian reservations, or other property held (i) in trust
19 by the United States for individual Indians or Indian
20 tribes or (ii) held by individual Indians or Indian
21 tribes which is subject to restrictions on alienation im-
22 posed by the United States", and (ii) by striking out
23 "and (B)" and inserting in lieu thereof ", or (B)".

1 PART B—SPECIAL PROGRAMS AND PROJECTS TO IMPROVE
2 EDUCATIONAL OPPORTUNITIES FOR INDIAN CHILDREN
3 AMENDMENT TO TITLE VIII OF THE ELEMENTARY AND
4 SECONDARY EDUCATION ACT OF 1965

5 SEC. 521. (a) Title III of the Elementary and Sec-
6 ondary Education Act of 1965 is amended by adding to the
7 end thereof the following new section:

8 "IMPROVEMENT OF EDUCATIONAL OPPORTUNITIES FOR
9 AMERICAN INDIAN CHILDREN

10 "SEC. 810. (a) The Commissioner shall carry out a
11 program of making grants for the improvement of educa-
12 tional opportunities for American Indian children—

13 "(1) to support planning, pilot, and demonstration
14 projects, in accordance with subsection (b), which are
15 designed to test and demonstrate the effectiveness of
16 programs for improving educational opportunities for
17 American Indian children;

18 "(2) to assist in the establishment and operation of
19 programs, in accordance with subsection (c), which are
20 designed to stimulate (A) the provision of educational
21 services not available to American Indian children in
22 sufficient quantity or quality, and (B) the development
23 and establishment of exemplary educational programs to

1 serve as models for regular school programs in which
2 American Indian children are educated;
3 "(3) to assist in the establishment and operation of
4 preservice and inservice training programs, in accord-
5 ance with subsection (d), for persons serving Indian
6 children as educational personnel; and
7 "(4) to encourage the dissemination of informa-
8 tion and materials relating to, and the evaluation of the
9 effectiveness of, education programs which may offer
10 educational opportunities to American Indian children.
11 In the case of activities of the type described in clause (3),
12 preference shall be given to the training of Indians.
13 "(b) The Commissioner is authorized to make grants
14 to State and local educational agencies and other appropriate
15 public and private educational and research agencies, organi-
16 zations, and institutions (including federally supported ele-
17 mentary and secondary schools for Indian children) to sup-
18 port planning, pilot, and demonstration projects which are
19 designed to plan for, and test and demonstrate the effective-
20 ness of, programs for improving educational opportunities
21 for American Indian children, including—
22 "(1) innovative programs related to the educational
23 needs of educationally deprived children;
24 "(2) bilingual and bicultural education programs
25 and projects;

1 "(3) special health and nutrition services, and other
2 related activities, which meet the special health, social,
3 and psychological problems of Indian children; and
4 "(4) coordinating the operation of other federally
5 assisted programs which may be used to assist in meet-
6 ing the needs of such children.
7 "(c) The Commissioner is also authorized to make
8 grants to State and local educational agencies and to the Na-
9 tional Board of Indian Education to assist and stimulate them
10 in developing and establishing educational services and pro-
11 grams specifically designed to improve educational opportuni-
12 ties for American Indian children. Grants may be used—
13 "(1) to provide educational services not available
14 to such children in sufficient quantity or quality, in-
15 cluding—
16 "(A) remedial and compensatory instruction,
17 school health, physical education, psychological, and
18 other services designed to assist and encourage In-
19 dian children to enter, remain in, or reenter ele-
20 mentary or secondary school;
21 "(B) comprehensive academic and vocational
22 instruction;
23 "(C) instructional materials (such as library
24 books, textbooks, and other printed or published
25 or audiovisual materials) and equipment;

1 "(D) comprehensive guidance, counseling, and
2 testing services;
3 "(E) special education programs for handi-
4 capped and preschool children;
5 "(F) bilingual and bicultural education pro-
6 grams; and
7 "(G) other services which meet the purposes
8 of this subsection; and
9 "(2) for the establishment and operation of exem-
10 plary and innovative educational programs and centers,
11 involving new educational approaches, methods, and
12 techniques designed to enrich programs of elementary
13 and secondary education for Indian children.
14 "(d) The Commissioner is also authorized to make
15 grants to institutions of higher education and to State and
16 local educational agencies, in combination with institutions
17 of higher education, for carrying out programs and projects—
18 "(1) to prepare persons to serve Indian children
19 as teachers, teacher aides, social workers, and ancillary
20 educational personnel; and
21 "(2) to improve the qualifications of such persons
22 who are serving Indian children in such capacities.
23 Grants for the purposes of this subsection may be used for
24 the establishment of fellowship programs leading to an

1 advanced degree, for institutes and, as part of a continuing
2 program, for seminars, symposia, workshops, and conferences.
3 "(e) The Commissioner is also authorized to make
4 grants to, and contracts with, public and private agencies,
5 organizations, and institutions (except that no grant may be
6 made to an agency, organization, or institution other than
7 one which is nonprofit) for—
8 "(1) the dissemination of information concerning
9 education programs, services, and resources available to
10 Indian children, including evaluations thereof; and
11 "(2) the evaluation of the effectiveness of federally
12 assisted programs in which Indian children may partici-
13 pate in achieving the purposes of such programs with
14 respect to such children.
15 "(f) Applications for a grant under this section shall be
16 submitted at such time, in such manner, and shall contain such
17 information, and shall be consistent with such criteria, as may
18 be established as requirements in regulations promulgated
19 by the Commissioner. Such applications shall—
20 "(1) set forth a statement describing the activities
21 for which assistance is sought;
22 "(2) in the case of an application for the purposes
23 of subsection (c), subject to such criteria as the Com-
24 missioner shall prescribe, provide for the use of funds

1 available under this section, and for the coordination of
2 other resources available to the applicant, in order to
3 insure that, within the scope of the purpose of the proj-
4 ect, there will be a comprehensive program to achieve
5 the purposes of this section;
6 "(3) in the case of an application for the purposes
7 of subsection (c), make adequate provision for the
8 training of the personnel participating in the project;
9 and
10 "(4) provide for an evaluation of the effectiveness
11 of the project in achieving its purposes and those of this
12 section.
13 The Commissioner shall not approve an application for a
14 grant under subsection (b) or (c) unless he is satisfied that
15 there has been participation by tribal communities and
16 parents of the children to be served in the planning and
17 development of the project, and that there will be such a
18 participation in the operation and evaluation of the project.
19 In approving applications under subsection (a) or (b), the
20 Commissioner shall not approve an application from non-
21 Indian educational agencies, organizations, and institutions
22 until all approvable applications from Indian educational
23 agencies, organizations, and institutions have been approved.
24 "(g) For the purpose of making grants under this sec-
25 tion there are hereby authorized to be appropriated $25,000,-

1 000 for the fiscal year ending June 30, 1972, and $35,000,-
2 000 for each of the four succeeding fiscal years.".
3 (b) (1) Effective after June 30, 1972, the Elementary
4 and Secondary Education Act of 1965 is amended—
5 (A) in section 202 (a) (1), by striking out "(A)
6 the Secretary of the Interior the amount necessary for
7 such assistance for children and teachers in elementary
8 and secondary schools operated for Indian children by
9 the Department of the Interior, and (B)" and by strik-
10 ing out "Secretary of the Interior and the".
11 (B) in section 302 (a) (1), by striking out "(A)
12 the Secretary of the Interior the amount necessary to
13 provide programs and projects for the purpose of this
14 title for individuals on reservations serviced by elemen-
15 tary and secondary schools operated for Indian children
16 by the Department of the Interior, and (B)" and by
17 striking out "Secretary of the Interior and the".
18 (2) Effective after June 30, 1972, the second sentence
19 of paragraph (1) of section 612 (a) of the Education of the
20 Handicapped Act is amended to read as follows: "The Com-
21 missioner shall allot the amount appropriated pursuant to
22 this paragraph among Puerto Rico, Guam, American
23 Samoa, the Virgin Islands, and the Trust Territory of the
24 Pacific Islands, according to their respective needs.".

1 PART C—SPECIAL PROGRAMS RELATING TO ADULT EDU-
2 CATION FOR AMERICAN INDIANS
3 AMENDMENT TO TITLE III OF THE ELEMENTARY AND
4 SECONDARY EDUCATION ACT OF 1965
5 SEC. 541. Title III of the Elementary and Secondary
6 Education Amendments of 1966 (the Adult Education Act)
7 is amended by redesignating sections 314 and 315, and all
8 references thereto, as sections 315, and 316, respectively, and
9 by adding after section 313 the following new section:
10 "IMPROVEMENT OF EDUCATIONAL OPPORTUNITIES FOR
11 ADULT AMERICAN INDIANS
12 "SEC. 314. (a) The Commissioner shall carry out a pro-
13 gram of making grants to State and local educational agencies
14 and other appropriate public and private educational and
15 research agencies, organizations, and institutions to support
16 planning, pilot, and demonstration projects which are de-
17 signed to plan for, and test and demonstrate the effectiveness
18 of programs for providing adult education for American
19 Indians—
20 "(1) to support planning, pilot, and demonstra-
21 tion projects which are designed to test and demonstrate
22 the effectiveness of programs for improving employment
23 and educational opportunities for adult American In-
24 dians;
25 "(2) to assist in the establishment and operation of

1 programs which are designed to stimulate (A) the pro-
2 vision of basic literacy opportunities to all nonliterate
3 Indian adults, and (B) the provision of opportunities to
4 all Indian adults to qualify for a high school equivalency
5 certificate in the shortest period of time feasible;
6 "(3) to support a major research and development
7 program to develop more innovative and effective tech-
8 niques for achieving the literacy and high school equiv-
9 alency goals;
10 "(4) to provide for basic surveys and evaluations
11 thereof to define accurately the extent of the problems of
12 illiteracy and lack of high school completion on Indian
13 reservations;
14 "(5) to encourage the dissemination of information
15 and materials relating to, and the evaluation of the effec-
16 tiveness of, education programs which may offer educa-
17 tional opportunities to Indian adults.
18 "(b) The Commissioner is also authorized to make
19 grants to, and contracts with, public and private agencies,
20 organizations, or institutions (except that no grant may be
21 made to an agency, organization, or institution other than
22 one which is nonprofit) for—
23 "(1) the dissemination of information concerning
24 educational programs, services, and resources available
25 to Indian adults, including evaluations thereof; and

1 "(2) the evaluation of the effectiveness of federally
2 assisted programs in which Indian adults may participate
3 in achieving the purposes of such programs with respect
4 to such adults.
5 "(c) Applications for a grant under this section shall be
6 submitted at such time, in such manner, and contain such
7 information, and shall be consistent with such criteria, as
8 may be established as requirements in regulations promul-
9 gated by the Commissioner. Such applications shall—
10 "(1) set forth a statement describing the activities
11 for which assistance is sought;
12 "(2) provide for an evaluation of the effectiveness
13 of the project in achieving its purposes and those of
14 this section.
15 The Commissioner shall not approve an application for a
16 grant under subsection (a) unless he is satisfied that there
17 has been participation by tribal communities and individuals
18 to be served in the planning and development of the project,
19 and that there will be such a participation in the operation
20 and evaluation of the project. In approving applications
21 under subsection (a), the Commissioner shall not approve
22 an application from non-Indian educational agencies, or-
23 ganizations, and institutions until all approvable applica-
24 tions from Indian educational agencies, organizations, and
25 institutions have been approved.

1 "(d) For the purpose of making grants under this sec-
2 tion there are hereby authorized to be appropriated $5,-
3 000,000 for the fiscal year ending June 30, 1972, and
4 $8,000,000 for each of the four succeeding fiscal years.".

5 PART D—NATIONAL BOARD OF INDIAN EDUCATION;
6 BUREAU OF INDIAN EDUCATION; MISCELLANEOUS

7 NATIONAL BOARD OF INDIAN EDUCATION

8 SEC. 561. (a) There is hereby established the National
9 Board of Indian Education (referred to in this title as the
10 "National Board"), which shall consist of fifteen members
11 appointed by the President of the United States, with the
12 advice and consent of the Senate. Such appointments shall
13 be made by the President from lists of nominees furnished,
14 from time to time, by Indian tribes and organizations, and
15 shall represent diverse geographic areas of the country.
16 (b) Members of the National Board shall be appointed
17 for terms of three years; except that the terms of office of
18 the members first taking office shall expire, as designated by
19 the President at the time of appointment, five at the end of
20 one year, five at the end of two years, and five at the end
21 of three years. No member shall serve for more than two
22 consecutive terms. Any person appointed to fill a vacancy
23 occurring prior to the expiration of the term for which his
24 predecessor was appointed shall be appointed for the re-
25 mainder of that term. The President shall designate one of

1 the members to serve as Chairman and one to serve as Vice
2 Chairman. The Vice Chairman, during the absence or dis-
3 ability of the Chairman, shall act for, and exercise the powers
4 of, the Chairman. The Vice Chairman shall perform such
5 duties as the Chairman may prescribe from time to time.
6 (c) Members of the National Board shall be com-
7 pensated at the rate prescribed for grade GS-18 of the
8 General Schedule under section 5332 of title 5, United
9 States Code.

10 STAFF OF NATIONAL BOARD

11 SEC. 562. Subject to such rules and regulations as it
12 may adopt, the National Board shall be authorized to—
13 (1) appoint and fix the compensation of an
14 Executive Director, and such additional staff personnel
15 as the Chairman deems necessary, without regard to
16 the provisions of title 5, United States Code, governing
17 appointments in the competitive service, and without
18 regard to the provisions of chapter 51 and subchapter
19 III of chapter 53 of such title relating to classifications
20 and General Schedule pay rates, but at rates not in
21 excess of the maximum rate for grade GS-18 of the
22 General Schedule under section 5332 of such title;
23 (2) appoint and affix the compensation of a
24 Superintendent of Indian Education, without regard to
25 the provisions of title 5, United States Code, governing

1 appointments in competitive service, who shall be
2 compensated at the rate prescribed for grade GS-18 of
3 the General Schedule under section 5332 of such title,
4 and who have such duties as the National Board
5 shall prescribe; and
6 (3) procure temporary and intermittent services
7 to the same extent as is authorized by section 3109 of
8 title 5, United States Code, but at rates not to exceed
9 $100 a day for individuals.
10 POWERS AND DUTIES OF NATIONAL BOARD
11 SEC. 563. The National Board is authorized and
12 directed—
13 (1) to carry out the functions transferred to the
14 National Board pursuant to section 404 of this title;
15 (2) to establish and support local school districts
16 comprising Federal Indian schools over which it has
17 jurisdiction and control;
18 (3) to establish and support local school boards,
19 who shall be selected at the local level in accordance
20 with regulations promulgated by the National Board,
21 having administrative control and direction over Federal
22 Indian schools located within districts established pur-
23 suant to clause (2) of this section;
24 (4) to advise the Commissioner of Education with
25 respect to the administration of any program in which

1 Indian children participate, including title III of the Act
2 of September 30, 1950 (Public Law 874, Eighty-first
3 Congress), as added by this Act, and section 810, title
4 VIII of the Elementary and Secondary Education Act
5 of 1965, as added by this Act; and
6 (5) to submit to the Congress not later than March
7 31 each year a report on its activities, which shall in-
8 clude any recommendations it may deem necessary for
9 the improvement of Federal programs in which Indian
10 children participate.

11 FUNCTIONS OF NATIONAL BOARD

12 SEC. 564. (a) (1) There are hereby vested in the Na-
13 tional Board all functions which were carried out immedi-
14 ately before the effective date of this Act by the head of
15 any agency in the executive branch of the Government,
16 except the Department of Health, Education, and Welfare
17 and the Office of Economic Opportunity, relating to the edu-
18 cation of Indians in any elementary, secondary, or voca-
19 tional school, or any institution of higher education, including
20 all such functions being administered through any agency,
21 service, bureau, office, or other entity of any such agency.
22 (2) All functions of any agency of the United States,
23 except the Office of Education and the Office of Economic
24 Opportunity, relating to the education of Indians in any
25 elementary, secondary, or vocational school, or any institu-

1 tion of higher learning, are hereby transferred to, and vested
2 in, the National Board.
3 (3) All orders, determinations, rules, regulations, per-
4 mits, contracts, grants, certificates, licenses, and privileges—
5 (A) which have been issued, made, granted or al-
6 lowed to become effective in the exercise of functions
7 transferred by this section; and
8 (B) which are in effect at the time this section takes
9 effect,
10 shall continue in effect according to their terms until modi-
11 fied, terminated, superseded, set aside, or repealed by the
12 National Board, by any court of competent jurisdiction, or
13 by operation of law.
14 (4) All personnel, assets, liabilities, contracts, property,
15 and records as are determined by the Director of the Office
16 of Management and Budget to be employed, held, or used
17 primarily in connection with the functions transferred under
18 this section are transferred to the National Board. Person-
19 nel engaged in functions transferred under this section shall
20 be transferred in accordance with applicable laws and regu-
21 lations relating to transfer of functions.
22 (5) As used in this section, the term "functions" in-
23 cludes powers and duties.
24 (b) The National Board is directed—
25 (1) to conduct, in concert with a team of profes-

1 sional consultants competent in areas of personality de-
2 velopment and mental health, a detailed investigation of
3 the off-reservation boarding schools to determine which
4 ones should be converted into therapeutic treatment
5 centers, and to cooperate with the Public Health Service
6 to the extent necessary to bring about such conversion;
7 (2) to examine the present distribution and location
8 of Federal boarding schools and the pattern of student
9 placement, with the view to developing and implement-
10 ing a new rationale and plan with regard to such schools;
11 and
12 (3) to submit to the Congress on or before Jan-
13 uary 1, 1973, a report on its activities under this sub-
14 section.
15 BUREAU OF INDIAN EDUCATION
16 SEC. 565. (a) There is hereby established, in the Office
17 of Education, a bureau to be known as the "Bureau of
18 Indian Education" which, under the direction of the Com-
19 missioner, shall have the responsibility for administering
20 the provisions of title III of the Act of September 30, 1950
21 (Public Law 874, Eighty-first Congress), as added by this
22 Act, section 810 of title VIII of the Elementary and Second-
23 ary Education Act of 1965, as added by this Act, and section
24 314 of title III of the Elementary and Secondary Education
25 Amendments of 1966, as added by this Act. The Bureau shall

1 be headed by a Deputy Commissioner of Indian Education,
2 who shall be appointed by the President of the United States
3 from a list of nominees submitted to him by the National
4 Board of Indian Education.

5 (b) The Deputy Commissioner of Indian Education
6 shall be compensated at the rate prescribed for grade 17 of
7 the General Schedule of the Classification Act of 1949 and
8 shall perform such duties as are delegated or assigned to him
9 by the Commissioner.

10 PART E—MISCELLANEOUS PROVISIONS

11 AMENDMENT TO TITLE V OF HIGHER EDUCATION ACT
12 OF 1965

13 SEC. 581. (a) Section 503 (a) of the Higher Education
14 Act of 1965 is amended (1) by inserting after "and higher
15 education," the following: "including the need to provide
16 such programs and education to Indians," and (2) by in-
17 serting after "the Department of Labor," the following:
18 "the National Board of Indian Education,".

19 (b) Section 504 (a) (1) of such Act is amended by
20 inserting after "secondary schools" the following: "(in-
21 cluding such schools operated by the National Board of In-
22 dian Education or by an agency of an Indian tribe.)".

23 (c) Section 505 of such Act is amended by inserting
24 after "shall consult with" the following: "the Chairman of
25 the National Board of Indian Education,".

1 (d) Subsections (a) and (d) of section 552 of such
2 Act of 1965 are each amended by inserting after "in all
3 the States" a comma and the following: "including such
4 needs in schools operated by the National Board of Indian
5 Education, or by an agency of an Indian tribe.".
6 (e) Section 553 (a) of such Act is amended by insert-
7 ing at the end thereof the following: "The Commissioner
8 may also enter into arrangements with the National Board
9 of Indian Education, or with an agency of an Indian tribe,
10 and use funds appropriated for the purpose of this section,
11 for carrying out the purpose of this section with respect to
12 schools operated by the National Board of Indian Educa-
13 tion, or by an agency of an Indian tribe or tribes.".

14 AMENDMENT TO TITLE III OF HIGHER EDUCATION ACT
15 OF 1965

16 SEC. 582. Section 302 (d) of the Higher Education Act
17 of 1965 is amended by inserting before the semicolon at the
18 end thereof a comma and the following: "except that the
19 Commissioner may waive the five-year requirement of this
20 clause with respect to an institution located on or near an
21 Indian reservation in any case in which he determines that
22 such action will increase the availability of higher education
23 to Indians".

24 INSTITUTE OF AMERICAN INDIAN ARTS

25 SEC. 583. The National Board of Indian Education is
26 directed and authorized to raise the Institute of American

1 Indian Arts at Santa Fe, New Mexico, to the level of a
2 4-year college.

3 COMMUNITY COLLEGES

4 SEC. 584. (a) The National Board of Indian Educa-
5 tion is directed and authorized to provide continuing sup-
6 port for the community colleges in which a substantial num-
7 ber of Indian students are enrolled.

8 (b) The National Board is directed to conduct a study
9 exploring the feasibility of Indian community colleges, to
10 work toward the establishment of such Indian-controlled in-
11 stitutions, and to submit a report respecting such study to
12 the Congress on or before July 1, 1972.

13 AMENDMENT TO THE ELEMENTARY AND SECONDARY
14 EDUCATION ACT OF 1965

15 SEC. 585. Section 706 (a) of the Elementary and Sec-
16 ondary Education Act of 1965 is amended to read as follows:

17 "(a) For the purpose of carrying out programs pursu-
18 ant to this title for individuals on or from reservations serv-
19 iced by elementary and secondary schools operated on or
20 near such reservations for Indian children, a nonprofit insti-
21 tution or organization of the Indian tribe concerned which
22 operates any such school and which is approved by the
23 Commissioner for the purpose of this section, may be con-
24 sidered to be a local educational agency, as such term is
25 used in this title.".

1 On page 3, above line 1, add the following at the end
2 of the table of contents:

TITLE V—INDIAN EDUCATION

PART A—REVISION OF IMPACTED AREAS PROGRAM AS IT RELATES TO INDIAN CHILDREN

Sec. 501. Revision of Public Law 874 provisions relating to Indians.

PART B—SPECIAL PROGRAMS AND PROJECTS TO IMPROVE EDUCATIONAL OPPORTUNITIES FOR INDIAN CHILDREN

Sec. 521. Addition of Indian education program part to title III, ESEA.

PART C—SPECIAL PROGRAMS RELATING TO ADULT EDUCATION FOR AMERICAN INDIANS

Sec. 541. Addition of Indian program part to Adult Education Act.

PART D—NATIONAL BOARD OF INDIAN EDUCATION; BUREAU OF INDIAN EDUCATION; MISCELLANEOUS

Sec. 561. National Board of Indian Education.
Sec. 562. Staff of National Board.
Sec. 563. Powers and duties of National Board.
Sec. 564. Functions of National Board.
Sec. 565. Bureau of Indian Education.

PART E—MISCELLANEOUS PROVISIONS

Sec. 581. Inclusion of Indians in Higher Education Act.
Sec. 582. Waiver of five-year requirement of Higher Education Act for Indian schools.
Sec. 583. Elevation of Institute of American Indian Arts.
Sec. 584. Support and study of Indian community colleges.
Sec. 585. Expansion of Indian eligibility under section 706(a), Elementary and Secondary Education Act.

92D CONGRESS
1ST SESSION

S. 659

IN THE SENATE OF THE UNITED STATES

MARCH 16, 1971

Referred to the Committee on Labor and Public Welfare and ordered to be printed

AMENDMENT

Intended to be proposed by Mr. MOSS to S. 659, a bill to amend the Higher Education Act of 1965, the Vocational Educational Act of 1963, and related Acts, and for other purposes, viz: At the end of the bill, add the following new title:

1 TITLE V—CONSTITUTING THE COLLEGE OF THE
2 VIRGIN ISLANDS AND THE UNIVERSITY OF
3 GUAM AS LAND-GRANT COLLEGES
4 SEC. 501. The College of the Virgin Islands and the
5 University of Guam shall be considered land-grant colleges
6 established for the benefit of agriculture and mechanic arts
7 in accordance with the provisions of the Act of July 2,
8 1862, as amended (12 Stat. 503; 7 U.S.C. 301-305, 307,
9 308).

1 SEC. 502. In lieu of extending to the Virgin Islands
2 and Guam those provisions of the Act of July 2, 1862, as
3 amended, referred to above, relating to donations of public
4 land or land script for the endowment and maintenance of
5 colleges for the benefit of agriculture and the mechanic
6 arts, there is authorized to be appropriated to both the
7 Virgin Islands and Guam the sum of $3,000,000 each.
8 Amounts appropriated under this section shall be held and
9 considered to have been granted to the Virgin Islands and
10 Guam subject to the provisions of that Act applicable to
11 the proceeds from the sale of land or land script.
12 SEC. 503. The Act of August 30, 1890, as amended
13 (26 Stat. 417; 7 U.S.C. 322–326), is further amended—
14 (1) by striking the words "and Territory" wher-
15 ever they appear and substituting in lieu thereof the
16 words ", Puerto Rico, the Virgin Islands, and Guam";
17 (2) by striking the words "and Territories" wher-
18 ever they appear and substituting in lieu thereof the
19 words ", Puerto Rico, the Virgin Islands, and Guam";
20 (3) by striking the words "or Territory" wherever
21 they appear and substituting in lieu thereof the words
22 ", Puerto Rico, the Virgin Islands, or Guam";
23 (4) by striking the words "or Territories" wher-
24 ever they appear and substituting in lieu thereof the

1 words ", Puerto Rico, the Virgin Islands, or Guam";
2 and
3 (5) by striking the words "or Territorial" where
4 they appear.
5 SEC. 504. Section 22 of the Act of June 29, 1935, as
6 amended (49 Stat. 439; 7 U.S.C. 329), is further amended—
7 (1) by striking the words "and Puerto Rico"
8 wherever they appear and substituting in lieu thereof
9 the words ", Puerto Rico, the Virgin Islands, and
10 Guam";
11 (2) by striking the figure "$7,800,000" and sub-
12 stituting in lieu thereof the figure "$8,100,000"; and
13 (3) by striking the figure "$4,320,000" and sub-
14 stituting in lieu thereof the figure "$4,360,000".
15 SEC. 505. The Act of March 4, 1940 (54 Stat. 39; 7
16 U.S.C. 331) is amended—
17 (1) by striking the words "and Territories" wher-
18 ever they appear and substituting in lieu thereof the
19 words ", Puerto Rico, the Virgin Islands, and Guam";
20 (2) by striking the words "or Territories" wher-
21 ever they appear and substituting in lieu thereof the
22 words ", Puerto Rico, the Virgin Islands, or Guam";
23 and
24 (3) by striking the word "State" wherever it

60-433 O - 71 - pt. 1 -- 11

1 appears in the third proviso of that Act and substituting
2 in lieu thereof the words "State, Puerto Rico, the Virgin
3 Islands, or Guam".

4 SEC. 506. Section 207 of the Agricultural Marketing Act
5 of 1946 (60 Stat. 1091; 7 U.S.C. 1626), is amended by
6 striking the period at the end of the section and adding the
7 following words: ", and the term 'State' when used in this
8 chapter shall include the Virgin Islands and Guam."

9 SEC. 507. Section 3 of the Act of May 8, 1914, as
10 amended (38 Stat. 373; 7 U.S.C. 343), is further amended
11 by redesignating subsection (b) as paragraph (1) of sub-
12 section (b) and adding a new paragraph (2) to subsection
13 (b) to read as follows:

14 "(2) There is authorized to be appropriated for the
15 fiscal year ending June 30, 1971, and for each fiscal year
16 thereafter, for payment to the Virgin Islands and Guam,
17 $100,000 each, which sums shall be in addition to the sums
18 appropriated for the several States of the United States and
19 Puerto Rico under the provisions of this section. The amount
20 paid by the Federal Government to the Virgin Islands and
21 Guam pursuant to this paragraph shall not exceed during any
22 fiscal year, except the fiscal years ending June 30, 1971, and
23 June 30, 1972, when such amount may be used to pay the
24 total cost of providing services pursuant to this Act, the

1 amount available and budgeted for expenditure by the Virgin
2 Islands and Guam for the purposes of this Act."
3 SEC. 508. Section 10 of the Act of May 8, 1914, as
4 amended, is amended by striking the words "and Puerto
5 Rico" and inserting in lieu thereof the words ", Puerto Rico,
6 the Virgin Islands, and Guam".
7 SEC. 509. Section 4 of the Act of October 10, 1962 (76
8 Stat. 806; 16 U.S.C. 582a-3), is amended by striking the
9 period at the end of the first sentence thereof and adding the
10 following language: ", except that for the fiscal years ending
11 June 30, 1971, and June 30, 1972, the matching funds re-
12 quirement hereof shall not be applicable to the Virgin Islands
13 and Guam, and sums authorized for such years for the Virgin
14 Islands and Guam may be used to pay the total cost of pro-
15 grams for forestry research."
16 SEC. 510. Section 8 of the Act of October 10, 1962 (76
17 Stat. 807; 16 U.S.C. 582a-7), is amended by striking the
18 period at the end thereof and adding the words ", the Virgin
19 Islands and Guam.".
20 SEC. 511. Section 1 of the Act of August 11, 1955 (7
21 U.S.C. 361a-361i), is amended by striking the period after
22 the second sentence and adding the words, "Guam and
23 Virgin Islands," and deleting "and" between the words
24 "Hawaii and Puerto Rico."

1 SEC. 512. Section 3 of the Act of August 11, 1955 (7
2 U.S.C. 361a–361i), is amended by redesignating subsection
3 (b) as paragraph (1) of subsection (b) and adding a new
4 paragraph (2) to subsection (b) to read as follows:
5 "(2) There is authorized to be appropriated for the
6 fiscal year ending June 30, 1971, and for each fiscal year
7 thereafter, for payment to the Virgin Islands and Guam,
8 $100,000 each, which sums shall be in addition to the sums
9 appropriated for the several States of the United States and
10 Puerto Rico under the provisions of this section. The amount
11 paid by the Federal Government to the Virgin Islands and
12 Guam pursuant to this paragraph shall not exceed during
13 any fiscal year, except the fiscal years ending June 30, 1971,
14 and June 30, 1972, when such amount may be used to pay
15 the total cost of providing services pursuant to this Act, the
16 amount available and budgeted for expenditure by the Virgin
17 Islands and Guam for the purposes of this Act."
18 SEC. 513. With respect to the Virgin Islands and Guam,
19 the enactment of this title shall be deemed to satisfy any
20 requirement of State consent contained in laws or provisions
21 of law referred to in this title.

92D CONGRESS
1ST SESSION

S. 23

IN THE SENATE OF THE UNITED STATES

JANUARY 25, 1971

Mr. SCHWEIKER introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To provide a program to improve the opportunity for the study of cultural heritages of all ethnic groups in the Nation.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That this Act may be cited as "The Ethnic Heritage Studies
4 Centers Act of 1971".
5 SEC. 2. The Higher Education Act of 1965 is amended
6 by redesignating title XII as title XIII, and sections 1201
7 through 1210 (and references thereto however styled in such
8 Act or any other Act) as sections 1301 through 1310, re-
9 spectively. The Higher Education Act of 1965 is further
10 amended by inserting after title VII the following new title:

II

1 "TITLE XII—ETHNIC HERITAGE STUDIES
2 CENTERS

3 "STATEMENT OF POLICY

4 "SEC. 1201. In recognition of the heterogeneous com-
5 position of the Nation and of the fact that in a multiethnic
6 society a greater understanding of the contributions of one's
7 own heritage and those of one's fellow citizens can contribute
8 to a more harmonious, patriotic, and committed populace,
9 and in recognition of the principle that all students in elemen-
10 tary and secondary schools of the Nation should have an op-
11 portunity to learn about the differing and unique contribu-
12 tions to the national heritage made by each ethnic group, it
13 is the purpose of this title to provide assistance designed to
14 afford students an opportunity to learn about the nature of
15 their own cultural heritage, and to study the contributions of
16 the cultural heritages of the ethnic groups of this Nation.

17 "ETHNIC HERITAGE STUDIES CENTERS

18 "SEC. 1202. The Commissioner is authorized to provide
19 for the establishment and operation of ethnic heritage studies
20 centers through grants to public and private nonprofit educa-
21 tional agencies and organizations. Each such center will have
22 courses of study related to all ethnic groups represented in
23 the regional area to be served by such center.

24 "ACTIVITIES OF ETHNIC HERITAGE STUDIES CENTERS

25 "SEC. 1203. Each center provided for under this title
26 shall—

1 "(1) develop curriculum materials for use in elemen-
2 tary and secondary schools and institutions of higher
3 education which deal with the history, geography,
4 society, economy, literature, art, music, drama, language.
5 and general culture of the groups with which the center
6 is concerned, and the contributions of those ethnic groups
7 to the American heritage,
8 "(2) disseminate curriculum materials to permit
9 their use in elementary and secondary schools and institu-
10 tions of higher education throughout the Nation, and
11 "(3) provide training for persons utilizing or pre-
12 paring to utilize the curriculum materials developed
13 under this title.
14 "ADMINISTRATIVE PROVISIONS
15 "SEC. 1204. (a) In carrying out this title, the Com-
16 missioner shall make arrangements which will utilize (1)
17 the research facilities and personnel of institutions of higher
18 education, (2) the special knowledge of ethnic groups in
19 local communities and of foreign students pursuing their
20 education in this country, (3) the expertise of teachers in
21 elementary and secondary schools and institutions of higher
22 education, and (4) the talents and experience of any other
23 groups in the regional area to be served by centers assisted
24 under this title such as foundations, civic groups, and fraternal
25 organizations which would further the goals of the centers.

1 "(b) Funds appropriated to carry out this title may be
2 used to cover all or part of the cost of establishing, equipping,
3 and operating the centers, including the cost of research
4 materials and resources, academic consultants, and the cost
5 of training of staff for the purpose of carrying out the pur-
6 poses of this title. Such funds may also be used to provide
7 stipends (in such amounts as may be determined in accord-
8 ance with regulations of the Commissioner) to individuals
9 receiving training in such centers, including allowances for
10 dependents.

11 "AUTHORIZATION OF APPROPRIATIONS

12 "SEC. 1205. There is authorized to be appropriated to
13 carry out this title for the fiscal year ending June 30, 1971,
14 the sum of $10,000,000, and for the fiscal year ending June
15 30, 1972, the sum of $20,000,000."

92D CONGRESS
1ST SESSION

S. 276

IN THE SENATE OF THE UNITED STATES

JANUARY 26, 1971

MR. NELSON introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To authorize the Commissioner of Education to award fellowships to persons preparing for environmental careers.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That this Act may be cited as the "Environmental Career
4 Fellowships Act".

5 AWARD OF FELLOWSHIPS

6 SEC. 2. The Commissioner of Education is authorized
7 to award fellowships in accordance with the provisions of this
8 Act for graduate or professional study for persons who plan
9 to pursue environmental careers, in such fields as ecology,

1 hydrology, chemistry, biology, and engineering related to the
2 control of environmental pollution.

3 ALLOCATION OF FELLOWSHIPS

4 SEC. 3. The Commissioner shall allocate fellowships
5 under this Act among institutions of higher education with
6 programs approved under the provisions of this Act for the
7 use of individuals accepted for study in such programs, in such
8 manner and according to such plan as will insofar as practi-
9 cable provide for an equitable distribution of such fellowships
10 throughout all regions of the Nation.

11 APPROVAL OF PROGRAMS

12 SEC. 4. The Commissioner may approve a program of
13 study as eligible for fellowships under this Act only upon
14 application by an institution of higher education and only
15 upon his finding—

16 (1) that such program has as a principal or signifi-
17 cant objective the education of persons for environmental
18 careers, including professional or technical occupations
19 for which there is a significant need in environmental
20 fields;

21 (2) that such program will expand opportunities
22 for persons to undertake graduate or professional study
23 in preparation for environmental careers:

(3) that such program is in effect and of high quality, or can readily be put into effect and may reasonably be expected to be of high quality;

(4) that the institution provides satisfactory assurance that it will recommend to the Commissioner, for the award of fellowships under this Act, only persons who have demonstrated to the satisfaction of the institution a serious intent to pursue an environmental career upon completing the program; and

(5) that such institution agrees to accept the cost-of-education allowance provided under section 6(b) of this Act in lieu of any tuition or fees which would otherwise be charged to fellowship recipients for their course of study.

PROGRAM DEVELOPMENT GRANTS

SEC. 5. In order to expand the number of opportunities for graduate and professional study for persons preparing to serve in environmental careers and to achieve an appropriate geographical distribution of high quality programs offering such opportunities, the Commissioner is authorized to make grants to or contracts with institutions of higher education to pay part of the cost of developing or strengthening programs of graduate or professional study which meet, or as a

1 result of the assistance received under this section will be
2 enabled to meet, the requirements for an approved fellow-
3 ship program in accordance with section 4 of this Act.

4 STIPENDS AND COST-OF-EDUCATION ALLOWANCES

5 SEC. 6. (a) The Commissioner shall pay persons
6 awarded fellowships under this Act such stipends (including
7 such allowances for subsistence and other expenses for such
8 persons and their dependents) as he may determine to be
9 consistent with prevailing practices under comparable fed-
10 erally supported programs.

11 (b) The Commissioner shall (in addition to the stipends
12 paid to persons under subsection (a)) pay to the institution
13 of higher education at which such person is pursuing his
14 course of study a cost-of-education allowance of such amount
15 as the Commissioner may determine to be consistent with
16 prevailing practices under comparable federally supported
17 programs.

18 AUTHORIZATION OF APPROPRIATIONS

19 SEC. 7. For the purpose of carrying out this Act, there
20 are authorized to be appropriated $50,000,000 for the fiscal
21 year ending June 30, 1972, $100,000,000 for the fiscal year
22 ending June 30, 1973, $150,000,000 for the fiscal year
23 ending June 30, 1974, and $200,000,000 for each succeed-
24 ing fiscal year.

92D CONGRESS
1ST SESSION

S. 374

IN THE SENATE OF THE UNITED STATES

JANUARY 27 (legislative day, JANUARY 26), 1971

Mr. MCGOVERN introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To amend title I of the Vocational Education Act of 1963 in order to authorize the construction under the provisions of such title of student union rooms or buildings for area vocational schools.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That section 108 (3) of the Vocational Education Act of
4 1963 is amended by inserting after the first sentence the
5 following: "For the purposes of part B such term includes
6 student union rooms or buildings and related facilities, as
7 defined by the Commissioner, and initial equipment and inter-
8 ests in land on which such facilities are constructed."

II

92D CONGRESS
1ST SESSION

S. 404

IN THE SENATE OF THE UNITED STATES

JANUARY 28 (legislative day, JANUARY 26), 1971

Mr. METCALF introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To authorize the United States Office of Education to carry out certain activities concerning consumers' education.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That this Act may be cited as the "Consumers' Education
4 Act of 1971."

5 OFFICE OF CONSUMERS' EDUCATION

6 SEC. 2. There is hereby established within the Office of
7 Education an Office of Consumers' Education (hereafter in
8 this Act referred to as the "Office") which, subject to the
9 management of the Commissioner of Education (hereinafter
10 referred to as the "Commissioner"), shall have primary
11 responsibility for carrying out the provisions of this Act.

1 The Office shall be headed by a Director (hereinafter re-
2 ferred to as the "Director") who shall be compensated at
3 the rate prescribed for grade GS–17 in section 5332 of title
4 5, United States Code.

5 GRANTS TO INSTITUTIONS OF HIGHER EDUCATION

6 SEC. 3. The Commissioner, through the Office, shall carry
7 out a program of making grants to institutions of higher
8 education and other nonprofit organizations, institutions, and
9 agencies to assist them (1) in making studies and reports
10 relating to Federal and State laws, regulations, decisions, and
11 rulings affecting consumers; (2) in making studies and
12 reports relating to the needs of the consumer in the fields
13 of energy, communication and transportation and the special
14 problems of consumers in areas served by regulated industries
15 (whether regulated by State or Federal agencies); (3) in
16 training persons for research relating to such studies and
17 reports, and (4) in development of curricula and programs
18 of study in consumer interests in such fields.

19 STUDIES, REPORTS, AND TECHNICAL ASSISTANCE

20 SEC. 4. The Director is authorized to conduct such studies
21 and make such reports relating to the activities set forth in
22 section 3 as he may deem appropriate, and to furnish such
23 advice and technical assistance as may be appropriate, on
24 request, to any State or local government, institution of
25 higher education, or other nonprofit organizations for the

1 purpose of establishing and carrying out any program of
2 education in utility consumer interest within the scope of
3 such activities.

4 REPORTS AND EVALUATIONS

5 SEC. 5. Each recipient of Federal funds under this Act
6 shall make such reports and evaluations as the Commis-
7 sioner shall prescribe by regulation.

8 AUTHORIZATION OF APPROPRIATIONS

9 SEC. 6. There are hereby authorized to be appropriated
10 such sums as may be necessary to carry out the purposes of
11 this Act for the fiscal year ending June 30, 1972, and for
12 each of the succeeding fiscal years ending prior to July 1,
13 1977.

92D CONGRESS
1ST SESSION

S. 434

IN THE SENATE OF THE UNITED STATES

JANUARY 29 (legislative day, JANUARY 26), 1971

Mr. PROUTY (for himself, Mr. DOMINICK, Mr. GRIFFIN, Mr. JAVITS, Mr. PACKWOOD, Mr. SAXBE, Mr. SCHWEIKER, and Mr. SCOTT) introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To establish a National Institute of Education, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That this Act may be cited as the "National Institute of
4 Education Act".

5 FINDINGS AND DECLARATION OF POLICY

6 SEC. 2. The Congress hereby declares it to be the policy
7 of the United States to provide to every person an equal
8 opportunity to receive an education of high quality regard-
9 less of his race, color, religion, sex, national origin, or eco-
10 nomic status. Although the American educational system has

II

60-433 O - 71 - pt. 1 -- 12

1 pursued this objective, it has not attained it. Inequalities of
2 opportunity to receive high quality education remain pro-
3 nounced. To achieve equality will require far more dependable
4 knowledge about the processes of learning and education
5 than now exists or can be expected from present research and
6 experimentation in this field. While the direction of th edu-
7 cation system remains primarily the responsibility of State
8 and local governments, the Federal Government has a clear
9 responsibility to provide leadership in the conduct and sup-
10 port of scientific inquiry into the educational process. The
11 purpose of this Act is to establish a National Institute of
12 Education to conduct and support educational research, and
13 disseminate educational research findings throughout the
14 Nation.

15 ESTABLISHMENT OF NATIONAL INSTITUTE OF
16 EDUCATION

17 SEC. 3. (a) There is established in the Department of
18 Health, Education, and Welfare a National Institute of Edu-
19 cation (hereinafter referred to as the "Institute"). The Insti-
20 tute shall be headed by a Director who shall be appointed by
21 the President with the advice and consent of the Senate. The
22 Director shall perform such duties as are prescribed by the
23 Secretary of Health, Education, and Welfare (hereinafter
24 referred to as the "Secretary").

25 (b) Section 5316 of title 5, United States Code, re-

1 lating to positions in level V of the Executive Schedule, is
2 amended by adding the following paragraph at the end
3 thereof: "Director, National Institute of Education, Depart-
4 ment of Health, Education, and Welfare."

5 FUNCTIONS OF THE INSTITUTE

6 SEC. 4. The Secretary, through the Institute, shall con-
7 duct educational research; collect and disseminate the find-
8 ings of educational research; train individuals in educational
9 research; assist and foster such research, collection, dissemi-
10 nation, or training through grants, or technical assistance to,
11 or jointly financed cooperative arrangements with, public or
12 private organizations, institutions, agencies, or individuals;
13 promote the coordination of such research and research sup-
14 port within the Federal Government; and may construct or
15 provide (by grant or otherwise) for such facilities as he de-
16 termines may be required to accomplish such purposes. As
17 used in this Act the term "educational research" includes
18 research, planning, surveys, evaluations, investigations, ex-
19 periments, developments, and demonstrations in the field of
20 education.

21 EMPLOYMENT OF PERSONNEL

22 SEC. 5. The Secretary may appoint and compensate
23 without regard to the provisions of title 5, United States
24 Code, governing appointments in the competitive service and
25 chapter 51 and subchapter III of chapter 53 of such title,

1 relating to classification and general schedule rates, such
2 technical and professional personnel as he deems necessary
3 to accomplish the functions of the Institute.

4 NATIONAL ADVISORY COUNCIL ON EDUCATIONAL
5 RESEARCH AND DEVELOPMENT

6 SEC. 6. (a) The President shall appoint a National
7 Advisory Council on Educational Research and Development
8 which shall—

9 (1) review and advise the Secretary and the Di-
10 rector on the status of educational research in the United
11 States, and present to the Secretary such recommenda-
12 tions as it may deem appropriate for the strengthening
13 of such research and the improvement of methods of col-
14 lecting and disseminating the findings of educational
15 research;

16 (2) advise the Secretary and the Director of the
17 Institute on the development of programs to be carried
18 out by the Institute and on matters of general policy
19 arising in the administration of this Act;

20 (3) conduct such studies as may be necessary to
21 fulfill its functions under this section; and

22 (4) prepare an annual report to the Secretary on
23 the current status and needs of educational research in
24 the United States, which the Secretary shall transmit to

1 the President with such recommendations as he may
2 make.
3 (b) The Council shall be appointed by the President
4 without regard to the civil service laws and shall consist of
5 fifteen members apppointed for terms of three years; except
6 that (1) any member appointed to fill a vacancy occurring
7 prior to the expiration of the term for which his predecessor
8 was appointed shall be appointed for the remainder of such
9 term, and (2) the terms of office of the members first tak-
10 ing office shall begin upon enactment of the Act, and shall
11 expire as designated at the time of appointment, five at the
12 end of three years, five at the end of two years, and five at
13 the end of the first year. One of such members shall be des-
14 ignated by the President as Chairman. Members of the
15 Council who are not regular full-time employees of the
16 United States shall, while serving on the business of the
17 Council, be entitled to receive compensation at rates to be
18 determined by the Secretary, but not exceeding the per diem
19 equivalent for GS–18 for each day so engaged, including
20 traveltime and, while so serving away from their homes or
21 regular places of business, may be allowed travel expenses,
22 including per diem in lieu of subsistence, as authorized by
23 section 5703 of title 5, United States Code, for persons in
24 the Government service employed intermittently. The Direc-
25 tor of the Institute shall also serve on the Council ex officio.

1 (c) The Secretary shall provide to the Council such
2 professional, clerical, and other assistance as may be re-
3 quired to carry out its functions.
4 (d) The Council is authorized, without regard to the
5 provisions of title 5, United States Code, governing ap-
6 pointments in the competitive service, and without regard
7 to the provisions of chapter 51 and subchapter III of chap-
8 ter 53 of such title relating to classification and general
9 schedule pay rates, to employ and fix the compensation of
10 such personnel as may be necessary to carry out its func-
11 tions. The Council is further authorized to obtain services
12 in accordance with the provisions of section 3109 of title 5,
13 United States Code, and it may enter into contracts for the
14 conduct of studies and other activities necessary to the dis-
15 charge of its duties.
16 GENERAL PROVISIONS
17 SEC. 7. (a) In administering the provisions of this Act,
18 the Secretary is authorized to utilize the services and facili-
19 ties of any agency of the Federal Government and of any
20 other public or nonprofit private agency or institution, in
21 accordance with agreements between the Secretary and
22 the head thereof, on a reimbursable basis or otherwise.
23 (b) Payments under this Act to any individual or to
24 any organization, institution, or agency may be made in in-
25 stallments, and in advance or by way of reimbursement,

1 with necessary adjustments on account of overpayments or
2 underpayments.
3 (c) The Secretary is authorized to accept gifts to the
4 Institute and to apply them to carry out his functions under
5 this Act; and is similarly authorized to accept voluntary and
6 uncompensated services, notwithstanding the provisions of
7 section 3679 (b) of the Revised Statutes (31 U.S.C.
8 665 (b)).
9 (d) Funds available under this Act shall be available
10 for transfer to any other Federal department or agency (in-
11 cluding constituent agencies of the Department of Health,
12 Education, and Welfare) for use (in accordance with an in-
13 teragency agreement) by such agency (alone or in combina-
14 tion with funds of that agency) for purposes for which such
15 transferred funds could be otherwise expended by the Sec-
16 retary under this Act, and the Secretary is likewise author-
17 ized to accept and expend funds of any other Federal agency
18 for use under this Act.
19 (e) All laborers and mechanics employed by contractors
20 or subcontractors on all construction projects assisted under
21 this Act shall be paid wages at rates not less than those pre-
22 vailing on similar construction in the locality as determined
23 by the Secretary of Labor in accordance with the Davis-
24 Bacon Act, as amended (40 U.S.C. 276a—276a-5). The
25 Secretary of Labor shall have, with respect to the labor

1 standards specified in this section the authority and func-
2 tions set forth in Reorganization Plan Numbered 14 of 1950
3 (15 F.R. 3176; 5 U.S.C. 133z-15) and section 2 of the Act
4 of June 13, 1934, as amended (40 U.S.C. 276 (c)).

5 APPROPRIATIONS AUTHORIZED

6 SEC. 8. There are authorized to be appropriated for the
7 fiscal year ending June 30, 1972, and for each fiscal year
8 thereafter, such sums as may be necessary to carry out this
9 Act, which shall remain available until expended.

92D CONGRESS
1ST SESSION

S. 545

IN THE SENATE OF THE UNITED STATES

FEBRUARY 2 (legislative day, JANUARY 26), 1971

Mr. WILLIAMS (for himself, Mr. BROOKE, Mr. CASE, Mr. CHURCH, Mr. CRANSTON, Mr. COOPER, Mr. EAGLETON, Mr. GRAVEL, Mr. HARRIS, Mr. HART, Mr. HARTKE, Mr. HUGHES, Mr. HUMPHREY, Mr. INOUYE, Mr. JACKSON, Mr. KENNEDY, Mr. MCGEE, Mr. MCGOVERN, Mr. MONDALE, Mr. MOSS, Mr. MUSKIE, Mr. NELSON, Mr. RANDOLPH, Mr. RIBICOFF, and Mr. STEVENSON) introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To improve and increase postsecondary educational opportunities throughout the Nation by providing assistance to the States for the development and construction of comprehensive community colleges.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That this Act may be cited as the "Comprehensive Com-
4 munity College Act of 1971."

5 STATEMENT OF PURPOSE

6 SEC. 2. It is the purpose of this Act to assist the
7 States in providing postsecondary education to all persons in

1 all areas of each State through a program of Federal grants
2 to each State for the purpose of strengthening, improving,
3 and developing comprehensive commuunity colleges; to in-
4 sure that the education provided by such colleges is suited to
5 the needs, interests, and potential benefits of the total com-
6 munity; and to assist such colleges in providing educational
7 programs especially suited to the needs of educationally
8 and/or economically disadvantaged persons in each State.

9 TITLE I—DEVELOPMENT OF STATE PLANS

10 AUTHORIZATION

11 SEC. 101. In order to assist the States in developing
12 State plans for the purposes of title II of this Act, there is
13 authorized to be appropriated $15,000,000 for the fiscal year
14 beginning July 1, 1972, which sum shall be made available
15 for expenditure for each succeeding fiscal year ending prior
16 to July 1, 1975. The sums appropriated pursuant to this
17 section shall be used for making payments to States whose
18 applications for funds for carrying out such purposes have
19 been approved.

20 STATE APPLICATIONS

21 SEC. 102. The Commissioner shall approve any applica-
22 tion for funds for carrying out the purpose of section 101 if
23 such application—

24 (1) provides that a State agency to be designated
25 by the Governor of that State, which is representative

of all agencies in such State which are concerned with postsecondary education or which is presently responsible for the administration of community college education in such State, will be the sole agency for carrying out such purpose;

(2) provides for the development of a State comprehensive community college plan to meet the requirements of section 203 of this Act; and

(3) provides that such State agency will make such reports, in such form, and containing such information as the Commissioner may from time to time reasonably require, and, to assure verification of such reports, give the Commissioner, upon request, access to the records upon which such information is based.

ALLOTMENTS TO STATES

SEC. 103. The sums appropriated pursuant to section 101 shall be allotted by the Commissioner among the States on the basis of the amount needed by each State for the purpose of this title, except that no such allotment to any State shall be more than $300,000.

WITHHOLDING OF PAYMENTS

SEC. 104. Whenever the Commissioner, after reasonable notice and opportunity for hearing to a State agency, finds (1) that such State educational agency is not complying substantially with the provisions of this title or the terms and

1 conditions of its application approved under this title, or
2 (2) that any funds paid to such State educational agency
3 under this title have been diverted from the purposes for
4 which they had been allotted or paid, the Commissioner
5 shall notify such State agency that no further payments will
6 be made under this title with respect to such agency until
7 there is no longer any failure to comply or the diversion has
8 been corrected or, if compliance or correction is impossible,
9 until such State agency repays or arranges for the repay-
10 ment of Federal moneys which have been diverted or im-
11 properly expended.

12 TITLE II—FINANCIAL ASSISTANCE FOR COM-
13 PREHENSIVE COMMUNITY COLLEGES

14 AUTHORIZATION

15 SEC. 201. (a) The Commissioner shall, in accordance
16 with the provisions of this title, make payments to State
17 agencies for the period beginning July 1, 1972, and ending
18 June 30, 1975.

19 (b) There are authorized to be appropriated for the
20 purpose of making such payments for each fiscal year such
21 sums as the Congress shall deem necessary.

22 ALLOTMENTS

23 SEC. 202. (a) From the sums appropriated pursuant
24 to section 201 (b) for each fiscal year the Commissioner
25 shall (1) allot not more than 5 per centum thereof among

1 Puerto Rico, Guam, American Samoa, the Virgin Islands,
2 and the Trust Territory of the Pacific Islands according to
3 their respective needs and (2) reserve not more than 5
4 per centum thereof for the purposes of section 206. From
5 the remainder of such sums the Commissioner shall allot to
6 each State an amount which bears the same ratio to such
7 remainder as the population aged eighteen and over in such
8 State bears to the total of such population in all States. For
9 the purposes of this subsection, the term "State" does not
10 include Puerto Rico, Guam, American Samoa, the Virgin
11 Islands, and the Trust Territory of the Pacific Islands.
12 (b) The portion of any State's allotment under subsec-
13 tion (a) for a fiscal year which the Commissioner deter-
14 mines will not be required, for the period such allotment
15 is available, for carrying out the purposes of this title shall
16 be available for reallotment from time to time, on such
17 dates during such period as the Commissioner may fix, to
18 other States in proportion to the original allotments to such
19 States under subsection (a) for such year, but with such
20 proportionate amount for any of such other States being
21 reduced to the extent it exceeds the sum which the Com-
22 missioner estimates such State needs and will be able to
23 use for such period for carrying out such portion of its
24 State application approved under this title, and the total
25 of such reductions shall be similarly reallotted among the

1 States whose proportionate amounts are not so reduced. Any
2 amount reallotted to a State under this subsection during a
3 year shall be deemed part of its allotment under subsection
4 (a) for such year.

5 STATE PLANS AND PAYMENTS

6 SEC. 203. (a) Any State desiring to receive its allot-
7 ment of Federal funds under this title shall submit a State
8 plan, in such detail as the Commissioner deems necessary,
9 which—

10 (1) provides for the administration of such plan by
11 a State agency to be designated by the Governor of
12 that State, which is representative of all agencies in such
13 State which are concerned with postsecondary education
14 or which is presently responsible for the administration
15 of community college education in such State;

16 (2) sets forth a comprehensive statewide program
17 for the improvement, development, and construction of
18 comprehensive community colleges in the State for the
19 purposes of this Act, including (A) the development
20 and carrying out of comprehensive curriculum programs
21 with special emphasis on programs for educationally and
22 economically disadvantaged persons, including occupa-
23 tional-technical programs, adult continuing education
24 programs, community service programs, developmental
25 programs, counseling-advising programs, and lower di-

1 vision university parallel programs, (B) training and
2 development of faculty, administrators, counselors, and
3 other necessary personnel, and (C) research to be car-
4 ried out in such colleges to increase the effectiveness
5 of such colleges and to provide data for future
6 development;
7 (3) establishes priorities for the purpose of carry-
8 ing out such program;
9 (4) provides that such colleges will be tuition free
10 or low tuition to State residents or provide adequate
11 financial aid programs. The term "low tuition" as used
12 in this subsection shall be determined by the Commis-
13 sioner within his discretion upon approval of a State
14 plan;
15 (5) provides for the necessary State and local
16 financial support to carry out such program with assist-
17 ance under this title;
18 (6) sets forth policies and procedures designed to
19 assure that Federal funds made available under this title
20 will be so used as not to supplant State or local funds, or
21 funds of comprehensive community colleges, but to sup-
22 plement and, to the extent practicable, to increase the
23 amounts of such funds that would in the absence of such
24 Federal funds be made available for the purposes of this
25 Act;

1 (7) sets forth such fiscal control and fund account-
2 ing procedures as may be necessary to assure proper dis-
3 bursement of and accounting for Federal funds paid to
4 the State (including such funds paid by the State to
5 comprehensive community colleges) under this title;
6 (8) provides for making such reports in such form
7 and containing such information as the Commissioner
8 may reasonably require to carry out his functions under
9 this title, and for keeping such records and for affording
10 such access thereto as the Commissioner may find neces-
11 sary to assure the correctness and verification of such
12 reports;
13 (9) provides to the extent possible for interstate
14 cooperation in carrying out programs pursuant to this
15 title.
16 (b) The Commissioner shall approve any State plan
17 and any modification thereof which complies with the provi-
18 sions of subsection (a) and shall pay to such State, from its
19 allotment for each fiscal year, the reasonable cost, as deter-
20 mined by the Commissioner, of carrying out such approved
21 plan for such year.
22 (c) Payments to a State under this title may be made
23 in installments and in advance or by way of reimburse-
24 ment with necessary adjustments on account of overpay-
25 ments or underpayments, and they may be paid directly

1 to the State or to one or more participating colleges desig-
2 nated for this purpose by the State, or to both.

3 ADMINISTRATION OF STATE PLANS

4 SEC. 204. (a) The Commissioner shall not finally
5 disapprove any State plan submitted under this title, or any
6 modification thereof, without first affording the State agency
7 or institution submitting the plan reasonable notice and
8 opportunity for a hearing.

9 (b) Whenever the Commissioner, after reasonable notice
10 and opportunity for hearing to the State agency or institu-
11 tion administering a State plan approved under section 103,
12 finds that—

13 (1) the State plan has been so changed that it no
14 longer complies with the provisions of such section, or

15 (2) in the administration of the plan there is a
16 failure to comply substantially with any such provision,
17 the Commissioner shall notify the State agency or insti-
18 tution that the State will not be regarded as eligible
19 to participate in the program under this title until he
20 is satisfied that there is no longer any such failure to
21 comply.

22 LABOR STANDARDS

23 SEC. 205. All laborers and mechanics employed by con-
24 tractors on all construction projects assisted under this title

1 shall be paid wages at rates not less than those prevailing
2 on similar construction in the locality as determined by the
3 Secretary of Labor in accordance with the Davis-Bacon Act,
4 as amended (40 U.S.C. 276a—276a-5). The Secretary of
5 Labor shall have with respect to the labor standards speci-
6 fied in this section authority and functions set forth in
7 Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176)
8 and section 2 of the Act of June 13, 1934, as amended
9 (40 U.S.C. 276c).

10 DEMONSTRATION PROJECTS AND RESEARCH FOR
11 COMPREHENSIVE COMMUNITY COLLEGE PURPOSES

12 SEC. 206. The Commissioner is authorized to enter into
13 such contracts or other arrangements as may be necessary
14 to carry out innovative and exemplary demonstration proj-
15 ects and research to promote the purpose of this Act.

16 TITLE III—GENERAL PROVISIONS

17 DEFINITIONS

18 SEC. 301. As used in this Act—

19 (1) the term "Commissioner" means the Commis-
20 sioner of Education.

21 (2) the term "comprehensive community college"
22 means any junior college, technical institute, or any
23 other educational institution in any State which—

24 (A) is legally authorized within such State to

1 provide a program of education beyond secondary
2 education;
3 (B) admits as regular students high school
4 graduates or equivalent, or persons at least eighteen
5 years of age;
6 (C) provides a two-year postsecondary educa-
7 tional program leading to an associate degree, or
8 acceptable for credit toward a bachelor's degree, and
9 also provides programs of postsecondary vocational,
10 technical, occupational, and specialized education;
11 (D) is a public or other nonprofit institution;
12 (E) has a Board of Trustees or other desig-
13 nated governing body which includes individuals
14 representative of the community which it serves;
15 (F) is accredited as an institution by a na-
16 tionally recognized accrediting agency or associa-
17 tion, or if not so accredited—
18 (i) is an institution that has obtained rec-
19 ognized preaccreditation status from a nationally
20 recognized accrediting body, or
21 (ii) is an institution whose credits are
22 accepted on transfer, by not less than three
23 accredited institutions, for credit on the same
24 basis as if transferred from an institution so
25 accredited, and

1 for purposes of this paragraph, the Commissioner shall
2 publish a list of nationally recognized accrediting agen-
3 cies or associations which he determines to be reliable
4 authority as to the quality of training offered.

5 (3) The term "construction" includes the prep-
6 aration of drawings and specifications for college fa-
7 cilities; erecting, building, acquiring, altering, remodel-
8 ing, improving, or extending such facilities; and the
9 inspection and supervision of the construction of such
10 facilities. Such term does not include interests in land
11 or off-site improvements.

12 (4) The term "college facilities" includes classrooms
13 and related facilities; and initial equipment, machinery,
14 and utilities necessary or appropriate for comprehensive
15 community college purposes. Such term does not in-
16 clude athletic stadiums, or structures or facilities intended
17 primarily for athletic exhibitions, contests, or games or
18 other events for which admission is to be charged to the
19 general public.

20 (5) The term "State" includes, in addition to the
21 several States of the Union, the Commonwealth of
22 Puerto Rico, the District of Columbia, Guam, American
23 Samoa, the Virgin Islands, and the Trust Territory of
24 the Pacific Islands.

1 ADMINISTRATION

2 SEC. 302. (a) The Commissioner shall administer the
3 provisions of this Act through a Bureau of Community Edu-
4 cation which he shall establish in the Office of Education.
5 Such Bureau shall be headed by a Deputy Commissioner for
6 Community Education, which position is hereby created in
7 the Office of Education. Such Bureau shall, upon request,
8 advise any State with respect to its programs pursuant to
9 this Act.

10 (b) The Commissioner shall, within one hundred
11 twenty days of enactment of this statute, make a report to
12 Congress (1) identifying all other programs administered
13 by the Office of Education which should, for the purpose of
14 consolidating the administration of programs affecting com-
15 prehensive community colleges, be administered through
16 the Bureau of Community Education, and (2) what action
17 is being taken to provide for the administration of such
18 programs by such Bureau.

19 (c) In administering the provisions of this Act, the
20 Commissioner is authorized to utilize the services and facili-
21 ties of any agency of the Federal Government and of any
22 other public or nonprofit agency or institution in accordance
23 with appropriate agreements, and to pay for such services
24 either in advance or by way of reimbursement, as may be
25 agreed upon.

1 JUDICIAL REVIEW

2 SEC. 303. (a) If any State is dissatisfied with the Com-
3 missioner's final action with respect to the approval of its
4 application submitted under section 102 or its plan submitted
5 under section 203, or with his final action under section
6 104 or section 205, such State may, within sixty days after
7 notice of such action, file with the United States court of
8 appeals for the circuit in which such State is located a peti-
9 tion for review of that action. A copy of the petition shall
10 be forthwith transmitted by the clerk of the court to the
11 Commissioner. The Commissioner thereupon shall file in
12 the court the record of the proceedings on which he based
13 his action, as provided in section 2112 of title 28, United
14 States Code.

15 (b) The findings of fact by the Commissioner, if sup-
16 ported by substantial evidence, shall be conclusive; but the
17 court, for good cause shown, may remand the case to the
18 Commissioner to take further evidence, and the Commis-
19 sioner may thereupon make new or modified findings of fact
20 and may modify his previous action, and shall file in the
21 court the record of the further proceedings. Such new or
22 modified findings of fact shall likewise be conclusive if sup-
23 ported by substantial evidence.

24 (c) Upon the filing of such petition, the court shall have
25 jurisdiction to affirm the action of the Commissioner or to

1 set it aside, in whole or in part. The judgment of the court
2 shall be subject to review by the Supreme Court of the
3 United States upon certiorari or certification as provided in
4 section 1254 of title 28, United States Code.

5 PROHIBITIONS

6 SEC. 304. (a) Nothing contained in this Act shall be
7 construed to authorize any department, agency, officer, or
8 employee of the United States to exercise any direction,
9 supervision, or control over the curriculum, program of in-
10 struction, administration, or personnel of any educational
11 institution or school system.

12 (b) Nothing contained in this Act shall be construed
13 to authorize the making of any payment under this Act for
14 the construction of facilities as a place of worship or religious
15 instruction.

16 NATIONAL ADVISORY COUNCIL

17 SEC. 305. (a) The Commissioner shall appoint a Na-
18 tional Advisory Council on Comprehensive Community Col-
19 leges. The members of such Council shall be appointed
20 without regard to the civil service laws, to represent appro-
21 priate fields competent or interested in the development of
22 such colleges for the purposes of this Act.

23 (b) The Council shall advise the Commissioner with
24 respect to (1) criteria for the evaluation of applications and
25 State plans pursuant to this Act, (2) the administration of

1 title II of this Act, and (3) means of improving the admin-
2 istration and operation of this Act.
3 (c) The Council shall make an annual report of its
4 findings and recommendations (including recommendations
5 for changes in the provisions of this Act) to the President
6 not later than March 31 of each calendar year after the cal-
7 endar year in which this Act is enacted. The President shall
8 transmit each such report to the Congress together with his
9 comments and recommendations.
10 (d) Members of the Council who are not regular full-
11 time employees of the United States shall, while serving on
12 business of the Council, be entitled to receive compensation
13 at rates fixed by the President, but not exceeding $100 per
14 day, including travel time; and while so serving away from
15 their homes or regular places of business, they may be
16 allowed travel expenses, including per diem in lieu of sub-
17 sistence, as authorized by section 5703 of title 5 of the
18 United States Code for persons in Government service em-
19 ployed intermittently.
20 STUDY AND RECOMMENDATIONS IN ORDER TO AVOID
21 DUPLICATION OF BENEFITS
22 SEC. 306. The Commissioner shall (1) make an in-
23 vestigation and study of all Federal programs assisting com-
24 prehensive community colleges in order to determine which
25 of such programs provide assistance which is a duplication

1 of assistance provided pursuant to this Act, and (2) report
2 to Congress, not later than six months after the date of
3 enactment of this Act, his recommendations, including any
4 necessary legislation, for terminating such duplication.

202 10

92D CONGRESS
1ST SESSION

S. 1062

IN THE SENATE OF THE UNITED STATES

MARCH 2 (legislative day, FEBRUARY 17), 1971

Mr. JAVITS (for himself, Mr. BEALL, Mr. DOMINICK, Mr. GRIFFIN, Mr. PROUTY, Mr. SCHWEIKER, and Mr. SCOTT) introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To establish a National Foundation for Higher Education, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Foundation for Higher Education Act of 1971".

ESTABLISHMENT OF NATIONAL FOUNDATION FOR HIGHER EDUCATION

SEC. 2. There is established in the Department of Health, Education, and Welfare a National Foundation for Higher Education (hereinafter referred to as the "Foundation"). The President shall appoint, with the advice and consent of the Senate, a Director of the Foundation (hereinafter in this

1 Act referred to as the "Director") who shall perform such
2 duties in carrying out this Act as are prescribed by the
3 Secretary of Health, Education, and Welfare (hereinafter
4 in this Act referred to as the "Secretary").

5 PURPOSES OF THE FOUNDATION

6 SEC. 3. The purposes of the Foundation are—

7 (1) to encourage excellence, innovation, and re-
8 form in postsecondary education;

9 (2) to provide assistance for the design and estab-
10 lishment of innovative structures for providing post-
11 secondary education and innovative modes of teaching
12 and learning therein;

13 (3) to expand the ways and patterns of acquiring
14 postsecondary education and to open opportunities for
15 such education to individuals of all ages and circum-
16 stances;

17 (4) to strengthen the autonomy, individuality, and
18 sense of mission of postsecondary educational institu-
19 tions, and to support programs which are distinctive or
20 of special value to American society; and

21 (5) to encourage postsecondary educational insti-
22 tutions to develop policies, programs, and practices re-
23 sponsive to social needs, and to provide an organization
24 concerned with the rationalization of public policies to-
25 ward postsecondary education.

1 HIGHER EDUCATION FOUNDATION BOARD

2 SEC. 4. (a) The President shall appoint, without regard
3 to the provisions of title 5 of the United States Code govern-
4 ing appointments in the competitive service, a Higher Edu-
5 cation Foundation Board (hereinafter in this Act referred
6 to as the "Board") which shall—

7 (1) advise the Secretary and the Director with
8 respect to matters of general policy arising in the admin-
9 istration of this Act and programs to be carried out by
10 the Foundation; and

11 (2) prepare an annual report to the Secretary
12 on the current status and needs of postsecondary edu-
13 cation in the United States, which the Secretary shall
14 transmit to the President with such recommendations as
15 he may make.

16 (b) The Board shall consist of the Director, ex officio,
17 and eighteen members who shall be broadly representative of
18 the general public as well as the education community. The
19 members of the Board shall be appointed for terms of three
20 years; except that (1) any member appointed to fill a va-
21 cancy occurring prior to the expiration of the term for which
22 his predecessor was appointed shall be appointed for the re-
23 mainder of such term, and (2) the terms of office of the mem-
24 bers first taking office shall begin upon enactment of this Act,
25 and shall expire as designated at the time of appointment, six

at the end of three years, six at the end of two years, and six at the end of the first year. One of the members shall be designated by the President as Chairman. Members of the Board who are not regular full-time employees of the United States shall, while serving on the business of the Board, be entitled to receive compensation at rates to be determined by the Secretary, but not exceeding the per diem equivalent for GS–18 for each day so engaged, including traveltime, and, while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently.

ASSISTANCE

SEC. 5. (a) The Secretary is authorized to make grants to or contracts with any public or private agency, organization, or institution, any combination thereof, or any individual, in order to achieve the purposes of the Foundation, except that no grant may be made to a private agency, organization, or institution other than a nonprofit one. Such assistance may be given to support activities designed to achieve the purposes of this Act, including—

(1) the creation of institutions and programs involving new paths to career and professional training,

1 and new combinations of academic and experiential
2 learning;
3 (2) the establishment of institutions and programs
4 based on the technology of communications;
5 (3) the carrying out in postsecondary educational
6 institutions of changes in internal structure and opera-
7 tions designed to clarify institutional priorities and
8 purposes;
9 (4) the design and introduction of cost-effective
10 methods of instruction and operation;
11 (5) the introduction of institutional reforms de-
12 signed to expand individual opportunities for entering
13 and reentering institutions and pursuing programs of
14 study tailored to individual needs;
15 (6) the introduction of reforms in graduate educa-
16 tion, in the structure of academic professions, and in the
17 recruitment and retention of faculties;
18 (7) the creation of new institutions and programs
19 for examining and awarding credentials to individuals,
20 and the introduction of reforms in current institutional
21 practices related thereto;
22 (8) the development or revitalization of educational
23 and training programs of national importance; and
24 (9) the alteration or remodeling of buildings to the

1 extent necessary to achieve the objectives of any other
2 activity assisted under this section.
3 (b) The Secretary is similarly authorized to make
4 grants or contracts for the purpose of assisting in carrying
5 out studies in the field of postsecondary education, including
6 studies related to postsecondary education finance, organiza-
7 tion, and management.
8 FELLOWSHIPS
9 SEC. 6. The Secretary is authorized, where appropriate
10 and necessary to carry out the purposes of this Act, to
11 award fellowships and to pay to fellowship holders stipends
12 (including allowances for subsistence and other expenses
13 for themselves and their dependents) for stated periods of
14 time.
15 GENERAL AUTHORITY
16 SEC. 7. In carrying out this Act, the Secretary shall
17 have the authority—
18 (1) to enter into contracts without performance
19 or other bonds, and without regard to section 3709 of
20 the Revised Statutes (41 U.S.C. 5);
21 (2) to make advance, progress, and other pay-
22 ments without regard to the provisions of section 3648
23 of the Revised Statutes (31 U.S.C. 529);
24 (3) to receive money and other property donated,
25 bequeathed, or devised to the Foundation with or with-

1 out a condition or restriction, including a condition that
2 the Foundation use other funds for the purposes of the
3 gift; and to use, sell, or otherwise dispose of such prop-
4 erty for the purposes of this Act;
5 (4) to publish or arrange for the publication of
6 information without regard to the provisions of section
7 501 of title 44, United States Code;
8 (5) to accept and utilize the services of voluntary
9 and uncompensated personnel, notwithstanding the pro-
10 visions of section 3679 (b) of the Revised Statutes (31
11 U.S.C. 665 (b)), and to provide transportation and
12 subsistence as authorized by section 5703 of title 5,
13 United States Code, for persons serving without com-
14 pensation; and
15 (6) to arrange with and reimburse the heads of
16 other Federal agencies for the performance of any activ-
17 ity which the Foundation is authorized to conduct.

18 MISCELLANEOUS PROVISIONS

19 SEC. 8. (a) The Secretary may appoint and compensate
20 without regard to the provisions of title 5, United States
21 Code, governing appointments in the competitive service
22 and chapter 51 and subchapter III of chapter 53 of such
23 title, relating to classification and general schedule rates,
24 such technical and professional personnel as he deems neces-
25 sary to accomplish the functions of the Foundation.

1 (b) Funds available under this Act shall be available
2 for transfer to any other Federal department or agency
3 (including constituent agencies of the Department of Health,
4 Education, and Welfare) for use (in accordance with an
5 interagency agreement) by such agency (alone or in com-
6 bination with funds of that agency) for purposes for which
7 such transferred funds could be otherwise expended by the
8 Secretary under this Act, and the Secretary is likewise
9 authorized to accept and expend funds of any other Federal
10 agency for use under this Act.

11 (c) All laborers and mechanics employed by contractors
12 or subcontractors on all construction projects assisted under
13 this Act shall be paid wages at rates not less than those
14 prevailing on similar construction in the locality as deter-
15 mined by the Secretary of Labor in accordance with the
16 Davis-Bacon Act, as amended (40 U.S.C. 276a—276a-5).
17 The Secretary of Labor shall have with respect to the labor
18 standards specified in this section the authority and func-
19 tions set forth in Reorganization Plan Numbered 14 of
20 1950 (15 F.R. 3176; 50 U.S.C. 133z-15) and section 2
21 of the Act of June 13, 1934, as amended (40 U.S.C.
22 276(c)).

23 JOINT FUNDING

24 SEC. 9. Pursuant to regulations prescribed by the Presi-
25 dent, where funds are advanced by the Foundation and one

1 or more other Federal agencies (including any other part
2 of the Department of Health, Education, and Welfare) for
3 any activity assisted under this Act, any one Federal agency
4 may be designated to act for all in administering the funds
5 advanced. In such cases, any such agency may waive any
6 technical grant or contract requirement (as defined by such
7 regulations) which is inconsistent with the similar require-
8 ments of the administering agency or which the administer-
9 ing agency does not impose.

10 AMENDMENTS TO EXECUTIVE SCHEDULE

11 SEC. 10. (a) Section 5316 of title 5, United States Code,
12 relating to positions at level V of the Executive Schedule,
13 is amended by striking out "(41) Commissioner of Educa-
14 tion, Department of Health, Education, and Welfare." and
15 by inserting "(41) Director, National Foundation for Higher
16 Education, Department of Health, Education, and Welfare."
17 in lieu thereof.

18 (b) Section 5315 of such title, relating to positions at
19 level IV of the Executive Schedule, is amended by adding
20 the following paragraph at the end thereof:

21 "Commissioner of Education, Department of Health
22 Education, and Welfare".

23 AVAILABILITY OF APPROPRIATIONS

24 SEC. 11. Funds appropriated to carry out this Act shall
25 remain available until expended.

92D CONGRESS
1ST SESSION

S. 1072

IN THE SENATE OF THE UNITED STATES

MARCH 2 (legislative day, FEBRUARY 17), 1971

Mr. JAVITS introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To amend the Higher Education Facilities Act of 1963 in order to increase the maximum Federal share under such Act to 66 per centum in the case of certain developing institutions.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That section 401 (d) of the Higher Education Facilities Act
4 of 1963 is amended by inserting before the period at the end
5 thereof a comma and the following: "except that in either
6 such case such percentage may be not in excess of 66 per
7 centum if the institution is a developing institution as defined
8 in section 302 of the Higher Education Act of 1965".

II

92D CONGRESS
1ST SESSION

S. 1073

IN THE SENATE OF THE UNITED STATES

MARCH 2 (legislative day, FEBRUARY 17), 1971

Mr. JAVITS introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To consolidate and improve certain programs for higher education, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That this Act may be cited as the "Improvement of Educa-
4 tion Programs Act".

5 TITLE I—CONSOLIDATION OF SPECIAL HIGHER
6 EDUCATION PROGRAMS

7 CONSOLIDATION OF TITLES VIII, IX, AND XI OF THE HIGHER
8 EDUCATION ACT OF 1965, TITLE VI OF THE NATIONAL
9 DEFENSE EDUCATION ACT OF 1958, AND THE INTER-
10 NATIONAL EDUCATION ACT

11 SEC. 2. Title VIII of the Higher Education Act of
12 1965 is amended to read as follows:

II—O

1 "TITLE VIII—SPECIAL EDUCATIONAL IMPROVE-
2 MENT PROGRAMS

3 "APPROPRIATIONS AUTHORIZED

4 "SEC. 801. (a) The Commissioner is authorized to make
5 grants to institutions of higher education, or combinations of
6 such institutions, for the uses and purposes set forth in section
7 803 of this title.

8 "(b) For the purpose of making grants under this title,
9 there is authorized to be appropriated $86,500,000 for the
10 fiscal year ending June 30, 1972, and such sums as may be
11 necessary for each of the four succeeding fiscal years.

12 "ALLOCATION

13 "SEC. 802. The Commissioner shall allocate grants, fel-
14 lowships, and other assistance authorized by this title in
15 such manner and according to such plan as will most nearly
16 provide an equitable distribution of the grants, fellowships,
17 and other assistance throughout the States while at the same
18 time giving a preference to those institutions of higher edu-
19 cation which show real promise of being able to use funds
20 effectively.

21 "USES OF FEDERAL FUNDS

22 "SEC. 803. (a) It is the purpose of this title to combine
23 within a single authorization, subject to the modifications
24 required by the provisions and requirements of this title, the
25 programs formerly authorized by titles VIII, IX, and XI of

1 the Higher Education Act of 1965, by title VI of the Na-
2 tional Defense Education Act of 1958, and by the Interna-
3 tional Education Act and, except as expressly provided
4 otherwise by this title, Federal funds may be used for the
5 purchase of the same kinds of equipment and materials and
6 the funding of the same types of programs as were previously
7 authorized by such titles and that Act.
8 "(b) Grants under this title may be used, in accordance
9 with the provisions of this title, for—
10 "(1) programs designed to encourage institutions of
11 higher education to share their technical and other educa-
12 tional and administrative facilities and resources includ-
13 ing (A) the planning, development, and joint operation
14 by institutions of higher education of closed-circuit tele-
15 vision, electronic computer networks, or equivalent trans-
16 mission facilities, and (B) cooperative arrangements for
17 shared classrooms, laboratories, library resources, and
18 other similar facilities or resources;
19 "(2) programs for the preparation of graduate or
20 professional students to enter or pursue a career in public
21 service, including awarding fellowships to such students,
22 and programs of research into improved methods of edu-
23 cation for the public service in Federal, State, and local
24 governments;
25 "(3) programs for clinical experience conducted or

1 supervised by accredited law schools for students of law
2 and, to the extent practical, with preference being given
3 to experience in the preparation and trial of cases; and
4 "(4) programs for international studies conducted
5 at institutions of higher education located in the United
6 States, including the study of foreign languages.
7 "(c) In addition to the uses specified in subsections (a)
8 and (b), funds appropriated for carrying out this title may,
9 subject to the limitations specified in section 805, be used
10 for—
11 "(1) proper and efficient administration of the pro-
12 grams for which application is made; and
13 "(2) evaluation of plans, programs, and projects,
14 and dissemination of the results thereof.
15 "APPLICATIONS
16 "SEC. 804. (a) A grant may be made under this section
17 only upon application to the Commission at such time or
18 times and containing such information as he deems neces-
19 sary. The Commissioner shall not approve an application
20 unless it—
21 "(1) sets forth a program for carrying out one or
22 more of the purposes set forth in section 803;
23 "(2) sets forth policies and procedures which as-
24 sure that Federal funds made available under this sec-
25 tion for any fiscal year will be so used as to supplement

1 and, to the extent practical, increase the level of funds
2 that would, in the absence of such Federal funds, be
3 made available for purposes for which the application is
4 made, and in no case supplant such funds;
5 "(3) contains satisfactory assurances, in case of
6 any program described in paragraph (2) of section
7 803(b) that (A) the institution of higher education
8 will recommend to the Commissioner, for the award of
9 fellowships under this title, for study in such program,
10 only persons of superior promise who have demonstrated
11 to the satisfaction of the institution a serious intent to
12 enter the public service upon completing the program,
13 and (B) the institution will make reasonable continu-
14 ing efforts to encourage recipients of fellowships under
15 this title, enrolled in such programs, to enter the public
16 service upon completing the program;
17 "(4) provides for making such reports, in such form
18 and containing such information, as the Commissioner
19 may reasonably require to carry out his functions under
20 this title, and for keeping such records and for affording
21 such access thereto as the Commissioner may find neces-
22 sary to assure the correctness and verification of such
23 reports; and
24 "(5) provides for the adoption of effective pro-

1 cedure for the evaluation of the effectiveness of programs
2 assisted under this title.
3 "(b) In administering this title, the Commissioner shall
4 give primary emphasis to the assistance of programs and
5 activities not otherwise assisted by the Department of Health,
6 Education, and Welfare, or by other agencies of the Federal
7 Government, so as to promote most effectively the objectives
8 of this title.
9 "SPECIAL CONDITIONS AND LIMITATIONS
10 "SEC. 805. (a) (1) Grants pursuant to paragraph (1)
11 of section 803 (b) may not be used to pay the costs of
12 electronic transmission terminals.
13 "(2) In the case of a program for the establishment and
14 operation of a computer network under such paragraph (1),
15 grants may not include—
16 "(A) the cost of operating administrative ter-
17 minals or student terminals at participating institu-
18 tions; or
19 "(B) the cost, or any participating institution's
20 pro rata share of the cost, of using the central com-
21 puter facilities of the network, except (i) such costs
22 of systems development and programing of computers
23 and transmission costs as are necessary to make the
24 network operational, (ii) the administrative and pro-
25 gram support costs of the central facilities of the net-

1 work, and (iii) the line-access costs incurred by par-
2 ticipating institutions.
3 "(b) A person awarded a fellowship pursuant to a
4 program described in section 803 (b) shall continue to
5 receive the payments provided in this title only during such
6 periods as the Commissioner finds that he is maintaining
7 satisfactory proficiency and devoting full time to study or
8 research in the field in which such fellowship was awarded
9 in an institution of higher education, and is not engaging
10 in gainful employment other than employment approved by
11 the Commissioner by or pursuant to regulation.
12 "(c) No law school may receive more than $75,500
13 in any fiscal year under a program described in paragraph
14 (3) of section 803 (b).
15 "(d) No grant, contract, or fellowship shall be awarded
16 under this title to, or for study at, a school or department of
17 divinity. For the purposes of this section, the term 'school
18 or department of divinity' means an institution or depart-
19 ment or branch of an institution whose program is specifi-
20 cally for the education of students to prepare them to become
21 ministers of religion or to enter upon some other religious
22 vocation or to prepare them to teach theological subjects.
23 "(e) Department and agencies of the United States are
24 encouraged, to the extent consistent with efficient adminis-

1 tration, to enter into arrangements with institutions of
2 higher education for the full-time, part-time, or temporary
3 employment, whether in the competitive or excepted serv-
4 ice, of students enrolled in programs described in paragraph
5 (2) of section 803 (b).

6 "STIPENDS

7 "SEC. 806. (a) (1) The Commissioner shall pay to
8 persons awarded fellowships under this title such stipends
9 (including such allowances for subsistence and other ex-
10 penses for such persons and their dependents) as he may
11 determine to be consistent with prevailing practices under
12 comparable federally supported programs.

13 "(2) The Commissioner shall (in addition to the sti-
14 pends paid to persons under paragraph (1)) pay to the
15 institution of higher education at which such person is pur-
16 suing his course of study such amount as the Commissioner
17 may determine to be consistent with prevailing practices
18 under comparable federally supported programs.

19 "(b) The Commissioner, subject to such terms and con-
20 ditions as he may prescribe, is authorized to pay part of the
21 compensation of students employed in public service, other
22 than public service as an employee in any branch of the
23 Government of the United States, as part of a program for
24 which a grant has been set forth in paragraph (2) of section
25 803 (b).

220[illegible]

1 "DEFINITIONS

2 "SEC. 807. As used in this title—

3 "(1) The term 'institution of higher education' means
4 an educational institution described in the first sentence
5 of section 1201 (other than an institution of any agency
6 of the United States) which is accredited by a nationally
7 recognized accrediting agency or association approved by
8 the Commissioner for this purpose. For purposes of this
9 subsection, the Commissioner shall publish a list of nationally
10 recognized accrediting agencies or associations which he de-
11 termines to be reliable authority as to the quality of training
12 offered.

13 "(2) The term 'public service' means service as an
14 officer or employee in any branch of State, local, or Federal
15 Government.

16 "AUTHORITY FOR FREE OR REDUCED RATE COMMUNICA-
17 TIONS INTERCONNECTION SERVICES

18 "SEC. 808. Nothing in the Communications Act of
19 1934, as amended, or in any other provision of law shall
20 be construed to prevent United States communications com-
21 mon carriers from rendering, subject to such rules and
22 regulations as the Federal Communications Commission
23 may prescribe, free or reduced rate communications in-
24 terconnection services for interconnection systems within the

1 purview of this title, whether or not included in a project
2 for which a grant is made under this title."

3 REPEALS AND TRANSITIONAL PROVISIONS FOR
4 CONSOLIDATION

5 SEC. 3. (a) There is hereby authorized to be ap-
6 propriated to the Office of Education $_____ for the
7 period ending June 30, 1971, for planning and other pre-
8 paratory activities of the Commissioner for the consolidated
9 program enacted by section 101 of this Act.

10 (b) Effective July 1, 1971—

11 (1) titles IX and XI of the Higher Education Act
12 of 1965;

13 (2) title VI of the National Defense Education Act
14 of 1958; and

15 (3) the International Education Act
16 are repealed.

92D CONGRESS
1ST SESSION

S. 1074

IN THE SENATE OF THE UNITED STATES

MARCH 2 (legislative day, FEBRUARY 17), 1971

Mr. JAVITS introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To authorize assistance to the States in establishing and carrying out programs of higher education student aid.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That this Act may be cited as the "State Higher Education
4 Student Aid Act of 1971".
5 SEC. 2. The Higher Education Act of 1965 is amended
6 by redesignating title XII as title XIII, by redesignating
7 sections 1201, 1202, 1204, and 1205 and all references
8 thereto as sections 1301, 1302, 1303, and 1304, respec-
9 tively, and by inserting after title XI a new title as follows:

II

1 "TITLE XII—ASSISTANCE FOR STATE PROGRAMS
2 OF HIGHER EDUCATION STUDENT AID
3 "PART A—STUDENT INCENTIVE GRANTS
4 "APPROPRIATIONS AUTHORIZED
5 "SEC. 1201. There is hereby authorized to be appropri-
6 ated $50,000,000 for the fiscal year ending June 30, 1972,
7 and such amounts as the Congress may determine for each of
8 the next three fiscal years, for payments to the States for
9 student incentive grants to persons who have not previously
10 been awarded such grants under this part and who are
11 selected for award of such grants beginning with the fiscal
12 year ending June 30, 1972, and for each of the six succeeding
13 fiscal years such sums as are necessary for making payments
14 to persons who have been awarded such grants for previous
15 years. Sums appropriated pursuant to the first sentence of this
16 fiscal year remain available for payment to a State for the
17 award of grants pursuant to this title until the close of the
18 fiscal year succeeding the fiscal year for which they were
19 appropriated.
20 "ALLOTMENT OF FUNDS AMONG STATES
21 "SEC. 1202. (1) From the sums appropriated pursuant
22 to the first sentence of section 1201 for any fiscal year,
23 the Commissioner shall allot to each State an amount which
24 bears the same ratio to the amount so appropriated as the
25 number of persons enrolled on a full-time basis in institutions

1 of higher education in such State bears to the total number of
2 persons enrolled on a full-time basis in institutions of higher
3 education in all the States. The number of persons enrolled on
4 a full-time basis in institutions of higher education for pur-
5 poses of this section shall be determined by the Commissioner
6 for the most recent year for which satisfactory data are avail-
7 able to him.

8 "(2) If the total of the sums determined by the Com-
9 missioner to be required for any fiscal year for the student in-
10 centive grant program of a State is less than the amount of
11 the allotment to that State under paragraph (1) for that
12 year, the Commissioner may reallot the remaining amount
13 from time to time, on such date or dates as he may fix, to
14 other States in such manner as he determines will best assist
15 in achieving the purposes of this part.

16 "STATE STUDENT INCENTIVE GRANT PROGRAMS

17 "SEC. 1203. From a State's allotment under this part for
18 any fiscal year the Commissioner is authorized to make pay-
19 ments to such State for paying 50 per centum of the amount
20 of student incentive grants pursuant to a State program
21 which—

22 "(1) is administered by a single State agency;

23 "(2) provides that such grants will be in amounts
24 not in excess of $1,500 per academic year for attendance

on a full-time basis as an undergraduate at an institution of higher education;

"(3) provides for the selection of recipients of such grants on the basis of substantial financial need determined on the basis of criteria established by the Commissioner;

"(4) provides for the payment of the non-Federal portion of such grants from funds supplied by such State which represent an additional expenditure for such year by such State for grants for students attending institutions of higher education over the amount expended by such State for such grants during the fiscal year preceding the fiscal year in which such State initially received funds under this part; and

"(5) provides (A) for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid to the State agency under this part, and (B) for the making of such reports, in such form and containing such information, as may be reasonably necessary to enable the Commissioner to perform his functions under this part.

"APPLICATIONS FOR GRANTS

"SEC. 1204. A State which desires to obtain a payment under this part for any fiscal year shall submit an application

1 therefor through the State agency administering its program
2 of student incentive grants, at such time or times and in such
3 manner as may be prescribed by the Commissioner, and such
4 application shall contain such information as may be required
5 by or pursuant to regulation for the purpose of enabling the
6 Commissioner to make the determinations to be made by
7 him under this part.

8 "AMOUNT OF PAYMENT

9 "SEC. 1205. Upon his approval of any application for a
10 payment under this part, the Commissioner shall reserve from
11 the applicable allotment (including any applicable reallot-
12 ment) available therefor, the amount of such payment, which
13 (subject to the limits of such allotment or reallotment) shall
14 be equal to the Federal share of the cost of the student incen-
15 tive grants covered by such application. The Commissioner
16 shall pay such reserved amount, in advance or by way of re-
17 imbursement, and in such installments as he may determine.
18 The Commissioner's reservation of any amount under this
19 section may be amended by him, either upon approval of
20 an amendment of the application or upon revision of the
21 estimated cost of the student incentive grants with respect to
22 which such reservation was made, and in the event of an
23 upward revision of such estimated cost approved by him he
24 may reserve the Federal share of the added cost only from

1 the applicable allotment (or reallotment) available at the
2 time of such approval.

3 "ADMINISTRATION OF STATE PROGRAMS

4 "SEC. 1206. (a) The Commissioner shall not finally
5 disapprove any State program submitted under this part, or
6 any modification thereof, without first affording the State
7 agency submitting the program reasonable notice and oppor-
8 tunity for a hearing.

9 "(b) Whenever the Commissioner, after reasonable
10 notice and opportunity for hearing to the State agency ad-
11 ministering a State program approved under this part, finds—

12 "(1) that the State program has been so changed
13 that it no longer complies with the provisions of this
14 part, or

15 "(2) that in the administration of the program
16 there is a failure to comply substantially with any such
17 provision,

18 the Commissioner shall notify such State agency that the
19 State will not be regarded as eligible to participate in the
20 program under this part until he is satisfied that there is no
21 longer any such failure to comply.

22 "JUDICIAL REVIEW

23 "SEC. 1207. (a) If any State is dissatisfied with the
24 Commissioner's final action with respect to the approval of

1 its State program submitted under this part or with his final
2 action under section 1206, such State may appeal to the
3 United States court of appeals for the circuit in which such
4 State is located. The summons and notice of appeal may be
5 served at any place in the United States. The Commissioner
6 shall forthwith certify and file in the court the transcript
7 of the proceedings and the record on which he based his
8 action.

9 "(b) The findings of fact by the Commissioner, if sup-
10 ported by substantial evidence, shall be conclusive; but the
11 court, for good cause shown, may remand the case to the
12 Commissioner to take further evidence, and the Commis-
13 sioner may thereupon make new or modified findings of fact
14 and may modify his previous action, and shall certify to the
15 court the transcript and record of the further proceedings.
16 Such new or modified findings of fact shall likewise be con-
17 clusive if supported by substantial evidence.

18 "(c) The court shall have jurisdiction to affirm the
19 action of the Commissioner or to set it aside, in whole or in
20 part. The judgment of the court shall be subject to review by
21 the Supreme Court of the United States upon certiorari or
22 certification as provided in title 28, United States Code,
23 section 1254.

1 "PART B—EDUCATIONAL OPPORTUNITY CENTERS AND
2 COORDINATION OF RECRUITING AND COUNSELING
3 "AUTHORIZATION
4 "SEC. 1221. There are authorized to be appropriated
5 $20,000,000 for the fiscal year ending June 30, 1972, and
6 such sums as the Congress may determine for each of the
7 three succeeding fiscal years for carrying out the provisions
8 of this part.
9 "GRANTS AND CONTRACTS AUTHORIZED
10 "SEC. 1222. (a) The Commissioner is authorized to
11 make grants to or enter into contracts with institutions of
12 higher education, State agencies responsible for the super-
13 vision of public institutions of higher education in a State,
14 or combinations of such institutions and agencies, for the
15 purpose of paying not to exceed 75 per centum of the cost
16 of planning, developing, and carrying out projects for—
17 "(1) educational opportunity centers to serve areas
18 with major concentrations of low-income populations by
19 providing, in coordination with other applicable pro-
20 grams and services—
21 "(A) information with respect to financial and
22 academic assistance available for persons in such
23 areas desiring to attend institutions of higher educa-
24 tion;
25 "(B) assistance to such persons in applying

1 for admission to such institutions, including prepar-
2 ing necessary applications for use by admission and
3 financial aid officers; and
4 "(C) counseling services and tutorial and other
5 necessary assistance to such persons while attending
6 such institutions; and
7 "(2) recruiting and counseling pools to coordi-
8 nate resources and staff efforts of institutions of high-
9 er education in admitting educationally disadvantaged
10 persons.
11 "(b) The portion of the cost of any project pursuant
12 to this section borne by any institution of higher educa-
13 tion or State agency shall represent an increase in expend-
14 iture by such institution or agency for the purposes of such
15 project."

92D CONGRESS
1ST SESSION

S. 1123

IN THE SENATE OF THE UNITED STATES

MARCH 4 (legislative day, FEBRUARY 17), 1971

Mr. PROUTY (for himself, Mr. GRIFFIN, Mr. JAVITS, Mr. JORDAN of Idaho, and Mr. SCOTT) introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To extend and amend the Higher Education Act of 1965, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That this Act may be cited as the "Higher Education Op-
4 portunity Act of 1971".

5 TITLE I—AMENDMENTS TO TITLE I OF THE
6 HIGHER EDUCATION ACT (COMMUNITY
7 SERVICE AND CONTINUING EDUCATION)

8 EXTENSION OF PROGRAM

9 SEC. 101. Section 101 of title I of the Higher Educa-

232 465

1 tion Act of 1965 is amended by striking out "and" before
2 "$60,000,000" and by adding ", and such sums as may be
3 necessary for each of the next two fiscal years" immediately
4 following "June 30, 1971".

5 EFFECTIVE DATE

6 SEC. 102. The amendments made by section 101 shall
7 be effective July 1, 1971.

8 TITLE II—AMENDMENTS TO TITLE II OF HIGHER
9 EDUCATION ACT (COLLEGE LIBRARY AS-
10 SISTANCE)

11 EXTENSION OF PROGRAM

12 SEC. 201. (a) Section 201 of the Higher Education
13 Act of 1965 is amended by striking out "and" before
14 "$90,000,000" and inserting the following after "June 30,
15 1971,": "and such sums as may be necessary for each of
16 the next two fiscal years,".

17 (b) Such section is further amended by inserting the
18 following after "institutions of higher education": "(par-
19 ticularly developing institutions as defined in title III and
20 community colleges)".

21 INCREASE IN PERCENTAGE OF FUNDS TO BE USED FOR
22 SPECIAL PURPOSE AND SUPPLEMENTAL GRANTS

23 SEC. 202. (a) Section 202 of such Act is amended—

24 (1) by striking out "75 per centum" and inserting
25 in lieu thereof "50 per centum"; and

1 (2) by adding "and" after the semicolon at the end
2 of paragraph (b); by striking out paragraphs (c) and
3 (d); and by inserting in lieu thereof the following:
4 "(c) meets the requirements of section 811.".
5 (b) Section 203 of such Act is amended by striking out
6 "75 per centum" and inserting in lieu thereof "50 per
7 centum".
8 (c) Section 204 (a) of such Act is amended—
9 (1) by striking out "Twenty-five per centum" in
10 paragraph (1) and inserting in lieu thereof "Fifty per
11 centum"; and
12 (2) by striking out "sixty per centum" in para-
13 graph (2) and inserting in lieu thereof "eighty per
14 centum".
15 REPEAL OF RESEARCH PROVISION
16 SEC. 203. Title II of the Higher Education Act of 1965
17 is amended by striking out section 224.
18 EXTENSION OF TRAINING PROVISION AND TRANSFER TO
19 EDUCATION PROFESSIONS DEVELOPMENT ACT
20 SEC. 204. (a) Such title II is further amended by—
21 (1) striking out the heading "PART B—LIBRARY
22 TRAINING AND RESEARCH" and inserting in lieu thereof
23 "PART G—LIBRARY TRAINING";
24 (2) striking out section 225;
25 (3) transferring sections 221 through 223, with the

1 headings therefor as so amended, to title V of such Act
2 and inserting such sections with such headings immedi-
3 ately after part F of such title; and
4 (4) redesignating sections 221 through 223, as so
5 transferred, as sections 561 through 563, respectively.
6 (b) Section 561, as so redesignated, is amended by
7 striking out "and" before "$38,000,000" and inserting "and
8 such sums as may be necessary for each of the next five fiscal
9 years" immediately after "June 30, 1971,".

10 REPEAL OF LIBRARY OF CONGRESS PROVISION

11 SEC. 205. Title II of such Act is further amended by
12 striking out part C thereof.

13 CHANGE OF HEADINGS

14 SEC. 206. The heading of title II of such Act is amended
15 to read "ACADEMIC LIBRARY ASSISTANCE" and
16 the heading "PART A—COLLEGE LIBRARY RESOURCES"
17 is repealed.

18 EFFECTIVE DATE

19 SEC. 207. The amendments made by this title shall be
20 effective with respect to fiscal years beginning after June
21 30, 1971.

1 TITLE III—AMENDMENTS TO TITLE III OF
2 HIGHER EDUCATION ACT (STRENGTHEN-
3 ING DEVELOPING INSTITUTIONS)

4 EXTENSION OF PROGRAM

5 SEC. 301. Section 301 (b) of the Higher Education
6 Act of 1965 is amended by striking out "and" before "the
7 sum of $91,000,000" and inserting the following immedi-
8 ately after "June 30, 1971,": "and such sums as may be
9 necessary for each of the next five fiscal years,".

10 MISCELLANEOUS AMENDMENTS

11 SEC. 302. (a) Title III of such Act is further amended
12 (A) by inserting "and" at the end of paragraph (1) of
13 section 304 (b); (B) by striking out paragraphs (3) and
14 (4) of such section; and (C) by amending paragraph (2)
15 thereof to read as follows:

16 "(2) meets the requirements of section 811.".

17 (b) Such title is further amended (A) by inserting
18 "if it is an institution which provides an educational pro-
19 gram for which it awards a bachelor's degree" immediately
20 before the semicolon in sections 302 (d) and (B) by
21 striking out "(other than developing institutions)" in sec-
22 tion 306.

EFFECTIVE DATE

SEC. 303. The amendments made by this title shall be effective with respect to fiscal years beginning after June 30, 1971.

TITLE IV—AMENDMENTS TO TITLE IV OF HIGHER EDUCATION ACT (STUDENT ASSISTANCE)

PART A—NEW PROGRAMS FOR PROVISION OF FINANCIAL ASSISTANCE TO STUDENTS

SEC. 401. Title IV of the Higher Education Act of 1965 is amended in the following respects—

(a) part C (dealing with work-study programs) is repealed;

(b) part B (dealing with student loan insurance) is redesignated as part C;

(c) parts E (containing general provisions) and F (containing amendments to the National Defense Education Act) are redesignated as parts F and G, respectively;

(d) section 463 (dealing with payments for administrative expenses) is repealed and sections 461, 462, 464, and 469 are redesignated as sections 471, 472, 473, and 474, respectively;

(e) section 473, as so redesignated (dealing with maintenance of effort), is amended (A) by striking out "part A or part C" and inserting in lieu thereof "part

1 B", and (B) by striking out "under such parts" and
2 inserting in lieu thereof "under such part"; and
3 (f) part A (dealing with educational opportunity
4 grants) is amended to read as follows:
5 "PART A—GENERAL PROVISIONS FOR STUDENT ASSIST-
6 ANCE FINDINGS AND STATEMENT OF PURPOSE
7 "SEC. 400. The Congress hereby finds that it is in the
8 national interest to assist in making available the benefits of
9 postsecondary education to all qualified students who for lack
10 of financial means of their own or of their families would be
11 unable to obtain those benefits without such assistance. It
12 is therefore the purpose of this title to provide assistance
13 to students, in the form of grants, loans, and compensation,
14 to the end that no person capable of benefiting from such
15 education will be denied it because of financial inability to
16 meet basic postsecondary education costs.
17 "GRANTS, WORK-STUDY PAYMENTS, AND SUBSIDIZED
18 LOANS
19 "SEC. 401. (a) It is the purpose of this part to pro-
20 vide for the establishment of general criteria to be used by
21 eligible institutions in providing the following categories of
22 assistance:
23 "(1) educational opportunity grants;
24 "(2) work-study payments; and
25 "(3) subsidized loans under part C of this title.

1 "(b) The objective of such criteria shall be to assure
2 that the forms of assistance specified in subsection (a) will
3 be made available to all qualified students in financial need
4 attending eligible institutions and shall be designed to pro-
5 vide a reliable basis for enabling students and potential
6 students of such institutions to ascertain their eligibility for
7 financial assistance.

8 "BASIC ELIGIBILITY FOR, AND AMOUNT OF, GRANTS, WORK-
9 STUDY PAYMENTS, AND RESOURCE EQUALIZING LOANS

10 "SEC. 402. (a) (1) The Secretary shall, after consulta-
11 tion with the Advisory Council on Financial Aid to Stu-
12 dents established under section 474, promulgate a schedule
13 for each academic year establishing (A) the maximum ex-
14 pected family contribution below which students will be
15 eligible for educational opportunity grants or work-study
16 payments (hereinafter in this part referred to as the 'grant
17 eligibility limit'), and (B) the maximum expected family
18 contribution below which students will be eligible for sub-
19 sidized loans under part C (hereinafter in this part referred
20 to as the 'loan eligibility limit').

21 "(2) A student with an expected family contribution,
22 as determined under subsection (d), for an academic year
23 which is less than the grant eligibility limit for such year
24 shall be eligible for a grant (or work-study payments) in ac-
25 cordance with part B and for a loan upon which an interest

1 subsidy is payable in accordance with section 428 (a) (2)
2 (hereinafter referred to as a 'subsidized loan'), and a student
3 with an expected family contribution which is less than the
4 loan eligibility limit for an academic year but equal to or
5 more than the grant eligibility limit shall be eligible for a
6 subsidized loan.

7 "(b) (1) A student meeting the requirements of sec-
8 tion 405 and of part B shall be eligible for a grant (or the
9 Federal share of work-study payments) for an academic
10 year in an amount equal to (A) the grant eligibility limit,
11 as determined by the Secretary for that year, less (B) his
12 expected family contribution for such year, as determined
13 by the eligible institution proposing to make such a grant
14 (or such work-study payments).

15 "(2) A student meeting such requirements shall be
16 eligible for a subsidized loan for such year in an amount
17 equal to (A) the loan eligibility limit as determined by the
18 Secretary for such year, less (B) the sum of (i) the stu-
19 dent's expected family contribution for such year, and (ii)
20 the amount of any grant or other payment under part B
21 which he receives for such year.

22 "(c) A student shall be eligible for an insured student
23 loan under part C in addition to any grant, work-study pay-
24 ment, or subsidized loan described in this part.

1 "(d) (1) For the purposes of this part, a student's
2 expected family contribution means an amount which a
3 family is reasonably able to contribute toward the cost of
4 a student's postsecondary education for an academic year,
5 as determined pursuant to criteria prescribed by the Sec-
6 retary after consultation with the Advisory Council on Finan-
7 cial Aid to Students. Such criteria shall provide for the
8 determination of family contributions in a manner which
9 takes into account varying family incomes, numbers of de-
10 pendents, number of dependents receiving postsecondary
11 education during the academic year for which the determina-
12 tion is made, family assets, and other pertinent factors. Such
13 criteria shall also provide for determining the eligibility
14 for assistance under this part of students who are self-sup-
15 porting and in doing so shall, insofar as appropriate, take
16 into account the factors described in the preceding sentence.
17 "(2) The determination of an individual student's fam-
18 ily income and other factors described in paragraph (1)
19 shall be made, pursuant to regulations prescribed by the
20 Secretary, by the eligible institution to which he has made
21 an application for assistance under this title and in which
22 he is enrolled or to which he has been admitted.
23 "(e) Notwithstanding any other provision of this sec-
24 tion, the Secretary may by regulation establish criteria for
25 the provision of financial assistance by eligible institutions

1 in amounts greater than would otherwise be the case under
2 subsection (b), where institutions determine that special
3 circumstances pertaining to a student of exceptional financial
4 need would render inequitable the limits imposed by such
5 subsection.

6 "ALLOCATION OF FUNDS TO ELIGIBLE INSTITUTIONS

7 "SEC. 403. (a) The Commissioner shall, from time to
8 time, set dates by which eligible institutions must file appli-
9 cations for allocations to such institutions of funds appropri-
10 ated for carrying out section 402. In the case of any such
11 institution, such allocation shall reflect an estimate of the
12 aggregate amount which would be payable to such institu-
13 tion for the academic year for which such allocation is to be
14 made with respect to educational opportunity grants, work-
15 study payments, and subsidies on loans to be made by such
16 institution and for which students enrolled or accepted for
17 enrollment in such institution are estimated to be eligible for
18 such year.

19 "(b) If, as determined by the Commissioner on the
20 basis of estimates, the total amount of such allocations for
21 any academic year to be made pursuant to this section would
22 exceed the amount available for such allocations for such
23 year, the Commissioner shall reduce such allocations in a
24 manner most likely to achieve an equitable geographical
25 distribution of such allocations and to preserve to the fullest

1 possible extent payments to students with the lowest ex-
2 pected family contributions.
3 "ELIGIBILITY OF STUDENTS FOR COST OF EDUCATION
4 LOANS AND ALLOCATION OF LOAN VOLUME TO INSTI-
5 TUTIONS
6 "SEC. 404. (a) Any student who—
7 "(1) meets the requirements of section 405;
8 "(2) has an expected family contribution of less
9 than the loan eligibility limit, as determined under sec-
10 tion 402; and
11 "(3) needs financial assistance, in addition to such
12 assistance as he may be eligible for under section 402,
13 in order to meet the reasonable and necessary expenses
14 (as determined pursuant to section 407) of attendance
15 for an academic year at an eligible institution;
16 is eligible for a subsidized loan from such institution in an
17 amount for such year (A) not exceeding the reasonable and
18 necessary expenses for such year (not covered by any assist-
19 ance for which he is eligible under section 402) which are to
20 be incurred by him in consequence of his attendance at the
21 eligible institution, as determined by such institution in ac-
22 cordance with regulations of the Commissioner, and (B) not
23 exceeding $1,500 in addition to such assistance as he may be
24 eligible for under section 402.
25 "(b) The Commissioner shall, from time to time, set

1 dates by which eligible institutions must file applications for
2 allocations to such institutions of an aggregate dollar amount
3 of loans to be made by such institutions to students eligible
4 for subsidized loans under this section. In the case of any
5 such institution, such allocation shall be made on the basis of
6 the Commissioner's estimate of the aggregate dollar amount of
7 subsidized loans for which students enrolled or accepted for
8 enrollment in such institution are eligible under this section,
9 reduced ratably to reflect the amounts available for paying
10 subsidies on such loans.

11 "RECIPIENTS OF STUDENT FINANCIAL ASSISTANCE

12 "SEC. 405. (a) An individual may receive assistance
13 in the form of grants, work-study payments, or subsidized
14 loans under this title only if he has been accepted for en-
15 rollment as a full-time undergraduate or vocational student
16 at an eligible institution or, in the case of a student already
17 attending such institution, is in good standing and in full-
18 time attendance there as an undergraduate or vocational
19 student.

20 "(b) Such a student shall receive such assistance only if
21 such institution determines that—

22 "(1) he shows capability of maintaining good
23 standing in his course of study;

24 "(2) he meets the criteria for eligibility under
25 which such assistance is to be made available; and

1 "(3) he would not, but for such assistance, be
2 financially able to pursue a course of study at such
3 institution.

4 "SUBSTITUTION OF NATIONAL DEFENSE EDUCATION ACT
5 LOANS

6 "SEC. 406. A loan under title II of the National Defense
7 Education Act of 1958 may be provided by an eligible in-
8 stitution in lieu of a subsidized loan to which a student is
9 eligible under this part.

10 "LIMITATION

11 "SEC. 407. The total of any grant, work-study pay-
12 ment, or subsidized loan which a student shall receive for an
13 academic year shall not exceed the reasonable and necessary
14 expenses for such year incurred or to be incurred by him in
15 consequence of his attendance at an eligible institution, as de-
16 termined by such institution in accordance with regulations of
17 the Secretary.

18 "ELIGIBLE INSTITUTION

19 "SEC. 408. As used in this part and part B, the term
20 "eligible institution" means—

21 "(a) an institution of higher education as defined in
22 section 435 (b);

23 "(b) a proprietary institution of higher education
24 as defined in section 471 (b); or

25 "(c) a vocational school as defined in section 435

1 (c) which is (A) a public school or institution in any
2 State (other than a school or institution of any agency of
3 the United States), or (B) a nonprofit school or institu-
4 tion in any State.

5 "ELIGIBILITY FOR ASSISTANCE OF STUDENTS ENROLLED IN
6 INSTITUTIONS ON DATE NEW PROGRAMS BECOME
7 EFFECTIVE

8 "SEC. 409. Notwithstanding any other provision of this
9 title, a student who, on the date of enactment of the Higher
10 Education Opportunity Act of 1971, is receiving, or (if such
11 date of enactment is not during any academic year with re-
12 spect to such student) who, during the academic year ending
13 prior to such date, received, assistance under part A or C
14 of title IV of this Act or title II of the National Defense
15 Education Act of 1958 (as in effect prior to such date of
16 enactment) shall be eligible for grant, work-study, or sub-
17 sidized loan assistance pursuant to this title on a basis at
18 least equivalent to the basis upon which he would have
19 received assistance under such parts and such title II had
20 such Higher Education Opportunity Act not been enacted,
21 as determined under regulations prescribed by the Commis-
22 sioner for carrying out the purpose of this section.

23 "SEC. 410. There are authorized to be appropriated such
24 sums as may be necessary for the fiscal year ending June 30,
25 1972, and for each of the next four fiscal years to enable

1 the Commissioner to make payments on account of the eli-
2 gibility of students for assistance (A) under section 402 and
3 (B) under section 404. Thereafter, there are authorized to
4 be appropriated such sums as may be necessary to enable
5 the Commissioner to make payments with respect to sub-
6 sidized loans made to students prior to July 1, 1976, on
7 account of their eligibility therefor under such sections. Sums
8 appropriated under this section shall remain available until
9 expended."

10 CONFORMING AMENDMENT

11 SEC. 402. Clause (2) of section 421(b) is amended
12 by inserting "(except with respect to loans made to students
13 eligible therefor under sections 402 and 404)" immediately
14 after "student loans".

15 SEC. 403. The following is inserted as part B of such
16 title IV:

17 "PART B—EDUCATIONAL OPPORTUNITY GRANTS AND
18 WORK-STUDY PAYMENTS

19 "EDUCATIONAL OPPORTUNITY GRANTS

20 "SEC. 411. (a) An eligible institution, in accordance
21 with its agreement under this part, may award educational
22 opportunity grants to undergraduate or vocational students
23 under which the institution will pay to any such student the
24 amount which such student is eligible to receive for the aca-
25 demic year for which such grant is made. The Commissioner

1 may by regulation prescribe that a portion of the assistance
2 which an eligible institution would otherwise make available
3 in the form of work-study payments under section 412 be
4 made available in the form of educational opportunity grants
5 under this section. Subject to such regulations, eligible in-
6 stitutions may, at their election, make available educational
7 opportunity grants under this section in whole or in part
8 in lieu of work-study payments under section 412.

9 "(b) Educational opportunity grants may be awarded
10 under this part only for the period required for the comple-
11 tion by the recipient of his undergraduate or vocational
12 course of study. Except as otherwise provided in this subsec-
13 tion, such period shall not exceed four academic years. With
14 respect to a student at an institution of higher education (1)
15 who is pursuing a course of study leading to a first degree
16 and designed by the institution offering it to extend over
17 five academic years, or (2) who is or will be unable to
18 complete a course of study within the maximum period of
19 years specified in the preceding sentence because of a re-
20 quirement that the student enroll in a noncredit remedial
21 course of study, such period may be extended for not more
22 than one additional academic year. For purposes of the
23 preceding sentence, a 'noncredit remedial course of study'
24 is a course of study for which no credit is given toward an
25 academic degree, and which is designed to increase the

1 ability of the student to engage in an undergraduate course
2 of study leading to such a degree.
3 "(c) Payments pursuant to an educational opportunity
4 grant awarded under this part may be made only so long
5 as the recipient (1) is maintaining satisfactory progress
6 in the course of study which he is pursuing, according to
7 the regularly prescribed standards and practices of the
8 institution from which he receives such grant, and (2) is
9 devoting essentially full time to that course of study, during
10 the academic year, in attendance at that institution. Failure
11 to be in attendance at the institution during vacation periods
12 or periods of military service, or during other periods which
13 the Commissioner determines in accordance with regulations
14 that there is good cause for his nonattendance (during which
15 periods he shall receive no payments), shall not be deemed
16 contrary to clause (2) of the preceding sentence.
17 "WORK-STUDY PROGRAMS
18 "SEC. 412. (a) An eligible institution, in accordance
19 with its agreement under this part, may pay for the part-
20 time employment of its undergraduate or vocational stu-
21 dents, through programs of work-study, in work for the in-
22 stitution itself (except in the case of a proprietary institution
23 of higher education) or work in the public interest for a
24 public or nonprofit private organization under an arrange-

1 ment between such institution and such organization, but
2 only if such work—
3 "(1) will not result in the displacement of employed
4 workers or impair existing contracts for services,
5 "(2) will be governed by such conditions of em-
6 ployment as will be appropriate and reasonable in light
7 of such factors as type of work performed, geographical
8 region, and proficiency of the employee, and
9 "(3) does not involve the construction, operation,
10 or maintenance of so much of any facility as is used or is
11 to be used for sectarian instruction or as a place for
12 religious worship.
13 "(b) (1) No student shall be employed under such pro-
14 grams of work-study for an average of more than fifteen hours
15 per week during a semester, or other term used by the institu-
16 tion in awarding credits, during which classes in which the
17 student is enrolled are in session.
18 "(2) For purposes of computing the average prescribed
19 by the preceding paragraph, there shall be excluded any
20 period during which the student is on vacation or any period
21 of additional or nonregular enrollment. Employment under a
22 work-study program during any such period of additional or
23 nonregular enrollment in which classes in which the student
24 is enrolled are in session shall be only to the extent and in

1 accordance with criteria established by or pursuant to regula-
2 tions of the Commissioner.
3 "WORK-STUDY BENEFITS IN LIEU OF GRANT ASSISTANCE
4 "SEC. 413. (a) The Commissioner may by regulation
5 prescribe that a portion of the assistance which an eligible in-
6 stitution would otherwise make available in the form of edu-
7 cational opportunity grants under section 411 be made avail-
8 able in the form of work-study payments pursuant to section
9 412. Subject to such regulations, eligible institutions may, at
10 their election, make available work-study payments under
11 section 412 in whole or in part in lieu of educational opportu-
12 nity grants.
13 "(b) Work-study payments shall not be made in lieu of
14 educational opportunity grants by an institution under this
15 section unless—
16 "(1) such work-study payments are made on a
17 basis which provides net earnings to the student from
18 the Federal share of such payments for the academic
19 year involved equal to the amount of the grant which
20 he would have received for such year had such election
21 not been made;
22 "(2) the criteria for making such elections are ap-
23 plied uniformly by such institution and are determined
24 by the Commissioner to be consistent with such stand-
25 ards as he may prescribe under subsection (a).

1 "(c) A student to whom work-study payments are
2 made available under this section in lieu of grant assistance
3 may elect instead to receive a subsidized loan under part C,
4 or a loan under title II of the National Defense Education
5 Act of 1958, in the amount of the Federal share of such
6 work-study payments. In the event of such election, the
7 amount allocated to such institution under section 403 shall
8 be adjusted in accordance with regulations of the Commis-
9 sioner.

10 "AGREEMENTS WITH INSTITUTIONS

11 "SEC. 414. (a) As a condition for receiving funds for
12 educational opportunity grants and work-study payments
13 under this part, an eligible institution shall enter into an
14 agreement with the Commissioner, which agreement shall—

15 "(1) provide that the funds received by the institu-
16 tion under this part shall be used by it in accordance
17 with the provisions of this part and part A;

18 "(2) provide that the institution shall conduct a pro-
19 gram of educational opportunity grants in accordance
20 with section 411;

21 "(3) provide for the operation by the institution of
22 a program of work-study in accordance with the provi-
23 sions of sections 412 and 413, and provide that the
24 Federal share of the compensation of students employed
25 in the work-study program in accordance with the agree-

1 ment will not, except as provided in subsection (b), ex-
2 ceed 80 per centum of such compensation;
3 "(4) include procedures satisfactory to the Commis-
4 sioner designed to assure that each student of the in-
5 stitution eligible for a subsidized loan (or loan under
6 title II of the National Defense Education Act of 1958)
7 in accordance with section 402 will be enabled to obtain
8 such loan in the amount for which he is eligible, in-
9 cluding provision for loans by the institution to students
10 who, because they or their families do not maintain
11 business relationships with eligible lenders or because
12 of their status as initial year undergraduates or for any
13 other reason, are unable to obtain such loans readily from
14 other eligible lenders;
15 "(5) include, in the case of a proprietary institu-
16 tion of higher education, such terms and conditions as
17 the Commissioner determines to be necessary to insure
18 that the availability of assistance under this part to stu-
19 dents at such institution has not increased, and will not
20 increase, the tuition, fees, or other charges to such stu-
21 dents; and
22 "(6) include such other provisions as the Commis-
23 sioner deems necessary or appropriate to carry out the
24 purposes of this part.

1 "(b) The Federal share of work-study payments may
2 exceed 80 per centum of the compensation of students em-
3 ployed in the work-study program if the Commissioner deter-
4 mines, pursuant to regulations establishing objective criteria
5 for such determinations, that a Federal share in excess of 80
6 per centum is required in furtherance of the purposes of this
7 part. In addition to other circumstances under which the
8 Commissioner may determine that a Federal share in excess
9 of 80 per centum is required in furtherance of the purposes
10 of this part, he may do so where (1) payment of the non-
11 Federal share would result in a student receiving funds in
12 excess of the limitation imposed by section 407, or (2)
13 students are employed in (A) the work-study program of
14 an eligible institution not less than 50 per centum of whose
15 students are from low-income families, (B) the counseling
16 or tutoring of the educationally disadvantaged, or (C) any
17 project of community service with respect to which a limita-
18 tion of the Federal share to 80 per centum would impose
19 unusual hardship on the eligible institution or the public or
20 nonprofit private organization for which such project is
21 performed.

22 "EXPENSES OF ADMINISTRATION

23 "SEC. 415. (a) An institution which has entered into
24 an agreement with the Commissioner under this part shall be
25 entitled, for each academic year for which it receives an

1 allocation under section 403, to a payment in lieu of reim-
2 bursement for its expenses during such academic year in
3 administering programs assisted under this part. The pay-
4 ment for an academic year (1) shall be payable from such
5 allocation in accordance with regulations of the Commissioner
6 and (2) shall be an amount equal to 3 per centum of the
7 aggregate amount of work-study payments and payments
8 under educational opportunity grants made by such institu-
9 tion during such year under this part, but not to exceed
10 $125,000.

11 "(b) An agreement under this part may also include
12 provisions authorizing the institution, to the extent and under
13 terms and conditions prescribed by the Commissioner by or
14 pursuant to regulation, to use, out of the sums allocated to
15 it for the purposes of this part, a portion for its administra-
16 tive expenses (which for this purpose may, among other
17 expenses, include expenses of counseling and guidance, place-
18 ment, and consulting services) in developing or carrying
19 out a program, described in such agreement, to demonstrate
20 or explore the feasibility or value of methods of cooperative
21 education involving alternative periods of full-time academic
22 study at the institution and periods of full-time public or
23 private employment (whether or not afforded by an orga-
24 nization described in section 411 (a)) approved or arranged
25 for by the institution under such program."

1 EFFECTIVE DATE

2 SEC. 404. The amendments made by sections 401, 402,
3 and 403 shall be effective with respect to fiscal years be-
4 ginning after June 30, 1971.

5 PART B—AMENDMENTS TO STUDENT LOAN INSURANCE
6 PROGRAM

7 INTEREST TERMS TO BORROWERS ELIGIBLE FOR SUBSIDIZED
8 LOANS; SECRETARY TO ESTABLISH MAXIMUM INTEREST
9 RATES; POSITION OF ELIGIBLE LENDER STRENGTHENED;
10 NEGOTIABILITY OF STUDENT OBLIGATIONS

11 SEC. 405. (a) (1) Subsection (a) of section 428 of
12 the Higher Education Act of 1965 is amended to read as
13 follows:

14 "SEC. 428. (a) (1) Each student who has received a
15 loan, after June 30, 1971, which—

16 "(A) is insured by the Commissioner under this
17 part,

18 "(B) is made under a State student loan program
19 meeting criteria prescribed by the Commissioner under
20 this part, or

21 "(C) is insured under a program of a State or of
22 a nonprofit private institution or organization that has
23 entered into an agreement with the Commissioner under
24 subsection (b) or (c) of this section,

25 and with respect to which loan an interest subsidy is payable

1 pursuant to part A shall be entitled to have paid on his
2 behalf and for his account to the holder of the loan (except
3 where such holder is the Secretary), at such times and ac-
4 cording to such terms and conditions as the Commissioner
5 may prescribe, a portion of the interest on his loan deter-
6 mined under paragraph (2).
7 "(2) The portion of the interest on a loan which a stu-
8 dent borrower is entitled to have paid on his behalf and for
9 his account to the holder of the loan pursuant to paragraph
10 (1) shall be an amount equal to—
11 "(A) the total amount of the interest on the un-
12 paid principal amount of the loan which accrues prior to
13 the beginning of the repayment period of the loan, or
14 which accrues during a period in which no part of such
15 principal need be paid (whether or not such principal is
16 in fact paid) by reason of a provision described in sec-
17 tion 428(b)(1)(L) or in section 427(a)(2)(C);
18 and
19 "(B) the difference between the per annum rate of
20 interest on the unpaid balance of such loan and three
21 per centum per annum of such unpaid balance during the
22 period (other than any portion of such period in which
23 the total amount of the interest on the unpaid prin-
24 cipal amount is payable by the Commissioner pursuant
25 to clause (A)) beginning with the date upon which the

1 repayment period commences and ending ten years after
2 such date, or at the conclusion of the repayment period,
3 whichever is earlier.
4 "(3) Each holder of a loan insured or insurable by the
5 Commissioner under section 427, or with respect to which
6 payments of interest are required to be made by the Com-
7 missioner, shall submit to the Commissioner, at such times
8 and in such manner as he may prescribe, statements contain-
9 ing such information as may be required by or pursuant to
10 regulation for the purpose of enabling the Commissioner to
11 determine the amount of the payment which he must make
12 with respect to that loan. The holder of a loan with respect
13 to which payments are required to be made under this sub-
14 section shall be deemed to have a contractual right, as
15 against the United States, to receive from the Commissioner
16 the portion of interest determined under paragraph (2).
17 "(4) No payment may be made under this section with
18 respect to the interest on a loan made from a student fund
19 established under title II of the National Defense Education
20 Act of 1958."
21 (2) Paragraph (1) of subsection (c) of such section
22 is amended to read as follows:
23 "(1) The Commissioner may enter into a guaranty
24 agreement with any State or any nonprofit private institution
25 or organization having a loan insurance program meeting the

60-433 O - 71 - pt. 1 -- 17

1 requirements of subsection (b), whereby the Commissioner
2 shall undertake to reimburse it, under such terms and condi-
3 tions as he may establish, in an amount equal to 80 per
4 centum of the amount expended by it in discharge of its
5 insurance obligation, incurred under such loan insurance
6 program, with respect to losses (resulting from default of the
7 student borrower) on the unpaid balance of the principal
8 (other than interest added to principal) of any insured loan."
9 (b) Section 437 is amended to read as follows:
10 "SEC. 437. If a student borrower who has received a
11 loan described in clause (A), (B), or (C) of section 428
12 (a) (1) (whether or not an interest subsidy is payable pur-
13 suant to part A of this title) dies or becomes permanently
14 and totally disabled (as determined in accordance with regu-
15 lations of the Commissioner), then the Commissioner shall
16 discharge the borrower's liability on the loan by repaying
17 the amount owed on the loan (except where such amount is
18 owed to the Secretary)."
19 (c) (1) Subsection (b) of section 427 is amended to
20 read:
21 "(b) For the purposes of clause (2) (D) of subsection
22 (a), and clause (1) (E) of section 428 (b), the Secretary,
23 after consultation with the Secretary of the Treasury and the
24 National Student Loan Association, shall prescribe maximum
25 rates of interest to facilitate the operation of this part which

1 shall be not less than a per annum rate equal to the average
2 annual interest rate on all interest-bearing obligations of the
3 United States forming a part of the public debt as computed
4 at the end of the fiscal year preceding the fiscal year for
5 which such rates are prescribed."

6 (2) Clause (2) (D) of section 427 (a) is amended by
7 striking out "and defined by the Secretary (within the limits
8 set forth in subsection (b)) on a national, regional, or other
9 appropriate basis" and inserting in lieu thereof "by the Sec-
10 retary pursuant to subsection (b)".

11 (3) Clause (1) (E) of section 428 (b) is amended to
12 read:

13 "(E) authorizes interest on the unpaid balance of
14 the loan at a yearly rate not in excess of the maximum
15 rate of interest prescribed for such loan pursuant to sec-
16 tion 427 (b) (exclusive of any premium for insurance
17 which may be passed on to the borrower);".

18 (4) Clause (1) of section 428 (d) is amended by strik-
19 ing out "not in excess of 7 per centum per annum" and in-
20 serting in lieu thereof "not in excess of the rate prescribed by
21 the Secretary pursuant to section 427 (b)".

22 (d) (1) Section 423 (a) is amended by inserting ",
23 other than with respect to loans by eligible institutions," after
24 "429".

1 (2) Subsection (d) of section 429 is amended to read
2 as follows:
3 "(d) Subject to any terms, conditions, or limitations
4 established by regulations of the Commissioner, the rights of
5 an eligible lender arising under insurance evidenced by a
6 certificate of insurance issued to it under this section, or the
7 rights of any assignee thereof, may be assigned."
8 INCREASE AND OTHER ADJUSTMENTS IN LOAN CEILINGS
9 SEC. 406. (a) Section 425 is amended to read as
10 follows:
11 "SEC. 425. (a) The total of the loans made to a student
12 in any academic year or its equivalent (as determined under
13 regulations of the Commissioner) which may be insured by
14 the Commissioner under this part may not exceed an amount
15 equal to $2,500 reduced by the total amount of loans to the
16 student in such academic year which (1) are made to the
17 student under a State student loan program meeting criteria
18 prescribed by the Commissioner under this part, or (2) are
19 insured under a program of a State or of a nonprofit private
20 institution or organization which has entered into an agree-
21 ment with the Commissioner under subsection (b) or (c) of
22 section 428. A student may receive loans insured by the Com-
23 missioner for not in excess of a period equal to seven academic
24 years reduced by the number of academic years in which the
25 student has received a loan described in the preceding sen-

1 tence. If a student has a line of credit, only actual payments
2 by the lender to the borrower during any year will be taken
3 into account in determining the total insurable amount for
4 such year.

5 "(b) Subject to the limitations of subsection (a)—

6 "(1) the maximum loan to any student insured by
7 the Commissioner in any year with respect to which an
8 interest subsidy is payable pursuant to part A shall be
9 determined by the Secretary in accordance with such
10 part; and

11 "(2) the maximum loan to any student insured by
12 the Commissioner in any academic year, other than a
13 loan described by clause (1), shall not exceed the rea-
14 sonable and necessary expenses incurred by the student,
15 in such academic year, in consequence of his attendance
16 at an eligible institution; and the amount of such ex-
17 penses shall be estimated by such eligible institution in
18 accordance with regulations of the Commissioner.

19 A statement of the maximum loan determined by the Secre-
20 tary under part A and the estimate of reasonable and neces-
21 sary expenses, with respect to a student for any academic
22 year, shall be furnished by the eligible institution to the
23 student upon his request. No loan or portion thereof shall be
24 insured by the Commissioner in excess of such maximum or
25 estimate.

1 "(c) The insurance liability on any loan insured by the
2 Commissioner under this part shall be 100 per centum of
3 the unpaid balance of the principal amount of the loan. Such
4 insurance liability shall not include liability for interest
5 whether or not that interest has been added to the principal
6 amount of the loan except as otherwise expressly provided
7 herein."

8 (b) Section 428 (b) (1) is amended (1) in clause (A)
9 by striking out "$1,500" and inserting "$2,500" in lieu
10 thereof, and by striking out all of that clause that follows
11 "in excess of such annual limit;", (2) in clause (B) by
12 striking out all of that clause that follows "students for"
13 and inserting in lieu thereof "seven academic years of study
14 or their equivalent (as determined under regulations of the
15 Commissioner) reduced by the number of academic years
16 in which the student has received a loan insured by the
17 Commissioner under this part;", and (3) in clause (H) by
18 striking out all of that clause that follows "any student"
19 and inserting in lieu thereof "because of lack of need if an
20 interest subsidy is payable pursuant to part A with regard
21 to any loan to such student;".

22 DEFERRAL OF INTEREST AND PRINCIPAL PAYMENTS

23 SEC. 407. (a) (1) Clauses (E), (F), and (G) of sec-
24 tion 427 (a) (2) are redesignated clauses (F), (G), and

(H), respectively, and there is inserted after clause (D) the following new clause:

"(E) authorizes the student borrower, if agreed to by the lender, to defer the payment of periodic installments of principal and interest during any period or periods (not in excess of an aggregate of five years) as the student may, during the repayment period, from time to time specify in advance by written notice to the lender, which deferred interest shall accrue and be added to principal on the date that payment of principal and interest is to resume, and shall thereby increase the insurance liability under this part in the amount of such accrued interest,".

(2) Clause (D) of section 427(a)(2) is amended by striking out so much of that clause as follows "payable in installments" and inserting in lieu thereof "over a period beginning on the date upon which repayment of the first installment of principal falls due and ending on the date upon which repayment of the last installment of principal falls due, and interest accruing but not payable prior to the date upon which repayment of the first installment of principal falls due shall be added to principal and shall thereby increase the insurance liability under this part in the amount of such accrued interest,".

(3) Clause (C) of section 427 (a) (2) is amended by striking out "need not be paid, but interest shall accrue and be paid" and inserting in lieu thereof "and interest need not be paid, but interest shall accrue and be added to principal, and shall thereby increase the insurance liability under this part in the amount of such accrued interest".

(b) (1) Paragraph (1) of section 428 (b) is amended (A) by striking out "and" at the end of clause (J) thereof, (B) by striking out the period at the end of clause (K) and inserting "; and" in lieu thereof, and (C) by adding at the end of such paragraph the following new clauses:

"(L) provides that periodic installments of principal and interest need not be paid, but interest shall accrue and be added to principal, and is thereby insured under such program, during any period (i) during which the borrower is pursuing a full-time course of study at an eligible institution, (ii) not in excess of three years during which the borrower is a member of the Armed Forces of the United States, (iii) not in excess of three years during which the borrower is in service as a volunteer under the Peace Corps Act, or (iv) not in excess of three years during which the borrower is in service as a full-time volunteer under title VIII of the Economic Opportunity Act of 1964."

1 (2) Subsection (e) of section 428 is amended to read
2 as follows:
3 "(e) The Commissioner shall encourage the inclusion,
4 in any State or nonprofit private student loan insurance
5 program meeting the requirements of subsection (b), of
6 provisions authorizing the student borrower, if agreed to by
7 the lender, to defer the payment of periodic installments
8 of principal and interest during any period or periods (not
9 in excess of an aggregate of five years) as the student may,
10 during the repayment period, from time to time specify
11 in advance by written notice to the lender, which deferred
12 interest shall accrue and be added to principal on the date
13 that payment of principal and interest is to resume, and shall
14 thereby increase the insurance liability of such programs,
15 and the Federal guaranty applicable to such program."
16 EXTENSION OF PERMISSIBLE REPAYMENT PERIOD
17 SEC. 408. (a) (1) Clause (B) of section 427 (a) (2)
18 is amended to read as follows:
19 "(B) provides for repayment (except as provided
20 in subsection (c)) of the principal amount of the loan
21 in installments over a period of not less than five years
22 (unless sooner repaid) nor more than twenty years
23 beginning nine months after the date on which the
24 student ceases to carry at an eligible institution at least
25 one-half the normal full-time academic workload as de-

1 termined by the institution, except that in the compu-
2 tation of such periods there shall be excluded periods in
3 which interest or principal is not paid pursuant to clause
4 (C) or clause (E), and except, also, that the note or
5 other written agreement evidencing it may contain such
6 provisions relating to repayment in the event of default
7 in the payment of interest or in the payment of the cost
8 of insurance premiums, or other default of the borrower,
9 as may be authorized by regulations of the Commissioner
10 in effect at the time the loan is made,".
11 (2) Clause (C) of such section is amended by striking
12 out all that follows "1964" and inserting a comma in lieu
13 thereof.
14 (b) (1) Clause (D) of section 428 (b) (1) is amended
15 to read as follows:
16 "(D) provides for repayment (except as provided
17 by subsection (e)) of the principal amounts of loans in
18 installments over a period of not less than five years
19 (unless sooner repaid) nor more than twenty years
20 beginning nine months after the date on which the stu-
21 dent ceases to carry at an eligible institution at least
22 one-half the normal full-time academic workload as de-
23 termined by the institution, except that in the computa-
24 tion of such periods there shall be excluded periods in
25 which interest or principal is not paid pursuant to clause

1 (L) of this paragraph or subsection (e), and except,
2 also, that the note or other written agreement evidencing
3 it may contain such provisions relating to repayment in
4 the event of default in the payment of interest or in
5 the payment of the cost of insurance premiums, or other
6 default of the borrower, as may be authorized by regu-
7 lations of the Commissioner in effect at the time the loan
8 is made;".

9 (2) Section 428(b)(1)(C) is amended by striking
10 out clause (ii) thereof, and redesignating clause (iii) as
11 clause (ii).

12 EXTENSION OF PROGRAM AND REPEAL OF PREVIOUS FED-
13 ERAL LOAN INSURANCE CEILING

14 SEC. 409. Section 424 is amended to read as follows:

15 "SEC. 424. Except as provided in the next sentence,
16 Federal loan insurance pursuant to this part may be granted
17 only for loans made (or for loan installments paid pursuant
18 to lines of credit) to students prior to July 1, 1976. There-
19 after, such insurance may be granted for the purpose of
20 enabling students who have obtained prior loans insured
21 under this part to continue or complete their educational
22 programs; but no insurance may be granted for any loan
23 made or installment paid after June 30, 1980."

1 REPEAL OF CANCELLATION OF NATIONAL DEFENSE
2 STUDENT LOANS

3 SEC. 410. Subparagraph (3) of section 205 (b) of the
4 National Defense Education Act of 1958 is repealed.

5 ELIGIBILITY FOR NATIONAL DEFENSE STUDENT LOANS

6 SEC. 411. Subsection (b) of section 205 of the National
7 Defense Education Act of 1958 is amended by inserting
8 after "course of study" the following: ", and to such priori-
9 ties in the lending of such funds as the Secretary may from
10 time to time establish pursuant to title IV of the Higher
11 Education Act of 1965".

12 AUTHORITY TO MAINTAIN STUDENT LOAN FUNDS

13 SEC. 412. (a) Section 206 of the National Defense
14 Education Act of 1958 is amended by striking out "1975"
15 wherever it appears and inserting in lieu thereof "1980".

16 EFFECTIVE DATE APPLICABLE TO SECTIONS 405 THROUGH
17 411

18 SEC. 413. Sections 405 through 411 of this Act shall be
19 effective with respect to loans made or disbursed to students
20 after June 30, 1971.

21 PART B—ESTABLISHMENT OF NATIONAL STUDENT LOAN
22 ASSOCIATION

23 SEC. 420. Part D of title IV of the Higher Education
24 Act of 1965 is amended to read as follows:

1 "PART D--NATIONAL STUDENT LOAN ASSOCIATION

2 "DECLARATION OF PURPOSE

3 "SEC. 441. It is the purpose of this part to establish
4 a private corporation financed by private capital to serve
5 as a secondary market for student loans insured under part
6 C and to provide liquidity for those who make such loans.

7 "CREATION OF AGENCY

8 "SEC. 442. (a) There is hereby created a body corpo-
9 rate to be known as the National Student Loan Association
10 (hereinafter in this part referred to as the 'Association'). The
11 Association shall have succession until dissolved by Act of
12 Congress. It shall maintain its principal office in the District
13 of Columbia and shall be deemed, for purposes of venue and
14 civil actions, to be a resident thereof. Offices may be estab-
15 lished by the Association in such other place or places as it
16 deems necessary or appropriate for the conduct of its business.

17 "(b) The Association, including its franchise, capital,
18 reserves, surplus, mortgages, or other security holdings, and
19 income shall be exempt from all taxation now or hereafter
20 imposed by any State, territory, possession, Commonwealth,
21 or dependency of the United States, or by the District of
22 Columbia, or by any county, municipality, or local taxing
23 authority, except that any real property of the Association
24 shall be subject to State, territorial, county, municipal, or

1 local taxation to the same extent according to its value as
2 other real property is taxed.

3 "BOARD OF DIRECTORS

4 "SEC. 443. (a) The Association shall have a Board
5 of Directors consisting of twenty-one persons.

6 "(b) An interim Board of Directors shall be appointed
7 by the President, one of whom he shall designate as interim
8 Chairman. The interim Board shall consist of twenty-one
9 members, seven of whom shall be representative of eligible
10 lenders under part C other than eligible institutions, seven of
11 eligible institutions (as defined in section 435(a)), and
12 seven of the general public. The interim Board shall arrange
13 for an initial offering of common stock and take whatever
14 other actions are necessary to proceed with the operations of
15 the Association.

16 "(c) When, in the judgment of the President, sufficient
17 common stock of the Association has been purchased by
18 eligible institutions and banks or other financial institutions,
19 the holders of such stock which are eligible institutions shall
20 elect seven members of the Board of Directors and the
21 holders of such stock which are banks or other financial insti-
22 tutions shall elect seven members of the Board of Directors.
23 The President shall appoint the remaining seven members.
24 The members so elected and appointed shall elect a chair-
25 man. The elections referred to in this subsection shall be

1 carried out in such manner as the interim Board may
2 prescribe.
3 "(d) The interim Board shall thereafter turn over the
4 affairs of the Association to the regular Board so chosen or
5 appointed.
6 "(e) The Directors appointed by the President shall
7 serve at the pleasure of the President and until their suc-
8 cessors have been appointed and have qualified. The remain-
9 ing Directors shall each be elected for a term ending on the
10 date of the next annual meeting of the common stockbrokers
11 of the Association, and until their successors have been
12 elected. Any appointive seat on the Board which becomes
13 vacant shall be filled by appointment of the President. Any
14 elective seat on the Board which becomes vacant after the
15 annual election of the Directors shall be filled by the Board,
16 but only for the unexpired portion of the term.
17 "(f) The Board of Directors shall meet at the call of
18 its Chairman. The Board shall determine the general policies
19 which will govern the operations of the Association. The
20 Chairman of the Board shall, with the approval of the Board,
21 select, appoint, and compensate qualified persons to fill the
22 offices provided for in the bylaws, with such executive func-
23 tions, powers, and duties as may be prescribed by the bylaws
24 or by the Board of Directors, and such persons shall be the

1 executive officers of the Association and shall discharge all
2 such executive functions, powers, and duties.

3 "FUNCTIONS

4 "SEC. 444. (a) Subject to the provisions of this part
5 and the approval of the Secretary, the Association is author-
6 ized to make advances on the security of, or to purchase,
7 service, sell, or otherwise deal in, student loans which are
8 insured under part C.

9 "(b) Any advance made under subsection (a) of this
10 section shall not exceed 80 per centum of the face amount
11 of the insured loans upon the security of which such advance
12 is made. The proceeds from any advance shall be invested
13 in additional insured student loans.

14 "COMMON STOCK

15 "SEC. 445. (a) The Association shall have common
16 stock having a par value of $100 per share.

17 "(b) Each share of common stock shall be entitled to
18 one vote with rights of cumulative voting at all elections
19 of directors. Voting shall be by classes as described in
20 section 443 (c).

21 "(c) The common stock of the Association shall be
22 transferable, as to the Association, only on the books of the
23 Association. The Secretary shall prescribe the maximum
24 number of shares of common stock the Association may issue
25 and have outstanding at any one time. Shares of such stock

1 which are outstanding may be called for retirement at par
2 at the option of the Association at any time.
3 "(d) To the extent that net income is earned and real-
4 ized, dividends may be declared on common stock by the
5 Board of Directors. Such dividends shall be paid to the
6 holders of outstanding shares of common stock, except that
7 no such dividend shall be payable with respect to any share
8 which has been called for redemption past the effective date
9 of such call.
10 "OBLIGATIONS
11 "SEC. 446. (a) The Association is authorized with the
12 approval of the Secretary of the Treasury to issue and have
13 outstanding obligations having maturities and bearing such
rate or rates of interest as may be determined by the Associ-
15 ation with the approval of the Secretary of the Treasury.
16 Such obligations may be redeemable at the option of the
17 Association before maturity in such manner as may be stip-
18 ulated therein.
19 "(b) The Secretary is authorized to guarantee payment
20 when due of principal and interest on obligations issued by
21 the Association in an aggregate amount determined by the
22 Secretary in consultation with the Secretary of the Treasury.
23 "(c) To enable the Secretary to discharge his respon-
24 sibilities under guarantees issued by him, he is authorized
25 to issue to the Secretary of the Treasury notes or other

1 obligations in such forms and denominations, bearing such
2 maturities, and subject to such terms and conditions, as may
3 be prescribed by the Secretary with the approval of the
4 Secretary of the Treasury. Such notes or other obligations
5 shall bear interest at a rate determined by the Secretary of
6 the Treasury, taking into consideration the current average
7 market yield on outstanding marketable obligations of the
8 United States of comparable maturities during the month
9 preceding the issuance of the notes or other obligations.
10 The Secretary of the Treasury is authorized and directed to
11 purchase any notes and other obligations issued hereunder
12 and for that purpose he is authorized to use as a public
13 debt transaction the proceeds from the sale of any securities
14 issued under the Second Liberty Bond Act, as amended,
15 and the purposes for which securities may be issued under
16 that Act, as amended, are extended to include any purchase
17 of such notes and obligations. The Secretary of the Treasury
18 may at any time sell any of the notes or other obligations
19 acquired by him under this subsection. All redemptions, pur-
20 chases, and sales by the Secretary of the Treasury of such
21 notes or other obligations shall be treated as public debt
22 transactions of the United States. There are authorized to
23 be appropriated to the Secretary such sums as may be neces-
24 sary to pay the principal and interest on the notes or obliga-
25 tions issued by him to the Secretary of the Treasury.

1 "GENERAL AUTHORITY

2 "SEC. 447. The Association shall have authority—

3 "(a) to sue and be sued, complain and defend, in

4 its corporate name and through its own counsel;

5 "(b) to adopt, alter, and use a corporate seal, which

6 shall be judicially noticed;

7 "(c) to adopt, amend, and repeal by its board of

8 directors such bylaws, rules, and regulations as may be

9 necessary for the conduct of its business;

10 "(d) to conduct its business, carry on its operations,

11 and have offices and exercise the authority granted by

12 this part in any State without regard to any qualification

13 or similar statute in any State;

14 "(e) to lease, purchase, or otherwise acquire, own,

15 hold, improve, use, or otherwise deal in and with any

16 property, real, personal, or mixed, or any interest therein,

17 wherever situated;

18 "(f) to accept gifts or donations of services, or of

19 property, real, personal, or mixed, tangible or intangible,

20 in aid of any of the purposes of the Association;

21 "(g) to sell, convey, mortgage, pledge, lease, ex-

22 change, and otherwise dispose of its property and assets;

23 "(h) to appoint such officers, attorneys, employees,

24 and agents as may be required, to determine their quali-

25 fications, to define their duties, to fix their salaries, to

1 require bonds for them and fix the penalty thereof; and

2 "(i) to enter into contracts, to execute instruments,

3 to incur liabilities, and to do all things necessary or in-

4 cidental to the proper management of its affairs and the

5 proper conduct of its business.

6 "AUDIT

7 "SEC. 448. The accounts of the Association shall be

8 audited at least annually. Such audits shall be conducted in

9 accordance with generally accepted auditing standards by

10 independent certified public accountants or by independent

11 licensed public accountants, licensed on or before December

12 31, 1970, who are certified or licensed by a regulatory

13 authority of a State or other political subdivision of the

14 United States, except that independent public accountants

15 licensed to practice by such regulatory authority after De-

16 cember 31, 1970, and persons who, although not so certi-

17 fied or licensed, meet, in the opinion of the Secretary, stand-

18 ards of education and experience representative of the high-

19 est standards prescribed by the licensing authorities of the

20 several States which provide for the continuing licensing of

21 public accountants and which are prescribed by the Secre-

22 tary in appropriate regulations may perform such audits

23 until December 31, 1975. A report of each such audit shall

24 be furnished to the Secretary and to the Secretary of the

25 Treasury.

1 "OBLIGATIONS AS LAWFUL INVESTMENTS,

2 ACCEPTANCE AS SECURITY

3 "SEC. 449. All obligations issued by the Association
4 shall be lawful investments, and may be accepted as security
5 for all fiduciary, trust, and public funds, the investment or
6 deposit of which shall be under authority or control of the
7 United States or of any officer or officers thereof. All stock
8 and obligations issued by the Association pursuant to this
9 part shall be deemed to be exempt securities within the
10 meaning of laws administered by the Securities and Ex-
11 change Commission, to the same extent as securities which
12 are direct obligations of or obligations guaranteed as to
13 principal or interest by the United States. The Association
14 shall, for the purposes of section 14 (b) (2) of the Federal
15 Reserve Act, be deemed to be an agency of the United
16 States.

17 "PREPARATION OF OBLIGATIONS

18 "SEC. 450. In order to furnish obligations for delivery
19 by the Association, the Secretary of the Treasury is au-
20 thorized to prepare such obligations in such form as the
21 Board of Directors may approve, such obligations when pre-
22 pared to be held in the Treasury subject to delivery upon
23 order by the Association. The engraved plates, dies, bed
24 pieces, and other material executed in connection therewith
25 shall remain in the custody of the Secretary of the Treasury.

1 The Association shall reimburse the Secretary of the Treasury
2 for any expenditures made in the preparation, custody, and
3 delivery of such obligations.

4 "ANNUAL REPORT

5 "SEC. 451. The Association shall, as soon as practicable
6 after the end of each fiscal year, transmit to the President
7 and the Congress a report of its operations and activities
8 during each year, including a report of the audit conducted
9 under section 448.

10 "SEPARABILITY

11 "SEC. 452. If any provision of this part or the applica-
12 tion thereof to any person or circumstance is held invalid, the
13 validity of the remainder of the part, and the application of
14 such provisions to other persons or circumstances, shall not
15 be affected.

16 "INTERIM FINANCING ARRANGEMENT FOR STUDENT
17 LOANS

18 "SEC. 453. (a) Any eligible institution (as defined in
19 section 408) which, subsequent to enactment of this part,
20 makes a loan on which a subsidy is payable under section
21 428 (a), may offer that loan for sale to the Secretary, and,
22 until such time as the Association, in the Secretary's judg-
23 ment, is able to purchase student loans insured under part C,
24 the Secretary is authorized and directed to purchase any such
25 loan at a price equal to 100 per centum of the unpaid prin-

1 cipal thereof and interest thereon at the time of purchase.
2 "(b) Upon application to him by an eligible institution
3 indicating that such institution is, in the Secretary's judg-
4 ment, in need of funds with which to make loans on which
5 subsidies are payable under section 428 (a), the Secretary
6 shall make an advance of funds to such institution against the
7 future purchase by him of such loans.
8 "(c) The Secretary may enter into an agreement with
9 any eligible institution from which he has purchased one or
10 more loans pursuant to subsection (a) under which agree-
11 ment such institution (A) will undertake to perform adminis-
12 trative functions with respect to any loan purchased from it
13 by the Secretary and (B) be reimbursed the cost thereof.
14 "AUTHORIZATION OF APPROPRIATIONS
15 "SEC. 454. There are authorized to be appropriated such
16 sums as may be necessary to carry out the preceding section.
17 "TERMINATION OF INTERIM FINANCING ARRANGEMENT
18 "SEC. 455. At such time as the Association is able to
19 purchase student loans insured under part C, such Associa-
20 tion shall purchase from the Secretary student loans which he
21 has acquired under section 453 (a). Such loans shall be
22 purchased by such Association upon such terms and condi-
23 tions as the Board of Directors shall determine. Such Associ-
24 ation shall not deal in any other student loans until it has

1 first purchased from the Secretary all loans which he has so
2 acquired.

3 "PURCHASE OF OBLIGATIONS BY TREASURY

4 "SEC. 456. The Secretary of the Treasury is authorized
5 to purchase, in his discretion and upon such terms and condi-
6 tions as he determines, any obligations issued by the Associ-
7 ation under section 446(a), and for such purpose he is
8 authorized to use as a public debt transaction the proceeds
9 from the sale of any securities issued under the Second
10 Liberty Bond Act, and the purposes for which securities
11 may be issued under such Act are extended to include such
12 purchases. The aggregate principal amount of the Secretary
13 of the Treasury's outstanding holdings of such obligations
14 may not exceed at any time an amount greater than $250,-
15 000,000. The Secretary of the Treasury may sell, upon such
16 terms and conditions as he determines, any of the obliga-
17 tions acquired by him under this section. All redemptions,
18 purchases, and sales by the Secretary of the Treasury of
19 such obligations under this section shall be treated as public
20 debt transactions of the United States."

21 AMENDMENTS RELATING TO FINANCIAL INSTITUTIONS

22 SEC. 421. (a) The sixth sentence of the seventh para-
23 graph of section 5136 of the Revised Statutes, as amended
24 (12 U.S.C. 24), is amended by inserting "or obligations

1 of the National Student Loan Association," immediately
2 after "or obligations, participation, or other instruments of
3 or issued by the Federal National Mortgage Association or
4 the Government National Mortgage Association,".
5 (b) Section 5200 of the Revised Statutes, as amended
6 (12 U.S.C. 84), is amended by adding at the end thereof
7 the following new paragraph:
8 "(14) Obligations of the National Student Loan
9 Association shall not be subject to any limitation based
10 upon such capital and surplus."
11 (c) The first paragraph of section 5(c) of the Home
12 Owners' Loan Act of 1933, as amended (12 U.S.C. 1464
13 (c)), is amended by inserting "or in obligations of the
14 National Student Loan Association;" in the second proviso
15 immediately after "any political subdivision thereof."
16 (d) Clause (E) of paragraph (8) of section 8 of the
17 Federal Credit Union Act (12 U.S.C. 1757(8)(E)) is
18 amended by inserting "or the National Student Loan Asso-
19 ciation" immediately following "Government National Mort-
20 gage Association".
21 INAPPLICABILITY OF TRUTH IN LENDING ACT
22 SEC. 422. Section 104 of the Truth in Lending Act
23 (15 U.S.C. 1603) is amended by adding the following new
24 paragraph at the end thereof:

1 "(5) Loans under title II of the National Defense
2 Education Act of 1958 or loans to which title IV of the
3 Higher Education Act of 1965 is applicable".

4 EFFECTIVE DATE

5 SEC. 423. The amendments made by sections 420, 421,
6 and 422 shall be effective with respect to fiscal years begin-
7 ning after June 30, 1971.

8 PART C—CONSOLIDATION OF SPECIAL SERVICES
9 PROGRAMS

10 SEC. 430. Title IV of the Higher Education Act is
11 further amended by inserting after part D the following new
12 part:

13 "PART E—IDENTIFYING QUALIFIED LOW-INCOME STU-
14 DENTS; PREPARING THEM FOR POSTSECONDARY EDU-
15 CATION; SPECIAL SERVICES FOR SUCH STUDENTS IN
16 INSTITUTIONS OF HIGHER EDUCATION

17 "SEC. 461. (a) To assist in achieving the objectives of
18 this part the Commissioner is authorized, without regard to
19 section 3709 of the Revised Statutes (41 U.S.C. 5), to make
20 grants to, or contracts with, institutions of higher educa-
21 tion, including institutions with vocational and career educa-
22 tion programs, combinations of such institutions, public and
23 private agencies and organizations (including professional
24 and scholarly associations), and in exceptional cases sec-
25 ondary schools and secondary vocational schools, for plan-

1 ning, developing, or carrying out within the States one or
2 more of the services described in subsection (c), except
3 that no grant may be made to an agency, organization, in-
4 stitution, or school other than a public or nonprofit private
5 one.

6 "(b) Such services shall be designed to enable youths
7 from low-income backgrounds who have academic potential
8 (but may lack adequate secondary school preparation or be
9 physically handicapped) to enter, continue, or resume a pro-
10 gram of postsecondary education.

11 "(c) Such services are—

12 "(1) publicizing existing forms of student financial
13 aid;

14 "(2) identifying youths described in subsection (b)
15 and encouraging them to complete secondary school and
16 to undertake postsecondary education;

17 "(3) encouraging youths described in subsection
18 (b) who have dropped out of secondary school or col-
19 lege to reenter educational programs, including pro-
20 grams of postsecondary education;

21 "(4) generating skills and motivation necessary
22 for success in education beyond high school;

23 "(5) providing counseling, tutorial, or other edu-
24 cational services, including special summer programs,
25 to remedy academic deficiencies;

1 "(6) providing career guidance, placement, or other
2 student personnel services (including health services);
3 "(7) identifying, encouraging, and counseling stu-
4 dents with a view to their undertaking a program of
5 graduate or professional education; and
6 "(8) providing other special or supplemental serv-
7 ices necessary to achieve the purposes set forth in sub-
8 section (b).
9 "(d) Enrollees who are participating on an essentially
10 full-time basis in one or more services being provided under
11 subsection (c) may be paid stipends, but not in excess of
12 $30 per month except in exceptional cases as determined by
13 the Commissioner.
14 "(e) There are authorized to be appropriated to carry
15 out this part such sums as may be necessary for the fiscal
16 year ending June 30, 1972, and each of the next four fiscal
17 years."
18 EFFECTIVE DATE
19 SEC. 431. The amendments made by section 430 shall
20 be effective with respect to fiscal years beginning after June
21 30, 1971.

1 TITLE V—AMENDMENTS TO TITLE V OF HIGHER
2 EDUCATION ACT (EDUCATION PROFESSIONS
3 DEVELOPMENT ACT)
4 PART A—AMENDMENTS TO PART A OF TITLE V
5 EXTENSION OF NATIONAL ADVISORY COUNCIL ON EDUCA-
6 TION PROFESSIONS DEVELOPMENT AND PROGRAM FOR
7 ATTRACTING QUALIFIED PERSONNEL TO THE FIELD OF
8 EDUCATION
9 SEC. 501. (a) Section 502 (f) of title V of the Higher
10 Education Act of 1965 (the Education Professions Develop-
11 ment Act) is amended by striking out "three" and inserting
12 in lieu thereof "eight".
13 (b) Section 504 (b) of such title is amended by striking
14 out "and" before "the sum of $5,000,000" and inserting the
15 following after "July 1, 1971": ", and such sums as may be
16 necessary for each of the next five fiscal years".
17 PART B—AMENDMENTS TO SUBPART 1 OF PART B
18 (TEACHER CORPS)
19 EXTENSION OF PROGRAM
20 SEC. 510. Section 511 (b) of the Higher Education
21 Act of 1965 is amended (1) by striking out "and" before
22 "$10,000,000", and inserting the following after "July 1,
23 1971": ", and such sums as may be necessary for each of
24 the next five fiscal years".

1 PART C—AMENDMENTS TO SUBPART 2 OF PART B

2 EXTENSION OF PROGRAM

3 SEC. 520. Section 518 (b) of the Higher Education Act
4 of 1965 is amended by striking out "and" before "$65,000,-
5 000" and by inserting ", and such sums as may be necessary
6 for each of the next five fiscal years" immediately after
7 "July 1, 1971".

8 RETRAINING OF TEACHERS AND EMPLOYMENT OF TUTORS
9 AND INSTRUCTIONAL ASSISTANTS

10 SEC. 521. Section 518 (a) of such Act is amended by
11 striking out "and" before "(2)" and by adding the follow-
12 ing before the period: ", (3) to employ high school and
13 college students as tutors or instructional assistants for edu-
14 cationally disadvantaged children, (4) to compensate such
15 tutors and instructional assistants at such rates as the Com-
16 missioner may determine to be consistent with prevailing
17 practices under comparable federally supported work-study
18 programs, and (5) to provide necessary training to teachers
19 to enable them to teach other grades or other subjects in
20 which such agencies have a teacher shortage".

21 REDUCING MINIMUM ALLOTMENT

22 SEC. 522. Section 519 (a) of such Act is amended by
23 striking out "$100,000" and inserting in lieu thereof
24 "$50,000".

1 CONFORMING AMENDMENTS AND INCREASE IN AMOUNT
2 AVAILABLE FOR ADMINISTRATION

3 SEC. 523 (a) Section 520 (a) (2) is amended (A) by
4 striking out "and (C)" and inserting in lieu thereof "(C)
5 programs of such agencies to employ high school and col-
6 lege students as tutors or instructional assistants for edu-
7 cationally disadvantaged children, (D) programs of such
8 agencies to compensate such tutors and instructional assist-
9 ants at such rates as the Commissioner may determine to
10 be consistent with prevailing practices under comparable
11 federally supported work-study programs, (E) programs of
12 such agencies to provide necessary training to teachers to en-
13 able them to teach other grades or other subjects in which
14 such agencies have a teacher shortage, and (F)", (B) by
15 striking out "3" and inserting in lieu thereof "5", and (C)
16 by inserting before the semicolon: "or, $20,000, whichever
17 is greater".

18 (b) Section 520 (a) (3) is amended by inserting "or
19 for the retraining of teachers" immediately before the semi-
20 colon at the end thereof.

21 ELIMINATING CEILING ON AMOUNT FOR AIDES

22 SEC. 524. Section 520 (a) of such Act is further amended
23 by striking out paragraph (5) and designating paragraphs
24 (6), (7), (8), and (9) as paragraphs (5), (6), (7), and
25 (8), respectively, and by inserting in paragraph (5), as so

1 redesignated, "is teaching, or" immediately after "because
2 he".

3 PART D—AMENDMENTS TO PART D—IMPROVING TRAIN-
4 ING OPPORTUNITIES FOR NON-HIGHER EDUCATION
5 PERSONNEL

6 EXTENSION OF PROGRAM

7 SEC. 530. Section 532 of the Higher Education Act of
8 1965 is amended by striking out "and" before "the sum of
9 $90,000,000" and inserting the following after "July 1,
10 1971": ", and such sums as may be necessary for each
11 of the next five fiscal years".

12 SUPPORT OF TUTORS AND INSTRUCTIONAL ASSISTANTS

13 SEC. 531. Section 531 (b) of such Act is amended by
14 changing the period at the end thereof to a semicolon and
15 by adding the following new paragraph:

16 "(11) programs or projects to employ tutors or
17 instructional assistants in preschool, elementary, and
18 secondary school classes, especially for educationally dis-
19 advantaged children."

20 SEC. 532. Section 531 (c) of such Act is amended by
21 striking out "or" at the end of paragraph (1), by striking out
22 the period at the end of paragraph (2) and inserting "; or"
23 in lieu thereof, and by adding the following new paragraph:

24 "(3) compensating tutors and instructional as-
25 sistants at such rates as the Commissioner may determine

1 to be consistent with the prevailing practices under
2 comparable federally supported work-study programs."

3 DEVELOPING AND STRENGTHENING PROGRAMS FOR THE
4 EDUCATION OF TEACHERS AND RELATED EDUCATIONAL
5 PERSONNEL

6 SEC. 533. Section 531 (b) of such Act is further amended
7 by changing the period at the end thereof to a semicolon, by
8 adding "and" at the end of paragraph 11, and by adding
9 the following new paragraph:

10 "(12) programs or projects (including cooperative
11 arrangements or consortia between institutions of higher
12 education, junior and community colleges, or between
13 such institutions and State or local educational agencies
14 and nonprofit education associations) for the develop-
15 ment, expansion, or improvement of undergraduate pro-
16 grams for preparing educational personnel, including
17 design, development, and evaluation of exemplary under-
18 graduate training programs, introduction of high quality
19 and more effective curricula and curricular materials, and
20 the provision of increased opportunities for practicum
21 teaching experience for prospective teachers in elemen-
22 tary and secondary schools."

23 SEC. 534. Section 531 (c) of such Act, as amended by
24 section 532 of this Act, is further amended by striking out
25 the "or" at the end of paragraph (2) and the period at the

60-433 O - 71 - pt. 1 -- 19

1 end of paragraph (3), by inserting a semicolon and "or" at
2 the end of paragraph (3), and by adding the following new
3 paragraph:
4 "(4) projects or programs to develop, expand, or
5 improve undergraduate and other programs for training
6 educational personnel."
7 APPLICATION OF PART D TO INDIAN SCHOOLS
8 SEC. 535. Section 532 of the Higher Education Act of
9 1965 is amended by inserting "(a)" after "SEC. 532." and
10 by inserting at the end thereof the following new subsection:
11 "(b) From the sums appropriated pursuant to subsection
12 (a), the Commissioner may also make payments to the Sec-
13 retary of the Interior to carry out the policy of this part with
14 respect to persons preparing to serve as teachers of individuals
15 on reservations serviced by elementary and secondary schools
16 for Indian children operated or supported by the Department
17 of Interior. The terms upon which payments for that pur-
18 pose may be made to the Secretary of the Interior shall be
19 determined pursuant to such criteria as the Commissioner
20 determines will best carry out the policy of this part."

1 PART E—CONSOLIDATION OF TITLE IV OF THE NATIONAL
2 DEFENSE EDUCATION ACT OF 1958 WITH PART E OF
3 TITLE V OF THE HIGHER EDUCATION ACT OF 1965
4 (EDUCATION PROFESSIONS DEVELOPMENT ACT)

5 EXTENSION OF PROGRAM

6 SEC. 540. Section 543 of the Higher Education Act of
7 1965 is amended by striking out "and" before "the sum of
8 $36,000,000" and inserting the following after "July 1,
9 1971": ", and such sums as may be necessary for each of
10 the next five fiscal years".

11 BROADENING CLASS OF INSTITUTIONS FOR WHICH
12 PERSONNEL MAY BE TRAINED

13 SEC. 541. (a) Section 541 (a) of such Act is amended
14 by striking out "institutions of higher education" as it ap-
15 pears immediately before the period and inserting in lieu
16 thereof "postsecondary institutions".

17 (b) Section 541 (b) of such Act is amended by striking
18 out "fellowships which are eligible for support under title IV
19 of the National Defense Education Act of 1958, or for".

20 (c) Section 541 (c) is amended by striking out "institu-
21 tions of higher education" and inserting in lieu thereof "post-
22 secondary institutions".

1 PROVISION FOR INSTITUTIONAL ALLOWANCE

2 SEC. 542. Section 542 is amended by striking out "SEC.
3 542." and inserting in lieu thereof "SEC. 542. (a)" and by
4 adding at the end thereof the following new subsection:
5 "(b) Any arrangement with an institution of higher
6 education under this part that authorizes the payment of
7 stipends pursuant to subsection (a) of this section shall
8 also provide that the Commissioner shall pay to such insti-
9 tution such amount as he may determine to be consistent
10 with prevailing practices under comparable federally sup-
11 ported programs, except that such amount shall not exceed
12 $3,500 per academic year for each person receiving a stipend
13 pursuant to the arrangement."

14 SAVINGS PROVISIONS

15 SEC. 543. Effective July 1, 1971, title IV of the Na-
16 tional Defense Education Act of 1958 is repealed, except
17 that in the case of any individual who was awarded a fel-
18 lowship pursuant to such title for which payments for the
19 first academic year of such fellowship were made or to be
20 made from appropriations for any fiscal year ending before
21 July 1, 1971, payments with respect to such fellowships
22 shall continue to be made for periods after June 30, 1971,
23 from appropriations under part E of title V of the Higher
24 Education Act of 1965, but under the same terms and

1 conditions and for the same period of time as though such
2 title IV had not been repealed.

3 PART F—AMENDMENT TO PART F—TRAINING AND DE-
4 VELOPMENT OF VOCATIONAL EDUCATION PERSONNEL

5 EXTENSION OF PROGRAM

6 SEC. 550. Section 555 of the Higher Education Act of
7 1965 is amended by striking out "and" before "the sum
8 of $35,000,000" and inserting the following after "June
9 30, 1970": ", and such sums as may be necessary for each
10 of the next six fiscal years".

11 EFFECTIVE DATE

12 SEC. 551. Except as otherwise expressly provided, the
13 amendments made by this title shall be effective with respect
14 to fiscal years beginning after June 30, 1971.

15 TITLE VI—REPEAL OF TITLES VI, VIII, IX, X,
16 AND XI OF THE HIGHER EDUCATION ACT

17 SEC. 601. Title VI of the Higher Education Act of
18 1965, pertaining to improvement of undergraduate instruc-
19 tion, title VIII of such Act, pertaining to networks for knowl-
20 edge, title IX of such Act, pertaining to education for the
21 public service, title X of such Act, pertaining to improve-
22 ment of graduate programs, and title XI of such Act,
23 pertaining to law school clinical experience programs, are
24 effective July 1, 1971, repealed.

1 TITLE VII—AMENDMENTS TO GENERAL
2 PROVISIONS

3 SEC. 701. (a) Title XII and sections 1201 through
4 1210 of the Higher Education Act of 1965, and all refer-
5 ences thereto, are redesignated as title VIII and sections
6 801 through 810 of such Act, respectively.

7 (b) Title VIII of such Act, as redesignated by this
8 Act, is amended by inserting at the end thereof the following
9 new section:

10 "UNIFORM APPLICATION REQUIREMENTS

11 "SEC. 811. Any application for assistance under titles
12 II, III, or V submitted to the Commissioner by an institution
13 of higher education or other eligible applicant shall not be
14 approved unless it contains assurances satisfactory to the
15 Commissioner that—

16 "(1) Federal funds made available under such title
17 for any fiscal year will be so used as to supplement, and
18 to the extent practical, increase the fiscal effort that
19 would, in the absence of such Federal funds, be made by
20 the applicant for purposes which meet the requirements
21 of such title, and in no case supplant such effort;

22 "(2) such fiscal control and fund accounting pro-
23 cedures have been adopted as may be necessary to assure
24 proper disbursement of and accounting for Federal funds
25 paid under such title;

1 "(3) procedures have been adopted (A) for the
2 periodic evaluation of the effectiveness of the programs to
3 be supported under such title, and (B) for appropriate
4 dissemination of the results of such evaluation; and
5 "(4) the applicant (A) will make such reports, in
6 such form and containing such information, as the Com-
7 missioner may reasonably require to carry out his func-
8 tions under such title and to determine the extent to
9 which funds provided under that title have been effective
10 in carrying out its purposes (including reports of evalua-
11 tions), and (B) will keep such records and afford such
12 access thereto as the Commissioner may find necessary to
13 assure the correctness and verification of such reports."
14 EFFECTIVE DATE
15 SEC. 702. The amendments made by section 701 shall
16 be effective July 1, 1971.
17 TITLE VIII—AMENDMENTS TO HIGHER
18 EDUCATION FACILITIES ACT
19 EXTENSION OF PROGRAM
20 SEC. 801. (a) The first sentence of section 101 (b) of
21 the Higher Education Facilities Act of 1963 is amended by
22 striking out "and" before "$936,000,000" and by inserting
23 ", and such sums as may be necessary for each of the next
24 two fiscal years" immediately before the period.

1 (b) Section 105 (b) of such Act is amended by strik-
2 ing out "four" and inserting in lieu thereof "six".
3 (c) The second sentence of section 201 of such Act is
4 amended by striking out "and" before "the sum of $120,-
5 000,000" and by inserting ", and such sums as may be
6 necessary for each of the next two fiscal years" immediately
7 before the period.
8 (d) The second sentence of section 303 (c) of such
9 Act is amended by striking out "and" before "the sum of
10 $400,000,000" and by inserting ", and such sums as may
11 be necessary for each of the next two fiscal years" im-
12 mediately before the period.
13 (e) Section 306 (c) of such Act is amended by insert-
14 ing "and on July 1 of each of the next two years" im-
15 mediately after "July 1, 1970".
16 (f) Section 408 (a) of such Act is amended by striking
17 out "July 1, 1971" and inserting in lieu thereof "July 1,
18 1973".
19 NEW PROGRAM OF INSURED LOANS FOR CONSTRUCTION
20 OF NONPROFIT PRIVATE ACADEMIC FACILITIES
21 SEC. 802. Title III of the Higher Education Facilities
22 Act of 1963 is amended by inserting immediately after sec-
23 tion 306 the following:

1 "ACADEMIC FACILITIES LOAN INSURANCE

2 "SEC. 307. (a) In order to assist nonprofit private insti-
3 tutions of higher education and nonprofit private higher
4 education building agencies to procure loans for the con-
5 struction of academic facilities, the Commissioner may in-
6 sure the payment of interest and principal on such loans
7 if such institutions and agencies meet, with respect to such
8 loans, criteria prescribed by or under section 306 for the
9 making of annual interest grants under such section.

10 "(b) No loan insurance under subsection (a) may
11 apply to so much of the principal amount of any loan as
12 exceeds 90 per centum of the development cost of the
13 academic facility with respect to which such loan was made.

14 "RIGHT OF RECOVERY AND INCONTESTABLE NATURE OF
15 INSURANCE

16 "SEC. 308. (a) The United States shall be entitled to
17 recover from any institution or agency to which loan insur-
18 ance has been issued under section 307 the amount of any
19 payment made pursuant to that insurance, unless the Com-
20 missioner for good cause waives its right of recovery. Upon
21 making any such payment, the United States shall be sub-
22 rogated to all of the rights of the recipient of the payment
23 with respect to which the payment was made.

1 "(b) Any insurance issued by the Commissioner pur-
2 suant to section 307 shall be incontestable in the hands of the
3 institution or agency on whose behalf such insurance is issued,
4 and as to any agency, organization, or individual who makes
5 or contracts to make a loan to such institution or agency in
6 reliance thereon, except for fraud or misrepresentation on the
7 part of such institution or agency or on the part of the agency,
8 organization, or individual who makes or contracts to make
9 such loan.

10 "CONDITIONS

11 "SEC. 309. Insurance may be issued by the Commis-
12 sioner under section 307 only if he determines that the terms,
13 conditions, maturity, security (if any), and schedule and
14 amounts of repayments with respect to the loan are suf-
15 ficient to protect the financial interests of the United States
16 and are otherwise reasonable and in accord with regulations,
17 including a determination that the rate of interest does not
18 exceed such per centum per annum on the principal obliga-
19 tion outstanding as the Commissioner determines to be rea-
20 sonable, taking into account the range of interest rates pre-
21 vailing in the private market for similar loans and the risks
22 assumed by the United States. The Commissioner may
23 charge a premium for such insurance in an amount reasonably
24 determined by him to be necessary to cover administrative
25 expenses and probable losses under sections 307 and 308.

1 Such insurance shall be subject to such further terms and
2 conditions as the Commissioner determines to be necessary."

3 MAKING REVOLVING LOAN FUND AVAILABLE
4 FOR LOAN INSURANCE

5 SEC. 803. (a) Section 305 of such Act is amended—
6 (1) by striking out the heading therefor and in-
7 serting "Revolving Loan and Insurance Fund" in lieu
8 thereof;
9 (2) by inserting "and loan insurance" immediately
10 after "academic facilities loans" in the first sentence
11 thereof; and
12 (3) by inserting "or loan insurance" immediately
13 following "any loans" in the second sentence thereof.
14 (b) Section 303 (c) of such Act is amended—
15 (1) by inserting "and may insure loans" immedi-
16 ately after "academic facilities" in the first sentence
17 thereof;
18 (2) by inserting "and for issuing such insurance"
19 immediately after "such loans" in the third sentence
20 thereof; and
21 (3) by inserting "and for insurance" immediately
22 after "for loans" in the last sentence thereof.

23 EFFECTIVE DATE

24 SEC. 804. The amendments made by sections 801 and
25 802 shall be effective July 1, 1971, and the amendments

made by section 803 shall be effective as if enacted on the date of enactment of section 305 of such Higher Education Facilities Act.

TITLE IX—EXTENSION OF PROGRAM UNDER TITLE VI OF NATIONAL DEFENSE EDUCATION ACT

SEC. 901. Title VI of the National Defense Education Act of 1958 is amended—

(a) in section 601 by striking out "1971" both places it appears and by inserting in lieu thereof "1973"; and

(b) in section 603 by striking out "and" before "$38,500,000" and by inserting "and such sums as may be necessary for each of the next two fiscal years" immediately after "June 30, 1971,".

EFFECTIVE DATE

SEC. 902. The amendments made by section 901 shall be effective July 1, 1971.

TITLE X—NONDISCRIMINATION ON THE GROUND OF SEX IN FEDERALLY ASSISTED EDUCATION PROGRAMS

DISCRIMINATION PROHIBITED

SEC. 1001. (a) No person in the United States shall, on the ground of sex, be discriminated against by a recipient of Federal financial assistance for any education program or

1 activity. The preceding sentence shall not, however, preclude
2 differential treatment based upon sex where sex is a bona fide
3 ground for such differential treatment.
4 (b) No recipient of Federal financial assistance for an
5 education program or activity shall, because of an individual's
6 sex,
7 (1) discharge that individual, fail or refuse to hire
8 (except in instances where sex is a bona fide occupational
9 qualification) that individual, or otherwise discriminate
10 against him or her with respect to compensation, terms,
11 conditions, or privileges of employment; or
12 (2) limit, segregate, or classify employees in any
13 way which would deprive or tend to deprive that indi-
14 vidual of employment opportunities or otherwise ad-
15 versely affect his or her status as an employee.
16 ENFORCEMENT
17 SEC. 1002. (a) Each Federal department and agency
18 which is empowered to extend Federal financial assistance
19 to any education program or activity, by way of grant, loan,
20 or contract other than a contract of insurance or guaranty,
21 is authorized and directed to effectuate the provisions of sec-
22 tion 1001 with respect to such program or activity by issuing
23 rules, regulations, or orders of general applicability which
24 shall be consistent with achievement of the objectives of the
25 statute authorizing the financial assistance in connection with

1 which the action is taken. No such rule, regulation, or order
2 shall become effective unless and until approved by the
3 President.

4 (b) Compliance with any requirement adopted pursu-
5 ant to subsection (a) may be effected (1) by the termina-
6 tion of or refusal to grant or to continue assistance to any
7 recipient as to whom there has been an express finding on
8 the record, after opportunity for hearing, of a failure to
9 comply with such requirement, but such termination or re-
10 fusal shall be limited to the particular political entity, or part
11 thereof, or other recipient as to whom such a finding has been
12 made and such noncompliance has been so found, or (2)
13 by any other means authorized by law: *Provided, however,*
14 That no such action shall be taken until the department or
15 agency concerned has advised the appropriate person or
16 persons of the failure to comply with the requirement and
17 has determined that compliance cannot be secured by vol-
18 untary means.

19 (c) In the case of any action terminating, or refusing
20 to grant or continue, assistance because of failure to comply
21 with a requirement imposed pursuant to subsection (a), the
22 head of the Federal department or agency shall file with the
23 committees of the House and Senate having legislative juris-
24 diction over the program or actively involved a full written
25 report of the circumstances and the grounds for such action.

1 No such action shall become effective until thirty days have
2 elapsed after the filing of such report.

3 JUDICIAL REVIEW

4 SEC. 1003. Any department or agency action taken
5 pursuant to section 1002 shall be subject to such judicial
6 review as may otherwise be provided by law for similar
7 action taken by such department or agency on other grounds.
8 In the case of action, not otherwise subject to judicial
9 review, terminating or refusing to grant or to continue finan-
10 cial assistance upon a finding of failure to comply with any
11 requirement imposed pursuant to section 1002, any person
12 aggrieved (including any State or political subdivision there-
13 of and any agency of either) may obtain judicial review of
14 such action in accordance with chapter 7 of title 5, United
15 States Code, and such action shall not be deemed committed
16 to unreviewable agency discretion within the meaning of the
17 chapter.

18 PRESERVATION OF EXISTING AUTHORITY

19 SEC. 1004. Nothing in this title shall add to or detract
20 from any existing authority with respect to any education
21 program or activity under which Federal financial assistance
22 is extended by way of a contract of insurance or guaranty.

23 DEFINITION

24 SEC. 1005. For the purposes of this title, the term "edu-
25 cation" includes preschool, elementary, secondary, and post-
26 secondary education.

Section-by-Section Analysis

HIGHER EDUCATION OPPORTUNITY ACT OF 1971

TITLE I--AMENDMENTS TO TITLE I OF THE HIGHER EDUCATION ACT
(COMMUNITY SERVICE AND CONTINUING EDUCATION)

Section 101. Extension of Program

Section 101 of the bill amends section 101 of the HEA by extending the authorization for appropriations for two years, through Fiscal Year 1973, at such sums as may be necessary.

Section 102 makes the amendments made by section 101 effective July 1, 1971.

TITLE II--AMENDMENTS TO TITLE II OF THE HIGHER EDUCATION ACT
(COLLEGE LIBRARY ASSISTANCE)

Section 201. Extension of Program and Reduction of Percentage to be Used for Basic Grants

Section 201 amends Title II by--

(1) extending the authorization for appropriations for Part A for two years (through June 30, 1973) at such sums as may be necessary ;

(2) inserting "particularly developing institutions as defined in title III and community colleges" after "institutions of higher education" in section 201. This language deals with eligible recipients of grants under Part A and emphasizes the eligibility of these institutions to receive grants under Title II.

Section 202. Increase in Percentage of Funds to be Used for Special Purpose and Supplemental Grants

Section 202 amends Title II by--

(1) reducing the percentage of funds available for basic grants from 75 percent to 50 percent of funds appropriated under section 201. The 25 percent differential is made available for special purpose grants under section 204;

(2) repealing sections 201(c) and 201(d) pertaining to assurances required in grant applications, and adding a new 201(c) which requires that applications meet the requirements of section 811. (Section 811 is added by the bill and standardizes assurances required for grants under titles II, III, and V); and

(3) increasing the percentage of funds available for grants under 201(a)(2) from 60 percent of funds available under 204(a)(1) to 80 percent of such funds. (The effect of this amendment, together with (1) above, is to increase the amount of funds available from a maximum of 15 percent of the funds appropriated under section 201 to 40 percent of these funds).

Section 203. Repeal of Research Provision

Section 203 of the bill repeals section 224 of the HEA relating to research. This section duplicates authority contained in the Cooperative Research Act which can be used to fund similar activities.

Section 204. Extension of Training Provision and Transfer to Education Professions Development Act

Section 204 in subsection (a) amends Title II by--

(1) redesignating Part B (Library and Training Research) as "Part G--Library Training";

(2) repealing section 225 of the HEA;

(3) and by transferring the remaining sections of the redesignated Part G to Title V of the HEA (the Education Professions Development Act).

Subsection (b) of section 204 extends the authorization for activities under the new Part G for five years, through FY 1976, at such sums as may be necessary.

Section 205. Repeal of Library of Congress Provision

Section 205 amends Title II of the HEA by repealing Part C which currently authorizes transfer of funds to the Library of Congress. These activities will be funded from Library of Congress appropriations.

Section 206. Change of Headings

Section 206 amends Title II of the HEA by repealing the current heading of Part A (College Library Resources) and by amending the heading of the entire title to read "Academic Library Assistance."

Section 207. Effective Date

Section 207 provides that the amendments made in Title II of the bill shall be effective with respect to fiscal years beginning after June 30, 1971.

60-433 O - 71 - pt. 1 -- 20

TITLE III--AMENDMENTS TO TITLE III OF THE HIGHER EDUCATION ACT
(STRENGTHENING DEVELOPING INSTITUTIONS)

Section 301. Extension of Program

Section 301 of the bill amends Title III of the HEA by extending the authorization for funds for five years through FY 1976, at such sums as may be necessary.

Section 302. Miscellaneous Amendments

Subsection (a) of section 301 amends section 304(b) by striking out 304(b)(3) and (4) and by amending 304(b)(2) to read "meets the requirements of section 811." These sections pertain to assurances required in grant applications. Section 811 standardizes these assurances for titles II, III, and V.

Subsection (b) of section 301 amends section 302(d) to provide that only institutions which provide a bachelor's degree must meet the requirements of sections 302(a) and 302(b) for five years before such institutions may meet the definition of "developing institutions"; and by striking out "(other than developing institutions)" from section 306 to allow professors emeritus from developing institutions to receive grants under this section.

Section 303. Effective Date

Section 303 provides that the amendments made by Title III of the bill shall be effective with respect to fiscal years beginning after June 30, 1971.

TITLE IV--AMENDMENTS TO TITLE IV OF HIGHER EDUCATION ACT
(STUDENT ASSISTANCE)

PART A--NEW PROGRAMS FOR PROVISION OF FINANCIAL
ASSISTANCE TO STUDENTS

Section 401 of the bill amends Title IV of the HEA in the following manner:

(1) by repealing Part C (Work-Study Programs);

(2) by redesignating Part B as Part C;

(3) by redesignating Parts E and F as F and G respectively;

(4) by repealing section 463 and redesignating sections 461, 462, 464, and 469 as sections 471, 472, 473, and 474 respectively;

(5) by making conforming amendments in the redesignated section 473 and

(6) by adding a new Part A, GENERAL PROVISIONS FOR STUDENT ASSISTANCE.

Section 400 of the new Part A (findings and statement of purpose) states that Congress has found it in the National interest to assist in making available the benefits of postsecondary education to all qualified students who, for lack of financial means of their own or of their families, would be unable to obtain those benefits without such assistance. The section further states that it is the purpose of title IV to provide assistance to students, in the form of grants, loans, and compensation, so that no person capable of benefitting from postsecondary education will be denied it because of financial inability to meet basic postsecondary educational costs.

Section 401 (grants, work-study payments, and subsidized loans) states that it is the purpose of Part A to establish general criteria to be used by eligible institutions in providing assistance in the forms of EOG's, work-study payments, and subsidized loans under Part C. The objective of these criteria is to insure that these forms of assistance will be made available to qualified students in need attending eligible institutions. Such criteria are to be designed to provide a basis for students and potential students to ascertain their eligibility for financial assistance.

Section 402 (basic eligibility for, and amounts of, grants, work-study payments, and resource equalizing loans) in subsection (a) provides that the Secretary shall determine each year the (A) maximum expected family contribution below which students will be eligible for EOG's and work-study payments ("grant eligibility limit") and (B) the maximum expected family contribution below which students will be eligible for subsidized loans under Part C ("loan eligibility limit"). These determinations are to be made after consultation with the Advisory Council on Financial Aid to Students established by section 474.

A student with an expected family contribution which is less than the grant eligibility limit would be eligible for a grant (or work-study payments) in accordance with Part B and for a loan on which an interest subsidy is payable in accordance with section 428(a)(2). A student with an expected family contribution between the loan and grant eligibility limits would be eligible for a subsidized loan only.

Subsection (b) of section 402 provides that a student who meets the requirements of section 405 and of Part B would be eligible for a grant (or the Federal share of work-study payments) equal to the grant eligibility limit less his expected family contribution (as determined by the institution providing the assistance).

Loan amounts would be equal to the loan eligibility limit less the sum of (a) the student's expected family contribution plus (b) the amount of any grant of other payment under Part B which the student receives for the year.

Subsection (c) of section 402 provides that a student shall be eligible for an insured loan under Part C in addition to any assistance described in Part A.

Subsection (d) of section 402 provides that the determination of a student's family income is to be made, pursuant to regulations, by the institution to which he has made an application for assistance and in which he is enrolled or to which he has been admitted.

A student's expected family contribution is defined as an amount which a family is reasonably able to contribute toward the cost of a student's postsecondary education, as determined under criteria of the Secretary. Such criteria are to prescribe schedules for the determination of family contributions which take into account varying family incomes, number of dependents, number of dependents in school, family assets, and other pertinent factors. Such criteria are also to provide for determining eligibility for assistance of students who are self-supporting.

Subsection (e) of section 402 authorizes the Secretary to establish by regulation criteria which would allow institutions to provide financial assistance to a student under Part A in an amount greater than that determined under subsection (b) where the institution finds that special circumstances pertaining to a student of exceptional financial need would render the application of the regular criteria inequitable.

Section 403 (allocation of funds to eligible institutions) would authorize the Commissioner to establish application procedures for allocation of funds appropriated for section 402. The allocation of funds to each eligible institution would reflect an estimate of the total amount of EOG's, work-study payments, and subsidies on loans for which the applying institution would be eligible.

The Commissioner would be authorized to reduce allocations to institutions if institutional estimates exceeded funds available for allocation; however, any such reduction would be made in a manner most likely to achieve an equitable geographical distribution of allocations and to preserve, to the fullest possible extent, payments to students with the lowest expected family contribution.

Section 404 (eligibility of students for cost of education loans and allocation of loan volume to institutions) would authorize the payment of subsidized loan to any student who:

(a) meets the eligibility requirement of section 405;

(b) has an expected family contribution of less than the loan eligibility limit; and

(c) needs financial assistance, in addition to any aid available to him under section 402, in order to meet the reasonable and necessary expenses at the institution which he is attending.

Such subsidized loans would be for an amount not to exceed the reasonable and necessary expenses of the institution, less any amount received under section 402, but in no case could such a loan be made for an amount greater than $1,500.

Subsection (b) of section 404 establishes the manner in which the aggregate dollar amount of loans is to be set for eligible institutions. The allocation to an institution would be based on the institutions's estimate of the dollar amount of loans for which students enrolled or accepted would be eligible, reduced ratably to reflect the amount of funds available for paying subsidies on loans.

Section 405 (recipients of financial assistance) would provide that a student may receive a grant, work-study payments, or a subsidized loan under title IV only if he had been accepted for enrollment as a full-time undergraduate or vocational student at an eligible institution or, in the case of a student already attending such an institution, is in good standing and in full-time attendance there as an undergraduate or vocational student.

In addition, the institution must determine that the student--

(a) shows capability of maintaining good standing in his course of study;

(b) meets the criteria for eligibility under which such assistance is to be made; and

(c) would not, but for such assistance, be financially able to pursue a course of study at such institution.

Section 406 (substitution of NDEA loans) would authorize making a loan under title II of the NDEA instead of a subsidized loan under Part A.

Section 407 (limitation) would limit the total amount of all funds received by a student under title IV in an academic year to the reasonable and necessary expenses incurred at the eligible institution.

Section 408 (eligible institutions) would define "eligible institutions" as follows for the purposes of Parts A and B:

(a) an institution of higher education as defined in section 435(b);

(b) a proprietary institution of higher education as defined in section 471(b); or

(c) a vocational school as defined in section 435(c) which is (1) a public school or institution in any State (other than a school or institution of any agency of the United States), or (2) a nonprofit school or institution in any State.

Section 409 (eligibility for assistance of students enrolled in institutions on date new programs became effective) would provide that students who are enrolled on the date of enactment of the Higher Education Facilities Act and are receiving assistance under Parts A or C (of Title IV HEA) or Title II NDEA (as in effect prior to the date of enactment) will be eligible for EOG's, work-study payments, or subsidized loans on a basis at least equivalent to that upon which they would have received assistance under such authorities.

If the enactment date falls on a date which is not part of an academic year with respect to a student (e.g. summer vacation) and the student received such assistance during the academic year ending prior to such date, similar protection would apply.

Section 410 (appropriations authorized) would authorize such sums as necessary for Fiscal Year 1972 and the next four fiscal years for payments under sections 402 and 404. Thereafter, such sums as necessary are authorized to enable the Commissioner to make payments with respect to subsidized loans made prior to July 1, 1976. Sums would remain available until expended.

Section 402. Conforming Amendment

Section 402 of the bill makes a conforming amendment to section 421(b)(2) of the HEA.

Section 403. New Part B

Section 403 of the bill would insert as Part B of title IV the following:

PART B--EDUCATIONAL OPPORTUNITY GRANTS AND WORK-STUDY PAYMENTS

Section 411 (educational opportunity grants) would authorize eligible institutions to award Educational Opportunity Grants to undergraduate or vocational students and would authorize eligible institutions to substitute an EOG in whole or in part in lieu of work-study payments.

Subsection (b) of section 411 would limit the award of Educational Opportunity Grants to a maximum of four academic years, except where:

(1) the course of study is leading to a first degree and is designed to extend for five years, or

(2) the student would be unable to complete the course of study in four years because of a requirement that he enroll in a noncredit remedial course of study.

In either case, an Educational Opportunity Grant may be awarded for one additional year.

"Noncredit remedial course of study" would be defined as a course of study for which no credit is given toward an academic degree, and which is designed to increase the ability of the student to engage in an undergraduate course of study leading to such a degree.

Subsection (c) of section 411 would limit payments of EOG's under Part B to periods during which the recipient:

(1) is maintaining satisfactory progress in his course of study, according to the regularly prescribed standards and practices of the institution from which he receives such grant; and

(2) is devoting essentially full-time to the course of study. Failure to be in attendance during vacation periods or periods of military service shall not be deemed contrary to this provision.

Section 412 (work-study programs) would authorize eligible institutions to pay for the part-time employment of their students through programs of work-study, in work for the institution itself (except for proprietary schools) or work in the public interest in a public or nonprofit private organization if such work:

(1) will not result in displacement of employed workers or impair existing contracts for services;

(2) will be governed by such conditions of employment as will be appropriate and reasonable in light of such factors as type of work performed, geographical region, and proficiency of the employee; and

(3) does not involve the construction, operation, or maintenance of so much of any facility as is used or to be used for sectarian instruction or as a place for religious worship.

Subsection (b) of section 412 would limit work-study employment to a maximum of an average of 15 hours per week during a semester during which classes in which the student is enrolled are in session. Periods during which the student is on vacation or any period of additional nonregular enrollment are to be excluded in computing the average. Employment under a work-study program during such periods shall be allowed only to the extent authorized by regulations issued by the Commissioner.

Section 413 (work-study benefits in lieu of grant assistance) would provide that the Commissioner may prescribe that a portion of the assistance that an eligible institution would otherwise make available in the form of EOG's may be made available as work-study payments. Subject to regulations, institutions may, at their election, make work-study payments available in whole or in part in lieu of EOG's.

Subsection (b) of section 413 would provide that such substitution may not be made unless--

(1) work-study payments are made on a basis which provides the student with net earnings from the Federal share of such payments equal to the amount of the Educational Opportunity Grants he would have received if such an election had not been made; and

(2) the criteria for making such elections are applied uniformly and are determined by the Commissioner to be consistent with such standards as he may prescribe by regulation.

Subsection (c) of section 413 would authorize a student who has been offered work-study instead of an EOG to elect to receive a subsidized loan under Part C, or a National Defense Student Loan, in the amount of the Federal share of the proffered work-study payments. If the student accepts such a loan, the amount allocated to the institution under section 403 would be adjusted in accordance with regulations of the Commissioner.

Section 414 (agreements with institutions) would prescribe the elements of an agreement which an eligible institution would have to make with the Commissioner in order to receive funds for EOG's or work-study payments. Such agreement would:

(1) provide that the funds received under Part B would be used in accordance with the provisions of Parts A and B;

(2) provide that institutions would conduct a program of Educational Opportunity Grants in accordance with section 411;

(3) provide that the institution will operate a program of work-study in accordance with sections 412 and 413, and that the Federal share of such payments will not exceed 80 percent (except as provided in (b) below).

(4) include procedures satisfactory to the Commissioner to assure that each student eligible for a subsidized loan (or NDSL) in accordance with section 402 will be able to obtain such a loan in the amount for which he is eligible, including provision for loans by the institution to students unable to obtain such loans readily from other eligible lenders;

(5) include, in the case of proprietary schools, assurances that the availability of assistance has not increased, and will not increase, the tuition, fees, and other charges to such students; and

(6) include such other provisions as the Commissioner deems necessary or appropriate.

Subsection (b) of section 414 would authorize a Federal share of work-study payments greater than 80 percent when the Commissioner determines by regulation that such a larger share is required in furtherance of Part B. The following are to be deemed in such furtherance:

(1) the work-study program of an eligible institution in which not less than 50 percent of the students are from low-income families;

(2) programs involving the counseling or tutoring of the educationally disadvantaged; or

(3) any project of community service with respect to which a limitation of 80 percent would impose unusual hardship on the eligible institution or the organization for which such project is performed; or

(4) payment of the non-Federal share would result in a student receiving funds in excess of the limitation imposed by section 407.

Section 415 (expenses of administration) in subsection (a) would authorize an institution which is receiving funds under section 403 to use three percent, or $125,000, whichever is lower, of the aggregate amount of EOG's and work-study payments for payment in lieu of reimbursement for administrative expenses.

Subsection (b) of section 415 would authorize the use of a portion of the sums received for administrative costs of demonstrating, or exploring the feasibility of, a program of cooperative education involving alternate periods of full-time study and full-time work.

Section 404. Effective Date

Section 404 of the bill would provide that amendments made by sections 401, 402, and 403 of the bill would become effective with respect to fiscal years which begin after June 30, 1971.

PART B--AMENDMENT TO STUDENT LOAN INSURANCE PROGRAM

Section 405. Interest Terms to Borrowers Eligible for Subsidized Loans; Secretary to Establish Maximum Interest Rates; Position of Eligible Institution As Eligible Lender Strengthened; Negotiability of Student Obligations

Section 405(a)(1) replaces section 428(a) of the HEA (pertaining to Federal payment of interest costs) with a new subsection (a).

In brief, this new subsection provides that any student who receives a loan after June 30, 1971 which is (1) insured by the Commissioner; (2) made under a State loan program meeting criteria prescribed by the Commissioner; or (3) is insured under a State or nonprofit private agency program, shall be entitled to have paid on his behalf, if he is eligble under Part A, an interest subsidy.

The subsidy shall be equal to:

(1) the total amount of interest which accrues prior to the beginning of the loan repayment period or which accrues when no principal payment need be made (military service, Peace Corps, etc); and

(2) the difference between the per annum interest rate on the unpaid balance of the loan and three percent of such unpaid balance for a period of ten years, beginning with the date the loan repayment commences.

Loan holders would be required to file information with the Commissioner to enable him to determine the amount of subsidy payable. Loan holders would be deemed to have a contractural right to receive interest payments authorized under this section.

No payment could be made under section 428 towards a loan made under Title II NDEA.

Subsection (b) of section 405 makes a conforming amendment to section 437.

Subsection (c)(1) of section 405 would amend section 427(b) to allow the Secretary to set the maximum rate of interest on guaranteed student loans at a rate not less than the average annual rate on all interest-bearing obligations of the United States forming a part of the public debt, as computed at the end of the fiscal year preceding the year for which such rates are prescribed. The Secretary is to consult with the Secretary of the Treasury and the National Student Loan Association.

Subsection (c)(2) makes a conforming amendment to 427(a)(2)(D).

Subsection (c)(3) makes a conforming amendment to 428(b)(1)(E).

Subsection (c)(4) makes a conforming amendment to 428(d)(1).

Subsection (d)(1) would amend section 423(a) to provide that the Commissioner shall not issue certificates of insurance under section 429, except with respect to loans by eligible institutions, when he determines that reasonable access to a State or private nonprofit loan insurance programs exist. This provision would strengthen the position of eligible institutions as eligible lenders by allowing these institutions to have loans insured by the Commissioner even if they are in an area otherwise covered by a State or nonprofit private loan insurance program.

Subsection (d)(2) would amend section 429(d) to allow assignment of rights arising under insurance evidenced by a certificate of insurance, subject to regulations of the Commissioner.

Section 406. Increase and Other Adjustments in Loan Ceilings

Section 406(a) of the bill would replace section 425 (pertaining to limitations on individual Federally insured loans and on Federal loan insurance) with a new section 425.

Subsection (a) of the new section 425 would limit the total amount of loans made to any student and eligible for insurance by the Commissioner to $2,500 per academic year less (1) any loan made to the student under a State loan program during such academic year or (2) any insured loan made by a State or nonprofit private agency or organization which has entered into an agreement with the Commissioner under 428(b) or (c). A student would be eligible to receive loans insured by the Commissioner for seven academic years less the number of academic years in which he has received loans described in the previous sentence.

Subsection (b) of the new section 425 would provide that, subject to the limitations in (a), the maximum amount of a loan on which an interest subsidy is payable under Part A shall be determined by the Secretary; and that the maximum amount of a loan to any student insured by the Commissioner is limited to the reasonable and necessary expenses incurred by the student (reasonable and necessary to be determined by institution). A student would be entitled to a statement from the eligible institution which shows the maximum loan and the estimate of reasonable and necessary expenses.

Subsection (c) of the new section 425 would provide that the insurance liability on any loan insured by the Commissioner is to be 100 percent of the unpaid balance of the principal, excluding any interest, except as specified elsewhere.

Subsection (b) of section 406 makes conforming amendments to sections 428(b)(1)(A), (B), and (H) to reflect changes made by the new section 425.

Section 407. Deferral of Interest and Principal Payments

Section 407(a)(1) would redesignate 427(a)(2)(E), (F) and (G) as (F), (G) and (H) and add a new clause (E) which would authorize a student borrower, with the agreement of the lender, to defer interest and principal payments for a period not to exceed five years. Deferred interest would accrue and be added to the principal on the date that repayment was to begin. Any insurance liability would be increased by the amount of the deferred accrued interest.

Subsections 407(a)(2) and (3) would make conforming amendments to 427(a)(2)(D) and (C) respectively.

Subsection 407(b)(1) would add a new clause (I) to 428(b)(1) which would provide that periodic repayment of interest and principal on loans need not be made, but interest would accrue, while the borrower:

(1) was pursuing a full-time course of study at an eligible institution;

(2) was in the Armed Forces of the United States (for a period not to exceed three years);

(3) was a Peace Corps volunteer (for a period not to exceed three years); or

(4) was a VISTA volunteer (for a period not to exceed three years).

Subsection (2) of section 407(b) would amend section 428(e) of the HEA by replacing it with a new (e) which would authorize the Commissioner to encourage the inclusion, in State or nonprofit private loan insurance programs, of provisions which would allow the borrower, if agreed to by the lender, to defer periodic repayment of interest and principal for a period not to exceed five years. Deferred interest would accrue and be added to the principal on the date that payments were to resume. Insurance liability and Federal guarantees would be increased accordingly.

Section 408. Extension of Permissible Repayment Period

Section 408(a)(1) would amend section 427(a)(2)(B) of the HEA to change the repayment period of loans. A student would be allowed to take twenty years to repay his loan, rather than the ten currently authorized. Payments would begin nine months after the borrower ceased to carry at least a half-time work load at an eligible institution. Periods of deferment authorized by law would not be counted in determining the twenty year period.

Subsections 408(b)(1) and (2) make conforming amendments to 428(b)(1)(D) and 428(b)(1)(C) respectively.

Section 409. Extension of Program and Repeal of Previous Federal Loan Insurance Ceiling

Section 409 would replace the current section 424 of the HEA with a new section which would limit Federal insurance of loans to loans made to students prior to July 1, 1976. After this date, such insurance could be granted only on loans made to students who had obtained prior loans. No insurance would be authorized for any loan made or installment paid after June 30, 1980.

Section 410. Repeal of Cancellation of National Defense Student Loans

Section 410 would amend section 205(b)(3) of the NDEA by repealing such section (providing for cancellation for teaching services and service in the Armed Forces).

Section 411. Eligibility for National Defense Student Loans

Section 411 would amend section 205(b) of the NDEA by providing that loans made from the NDSL fund shall be subject to such priorities as the Secretary may establish pursuant to title IV of the HEA.

Section 412. Authority to Maintain Student Loan Funds

Section 412 would amend section 206 of the NDEA to maintain the NDSL fund for an additional five years, through fiscal year 1980.

Section 413. Effective Date Applicable to Sections 405 Through 411

Section 413 would provide that sections 405-411 would be effective with respect to loans made or disbursed to students after June 30, 1971.

PART B--ESTABLISHMENT OF NATIONAL STUDENT LOAN ASSOCIATION

Section 420. New Part D

Section 420 of the bill would amend Part D of title IV of the HEA (Cooperative education program) replacing it with a new Part D--National Student Loan Association.

Section 441 (Declaration of purpose) of the new Part D would provide that it is the purpose of Part D to establish a private corporation financed by private capital to serve as a secondary market for student loans insured under Part C and to provide liquidity for those who make such loans.

Section 442 (creation of agency) would create a corporation known as the National Student Loan Association to remain in existence until dissolved by Act of Congress. The corporation would be deemed a resident of the District of Columbia for purposes of venue and civil actions.

Subsection (b) of section 442 would provide that the Association is to be exempt from State and local taxes, except that any real property may be taxed as other real property is taxed.

Section 443 (board of directors) in subsection (a) would provide for a 21-member Board of Directors.

Subsection (b) of section 443 would authorize the President to appoint an interim board of 21 members. Seven members would be representative of eligible lenders (other than eligible institutions) under Part C, seven of eligible institutions, and the remaining seven of the general public. The interim Board would arrange for the initial offering of common stock.

Subsection (c) of section 443 would authorize election of a permanent Board whenever, in the judgment of the President, sufficient common stock of the Association had been purchased. Holders of common stock which were eligible institutions would elect seven members, holders which were banks or other financial institutions would elect seven, and the President would

appoint the remaining seven. Members elected and appointed would elect a chairman. Thereafter the interim Board would turn over the affairs of the Association to the regular Board.

Subsection (e) of section 443 would provide for terms of office for Board members. Presidential appointees would serve at the pleasure of the President. Other members would be elected for a term ending on the date of the next annual meeting of the common stockholders. Appointive seat vacancies would be filled by the President; elective seat vacancies would be filled by the Board for the remainder of the term.

Subsection (f) of section 443 would provide that the Board shall meet at the call of the Chairman. The Board would determine general policies, while the Chairman, with the approval of the Board, would select, appoint, and compensate staff members authorized in bylaws. Such persons would discharge all executive functions, powers, and duties of the Association.

Section 444 (functions) would authorize the Association to make advances on the security of, or to purchase, service, sell, or otherwise deal in student loans made under Part C. Advances could not exceed 80 percent of the face amount of the loan; proceeds from any such advance would be invested in additional insured student loans.

Section 445 (common stock) would authorize common stock, with a par value of $100 per share. Each share of stock would have one vote, with rights of cumulative voting at all elections of directors.

Common stock would be transferrable only on the books of the Association. The Secretary would be authorized to prescribe the maximum number of shares to be issued and outstanding at any one time. Shares could be called for retirement at par at the option of the Association at any time.

The Directors would be authorized to declare dividends to the extent of net income earned and realized. Dividends would be paid to the holders of outstanding shares of common stock.

Section 446 (obligations) would authorize the Association, with the approval of the Secretary of the Treasury, to issue obligations having maturities and bearing such rates of interest as may be determined by the Secretary of the Treasury. Obligations would be redeemable before maturity at the option of the Association.

Subsection (b) of section 446 would authorize the Secretary of HEW to guarantee payment when due of principal and interest on such obligations.

Subsection (c) of section 446 would authorize the Secretary of HEW to issue notes or obligations to the Secretary of the Treasury in order to discharge his responsibilities under such guarantees. The Secretary of the Treasury would be authorized and directed to purchase such notes and could further sell any notes or obligations thus purchased. Such sums as necessary would be authorized to be appropriated to the Secretary of HEW to pay the principal and interest payments on such notes.

Section 447 (general authority) would give the Association authority--

(a) to sue and be sued, complain and defend, in its corporate name and through its own counsel;

(b) to adopt, alter, and use a corporate seal, which shall be judicially noticed;

(c) to adopt, amend, and repeal by its board of directors such bylaws, rules, and regulations as may be necessary for the conduct of its business;

(d) to conduct its business, carry on its operations, and have offices and exercise the authority granted by this part in any State without regard to any qualification or similar statute in any State;

(e) to lease, purchase, or otherwise acquire, own, hold, improve, use, or otherwise deal in and with any property, real, personal, or mixed, or any interest therein, wherever situated;

(f) to accept gifts or donations of services, or of property, real, personal, or mixed, tangible or intangible, in aid of any of the purposes of the Association;

(g) to sell, convey, mortgage, pledge, lease, exchange, and otherwise dispose of its property and assets;

(h) to appoint such officers, attorneys, employees, and agents as may be required, to determine their qualifications, to define their duties, to fix their salaries, to require bonds for them and fix the penalty thereof; and

(i) to enter into contracts, to execute instruments, to incur liabilities, and to do all things necessary or incidental to the proper management of its affairs and the proper conduct of its business.

Section 448 (audit) would require an audit of the Association's activities at least annually. Such audits would be conducted in accordance with generally accepted auditing standards by independent certified public accountants or by independent licensed public accountants, licensed on or before December 31, 1970, who were licensed or certified by a regulatory authority of a State or other political subdivision of the United States. Other persons who, in the opinion of the Secretary of HEW, met the standards of education and experience representative of the highest standards prescribed by the licensing authorities of the States which license CPA's could perform such audits until December 31, 1975. The Secretaries of HEW and the Treasury would receive copies of such audits.

Section 449 (obligations as lawful investments, acceptance as security) would classify all obligations issued by the Association as lawful investments. All stock and obligations issued by the Association would be deemed to be exempt securities within the meaning of the laws administered by the S.E.C. to the same extent as securities which are direct obligations of or obligations guaranteed as to principal or interest by the United States. The Association would be deemed to be an agency of the United States for the purposes of section 14(b)(2) of the Federal Reserve Act.

appoint the remaining seven. Members elected and appointed would elect a chairman. Thereafter the interim Board would turn over the affairs of the Association to the regular Board.

Subsection (e) of section 443 would provide for terms of office for Board members. Presidential appointees would serve at the pleasure of the President. Other members would be elected for a term ending on the date of the next annual meeting of the common stockholders. Appointive seat vacancies would be filled by the President; elective seat vacancies would be filled by the Board for the remainder of the term.

Subsection (f) of section 443 would provide that the Board shall meet at the call of the Chairman. The Board would determine general policies, while the Chairman, with the approval of the Board, would select, appoint, and compensate staff members authorized in bylaws. Such persons would discharge all executive functions, powers, and duties of the Association.

Section 444 (functions) would authorize the Association to make advances on the security of, or to purchase, service, sell, or otherwise deal in student loans made under Part C. Advances could not exceed 80 percent of the face amount of the loan; proceeds from any such advance would be invested in additional insured student loans.

Section 445 (common stock) would authorize common stock, with a par value of $100 per share. Each share of stock would have one vote, with rights of cumulative voting at all elections of directors.

Common stock would be transferrable only on the books of the Association. The Secretary would be authorized to prescribe the maximum number of shares to be issued and outstanding at any one time. Shares could be called for retirement at par at the option of the Association at any time.

The Directors would be authorized to declare dividends to the extent of net income earned and realized. Dividends would be paid to the holders of outstanding shares of common stock.

Section 446 (obligations) would authorize the Association, with the approval of the Secretary of the Treasury, to issue obligations having maturities and bearing such rates of interest as may be determined by the Secretary of the Treasury. Obligations would be redeemable before maturity at the option of the Association.

Subsection (b) of section 446 would authorize the Secretary of HEW to guarantee payment when due of principal and interest on such obligations.

Subsection (c) of section 446 would authorize the Secretary of HEW to issue notes or obligations to the Secretary of the Treasury in order to discharge his responsibilities under such guarantees. The Secretary of the Treasury would be authorized and directed to purchase such notes and could further sell any notes or obligations thus purchased. Such sums as necessary would be authorized to be appropriated to the Secretary of HEW to pay the principal and interest payments on such notes.

Section 450 (preparation of obligations) would authorize the Secretary of the Treasury to prepare obligations for the Association. The Association would reimburse Treasury for such expenses.

Section 451 (annual report) would require the Association to transmit an annual report to the President and Congress as soon as practicable after the end of each fiscal year.

Section 452 (separability) provides for the separability of the remainder of Part D if any section is held invalid.

Section 453 (interim financing arrangements for student loans) would authorize the Secretary of HEW to purchase subsidized loans from eligible institutions at 100 percent of unpaid principal and accrued interest until such time as the Association is able to purchase these loans. The Secretary would also be directed to advance funds to eligible institutions against future purchases of such loans where, in his judgment, such funds are needed for the making of loans.

Finally, the Secretary could enter into agreements with such institutions from which he has purchased such loans under which agreement the institution would continue to perform administrative functions with respect to the loans purchased by the Secretary and be reimbursed for the cost of such services.

Section 454 (authorization of appropriations) would authorize such sums as are necessary to carry out section 453.

Section 455 (termination of interim financing arrangement) would provide that, at such time as the Association is able to purchase student loans insured under Part C, the Association shall purchase from the Secretary those loans which he acquired under section 453(a). These loans would be purchased by the Association on such terms as the Board of Directors determined; and the Association could not deal in any other student loans until all of these loans had been purchased.

Section 456 (purchase of obligations by the Treasury) would authorize the Secretary of the Treasury to purchase obligations issued by the Association under section 446(a). For such purpose he would be authorized to use as a public debt transaction the proceeds from the sale of securities issued under the Second Liberty Band Act. The aggregate total amount of such purchases would be limited to $250,000,000. The Secretary of the Treasury would be authorized to sell any such obligations purchased; such sales would be treated as public debt transactions of the United States.

Section 421. Amendments Relating to Financial Institutions

Section 421 makes conforming amendments to 12 U.S.C. 24, 12 U.S.C. 84, 12 U.S.C. 1464(c) and 12 U.S.C. 1757(8)(E) to provide for obligations of the Association.

Section 422. Inapplicability of Truth In Lending Act

Section 422 would amend section 104 of the Truth in Lending Act (15 U.S.C. 1603) to make such act inapplicable to loans made under title II NDEA and title IV HEA. Insured loans are made on Federally prescribed teams; consequently, the paperwork burden involved for lenders in complying with the Truth In Lending Act is not justified, since it does not serve to further protect the student borrower.

Section 423. Effective Date

Section 423 would make the effective date of sections 420, 421, and 422 of the bill effective with respect to fiscal years beginning after June 30, 1971.

PART C--CONSOLIDATION OF SPECIAL SERVICES PROGRAMS

Section 430. New Part E

Section 430 of the bill amends Title IV of the HEA by adding a new Part E entitled "Identifying Qualified Low-Income Students; Preparing Them for Postsecondary Education; Special Services for Such Students in Institutions of Higher Education".

Section 461 of the new Part E provides for a consolidation of Upward Bound, Talent Search, and Special Services for Disadvantaged Students. These programs are currently authorized under section 408 of the Higher Education Act.

Subsection (a) of section 461 authorizes the Commissioner to make grants to, or contracts with, institutions of higher education, including institutions with vocational and career education programs, combinations of such institutions, public and private agencies and organizations (including professional and scholarly associations), and in exceptional cases secondary schools and secondary vocational schools. Such funds are to be used for planning, developing, or carrying out within States one or more of the activities described in (c) below. No grant may be made to a profit-making organization.

Subsection (b) of section 461 states that services shall be designed to enable youths from low-income backgrounds who have academic potential (but may lack adequate secondary school preparation or be physically handicapped) to enter, continue or resume a program of postsecondary education.

Subsection (c) of section 461 describes the services referred to, including such activities as:

(1) publicizing existing forms of student financial aid;

(2) identifying youths described in subsection (b) and encouraging them to complete secondary school and to undertake postsecondary education;

(3) encouraging youths who have dropped out of secondary school or college to reenter educational programs, including programs of postsecondary education;

(4) generating skills and motivation necessary for success in education beyond high school;

(5) providing counseling, tutorial, or other educational services, including special summer programs, to remedy academic deficiencies;

(6) providing career guidance, placement, or other student personnel services (including health services);

(7) identifying, encouraging, and counseling students with a view to their undertaking a program of graduate or professional education; and

(8) providing other special or supplemental services necessary to achieve the purposes set forth in subsection (b).

Subsection (d) of section 461 provides that enrollees who are participating on an essentially full-time basis in one or more of the services described in (c) above may be paid stipends, but not in excess of $30 per month, except in exceptional cases as determined by the Commissioner.

Subsection (e) of section 461 authorizes such sums as may be necessary for fiscal year 1972 and each of the four succeeding years to carry out the purposes of Part E.

Section 431. Effective Date

Section 431 of the bill provides that amendments made by section 430 of the bill shall be effective with respect to fiscal years beginning after June 30, 1971.

TITLE V--AMENDMENTS TO TITLE V OF HIGHER EDUCATION ACT
(EDUCATION PROFESSIONS DEVELOPMENT ACT)

PART A--AMENDMENTS TO PART A OF TITLE V

Section 501. Extension of National Advisory Council on Education Professions Development and Program for Attracting Qualified Personnel to the Field of Education

Subsection (a) of section 501 extends the authorization for the National Advisory Council on Education Professions Development for five more years, through fiscal year 1976, at the level of $200,000 per year.

Subsection (b) of section 501 extends the authorization for programs under Part A (Attracting Qualified Persons to the Field of Education) for five additional years, through fiscal year 1976, at such sums as may be necessary.

PART B--AMENDMENTS TO SUBPART I OF PART B (TEACHER CORPS)

Section 510. Extension of Program

Section 510 amends section 511(b) of the Higher Education Act to extend the authorization for the Teacher Corps for five years, through fiscal year 1976, at such sums as may be necessary.

60-433 O - 71 - pt. 1 -- 21

PART C--AMENDMENTS TO SUBPART 2 OF PART B (ATTRACTING AND QUALIFYING TEACHERS TO MEET CRITICAL TEACHER SHORTAGES)

Section 520. Extension of Programs

Section 520 amends section 518(b) of the Higher Education Act to extend the program for attracting and qualifying teachers to meet critical teacher shortages for five years, through fiscal year 1976 at such sums as may be necessary.

Section 521. Retraining of Teachers and Employment of Tutors and Instructional Assistants

Section 521 amends section 518(a) of the Higher Education Act by adding two new programs under the authority for attracting and qualifying teachers to meet critical teacher shortages: (1) programs to employ high school and college students as tutors or instructional assistants for educationally disadvantaged children. (The Commissioner of Education is authorized to determine compensation rates for such persons, consistent with comparable federally-supported work-study programs); and (2) to provide necessary training to teachers to enable them to teach other grades or other subjects in which shortages exist.

Section 522. Reducing Minimum Allotment

Section 522 would amend section 519(a) of the HEA to reduce the minimum State allotment under subpart 2 from $100,000 to $50,000.

Section 523. Conforming Amendments and Increase in Amount Available for Administration

Section 523 amends section 520(a)(2) and 520(a)(3) to make conforming amendments (adding the items described in 521 above as eligible items of expenditure in the State plan). It also raises the maximum amount which a State may spend for administration of the State plan from 3 percent of the State's allocation to 5 percent or $20,000, whichever is greater.

Section 524. Eliminating Ceiling on Amount for Aides

Section 524 amends section 520(a) of the HEA by eliminating paragraph (5) which limits the amount of funds available for hiring and training teacher aides to one-third of funds appropriated for Part B(2) of the Education Professions Development Act. This section also amends paragraph (6) to provide that no person will be denied admission to training programs under subpart 2 because he is teaching or serving as a teacher aide in a private school.

PART D--AMENDMENTS TO PART D--IMPROVING TRAINING OPPORTUNITIES FOR NON-HIGHER EDUCATION PERSONNEL

Section 530. Extension of Program

Section 530 amends section 532 of the Higher Education Act by extending authorization for Part D for five years, through fiscal year 1976, at such sums as may be necessary.

Section 531 and 532. Support of Tutors and Instructional Assistants

Section 531 amends section 531(b) of the Higher Education Act by adding a new paragraph (11) to the list of eligible programs. Paragraph (11) authorizes programs or projects designed to employ tutors or instructional assistants in preschool, elementary, and secondary school classes, especially for educationally disadvantaged children.

Section 532 amends section 531(c) of the Higher Education Act to allow use of funds to pay tutors and instructional assistants at such rates as the Commissioner may determine to be comparable to compensation rates in Federally-supported work-study programs.

Sections 533 and 534. Developing and Strengthening Programs for the Education of Teachers and Related Educational Personnel

Section 533 amends section 531(b) by adding a new paragraph (12) to the list of eligible programs. Paragraph (12) describes programs designed to aid undergraduate programs designed to prepare educational personnel. Such programs would include exemplary undergraduate training programs, the introduction of high quality curricula, and provision of increased opportunities for practice teaching experience for prospective elementary and secondary school teachers.

Section 534 amends section 531(c) of the Higher Education Act to allow the use of funds to pay for programs to develop, expand, or improve undergraduate and other programs for training educational personnel.

Section 535. Application of Part D to Indian Schools

Section 535 amends section 532 of the Higher Education Act to add a new subsection (b) to provide that Part D funds may be used to support the preparation of teachers of children on Indian Reservations serviced by the Bureau of Indian Affairs schools and schools supported by the BIA. Payments are to be made to the Secretary of the Interior to carry out such programs.

PART E--CONSOLIDATION OF TITLE IV OF THE NATIONAL DEFENSE EDUCATION ACT OF 1958 WITH PART E OF TITLE V OF THE HIGHER EDUCATION ACT OF 1965 (EDUCATION PROFESSIONS DEVELOPMENT ACT)

Section 540. Extension of Program

Section 540 amends section 543 of the Higher Education Act by extending the authorization for Part E for five years, through Fiscal Year 1976, at such sums as may be necessary.

Section 541. Broadening Class of Institutions for Which Personnel May be Trained

Section 541 amends section 541(a) by changing the eligible class of grantees and contractors under Part E from "institutions of higher education" to "postsecondary institutions".

Subsection (b) of section 541 amends section 541 (b) of the Higher Education Act by repealing the prohibition against using Part E funds for fellowships which are eligible for support under title IV of the National Defense Education Act of 1958.

Section 542. Provision for Institutional Allowance

Section 542 amends section 542 of the Higher Education Act by adding a new subsection (b) which provides that the Commissioner of Education may pay eligible institutions which award stipends under section 542(a) an institutional allowance consistent with prevailing practices under comparable federally-supported programs, but in no case more than $3,500 per academic year for each person receiving such a stipend.

Section 543. Savings Provision

Section 543 provides that effective July 1, 1971, title IV of the National Defense Education Act is repealed. In the case of a fellowship awarded under title IV, NDEA, for which initial payment was made or was to be made from appropriations for any fiscal year ending before July 1, 1971, payments are to be made for periods after June 30, 1971, from appropriations for Part E, title V of the HEA, but under the terms and conditions of title IV, NDEA.

PART F--AMENDMENT TO PART F--TRAINING AND DEVELOPMENT OF VOCATIONAL EDUCATION PERSONNEL

Section 550. Extension of Program

Section 550 amends section 555 of the Higher Education Act by extending authorizations for Part F through fiscal year 1976 at such sums as may be necessary.

Section 551. Effective Date

Section 551 provides that, except where otherwise expressly provided, amendments made by title V of the bill are to be effective with respect to fiscal years beginning after June 30, 1971.

TITLE VI--REPEAL OF TITLES VI, VIII, IX, X, AND XI
OF THE HIGHER EDUCATION ACT

Section 601 repeals Title VI (Improving Undergraduate Instruction), Title VIII (Networks for Knowledge), Title IX (Education for the Public Service), Title X (Improvement of graduate programs) and Title XI (Law School Clinical Programs) effective July 1, 1971.

TITLE VII--AMENDMENTS TO GENERAL PROVISIONS

Section 701. Redesignation of Title XII
(General Provisions)

Section 701 of the bill redesignates title XII of the Higher Education Act as title VIII and renumbers sections accordingly.

Subsection (b) of section 701 amends title VIII, as redesignated, by inserting a new section 811 providing for uniform application requirements applicable to applications under titles II, III, and V submitted to the Commissioner by an institution of higher education or other eligible applicant. Such an application would be required to contain assurances satisfactory to the Commissioner with respect to maintenance of effort, fiscal control and fund account procedures, evaluation and dissemination procedures, and reporting requirements.

Section 702. Effective Date

Section 702 makes the amendments made by section 701 effective July 1, 1971.

TITLE VIII--AMENDMENTS TO HIGHER EDUCATION FACILITIES ACT

Section 801. Extension of Program

Section 801 amends the following sections:

(a) Section 101(b) of the Higher Education Facilities Act is amended to extend the authorization for grants for construction of academic facilities under title I through fiscal year 1973 at such sums as may be necessary;

(b) Section 105(b) of the Higher Education Facilities Act is amended to extend the authorization for expenditures under section 105(b) (State plan administration and comprehensive planning) through 1973 at such sums as may be necessary;

(c) Section 201 of the Higher Education Facilities Act is amended to extend the authorizations for grants under title II (Construction of Graduate Academic Facilities) through fiscal year 1973 at such sums as are necessary;

(d) Section 303(c) of the Higher Education Facilities Act is amended to extend authorization for payments into the loan fund under title III (Loans for Construction of Academic Facilities) through fiscal year 1973 at such sums as are necessary;

(e) Section 306(c) of the Higher Education Facilities Act is amended to extend the ceiling for contracts for interest grants at $18,500,000 through fiscal year 1973.

(f) Section 408(a) of the Higher Education Facilities Act is amended to extend the authority of the Commissioner to provide assistance under section 408 (Higher Education Facilities Construction Assistance in Major Disaster Areas) through fiscal year 1973.

Section 802. New Program of Insured Loans for Construction of Nonprofit Private Academic Facilities

Section 802 amends title III of the Higher Education Facilities Act by inserting after section 306 the following new sections 307-309.

Section 307 (academic facilities loan insurance) of the revised Title III authorizes the Commissioner to insure (up to 90 percent of the principal) the payment of interest and principal on loans made by nonprofit private institutions of higher education and nonprofit private higher education building agencies for the purpose of constructing academic facilities. Such institutions or agencies would have to meet the criteria prescribed by, and under section 306 of the HEFA.

Section 308 (right of recovery and incontestable nature of insurance) in subsection (a) provides that the United States shall be entitled to recover from any institution of higher education or agency to which loan insurance has been issued under section 307 the amount of any payment made pursuant to such insurance, unless the Commissioner waives this right.

Subsection (b) of section 308 states that any insurance issued under section 307 shall be incontestable in the hands of the institution or agency on whose behalf such insurance is issued, and as to any agency, organization, or person who makes or contracts to make a loan to such institution or agency in reliance thereon, except in the case of fraud or misrepresentation.

Section 309 (conditions) provides that the Commissioner may issue insurance under section 307 only if he determines that all aspects of the loan are sufficient to protect the financial interests of the United States and are in accordance with regulations. Such determination shall include a finding that the interest rate on any such loan is reasonable. The Commissioner would be authorized to charge reasonable premiums for such insurance to cover administrative expenses and probable losses under sections 307 and 308. The insurance would be subject to such further terms and conditions as the Commissioner determines to be necessary.

Section 803. Making Revolving Loan Fund Available for Loan Insurance

Section 803 of the bill makes amendments to section 305 of the HEFA which would allow the use of funds in the HEFA revolving fund to insure loans as well as to make direct loans.

Section 804. Effective Date

Section 804 makes amendments made by sections 801 and 802 effective July 1, 1971. Amendments made by section 803 are to be effective as if enacted on the date of enactment of section 305 of the HEFA.

TITLE IX--EXTENSION OF PROGRAM UNDER TITLE VI OF THE NATIONAL DEFENSE EDUCATION ACT

Section 901. Extension of Program

Section 901 amends section 601 by extending the authorization for activities under title VI for two fiscal years, through fiscal year 1973. Section 603 is amended to extend the authorization for appropriations for two fiscal years, through fiscal year 1973, at such sums as may be necessary.

Section 902. Effective Date

Section 902 makes the amendments made by section 901 effective July 1, 1971.

TITLE X --NONDISCRIMINATION ON THE GROUND OF SEX IN FEDERALLY ASSISTED EDUCATION PROGRAMS

Section 1001. Discrimination Prohibited

Section 1001 of the bill in subsection (a) provides that no person in the United States shall, on the ground of sex, be discriminated against by a recipient of Federal financial assistance for any educational program or activity. This language does not, however, preclude differential treatment based upon sex where sex is a bona fide ground for such differential treatment.

Subsection (b) of section 1001 provides that no recipient of Federal financial assistance for an education program or activity shall, because of an individual's sex,

(1) fail or refuse to hire (except in instances where sex is a bona fide occupational qualification) or discharge that individual, or otherwise discriminate against him or her with respect to compensation, terms, conditions, or privileges of employment; or

(2) limit, segregate, or classify employees in any way which would deprive or tend to deprive that individual of employment opportunities or otherwise adversely affect his or her status as an employee.

Section 1002. Enforcement

Section 1002 in subsection (a) authorizes and directs each Federal department and agency which is empowered to extend Federal financial assistance in any form (other than a contract of insurance or guaranty) to any education program or activity to issue rules, regulations, or orders to effectuate section 1001. No rule, regulation or order is to take effect until approved by the President.

Subsection (b) of section 1002 provides that compliance with any requirement adopted pursuant to subsection (a) may be effected by (1) termination of or refusal to grant to or to continue assistance to any recipient who fails to comply with such requirement (after a hearing and an express finding on the record), such termination or refusal to be limited to the particular political entity or part thereof, or other recipient as to whom such finding has been made, or (2) by any other means authorized by law. No action is to be taken until the appropriate person or persons has been notified of the violation and it has been determined that voluntary compliance cannot be secured.

Subsection (c) of section 1002 provides that, in the case of any action to terminate, the head of the Federal department or agency shall file with the committees of the House and Senate having legislative jurisdiction over the program or activity involved a full written report of the circumstances and the grounds for such action. No action is to become effective until thirty days from the filing of such report.

Section 1003. Judicial Review

Section 1003 provides that any department or agency action taken pursuant to section 1002 shall be subject to such judicial review as may otherwise be provided by law for similar action taken by such department or agency on other grounds. In the case of action, not otherwise subject to judicial review, terminating or refusing to grant or to continue financial assistance upon a finding of failure to comply with any requirement imposed pursuant to section 1002, any person aggrieved (including any State or political subdivision thereof and any agency of either) may obtain judicial review of such action in accordance with chapter 7 of title 5, U.S.C., and such action shall not be deemed committed to unreviewable agency discretion within the meaning of the chapter.

Section 1004. Preservation of Existing Authority

Section 1004 provides that nothing in title X shall add to or detract from any existing authority with respect to any education program or activity

under which Federal financial assistance is extended by way of a contract of insurance or guaranty.

Section 1005. Definition

Section 1005 defines "education" for the purposes of title X as including preschool, elementary, secondary and postsecondary education.

FACT SHEET

HIGHER EDUCATION OPPORTUNITY ACT OF 1971
(Excluding Student Financial Aid Programs)

Department of Health,
Education, and Welfare
February, 1971

FACT SHEET

HIGHER EDUCATION OPPORTUNITY ACT OF 1971

(Excluding Student Financial Assistance Provisions)

The following is a brief synopsis of the major provisions of the Higher Education Opportunity Act of 1971, excluding the provisions of Title IV relating to student financial assistance.

Title I

Title I of the HEOA extends existing community service and continuing education programs under Title I of the Higher Education Act for two years, through June 30, 1973.

Title II

Title II extends and amends the library programs contained in Title II of the HEA. At present there are three types of grants made under Title II--basic, supplemental, and special purpose grants. The bill would change the percentage of funds appropriated for Part A which would be available for each of these types of grants. Basic and supplemental grants would be reduced from 75 to 50 percent of the sums appropriated for Part A. The remaining 50 percent would be available for making special purpose grants. Grants under Part A are extended for two years, through June 30, 1973.

The research and demonstration provisions of Part B are repealed since they duplicate authority which already exists under the Cooperative Research Act. The librarian training authority in Part B is moved to a new Part G in Title V of the HEA (the Education Professions Development Act).

Part C, authorizing transfer of funds to the Library of Congress for the Library's use in acquiring valuable materials and in preparing cataloging

information, is repealed. These activities will be funded from Library of Congress appropriations.

Title III

Title III extends programs for Strengthening Developing Institutions under Title III of the HEA for five years, through June 30, 1976. Technical amendments clarify the requirements for participation of institutions which offer less than the bachelor's degree and provide that Professors Emeritus may come from the developing institutions themselves, as well as from stronger and more recognized colleges and universities.

Title IV

Title IV contains amendments to student financial aid programs.

Title V

Title V amends and extends programs dealing with the training of educators authorized by the Education Professions Development Act (Title V HEA). The provisions of Title V are:

Part A extends the authorization for the National Advisory Council on Education Professions Development for five years, through June 30, 1976, and also extends for five years the authorization for the program for attracting qualified persons to the field of education.

Part B extends the authorization for the Teacher Corps for five years, through June 30, 1976.

Part C amends the program for attracting and qualifying teachers to alleviate teacher shortages by encouraging high school and college students to serve as tutors or instructional assistants for educationally disadvantaged children. The amendments provide for compensation of these persons.

Authority is also added to provide necessary training to teachers to enable them to teach other grades or other subjects in which teacher shortages exist

The basic program itself is extended for five years, through June 30, 1976. This part also increased the amount available for administration of the State Plan from three percent to five percent or $20,000, whichever is greater, and eliminates the provision requiring that no more than one-third of the funds under this section shall be used for teacher aides.

Finally, the minimum State allotment under B(2) is reduced from $100,000 to $50,000.

Part D extends the authorization for the program of improving training opportunities for personnel serving in programs of education other than higher education for five years, through June 30, 1976, and amends it to provide for projects to encourage persons to serve as tutors in preschool, elementary, and secondary school classes, especially for disadvantaged children. In addition, Part D provides for compensation for these persons.

This part would also provide for programs for the development, expansion, or improvement of undergraduate programs for preparing educational personnel and for practice teaching experiences for prospective teachers in elementary and secondary schools.

Finally, Part D amends the training program by permitting the Commissioner to make payments to the Secretary of the Interior to carry out the program with respect to persons who are preparing to serve as teachers in schools operated on Indian reservations by the Department of Interior.

Part E consolidates the Title IV NDEA fellowship programs with Part E of the Education Professions Development Act and extends Part E for five years, through June 30, 1976. Provisions are included to insure that no student will receive less under the consolidated authority than he is currently receiving.

Part F extends the training program for vocational education personnel through June 30, 1976.

Title VI

Title VI repeals the following titles of the HEA: Title VI (Improvement of Undergraduate Instruction); Title VIII (Networks for Knowledge); Title IX (Education for the Public Service); Title X (Improvement of Graduate Programs); and Title XI (Law School Clinical Programs). The proposed National Foundation for Higher Education would have authority to fund similar activities in several of these areas.

Title VII

Title VII amends Title XII (general provisions) of the HEA by redesignating it as Title VIII and by adding a new section which would standardize assurances which applicants for aid under Titles II, III, and V must make to the Commissioner. These standardized assurances include maintenance of effort, fiscal control and fund accounting procedures, evaluation and dissemination procedures, and reporting requirements.

Title VIII

Title VIII extends the Higher Education Facilities Act through June 30, 1973. In addition, it adds a new program for Federal insurance of loans for the construction of academic facilities at private nonprofit institutions of higher education. Loans may be made either to the institutions or to nonprofit private higher education building agencies.

Title IX

Title IX extends Title VI of the National Defense Education Act (language development) for two years, through June 30, 1973.

Title X

Title X adds a new title which would prohibit discrimination on the basis of sex in any federally assisted education program, except where sex is a bona fide ground for differential treatment. The title provides that compliance may be effected by termination of grants to any recipient who fails to comply with this requirement. Provisions for adequate hearings, findings and judicial review are also included.

Foreword

> No qualified student who wants to go to college should be barred by lack of money

This is the opening sentence in President Nixon's 1970 message on higher education. It expresses both the purpose and the theme of the Administration's proposal to improve and expand existing student aid programs.

The President's proposed changes in student financial aid programs would, for the first time in history, guarantee that every qualified student from a low-income family would have sufficient resources to attend college. Under the proposal, grants, work-study payments and subsidized loans will supplement what the families of low income students can afford to contribute to the post-secondary education of their sons and daughters.

The President's proposals will also increase the amount of unsubsidized loan funds available to students at all income levels. This improved access to federally-guaranteed loans will assist millions of undergraduate and graduate students to finance their educations.

Present Programs: Description and Problems

The Office of Education presently administers four major programs for aiding students: Educational Opportunity Grants, the College Work-Study program, National Defense Student Loans and Guaranteed Loans.

The first three programs are mainly funded by the Federal Government and administered by colleges and universities. The amount of funds available to the institution for these programs depends on the total funds appropriated by Congress, State distribution formulas and the approval of regional review panels. Once the college has its various allocations, the student aid office determines what mix of grants, work-study payments and loans is appropriate for each individual eligible student.

Commercial lending institutions, primarily banks, operate the Guaranteed Loan programs. Loans are made to students at a maximum interest rate of 7 percent. The Federal Government guarantees the loans against default, pays the student's interest while he is in college and makes a special payment to banks during tight money conditions.

There are several problems with this system of student aid:

- Availability of funds — Students do not receive all the aid for which they are eligible under the present system. Allocation formulas, matching requirements and insufficient funds limit the aid which institutions can award to individual students. Colleges enrolling large numbers of disadvantaged students are in an especially difficult position because of the matching requirements.

- Limited loan funds -- Existing loan programs provide an inadequate volume of lendable funds because (a) the National Defense Student Loan program requires capital outlays from the Federal budget which has been under severe fiscal pressures and restraints for the last several years; and (b) students must compete with other borrowers (who often offer more profitable investment opportunities) for the lendable funds of banks under the Guaranteed Loan program. (Low-income students with poor bank connections sometimes find themselves at a particular disadvantage.)

- Open-ended expenditures -- The Federal Government is obligated to meet its commitment to pay the interest on Guaranteed Loans while students are in college. As interest rates rise, and as more and more middle and upper income families find it in their interest to take advantage of these subsidies, a larger and larger share of Federal funds for student aid is being diverted away from the most needy students. The system as a whole has a built-in tendency to become less progressive as these subsidies absorb a disproportionate part of any budget increase for student aid.

- Uncertainty -- A student who wants to go to college cannot tell where he can get aid or how much he can count on in advance of his admission and the particular student aid office determination. Nor can a bank assure the student in advance that it will have funds to lend to him.

- Inequitable distribution -- Federal funds do not necessarily go to those students who need them most. Moreover, different colleges assess need in different ways. Substantial subsidies go to middle and upper income students, especially under the Guaranteed Loan program.

Proposed Programs: Purposes

The Administration's improvements in the existing student aid programs have four major purposes:

--To assure the availability of funds to every qualified student.

--To assure that Federal funds go first, and in the largest amounts, to the students who need them most.

--To provide potential students with as accurate information as possible concerning the aid they can expect.

--To assure that all students of equal need are treated alike.

--To provide additional financial aid to students attending high cost institutions.

Proposed Program: Concept and Structure

The Administration is recommending a coordinated student aid system with two parts: (a) a combination of grants, work-study payments and subsidized loans for full-time undergraduate students with low to middle incomes attending public and non-profit postsecondary educational institutions as well as proprietary institutions of higher education; and (b) creation of a National Student Loan Association to raise money privately and make it available for all postsecondary students at all income levels.

A. Grants, work-study payments, subsidized loans

The basic concept is that all students whose families can be expected to make the same contribution should have the same help available for their education from Federal sources. The combination of family contributions plus Federal grants, work-study payments and subsidized loans would be enough to enable any student to meet minimum education expenses. The key determinant is family income (and, thus, family contribution). Students from lower income families would receive more Federal aid than students from higher income families. (Lower income students would also receive a larger proportion of their aid in the form of grants and work-study payments rather than in the form of subsidized loans.) But the total resources available (i.e., family contribution plus Federal aid) to students at different income levels would be made equivalent.

The system would work as follows. Each year the Secretary of HEW, after conferring with the Advisory Council on Financial Aid to Students, would publish a schedule indicating the amount of Federal funds available to students at different income levels. Each student's eligibility for aid would be calculated by determining the expected family contribution toward his educational costs. This determination would take into account such factors as the size of the family, the number of children in college, extraordinary family expenses and capital assets. The deficiency between expected family contribution and the amount of resources the student should have available to him would be met by a combination of grants, work-study payments and subsidized loans.

For example, under the Administration's fiscal 1972 budget proposals, students from families with adjusted family income of $10,000 or less, and with two children, one of whom is in college, would be eligible for Federal funds. The maximum total amount of subsidized aid (grant and work-study plus subsidized loan) available to any one student would be $1,400. The maximum grant available to any one student would be $1,000. In addition to these base amounts, students who (1) meet the eligibility criteria for subsidized aid, and (2) attend schools with annual average cost in excess of $1,400 would be eligible to

apply for an additional subsidized "cost of education" loan of up to $1,500. This program would be controlled by schools in a manner similar to the present NDEA loan programs and terms to students would be approximately the same as those governing present NDEA loans. The amounts of aid to be available at different income levels for the two-child family described previously as well as one with five children, two of whom are in school, under the funding levels contemplated by the Administration's proposals are illustrated in Attachment I.

Several others features of the proposal deserve mention:

- All aid from State and private student aid programs would be in addition to Federal aid, and would permit students eligible for it a wide choice of the type of institution they attend.

- A "grandfather" clause would assure that students receiving aid under the present program would receive no less under the new system than they were entitled to under the old one.

- Institutions of higher education would preserve the option, within national limits set by the Commissioner of Education, of determining the mix of grants and work-study payments appropriate to the individual student.

- The National Defense Student Loan Revolving Fund (currently about $140 million) would continue in its present form, except that no new Federal appropriations would be made to the fund. Loans would continue to be made in a manner similar to current NDSL's; however, cancellations for teaching, military service, Peace Corps service, etc. would be eliminated for new loans.

  Loans from this fund would go first to students eligible under the "grandfather clause" in the bill; remaining funds would be used to provide subsidized loans under the Higher Education Opportunity Act.

- Students attending proprietary institutions of higher education would be made eligible for all benefits.

Finally, these proposals would not alter the valuable features of existing programs.

- Educational Opportunity Grants would continue as the basic grant program but without matching requirements.

- The College Work-Study program would continue. Colleges would continue to match work-study funds provided by the Federal Government (one dollar for four) but this requirement would be waived for institutions or work programs which it would hamper.

- National Defense Student Loan benefits would continue under the same terms and conditions as at present for both of the subsidized loan programs discussed above. However, lendable capital would come from the private money markets rather than the Federal Budget.

B. National Student Loan Association

The purpose of the proposed National Student Loan Association (NSLA) is to increase the amount of resources available for loans (both subsidized and unsubsidized) to all students at all income levels.

NSLA would be a private corporation, chartered and established by the Federal Government. It would raise funds by issuing its own obligations for sale in private capital markets. These obligations would be guaranteed against default by the Government, allowing the NSLA to pay a lower rate of interest.

With the proceeds from its sales, NSLA would buy, sell, or warehouse (buy under the condition that the seller will repurchase, i.e., NSLA "stores" the loans) student loan paper from colleges, banks or other eligible lenders. Typically, a college without funds of its own to invest in student loans would make a loan to a student and then turn immediately to NSLA to sell the student's note. NSLA would pay enough for the note to restore the college's cash position.

NSLA would significantly increase the flow of funds into student loan markets. Both banks and colleges would be encouraged to do more student lending. It is estimated that NSLA may buy up to $2 billion worth of loans in its first year of operation.

The Guaranteed Loan Program would continue to be open to all college students, however high their family incomes. However, some changes would be made in the program. First, the 7 percent interest ceiling would be eliminated. Second, the interest subsidy paid by the Federal Government on student loans to above average income students while they are in college and the special allowance paid to banks would be eliminated. Thus, it would now be an unsubsidized loan program except for students meeting a test of need.

Several other features applicable to both subsidized and unsubsidized loans are of significance:

- Banks and other financial institutions would make both kinds of loans.

- Loan ceilings would be raised and would apply to the aggregate of both subsidized and unsubsidized loans. A student could borrow up to $2,500 a year for up to seven years.

- The length of the maximum permissible loan repayment period would be increased to twenty years from the present ten.

- Student borrowers would not have to pay interest while they were still in college. Federal payments would cover interest charges on subsidized loans. On unsubsidized loans, lender would be required to allow the student to defer payments of both interest and principle while the student was in college. The Government would guarantee deferred interest payments along with principle.

- The student could prepay his loan at any time without penalty.

- Lenders would also be permitted to agree, at the time the loan was made, to allow the student to defer payments and interest up to an aggregate of five additional years. In such cases, the student would be allowed to choose those times during the repayment period when regularly scheduled payments would be especially burdensome. The Federal Government would guarantee interest charges during such periods.

Proposed Program: Consequences

It is estimated that in Fiscal Year 1972, the first year of operation of the program,:

- 2 1/2 million students would receive benefits (including unsubsidized loans), an increase of one million over the number of students receiving assistance under present programs.

- approximately $575 million in grants and work-study payments would be available, an increase of $242 million above FY 1971.

- about $1.2 billion would be available to make loans under the subsidized loan programs, an increase of $830 million.

Problems Solved and Purposes Achieved

The Administration's student aid proposals overcome the problems and achieve the purposes noted earlier in this paper.

- Availability -- Every student who qualifies for direct Federal assistance under the schedule established by the Secretary of HEW will receive his Federal funds. NSLA will provide an adequate supply of lendable funds for students who do not qualify for subsidies.

- Need -- Grants, work-study payments and subsidized loans will be concentrated on those in most need: students from low-income families.

- Certainty -- The aid schedule published annually by the Secretary of HEW would inform every eligible student of the amount of aid he could expect.

- Equity -- Students whose families could be expected to make similar contributions would receive equivalent amounts of aid.

Conclusion

The Administration's proposals would assure that one of the President's deep convictions is fulfilled:

> "Equal educational opportunity, which has long been a goal, must now become a reality for every young person in the United States, whatever his economic circumstances."

ATTACHMENT I

AID ELIGIBILITY--BASIC PROGRAM
(Cost of Education Loans and All Other State and Private Aid Would Be In Addition To These Benefits)

Typical Resources For A Student From A Two-Child Family, One Of Whom Is In College

Adjusted Family Income 2/	Family Contribution	Equal Opportunity Grant/ Work-Study	NDEA-Type Subsidized Loan	Family Contribution Plus Aid	Average Summer Savings	Total Student Resources	Cost of Education Loan 1/
$0-3500	$ 0	$1,000	$400	$1,400	$300	$1,700	$1,500
4500	220	780	400	1,400	300	1,700	1,500
5500	430	570	400	1,400	300	1,700	1,500
6500	640	360	400	1,400	300	1,700	1,500
7500	850	150	400	1,400	300	1,700	1,500
8500	1,050	0	350	1,400	300	1,700	1,500
9500	1,250	0	150	1,400	300	1,700	1,500
10,000 and above	1,400	0	0	1,400	300	1,700	0

Typical Resources For A Student From a Five-Child Family, Two of Whom Are In College

$0-5500	$ 0	$1,000	$400	$1,400	$300	$1,700	$1,500
6500	110	890	400	1,400	300	1,700	1,500
7500	195	805	400	1,400	300	1,700	1,500
8500	280	720	400	1,400	300	1,700	1,500
9500	360	640	400	1,400	300	1,700	1,500
10,500	440	560	400	1,400	300	1,700	1,500
11,500	510	490	400	1,400	300	1,700	1,500
12,500	580	420	400	1,400	300	1,700	1,500
13,500	650	350	400	1,400	300	1,700	1,500
14,500	700	300	400	1,400	300	1,700	1,500

Expected family contributions at higher income levels will depend importantly on the amount of capital assets available for meeting educational costs, and on other special family circumstances, as well as on family income. Hence, any aid to students from large families at higher income levels will depend on the overall financial situation of the family, and not simply on income.

1/ Cost of education loans would be available to eligible students who attend schools with average annual costs in excess of $1,400. The availability of these loans to students at various income levels is subject to appropriations for interest subsidy payments.

2/ Adjusted family income represents gross family income adjusted to reflect the number of children in the family, the number of children in school, extraordinary family expenses, and capital assets.

THE NATIONAL STUDENT LOAN ASSOCIATION

The National Student Loan Association would increase the loan capital available from private sources for students wishing to finance their education.

The Banking Problem

The Guaranteed Student Loan Program is in its fifth school year. Thus far, 3½ million loans totaling nearly $3 billion have been made to students attending 2,000 educational institutions:

Fiscal Year	Volume of Loans	Number of Loans
1966	$ 77 Million	48,495
1967	248	330,088
1968	436	515,408
1969	687	787,344
1970	840	921,896
1971 (1st 5 mos.)	656	656,042
TOTAL	$2.94 Billion	3,259,273

This rapid growth poses liquidity problems for lenders, despite the general easing in the supply of lendable funds in recent months.

For most borrowing students, repayments begin after graduation. For those who go to graduate school, the military, Peace Corps or VISTA, more years elapse before repayment starts. As the number of student loans increases, and more of their funds are tied up for long periods, lenders will reduce the amount of new lending to students or require a higher yield on loans.

The National Student Loan Association would relieve this shortage of funds by creating a secondary market for student loans, providing opportunities for the purchase by another party of the originating lender's interest in a loan. The Association would offer to buy federally-guaranteed student loans from the original lenders, thus permitting them to replenish their supply of lendable funds. Perhaps more important, the possibility of such sales will induce them to commit a greater share of their loan portfolios to student loans, to accept lower interest rates, or both.

NSLA and the Proposed Student Aid Reforms

To achieve the President's goal of eliminating financial barriers to minimum cost higher education, two changes have been proposed in the federal student aid programs which depend on the existence of a secondary market.

First, it is proposed to supply the capital needed for NDEA-type loans from the same private sources as for guaranteed loans. The needed expansion of NDEA-type programs would otherwise be difficult, given the inevitable competition for federal budget resources--not least the competition for funds between the NDEA program and the EOG and Work-Study programs, which also need to be expanded to meet the President's objective.

Second, it is proposed to remove interest subsidies on guaranteed loans to students who do not meet a resonable means test, thus releasing additional budget funds for NDEA subsidies, EOG's and Work-Study payments. Students who no longer qualify for subsidies will nonetheless wish to defer interest payments until after graduation. Such deferrals will reduce the cash-flow of lenders, and create an additional need for the liquidity a secondary market institution can provide.

How Would the Secondary Market Work?

Two basic secondary market mechanisms have been proposed for the National Student Loan Association to seek the goals of adequate liquidity, low interest charges and efficient loan servicing. The two basic mechanisms are: (1) purchasing; and (2) warehousing.

In a purchasing operation, the Association would offer to buy student loans from schools and banks at a yield consistent with that prevailing in the money markets and experienced servicing costs.

Under the warehousing operation, the Association would offer to advance funds to lending schools and banks up to 80 percent of the face value of the insured loans pledged. The borrower could reinvest these funds only in student loans, and of course, the lending institution would pay interest on its loan from the Association.

What Would Students Pay?

The interest rates payable by students would be related to the rates prevailing in the market.

Students taking out NDEA-type subsidized loans would pay no interest for the period in school and in national service, and 3% for 10 years thereafter. The difference between the students interest payments (0% or 3%) and the market-determined yield on student loans would be paid by the Federal Government.

Students eligible only for unsubsidized loans would have the option of deferring interest while in school, but would pay the full market-determined interest rate beginning after graduation. Interest payments deferred up to that time would be added to principal.

What Would Students Pay? cont.,

Principal repayments under both subsidized and unsubsidized loans would be deferred until after graduation.

Servicing

Student loans would be serviced by the original lender under the warehousing arrangement. Under the purchasing alternative, the lending school or bank would usually continue to service its student loans for a fee set by NSLA--probably in the range of 1½% of the consolidated indebtedness of the student.

Financing the Association

NSLA would raise its initial capital by selling common stock to eligible lenders--commercial banks, savings and loan associations, mutual savings banks, credit unions, and educational institutions. It also could sell preferred stock to parties wishing to support higher education. The Association then would issue its own debt obligations which would be federally guaranteed both as to principal and interest, thus attracting new sources of funds into the student loan program.

Provision for Interim Financing

Until the National Student Loan Association is ready for business, interim financing arrangements for NDEA-type student loans would be provided by authorizing the Secretary of HEW to purchase any federally-guaranteed student loan made by an institution of higher education. This purchase would be made at 100% of the value of the loan.

After such time as the Association is able to capitalize itself and purchase insured student loans, the Association would repurchase from the Secretary all student loans which he has acquired during the interim period. In this way, the Association purchase would "wash out" the initial financing done by HEW.

These special interim financing arrangements would enable colleges to participate immediately in the expanded NDEA-type loan program. The colleges, unlike banks and other lenders, do not generally have the cash resources to wait the six months that would probably be required for NSLA to open for business.

92D CONGRESS
1ST SESSION

S. 1161

IN THE SENATE OF THE UNITED STATES

MARCH 9 (legislative day, FEBRUARY 17), 1971

Mr. MONDALE introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To assist in removing the financial barriers to the acquisition of a postsecondary education by all these capable of benefiting from it.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That this Act may be cited as the "Student Assistance Act
4 of 1971".

5 TITLE I—STUDENT OPPORTUNITY GRANTS

6 EDUCATIONAL OPPORTUNITY GRANT AMENDMENTS

7 SEC. 101. (a) Title IV of the Higher Education Act of
8 1965 is amended—

9 (1) by redesignating part A as subpart 2;

10 (2) by redesignating sections 401 through 407

6849

1 (and references thereto) as sections 414 through 420,
2 respectively;
3 (3) by striking out "part" wherever it appears in
4 such sections and inserting in lieu thereof "subpart";
5 and
6 (4) by striking out section 409.
7 (b) Such title is further amended—
8 (1) by redesignating section 408 (and references
9 thereto) as section 421; and
10 (2) by inserting above the section heading the fol-
11 lowing:
12 "SUBPART 3—TALENT SEARCH AND UPWARD BOUND
13 PROGRAMS SPECIAL SERVICES TO DISADVANTAGED
14 STUDENTS IN INSTITUTIONS OF HIGHER EDUCATION"
15 (c) Such title is further amended by inserting the fol-
16 lowing after "TITLE IV—STUDENT ASSISTANCE":
17 "PART A—GRANTS TO STUDENTS
18 "SUBPART 1—STUDENT OPPORTUNITY GRANTS
19 STATEMENT OF PURPOSE AND AUTHORIZATION
20 "SEC. 401. (a) It is the purpose of this subpart—
21 "(1) to provide grants, to be known as student op-
22 portunity grants, assist in making available the bene-
23 fits of higher education to qualified students who for
24 lack of financial means of their own or their families

1 would be unable to obtain such benefits without such
2 aid; and
3 "(2) to reimburse institutions in part for the cost,
4 to them, of educating such students.
5 "It is the intent of the Congress that this program con-
6 stitute a major step toward the ultimate removal of all
7 financial barriers to the acquisition of a postsecondary edu-
8 cation to the end that at least sixteen years of formal school-
9 ing will be guaranteed to all persons capable of benefiting
10 from it.
11 "(b) The Commissioner is authorized, in accordance
12 with the provisions of this subpart, to award student oppor-
13 tunity grants (hereinafter in this subpart called 'grants') to
14 a student who (1) has been accepted for enrollment at an
15 eligible institution or, in the case of a student already attend-
16 ing such institution, is in good standing there as determined
17 by the institution, and (2) is carrying at least one-half of
18 the normal full-time course of study as determined by the
19 institution, at an eligible institution of the student's own
20 choosing.
21 "(c) The amount of the grant for which a student
22 carrying less than a normal full-time course of study at
23 an eligible institution shall be computed as follows: De-
24 ductions from the amount for which the student is eligible

1 for full-time study (under section 404) shall be made for
2 students who desire to attend school part time, if such an
3 individual qualifies for a grant under section 404. For any
4 period of time (as determined by the Commissioner under
5 regulations prescribed by him) in which such an individual
6 is a part-time student carrying not less than three-fourths
7 of a normal full-time course of study (as determined by
8 the Commissioner under regulations prescribed by him),
9 the deduction from the student opportunity grant of such
10 an individual shall be equal to one-fourth of the amount of
11 such grant. For any period of time (as determined by the
12 Commissioner under regulations prescribed by him) in which
13 such an individual is a part-time student carrying a course
14 of study in the eligible institution in which he is enrolled
15 in not less than one-half of a full-time course of study (as
16 determined by the Commissioner under regulations pre-
17 scribed by him), the deduction from the student opportu-
18 nity grant of such an individual shall be equal to one-half
19 of the amount of such grant.

20 "DEFINITION OF ELIGIBLE INSTITUTION

21 "SEC. 402. As used in this subpart:

22 "(a) The term 'eligible institution' means (1) an in-
23 stitution of higher education, or (2) a vocational school.

24 "(b) The term 'institution of higher education' means
25 an educational institution in any State which (1) admits

1 as regular students only persons having a certificate of
2 graduation from a school providing secondary education, or
3 the recognized equivalent of such certificate, (2) is legally
4 authorized within such State to provide a program of educa-
5 tion beyond secondary education, (3) provides an educa-
6 tional program for which it awards a baccalaureate degree
7 or provides not less than a two-year program which is
8 acceptable for full credit toward such a degree, or provides
9 an education program for which it awards a graduate or
10 professional degree, (4) is a public or other nonprofit insti-
11 tution, and (5) is accredited by a nationally recognized
12 accrediting agency or association approved by the Com-
13 missioner for this purpose, or, if not so accredited, (A) is an
14 institution with respect to which the Commissioner has de-
15 termined that there is satisfactory assurance, considering the
16 resources available to the institution, the period of time, if
17 any, during which it has operated, the effort it is making to
18 meet accreditation standards, and the purpose for which this
19 determination is being made, that the institution will meet
20 the accreditation standards of such an agency or association
21 within a reasonable time, or (B) is an institution whose
22 credits are accepted on transfer by not less than three institu-
23 tions which are so accredited, for credit on the same basis as
24 if transferred from an institution so accredited. Such
25 term includes any public or other nonprofit collegiate

1 or associate degree school of nursing and any school
2 which provides not less than a one-year program of
3 training to prepare students for gainful employment in a
4 recognized occupation and which meets the provisions of
5 clauses (1), (2), (4), and (5). If the Commissioner de-
6 termines that a particular category of such schools does not
7 meet the requirements of clause (5) because there is no
8 nationally recognized accrediting agency or association quali-
9 fied to accredit schools in such category, he shall, pending
10 the establishment of such an accrediting agency or associa-
11 tion, appoint an advisory committee, composed of persons
12 specially qualified to evaluate training provided by schools in
13 such category, which shall (i) prescribe the standards of
14 content, scope and quality which must be met in order to
15 qualify schools in such category to participate in the program
16 pursuant to this part, and (ii) determine whether particular
17 schools not meeting the requirements of clause (5) meet
18 those standards. For purposes of this subsection, the Com-
19 missioner shall publish a list of nationally recognized ac-
20 crediting agencies or associations which he determines to be
21 reliable authority as to the quality of training offered.
22 "(c) The term 'vocational school' means a business or
23 trade school, or technical institution or other technical or vo-
24 cational school, in any State, which (1) admits as regular
25 students only persons who have completed or left elementary

1 or secondary school and who have the ability to benefit from
2 the training offered by such institution; (2) is legally author-
3 ized to provide and provides within that State, a program
4 of postsecondary vocational or technical education designed
5 to fit individuals for useful employment in recognized occu-
6 pations; (3) has been in existence for two years or has been
7 specially accredited by the Commissioner as an institution
8 meeting the other requirements of this subsection; and (4)
9 is accredited (A) by a nationally recognized accrediting
10 agency or association listed by the Commissioner pursuant to
11 this clause, (B) if the Commissioner determines that there
12 is no nationally recognized accrediting agency or association
13 qualified to accredit schools of a particular category, by a
14 State agency listed by the Commissioner pursuant to this
15 clause and (C) if the Commissioner determines there is no
16 nationally recognized or State agency or association qualified
17 to accredit schools of a particular category, by an advisory
18 committee appointed by him and composed of persons
19 specially qualified to evaluate training provided by
20 advisory committee appointed by him and composed of per-
21 sons specially qualified to evaluate training provided by
22 schools of that category, which committee shall prescribe the
23 standards of content, scope, and quality which must be met
24 by those schools in order for loans to students attending them
25 to be insurable under this part and shall also determine

1 whether particular schools meet those standards. For the
2 purpose of this subsection, the Commissioner shall publish a
3 list of nationally recognized accrediting agencies or associa-
4 tions and State agencies which he determines to be reliable
5 authority as to the quality of education or training afforded.
6 "(d) The term 'collegiate school of nursing' means a
7 department, division, or other administrative unit in a col-
8 lege or university which provides primarily or exclusively
9 an accredited program of education in professional nursing
10 and allied subjects leading to the degree of bachelor of arts,
11 bachelor of science, bachelor of nursing, or to an equivalent
12 degree, or to a graduate degree in nursing.
13 "(e) The term 'associate degree school of nursing' means
14 a department, division, or other administrative unit in a jun-
15 ior college, community college, college, or university which
16 provides primarily or exclusively an accredited two-year
17 program of education in professional nursing and allied sub-
18 jects leading to an associated degree in nursing or to an
19 equivalent degree.
20 "(f) The term 'accredited' when applied to any pro-
21 gram of nurse education means a program accredited by a
22 recognized body or bodies approved for such purpose by the
23 Commissioner of Education.
24 "APPROPRIATIONS AUTHORIZED
25 "SEC. 403. To carry out the purposes of this subpart,

1 there are hereby authorized to be appropriated such sums as
2 are necessary for the fiscal year ending June 30, 1970, to be
3 used for planning and related activities, and such sums as
4 may be necessary for each of the three succeeding fiscal
5 years. Sums appropriated pursuant to this section for any
6 fiscal year shall be available for payment until the close of
7 the fiscal year succeeding the fiscal year for which they were
8 appropriated.

9 "AMOUNT OF GRANT

10 "SEC. 404. (a) Subject to the limitations contained in
11 subsections (b), (c), and (e), the amount paid under a
12 grant awarded to a full-time student under this subpart, for
13 each academic year during which such grant is in force, shall
14 be an amount equal to the excess of the actual cost of at-
15 tendance of the institution attended by the student, as last
16 determined by the Commissioner, over the sum of—

17 "(1) the student's family contribution,

18 "(2) the expected student savings, as last deter-
19 mined by the Commissioner.

20 "(b) The portion of the actual cost of attendance at the
21 institution attended by the student which shall be used for
22 computing the amount of the grant shall be—

23 "(1) 100 per centum of the actual cost of attend-

1 ance at the institution attended by the student, up to
2 $1,400,
3 "(2) 90 per centum of the actual cost of attendance
4 at the institution attended by the student, in excess of
5 $1,400 but less than $2,000,
6 "(3) 80 per centum of the actual cost of attendance
7 at the institution attended by the student, in excess of
8 $2,000 but less than $2,500,
9 "(4) 70 per centum of the actual cost of attendance
10 at the institution attended by the student, in excess of
11 $2,500 but less than $3,000,
12 "(5) 60 per centum of the actual cost of attendance
13 at the institution attended by the student, in excess of
14 $3,000 but less than the national average cost of at-
15 tendance at a four-year nonpublic university as de-
16 termined by the Commissioner, and
17 "(6) 40 per centum of the actual cost of attendance
18 at the institution attended by the student, in excess of
19 the national average cost of attendance at a four-year
20 non-public university as determined by the Commis-
21 sioner.
22 "(c) The amount paid under a grant awarded to a full-
23 time student under this subpart for an academic year shall
24 not exceed the lesser of—
25 "(1) the national average cost of attendance at a

1 four-year non-public university, as determined by the
2 Commissioner, or
3 "(2) (A) the actual cost for such year to such stu-
4 dent of tuition and fees, and
5 "(B) a minimum maintenance allowance appli-
6 cable to all students receiving grant payments under
7 this subpart as determined by the Commissioner for such
8 year.
9 "(d) If the amount payment under a grant for an aca-
10 demic year, as determined under this section, would be less
11 than $200 for a full-time student, no payment shall be made
12 to that student for such year.
13 "(e) If, as determined by the Commissioner on the
14 basis of estimates, the total amount of all payments for any
15 academic year to be made pursuant to grants awarded under
16 this subpart would exceed the amount available for such
17 grants, the Commissioner shall reduce the amounts of such
18 payments that would otherwise be payable in a manner
19 most likely to preserve payments to students from the
20 lowest-income families to the fullest possible extent.
21 "(f) As used in this subpart—
22 "(1) The term 'actual cost of attendance' means the
23 actual per-student charges for tuition, fees, room and board,
24 books, and an allowance for such other expenses which the
25 Commissioner deems to be reasonably related to his edu-

1 cational experience, for an academic year incurred by stu-
2 dents attending eligible institutions, as determined by the
3 Commissioner.
4 "(2) The term 'national average cost of attendance at
5 a four-year nonpublic university' means the average per-
6 student charges for tuition fees, room and board, and an
7 allowance for such other expenses which the Commissioner
8 deems to be reasonably related to the educational experience
9 for an academic year incurred by students attending such
10 institutions, as determined by the Commissioner. Each de-
11 termination of the Commissioner and the criteria on which
12 it is based shall be published in the Federal Register. The
13 national average cost shall be redetermined by the Com-
14 missioner at least once every two years and shall be re-
15 determined at shorter time intervals if the Commissioner
16 deems it necessary for the purposes of this subpart.
17 "(3) Except as otherwise provided pursuant to subsec-
18 tion (g), the term 'family contribution', with respect to a
19 student, means the amount which the family of that student
20 may be expected to contribute toward the cost of his post-
21 secondary education for the academic year in question, as
22 determined in accordance with regulations prescribed by the
23 Commissioner on the basis of criteria set forth therein, in-
24 cluding such criteria as effective family income (as defined
25 in this section), number of dependents in the student's fam-

1 ily, and the number of dependents attending or likely to at-
2 tend institutions of higher education. The Commissioner shall
3 review and, if necessary, revise such regulations annually.
4 The amount of the family contribution with respect to a
5 student shall be determined as of the time that a determina-
6 tion (or redetermination) of effective family income is made
7 for purposes of this subpart.

8 "(4) Except as otherwise provided pursuant to sub-
9 section (g), the term 'effective family income' with respect
10 to a student means the annual adjusted family income, as
11 determined in accordance with regulations prescribed by
12 the Commissioner, received by the parents or guardian of
13 that student (or the person or persons having an equivalent
14 relationship to such student) minus Federal income tax paid
15 or payable with respect to such income. In such regulations,
16 the Commissioner may, to the extent consistent with the
17 purposes of this subpart, and subject to such adjustments or
18 variations as he may deem necessary or appropriate, adopt
19 the criteria for determining taxable income for purposes
20 of the individual income tax imposed by the Internal Reve-
21 nue Code of 1954.

22 "(5) The term 'expected student savings' means the
23 amount which in the judgment of the Commissioner reflects
24 the amount of savings which a student may on the average
25 be expected to save from summer, vacation, or part-time em-

1 ployment for application toward the cost of his postsecondary
2 education for an academic year.
3 "(g) The Commissioner shall prescribe special rules for
4 determining family contribution and effective family income
5 in the case of students who are determined to be self-support-
6 ing. In prescribing such rules, the Commissioner shall pro-
7 vide an additional amount for the dependents of such stu-
8 dents equal not to exceed $300 per dependent, or a total
9 of $1,500, per academic year.
10 "DURATION OF GRANT
11 "SEC. 405. (a) The duration of a grant awarded under
12 this part shall be—
13 "(1) for completion by the recipient of his under-
14 graduate (or other, prebaccalaureate degree, training)
15 education, the period of time shall not exceed four
16 academic years (except where the Commissioner deter-
17 mines that the student is enrolled in a degree program
18 which normally requires more than four academic years
19 for a baccalaureate degree, in which event such period
20 shall not exceed five academic years), or of an equiva-
21 lent period of time of part-time enrollment, less any such
22 period with respect to which the recipient has pre-
23 viously received payments, for his prebaccalaureate edu-
24 cation, pursuant to a grant under this subpart or under
25 subpart 2;

1 "(2) for completion by the recipient for education
2 beyond the baccalaureate degree the period of time shall
3 not exceed four academic years for a student pursuing a
4 graduate or professional degree, or for an equivalent
5 period of time of part-time enrollment.
6 "(b) A student awarded a grant under this part shall
7 continue to be entitled to payments thereunder only if
8 such student—
9 "(1) is maintaining good standing in the course
10 of study which he is pursuing, according to the regu-
11 larly prescribed standards and practices of the institu-
12 tion which he is attending, and
13 "(2) devotes at least half-time to such course of
14 study, during the academic year, in attendance at an eli-
15 gible institution, except that failure to be at an institution
16 during vacation periods or periods of military service, or
17 during other perods during which the Commissioner
18 determines, in accordance with regulations, that there is
19 good cause for his nonattendance (during which periods
20 such students shall receive no payments), shall not be
21 deemed contrary to the purposes and requirements of
22 this clause.
23 "DELEGATION BY COMMISSIONER
24 "SEC. 406. (a) The Commissioner is authorized to
25 designate one or more public or private nonprofit agencies

1 to carry out the functions or make the determinations pre-
2 scribed in this subpart on his behalf, and to carry out such
3 other functions related to the determination of eligibility of
4 students for award of grants and the amounts of payments
5 to them as he may deem appropriate. The Commissioner
6 may enter into agreements with such agency or agencies
7 providing for the conduct of such functions. Each such agree-
8 ment shall provide for such fund-control and fund-accounting
9 procedures as may be necessary to assure proper disburse-
10 ment of and accounting for Federal funds paid to the agency
11 under subsection (b), and for the making of such reports,
12 in such form and containing such information, as may be
13 necessary to enable the Commissioner to perform his func-
14 tions under this subpart.

15 "(b) The Commissioner shall, if so provided in such
16 agreements, pay to each such agency such amounts as the
17 Commissioner determines to be necessary for the proper
18 and efficient execution by such agency of its functions under
19 this subpart. There are hereby authorized to be appropri-
20 ated such sums as may be necessary to make such payments.

21 "(c) In making any such designation, the Commissioner
22 shall reserve the right to review, upon his own initiative or
23 that of any interested party, any finding, determination, or
24 other action made or taken by such agency.

1 "ELIGIBLE APPLICANTS

2 "SEC. 407. (a) An individual shall be eligible to apply
3 for a full educational opportunity grant under this subpart
4 if he—

5 "(1) is a permanent resident of a State or, if not, is
6 a national of and domiciled in the United States; and

7 "(2) (A) has—

8 "(i) completed at least ten years of school (or
9 the equivalent level thereof), and

10 "(ii) is attending a secondary school, or

11 "(B) has a certificate of graduation from a second-
12 ary school or the recognized equivalent of such a cer-
13 tificate, or

14 "(C) is enrolled in at least a half-time course of
15 study at an eligible institution.

16 "(b) For the purposes of this section, the term 'sec-
17 ondary school' means such a school as defined in section
18 1201 (d), except that, in the case of a school which is not
19 in a State, such term means a school that provides secondary
20 education as determined by the Commissioner.

21 "APPLICATION AND DETERMINATION OF TENTATIVE
22 ELIGIBILITY FOR AWARD

23 "SEC. 408. (a) Application for a grant under this sub-
24 part shall be made at such time and in such manner, and

1 shall contain or be supported by such information, as may
2 be prescribed by the Commissioner or pursuant to regula-
3 tion. The Commissioner shall encourage the submission of
4 such applications, to the extent practicable, by secondary
5 school students, as early as the eleventh grade.
6 "(b) An applicant who is not currently enrolled at an
7 eligible institution shall be determined to be tentatively
8 eligible for a grant, if—
9 "(1) such individual meets the requirements of
10 paragraphs (1) and (2) (A) or (B) of section
11 407(a);
12 "(2) such individual is capable of benefiting from
13 study at an eligible institution; and
14 "(3) the amount of the payment for the first aca-
15 demic year of such grant, if computed as of the time
16 of such determination, would be $200 or more as de-
17 termined pursuant to section 404 and regulations pre-
18 scribed thereunder.
19 "(c) Upon such determination, the applicant shall be
20 notified of—
21 "(1) his tentative eligibility for a grant,
22 "(2) the tentative amount thereof computed in
23 accordance with section 404(a) (subject to the limita-
24 tions of section 404(b), but without reference to section
25 404(d)), and

1 "(3) the provisions of this subpart for redetermina-
2 tion of such eligibility and of such amount.

3 "AWARD OF GRANT—PAYMENTS—ANNUAL
4 DETERMINATION

5 "SEC. 409. (a) Within the amounts available for
6 grants under this subpart, with respect to any academic year
7 beginning after June 30, 1971, the Commissioner shall
8 award a grant under this subpart to an applicant therefor,
9 and shall, subject to section 410, determine the amount pay-
10 able with regard thereto for the initial academic year, if—
11 "(1) such applicant meets the requirements of
12 paragraphs (1) and (2) (B) of section 407 (a); and
13 "(2) such applicant has been accepted for en-
14 rollment as a student in a course of study in a par-
15 ticipating eligible institution or, in the case of a student
16 already attending such an institution, is in good standing
17 and in at least half-time attendance there as a student;
18 and
19 "(3) the applicant is then otherwise eligible for
20 such a grant.
21 "(b) The Commissioner shall notify both the applicant
22 and the participating institution in which he is enrolled or
23 has been accepted for enrollment of such award and deter-
24 mination. A separate determination shall, on the basis of the
25 latest available data, be made as to the student's eligibility

1 for, and the amount of, payments to such student under the
2 grant awarded under this section for each succeeding aca-
3 demic year of its duration (as determined under section 405).
4 "(c) The Commissioner shall, in accordance with agree-
5 ments pursuant to section 411, utilize the facilities and serv-
6 ices of participating institutions as fiscal agents for paying to
7 students attending them the amounts, if any, to which such
8 students have been determined, with respect to each academic
9 year, to be entitled.

10 "INCOME REDETERMINATIONS

11 "SEC. 410. Whenever, prior to the making of an initial
12 award pursuant to section 409, it appears that the facts upon
13 which the income determination made pursuant to section
14 408 (b) (3) is based are as of a year ending more than two
15 years prior to the date in which the student becomes, or will
16 become, enrolled in a participating institution for an aca-
17 demic year for which he will be entitled to grant payments,
18 such award may not be made except upon the basis of a
19 redetermination of income. Such income redetermination may
20 be based upon facts as of the most recent year ending prior to
21 the year for which such redetermination is made.

22 "PARTICIPATING INSTITUTIONS

23 "SEC. 411. (a) For the purposes of this subpart, the
24 term 'participating institution' means an eligible institution

1 which has entered into an agreement with the Commission.
2 Such agreement shall—
3 "(1) provide that the institution will cooperate
4 with the Commissioner in carrying out the purposes of
5 this subpart;
6 "(2) provide that the institution will periodically
7 conduct a review to determine whether students en-
8 rolled therein and holding a grant award under this sub-
9 part continue to be entitled to payments under such
10 grants, and the amounts of such payments; and that
11 such review may include, if the Commissioner requires,
12 a redetermination of a student's family contribution and
13 effective family income;
14 "(3) provide for utilization of such institution as
15 fiscal agent for payments to students under this subpart;
16 "(4) provide for such fiscal control and accounting
17 procedures as may be necessary to assure proper dis-
18 bursement of and accounting for Federal funds paid
19 hereunder;
20 "(5) provide that the institution, in cooperation
21 with other eligible institutions where appropriate, will
22 make vigorous efforts to identify disadvantaged youths
23 capable of benefiting from postsecondary education and
24 to encourage such youths to enroll in such institution,
25 through such activities as special recruiting programs in

369076

1 poverty neighborhood secondary schools, and special
2 remedial and other training programs for disadvantaged
3 students;
4 "(6) provide that the institution will meet the
5 requirements of section 464 of this Act (relating to
6 maintenance of effort); and
7 "(7) include such other provisions as may be
8 necessary to protect the financial interest of the United
9 States and promote the purposes of this subpart.
10 "COST-OF-EDUCATION ALLOWANCES TO INSTITUTIONS
11 "SEC. 412. Upon such conditions as he shall prescribe,
12 the Commissioner shall pay a cost-of-education allowance to
13 any participating institution in which was enrolled a student
14 who received payments during an academic year ending dur-
15 ing such fiscal year, under a grant duly awarded pursuant to
16 this subpart. The grant upon which the cost-of-education
17 allowance is based shall not include any sums granted to a
18 student for his dependents under section 404(f). With re-
19 spect to each such student, such allowance shall be an amount
20 equal to the sum of—
21 "(1) $100, and
22 "(2) (A) 25 per centum of the excess over $200
23 paid to such student during the academic year if such
24 student is in his first year of postsecondary study or its
25 equivalent of part-time enrollment, or

370836

60-433 O - 71 - pt. 1 -- 24

1 "(B) 30 per centum of the excess over $200 paid
2 to such student during the academic year if such student
3 is in his second year of postsecondary study or its
4 equivalent of part-time enrollment, or
5 "(C) 35 per centum of the excess over $200 paid
6 to such student during the academic year if such stu-
7 dent is in his third year of postsecondary study or its
8 equivalent of part-time enrollment, or
9 "(D) 40 per centum of the excess over $200 paid
10 to such student during the academic year if such stu-
11 dent is in his fourth year of postsecondary study or its
12 equivalent in part-time enrollment, or, if such student
13 is beyond his fourth year of postsecondary study or its
14 equivalent in part-time enrollment but shall not have
15 completed the requirements for the baccalaureate degree
16 he shall be considered a fourth year student for purposes
17 of computing the amount due the participating insti-
18 tution, or
19 "(E) 50 per centum of the excess over $200 paid
20 to such student during the academic year if such stu-
21 dent has completed his baccalaureate degree and is en-
22 rolled in a course of study leading to a graduate or pro-
23 fessional degree.
24 pursuant to such grant. The Commissioner shall prescribe
25 regulations to insure that a student who received such pay-

1 ments during an academic year in more than one institution
2 is not counted more than once for the purposes of computing
3 the $100 component of the cost-of-education allowance to
4 which each such institution is entitled under this section.

5 "DEFINITION OF 'ACADEMIC YEAR'

6 "SEC. 413. As used in this subpart, the term 'academic
7 year' means an academic year or its equivalent as defined in
8 regulations of the Commissioner."

9 TERMINATION OF PRESENT STUDENT GRANT PROGRAM

10 SEC. 102. Section 414 of the Higher Education Act of
11 1965 (as redesignated by this Act) is amended by adding
12 the following new subsections:

13 "(c) Notwithstanding anything contained in this sub-
14 part, the authority vested in the Commissioner and in any
15 institution of higher education to make payments or awards
16 under this subpart shall terminate on June 30, 1972, unless
17 the Commissioner finds that as of such date the program au-
18 thorized under subpart 1 is not sufficiently operational to
19 provide grants to students eligible under that subpart at a
20 level reasonably comparable to grants made pursuant to this
21 subpart: *Provided, however,* That the authority vested in
22 the Commissioner or any institution of higher education by
23 this subpart shall terminate no later than June 30, 1973.

24 "(d) Upon the termination of the grant program au-
25 thorized by this subpart, the Commissioner shall by regula-

1 tion provide for the disposition of unused funds previously
2 allotted and paid to institutions of higher education pursuant
3 to this subpart. To the extent practicable and consistent with
4 applicable appropriation Acts, the Commissioner may au-
5 thorize the retention of such funds by the institutions which
6 are participating institutions for purposes of subpart 1 as ad-
7 vances to cover grants pursuant to such subpart."

8 PAYMENTS FOR ADMINISTRATIVE EXPENSES AUTHORIZED

9 SEC. 103. Section 463 (a) of the Higher Education Act
10 of 1965 is amended to read as follows:

11 "SEC. 463. (a) An institution which has entered into an
12 agreement with the Commissioner under subpart 1 or subpart
13 2 of part A or under part C of this title shall be entitled, for
14 each fiscal year for which it receives payments, in its ca-
15 pacity as fiscal agent under subpart 1 of part A, or an allot-
16 ment under subpart 2 of part A or under part C, to a pay-
17 ment in lieu of reimbursement for its expense during such
18 fiscal year in administering programs assisted under such
19 part. The payment for a fiscal year—

20 "(1) shall be payable in accordance with regula-
21 tions of the Commissioner, and

22 "(2) shall (except as provided in subsection (b))
23 be an amount equal to 3 per centum of the sum of—

24 "(A) all the payments to students made by the

1 institution during such fiscal year in its capacity as
2 fiscal agent under subpart 1 of part A;
3 "(B) the institution's expenditures during such
4 fiscal year from its allotment under subpart 2 of
5 part A; and
6 "(C) its expenditures during such fiscal year
7 under part C for compensation of students."
8 TRANSITIONAL ADMINISTRATIVE PROVISIONS
9 SEC. 104. The Commissioner shall prescribe by regula-
10 tion procedures for the award and payment of grants author-
11 ized under subpart 1 of part A of title IV of the Higher
12 Education Act of 1965 to students who have been awarded
13 grants under subpart 2 of such part and are eligible for grants
14 under subpart 1 of such part. The Commissioner may further
15 designate a date by which all applications for student assist-
16 ance under subpart 2 of such part shall be treated as applica-
17 tions for assistance under subpart 1 thereof.
18 TITLE II—GRADUATE FELLOWSHIPS
19 PROGRAM AUTHORIZED
20 SEC. 201. The Higher Education Act of 1965 is
21 amended by—
22 (1) redesignating title XII as title XIII,
23 (2) redesignating sections 1201 through 1210, and
24 references thereto, as sections 1301 through 1310, re-
25 spectively, and

1 (3) inserting immediately after title XI thereof the
2 following new title XII:

3 "TITLE XII—FEDERAL FELLOWSHIPS

4 "PROGRAM AUTHORIZED

5 "SEC. 1201. (a) It is the purpose of this title to pro-
6 vide grants, to be known as Federal fellowships, to assist
7 graduate students of exceptional ability, who also demon-
8 strate a financial need, to complete their final two years of
9 study toward the doctor of philosophy, or equivalent de-
10 gree, to the end that the flow of highly trained individuals
11 from universities may be speeded. The demonstration of fi-
12 nancial need shall be determined in accordance with regula-
13 tions prescribed by the Commissioner, taking into account
14 the provisions under section 404 of this Act.

15 "(b) The Commissioner is authorized to award under
16 the provisions of this title not to exceed 15,000 fellowships
17 for the fiscal year ending June 30, 1972, 25,000 fellowships
18 for the fiscal year ending June 30, 1973, and 35,000 fellow-
19 ships for the fiscal year ending June 30, 1974.

20 "Fellowships awarded under the provisions of this title
21 shall be for graduate study leading to a doctoral degree or
22 research incident to the presentation of a doctoral disserta-
23 tion. Such fellowships may be awarded for graduate study
24 and research at any institution of higher education, library,
25 archive, or any other research center provided by the Com-

1 missioner. Such fellowships shall be awarded for such periods
2 as the Commissioner may determine, but not to exceed two
3 years.

4 "(c) In addition to the number of fellowships author-
5 ized to be awarded by subsection (b) of this section, the
6 Commissioner is authorized to award fellowships equal to the
7 number previously awarded during any fiscal year under this
8 title but vacated prior to the end of the period for which
9 they were awarded; except that each fellowship awarded
10 under this subsection shall be for such period of graduate
11 work or research, not in excess of the remainder of the
12 period for which the fellowship which it replaces was
13 awarded, as the Commissioner may determine.

14 "AWARD OF FELLOWSHIPS

15 "SEC. 1202. Recipients of fellowships under this title
16 shall be—

17 "(1) persons who have been accepted by an insti-
18 tution of higher education for graduate study leading to a
19 doctoral degree or its equivalent, but not including such
20 study required for a master's degree or its equivalent, or

21 "(2) persons who have completed all course work
22 required for the granting of a doctoral degree (except
23 such course work credited on the dissertation) and com-
24 prehensive examinations where appropriate, and whose

1 doctoral dissertation proposal has been approved by
2 appropriate officials of an institution of higher education.
3 For the purpose of this section, the term 'institution of higher
4 education' means an educational institution in any State
5 which (1) admits as regular students only persons having a
6 certificate of graduation from a school providing secondary
7 education, or the recognized equivalent of such a certificate,
8 (2) is legally authorized within such State to provide a pro-
9 gram of education beyond secondary education, (3) pro-
10 vides an educational program for which it awards a doctor's
11 degree, (4) is a public or other nonprofit institution, and (5)
12 is accredited by a nationally recognized accrediting agency
13 or association, or, if not so accredited, is an institution whose
14 credits are accepted, on transfer, by not less than three in-
15 stitutions which are so accredited, for credit on the same
16 basis as if transferred from an institution so accredited.

17 "DISTRIBUTION OF FELLOWSHIPS

18 "SEC. 1203. In awarding fellowships under the provi-
19 sions of this title the Commissioner shall endeavor to pro-
20 vide an equitable distribution of such fellowships throughout
21 the Nation, except that to the extent he deems proper to
22 provide for those who are in greatest financial need of such
23 fellowships.

1 "STIPENDS AND INSTITUTION OF HIGHER EDUCATION
2 ALLOWANCES

3 "SEC. 1204. (a) The Commissioner shall pay to per-
4 sons awarded fellowships under this title such stipends as
5 he may determine to be consistent with prevailing practices
6 under comparable federally supported programs, except that
7 the stipend shall not be less than $2,800 nor more than $3,-
8 500 for each academic year of study. An additional amount
9 of $300 for each such academic year of study shall be paid
10 to such person on account of each of his dependents, not to
11 exceed the amount of $1,500 per academic year.

12 "(b) In addition to the amount paid to persons pur-
13 suant to subsection (a) there shall be paid to the institution
14 of higher education at which each such person is pursuing his
15 course of study an amount equal to 150 per centum of the
16 amount paid, less the amount paid on account of each of such
17 person's dependents, to such person, less any amount charged
18 such person for tuition.

19 "(c) The Commissioner shall reimburse any person
20 awarded a fellowship pursuant to this title for actual and
21 necessary traveling expenses of such person and his depend-
22 ents from his ordinary place of residence to the institution
23 of higher education, library, archive, or other research center
24 where he will pursue his studies under such fellowship, and
25 to return to such residence.

1 "LIMITATION

2 "SEC. 1205. No fellowship shall be awarded under this
3 title for study at a school or department of divinity. For the
4 purposes of this section, the term 'school or department of
5 divinity' means an institution or department or branch of
6 an institution, whose program is specifically for the educa-
7 tion of students to prepare them to become ministers of re-
8 ligion or to enter upon some other religious vocation or to
9 prepare them to teach theological subjects.

10 "FELLOWSHIP CONDITIONS

11 "SEC. 1206. (a) A person awarded a fellowship under
12 the provisions of this title shall continue to receive the pay-
13 ments provided in section 1204 (a) only during such periods
14 as the Commissioner finds that he is maintaining satisfactory
15 proficiency in, and devoting essentially full time to, study or
16 research in the field in which such fellowship was awarded,
17 in an institution of higher education, and is not engaging in
18 gainful employment other than part-time employment in
19 teaching, research, or similar activities, approved by the
20 Commissioner. Such a person shall not be required to per-
21 form duties, by the institution of higher education in which
22 he is receiving his education, which are not a part of the
23 specific academic requirements for the degree he is pursuing
24 as published in the rules and regulations of said institution of
25 higher education.

1 "(b) The Commissioner shall require reports containing
2 such information in such form and to be filed at such times
3 as he determines necessary from each person awarded a fel-
4 lowship under the provisions of this title. Such reports shall
5 be accompanied by a certificate from an appropriate official
6 at the institution of higher education, library, archive, or
7 other research center approved by the Commissioner, stating
8 that such person is making satisfactory progress in, and is
9 devoting essentially full time to, the program for which the
10 fellowship was awarded.

11 "ADMINISTRATION

12 "SEC. 1207. (a) The Commissioner is authorized to des-
13 ignate one or more public or private nonprofit agencies to
14 carry out the functions or make the determinations, on his
15 behalf, prescribed in this title, and to carry out such other
16 functions related to the determination of eligibility for award
17 of fellowships as he may deem appropriate. The Commis-
18 sioner may enter into agreements with such agency or
19 agencies providing for the conduct of such functions. Each
20 such agreement shall provide for such fund-control and fund-
21 accounting procedures as may be necessary to assure proper
22 disbursement of and accounting for Federal funds paid to
23 the agency under subsection (b), and for the making of
24 such reports, in such form and containing such information,
25 as may be necessary to enable the Commissioner to perform
26 his functions under this title.

1 "(b) The Commissioner shall, if so provided in such
2 agreements, pay to each such agency such amounts as the
3 Commissioner determines to be necessary for the proper and
4 efficient execution by such agency of its functions under this
5 title. There are hereby authorized to be appropriated such
6 sums as may be necessary to make such payments.
7 "(c) In making any such designation, the Commis-
8 sioner shall reserve the right to review, upon his own initia-
9 tive or that of any interested party, any finding, determina-
10 tion, or other action made or taken by such agency.

11 "APPROPRIATIONS AUTHORIZED

12 "SEC. 1208. There are authorized to be appropriated
13 such sums as may be necessary for the fiscal year ending
14 June 30, 1972, and for each of the two succeeding fiscal
15 years, for payments for the initial year of fellowships
16 awarded under this title. There are authorized to be appro-
17 priated for the fiscal year ending June 30, 1972, and for
18 each of the two succeeding fiscal years such sums as may be
19 necessary in order that fellowships already awarded might
20 be completed."

21 TITLE III—HIGHER EDUCATION LOAN BANK

22 CREATION OF BANK

23 SEC. 301. There is hereby created a nonprofit corpora-
24 tion to be known as the "Higher Education Loan Bank"
25 (hereinafter referred to as the "bank"). The bank, which

1 shall not be an agency or instrumentality of the United States
2 Government, shall maintain such offices as may be necessary
3 or appropriate in the conduct of its business. The right to
4 repeal, alter, or amend this title at any time is expressly
5 reserved.
6 BOARD OF DIRECTORS
7 SEC. 302. (a) The bank shall have a board of directors
8 consisting of fifteen individuals who are interested and expe-
9 rienced in higher education, banking and finance, or public
10 affairs. Members of the board shall be appointed by the
11 President, by and with the advice and consent of the Sen-
12 ate. At least five members shall be students, at the time of
13 their appointments, at postsecondary, or higher education
14 institutions. Students appointed to the board shall be selected
15 with a view to achieving the widest possible representation
16 of geographic regions, fields of study, and undergraduate
17 and graduate education. At least two of such students shall
18 be participants in programs provided for by the Higher Edu-
19 cation Act of 1965, or the Student Assistance Act of 1969.
20 The President shall select one of the members of the board
21 to serve as chairman.
22 (b) The terms of office of persons appointed to the
23 board of directors of the bank shall be five years, except
24 that (1) the terms of persons first taking office shall expire,
25 as designated by the appointing officer at the time of appoint-

1 ment, three at the end of one year, three at the end of two
2 years, three at the end of three years, three at the end of
3 four years, and three at the end of five years; and (2) any
4 person appointed to fill a vacancy occurring before the expira-
5 tion of the term for which his predecessor was appointed
6 shall be appointed for the remainder of such term.
7 (c) The board shall appoint a president of the bank
8 and such other officers as it deems necessary to carry out
9 the functions of the bank.

10 FUNCTIONS

11 SEC. 303. It shall be the function of the bank to—
12 (1) make loans each year, not to exceed the cost
13 to the student of his education (as established under sec-
14 tion 303 (1) (C) of this title) less any other federally
15 aided assistance the student receives for his education
16 during the period of the loan, for a period of up to five
17 years for undergraduate or other study at an eligible in-
18 stitution, or its equivalent in part-time study, and for a
19 period of up to five years for graduate study, or its
20 equivalent in part-time study, to any student who (A)
21 has been accepted for enrollment at an eligible institu-
22 tion or, in the case of a student already attending such
23 institution, is in good standing there as determined by
24 the institution, (B) is carrying at least one-half of the
25 normal full-time workload as determined by the institu-

1 tion, and (C) has provided the bank with a statement
2 of the institution which sets forth a schedule of the tui-
3 tion and fees applicable to that student and its estimate
4 of the cost of board, room, and books for such a stu-
5 dent, upon such terms and conditions as nearly similar
6 as the Board deems practicable to terms and conditions
7 applicable to loans insured under title IV of the Higher
8 Education Act of 1965;
9 (2) provide for a note or other written agreement
10 evidencing such a loan which—
11 (A) contains provisions as nearly similar to
12 loan agreements insured under title IV of the
13 Higher Education Act of 1965 as the Board deems
14 practicable;
15 (B) provides that periodic installments of prin-
16 cipal and interest need not be paid during any
17 period (i) during which the borrower is pursuing
18 a full-time course of study at an "eligible institu-
19 tion", (ii) not in excess of three years, during
20 which the borrower is a member of the Armed
21 Forces of the United States, (iii) not in excess of
22 three years during which the borrower is in service
23 as a volunteer under the Peace Corps Act, or (iv)
24 not in excess of three years during which the bor-
25 rower is in service as a full-time volunteer under

1 title VIII of the Economic Opportunity Act of
2 1964, or (v) not in excess of three years during
3 which the borrower is in service that the President
4 may deem comparable to the service under (ii),
5 (iii), and (iv) above; and
6 (C) contains such other terms and conditions
7 as the Board deems necessary;
8 (3) consolidate all outstanding loans for each stu-
9 dent borrower and establish a contractual repayment
10 schedule which shall not exceed a period of thirty years
11 from the date of such consolidation;
12 (4) enter into agreements with the Secretary of the
13 Treasury for the payment of the amount of loss on any
14 loan in the event of default, or the death or disability of
15 the borrower;
16 (5) enter into agreements with the Secretary of the
17 Treasury providing that the Internal Revenue Service
18 can act as agent of the bank in collecting principal and
19 interest on loans made by the bank;
20 (6) provide, under uniform standards, for the can-
21 cellation, in whole or in part, of the repayment due for
22 any year in which such repayment, in the opinion of
23 the bank, would constitute a hardship, but in no event
24 shall the aggregate cancellation for any year under this

1 provision exceed 10 per centum of the total principal
2 and interest owed by the student.

3 OBLIGATIONS OF BANK; FEDERAL GUARANTEE

4 SEC. 304. (a) The bank is authorized to issue and have
5 outstanding obligations having such maturities and bearing
6 such rate or rates of interest as may be determined by the
7 bank with the approval of the Secretary of the Treasury.
8 Such obligations may be redeemable at the option of the
9 bank before maturity in such manner as may be stipulated
10 therein. The aggregate amount of obligations of the
11 bank outstanding at any one time shall not exceed $5,000,-
12 000,000. The bank may purchase in the open market any
13 of its outstanding obligations.

14 (b) The Secretary of the Treasury shall, upon such
15 terms and conditions as he may prescribe, guarantee obliga-
16 tions issued by the bank under this section. The Secretary
17 may establish and collect fees for guarantees hereunder. Such
18 fees shall, insofar as is practicable having due regard for the
19 purposes of this Act, be fixed with a view to providing in-
20 come sufficient for a self-supporting guarantee program. The
21 full faith and credit of the United States is pledged to the
22 payment of guarantees made under this section with respect
23 to both principal and interest.

24 (c) To provide for the payment of any liabilities
25 incurred as a result of guarantees made under this section,

1 the Secretary of the Treasury is authorized to establish a
2 revolving fund which shall consist of (1) receipts from fees,
3 (2) recoveries under security or subrogation rights or other
4 rights, and any other receipts obtained in connection with
5 such guarantees, and (3) such additional sums, which are
6 hereby authorized to be appropriated, as may be required
7 from time to time to make payments required under such
8 guarantees. Any sums so appropriated shall remain avail-
9 able until expended.
10 (d) Notwithstanding any other provision of law, the
11 Secretary of the Treasury shall have power to pursue to final
12 collection by way of compromise or otherwise all claims ac-
13 quired by him in connection with any security, subrogation,
14 or other rights obtained by him in connection with guaran-
15 tees made under this section.
16 (e) Any guarantee made by the Secretary of the
17 Treasury under this section shall be conclusive evidence of
18 the eligibility of the obligations for such guarantee, and the
19 validity of any guarantee so made shall be incontestable in
20 the hands of a qualified holder of the guaranteed obligation
21 except for fraud or material misrepresentation on the part
22 of such holder.
23 GENERAL POWERS
24 SEC. 305. (a) The bank shall have power—
25 (1) to sue and be sued, complain and defend, in
26 its corporate name and through its own counsel;

1 (2) to adopt, alter, and use a corporate seal, which
2 shall be judicially noticed;
3 (3) to adopt, amend, and repeal by its board of
4 directors such bylaws, rules, and regulations as may be
5 necessary for the conduct of its business;
6 (4) to conduct its business, carry on its operations,
7 and have offices and exercise the powers granted by this
8 title in any State without regard to any qualification or
9 similar statute in any State;
10 (5) to lease, purchase, or otherwise acquire, own,
11 hold, improve, use, or otherwise deal in and with any
12 property, real, personal, or mixed, or any interest therein,
13 wherever situated;
14 (6) to accept gifts or donations of services, or of
15 property, real, personal, or mixed, tangible or intangible,
16 in aid of any of the purposes of the bank;
17 (7) to sell, convey, mortgage, pledge, lease, ex-
18 change, and otherwise dispose of its property and
19 assets;
20 (8) to appoint such officers, attorneys, employees,
21 and agents as may be required, to determine their quali-
22 fications, to define their duties, to fix their salaries, re-
23 quire bonds for them, and fix the penalty thereof; and
24 (9) to enter into contracts, to execute instruments,
25 to incur liabilities, and to do all things as are necessary

1 or incidental to the proper management of its affairs
2 and the proper conduct of its business.
3 (b) The bank is authorized to utilize the services of
4 financial institutions and postsecondary or higher education
5 institutions in the initiation of loans and the certification
6 of the eligibility of prospective borrowers and to pay reason-
7 able compensation to institutions so utilized for services
8 rendered.

9 AUDIT OF FINANCIAL TRANSACTIONS

10 SEC. 306. (a) The financial transactions of the bank shall
11 be audited by the General Accounting Office in accordance
12 with the principles and procedures applicable to commercial
13 corporate transactions and under such rules and regulations
14 as may be prescribed by the Comptroller General of the
15 United States. The audit shall be conducted at the place or
16 places where the accounts are normally kept. The repre-
17 sentatives of the General Accounting Office shall have access
18 to all books, accounts, financial records, reports, files, and
19 all other papers, things, or property belonging to or in
20 use by the bank and necessary to facilitate the audit and
21 they shall be afforded full facilities for verifying transactions
22 with the balances or securities held by depositories, fiscal
23 agents, and custodians.
24 (b) The expenses of any audit performed under this
25 section shall be borne out of appropriations to the General

1 Accounting Office, and appropriations in such sums as may
2 be necessary are authorized. The bank shall reimburse the
3 General Accounting Office for the full cost of such audit
4 as billed therefor by the Comptroller General, and the Gen-
5 eral Accounting Office shall deposit the sums so reimbursed
6 into the Treasury as miscellaneous receipts.

7 AUDIT REPORT TO CONGRESS

8 SEC. 307. A report of each such audit for a fiscal year
9 shall be made by the Comptroller General to the President
10 and to the Congress not later than six months following the
11 close of such fiscal year. The report shall set forth the scope of
12 the audit and shall include a statement of assets and liabilities,
13 capital and surplus or deficit; a statement of surplus or deficit
14 analysis; a statement of income and expense; a statement of
15 sources and application of funds; and such comments and
16 information as may be deemed necessary to keep Congress
17 and the President informed of the operations and financial
18 condition of the bank, together with such recommendations
19 with respect thereto as the Comptroller General may deem
20 advisable, including a report of any impairment of capital or
21 lack of sufficient capital noted in the audit. A copy of each
22 report shall be furnished to the Secretary of Health, Educa-
23 tion, and Welfare, the Secretary of the Treasury, and to the
24 bank.

1 TAX EXEMPTIONS

2 SEC. 308. The bank, its property, its franchise, capital,
3 reserves, surplus, security holdings, and other funds and its
4 income shall be exempt from all taxation now or hereafter
5 imposed by the United States or by any State or local taxing
6 authority; except that (1) any real property and any tan-
7 gible personal property of the bank shall be subject to Fed-
8 eral, State, and local taxation to the same extent according to
9 its value as other such property is taxed, and (2) any and
10 all obligations issued by the bank shall be subjected both as
11 to principal and interest to Federal, State, and local taxation
12 to the same extent as the obligations of private corporations
13 are taxed.

14 OBLIGATIONS AS LAWFUL INVESTMENTS, ACCEPTANCE
15 AS SECURITY

16 SEC. 309. All obligations issued by the bank shall be
17 lawful investments, and may be accepted as security for all
18 fiduciary, trust, and public funds, the investment or deposit
19 of which shall be under authority or control of the United
20 States or of any officer or officers thereof. All obligations
21 issued by the bank pursuant to this Act shall be deemed to be
22 exempt securities within the meaning of laws administered
23 by the Securities and Exchange Commission, to the same
24 extent as securities which are direct obligations of the United
25 States.

1 PREPARATION OF OBLIGATIONS

2 SEC. 310. In order to furnish obligations for delivery by
3 the bank, the Secretary of the Treasury is authorized to pre-
4 pare such obligations in such form as the Board of Directors
5 may approve, such obligations when prepared to be held in
6 the Treasury subject to delivery upon order by the bank. The
7 engraved plates, dies, bed pieces, and so forth, executed in
8 connection therewith shall remain in the custody of the Sec-
9 retary of the Treasury. The bank shall reimburse the Secre-
10 tary of the Treasury for any expenditures made in the prep-
11 aration, custody, and delivery of such obligations.

12 ANNUAL REPORT

13 SEC. 311. The bank shall, as soon as practicable after
14 the end of each fiscal year, transmit to the President and the
15 Congress an annual report of its operations and activities.

16 AMENDMENTS RELATING TO FINANCIAL INSTITUTIONS

17 SEC. 312. (a) The sixth sentence of the seventh para-
18 graph of section 5136 of the Revised Statutes, as amended
19 (12 U.S.C. 24), is amended by inserting "or obligations
20 of the Higher Education Loan Bank," immediately after "or
21 obligations, participations, or other instruments of or issued
22 by the Federal National Mortgage Association or the Gov-
23 ernment National Mortgage Association,".

24 (b) Section 5200 of the Revised Statutes, as amended
25 (12 U.S.C. 84), is amended by adding at the end thereof
26 the following new paragraph:

1 "(14) Obligations of the Higher Education Loan
2 Bank shall not be subject to any limitation based upon
3 such capital and surplus."

4 FEDERAL PAYMENTS FOR DEFERRED INTEREST CANCELLA-
5 TION AND IN THE EVENT OF DEFAULT

6 SEC. 313. (a) In accordance with the agreements en-
7 tered into by him, the Secretary of the Treasury is author-
8 ized to pay in any fiscal year to the Higher Education Loan
9 Bank such amounts as he determines to be necessary to re-
10 imburse the Higher Education Loan Bank for nonpayments
11 due to deferments of principal and interest, cancellations of
12 annual payments, defaults by the borrower, and the death
13 or disablement of the borrower occurring in such year.

14 (b) There are hereby authorized to be appropriated such
15 sums as may be necessary to carry out the purposes of this
16 section.

17 DEFINITION OF ELIGIBLE INSTITUTION

18 SEC. 314. As used in this title—

19 (a) The term "eligible institution" means (1) an insti-
20 tution of higher education, (2) a vocational school, or (3)
21 with respect to students who are nationals of the United
22 States, an institution outside the States which is comparable
23 to an institution of higher education or to a vocational school
24 and which has been approved by the Commissioner of Edu-
25 cation for purposes of section 435 of the Higher Education
26 Act of 1965.

1 (b) The term "vocational school" means a business or
2 trade school, or technical institution or other technical or
3 vocational school, in any State, which the Commissioner of
4 Education has designated pursuant to section 435(c) of
5 the Higher Education Act of 1965.

6 TITLE IV—PROGRAMS FOR COLLEGE OPPORTU-
7 NITIES FOR THE DISADVANTAGED

8 INCENTIVE GRANTS

9 SEC. 401. (a) Section 421 of the Higher Education Act
10 of 1965 (as redesignated by this Act), is amended by re-
11 designating subsection (d) thereof as subsection (e) and
12 inserting in lieu thereof the following new subsection:

13 "(d) Upon application made by an institution of higher
14 education containing any combination of programs set forth
15 in subsection (b) which the Commissioner determines pro-
16 vides a new and imaginative approach to achieving the ob-
17 jectives of this subpart and gives unusual promise in assisting
18 youths to initiate, resume, or complete postsecondary educa-
19 tion, he is authorized to make an incentive grant to any such
20 institution to pay all of the cost of the program described in
21 such application."

22 (b) (1) Section 421(e) of such Act, as redesignated
23 by subsection (a) of this section is amended by striking out
24 "There is authorized to be appropriated to carry out this
25 section" and inserting in lieu thereof:

1 "(1) Except as provided in paragraph (2) of this sub-
2 section there are authorized to be appropriated to carry out
3 this section".
4 (2) Such section 421 (e) is further amended by adding
5 at the end thereof the following new paragraph:
6 "(2) There are authorized to be appropriated such sums
7 as may be necessary to carry out subsection (d) of this
8 section for the fiscal year ending June 30, 1972, and for
9 each of the two succeeding fiscal years."

10 TRAINING GRANTS

11 SEC. 402. Subpart III of part A of title IV of the
12 Higher Education Act of 1965 (as redesignated by this
13 Act), is amended by adding at the end thereof the following
14 new section:

15 "GRANTS FOR TRAINING IN EDUCATIONAL ASSISTANCE
16 OPPORTUNITIES

17 "SEC. 402A. (a) The Commissioner is authorized (with-
18 out regard to section 3709 of the Revised Statutes (41
19 U.S.C. 5)) to make grants, to, or contracts with, State
20 educational agencies and local educational agencies for
21 special projects which will contribute to achieving the ob-
22 jectives of this subpart, and which provide training for
23 teachers and counselors in secondary schools with respect to
24 the availability of financial assistance for youths who desire
25 to initiate, resume, or complete postsecondary education.

04385

1 "(b) Whenever he determines that it will contribute to
2 carrying out the purposes of this section, the Commissioner
3 is authorized to permit programs under this section to include
4 such training for student leaders in secondary schools.
5 "(c) The Commissioner is authorized to provide such
6 stipends and allowances, if any, including travel and sub-
7 sistence expenses for persons undergoing such training, and,
8 if necessary, their dependents, as the Commissioner may by
9 regulation prescribe.
10 "(d) There is hereby authorized to be appropriated
11 such sums as may be necessary to carry out the purposes of
12 this section for the fiscal year ending June 30, 1972, and
13 for each of the two succeeding fiscal years."
14 HIGHER EDUCATION OPPORTUNITIES CENTERS
15 SEC. 403. (a) Section 1306 of the Higher Education
16 Act of 1965 (as redesignated by this Act) is amended by
17 redesignating subsection (b) thereof as subsection (c) and
18 by inserting immediately after subsection (a) the following
19 new subsection (b):
20 "(b) In order to assist in achieving the objectives of
21 this section, the Commissioner is authorized (without regard
22 to section 3709 of the Revised Statutes (41 U.S.C. 5))
23 to enter into lease agreements or other arrangements for
24 the establishment of not more than five hundred college
25 opportunities centers. Such centers shall be located in areas

1 easily accessible to students and parents and, wherever prac-
2 ticable, shall be located in areas having high concentrations
3 of low-income families. Such centers shall make available
4 information, including appropriate application forms, and
5 furnish guidance and counseling services, with respect to
6 all federally assisted programs designed to provide oppor-
7 tunities for education beyond high school, and with respect
8 to attending vocational schools, and institutions of higher
9 education."

10 (b) (1) Section 1306 (c) of such Act (as redesig-
11 nated by subsection (a) hereof) is amended by striking
12 out "There are authorized to be appropriated to carry out
13 the provisions of this section" and inserting in lieu thereof:

14 "(1) For the purpose of carrying out subsection (a) of
15 this section, there are authorized to be appropriated".

16 (2) Such section 1306 (c) is further amended by
17 adding the following new paragraph:

18 "(2) There are authorized to be appropriated sums
19 sufficient to carry out subsection (c) of this section for the
20 fiscal year ending June 30, 1972, and for each of the two
21 succeeding fiscal years."

22 COUNCIL ON COLLEGE OPPORTUNITIES

23 SEC. 404. (a) The Secretary of Health, Education,
24 and Welfare shall appoint a National Advisory Council on
25 College Opportunities composed of fourteen members. Seven

1 members shall be appointed from among individuals who are
2 representative of Federal, State, and local public agencies
3 concerned with providing educational opportunities beyond
4 high school. Seven members shall be appointed from the
5 general public. Of the members appointed from the general
6 public, at least three shall be students receiving financial
7 assistance, provided in whole or in part by the Federal
8 Government, at an institution of higher education.

9 (b) The Council shall assist the Commissioner by—

10 (1) reviewing all programs designed to provide
11 educational opportunities beyond high school for dis-
12 advantaged youth with the purpose of determining the
13 effectiveness of such programs;

14 (2) developing and recommending administrative
15 procedures for effective coordination of Federal programs
16 offering opportunities for education beyond high school
17 for such youth, particularly with respect to coordination
18 at the local level of informational services on such pro-
19 grams and the establishment of procedures for exchang-
20 ing such information among departments and agencies
21 of the Federal Government administering or assisting
22 programs designed to provide educational opportunities
23 beyond high school;

24 (3) developing research and pilot projects which
25 give promise of providing new and potentially more

1 successful means by which students who might benefit
2 from educational opportunities beyond high school may
3 be identified and oriented toward successful completion
4 of such education.

5 (c) The Council shall report to the Secretary of Health,
6 Education, and Welfare and to the Congress annually its
7 findings and recommendations, including recommendations
8 for changes in the law, not later than March 31 of each
9 calender year beginning after the enactment of this Act.

10 (d) Each member of the Advisory Council who is ap-
11 pointed from private life shall receive $100 per diem (in-
12 cluding traveltime) for each day during which he is en-
13 gaged in the actual performance of his duties as a member
14 of the Council. A member of the Council who is an officer
15 or employee of the Federal Government shall serve without
16 additional compensation. All members of the Council shall
17 be reimbursed for travel, subsistence, and other necessary
18 expenses incurred by them in the performance of such duties.

19 (e) The Secretary of Health, Education, and Welfare
20 shall invite one representative each from the Social Security
21 Administration, the Railroad Retirement Board, the Bureau
22 of Indian Affairs, the United States Office of Education, the
23 Veterans' Administration, and the Manpower Administration
24 to participate in a Federal student assistance programs con-
25 ference several times each year. This conference, and its

1 members, shall assist the Council on College Opportunities
2 by—
3 (1) providing any information concerning student
4 assistance programs administered by any of these agen-
5 cies requested by the Council;
6 (2) making recommendations at least once each
7 year to the Council concerning the duties of the Council
8 under section 404 (b) (2) of this Act.
9 STUDENT OUTREACH DEMONSTRATION PROJECTS
10 SEC. 405. (a) The Commissioner of Education, after
11 consultation with the National Advisory Council on College
12 Opportunity for Disadvantaged Youth, is authorized to ar-
13 range by contract, grant, or otherwise, with public and non-
14 profit private agencies for the carrying out by such agencies
15 of programs which—
16 (1) involve the use of innovative methods of activi-
17 ties designed to identify youths of financial or cultural
18 need who show reasonable promise of benefiting from
19 education beyond high school and to assist such youths
20 to undertake such education, and which the Commis-
21 sioner determines may have national significance or will
22 more effectively promote the objectives of subpart III
23 of part A of title IV of the Higher Education Act of
24 1965; or
25 (2) involve programs carried out in secondary
26 schools to identify students who are not now motivated

1 to undertake education beyond high school and to deter-
2 mine the means by which such students who potentially
3 might succeed in education beyond high school can be
4 motivated toward initiating such education, and which
5 the Commissioner determines may have national sig-
6 nificance or will more effectively promote the objectives
7 of subpart III of part A of title IV of the Higher Edu-
8 cation Act of 1965.

9 (b) The Commissioner shall approve arrangements pur-
10 suant to this section only on application by a public or non-
11 profit private agency and upon his finding that —

12 (1) the agency is qualified to carry out the project
13 for which the application is made;

14 (2) the applicant has established effective proce-
15 dures for fund accounting, evaluation of the results of the
16 project, and necessary reporting; and

17 (3) the project has been submitted to the appro-
18 priate State educational agency prior to the submission
19 of the application under this subsection.

20 (c) For the purpose of this section "State educational
21 agency" has the same meaning as provided is section 801
22 (k) of the Elementary and Secondary Education Act of
23 1965.

24 (d) There are authorized to be appropriated sums
25 sufficient for the purpose of this section for the fiscal year

1 ending June 30, 1972, and for the two succeeding fiscal
2 years.

3 SPECIFIC INCLUSION OF GRADUATE STUDENTS IN SPECIAL
4 SERVICES FOR DISADVANTAGED STUDENTS

5 SEC. 406. (a) Section 421 (b) (3) of the Higher Edu-
6 cation Act of 1965 (as redesignated by this Act) is amended
7 by inserting "undergraduate, graduate, or other" before
8 "postsecondary".

9 TITLE V—NATIONAL ADVISORY COUNCIL ON
10 STUDENT ASSISTANCE

11 NATIONAL COUNCIL

12 SEC. 501. (a) The Secretary of Health, Education, and
13 Welfare shall appoint a National Advisory Council on Stu-
14 dent Assistance which shall consist of ten members. At least
15 five of the members shall be appointed from among students
16 enrolled in eligible institutions as defined under title I of the
17 Student Assistance Act of 1969. At least three of the mem-
18 bers who are appointed pursuant to the preceding sentence
19 shall be participants in the programs authorized by title IV
20 of the Higher Education Act of 1965, or by title II of the
21 National Defense Education Act of 1958, or shall be a
22 recipient of any fellowship, scholarship, or grant-in-aid
23 authorized by Federal law.

24 (b) The Council shall advise the Commissioner of Edu-
25 cation on the administration of programs authorized by this

1 Act, by title IV of the Higher Education Act of 1965 and
2 by title II of the National Defense Education Act of 1958,
3 including an evaluation of the effectiveness of such programs
4 in terms of making available greater opportunities for youth
5 to obtain an education beyond high school.

6 (c) The Secretary of Health, Education, and Welfare
7 shall engage such technical assistance as may be required to
8 carry out the functions of the Council, and the Secretary
9 shall make available to the Council such secretarial, clerical,
10 and other assistance and such pertinent data prepared by the
11 Department of Health, Education, and Welfare as it may
12 require to carry out such functions.

13 (d) The Council shall make an annual report of its
14 findings and recommendations (including recommendations
15 for changes in the provisions of this Act, title IV of the
16 Higher Education Act of 1965, and title II of the National
17 Defense Education Act of 1958) to the President and the
18 Congress not later than January 31 of each calendar year
19 beginning after the enactment of this title. The President is
20 requested to transmit to the Congress such comments and
21 recommendations as he may have with respect to such
22 report.

23 (e) Each member of the Advisory Council who is
24 appointed from private life shall receive $100 per diem

1 (including traveltime) for each day during which he is en-
2 gaged in the actual performance of his duties as a member
3 of the Council. A member of the Council who is an officer
4 or employee of the Federal Government shall serve without
5 additional compensation. All members of the Council shall
6 be reimbursed for travel, subsistence, and other necessary
7 expenses incurred by them in the performance of such duties.

92D CONGRESS
1ST SESSION

S. 1410

IN THE SENATE OF THE UNITED STATES

MARCH 30, 1971

Mr. HUMPHREY (for himself, Mr. HART, Mr. MATHIAS, Mr. MONDALE, Mr. MUSKIE, and Mr. STEVENS) introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To amend the Higher Education Act of 1965 to establish a student internship program to offer students practical political involvement with elected officials on the local, State, and Federal levels of government.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That this Act may be cited as the "Interns for Political
4 Leadership Act of 1971."
5 SEC. 2. Title IX of the Higher Education Act of 1965
6 is amended by adding at the end thereof the following new
7 part:

II

1 "PART D—INTERNS FOR POLITICAL LEADERSHIP
2 "PROGRAM GRANTS AND CONTRACTS
3 "SEC. 931. The Secretary is authorized to enter into a
4 contract or other arrangement with a private non-profit agency
5 (to be known as the "National Coordinating Agency")
6 under which such agency will plan, develop, and carry
7 out an internship program under which students will be
8 provided practical political involvement with elected officials
9 in the performance of their duties at all levels of government
10 through internships in their offices. Such internship program
11 shall be carried out through arrangements with institutions
12 of higher education and State and local governments under
13 which students in their third and fourth years of study at
14 the institution will serve as interns in offices of State and
15 local elected officials, and under which the interns will be
16 assigned duties, which will give them an insight into the
17 problems of the different levels of government, as well as
18 an opportunity for research and for involvement in the policy-
19 making process. Such arrangements shall provide for coor-
20 dination between the on-campus educational programs of the
21 persons selected and their activities as interns, with com-
22 mensurate credit given for their work and achievement as
23 interns. Such internship program shall also provide oppor-
24 tunities for students who have participated in the internship
25 program at State and local levels to become interns in the

1 offices of Members of Congress for up to three months during
2 the first year following the receipt of their bachelor's degree.
3 Such internships shall be arranged by the National Coor-
4 dinating Agency with the Members of Congress who wish
5 to participate.

6 "SELECTION OF STUDENTS FOR PARTICIPATION

7 "SEC. 932. The students who are to participate in the
8 internship program provided for in this part shall be selected
9 by the National Coordinating Agency from among students
10 whose names are proposed by participating institutions of
11 higher education. Internships shall be distributed among the
12 States so that insofar as practicable the number for each
13 State bears the same ratio to the total number as the num-
14 ber of Members of Congress from that State bears to the
15 total number of Members of Congress.

16 "FEDERAL SHARE

17 "SEC. 933. The amount of Federal payments on ac-
18 count of carrying out the program provided for in this title
19 by providing for internships in the offices of State and local
20 elected officials may not exceed one-half of the cost thereof.

21 "ADMINISTRATION

22 "SEC. 934. Subject to the terms of the contract or
23 agreement between it and the Secretary, the National Coor-
24 dinating Agency shall prescribe the stipends to be paid to
25 the interns participating in the program provided for in

1 this part, and the duration and other terms and conditions
2 of such internships. The cost of administration of a program
3 may be paid by such agency.

4 "APPROPRIATIONS AUTHORIZED

5 "SEC. 935. There is authorized to be appropriated to
6 carry out this part the sum of $10,000,000 for the fiscal year
7 1972 and for each of the two succeeding fiscal years.

8 "DEFINITION

9 "SEC. 936. Notwithstanding section 1201 (a) or section
10 921 (a), the term 'State' as used in this part means the fifty
11 States, Puerto Rico, and the District of Columbia. For pur-
12 poses of the distribution of internships among the States, in
13 determining the number of Members of Congress for purposes
14 of section 932, the Resident Commissioner for Puerto Rico
15 and the Delegate from the District of Columbia shall be con-
16 sidered Members of Congress, and interns in the offices of
17 Members of Congress shall be attributed to the State of the
18 Member in whose office they are serving."

92D CONGRESS
1ST SESSION

S. 1453

IN THE SENATE OF THE UNITED STATES

APRIL 1, 1971

Mr. JAVITS introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To amend part A of title IV of the Higher Education Act of 1965, relating to educational opportunity grants, in order to authorize an increase in the amount of such grants in certain cases and to authorize such grants for students attending institutions of higher education on a less than full-time but at least half-time basis.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That section 402 of the Higher Education Act of 1965 is
4 amended by striking out the second sentence and inserting in
5 lieu thereof the following: "Such $1,000 limitation shall be
6 increased to $1,200 in the case of a student who during the
7 preceding academic year of college work received grades in

1 the upper half of his class. If the amount of the payment
2 determined under the preceding sentences of this section for
3 an academic year is less than $200 for a student, no payment
4 shall be made under this title to that student for that year."
5 SEC. 2. Section 403 of the Higher Education Act of
6 1965 is amended by adding after "except that" in the first
7 sentence the words "in the case of full-time students", and
8 in the second sentence by striking out "full time" and in-
9 serting in lieu thereof "at least half time".
10 SEC. 3. Section 404 (b) of the Higher Education Act of
11 1965 is amended by striking out clause (1) and inserting in
12 lieu thereof the following:
13 "(1) he has been accepted for enrollment as a full
14 time or at least half time student at such institution or,
15 in the case of a student already attending such institu-
16 tion, is in good standing, and in full time or at least half
17 time attendance there as an undergraduate, but in the
18 case of any such student accepted or in attendance on a
19 less than full-time basis the maximum amounts pre-
20 scribed in section 402 shall be ratably reduced;".

92D CONGRESS
1ST SESSION

S. 1755

IN THE SENATE OF THE UNITED STATES

MAY 4, 1971

Mr. CHILES introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To amend title IV of the Higher Education Act of 1965 to establish a Student Loan Marketing Association.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That this Act may be cited as the "Student Loan Marketing
4 Association Act of 1971".
5 SEC. 2. Title IV of the Higher Education Act of 1965 is
6 amended by adding at the end thereof the following new
7 part G:
8 "PART G—STUDENT LOAN MARKETING ASSOCIATION
9 "DECLARATION OF PURPOSE
10 "SEC. 471. Congress hereby declares that it is the
11 purpose of this part to establish a Government-sponsored

1 private corporation which will be financed by private capital
2 and which will serve as a secondary market and warehousing
3 facility for insured student loans and provide liquidity for
4 student loan investments.

5 "CREATION OF AGENCY

6 "SEC. 472. (a) There is hereby created a body cor-
7 porate to be known as the Student Loan Marketing Associa-
8 tion (hereinafter referred to as the 'Association'). The
9 Association shall have succession until dissolved by Act of
10 Congress. It shall maintain its principal office in the District
11 of Columbia and shall be deemed, for purposes of venue in
12 civil actions, to be a resident thereof. Offices may be estab-
13 lished by the Association in such other place or places as it
14 may deem necessary or appropriate for the conduct of its
15 business.

16 "(b) The Association, including its franchise, capital,
17 reserves, surplus, mortgages, or other security holdings, and
18 income shall be exempt from all taxation now or hereafter im-
19 posed by any State, territory, possession, Commonwealth, or
20 dependency of the United States, or by the District of Colum-
21 bia, or by any county, municipality, or local taxing author-
22 ity, except that any real property of the Association shall
23 be subject to State, territorial, county, municipal, or local
24 taxation to the same extent according to its value as other
25 real property is taxed.

1 "(c) There is hereby authorized to be appropriated to
2 the Secretary of Health, Education, and Welfare such sums
3 as may be necessary for making advances for the purpose of
4 helping to establish the Association. Such advances shall be
5 repaid within such period as the Secretary may deem to be
6 appropriate in light of the maturity and solvency of the
7 Association.

8 "BOARD OF DIRECTORS

9 "SEC. 473. (a) The Association shall have a Board of
10 Directors which shall consist of twenty-one persons, one of
11 whom shall be designated Chairman by the President.

12 "(b) An interim Board of Directors shall be appointed
13 by the President, one of whom he shall designate as interim
14 Chairman. The interim Board shall consist of twenty-one
15 members, seven of whom shall be representative of banks
16 or other financial institutions which are insured lenders under
17 this Act, seven of educational institutions, and seven of the
18 general public. The interim Board shall arrange for an
19 initial offering of common and preferred stocks and take
20 whatever other actions are necessary to proceed with the
21 operations of the Association.

22 "(c) When in the judgment of the President, sufficient
23 common stock of the Association has been purchased by edu-
24 cational institutions and banks or other financial institutions,
25 the holders of common stock which are educational institu-

1 tions shall elect seven members of the Board of Directors and
2 the holders of common stock which are banks or other finan-
3 cial institutions shall elect seven members of the Board of
4 Directors. The President shall appoint the remaining seven
5 directors.

6 "(d) At the time the event described in subsection (c)
7 has occurred, the interim Board shall turn over the affairs of
8 the Association to the regular Board so chosen or appointed.

9 "(e) The directors appointed by the President shall
10 serve at the pleasure of the President and until their succes-
11 sors have been appointed and have qualified. The remaining
12 directors shall each be elected for a term ending on the date
13 of the next annual meeting of the common stockholders of
14 the Association, and until their successors have been elected.
15 Any appointive seat on the Board which becomes vacant shall
16 be filled by appointment of the President. Any elective seat
17 on the Board which becomes vacant after the annual election
18 of the directors shall be filled by the Board, but only for the
19 unexpired portion of the term.

20 "(f) The Board of Directors shall meet at the call of its
21 chairman. The Board shall determine the general policies
22 which shall govern the operations of the Association. The
23 Chairman of the Board shall, with the approval of the Board,
24 select, appoint, and compensate qualified persons to fill the
25 offices as may be provided for in the bylaws, with such

1 executive functions, powers, and duties as may be prescribed
2 by the bylaws or by the Board of Directors, and such per-
3 sons shall be the executive officers of the Association and
4 shall discharge all such executive functions, powers, and
5 duties.

6 "FUNCTIONS

7 "SEC. 474. (a) The Association is authorized, subject
8 to the provisions of this part, pursuant to commitments or
9 otherwise, to make advances on the security of, purchase,
10 service, sell, or otherwise deal in, at prices and on terms and
11 conditions determined by the Association, student loans
12 which are insured under this Act.

13 "(b) Any warehousing advance made under sub-
14 section (a) of this section shall not exceed 80 per centum
15 of the face amount of an insured loan. The proceeds from
16 any such advance shall be invested in additional insured
17 student loans.

18 "COMMON STOCK

19 "SEC. 475. (a) The Association shall have common
20 stock having a par value of $100 per share which may be
21 issued only to lenders under part B of title IV of this Act,
22 pertaining to Guaranteed Student Loans, who are qualified as
23 insured lenders under such part.

24 "(b) Each share of common stock shall be entitled to
25 one vote with rights of cumulative voting at all elections

1 of directors. Voting shall be by classes as described in
2 section 473 (c).
3 "(c) The common stock of the Association shall be
4 transferable only as may be prescribed by regulations of the
5 Secretary of Health, Education, and Welfare, and, as to the
6 Association, only on the books of the Association. The Secre-
7 tary of Health, Education, and Welfare shall prescribe the
8 maximum number of shares of common stock the Association
9 may issue and have outstanding at any one time.
10 "(d) To the extent that net income is earned and real-
11 ized, subject to section 476 (b), dividends may be declared
12 on common stock by the Board of Directors. Such dividends
13 as may be declared by the Board shall be paid to the holders
14 of outstanding shares of common stock, except that no such
15 dividend shall be payable with respect to any share which
16 has been called for redemption past the effective date of
17 such call.
18 "PREFERRED STOCK
19 "SEC. 476. (a) The Association is authorized, with the
20 approval of the Secretary of Health, Education, and Wel-
21 fare, to issue nonvoting preferred stock with a par value of
22 $100 per share. Any preferred share issued shall be freely
23 transferable, except that, as to the Association, it shall be
24 transferred only on the books of the Association.
25 "(b) The holders of the preferred shares shall be entitled

1 to such rate of cumulative dividends and such shares
2 shall be subject to such redemption or other conversion pro-
3 visions as may be provided for at the time of issuance. No
4 dividends shall be payable on any share of common stock at
5 any time when any dividend is due on any share of preferred
6 stock and has not been paid.

7 "(c) In the event of any liquidation, dissolution, or
8 winding up of the Association's business, the holders of the
9 preferred shares shall be paid in full at par value thereof,
10 plus all accrued dividends, before the holders of the common
11 shares receive any payment.

12 "OBLIGATIONS

13 "SEC. 477. (a) The Association is authorized with
14 the approval of the Secretary of Health, Education, and
15 Welfare and the Secretary of the Treasury to issue and have
16 outstanding obligations having such maturities and bearing
17 such rate or rates of interest as may be determined by the
18 Association. Such obligations may be redeemable at the
19 option of the Association before maturity in such manner
20 as may be stipulated therein.

21 "(b) The Secretary of Health, Education, and Welfare
22 is authorized, on behalf of the United States, to guarantee
23 payment when due of principal and interest on obligations
24 issued by the Association in an aggregate amount deter-
25 mined by the Secretary in consultation with the Secretary

1 of the Treasury. The full faith and credit of the United States
2 is pledged to the payment of all amounts which may be re-
3 quired to be paid under any guaranty under this subsection.
4 "(c) To enable the Secretary of Health, Education,
5 and Welfare to discharge his responsibilities under guaran-
6 tees issued by him, he is authorized to issue to the Secretary
7 of the Treasury notes or other obligations in such forms and
8 denominations, bearing such maturities, and subject to such
9 terms and conditions, as may be prescribed by the Secretary
10 of Health, Education, and Welfare with the approval of
11 the Secretary of the Treasury. Such notes or other obliga-
12 tions shall bear interest at a rate determined by the Secre-
13 tary of the Treasury, taking into consideration the current
14 average market yield on outstanding marketable obligations
15 of the United States of comparable maturities during the
16 months preceding the issuance of the notes or other obliga-
17 tions. The Secretary of the Treasury is authorized and di-
18 rected to purchase any notes and other obligations issued
19 hereunder and for that purpose he is authorized to use as
20 a public debt transaction the proceeds from the sale of any
21 securities issued under the Second Liberty Bond Act, as
22 amended, and the purposes for which securities may be
23 issued under that Act, as amended, are extended to include
24 any purchase of such notes and obligations. The Secretary
25 of the Treasury may at any time sell any of the notes or

1 other obligations acquired by him under this subsection. All
2 redemptions, purchases, and sales by the Secretary of the
3 Treasury of such notes or other obligations shall be treated
4 as public debt transactions of the United States. There is
5 hereby authorized to be appropriated to the Secretary of
6 Health, Education, and Welfare such sums as may be nec-
7 essary to pay the principal and interest on the notes or
8 obligations issued by him to the Secretary of the Treasury.
9 "GENERAL POWERS
10 "SEC. 478. The Association shall have power—
11 "(1) to sue and be sued, complain and defend, in
12 its corporate name and through its own counsel;
13 "(2) to adopt, alter, and use the corporate seal,
14 which shall be judicially noticed;
15 "(3) to adopt, amend, and repeal by its board of
16 directors bylaws, rules, and regulations as may be nec-
17 essary for the conduct of its business;
18 "(4) to conduct its business, carry on its opera-
19 tions, and have officers and exercise the power granted
20 by this part in any State without regard to any qualifi-
21 cation or similar statute in any State;
22 "(5) to lease, purchase, or otherwise acquire, own,
23 hold, improve, use, or otherwise deal in and with
24 any property, real, personal, or mixed, or any interest
25 therein, wherever situated;

1 "(6) to accept gifts or donations of services, or of
2 property, real, personal, or mixed, tangible or intangible,
3 in aid of any of the purposes of the Association;
4 "(7) to sell, convey, mortgage, pledge, lease, ex-
5 change, and otherwise dispose of its property and assets;
6 "(8) to appoint such officers, attorneys, employees,
7 and agents as may be required, to determine their
8 qualifications, to define their duties, to fix their salaries,
9 require bonds for them and fix the penalty thereof; and
10 "(9) to enter into contracts, to execute instruments,
11 to incur liabilities, and to do all things as are necessary
12 or incidental to the proper management of its affairs and
13 the proper conduct of its business.
14 "AUDIT OF FINANCIAL TRANSACTIONS
15 "SEC. 479. (a) The financial transactions of the Asso-
16 ciation shall be audited by the Secretary of Health, Educa-
17 tion, and Welfare in accordance with the principles and
18 procedures applicable to commercial corporate transactions
19 and under such rules and regulations as he may prescribe.
20 The audit shall be conducted at the place or places where the
21 accounts are normally kept. The representatives of the Secre-
22 tary shall have access to all books, accounts, financial rec-
23 ords, reports, files, and all other papers, things, or property
24 belonging to or in use by the Association and necessary to
25 facilitate the audit, and they shall be afforded full facilities for

1 verifying transactions with the balances or securities held by
2 depositaries, fiscal agents, and custodians.
3 "(b) The expenses of any audit performed under the
4 section shall be borne out of appropriations to the Depart-
5 ment of Health, Education, and Welfare, and appropriations
6 in such sums as may be necessary are authorized. The Asso-
7 ciation shall reimburse the Department for the full cost of
8 such audit as billed therefor by the Secretary, and the De-
9 partment shall deposit the sums as reimbursed into the Treas-
10 ury as miscellaneous receipts.
11 "AUDIT REPORT TO CONGRESS
12 "SEC. 480. A report of each such audit for a fiscal year
13 shall be made by the Secretary of Health, Education, and
14 Welfare to the President and to the Congress not later than
15 six months following the close of such fiscal year. The re-
16 port shall set forth the scope of the audit and shall include
17 a statement (showing intercorporate relations) of assets
18 and liabilities, capital and surplus or deficit; a statement of
19 surplus or deficit analysis; a statement of income and ex-
20 pense; a statement of sources and application of funds; and
21 such comments and information as may be deemed necessary
22 to keep the President and the Congress informed of the op-
23 erations and financial condition of the Association, together
24 with such recommendations with respect thereto as the
25 Secretary may deem advisable, including a report of any

1 impairment of capital or lack of sufficient capital noted in
2 the audit. A copy of each report shall be furnished to the
3 Secretary of the Treasury and to the Association.

4 "OBLIGATIONS AS LAWFUL INVESTMENT, ACCEPTANCE
5 AS SECURITY

6 "SEC. 481. All obligations issued by the Association
7 shall be lawful investments, and may be accepted as security
8 for all fiduciary, trust, and public funds, the investment or de-
9 posit of which shall be under authority or control of the
10 United States or of any officer or officers thereof. All stock
11 and obligations issued by the Association pursuant to this
12 part shall be deemed to be exempt securities within the
13 meaning of laws administered by the Securities and Ex-
14 change Commission, to the same extent as securities which
15 are direct obligations of, or obligations guaranteed as to
16 principal or interest by, the United States. The Association
17 shall, for the purposes of section 14 (b) (2) of the Federal
18 Reserve Act, be deemed to be an agency of the United
19 States.

20 "PREPARATION OF OBLIGATIONS

21 "SEC. 482. In order to furnish obligations for delivery
22 by the Association, the Secretary of the Treasury is author-
23 ized to prepare such obligations in such form as the Board of
24 Directors may approve, such obligations when prepared to
25 be held in the Treasury subject to delivery upon order by the

1 Association. The engraved plates, dies, bed pieces, and so
2 forth, executed in connection therewith shall remain in the
3 custody of the Secretary of the Treasury. The Association
4 shall reimburse the Secretary of the Treasury for any ex-
5 penditures made in the preparation, custody, and delivery
6 of such obligations.

7 "ANNUAL REPORT

8 "SEC. 483. The Association shall, as soon as practicable
9 after the end of each fiscal year, transmit to the President
10 and the Congress a report of its operations and activities
11 during each year.

12 "SEPARABILITY

13 "SEC. 484. If any provision of this part or the applica-
14 tion thereof to any person or circumstance is held invalid,
15 the validity of the remainder of the part, and the application
16 of such provisions to other persons or circumstances, shall
17 not be affected.".

18 AMENDMENTS RELATING TO FINANCIAL INSTITUTIONS

19 SEC. 3. (a) The sixth sentence of the seventh para-
20 graph of section 5136 of the Revised Statutes, as amended
21 (12 U.S.C. 24), is amended by inserting "or obligations or
22 other instruments or securities of the Student Loan Marketing
23 Association," immediately after "or obligations, participa-
24 tion, or other instruments of or issued by the Federal Na-

1 tional Mortgage Association or the Government National
2 Mortgage Association,".
3 (b) Section 5200 of the Revised Statutes, as amended
4 (12 U.S.C. 84), is amended by adding at the end thereof
5 the following new paragraph:
6 "(14) Obligations of the Student Loan Marketing Asso-
7 ciation shall not be subject to any limitation based upon
8 such capital and surplus."
9 (c) The first paragraph of section 5(c) of the Home
10 Owners' Loan Act of 1933, as amended (12 U.S.C. 1464
11 (c)), is amended by inserting "or in obligations or other
12 instruments or securities of the Student Loan Marketing
13 Association;" in the second proviso immediately after "any
14 political subdivision thereof".
15 (d) Section 8(8)(E) of the Federal Credit Union
16 Act, amended (12 U.S.C. 1757(8)(E)), is amended by
17 inserting before the semicolon at the end thereof the follow-
18 ing: ", or in obligations or other instruments or securities
19 of the Student Loan Marketing Association".

92D CONGRESS
1ST SESSION

S. 1756

IN THE SENATE OF THE UNITED STATES

MAY 4, 1971

Mr. CHILES introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To amend the Higher Education Act of 1965 in order to strengthen the student insured loan program, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That this Act may be called the "Student Loan Assistance
4 Act of 1971".

5 SEC. 2. (a) The first sentence of section 424 (a) of the
6 Higher Education Act of 1965 is amended by striking out
7 the word "three" and inserting in lieu thereof the word
8 "eight".

9 (b) The second sentence of section 424 (a) of such Act

425
USP

1 is amended by striking out "June 30, 1975" and inserting in
2 lieu thereof "June 30, 1980".
3 SEC. 3. (a) (1) The first sentence of section 425 (a) of
4 the Higher Education Act of 1965 is amended by inserting
5 immediately before the period a comma and the following:
6 "except that pursuant to such regulations as the Commis-
7 sioner may establish, such total in any academic year or its
8 equivalent may exceed $1,500 but not $2,500 if the student
9 has been accepted for enrollment or is attending an eligible
10 institution taking a course of study for which the fees are
11 unusually high."
12 (2) The second sentence of section 425 (a) of such
13 Act is amended by inserting before the period therein a
14 comma and the following: "except that in any case where
15 the total of loans made to any student in any academic
16 year exceeds $1,500, such aggregate shall not at any time
17 exceed $10,000".
18 (b) (1) The first sentence of section 425 (b) of such
19 Act is amended by inserting before the period thereof a
20 comma and the words "plus interest".
21 (2) The second sentence of such section is amended
22 to read as follows: "The full faith and credit of the United
23 States is pledged to the payment of all amounts which may
24 be required to be paid under the provisions of section 430
25 or 437 of this part.".

1 SEC. 4. (a) Section 427 (a) (2) (B) of the Higher
2 Education Act of 1965 is amended by striking out "less than
3 5 years", by striking out "(unless sooner repaid) was",
4 and by striking out "earlier than 9 months nor".
5 (b) Section 427 (a) (2) (D) of such Act is amended
6 by striking out "(but without thereby increasing the insur-
7 ance liability under this part)".
8 SEC. 5. (a) Section 428 (a) (4) of the Higher Educa-
9 tion Act of 1965 is amended by striking out "June 30,
10 1971" and inserting in lieu thereof "June 30, 1976", and
11 by striking out "June 30, 1975" and inserting in lieu there-
12 of "June 30, 1980".
13 (b) Section 428 (b) (1) (D) is amended by striking
14 out "less than 5 years nor" and by striking out "earlier than
15 9 months nor".
16 (c) Section 428 (b) (1) of such Act is amended (1)
17 by striking out the word "and" in paragraph (J) there-
18 of, (2) by striking out the period at the end of paragraph
19 (K) of such section and inserting in lieu thereof a semi-
20 colon and the word "and", and (3) by adding at the end
21 thereof the following new paragraph:
22 "(L) provides that the lender will not collect or
23 attempt to collect from the borrower any portion of the
24 interest on the note which is payable by the Commission-
25 er under this part."

1 SEC. 6. Section 429 (c) of the Higher Education Act
2 of 1965 is amended by striking out "one-fourth of 1 per
3 centum" and inserting in lieu thereof "one-half of 1 per
4 centum".

5 SEC. 7. Section 434 of the Higher Education Act of
6 1965 is amended by striking out "up to 15 per centum of
7 their assets,".

8 SEC. 8. Section 430 (a) of the Higher Education Act of
9 1968 is amended by striking out " (other than interest added
10 to principal) ".

11 SEC. 9. Section 435 (a) of the Higher Education Act of
12 1965 is amended by adding at the end thereof the following
13 new sentence: "Notwithstanding any other provision of this
14 part, whenever the Commissioner determines that it is neces-
15 sary in order to carry out the purposes of this part and after
16 affording an opportunity for a hearing he is authorized to
17 suspend or terminate eligibility under this part for any single
18 otherwise eligible institution.

19 SEC. 10. Section 2 (a) (7) of the Emergency Insured
20 Student Loan Act of 1969 is amended by striking out
21 "June 30, 1971" and inserting in lieu thereof "June 30,
22 1976".

23 SEC. 11. Section 104 of the Truth in Lending Act (15

1 U.S.C. 1603) is amended by adding the following new para-
2 graph at the end thereof:
3 "(5) Loans under title II of the National Defense Edu-
4 cation Act of 1958 or loans to which title IV of the Higher
5 Education Act of 1965 is applicable."

Senator PELL. Senator Javits has a statement he wishes to insert in the record at this point.

STATEMENT OF HON. JACOB K. JAVITS, A U.S. SENATOR FROM THE STATE OF NEW YORK

Senator JAVITS. Mr. Chairman, some years ago when he was president of the University of California, Clark Kerr, now chairman of the Carnegie Commission on Higher Education, observed:

> I find that the three major administrative problems on a campus are sex for the students, athletics for the alumni and parking for the faculty.

As Dr. Kerr has since acknowledged, times have changed.

We are living in an era where higher education enrollments have tripled since 1955, higher education budgets have doubled since 1960, and annual expenditures per student have been rising three times as fast as the cost of living.

When I graduated from high school, only 17 percent of all young Americans were able to finish secondary school—today almost 75 percent of all our youngsters finish high school, and more than half of these head for post-secondary education, either college or vocational. Higher education has an annual budget of $26 billion—8.2 million Americans are enrolled in the Nation's colleges and universities.

If we are to meet the challenges of this new era, then innovation, reform and quality programs must be nurtured. In the reports on the 1966 and 1968 higher education bills, the minority members of this committee joined in a statement asserting that:

> As Republicans we are actively interested in achieving the goal sought by our party for more than a century—making available a higher education for all young Americans who qualify and who seek it.

In our 1968 report we also urged "an exercise of imagination in fostering American higher education." The two go together—increased opportunities and innovation. Truly, innovation is the key if our colleges and universities are to be able to offer quality schooling to the growing number of people of all ages and from all walks of life desirous and capable of achieving it.

In keeping with this need, on yesterday, together with Senators Beall, Dominick, Griffin, Prouty, Schweiker and Scott, I introduced the administration's bill, the National Foundation for Higher Education Act of 1971, S. 1062, to establish within HEW the Foundation as the Government's principal agency for stimulating innovation and reform in post-secondary education and for the support of quality post-secondary programs.

I ask unanimous consent that following my remarks there be included the explanatory statement made on the Senate floor in introducing the bill.

Also yesterday I introduced three other bills relating to higher education; namely, an amendment to the Higher Education Facilities Act to provide 66 percent Federal construction matching funds for developing institutions, such as Negro colleges, S. 1072; the State Higher Education Student Aid Act, S. 1074, to provide student incentive grants to the States on a matching basis, and to provide for educational-opportunity centers to facilitate the recruiting of the disadvantaged into higher education; and the Consolidation of Special Higher Education Programs Act, S. 1073, to consolidate into one title a num-

ber of existing higher education programs which have been previously authorized by Congress, but not yet funded.

I ask unanimous consent that following my remarks there be included the explanatory statements made in the Senate in introducing these bills.

Finally, Mr. Chairman, I should like to express my support for yours and the subcommittee's intention thoroughly to explore our higher education problems in order that we might give the Congress and the Nation the legislation so very much needed. I hope that we will have an opportunity to hear all the Federal agencies concerned—HEW and Treasury—and the various groups at interest as well as distinguished authorities in the field.

(The information submitted by Senator Javits follows:)

[From the Congressional Record, Mar. 2, 1971]

NATIONAL FOUNDATION FOR HIGHER EDUCATION ACT

By Mr. JAVITS (for himself, Mr. Beall, Mr. Dominick, Mr. Griffin, Mr. Prouty, Mr. Schweiker, and Mr. Scott):

S. 1062. A bill to establish a National Foundation for Higher Education, and for other purposes. Referred to the Committee on Labor and Public Welfare.

Mr. JAVITS. Mr. President, I introduce for appropriate reference the National Foundation for Higher Education Act. I introduce the bill on behalf of myself, the Senator from Vermont (Mr. Prouty), the Senator from Maryland (Mr. Beall), the Senator from Colorado (Mr. Dominick), the Senator from Michigan (Mr. Griffin), the junior Senator from Pennsylvania (Mr. Schweiker), and the senior Senator from Pennsylvania (Mr. Scott).

Mr. President, this is an administration bill. Although the bill itself does not provide an amount of funds, it is budgeted by the administration at $100 million. Its purpose is to encourage innovation in higher education. We simply cannot take for granted in modern times that education is a 4-year course for undergraduates; that it is a 3-year course for postgraduates; that there are certain norms and forms for doctorates or masters' degrees; or that only those within given age groups, to wit, roughly from 19 to 24 or 25, are appropriate students for higher education.

The bill would create a National Foundation for Higher Education with the Department of Health, Education, and Welfare as the Federal Government's principal agency for stimulating innovation and reform in postsecondary education and for the support of quality postsecondary programs.

At a time when some 8.2 million of our young people are enrolled at the Nation's colleges and universities and higher education has an annual budget of $26 billion—and both figures are steadily increasing—it is vital that innovation, reform and educational excellence be nurtured if postsecondary schooling is to be able to meet the challenge of this new age.

Under the bill, institutions of higher education will be able to undertake innovative programs which they heretofore have not been able to venture into because of the narrow confines of existing Federal programs and their own tight budgets. The Foundation will have authority to make grants, for example, for programs based on communications technology, developing cost-effective methods of instruction and operation, introducing reforms in the structure of academic professions and the recruitment and retention of faculties, new combinations of academic and experimental learning, and the creation of programs of study tailored to individual needs.

The recent announcement by the Carnegie Corp. and the Ford Foundation that they intend to spend $1.8 million in New York State to help start two new off-campus degree programs represents exactly the type of activity which the Foundation might undertake to help break down the walls which exist in some areas of the higher education community.

Some years ago Clark Kerr, as president of the University of California, observed:

"I find that the three major administrative problems on a campus are sex for the students, athletics for the alumni and parking for the faculty."

In an era where enrollments have tripled since 1955, higher education budgets have doubled since 1960, and annual expenditures per student have been rising three times as fast as the cost of living, this no longer can be true.

Truly, in the years ahead, innovation is the key, if the Nation's colleges and universities are to be able to offer quality higher education to the growing number of our people of all ages and from all walks of life desirous and capable of achieving it. New models of teaching and learning must be developed. There must be a source of support for experimentation, for probings into new areas of scholarship, and for radically different kinds of education, time, and facilities in which to undertake them.

I ask unanimous consent that there be included at this point in my remarks a section-by-section analysis of the National Foundation for Higher Education Act of 1971, the pertinent excerpts from the President's February 22 message entitled "Expanding Opportunities for Higher Education," and the news story from the February 17 New York Times describing the Carnegie Corporation-Ford Foundation program in New York State to which I earlier referred.

There being no objection, the items were ordered to be printed in the Record, as follows:

"SECTION-BY-SECTION ANALYSIS OF THE NATIONAL FOUNDATION FOR HIGHER EDUCATION ACT OF 1971

"CITATION

"This section provides that the Act may be cited as the 'National Foundation for Higher Education Act of 1971.'

"*Section 2. Establishment of National Foundation for Higher Education*

"Section 2 of the bill establishes in the Department of Health, Education, and Welfare a National Foundation for Higher Education. The President is authorized to appoint, with the advice and consent of the Senate, a Director of the Foundation who is to perform such duties as the Secretary of HEW prescribes.

"*Section 3. Purposes of the Foundation*

"Section 3 states that the purposes of the Foundation are—

"(1) to encourage excellence, innovation, and reform in postsecondary education;

"(2) to provide assistance for the design and establishment of innovative structures for providing postsecondary education and innovative modes of teaching and learning therein.

"(3) to expand the ways and patterns of acquiring postsecondary education and to open opportun 'es for such education to individuals of all ages and circumstances;

"(4) to strengthen the autonomy, individuality, and sense of mission of postsecondary educational institutions, and to support programs which are distinctive or of special value to American society; and

"(5) to encourage postsecondary educational institutions to develop policies, programs, and practices responsive to social needs, and to provide an organization concerned with the rationalization of public policies toward postsecondary education.

"*Section 4. Higher Education Foundation Board*

"*Section 4* authorizes the President to appoint, without regard to laws governing appointment in the competitive service, an 18 member Higher Education Foundation Board. The Board is to advise the Secretary and the Director with respect to matters of general policy arising in the administration of this Act and programs to be carried out under the Act. The Board is also to prepare an annual report to the Secretary on the current status and needs of postsecondary education in the United States. The Secretary is to transmit this report to the President with his recommendations.

"*Subsection (b)* provides that there shall be 18 members on the Board, broadly representative of the general public and the education community. Members are to serve staggered three year terms, except that members appointed to fill a vacancy are to serve for the remainder of that term. Board members are to receive per diem and travel expenses while serving on the business of the Board.

"*Section 5. Assistance*

"*Section 5* authorizes the Secretary to make grants to and contracts with public or private agencies, organizations, or institutions, or any combination thereof, in order to achieve the purposes of the Foundation. Grants may be made only to non-profit private agencies, organizations, or institutions. Among the activities for which assistance may be awarded are—

"(1) the creation of institutions and programs involving new paths to career and professional training, and new combinations of academic and experimental learning;

"(2) the establishment of institutions and programs based on the technology of communications;

"(3) the carrying out in postsecondary education institutions of changes in internal structure and operations designed to clarify institutional priorities and purposes;

"(4) the design and introduction of cost-effective methods of instruction and operation;

"(5) the introduction of institutional reforms designed to expand individual opportunities for entering and re-entering institutions and pursuing programs of study tailored to individual needs;

"(6) the introduction of reforms in graduate education, in the structure of academic professions, and in the recruitment and retention of faculties;

"(7) the creation of new institutions and programs for examining and awarding credentials to individuals, and the introduction of reforms in current institutional practices related thereto;

"(8) the development or revitalization of education and training programs of national importance; and

"(9) the alteration or remodeling of buildings to the extent necessary to achieve the objectives of any other activity assisted under section 5.

"The Secretary is also authorized to make grants or contracts for studies in the field of postsecondary education, including studies related to postsecondary education finance, organization and management.

"*Section 6. Fellowships*

"*Section 6* authorizes the Secretary to award fellowships and to pay stipends (including allowances for subsistence and other expenses for the fellows and their dependents) to fellowship holders where appropriate and necessary to carry out the purposes of the Act.

"*Section 7. General authority*

"*Section 7* gives the Secretary the authority—

"(1) to enter into contracts without performance or other bonds, and without regard to section 3709 of the Revised Statutes (dealing with solicitation of proposals).

"(2) to make advance, progress, and other payments without regard to the provisions of Section 3648 of the Revised Statutes.

"(3) to receive money and other property donated, bequeathed, or devised to the Foundation with or without a condition or restriction, including a condition that the Foundation use other funds for the purposes of the gift; and to use, sell, or otherwise dispose of such property for the purposes of the Act;

"(4) to publish or arrange for the publication of information without regard to the provisions of section 501 of title 44, United States Code (requiring printing work to be done by the Government Printing Office).

"(5) to accept and utilize the services of voluntary and uncompensated personnel, notwithstanding the provisions of section 3679(b) of the Revised Statutes, and to provide transportation and subsistence as authorized by section 5703 of title 5, U.S.C. for persons serving without compensation; and

"(6) to arrange with and reimburse the heads of other Federal agencies for the performance of any activity which the Foundation is authorized to conduct.

"*Section 8. Miscellaneous provisions*

"*Section 8* in subsection (a) authorizes the Secretary to appoint and compensate such non-civil service technical and professional personnel as he deems necessary to accomplish the functions of the Foundation.

"*Subsection (b)* authorizes the transfer of funds appropriated under this Act to any other Federal department or agency for use (in accordance with an interagency agreement) by such agency for purposes for which such transferred funds could be otherwise expended by the Secretary under this Act. The Secretary is

likewise authorized to accept transferred funds from other Federal agencies for use under this Act.

"*Subsection* (*c*) requires that all laborers and mechanics employed on construction projects assisted under this Act be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act.

"*Section 9. Joint funding*

"*Section 9* provides that, pursuant to regulations issued by the President, where funds are advanced by the Foundation and one or more other Federal agencies, any one agency may be designated to act for all in administering such funds. In such cases, any agency may waive a technical requirement which is inconsistent with similar requirements of the administering agency, or which the administering agency does not impose.

"*Section 10. Amendments to executive schedule*

"*Section 10* amends section 5316 of title 5, U.S.C. relating to positions at Level V of the Executive Schedule, by striking out the Commissioner of Education and inserting the Director of the National Foundation for Higher Education.

"*Subsection* (*b*) *of section 10* amends section 5315 of such title, relating to positions at Level IV of the Executive Schedule, by adding the Commissioner of Education.

"*Section 11. Availability of appropriations*

"*Section 11* provides that funds appropriated to carry out this Act shall remain available until expended."

"EXPANDING OPPORTUNITIES FOR HIGHER EDUCATION

("Message from the President of the United States)

"*To the Congress of the United States:*

"Nearly a year ago, in my first special message on higher education, I asked the Congress to join me in expanding higher education opportunities across the nation. First, I proposed to reform and increase aid to students. Second, I proposed a National Foundation for Higher Education designed to reform and strengthen post secondary education.

"Neither house of Congress acted on these proposals. Now the time for action is growing short. Existing legislative authority for the basic Federal higher education programs expires at the end of the current fiscal year.

"1971 can be a year of national debate on the goals and potentials of our system of higher education. It can be a time of opportunity to discover new concepts of mission and purpose, which are responsive to the diverse needs of the people of our country. I therefore again urge the Congress to join with me in expanding opportunities in two major ways:

* * * * * * *

"RENEWAL, REFORM AND INNOVATION

"If we are to make higher education financially accessible to all who are qualified, then our colleges must be prepared both for the diversity of their goals and the seriousness of their intent. While colleges and universities have made exceptional efforts to serve unprecedented numbers of students over the last decade, they must find additional ways to respond to a new set of challenges:

"—All to often we have fallen prey to the myth that there is only one way to learn—by sitting in class, reading books, and listening to teachers. Those who learn best in other ways are rejected by the system.

"—While the diversity of individuals seeking higher education has expanded in nearly every social dimension—age, class, ethnic background—higher education institutions have become increasingly uniform and less diverse.

"—Increasingly, many colleges, and particularly universities, have become large, complex institutions which have lost their way. The servants of many masters and the managers of many enterprises, they are less and less able to perform their essential tasks well.

"—At the present time, thousands of individuals of all ages and circumstances are excluded from higher education for no other reason than that the

system is designed primarily for 18–22 year olds who can afford to go away to college.

"—At the present time, institutional and social barriers discourage students from having sustained experiences before or during their college years which would help them get more out of college and plan for their future lives.

"The relationship between the Federal Government and the universities has contributed little to meeting these needs because it has not been a genuine partnership. In many cases the Federal Government has hired universities to do work which has borne little natural relationship to the central functions of the institution. Too often, the Federal Government has been part of the problem rather than part of the solution.

"Certain Federal agencies promote excellence, innovation, and reform in particular areas. The National Science Foundation has played a magnificent role in the public interest for science, and the National Institutes of Health have played a similar role for health.

"The National Foundation for Higher Education would fulfill a new role in the Federal Government. It would have as its mandate a review of the overall needs of the American people for postsecondary education. It would have as its operating premises, the principles of selectivity and flexibility. Its constituency would include people as well as institutions—and not only the usual secondary student entering college, but also others—such as the person who wants to combine higher education with active work experience, or the one who has left school and wants to return.

"The Foundation can do much to develop new approaches to higher education:

"—New ways of 'going to college.' I am impressed with the need for new and innovative means of providing higher education to individuals of all ages and circumstances (Britain and Japan, for example, have already taken significant steps in the use of television for this purpose).

"—New patterns of attending college. A theme of several recent reports is that students are isolated too long in school, and that breaking the educational 'lock-step' would enable them to be better and more serious students (as were the GI's after World War II). If so, student bodies would reflect a greater mix of ages and experience, and colleges would be places for integrating rather than separating the generations.

"—New approaches to diversify institutional missions. Colleges and universities increasingly have aspired to become complex and 'well rounded' institutions providing a wide spectrum of general and specialized education. The Foundation could help institutions to strengthen their individuality and to focus on particular missions by encouraging and supporting excellence in specific areas—be it a field of research, professional training, minority education, or whatever.

"CONCLUSION

"These are but some of the new approaches to higher education which need to be pursued. A theme common to all of them is a new kind of engagement between all the citizens of our society and our system of higher education. All of us can make a contribution to bringing about such an engagement by taking part in a thoughtful national discussion about our priorities for higher education. Students and faculties can make a contribution by reexamining their goals and the means they choose to achieve them. The Federal Government can do its part by supporting access to higher education for all of our people and by providing the resources needed to help develop new forms of higher education which would be responsive to all of their needs.

"RICHARD NIXON.

"THE WHITE HOUSE, *February 22, 1971.*"

["From the New York Times, Feb. 17, 1971]

"$1.8 MILLION TO AID OFF-CAMPUS STUDIES

("By M. S. Handler)

"The Carnegie Corporation and the Ford Foundation have awarded the State University of New York and the State Education Department grants totaling $1.8-million to help start two new off-campus degree programs.

"The programs, if successful, could introduce radical changes in the structure of higher education in the United States.

"The programs will permit off-campus students—adults who were unable to go to college—to earn degrees through independent study and examination outside the traditional patterns and rules of college education.

"The foundations each provided $500,000 to the State University and $400,000 to the State Education Department, to be disbursed over two years. Governor Rockefeller, in a statement yesterday, praised the program, which will also require financial support from the State Legislature.

"The general outlines of the off-campus degree programs, largely inspired by London University's external-degree program and Britain's new Open University, were discussed at a news conference yesterday.

"The participants were Alan Pifer, president of the Carnegie Corporation, Harold Howe, 2d, vice president of the Ford Foundation, Dr. Ernst L. Boyer, Chancellor of the State Universtiy of New York, and Ewald B. Nyquist, Commissioner of the State Education Department. The conference was held at Governor Rockefeller's office at 22 West 55th Street.

"Dr. Boyer said that the $1-million the University would receive would accelerate plans to establish an off-campus undergraduate college in the Albany area. Its function will be to administer the University's program.

"Under faculty direction centered at many of the system's colleges, students of the new college will pursue individual programs of study through counseling, correspondence, occasional seminars and examinations.

"NO TIME LIMIT SET

"There will be no time limit on the number of years required for a degree. High school graduates will be eligible for the program, which will be available in combinations suited to the individual's needs and circumstances.

"Chancellor Boyer estimated that at least 500 students would be enrolled in the academic year of 1971–72. He stressed the great reservoir of untapped talents among adults who did not get an opportunity to enter college because of financial or other reasons.

"The State Education Department's $800,000 program, which will start at the same time, while substantially different from that the State University, will complement it by reaching another category of adults.

"Under the department's program, the Board of Regents will award an associate or bachelor's degree to persons who pass the required number of college level examinations regardless of how they prepared for them.

"Commissioner Nyquist said there were many men and women who had acquired more than a bachelor's knowledge in the working careers and were capable of taking examinations for degrees.

"REGENTS TO AWARD DEGREES

"The Board of Regents will award undergraduate degrees to persons, without regard to such considerations as age or place of residence within the state, who possess knowledge equivalent to that of a regular college graduate.

"Mr. Pifer and Mr. Howe said the two New York State programs would be the largest off-campus degree experiments yet tried in the United States.

"Mr. Pifer said the Carnegie Corporation and the Ford Foundation had for many years been interested in introducing greater flexibility in American higher education and that they were delighted when Mr. Nyquist and Dr. Boyer came forward with their specific program suggestions.

"Pursuing its policy of greater flexibility in higher education, the Ford Foundation also announced yesterday two other grants—One, for $400,000, will go to 19 institutions participating in the planning and development of a new University Without Walls program. The other, for $300,000, will go to the Policy Insurance of Syracuse University to study the establishment of an external baccalaureate degree program coordinated through institutions in the counties of Onondaga, Madison, Oswego, Cayuga and Cortland."

By Mr. JAVITS:

S. 1072. A bill to amend the Higher Education Facilities Act of 1963 in order to increase the maximum Federal share under such act to 66 per centum in the case of certain developing institutions. Referred to the Committee on Labor and Public Welfare.

Mr. JAVITS. Mr. President, I introduce for appropriate reference a bill to amend the Higher Education Facilities Act to provide 66 percent Federal construction matching funds for "developing institutions," defined in title II of the Higher Education Act as colleges which, for financial or other reasons, are struggling for survival and are developing institutions themselves. These schools, for the most part, serve students from lower income families and have very little in the way of endowments or other financial resources to meet their needs.

Under existing law, all colleges, both established and developing institutions, receive 50 percent Federal matching funds for construction of facilities.

The education appropriation bill for the current fiscal year provides $43 million for grant construction assistance.

Typical of these developing institutions are the 68 private and 43 public higher education institutions with a predominantly Negro student body. The median family income of the students attending these institutions is $3,900; the national median is $7,974. In 1968 and 1969, predominantly white colleges received $96 million in grants from private philanthropy of which $11 million was for building and equipment. This is contrasted with the $4.6 million given to predominantly black schools of which some $150,000 was for construction and equipment.

The Office of Education indicates that there are some 400 developing institutions in the Nation. Included among those which are located in New York State are the College of St. Rose in Albany, Keuka College in Keuka Park, Manhattan College in the Bronx in New York City, and Trocaire College in Buffalo.

CONSOLIDATION OF SPECIAL HIGHER EDUCATION PROGRAMS ACT

By Mr. JAVITS:

S. 1073. A bill to consolidate and improve certain programs for higher education, and for other purposes. Referred to the Committee on Labor and Public Welfare.

Mr. JAVITS: Mr. President, I introduce, for appropriate reference, the Consolidation of Special Higher Education Programs Act.

This bill consolidates into one title a number of existing higher education programs which have been previously authorized by the Congress but not funded. These programs are interinstitutional networks for knowledge—title VIII of the Higher Education Act, education for the public service—title IX of the Higher Education Act, clinical experience for students of law—title XI of the Higher Education Act, and international affairs and foreign language education—the International Education Act and title VI of the National Defense Education Act.

By consolidating these provisions, new life can be breathed into them so that they might realize the promise envisioned when first enacted by the Congress.

An authorization of $86.5 million for fiscal year 1972 is provided, which is the sum of the authorizations which were provided for the component programs; thus consolidation does not diminish the intent of the legislation.

STATE HIGHER EDUCATION STUDENT AID ACT OF 1971

By Mr. JAVITS:

S. 1074. A bill to authorize assistance to the States in establishing and carrying out programs of higher education student aid. Referred to the Committee on Labor and Public Welfare.

Mr. JAVITS. Mr. President, I introduce for appropriate reference the State Higher Education Student Aid Act of 1971.

This measure has two principal provisions:

First, the bill would provide student incentive grants to the States on a matching basis to assist young people from families of substantial need to obtain a higher education. This provision is designed to encourage the States to expand their present programs of grant assistance to students, and complements the administration bill and existing student-aid programs of Federal educational opportunity grants, direct and guaranteed loans, and work-study. States would receive funds only when they expand their present efforts. Thus, this money would supplement, not supplant, existing programs.

Second, the bill would provide for educational-opportunity centers in areas with major concentrations of low-income population to facilitate the recruiting of disadvantaged children into higher education. These centers would provide in-

formation concerning financial and academic support available at colleges, assistance in applying for admittance to such schools, including preparing detailed documentation for use by admissions and financial aid officers, provide counseling services and tutorial help. This second part follows recent recommendations of the Carnegie Commission on Education, which has emphasized that—

"To make recruiting programs fully effective, there is an urgent need for institutions to coordinate planning and combine resources."

Thus, programs such as New York State's urban centers would be encouraged throughout the Nation by this provision.

For the first year, the bill authorizes $50 million for the student incentive grant program and $20 million for the educational opportunity center program.

What is being done now by my own State of New York to assist individual students to attend college serves as an example of what this measure seeks to develop. During the last complete school year some 245,500 young New Yorkers held State scholarships and grants worth about $69.9 million, a tenfold increase over the past decade. And just as New York is being confronted with pressures due to increased enrollments and rising tuition costs to still further expand its program, so are other States similarly beset. In New York, the dollar amount of regents scholarships ranges from $250 to $1,000 yearly, depending upon the financial resources of the student. My bill would provide up to 750 Federal dollars for each student in equal matching funds from the State.

College enrollment, now at over 8 million and double that of a decade ago, is expected to increase nearly 50 percent by 1976–77. Today 40 per cent of young Americans enter college; a century ago, shortly after President Lincoln had signed the land-grant college law, only 2 per cent were so privileged.

And while enrollments have increased, so have costs. The average amount an undergraduate pays for tuition and required fees has doubled in the past 10 years. The Office of Education indicates that the estimated average amounts for tuition and required fees, board and dormitory rooms is $1,324 in 4-year public colleges and $2,844 in private universities.

It is obvious that if we are to achieve the goal iterated by President Nixon in his February 22 message on higher education, that "no qualified student who wants to go to college should be barred by lack of money", not only must the Federal Government enlarge its efforts, but the States must also do so. This bill seeks to encourage the States to do just that.

Senator PELL. Philosophically, I believe that the Federal Government should provide a floor of assistance, as a matter of right, to all students who wish to pursue a post-secondary education.

The administration's proposal, on the other hand, would provide limited amounts of grants turning on need and rely upon a system of loans to provide further assistance. While some would say this is a different method, I disagree, it is indeed a difference in philosophic approach.

Just what is to be the continuing role of the Federal Government in regard to higher education? For example, would not the establishment of something like a national student loan association, create a permanent institution which would forestall the day of direct grants? Would it not be wiser to generate student loan funds through a warehousing device available to meet the needs, but flexible in its purpose?

These are some of the questions we will explore in these hearings. There are many facts and figures which must be generated and understood, but underlying our consideration will be the basic question of the Federal role. Once that issue is resolved, I think the other questions will fall into place.

Today and tomorrow we will be hearing from the administration. Today the administration will be discussing its general higher education bill and I must say it is unfortunate that the bill is not before us. Our bill, as you know, has been in for a number of weeks. I regret that we don't have the administration's bill for this will limit the ex-

tensiveness of our questions, but we do have the general thrust of it from the messages that have been sent up to us.

We are having these hearings at this time as a joint effort on behalf of the Secretary and our own subcommittee in our efforts to move ahead promptly, because if we wait we will not get the legislation through in a timely manner.

My understanding is that the Secretary would like to make his presentation first, and hopefully that questions to him would take a short period of time, then Commissioner Marland and Mr. Muirhead will carry on. This procedure is acceptable, however, I have not consulted with other members of the subcommittee, so we will have to see how it goes.

STATEMENT OF HON. ELLIOT L. RICHARDSON, SECRETARY OF HEALTH, EDUCATION, AND WELFARE; ACCOMPANIED BY DR. SIDNEY P. MARLAND, JR., U.S. COMMISSIONER OF EDUCATION; PETER MUIRHEAD, EXECUTIVE DEPUTY COMMISSIONER, U.S. OFFICE OF EDUCATION; AND CHRISTOPHER CROSS, DEPUTY ASSISTANT SECRETARY FOR LEGISLATION (EDUCATION)

Secretary RICHARDSON. Thank you very much, Mr. Chairman.

From my point of view, it would be helpful to have the Commissioner complete his testimony before the subcommittee proceeds to questions. Possibly it would then have before it a more complete presentation of the administration's proposals.

Senator PELL. I agree that would be better, but I had understood you could not remain.

Secretary RICHARDSON. Tomorrow I would like to be able to present the presentation on the Foundation, and then leave. But today, since we will be all here for as long as the session lasts, it would be preferable to proceed with our statements.

Senator PELL. That fills the gap in communication.

Secretary RICHARDSON. Thank you very much, Mr. Chairman.

I am sure I speak for my associates in saying that we welcomed the statement of the basic issues with which you opened this hearing.

I am accompanied by, as you see, Dr. Sidney P. Marland, Jr., U.S. Commissioner of Education and Mr. Peter P. Muirhead, Executive Deputy Commissioner, U.S. Office of Education, and on my left is Mr. Christopher Cross, Deputy Assistant Secretary for Legislation with responsibility in the field of education.

I noted Mr. Chairman, your notation of the fact that you hoped action could be taken on this important subject. It is true, of course, that legislation now in effect will be expiring with the end of the current fiscal year, and so we do want to work with you and the subcommittee as cooperatively as we can to try to assure that you will be able to report out legislation in time for it to be acted upon before the current legislation expires, and in time so that the concerned students and institutions will be able to make their plans in the confident awareness that funds will be available for the coming academic year.

I believe you have before you the Higher Education Foundation bill, and the student assistance legislation will be filed, I believe, today or tomorrow.

Last week the President sent to the Congress his second special message on higher education, urging your prompt action on proposals which would greatly expand higher education opportunities for the people of this Nation. I am pleased to be with you this morning to discuss these proposals and to join the President in urging your immediate attention to this matter of great national concern.

Senator PELL. Mr. Richardson, if you would permit me to interrupt for a moment, I would like to say that within the scope of higher education we definitely include the junior 2-year colleges: Indeed there is a very strong representation in this hearing room today from the American Association of Junior Colleges which is meeting in town. I had the pleasure of meeting some of them yesterday, and I just want to welcome them to this hearing.

Secretary RICHARDSON. Thank you, Mr. Chairman. We certainly welcome the opportunity to testify in their presence. In fact, I look forward to speaking to their association tomorrow.

The President's program for expanding higher education opportunities is based on two important proposals: expansion and reform of student financial aid programs and the encouragement of basic structural changes in higher education through the establishment of the National Foundation for Higher Education. For the first time in the history of Federal higher education policy, this administration is also submitting a budget which requests sufficient funds to support its commitment to expanded educational opportunities.

The basic tenet of our program for the reform and expansion of student aid programs is the commitment that no qualified student who wants to go to college should be barred by lack of money. The legislative proposal which is before you provides that Federal funds would go first, and in the largest amounts, to the neediest students, placing them on an equal footing with students from higher income families. In addition, the proposal provides that needy students would have advance assurance of the type and amount of Federal assistance they could expect to get for their college education.

Commissioner Marland and Mr. Muirhead will develop the profound significance of this new direction in Federal policy. For the time being, I would like to emphasize that we are proposing nothing less than an assured level of basic Federal support for every student from a low-income family who is qualified to enter college. This assurance will have an important effect on the college aspirations of high school, and even elementary school, students. In addition, it will provide, as never before, a degree of freedom for college-bound students from low-income families to choose among a variety of educational institutions with an assurance of a basic level of Federal support, regardless of which type of institution they choose to attend.

PURPOSES OF PROGRAM

The administration's improvements in the existing student aid programs have five major purposes:

1. To assure the availability of funds to every qualified student.
2. To assure that Federal funds go first, and in the largest amounts, to the students who need them most.
3. To provide potential students with as accurate information as possible concerning the aid they can expect.

4. To assure that all students of equal need are treated alike.

5. To provide additional financial aid to students attending high cost institutions.

The administration is recommending a coordinated student aid system with two parts: (a) a combination of grants, work-study payments, and subsidized loans for undergraduate students with low to middle incomes attending postsecondary educational institutions as well as proprietary institutions of higher education, and (b) creation of a National Student Loan Association to raise money privately and make it available for all postsecondary students at all income levels.

The basic concept of the student aid system is that all students whose families can be expected to make the same contribution should have the same help available for their education from Federal sources. The combination of family contributions plus Federal grants, work-study payments, and subsidized loans would be enough to enable any student to meet minimum education expenses.

The system would work in the following manner:

Each year the Secretary of HEW, after conferring with the Advisory Council on Financial Aid to Students, would publish a schedule indicating the amount of Federal funds available to students with differing family contribution levels. The college or university would calculate each student's eligibility for aid by determining the expected family contribution toward his educational costs. This determination would take into account such factors as the size of the family, the number of children in college, extraordinary family expenses, and capital assets. The deficiency between expected family contribution and the amount of resources the student should have available to him would be met by a combination of grants, work-study payments, and subsidized loans.

It should be noted that what we are proposing represents a Federal floor for educational assistance. Added to this floor will be, in a majority of cases, financial aid from State sources, institutional aid, and private financial assistance, which amounted to an estimated total of $994 million in academic year 1969–70.

As an example of State programs that are available, I might note that in New York, State assistance this year will aid about 250,000 students with an average award of $280. In Ohio, a student enrolling in a private institution from a family with an income of under $3,000 receives a $900 State grant. If he enrolls in a public institution, he receives a $300 grant. In either case, that assistance would be added to his eligibility for Federal assistance.

Many other States have similar programs of student aid. Institutions, particularly private ones, also devote a significant portion of their income to student assistance. We would anticipate that they would use those funds to provide supplemental awards for low-income students and whatever limited assistance might be needed for students not qualifying for direct Federal subsidy. Of course, in no instance would Federal aid, combined with other aid, exceed the cost of education at the institution in question.

Mr. Chairman, it has been charged that our proposal ignores the problems faced by middle income families in putting their children through college. I would like to emphasize how untrue this is by

pointing out to the committee some concrete examples of how our proposals would work under the President's budget commitment:

A family with $12,000 income and three children in college would be eligible for almost $1,000 per student just in basic grants and loans.

Children from large families with incomes over $15,000 would often be eligible for up to $1,500 per student in "cost-of-education" loans subsidized at the very favorable rates of the NDEA loan program.

Each child from a small family with income of $13,500 and with only two children, both in college, but with medical expenses of $2,400, would be eligible for basic subsidized loans of almost $400 per student and additional subsidized cost of education loans.

If these are not "middle-income families," Mr. Chairman, I have to ask what kind of families we mean when we use this phrase. Median family income in the United States is about $9,800. I would suppose that families in the brackets on either side of this line are truly "middle income." And these families are going to be helped—not just by loan guarantees, but by substantial grants and subsidy allowances.

We feel that the concept of relating student aid to family contribution, and hence to family income available for support of the student's education, is the only workable way to determine the extent and type of Federal student assistance. The use of the amount of Federal income tax paid by a family, as proposed in S. 659, to determine Federal student assistance is, according to economists, nearly always more regressive than adjusted family income.

I cannot overemphasize at this point the fact that under the administration bill, eligibility for student assistance will be made on the basis of family income and claims on that income. The key individual in this equation will be the college financial aid officer who will make the determination of adjusted family income, and hence qualification for direct Federal subsidy.

The commitment of this administration to increasing student aid is reflected in the President's budget for fiscal year 1972. That budget calls for a $575 million appropriation for education opportunity grants and work-study in fiscal year 1972, a 70-percent increase over the current year. It also provides funds to subsidize nearly four times the volume of loans covered in the fiscal year 1971 budget. We believe this demonstrates quite clearly the commitment of this administration to higher education.

The President's proposal will also provide dramatically increased access to Federally guaranteed loans for all students, regardless of their families' financial status. In the past, the supply of guaranteed loans has been arbitrarily restricted by the lack of a secondary market which could buy student loan paper and provide lenders with new loan capital. To meet this problem we propose the establishment of the National Student Loan Association, with authority to buy and warehouse student loans made by institutions of higher education and commercial lenders. We estimate that this new marketing institution would supply as much as $1 billion in new lendable funds for guaranteed loans.

NSLA would be a private corporation, chartered and established by the Federal Government. It would raise funds by issuing its own

obligations for sale in private capital markets. These obligations would be guaranteed against default by the Government, allowing the NSLA to pay a lower rate of interest.

With the proceeds from its sales, NSLA would buy, sell, or warehouse student loan paper from colleges, banks, or other eligible lenders. Typically, a college without funds of its own to invest in student loans would make a loan to a student and then turn immediately to NSLA to sell the student's note and regain liquidity. To insure the operation of NSLA and ease the transition into a secondary market, the fiscal 1972 budget calls for an appropriation of $400 million, which would be used to assist colleges in making loans and would be returned to the Treasury after NSLA begins operation.

NSLA would significantly increase the flow of funds into student loan markets. Both banks and colleges would be encouraged to do more student lending.

There are proposals for a secondary market before both the House and Senate which provide only for warehousing of student loans. While the warehousing function, which involves cash advances to be repaid by the lender, is vital to a secondary market institution, authority to buy and sell student loans is also essential.

Finally, several other features of the President's student aid proposals merit attention:

Educational opportunity grants would continue as the basic grant program, but without matching requirements.

The college work-study program would continue. Colleges would continue to match work-study funds provided by the Federal Government—$1 for $4—but this requirement would be waived for institutions or work programs which it would hamper.

National defense student loan benefits would continue. However, lendable capital would come from the private money markets rather than the Federal Treasury.

Institutions of higher education would preserve the option, within national limits set by the Commissioner of Education, of determining the mix of grants and work-study payments appropriate to the individual student.

The guaranteed loan program would continue to be open to all college students, however high their family incomes. The interest subsidy paid by the Federal Government on student loans to above-average-income students while they are in college and the special allowance paid to banks would be eliminated.

Loan ceilings would be raised to $2,500 annually and would apply to the aggregate of both subsidized and unsubsidized loans.

The length of the maximum permissible loan repayment period would be increased to 20 years from the present 10.

The student could prepay his loan at any time without penalty.

Providing increased access to higher education is only one part of the administration's strategy for expanding higher education opportunities. The President said in his message on higher education:

> If we are to make higher education financially accessible to all who are qualified, then our colleges must be prepared both for the diversity of their goals and the seriousness of their intent.

To encourage basic structural change in higher education and to provide new and more meaningful educational options for students, the

President proposes to establish the National Foundation for Higher Education.

For too long the relationship between the Federal Government and the Nation's colleges and universities has aggravated rather than solved problems. In many cases, the Federal Government has hired universities to do work which has had little or no relationship to their essential functions. The National Foundation for Higher Education will forge a new and constructive partnership for basic change and innovation designed to meet the needs of the American public.

Mr. Chairman, I understand that I will return tomorrow to discuss in detail the Foundation proposal. Today, however, let me make clear that I am personally responsible for, and am committed to the specific design of the Foundation.

It has been carefully drawn up to achieve independent yet coordinated action. It will be an agency within the Department of Health, Education, and Welfare, run by a Presidential appointed Director, and advised by a strong Board. The director of the foundation will have close working relationships with the Commissioner of Education and the Director of the proposed National Institute of Education. Since I have made it clear that the Commissioner of Education is the chief education officer, I intend to ask the director of the foundation to report to me through him.

I am pleased to see that S. 659, which you have introduced, Mr. Chairman, includes a foundation, as well as another key request of the President in the area of education reform. The National Institute of Education is also before you as S. 434, which was introduced by Senator Prouty. It would appear that the members of this subcommittee share with the President a major concern for the reform and revitalization of education in this Nation. I believe that our differences can be readily resolved and we can get on with the task at hand—making education more exciting, more challenging, and more productive.

During the past year we have consulted frequently with representatives of the higher education community and of the Congress in an attempt to reach accommodation on a higher education bill which would be accepted by all concerned. These consultations have resulted in several important changes in this year's proposals over last year's. We have, for example, added a new component to our student aid proposals—cost of education loans—which will provide benefits identical to those currently received by students under the national defense student loan program, enabling low- and middle-income students to attend higher tuition institutions. At the suggestion of Members of Congress and leaders in the higher education community, we have also proposed a new program of loan insurance for private college facilities and requested extension of existing authority for direct loans and grants under the Higher Education Facilities Act.

Finally, our consultations have resulted in important changes in our proposal for the National Foundation for Higher Education. We have removed from the Foundation the programs which clouded its reformist image last year, and we have, as noted, modified its structure to place it within the Department of Health, Education, and Welfare.

The Higher Education Opportunity Act also contains a number of other titles and provisions which either extend or modify many existing provisions of the Higher Education Act of 1965, the Higher

Education Facilities Act, and the National Defense Education Act. Commissioner Marland will discuss these modifications with you in detail.

In closing, Mr. Chairman, I would like to emphasize the importance of prompt congressional action on the President's proposals for higher education. Failure to act immediately could, as I noted in the beginning, mean a denial of much-needed support for as many as 1 million students who have not previously had access to Federal student aid programs. Time is of the essence. We must act now in order to assure students and institutions alike that Federal resources will be available for the opening of school in the fall.

The theme common to all of the administration's higher education proposals is expanding higher education opportunities for all who can benefit from them. The President called for a "new kind of engagement between all the citizens of our society and our system of higher education." I urge the Congress to join in this exciting new effort to make good on our national commitment to equality of educational opportunity.

Thank you.

Senator PELL. I would like to mention at this point that Senator Alan Cranston, who would have liked to have been with us all morning, has other committee responsibilities, and had to leave. He asked me to pass on a special welcome to the Californians who are here.

Commissioner Marland, will you proceed.

Dr. MARLAND. Thank you, Mr. Chairman, members of the subcommittee.

I am certain that I don't need to stress to the members of this committee the value of higher education in America today, both to the individual and to this Nation. Latest figures show that a person with 4 years of higher education will, over the course of his life, earn about $213,000 more than a person with a high school diploma. Yet this figure, significant as it is, does not begin to reflect the value to the person of the sense of satisfaction which comes from knowing that one has been able to grow to the fullest possible extent.

As I pointed out at my White House Press Conference last week, a student from a family with an income of $15,000 is almost five times more likely to be able to attend college than is one from a family with an income of $3,000 per year.

Senator PELL. Excuse me, Mr. Commissioner. I note you have a 24-page statement.

Dr. MARLAND. I will come to that, Mr. Chairman, and will suggest that I conclude after page 3 or 4, and submit the remainder for the record.

Mr. PELL. Fine; thank you very much.

Dr. MARLAND. As I pointed out, we think that we have proposed an answer to this dilemma which will insure that any student who wants to go on to higher education will not be denied that chance, simply because his family's resources are too meager. I will leave the discussion of the specifics of our student financial aid proposals to a later point in my testimony; but I would like the committee to consider what this prospect will mean—to the student, to his parents, to the school, to the community.

First, to the students and his parents—and I speak here as a school administrator, deeply conscious of boys and girls in our high schools today—the knowledge that the money for a college education will be available when needed should have a pronounced effect on the goals of children from lower income families. No longer will parents have to try to discourage a bright child from dreaming too much about the future simply because there is no prospect that the money will be there when the need is. No longer need parents encourage their children to take high school courses which do not fully meet their needs simply because there is little likelihood that the traditional academic courses will provide the skills necessary for one who must earn a living immediately after graduating from highschool.

To the school, this turn of events will mean that guidance counselors can really begin to help promising students develop to their fullest potential without the guilty feeling, which some must have, that they are not really acting in the student's best interests when they raise his or her sights, only to have these young ambitions crushed because of lack of money.

Finally, to the community, this group of young people will serve as examples of what can be done to break the grinding cycle of poverty. Younger children will know that they too can dream, and see their dreams fulfilled. Parents will be able to speak with pride of their son, the doctor, or their daughter, the engineer.

In short, Mr. Chairman, we are talking about hope.

We do not, of course, claim that making available the opportunity for higher education will solve all the problems of the world; but we do believe that many of the ills of our society which result from frustrated hopes can be ameliorated.

The second feature of the administration's proposals which I should like to briefly touch on is our recommendation for the National Foundation for Higher Education.

In many ways I believe that the Foundation proposal is analogous to our student financial aid proposals, for both are aimed at aiding the recipient—in one case, the school; in the other, the student—to fulfill its potential.

I view the National Foundation as a device to aid schools, colleges, universities, to decide rationally what they want to become and to be a source of seed money for them in their attempts to realize their plans.

In some cases these plans may involve new ways of doing familiar things, such as developing more economic methods of administering institutions or changing the methods of recruiting and retaining faculties. In other instances, more fundamental change may be desirable, such as the development of new kinds of institutions for higher education. In both situations the National Foundation would be a source of aid.

In addition, the Foundation hopefully would work toward the development of a national policy for higher education, including an examination of the Federal Government's impact on policy formulation and institutional behavior.

Many of the activities which the Foundation ultimately would fund might very well arise as a result of research activities originally supported by the proposed National Institute of Education. The Foundation would provide financially pressed higher education insti-

tutions with an extra margin of funds to begin putting promising concepts to work.

As a final point in my personal remarks, Mr. Chairman, I should like to stress once again the urgency which exists to act on both the Higher Education Opportunity Act and the National Foundation for Higher Education Act. June 30 is approaching rapidly and letters of admissions are already being sent out to next year's freshmen. I hope that the Congress will see fit to pass this legislation at the earliest possible moment.

And here, Mr. Chairman, I would pause in the prepared text with your permission, noting that there are some 15 pages of detailed exposition concerning the 10 titles of the Higher Education Act, and I would submit them for the record, without further discussion.

Senator PELL. Thank you very much, indeed.

(Dr. Marland's prepared statement follows:)

Statement by
Honorable Sidney P. Marland, Jr.
U.S. Commissioner of Education
Before the
Subcommittee on Education
Committee on Labor and Public Welfare
United States Senate
Wednesday, March 3, 1971
10:00 a.m. EST

Mr. Chairman and Members of the Committee:

I am certain that I don't need to stress to the members of this committee the value of higher education in America today, both to the individual and to the Nation. Latest figures show that a person with four years of higher education will, over the course of his life, earn about $213,000 more than a person with a high school diploma. Yet this figure, significant as it is, does not begin to reflect the value to the person of the sense of satisfaction which comes from knowing that one has been able to grow to the fullest possible extent.

As I pointed out at the White House Press Conference ~~last week~~, a student from a family with an income of $15,000 is almost five times more likely to be able to attend college than is one from a family with an income of $3,000 per year.

We think that we have proposed an answer to this dilemma which will insure that <u>any</u> student who wants to go on to higher education will not be denied that chance simply because his family's resources are too meager. I'll leave the discussion of the specifics of our student financial aid proposals to a later point in my testimony; but I would like the committee to consider what this prospect will mean--to the student, to his parents, to the school, to the community.

First, to the students and his parents, the knowledge that the money for a college education will be available when needed should have a pronounced effect on the goals of children from lower income families. No longer will parents have to try to discourage a bright child from dreaming too much about the future simply because there is no prospect that the money will be there when the need is. No longer need parents encourage their children to take high school courses which do not fully meet their needs simply because there is little likelihood that the traditional academic courses will provide the skills necessary for one who must earn a living immediately after graduating from high school.

To the school, this turn of events will mean that guidance counsellors can really begin to help promising students develop to their fullest potential without the guilty feeling, which some must have, that they are not really acting in the student's best interests when they raise his or her sights, only to have these young ambitions crushed because of lack of money.

Finally, to the community, this group of young people will serve as examples of what can be done to break the grinding cycle of poverty. Younger children will know that they too can dream, and see their dreams fulfilled. Parents will be able to speak with pride of their son, the doctor, or their daughter, the engineer.

In short, Mr. Chairman, we are talking about hope.

We do not, of course, claim that making available the opportunity for higher education will solve all the problems of the world; but we do believe that many of the ills of our society which result from frustrated hopes can be ameliorated.

The second feature of the Adminstration's proposals which I should like to briefly touch on is our recommendation for a National Foundation for Higher Education.

In many ways I believe that the Foundation proposal is analogous to our student financial aid proposals, for both are aimed at aiding the recipient--in one case, the school; in the other, the student--to fulfill its potential.

I view the National Foundation as a device to aid schools to decide rationally what they want to become and to be a source of seed money for them in their attempts to realize their plans.

In some cases these plans may involve new ways of doing familiar things, such as developing more economic methods of administering institutions or changing the methods of recruiting and retaining faculties. In other instances, more fundamental change may be desirable, such as the development of new kinds of institutions for higher education. In both situations the National Foundation would be a source of aid.

In addition, the Foundation hopefully would work towards the development of a national policy for higher education, including an examination of the federal government's impact on policy formulation and institutional behavior.

Many of the activities which the Foundation ultimately would fund might very well arise as a result of research activities originally

supported by the proposed National Institute of Education. The Foundation would provide financially pressed higher education institutions with an extra margin of funds to begin putting promising concepts to work.

As a final point in my personal remarks, Mr. Chairman, I should like to stress once again the urgency which exists to act on both the Higher Education Opportunity Act and the National Foundation for Higher Education Act. June 30 is approaching rapidly and letters of admissions are already being sent out to next year's freshmen. I hope that the Congress will see fit to pass this legislation at the earliest possible moment.

I would now like to describe in some detail the provisions of the Higher Education Opportunity Act of 1971.

Title I

Title I would extend Title I of the Higher Education Act through 1973. The existing authority for community services and continuing education programs contained in that title would continue without change. Because we are reviewing the place of categorical programs such as this in the context of the broader Federal role in higher education, however, we are only asking for a two-year extension.

Title II

Title II would extend and amend the library programs contained in Title II of the HEA. At present there are three types of grants made under Title II--basic, supplemental, and special purpose grants. We propose to increase the proportion of funds targeted on special purpose grants, reducing basic and supplemental grants from seventy-five to fifty percent of the sums appropriated for Part A. The remaining fifty percent available for special purpose grants would provide more

assistance for:

--institutions or their branches which demonstrate a special need for additional library resources;

--institutions or their branches which can meet special national or regional needs in library or information sciences; and

--combinations of institutions which need special assistance in establishing and strengthening joint-use facilities.

We feel that a greater concentration of Federal assistance in such institutions will help assure that the resources devoted to library materials will have the greatest impact on the quality of postsecondary education in this country. Again, because we are reviewing the place of categorical programs such as this, we are asking for a two-year extension

In Part B of Title II, relating to Library Training and Research, we would propose two changes. First, we believe that the provisions which relate to training of library professions should be coordinated with other education professions training activities. Therefore, we are proposing that this authority be transferred from Title II and added as a new Part G to Title V (Education Professions Development Act). Second, we are asking for repeal of the research and demonstration component of Part B, which merely duplicates authority already contained in the Cooperative Research Act.

We are also asking for repeal of Part C, which allows the transfer of HEW funds to the Library of Congress for the Library's use in acquiring valuable materials and in preparing cataloging information. This vital function will be continued more appropriately under the budget authority of the Library of Congress.

Title III

Title III extends, with technical amendments, Title III of the HEA--Strengthening Developing Institutions. This title has played a significant role in assisting weaker institutions of higher education, especially predominantly black colleges in the South, in their struggle to stay in the mainstream of academic life in this country. Federal assistance has come in the form of grants for cooperative arrangements between a developing institution and a stronger one, in National Teaching Fellowships, and in the support of Professors Emeritus.

We are also proposing two amendments to the existing law. One would clarify the requirements for participation of institutions which offer less than the bachelor's degree. This would provide that only institutions which award a bachelor's degree must meet the requirements of sections 302 (a) and (b) that institutions be established for five years before they may meet the definition of developing institutions. This change would allow new community colleges, which are being established at the rate of 60 a year to receive funds promptly under this title. Such institutions would, of course, be funded under the existing set-aside of 23 percent for two-year colleges.

The second amendment would amend the professors emeritus program to provide that professors emeritus may come from the developing institutions themselves, as well as from stronger and more recognized colleges and universities. We have found that these faculty members often understand the unique problems of students at developing institutions much better than other retired faculty from more traditional schools.

Title IV

Title IV contains amendments to student financial aid programs.

I. Present Programs: Description and Problems

The Office of Education presently administers four major programs for aiding students: Educational Opportunity Grants, the College Work-Study program, National Defense Student Loans and Guaranteed Loans.

The first three programs are mainly funded by the Federal Government and administered by colleges and universities. The amount of funds available to the institution for these programs depends on the total funds appropriated by Congress, State distribution formulas and the approval of regional review panels. Once the college has its various allocations, the student aid office determines what mix of grants, work-study payments and loans is appropriate for each individual eligible student.

Commercial lending institutions, primarily banks, operate the Guaranteed Loan programs. Loans are made at a maximum interest rate of 7 percent to the student. The Federal Government guarantees the loans against default, pays the student's interest on subsidized loans while he is in college and makes a special payment to lenders during tight money conditions.

There are several problems with this system of student aid:

- Availability of funds --Allocation formulas, matching requirements and insufficient funds limit the aid which institutions can award to individual students. Colleges enrolling large numbers of disadvantaged students are in an especially difficult position because of the matching requirements.

- Limited loan funds -- Existing loan programs provide an inadequate volume of lendable funds because (a) the National Defense Student Loan program requires capital outlays from the Federal budget which has been under severe fiscal pressures and restraints for the last several years; and (b) students must compete with other borrowers (who often offer more profitable investment opportunities) for the lendable funds of banks under the Guaranteed Loan program. (Low-income students with limited bank connections sometimes find themselves at a particular disadvantage.)

- Open-ended expenditures -- The Federal Government is obligated to meet its commitment to pay the interest on subsidized Guaranteed Loans while students are in college. As interest rates rise, and as more and more middle and upper income families find it in their interest to take advantage of these subsidies, a larger and larger share of Federal funds for student aid is being diverted away from the most needy students. The system as a whole has a built-in tendency to become less progressive as these subsidies absorb a disproportionate part of any budget increase for student aid.

- Uncertainty -- A student who wants to go to college cannot tell where he can get aid or how much he can count on in advance of his admission and the particular student aid office determination. Nor can a bank assure the student in advance that it will have funds to lend to him.

- Inequitable distribution -- Federal funds do not necessarily go to those students who need them most. Moreover, different colleges assess need in different ways. Substantial subsidies go to middle and upper income students, especially under the Guaranteed Loan program.

II. Proposed Programs: Purposes

The Administration's improvements in the existing student aid programs have four major purposes:

--To assure the availability of funds to every qualified student.

--To assure that Federal funds go first, and in the largest amounts, to the students who need them most.

--To provide potential students with as accurate information as possible concerning the aid they can expect.

--To assure that all students of equal need are treated alike.

--To provide additional financial aid to students attending high cost institutions.

III. Proposed Program: Concept and Structure

The Administration is recommending a coordinated student aid system with two parts: (a) a combination of grants, work-study payments and subsidized loans for full-time undergraduate students with low to middle incomes attending public and non-profit postsecondary educational institutions as well as proprietary institutions of higher education; and (b) creation of a National Student Loan Association to raise money privately and make it available for all postsecondary students at all income levels.

00456

A. Grants, work-study payments, subsidized loans

The basic concept is that all students whose families can be expected to make the same contribution should have the same help available for their education from Federal sources. The combination of family contributions plus Federal grants, work-study payments and subsidized loans would be enough to enable any student to meet minimum education expenses. The key determinant is family income (and, thus, family contribution). Students from lower income families would receive more Federal aid than students from higher income families. (Lower income students would also receive a larger proportion of their aid in the form of grants and work-study payments rather than in the form of subsidized loans.) But the total resources available (i.e., family contribution plus Federal aid) to students at different income levels would be made equivalent.

The system would work as follows. Each year the Secretary of HEW, after conferring with the Advisory Council on Financial Aid to Students, would publish a schedule indicating the amount of Federal funds available to students with varying family contributions. Each student's eligibility for aid would be calculated by determining the expected family contribution toward his educational costs. This determination would take into account such factors as the size of the family, the number of children in college, extraordinary family expenses and capital assets. The deficiency between expected family contribution and the

amount of resources the student should have available to him would be met by a combination of grants, work-study payments and subsidized loans.

For example, under the Administration's fiscal 1972 budget proposals, students from families unable to provide more than $1,400 to assist with the cost of postsecondary education would be eligible for Federal funds. The maximum foundation support (grant and work-study plus subsidized loan) available to any one student would be $1,400; i.e., to students from families unable to afford any support. The maximum grant available to any one student would be $1,000. In addition to these base amounts, students who (1) meet the eligibility criteria for subsidized aid, and (2) attend schools with annual average cost in excess of $1,400 would be eligible to apply for an additional subsidized "cost of education" loan of up to $1,500. This program would be controlled by schools in a manner similar to the present NDEA loan programs and terms to students would be approximately the same as those governing present NDEA loans. The amounts of aid to be available at different income levels for families of different sizes under the funding levels contemplated by the Administration's proposals are illustrated in Attachments I and II.

Several others features of the proposal deserve mention:

- All aid from State and private student aid programs would be <u>in addition</u> to Federal aid, and would permit students eligible for it a wide choice of the type of institution they attend.

- A "grandfather" clause would assure that students receiving aid under the EOG, work-study, and NDEA title II programs would receive no less under the new system than they were entitled to under the old one.
- Institutions of higher education would preserve the option, within national limits set by the Commissioner of Education, of determining the mix of grants and work-study payments appropriate to the individual student.
- The National Defense Student Loan Revolving Fund (currently about $140 million not already lent) would continue in its present form, except that no new Federal appropriations would be made to the fund. Loans would continue to be made in a manner similar to current NDSL's; however, cancellation for reaching, military service, Peace Corps service, etc. would be eliminated for new loans.
  Loans from this fund would go first to students eligible under the "grandfather clause" in the bill; remaining funds would be used to provide subsidized loans under the Higher Education Opportunity Act.
- Students attending proprietary institutions of higher education would be made eligible for all benefits.

Finally, these proposals would not alter the valuable features of existing programs:

- Educational Opportunity Grants would continue as the basic grant program but without matching requirements.
- The College Work-Study program would continue. Colleges would continue to match work-study funds provided by the Federal

Government (one dollar for four) but this requirement would be waived for institutions or work programs which it would hamper.

B. National Student Loan Association

The purpose of the proposed National Student Loan Association (NSLA) is to increase the amount of resources available for loans (both subsidized and unsubsidized) to all students at all income levels.

NSLA would be a private corporation, chartered and established by the Federal Government. It would raise funds by issuing its own obligations for sale in private capital markets. These obligations would be guaranteed against default by the Government, allowing the NSLA to pay a lower rate of interest.

With the proceeds from its sales, NSLA would buy, sell, or warehouse (buy under the condition that the seller will repurchase, i.e., NSLA "stores" the loans) student loan paper from colleges, banks or other eligible lenders. Typically, a college without funds of its own to invest in student loans would make a loan to a student and then turn immediately to NSLA to sell the student's note.

NSLA would significantly increase the flow of funds into student loan markets. Both banks and colleges would be encouraged to do more student lending. It is estimated that NSLA may buy up to $2 billion worth of loans in its first year of operation.

The Guaranteed Loan Program would continue to be open to all college students, however high their family incomes. However, some changes would be made in the program. First, the 7 percent interest ceiling would be eliminated. Second, the interest subsidy paid by the Federal Government on student loans to other than low income students while they are in college and the special allowance paid to banks would be eliminated. The program would continue to be an unsubsidized loan program except for students meeting a test of need.

Several other features applicable to both subsidized and unsubsidized loans are of significance:

- Banks and other financial institutions would make both kinds of loans.
- Loan ceilings would be raised and would apply to the aggregate of both subsidized and unsubsidized loans. A student could borrow up to $2,500 a year for up to seven years.
- The length of the maximum permissible loan repayment period would be increased to twenty years from the present ten.
- Student borrowers would not have to pay interest while they were still in college. Federal payments would cover interest charges

on subsidized loans. On unsubsidized loans, lender would be required to allow the student to defer payments of both interest and principal while the student was in college. The government would guarantee deferred interest payments along with principal

- The student could prepay his loan at any time without penalty.
- Lenders would also be permitted to agree, at the time the loan was made, to allow the student to defer payments and interest up to an aggregate of five additional years. In such cases, the student would be allowed to choose those times during the repayment period when regularly scheduled payments would be especially burdensome. The Federal Government would guarantee interest charges during such periods.

IV. Proposed Program: Consequences

It is estimated that in Fiscal Year 1972, the first year of operation of the program,:

- 2 1/2 million students would receive benefits, an increase of one million over the number of students receiving assistance under present programs.
- approximately $575 million in grants and work-study payments would be available, an increase of $242 million above FY 1971.
- about $1.2 billion would be available to make loans under the subsidized loan programs, an increase of $830 million.

V. Problems Solved and Purposes Achieved

The Administration's student aid proposals overcome the problems and achieve the purposes noted earlier.

- Availability -- Every student who qualifies for direct Federal assistance under the schedule established by the Secretary of HEW will receive such assistance. NSLA will provide an adequate supply of lendable funds for students who do not qualify for subsidies.

- Need -- Grants, work-study payments and subsidized loans will be concentrated on those in most need: students from low-income families.

  Certainty -- The aid schedule published annually by the Secretary of HEW would inform every eligible student of the amount of aid he could expect, subject to review by the financial aid officer at the college of his choice.

- Equity -- Students whose families could be expected to make similar contributions would receive equivalent amounts of aid.

Title V

Title V amends and extends programs dealing with the training of educators authorized by the Education Professions Development Act (Title V, HEA). The Administration is proposing eight technical amendments to the Education Professions Development Act. Following is a brief description of the amendments, outlining the reasons why each is being proposed.

I. Extension of Parts A, B, D, E, and F of Title V for Five Years

We are proposing the combination of Parts C (Graduate Fellowships) and D (Training Programs) of EPDA. This is accomplished by allowing the appropriations authorization for Part C to lapse. The reasons for this proposed change are:

A. The language of Part D (Improving Training Opportunities for Personnel Serving in Programs of Education Other Than Higher Education) is broader than that of Part C (Fellowships for Teachers and Related Educational Personnel). Everything funded under Part C can be supported under Part D; and in fact, the Bureau of Educational Personnel Development is not using the Part C authority at all in 1971 due to the narrowness of its concerns.

B. Two very high national priorities, increasing the educational achievement of children of low-income families through provision

of better teachers, and implementing the most promising new approaches to effective training and retraining of teachers, either cannot be addressed effectively or are precluded under Part C. The broader language of Part D encourages the direction of resources to these needs.

C. Potential applicants under Part C are limited to institutions of higher education with graduate programs. This is in direct contrast to Part D under which all colleges and universities, including junior and community colleges, State departments of education and local educational agencies (18,000 school districts) are potential applicants. Cooperative Federal-State relationships under Part D have proven useful and effective. Nearly 50 per cent of all EPDA funded projects are funded through local education agencies, which have the best knowledge of their own training needs.

D. Individual and institutional payments under Part C are on a set formula basis, requiring a stipend to the student and an institutional assistance grant to the university of $3,500 each. This does not cover the actual training costs or encourage local contributions to projects as occurs under Part D.

E. Teacher fellowship programs such as the Prospective Teacher Fellowship Program funded under Part C, have not produced substantial numbers of teachers for the disadvantaged, and have tended to attract teachers from fields which are now in surplus nationally. Part D addresses itself specifically to meeting

areas of shortage such as early childhood, special education, and vocational-technical education. In addition, the Teacher Corps is proving to be a much more effective vehicle for attracting talented college graduates (especially males and minorities) to teaching the disadvantaged and providing them with appropriate preparation than was the case with fellowship programs funded under Part C.

II. Amendments to Part B (2)

A. Increasing the amount of State funds for Administration

The States are currently allowed 3 percent of their State allotment for administrative costs. This amount has not proven sufficient for most States to assess critical needs, administer the program, and evaluate projects. The amendment would allow States a sum not to exceed 5 percent or $20,000, whichever is higher.

B. Elimination of the ceiling on amounts expended by States for teacher aides.

Currently the States can utilize only one-third of their allotment to attract, train and qualify teacher aides. The amendment removes this one-third restriction and allows State discretion as to the proportion of funds expended for training teachers. This amendment is included since experience has indicated wide variation among States in the needs for recruitment and teaching of teachers and teacher aides.

C. Authorization of training programs directed at retraining teachers already in school systems so that they may teach in other grades or in other subject matter areas.

Currently the legislation allows for the recruitment and training of people who have never been, or who are not now employed in the schools. The St te grant program was designed as a means of attracting people to the field of education, particularly in critical shortage areas. However, there is now a national surplus of teachers, and many States would prefer to use Federal funds to retrain teachers already employed to meet shortages rather than recruiting new personnel.

III. An Amendment To Make Indian Schools Eligible For Funding Under EPDA.

Federally run and Federally supported Indian schools under the Bureau of Indian Affairs are not presently eligible for funding under Part D of EPDA. Inclusion of these schools would allow for on-premises staff training in these schools and a wide variety of other benefits. The National Advisory Council on EPDA has recommended that BIA schools be made eligible for personnel development benefits.

IV. Amendment To Allow For The Compensation of Tutors Participating In Youth-Tutoring-Youth Projects and Other Tutors in Career Opportunities Programs.

At the present time tutors, typically selected by GOP project directors from high school and college students, to tutor other disadvantaged children cannot be compensated for their services or even for expenses involving their services under EPDA, since the tutors themselves are not necessarily training to be teachers.

Elaborate arrangements have had to be made with the Neighborhood Youth Corps in order to arrange for compensation. Experience to date indicates that youth-tutoring-youth programs are an effective means of attracting and involving low-income students in the educational process and of improving the learning capabilities of both the tutor and tutee. We feel that the program would be more effectively administered if authority to minimally compensate tutors (who often come from low income homes and cannot even afford bus fares) were included in EPDA.

V. Extension Of Authority Under Part D to Permit Large Scale Upgrading Of The Undergraduate Preparations of Teachers and Other Educational Personnel.

This amendment is designed to fill a gap in EPDA. The present authorization does not permit grants for the direct reform of regular undergraduate programs for the development of educational personnel. Since those programs prepare over 90 percent of all teachers and other educational personnel, the gap is a serious one insofar as it affects BEPD ability to deal with "improving the quality of teaching", one of the two primary purposes of the EPDA. The proposed amendment does not authorize stipends and other types of support for individual students. It would, direct all of its resources to the development of better programs for training those undergraduates. The amendment would provide a more productive vehicle than the traditional institutes for bringing those concerned with the academic disciplines together with those concerned with teacher training in joint efforts to improve the quality of teaching.

VI. Addition of A New Part G To Authorize Training of Library Personnel.

This amendment simply creates a new Part G of EPDA containing the language formerly in Sections 221-223 of Title II of the Higher Education Act. These sections authorize the Commissioner to make grants to institutions of higher education for establishing training institutes and fellowship programs for persons coming under the category of "librarians". These sections of HEA Title II are being transferred to EPDA in an attempt to place all educationally connected training programs within the same act. This is consistent with Administration efforts at consolidation and coordination of programs.

VII. Consolidation of NDEA title IV (National Defense Fellowships) with title V-E.

The bill repeals title IV NDEA effective July 1, 1971 and broadens existing authority in Part E of title V HEA to allow funding similar activities under title V.

Title VI

Title VI would repeal five existing titles of the HEA--Title VI (Financial Assistance for the Improvement of Undergraduate Instruction); Title VIII (Networks for Knowledge); Title IX (Education for the Public Service); Title X (Improvement of Graduate Programs); and Title XI (Law School Clinical Programs). These are all relatively narrow categorical programs and the last four have never been funded. Rather than maintaining these categorical authorities, the Administration is proposing the creation of the National Foundation for Higher Education. The broad authority for the Foundation, one of the purposes of which is "to provide assistance for the design and establishment of innovative structures for providing postsecondary education and innovative modes of teaching and learning therein". This authority will permit funding of projects of merit in all of these areas.

Title VII

Title VII amends the General Provision in Title XII be redesignating XII as VIII and by adding a new section which requires that applicants under Titles II, III, and V must make assurances that there will be:

--no supplanting of Federal funds for other funds;

--fiscal control and fund accounting to assure proper disbursement and accounting for Federal funds;

--proper evaluation and dissemination of results;

--such reports made and such records kept as the Commissioner may find necessary.

Similar provisions in Titles II, III, and V are repealed. These amendments continue the efforts already begun in P.L. 91-230 to

standardize general provisions wherever possible.

Title VIII

Title VIII extends the Higher Education Facilities Act through June 30, 1973, including the grants authority under titles I and II. In addition, it adds a new program designed to aid private nonprofit institutions of higher education by providing Federal insurance of loans for the construction of academic facilities at these schools. The Federal insurance of both principal and interest on these loans should greatly improve the borrowing power of these institutions, as well as creating considerable for the Federal government in loan subsidy payments. This authority should prove to be especially beneficial to private black institutions.

Title IX

Title IX extends title VI of the National Defense Education Act (Language Development) for two years. Once again, we are asking for a two-year extension because of the general review of categorical programs.

Title X

Title X deals with discrimination against women in the educational community. It would prohibit discrimination on the basis of sex by any recipient of Federal assistance for any educational activity or program, except where sex is a bona fide ground for differential treatment. This latter provision would allow single sex institutions to continue.

The title would permit termination of grants to any recipient of Federal funds for education who fails to comply with this requirement. This action would only be authorized as a last step, of course, and only after adequate hearings, formal findings of noncompliance, and judicial review, if necessary.

ATTACHMENT I

FAMILY CONTRIBUTION BY INCOME LEVELS AND
NUMBER OF CHILDREN IN THE FAMILY

Income Levels	Family Contribution by Number of Children				
	(1)	(2)	(3)	(4)	(5)
$ 3,000	0	0	0	0	0
4,000	$ 300	$ 110	0	0	0
5,000	530	320	$ 160	0	0
6,000	750	540	350	$ 220	$ 140
7,000	990	750	530	390	310
8,000	1,220	950	710	560	480
9,000	1,460	1,150	890	720	640
10,000	1,690	1,350	1,060	890	800
11,000	1,920	1,540	1,230	1,040	890
12,000	2,150	1,730	1,400	1,190	1,090

Family contribution, as well as the amount of available resources, would vary as family income is weighted to reflect the number of children in the family, the number of children in college, extraordinary family expenses, and capital assets.

BENEFITS AVAILABLE TO STUDENTS BY THEIR EXPECTED FAMILY CONTRIBUTION

FAMILY CONTRIBUTION	GRANT/WORK-STUDY SUPPORT	SUBSIDIZED LOANS	COST OF EDUCATION LOANS	TOTAL
$ 0	$1,000	$400	$1,500	$2,900
200	800	400	1,500	2,900
400	600	400	1,500	2,900
600	400	400	1,500	2,900
800	200	400	1,500	2,900
1,000	0	400	1,500	2,900
1,200	0	200	1,500	2,900

THESE FEDERAL SUPPORT LEVELS CAN BE SUPPLEMENTED BY:

1. INSTITUTIONAL STUDENT ASSISTANCE;
2. STUDENTS SUMMER EARNINGS;
3. STATE AND PRIVATE STUDENT ASSISTANCE;
4. FEDERALLY GUARANTEED LOANS.

Senator PELL. I would like at this time to welcome Senator Beall. I am delighted that he is a member of this subcommittee. He knows how much I liked his father, and I look forward to serving with him.

Senator BEALL. Thank you, Mr. Chairman.

Senator PELL. Would you like to ask any questions at this point?

COMMUNITY COLLEGES IN MARYLAND

Senator BEALL. I would like to indulge in a little parochial pride, if I might, and state to the Secretary and Dr. Marland, and others, that this morning I had breakfast with 16 community college presidents from the State of Maryland. We are rather proud of our community college system in the State, which has grown at a very rapid rate. These gentlemen are in the audience here today listening with a great deal of interest to the administration's programs for aiding higher education. I wish to welcome them and say how delightful I am that they are with us.

Secretary RICHARDSON. We congratulate the State of Maryland on the development of its community college system, which is certainly an outstanding one.

Senator BEALL. Thank you.

Thank you, Mr. Chairman.

Senator PELL. Thank you very much.

Dr. Muirhead?

Dr. MUIRHEAD. I have no formal statement, Mr. Chairman.

Senator PELL. I have a variety of questions. They are not in as good order as I would like, but I am so interested in the subject matter that they came to me as we moved along.

REVENUE SHARING

First, a very, very general question, and I am sure the answer is negative, but am I correct in saying that the proposals of the administration, the financing of these programs, would not include funds from any of those programs that are recognized as categrical aid programs, those that would be consolidated under the revenue sharing plan perhaps to be proposed by the administration.

Secretary RICHARDSON. No. None of them. We are talking today only about higher education, and the proposed programs for consolidation under the special revenue-sharing proposal are all programs affecting elementary and secondary education.

Senator PELL. Right. I just wanted that for the record, and I am delighted to hear it.

Now in your effort to concentrate funds on low income students, regulations, and guidelines must have been or are in the process of being issued. Could you supply for the record these guidelines and regulations, a representative sample of the forms that are used by the colleges to ascertain the income, and needs of students?

Secretary RICHARDSON. This can be done, Mr. Chairman.

(The information subsequently supplied follows:)

Determining Financial Need Under Major Federal
Programs of Student Financial Aid

Under the existing student financial aid programs, institutions annually sign an "Agreement" covering participation which calls, among other things, for the use of systematic methods for determining the financial need of applicants under the programs. Institutions agree to "give preference to students from low-income families" under the College Work-Study Program and to award Educational Opportunity Grants to those students who have "exceptional financial need." Institutions further must indicate that they use one of four suggested student financial need assessment systems, or they may provide a complete description of any other system employed. (See Attachment I)

The College Scholarship Service and the Financial Need Analysis Service of the American College Testing Program both are recognized as acceptable need assessment systems. In addition, the Division of Student Financial Aid has published (last edition in March 1968) a booklet describing the principles of need analysis. This publication, Determining Awards Under Federal Student Aid Programs, presents two additional need assessment systems that might be employed by a college, the Federal Income Tax System and the Alternate Income System. A sample data collection document for family financial circumstances is suggested and illustrated in the booklet. (See Attachment II)

Under the three college-based programs, the Division of Student Financial Aid has not attempted to establish specific guidelines for the collection of financial information from parents, nor has it become involved in any way in the actual collection of family financial information. Institutions may use anything from a parental affadavit of nonsupport to lengthy and complex questionnaires, as long as they attest to using "systematic methods" for determining the financial need of applicants.

The Student Application for Federally Insured Loans, under the Guaranteed Loan Program, is the only approved form issued by the Division of Student Financial Aid for the collection of family financial information. This document is designed to serve banks and other lenders in determining student eligibility for Federal subsidized loan assistance. (See Attachment III)

It has been accepted that it is the role of and responsibility of the financial aid officer to review the financial circumstances of the family and to make an evaluation which is equitable for the student, and systematic and fair in the dispersal of Federal student aid funds. It is extremely difficult to draw a line between the data essential to equitable need assessment and that point where the questions asked begin to invade the realm of personal privacy. As long as financial need is a determining factor for student aid programs, it is necessary for all applicants to provide family income data sufficient to substantiate that financial need.

ATTACHMENT I

FINANCIAL NEED ANALYSIS

An objective system of financial need analysis must try to treat all families equitably, recognizing the peculiarities of each family's situation to the greatest extent possible. It must recognize expenses and expenditures that are not a matter of family choice. And it must recognize family benefits, in addition to salaries and wages, that raise the real standard of living. Most systems of financial need analysis are based on the following specific assumptions:

1. Parents have an obligation to pay for the education of their children to the extent that they are able to do so.
2. A family's income is the primary source of support for college education, but assets must also be considered. Income and assets, combined, produce the most complete index of a family's financial strength and therefore its ability to pay.
3. In determining a family's ability to pay for college, the computation system must consider the size of the family and the extraordinary expenses that the family may have.

4. The system must assume that the student has an obligation to assume a responsibility for a portion of the cost of his education.

The first essential of any need analysis system is data collection. The financial aid officer must collect information about the financial circumstances of the family under consideration. The date collection device must permit the family to list:

1. All the income that the family has available, such as salaries and wages, interest and dividends, public assistance payments, and other types of income must be included, but need not be itemized. Benefits not in the form of cash, but having a precise cash value and serving to relieve the family budget from normal burdens should be included.
2. All the major assets that the family has available, including residence equity, other real estate, family-owned businesses or farms, stocks, bonds, bank accounts, and other investments.
3. The unusual expenses that the family must meet from its income and assets. Working mothers, other dependents, medical and dental needs, indebtedness, and so forth may create extraordinary expenses that should be included.

4. Special problems that the family faces or expects to face. Such circumstances as illness of the working parent and younger children which will be seeking higher education should be allowed for.

Unusual Expenses

The usual expenses for which adjustments are made include the following:

Schooling expenses. A procedure is used to determine the ability of a family to contribute an absolute amount toward the total higher education expenses of siblings in college at that time. This absolute amount is then allocated equally among all the children in one family who are attending college in the same year.

Expenses for a working mother. An allowance for the expenses of a working mother is made because it costs more for a family to have two people earn a given income than to have one person earn the same income. Therefore, if both parents work, an allowance of 50 percent of the mother's first $2,000 income and 25 percent of income over $2,000 (up to a maximum annual allowance of $1,500) is often granted.

Medical and dental expenses. An allowance is made for medical and dental expenses in excess of 5 percent of before-tax income. This base amount represents the normal expenditures for medical expenses at a moderate level of income.

Emergency expenses. Allowances are also given for certain expenditures that are not normal expenses of family life and do reduce the family's usable income.

Indebtedness. An allowance for debt is subtracted from the family's assets.

Expenses for dependents other than children. Some parents must provide total or partial support for their own parents or other relatives. An allowance of $600 is made for each of these dependents.

Determining Additional Income.

Some parents receive benefits, in addition to their salaries and wages, that raise their real standard of living. The financial aid officer must be careful to consider these in arriving at an equitable and reasonable contribution for educational expenses. Some examples of this follow:

1. While living expenses for farm families differ little in amount from those of urban families, there are certain non-cash benefits to the farm family in housing and home-produced food products. The financial aid officer may wish to increase family net income by $800, an average annual value for rental housing in rural areas.

2. Families receiving public assistance, social security and other realted benefits are asked to report all income considered as family resources.

3. Ministers and private school teachers may receive rent-free housing as a pre-requisite of their employment. A conservative estimate of the value of such free housing is 15 percent of the annual income.

Treatment of Assets

The first step in computing the supplemental contribution of a family from its assets is to determine the net worth of the family: the fair market value of family assets less indebtedness. One approach to treating the remaining assets is to then provide a $10,000 retirement and emergency reserve allowance against them, with twenty-five percent of the remainder expected toward the expenses of college.

Conclusion

Any system that analyzes financial need must deal first with the objective facts of family financial circumstances. It cannot make distinctions between the frugal poor and the spendthrift. It cannot distinguish between improvidence and financial tragedy. It must be based on the assumption that an applicant and his family are simply accepted in their present financial condition. Families with similar incomes may have dissimilar assets for a variety of reasons. Previous illness, bankruptcy, or unemployment may have depleted the assets of a frugal family.

The primary purpose of financial aid programs, and therefore of financial need analysis, is to permit college attendance by students who cannot afford to pay the expenses themselves. If a family were expected to contribute an amount greater than its present ability dictated, the student would be penalized by being forced to find a way to assume the financial burden that could not be met either by his parents or the college's student aid program.

Although accurate, objective data are the basis for systematic need analysis, the resulting contribution can never be considered to be a scientifically accurate recommendation. Complexities in individual family financial circumstances and differences in attitudes toward education will require that an aid officer make adjustments in order to determine the appropriate contribution from a specific family. In doing this, he must evaluate both the objective and subjective information available to him from all sources. A system of need analysis must always be a guide for judgment, not a substitute.

DETERMINING AWARDS

UNDER

FEDERAL STUDENT AID PROGRAMS

Second Revised Edition, March 1968

FOREWORD TO SECOND REVISED EDITION

The booklet "Determining Awards Under Federal Student Aid Programs" was produced originally by the College Scholarship Service, under contract with the Office of Education, to assist financial aid officers in institutions of higher education in making determinations of student financial need consistent with the rules and regulations established by the Commissioner for the implementation of the Federal Student Financial Aid Programs administered by the Division of Student Financial Aid, Bureau of Higher Education: The National Defense Student Loan Program, the College Work-Study Program, and, in particular, the Educational Opportunity Grants Program.

Stocks of the original booklet were exhausted some months ago. This abbreviated version has been developed, as an interim measure, to meet the needs of those institutions which will be participating in the Federal Student Financial Aid Programs for the first time in Fiscal Year 1969.

Administrative manuals have been developed by each of these programs since the original "Determining Awards" booklet appeared. For this reason, only those portions of the original text which reflect material not discussed elsewhere have been retained here. In particular, emphasis is placed on the computation of the expected parental contribution from income and assets toward educational costs, under the Federal Income Tax System and under the Alternate or Income System. A completely revised version of "Determining Awards Under Federal Student Aid Programs" is in preparation and will be distributed to all participating institutions in 1968.

I. INTRODUCTION

The Federal grant, loan, and work-study programs are designed for students who are admissible to post-secondary institutions or who are enrolled in such institutions, who are in need of assistance to pay their college expenses, and who are in "academic good standing."

Before need analysis is discussed, an additional comment about the academic eligibility is important. The Congressional intent is that financial need shall be a fundamental requirement for award of this Federal assistance, but superior academic promise or performance shall not. The Draft Regulations for Educational Opportunity Grants, issued by the Office of Education in February 1966, specify that a student is eligible if he "has been accepted for enrollment as a full-time undergraduate student, or is in good standing and in full-time attendance as an undergraduate student."

It must be remembered that these programs are "opportunity" programs and not "scholarship" programs, as many gift-aid programs more typically are. In the Federal grant, work, and loan programs, the intent of the phrase "in good standing" is to include, as a minimum, all students progressing normally toward a degree. It may also include, at the discretion of the institution, all those eligible to continue as enrolled students at the institution, including those who may be temporarily on academic probation. "Good standing" is in no way meant to suggest that a student must be expected to or must actually maintain a strong academic average.

The successful implementation of these programs requires that institutions accept the flexibility of the academic requirements that are to be applied to students being considered for Federal funds. This may be in conflict with the procedures many institutions have developed (and may wish to continue to utilize) in the awarding of the non-Federal funds under their jurisdiction, particularly gift assistance. This conflict may trouble some institutions, but it is an issue that must be faced. An institution can either make the academic requirements for the other aid under its jurisdiction more flexible, or it can operate on two different standards--one for its own programs and a different one for the Federal grants, loans, and jobs. The Federal student assistance programs require that a student is, and will continue to be, eligible for assistance under them as long as:

1. The student is allowed to remain in the institution.
2. He continues to show academic promise.
3. It is reasonable to expect that he will be graduated.
4. The Federal funds continue to be available.
5. The financial need remains.

Flexibility regarding academic criteria is explicitly encouraged with respect to Educational Opportunity Grants. Section 403 of the Higher Education Act of 1965 carries the clear suggestion that such grants be renewed for the duration of the recipient's undergraduate program, not to exceed four academic years, as long as he maintains satisfactory progress in his course of study.

The fact that one of the major intents of the Higher Education Act is to reduce dropouts and to encourage re-entry into educational programs of those who may have dropped out lends further strength to the importance of the renewal of the awards. The absence of renewals and of the necessary matching funds to meet need could well cause recipients to drop out of college for financial reasons. Forced withdrawals by the very students who, by definition, are particularly in need would clearly be in contradiction to the intent of the Educational Opportunity Grants Program, its encouragement of the full utilization of educational talent, and the elimination of unnecessary dropouts on the part of those with the ability to pursue post-secondary programs profitably.

Even though the academic qualifications of students selected to receive funds under the Federal programs are not rigorous, the financial need qualifications definitely are. Successful administration of these programs by colleges, particularly the Educational Opportunity Grants Program, will require the colleges to identify young men and women of exceptional financial need, to determine the amount of assistance they need to continue their education beyond high school, and to offer a package of financial assistance adequate to meet each student's needs.

II. WHAT IS FINANCIAL NEED?

Financial need is the difference between the amount of money a student and his family can provide for an education and the expense of that education. Financial need is not a term synonymous with poverty. It is related to college expenses as well as family financial strength. While maintaining its objectively measured standard of living, a family that would need substantial financial aid to send its child to one college might need much less to meet that child's expenses at another institution. Two elements must always be considered:

1. The amount of money the student and his family can reasonably be expected to contribute toward a definite period of education, usually an academic year.

2. The expense of the education during that period at the institution of higher education the student plans to attend.

Financial need is the difference between these two amounts. The greater the difference the greater the need, measured on a scale relative to college expenses.

In assessing eligibility for the Federal programs, particularly for the Educational Opportunity Grants Program, the institution should determine financial need as measured on an absolute scale relative to the amount the parents of the student can contribute toward the expense of education at any institution.

Eligibility for the Educational Opportunity Grants Program is limited to students of "exceptional financial need" as measured on the absolute scale of parental contribution. These are students from families in which the parents are able to contribute up to approximately $625 an academic year.

III. HOW TO MEASURE A FAMILY'S ABILITY TO PAY (UNDER THE FEDERAL INCOME TAX SYSTEM AND THE ALTERNATE OR INCOME SYSTEM)

A. Computing the Parents' Expected Contribution:

The Federally financed student assistance programs assume that a student and his parents have the primary obligation to pay for the education of the student. Parents are expected to provide, as well as they are able, the basic essentials of life whether the student lives at home or on the college campus. The student is expected to use a portion of his own savings to assist in meeting the expense of his education. When these responsibilities have been met, the college, society, or the government may accept the additional responsibility through programs of student financial assistance.

All need analysis systems recognize that a certain level of income and assets is necessary to maintain a family. It is only when income and assets exceed this level that funds are considered to be available to assist in meeting the expense of education.

A system of evaluating ability to pay for college expenses must relate in some way to the total financial strength of a family. No need analysis system can scientifically provide an exact recommendation of the contribution that can be expected from any particular family. Financial need analysis can only indicate the approximate contributions that can be expected from a family. It is the role and responsibility of the financial aid officer to review the financial circumstances of the family and make an evaluation which adequately reflects the particular problems that must be faced by a particular family living in a particular situation. This section discusses two methods by which the financial aid officer may estimate the amount that the parents can be expected to contribute toward the expense of a college education.

4

The first essential of any need analysis system is data collection. The financial aid officer must collect information about the financial circumstances of the family under consideration. The data collection device must permit the family to list:

1. All the sources of income that the family has available. Items such as salaries and wages, interest and dividends, public assistance payments, and other types of income must be included.

2. All the major assets that the family has available. Items usually included are residence equity, value of other real estate, value of family-owned businesses or farms, stocks, bonds, bank accounts, and other investments.

3. The unusual expenses that the family must meet from its income and assets. Working mothers, other dependents, medical and dental needs, indebtedness, and so forth may create extraordinary expenses that should be included.

4. Special problems that the family faces or expects to face. Such circumstances as illness of the working parent, anticipated expenses for home maintenance, and so forth should be described.

It is important not only to obtain the information that the financial aid officer must have to make his evaluation, but also to provide the family with an opportunity to explain the circumstances which it feels are important and should be known. In addition to providing additional information from which to estimate the ability of the family to pay the expenses of a college education, this information will frequently provide an insight into the attitudes of the family about college attendance.

FEDERAL INCOME TAX SYSTEM

The graduated Federal income tax is generally accepted as a fair and equitable method of assessing the economic status of a family unit. For most of the families in the United States, the Federal income tax paid bears a relatively direct relationship to the amount of income that the family receives and the unusual expenses that it must pay from its income. The amount of Federal income tax paid, therefore, may be used as one basis for determining the amount of money the family can be expected to contribute from income toward meeting the expense of a college education.

Use of the Federal income tax paid as a measure of ability to pay for the expense of higher education has special advantages for many families and for many institutions. It does not require that the family maintain special records about its income and expenditures, nor does it require that it make additional calculations. It uses information that is readily available to most families. The system is easily explained and generally understood. It has the tendency to eliminate some of the value judgments that are necessary in other systems of need analysis. The information can be verified; with the cooperation of the family, it is possible for the institutional financial aid officer to obtain a certified copy of the Federal income tax return from the Internal Revenue Service.

The system works quite simply. The family is asked to provide information about its income and expenses taken directly from Form 1040 or 1040A of its last two Federal income tax returns. This information is used by the financial aid officer to compute the amount of Federal income tax paid last year (or to verify the amount that the family has indicated on the data collection form). For families that itemize their deductions, the reported tax can be verified through use of the marginal taxation rates given in Table I. For families that take the standard deduction, Table II may be used to verify the amount of income tax reported.

For families in which there is a general stability of income from year to year (as is the case with most salaried workers), the amount of income tax paid last year can be used in estimating the amount of money that the family can be expected to contribute from its income. In those cases in which the amount of the family's income has changed significantly during the past two years, the contribution from family income can be estimated by use of the average income tax paid during the two years reported on the form.

Next, the family is asked to provide information about its assets and investments. These items include:

1. Home equity--the fair market value of the home minus the amount of mortgage or home improvement loans outstanding.
2. Other real estate equity--the fair market value of any other real estate owned by the family, minus the amount of mortgage or improvement loans outstanding.
3. Value of business or farm--the total assets (fixed and current) of the farm or business less the total liabilities (fixed and current) of the business. If the family owns only a portion of the business or farm, the value must be adjusted to reflect its share of ownership.
4. Bank accounts--both savings and checking.
5. Other investments--including stocks, bonds, loans that the family has made to others, and so forth.

The value of these assets is totaled, and an allowance of $10,000 is made against the total to provide for the retirement needs of the family and to allow for other financial commitments (any indebtedness) that the family may have outstanding. A contribution of 1 percent of the assets beyond $10,000 can be reasonably expected toward the expense of college each year.

The contribution from family income, derived from the amount of income tax paid, and the contribution from family assets are then added together to provide the total parental contribution.

There are some disadvantages to the use of this system. Many families, reasonably or unreasonably, have a strong reluctance to divulge information which they have submitted to the Internal Revenue Service. Some are concerned that release of such information will prejudice their position with the Internal Revenue Service in future years. They may look upon it as an attempt to audit their tax return. Others may see it as a way of verifying information that they have given to other agencies, such as the welfare department, and may be concerned that disclosure of the information may affect the benefits that they are receiving.

The Federal income tax system does not take into consideration certain circumstances which can affect the family's ability to pay. When a family computes the Federal income tax it will pay, no allowance is made, for example, for the costs of educating an older brother or sister who may be attending the same or a different college. Such an expenditure does affect the family's ability to contribute to the expense of the applicant's education. Allowance is also made for other dependents only if the parents provide more than half of their support. In many instances the family may be making a significant contribution to an aged grandparent, aunt, or uncle, which will influence its ability to contribute toward a child's education, even though the amount may not be sufficient to provide it with a deduction on its Federal income tax. It is generally agreed that it costs a family more for two people to earn a given income than for one person to earn the same income. The Federal income tax system does not make any allowance for the additional expenses of a working mother. These are examples of expenses that the financial aid officer may wish to consider in making evaluations of the family financial circumstances as they affect the ability to pay for a college education.

Finally, this system is based on information that may be out-of-date by the time the funds are actually given to the student. Financial aid applications received in the spring, for awards to be made in September, will be based on information for the year ending the preceding December. In some cases significant changes in family circumstances will have occurred and the contribution that has been calculated may be unfair to the family or to the college. If there is any indication that such

changes may have occurred, the financial aid officer will be well advised to verify the information he received in the spring with later data obtained at the time of registration in the fall.

This problem exists with any need analysis system, since circumstances do change. The only point to emphasize here is that a system reflecting actual income for an expired year is more likely to be out-of-date than one using projected income estimates from families for the current year--the year in which the student actually enrolls in or continues in his post-secondary school program.

A sample data collection form that may be used with the Federal income tax system of computing the family's ability to pay is shown at the end of this publication.

AN ALTERNATE APPROACH, THE INCOME SYSTEM

As has been shown, any system of need analysis that is sensitive to the unusual and unique situations of families will use a number of different variables. For many families, these more complicated systems are not necessary because the family circumstances are not complicated. In addition, the lower the family income and assets, the less impact complicated circumstances can have on the parental contribution figure because that figure is low by definition. It cannot, therefore, be reduced greatly by tax deductions or by allowances.

An alternate system, which can be referred to simply as the "income system," utilizes family income directly for the identification of the family contribution from income. The financial aid officer need only know the family's income and number of dependents to determine, from Table III, the contribution that may reasonably be expected from the family income. Family assets are then treated as in the Federal income tax system--all assets are totaled, an allowance of $10,000 is granted against them, and a contribution of 1 percent of the remainder is expected from the family.

To apply this system, the institution need only collect the following information from the family.

- Annual income from wages, salaries, and other sources
- Number of dependent children
- Net assets, including real estate equity (home and other), bank accounts, investments, and value of farm or business. This system obviously has the advantages of requiring relatively simple data collection and relatively few steps in computing the parents' contribution. It has the disadvantage of not accommodating any unusual expenses that the family may incur and that may affect its ability to meet college expenses.

SAMPLE CASE

One sample case, the Adams case, is presented at the end of this booklet, on the data collection form suggested for use with the Federal Income Tax System.

This family includes a father, aged 50, who earns $4,200 and a mother who earns $1,000, two children, the applicant, Thomas, aged 17, and a younger sister, aged 12. The family lists medical expenses of $450 in 1965 and of $465 in 1966.

The results of the need analyses under each system are summarized briefly below. Under the Federal Income Tax System the parental contribution figure is just under $300, but in the alternate or income system, which is less sensitive, it is $350.

(a) Federal Income Tax System

As is indicated on line 13, the Adams family paid a Federal income tax of $290 for 1965, and its assets of $7,500 are below $10,000. Therefore, their parental contribution would be $290, based on itemized deductions of $800, of which $300 reflects medical expenses in excess of 3 percent of income.

(b) Alternate or Income System

Under the alternate or income system, Table III may be used directly. For an income of $5,200 and two children, the parental contribution would be $350.

As in the Federal Income Tax System, there is no additional contribution from the assets of $7,500 since they are below $10,000. Therefore, the total parental contribution would be $350.

B. Other Factors in Computing Financial Need

The parents' contribution, as calculated by one of the foregoing methods, is the basic element in computing financial need. It also forms the primary basis of eligibility for consideration in the Educational Opportunity Grants Program. But in order to reflect the applicant's financial circumstances accurately, the financial aid officer must take into account three other factors:

- The amount that can be expected from the student's savings
- The amount that the student can be expected to earn during the summer preceeding his registration
- The expenses that the student will have during the academic year of study.

STUDENT SAVINGS AND EARNINGS

The savings that the student has accumulated during the preceding years certainly can be considered as one source of meeting the expense of his college education. In an effort not to exhaust the savings too quickly and to allow the recipient some flexibility in the use of loans and part-time employment, many colleges divide student savings by the number of years the student will remain in college and expect the resulting amount to be made available during each year.

Each college must evaluate for itself the reasonable expectation that it can make for savings from the summer earnings of its students. Colleges that draw heavily from urban areas may expect more; colleges that draw from rural areas may expect less. Institutions also should be ready to make individual exceptions where justified by special circumstances; for instance, a student may be unable to find any employment or may have to use all his summer earnings to assist in the support of his family.

The following amounts can be used as general guidelines for the savings that can be expected from student summer earnings:

Rank of the student	Men	Women
Pre-freshman	$ 300	$ 200
Pre-sophomore	350	250
Pre-junior	400	300
Pre-senior	450	350

DETERMINING A STUDENT BUDGET FOR AN ACADEMIC YEAR

The final important element in the assessment of student financial need is the establishment of a reasonable college budget. This budget must adequately reflect the charges that are made to a student by the institution as well as the reasonable amounts he will be expected to pay for non-institutional expenses. The budget for a student in residence should include: tuition, fees, room and board, and a reasonable amount for such expenses as the replacement and maintenance of clothing, laundry, amusements, incidentals, books, and travel. Many institutions include $400 for personal expenses and $150 for books and supplies as reasonable estimates of the average expenditures of most students.

The budget for the commuting student should reflect the amount of tuition, fees, books, and personal expenses, as for the student in residence. In place of the room and board charged by the institution, an amount must be added to reflect the cost of room and board at home and meals eaten on campus. Many institutions include $500 as a reasonable estimate of the expenses that families of commuting students must pay to provide room and board at home plus meals on campus.

Travel expenses vary from student to student, but the college must include some amount in the budget in order to set proper awards. For the commuting student it is frequently possible to calculate the actual cost of public transportation. For a resident student, it is generally appropriate to include the cost of two round trips by rail or air-coach.

Extraordinary expenses for such items as additional clothing for students attending college in substantially different climates from that at home, extra courses taken for remedial purposes or to enrich a program, residence on campus during vacation periods, or unusual health and medical needs must be treated in each individual case as exceptions to the normal budget.

The following examples of typical budgets for institutions of different types may be of assistance in developing a reasonable budget.

A PRIVATE COLLEGE

	Resident Student	Commuting Student
Tuition and fees	$ 1,400	$ 1,400
Room and board on campus	850	---
Maintenance at home	---	500
Books and supplies	150	150
Personal expenses	400	400
Transportation	200	150
	$ 3,000	$ 2,600

A STATE-SUPPORTED UNIVERSITY

	Resident Student	Commuting Student
Tuition and fees	$ 400	$ 400
Room and board on campus	850	---
Maintenance at home	---	500
Books and supplies	150	150
Personal expenses	400	400
Transportation	200	150
	$ 2,000	$ 1,600

A TUITION-FREE COMMUNITY COLLEGE

	Resident Student	Commuting Student
Tuition and fees	---	---
Room and board on campus	---	---
Maintenance at home	---	$ 500
Books and supplies	---	150
Personal expenses	---	400
Transportation	---	100
		$1,150

These represent the total expenses that must be met by families and students for the nine-month academic year at each type of institution. They include all the expenditures that the institutions have found, through study, are typical of the majority of their students, and the budgets are adequate for a student to maintain himself and study adequately without undue pressure from finances.

C. Special Problems in Need Analysis

Institutions frequently encounter difficulties in their efforts to assess accurately and equitably the financial need of older, self-supporting, and married students. It can be argued that the parents of such students have no responsibility to provide support. It can also be argued that parents have a greater obligation to provide support for children, regardless of their age, than has a college, the society, or the government.

The various administrative manuals contain guidelines for institutions in dealing with these problem cases.

TABLE I

Tax rates of the Internal Revenue Service by level of taxable income (for use with the Federal Income Tax system)

Schedule for married taxpayers filing joint returns

Taxable income	Federal income tax
Not over $ 1,000	14% of taxable income
$ 1,000 to 2,000	$ 140 plus 15% of excess over $ 1,000
2,000 to 3,000	290 plus 16% of excess over 2,000
3,000 to 4,000	450 plus 17% of excess over 3,000
4,000 to 8,000	620 plus 19% of excess over 4,000
8,000 to 12,000	1,380 plus 22% of excess over 8,000
12,000 to 16,000	2,260 plus 25% of excess over 12,000
16,000 to 20,000	3,260 plus 28% of excess over 16,000
20,000 to 24,000	4,380 plus 32% of excess over 20,000
$24,000 to $28,000	$5,660 plus 36% of excess over $24,000

Schedule for heads of households

Taxable income	Federal income tax
Not over $ 1,000	14% of taxable income
$ 1,000 to 2,000	$ 140 plus 16% of excess over $ 1,000
2,000 to 4,000	300 plus 18% of excess over 2,000
4,000 to 6,000	660 plus 20% of excess over 4,000
6,000 to 8,000	1,060 plus 22% of excess over 6,000
8,000 to 10,000	1,500 plus 25% of excess over 8,000
10,000 to 12,000	2,000 plus 27% of excess over 10,000
12,000 to 14,000	2,540 plus 31% of excess over 12,000
14,000 to 16,000	3,160 plus 32% of excess over 14,000
16,000 to 18,000	3,800 plus 35% of excess over 16,000
18,000 to 20,000	4,500 plus 36% of excess over 18,000
20,000 to 22,000	5,220 plus 40% of excess over 20,000
$22,000 to $24,000	$6,020 plus 41% of excess over $22,000

TABLE II Federal income tax payments, based on standard deductions, by level of net income and size of family (for use with the Federal Income Tax system)

Net income (before Federal Tax)	1-child		2-child		3-child		4-child	
	Two-parent family	One-parent family	Two-parent family	One-parent family	Two-parent family	One-parent family	Two-parent family	One-parent family
$1,000 - 1,249	$ 0	$ 0	$ 0	$ 0	$ 0	$ 0	$ 0	$ 0
1,250 - 1,499	0	10	0	0	0	0	0	0
1,500 - 1,749	0	40	0	0	0	0	0	0
1,750 - 1,999	0	70	0	0	0	0	0	0
2,000 - 2,249	20	100	0	20	0	0	0	0
2,250 - 2,499	50	130	0	50	0	0	0	0
2,500 - 2,749	80	170	0	80	0	0	0	0
2,750 - 2,999	110	200	30	110	0	30	0	0
3,000 - 3,249	140	240	60	140	0	60	0	0
3,250 - 3,499	180	270	90	180	10	90	0	10
3,500 - 3,749	210	310	120	210	40	120	0	40
3,750 - 3,999	240	350	150	250	70	150	0	70
4,000 - 4,249	280	390	190	290	100	190	20	100
4,250 - 4,499	310	430	220	320	130	230	50	130
4,500 - 4,749	350	470	250	370	160	260	80	170
4,750 - 4,999	380	510	290	410	200	300	110	200
5,000 - 5,249	420	550	320	450	230	340	140	240
5,250 - 5,499	460	590	360	490	270	380	180	270
5,500 - 5,749	490	640	400	530	300	420	210	310
5,750 - 5,999	530	680	430	570	340	460	240	350
6,000 - 6,249	570	720	470	610	370	500	280	390

Explanations. Answer those which apply to you.

1. Explain the sources of other income listed on line 3

2. Explain the adjustments listed on line 5

3. Explain the number of exemptions claimed on line 7 if they include other than yourself, your wife, and your children

4. Explain the other real estate equity listed on line 15

5. Explain the other investments listed on line 18

6. Explain the total personal debt listed on line 20. Include the purpose of the debt and the amount you still owe.

7. Explain any other matters which you believe should be considered in evaluating your financial situation.

Parents' certification

We have checked this form for omissions and errors. To the best of our knowledge the information reported is complete and correct. We agree to inform the college financial aid officer of any major changes in our financial status if the student applicant is awarded assistance. Further, we agree, if requested, to send to the college an official photostatic copy of our latest federal income tax return obtained from the appropriate district office of the United States Internal Revenue Service.

EDUCATIONAL OPPORTUNITY GRANTS PROGRAM MANUAL

(This "Interim Manual" has been abridged and revised for use by new institutions pending the publication of the revised manual)

10 August 1970

CHAPTER I

INTRODUCTION TO THE EDUCATIONAL OPPORTUNITY GRANTS PROGRAM

101. Purpose of the Program

The purpose of the program is to provide Educational Opportunity Grants to students of exceptional financial need, who, for lack of financial means of their own or of their families, would be unable to enter or remain in institutions of higher education without such assistance. Grants are made available to eligible students through insitutions of higher education participating in the program. The Educational Opportunity Grants Program was established by Title IV, Part A, of the Higher Education Act of 1965 (Public Law 89-329).

102. Criteria for Institutional Eligibility

Criteria for institutional eligibility may be reviewed with the appropriate regional offices.

102.01 Discrimination Prohibited

Title VI of the Civil Rights Act of 1964 states: "No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subject to discrimination under any program or activity receiving Federal financial assistance." Therefore, the Educational Opportunity Grants Program, like every program or activity receiving financial assistance from the Department of Health, Education, and Welfare, must be operated in compliance with this law.

103. Criteria for Student Eligibility

In accordance with Section 176.8 of the EOG Draft Regulations, an eligible institution of higher education may award an Educational Opportunity Grant to any student if it determines that such student:

(1) is a national of the United States, or is in the United states for other than a temporary purpose and intends to become a permanent resident thereof;

(2) has been accepted for enrollment as a full-time undergraduate student, or is in good standing and in full-time attendance as an undergraduate student;

(3) shows evidence of academic or creative promise and capability of maintaining good standing in his course of study;

(4) is of exceptional financial need;

(5) would not be financially able to attend the institution without an Educational Opportunity Grant.

To be considered as "full-time," a student must carry at least 75 percent of the normal academic load in terms of course work or other required activity. A student who attends on a part-time basis is not eligible for a grant.

Students attending summer session will qualify for an Educational Opportunity Grant if they are: (1) registered on a full-time basis in an academic quarter or trimester or (2) registered for at least the equivalent of one semester credit hour or 1½ quarter credit hours per week of a summer session, six weeks or more in length. A student, therefore, registered full-time in a summer quarter or trimester, which is equal to a quarter or trimester of the regular academic year, is eligible for a grant. Also eligible for a grant is the student registered for either 6 semester hours or 9 quarter hours of a six-week summer session. The student, however, who receives a summer session grant must be attending or planning to attend during the regular academic year the institution of higher education awarding him the grant.

Under the Draft Regulations, the term "undergraduate student" means a student enrolled in an undergraduate course of study. The term "undergraduate course of study "excludes (1) that portion of any program involving a period of study beyond the first four years of full-time study at the college level, or (2) any portion of a program leading to (i) a degree beyond the bachelor's degree, or (ii) a first professional degree when at least three years of study at the college level are usually required for entrance into a program leading to such degree at the institution.

A student may not receive a grant for full-time study in a professional school when at least three years of study at the college level are usually required for entrance into a program in that school leading to a first professional degree. A student could qualify for a grant during three years of undergraduate study as a pre-law student, for example, but his eligibility would cease when he subsequently entered law school.

The term "good standing" means that the grant recipient is maintaining satisfactory progress in the course of study which he is pursuing, according to the regularly prescribed standards and practices of the institution from which he received the grant.

Determination as to whether a student evidences "academic or creative promise" and "capability of maintaining good standing" should be made in the light of an applicant's potential for success in completing or benefiting from his intended course of study.

There is no age limitation governing student eligibility.

103.01 Duration of Student Eligibility

The duration of a student's Educational Opportunity Grant shall be for the period required by the student to complete his undergraduate course of study, but in no event shall such period exceed four academic years, less any period with respect to which the student previously received payments under an Educational Opportunity Grant from the same or another institution.

Educational Opportunity Grants will be committed on the basis of academic years, which is that period of time, the duration of which is typically eight or nine months consisting of two semesters, or two trimesters, or three quarters, during which one year of study at the college level is normally completed.

The normal academic year begins with the fall semester, quarter, or trimester. A student may use more than one academic year of eligibility during a calendar year, but it should be kept in mind that eligibility for an EOG is limited to four academic years.

Attendance at summer sessions significantly affects the duration of a student's eligibility for a grant. If the student is attending a regular quarter or trimester, the eligibility expended is equivalent to any other academic quarter or trimester. A student, however, attending a summer term of six weeks or more, but less than the length of a regular term, will expend ½ of the grant eligibility available to him for a regular term. This share of eligibility must then be deducted from his total four undergraduate academic years of grant eligibility. The financial aid officer consequently should explain to the EOG recipient who plans to attend a summer session that his fourth year of grant eligibility will be proportionately reduced.

103.02 Initial Year Award

The initial year award refers to the first academic year of the first Educational Opportunity Grant awarded any student. Ordinarily a student will receive an initial year award and three renewal awards in the normal course of a four year baccalaureate program. A student shall be considered an initial year awardee only during the first academic year that he receives a grant, even though he may use less than an academic year of eligibility.

5090180

Such a student will be eligible for three renewal year awards plus a fourth renewal award for the share of eligibility not awarded to him in his initial year. For example, a student who enters during the second semester of an academic year shall hold an initial year award only during that semester. Assuming that he does not accelerate his program by summer study, this student would be eligible for a fourth renewal award of one semester only provided he is still an undergraduate student in good standing.

103.03 Renewal Year Award

A renewal year award refers to the second or subsequent academic year a student is a recipient of an Educational Opportunity Grant. Priority in the disbursement of EOG funds must be given to renewal applicants, assuming their continued eligibility based upon a redetermination of need.

103.04 Transfer Students

If a student transfers to another institution of higher education participating in the Educational Opportunity Grants Program, his application at the second institution would not be for an initial year award if he had received a grant from the first institution he attended. However, an Educational Opportunity Grant recipient who transfers during the period of his initial year award is eligible for the unexpired portion of his initial year award from the institution to which he transfers, assuming the availability of funds and his continued eligibility based upon a redetermination of need.

104. Determination of Exceptional Financial Need

In the great majority of cases, the student's relationship with his parents is such that the parents would normally be expected to contribute to his educational expenses, provided that they are financially able to do so. For the purpose of this program, a student is considered to be in exceptional financial need if his parents can be expected to contribute from their income and assets no more than $625 toward his educational expenses during the academic year. Parents include not only natural parents, but stepparents, or an individual who stands in loco parentis, except that foster parents, conservators, or a State agency appointed guardian shall be excluded.

It is recognized that special circumstances may exist in which it would not be reasonable to expect any contribution from the parents no matter what their financial ability may be. The basis for this determination by the financial aid officer must be carefully documented.

Some factors which in combination most commonly form a basis for such a decision are:

(1) age of student;
(2) marital status of student;
(3) whether the student is self-supporting;

510006

(4) whether the student lives at home;
(5) whether the parents declare the student as an exemption on their income tax return;
(6) marital relationship of parents;
(7) student-parent relationship.

A student for whom the financial aid officer has determined that no parental contribution should be expected, regardless of the parents' financial ability, will be referred to hereafter as an independent student. This student is considered to be of exceptional financial need when the amount available to him for educational expenses, which will be referred to hereafter as the independent student contribution, is no more than $625 for the academic year.

A married student is not necessarily an independent student as the term is used here. There will be cases in which the financial aid officer, for purposes of establishing eligibility for an Educational Opportunity Grant, will determine that a parental contribution should be expected for the married student.

105. Computation of Expected Parental Contribution

For determining the expected parental contribution, the financial aid officer may use one of the four methods of need assessment listed below. (For further reference, see the booklet entitled Determining Awards Under Federal Student Aid Programs or the program manuals of the two independent need analysis systems.)

See "Determing Awards Under Federal Student Aid Programs" for
The Federal Income Tax System
Alternative Approach, The Income System

See respective need analysis system program manual for
The American College Testing System
The College Scholarship Service System

106. Computation of Independent Student Contribution

The independent student contribution is the amount available to an independent student for educational expenses. This amount is the difference between (1) his assets and resources and his expected income from assets, savings and employment; and (2) his living expenses without direct educational costs. Living expenses may include the following: room and furnishings, including utilities; food; personal transportation; clothing; medical and dental, including insurance; recreation and personal. An independent student, for instance, with an expected income of $4,000 and living expenses of $3,600 would have $400 available for education expenses.

Students who can contribute more than $625 toward their expenses may not receive EOG's.

The determination of the independent student contribution presents several difficulties for the financial aid officer. One factor is that this student's budget is usually calculated for twelve months, rather than for an academic year. In addition, many of these students are married, in which case the income and living expenses of the student's spouse and any other dependents must be considered in determining his expected contribution. Since need analysis for these students is not yet a highly-refined or a well-defined procedure, the financial aid officer must rely heavily on his own judgment of the student's special circumstances.

107. Administration of the Program

The Educational Opportunity Grants Program is administered in accordance with Title IV, Part A, of the Higher Education Act of 1965 (Public Law 89-329) and the regulations which govern the program.

In order to participate in the program, an eligible institution of higher education, through an authorized official of the institution, enters into an agreement for the institutional conduct of the EOG program. The agreement must be renewed annually.

Institutions of higher education are notified annually of application procedures, including the procedure for establishing eligibility and for certifying civil rights compliance. An institutional application to participate in the Educational Opportunity Grants Program must be submitted for each fiscal year of participation, July 1 through June 30. This application form, provided by the Division of Student Financial Aid, is part of the "Institutional Application(s) to participate in Federal Student Financial Aid Programs."

The Educational Opportunity Grants Branch requires a fiscal operations report for the preceding fiscal year on or about August 15. This report is submitted in conjunction with the NDSL and CWS program as a part of the so called "Tripartite Report." New institutions will wish to obtain blank copies of this report package so that they may collect the needed data throughout the year and may avoid last minute efforts of data retrieval.

Award letters for the EOG program are mailed at the earliest possible opportunity following the regional panel review process. Award letters are mailed in mid-March. Award letters contain the authorization only. The actual cash for awards is obtained from the National Institutes of Health. See Chapter V of this manual.

Attached to this "Interim Manual" are certain Memoranda on the administration of this program. Memoranda should be read in sequence because they represent the developing program guidlines over a three year period. Where there is apparent conflict between the Memoranda and this "Interim Manual," The "Manual" may be considered authoritative. Questions relating to the EOG program may be directed to the appropriate Regional Office (see list in Appendix) or to:

CHAPTER II

DETERMINATION AND DOCUMENTATION OF EDUCATIONAL OPPORTUNITY GRANTS

201. Determination of the Grant

An EOG grant may be from $200 to $1000.
The procedure for the determination of the Educational Opportunity Grant amount, for either an initial year or a renewal year award, is to ascertain, in sequence, the following:

(1) Cost of attending the institution of higher education;

(2) Total family contribution;

(3) Total student contribution;

(4) Financial need of the student;

(5) The Educational Opportunity Grant amount and matching amount of financial aid provided the student;

Certain adjustments in this process are necessary for the independent student. These adjustments will be mentioned as appropriate in the following analysis of the above procedure.

201. 01 Initial Entitlement for the Educational Opportunity Grant

The purpose of the EOG Program is to assist the most needy students. All EOG recipients must come from families with incomes of less than $9,000. All EOG recipients must have an expected parental contribution or independent student contribution of $625, or less, per academic year.

201. 02 Cost of Attending the Institution of Higher Education

In computing the cost for a student to attend an institution of higher education, the financial aid officer must consider both the basic institutional budget and any extraordinary expenses of the student. EOG recipients from impoverished backgrounds may well need budget items for tutoring, remedial courses, medical and dental care, additional clothing, counseling services, etc.

In the case of an independent student, the normal living expenses were deducted in computing the independent student contribution; therefore the cost of attending the institution would include only those direct educational costs not previously considered--tuition, fees, books, transportation to class, etc.--and any supplemental living expenses attributabe to education, e.g., on-campus meals.

60-433 O - 71 - pt. 1 -- 33

201. 03 Total Family Contribution

For a student from whom a parental contribution is expected, the total family contribution includes the parental contribution and the student's contribution from his income, assets, and resources. For an independent student, the independent student contribution is equivalent to the total family contribution, since all resources available to the independent student were used in computing his contribution.

The contribution which the EOG student will make from summer earnings and assets will be treated in the conventional manner. Frequently the EOG student will have no assets and even little savings from summer earnings because of the many demands on any income to a disadvantaged family. The financial aid officer may be justified in expecting little or no contribution from summer earnings or student assets. Such reduced expectations should be carefully documented in the student's folder.

201. 04 Financial Need of the Student

The financial need of the student is the difference between his cost of attending the institution of higher education and his total family contribution or independent student contribution.

The need analysis process outlined above is similar to that which the aid officer would use with any financial aid program. The following additional steps may prove useful in distinguishing those students who should have EOG's.

Step 1 - Eliminate applicants from families with gross annual incomes over $9000 (for farmers and business "gross" is income after allowance for operating expenses deductible for tax purposes but before income taxes). Family income above this maximum cannot be considered "low," even though financial need may be clearly demonstrated. They are, therefore, beyond the scope and purpose of the EOG program, even though they may be eligible for other forms of aid.

Step 2 - Next eliminate those having an expected parental contribution, based upon an approved system of need analysis, of more than $625 per academic year. This is the same measure of eligibility employed in the past.

Step 3 - Evaluate remaining applicants on the basis of the following description of the type of student for whom the EOG program was intended:

Is:	Is Not:
5. One who is admissible to the appropriate curriculum according to standards established by the institution. There is evidence of academic or creative promise and the ability to complete the course of study, This evidence, however, may deviate somewhat from standard selection criteria. While greater adjustment may be necessary than required of the average student, there is good reason to believe that the potential EOG recipient will respond favorably, given the available supportive services.	5. One whose potential is incongruous with the demands of the desired curriculum or higher education in general. Completion of the course of study seems doubtful, even with the supportive services available to the student.
6. One whose enrollment in higher education is dependent upon sizeable amounts of financial assistance which could not be provided through available non-EOG resources without unreasonable quotas of loans and part-time employment.	6. One whose college financing can be provided through family support and the typical scholarship, loan, and part-time employment programs available through the community, State, and the institution of enrollment.

Step 4 - From those applicants who fall within the financial and descriptive criteria above, select EOG recipients by proceeding from the most needy to the least needy of the eligible group until funds are exhausted. The EOG award amount will be left to the judgment of the financial aid officer, except that stipend cannot exceed one half of the student's need or $1000 per academic year, whichever is less. Section 201. 05 of the EOG Manual provides guidance for those occasions when less than the maximum grant is thought to be desirable.

Step 5 - Provide the necessary "matching" funds as in past years. Refer to Chapter III of this Manual for acceptable forms of "matching" aid. It is hoped that each EOG recipient will receive an aid package which meets his financial need.

The Intended EOG Recipient

Is:

1. One whose family has historically been unable to provide adequate financial support for typical consumer goods and services. Income was inadequate before, not solely as a result of the additional expense of college. Therefor, the family can contribute little or nothing to the student's education.

2. One whose family has been unable to accumulate assets which will provide any element of financial security to the family members. There is little or no cash or property to be used for college expenses or other discretionary purchases.

3. One whose family operates a business or farm which has small cash turnover to go along with low gross income.

4. One whose environment has not allowed concrete plans for higher education to be formed because of the lack of money, family encouragement, proper counseling or any of several other deterrents.

Is Not:

1. One whose family encountered temporary financial loss or strain, preceded and/or followed by adequate resources to provide at least a moderate standard of living.

2. One whose family has been successful in obtaining some degree of financial security through cash or real estate assets to which it can turn for retirement, emergency, or specialized uses, such as education, Business holdings and inventory or farming assets, while used for income production, have such size as to give substantial financial visibility.

3. One whose family operates a business or farm which has large cash turnover and resulting ability to incorporate family needs into expenses of operation.

4. One whose post-secondary plans have been supported by the environment to the extent that college was a foregone conclusion.

201. 05 The Educational Opportunity Grant Amount and Matching Amount of Financial Aid Provided the Student

The final determination of the Educational Opportunity Grant amount and the matching or equal amount of financial aid is based both on the student's initial entitlement for a grant and his financial need. An Educational Opportunity Grant may not exceed either the student's initial entitlement for a grant or one half his financial need. In no case, however, may the basic Educational Opportunity Grant be less than $200 or more than $1000.

The matching amount of financial aid provided the student must be at least equal to or greater than the Educational Opportunity Grant. A definition of matching and a discussion of eligible sources of matching funds for an Educational Opportunity Grant are found in Chapter III.

In the majority of cases, the financial aid officer will award the student the maximum amount computed by the grant determination process. He may determine in some cases, however, that he could better meet the needs of a student by making him an award of less than the maximum computed amount. For example, an institution whose main source of eligible matching aid is loans may prefer to give a less sizeable grant in order to avoid burdening the student with a larger loan obligation than the financial aid officer considers advisable. In this situation, the financial aid officer should document the determination of the student's maximum EOG amount, the total financial aid package--EOG, matching and other aid--given the student, and the reasons for giving less than the maximum EOG amount. These requirements will insure that each student's financial need is thoroughly analyzed, and that the financial aid package is developed according to sound practices.

The difficult task often confronting the financial aid officer is balancing a limited amount of EOG and matching money against an increasing group of applicants with exceptional financial need. Greater flexibility to package aid as described above will enable institutions to make better use of limited funds and to construct the best financial aid package for the student.

202. Documentation of Application and Need Assessment

The institution should have in a student's file:

1) A statement of parental income, or a statement of independence from parents;

2) A student application form;

3) A summary form indicating how the student's need was determined and noting any special circumstances which the financial aid officer found particularily relevant. (See Attachment D.)

When a financial aid officer determines that a student is to be considered an independent student, from whom no parental contribution is expected, the specific reasons for such a determination should be documented. Chapter I, Section 104, outlines the factors that would support this decision.

202. 01 Definition of Staff Responsibilities for Financial Aid Programs

Section 176.14 of the EOG Draft Regulations provides that participating institutions"..shall designate an officer as the institutional representative having direct responsibility for the conduct and supervision of the Educational Opportunity Grants Program," and the officer so designated should"..have similar responsibilities for other student financial aid programs." Because financial assistance is becoming available to greater numbers of students from an increasing number of private and governmental sources, the complexity of administering these awards suggests the need for centralizing this function within institutions of higher education.

In addition to the Financial Aid Officer each institution should designate a "Fiscal Officer" to institute and maintain proper fiscal procedures and records. To ensure proper administration of the EOG Program, as well as other financial aid programs, it is necessary for the Financial Aid Officer and the Fiscal Officer to work together as a team to ensure that student needs are met and documented in a competent fashion.

In those institutions where the administration of the student financial assistance program is decentralized, it is essential that the various committees and officials having pertinent records provide copies to be included in the student's file. This practice will expedite the review and audit functions and minimize the chances of error in administration of the program.

The important elements are careful documentation of all EOG transactions and completeness of each student's folder.

When a financial aid officer awards a student an EOG of less than the maximum amount that he could receive on the basis of the grant determination process, the reasons for this determination must be carefully documented in accordance with the requirements of Chapter II, Section 201. 05.

202. 02 Notification, Offer, and Acceptance

It is expected that the institution will provide evidence of its offer of financial assistance, either through a copy of the letter confirming the offer of aid or some other document. It is essential that the EOG matching funds be shown for each award. (See Attachments A and B.)

It is also expected that the student will acknowledge, in writing, his acceptance of the financial aid package offered by the institution. (See Attachment C.) In most cases, the offer will be accepted as presented. If, however, a student should decline a part of the aid package, negotiation of an arrangement acceptable to the institution and the student would be in order, for example, the substitution of a scholarship or an institutional job for a National Defense Student Loan. In the final analysis, a grant must be matched in the form of a financial aid "package" which is both offered to, and accepted by, the student.

202. 03 Leave of Absence

When the institution finds it necessary to recommend a leave of absence because of extended illness, personal hardship, military service, or other good causes, in accordance with regularly prescribed standards and practices of the institution, records should support the leave approved. Except for military service, and other extraordinary circumstances, the leave may not exceed twelve months, in accordance with Section 176.11 of the EOG Draft Regulations. A student whose leave of absence exceeds the approved period need no longer be given priority for a renewal year award.

202. 04 Student Unrest

The Educational Opportunity Grant Program is covered by various "student unrest provisions." You are asked to study carefully the Keeping You Posted #7 dated March 10, 1969 in the attachment. Clearly the institution must now inquire into the legal history of new and transfer students, and it must terminate EOG awards to student who have been convicted of certain crimes. Questions about the number of student terminations under the "unrest provisions" are now included in the "Tripartite Report." See Keeping You Posted #12 dated May 1970 for additional commentary on student unrest.

Sample Award Letter

College of the Elms
Ivy Lane
Collegeville, Ohio 12345

Date

Mr. Jonathan R. Doe
2244 18th Street
Metropolis, Ohio 12468

Dear Mr. Doe:

It is my pleasure to inform you that the Committee on Admissions has accepted your application for admission as a full-time freshman at the College of the Elms for the fall semester commencing on September 15, 1966 .

I am also pleased to tell you that you have been awarded financial aid as indicated on the attached sheet in order to offset your college expenses during the academic year 1966-67.

Please read all the enclosed material carefully, and notify me concerning your acceptance of our offer of admission and financial aid within one month of the date of this letter.

I shall look forward to hearing from you.

Sincerely yours,

C.D. Roe
Director of Admissions
and Financial Aid

Enclosures

CHAPTER II

ATTACHMENT B

Sample Award Notification

College of the Elms
Ivy Lane
Collegeville, Ohio 12345

Date:
2244 18th Street
Metropolis, Ohio 12468
Address

Jonathan R. Doe
Name of Financial Aid Recipient

1. Your estimated college expenses as a _x_ resident ___ commuting student for the academic year 1966-67:

Tuition and Fees	$800	
Room and Board	850	
Books and Supplies	150	
Personal Expenses	400	
Transportation	200	
TOTAL COSTS		$2400

2. Estimated family contribution from:

Parents' Income and Assets	$300	
Your Assets	100	
Your Net Summer Savings	300	
TOTAL FAMILY CONTRIBUTION		$ 700

3. Your estimated financial need: $1700

4. Financial aid awarded:

Educational Opportunity Grant	$500	
College of the Elms Scholarship	300	
National Defense Student Loan	500	
Metropolis H.S. PTA Scholarship	100	
College Work-Study Employment	300	
TOTAL AID AWARDED		$1700

5. The Educational Opportunity Grant will be paid to you as follows:
   $250 at the time of fall registration
   $250 at the time of spring registration.

6. Please sign and return the enclosed acceptance form if you desire to accept this offer of financial assistance.

NOTE: Mr. Doe was awarded the $500 EOG on the basis of his initial entitlement for a grant and his financial need. The NDSL could be considered as matching financial aid and the scholarships and CW-SP job as other financial aid for meeting his remaining need. In item 5 of the sample award notification form, the institution may wish to spell out in greater detail the funding pattern for all the aid package. In item 4 of the notification form, all types of assistance awarded by the college could be included so that the amounts could easily be filled in for the appropriate aid categories.

CHAPTER III

MATCHING FUNDS AND MAINTENANCE OF LEVEL

301. Matching Financial Aid for an Educational Opportunity Grant

Matching funds for an Educational Opportunity Grant include all financial aid which may be used to satisfy the requirement of Section 402(1) of the Higher Education Act of 1965.

The amount of matching financial aid provided the student is determined by the Educational Opportunity Grant amount (see Chapter II, Section 201.05). The matching amount of financial aid must be at least equal to the amount of the Educational Opportunity Grant.

In some cases, to satisfy the remaining need of the student, the institution may wish to provide a greater amount of financial aid than that equal to the Educational Opportunity Grant. Both funds eligible and those not eligible as matching may be used by the institution in satisfying the remaining financial need of the student.

301.01 Grants, Gifts, and Scholarship Aid

Grants, gifts, and scholarship aid may be treated as matching financial aid in all cases where the institution of higher education controls the funds or where the funds are provided by a scholarship or grant program established by a State, private institution or organization.

The scholarship, grant, or gift may be treated as matching financial aid if such aid is included as a firm commitment or stems from firm arrangements and is not merely a promise.

The institution may wish to require that a student, awarded a non-institutional scholarship or grant, provide an official award notification, if such aid is to be used for matching his Educational Opportunity Grant.

301.02 Loans

Direct loans made by the institution and those loans in which the institution provides the guarantee funds may be treated as matching financial aid. This would include the National Defense Student Loan Program, the Nursing Student Loan Program, the Health Professions Student Loan Program, the College Reserve Program of United Student Aid Funds, Inc. and any State or private Guarantee Loan Program in which the institution provides the guarantee funds.

If the institution performs primary administrative functions and exercises control over the determination of loan recipients, then a loan made under a State loan program may be used as matching, even though the State provides the loan funds. State loan programs of this category, however, must have prior approval, from the Washington office, on an individual basis before being acceptable as matching aid.

Short term or emergency loans, which are intended to be repaid before the end of an academic term, are not eligible for matching EOG's. Direct bank loans, most State loan programs, and loans from sources such as foundations, service clubs and other philanthropic organizations are not eligible as matching because the institution does not exercise primary control over these funds.

301.03 Student Employment Programs

Employment provided by the institution during any academic semester, trimester, quarter, or term during which the student is in full-time attendance as an EOG recipient may be used as matching financial aid. Institutional employment and CWSP employment during an academic period in which the student is not in full-time attendance (usually in the summer) may be considered as matching aid. Employment not provided by the institution may not be used as matching aid, but should be treated as a student resource in determining his financial need.

Employment provided by the institution refers to employment for the institution or for some related business or institution either controlled by the institution or with which the institution has a written agreement allowing the institution to screen and recommend placements. Examples would be a contract food service or research foundation.

When student employment is used as matching financial aid, the student's gross wages (before Social Security, Income Tax, or other deductions) are considered as eligible matching funds.

Payments for student employment are acceptable as matching aid either in cash or by crediting the student's account for the fair cash value of services performed.

301.04 Institutional Waivers of Tuition and Fees

Institutional Waivers of the tuition and fees regularly charged all students may be used as matching financial aid.

301.05 Sources of Student Financial Aid Excluded as Matching Financial Aid

The following are examples of funds which may not be considered as matching financial aid for Educational Opportunity Grants: The extension of Social Security benefits to students attending institutions of higher education, AF-ROTC and NROTC scholarships, Vocational Rehabilitation payments, and Federal education benefits for certain areas of specialized study available through the various agencies of the Federal Government, e.g., G.I. Bill payments.

301.06 Circumstances Affecting Matching Financial Aid

Circumstances may arise during the academic year which could modify the amount of matching financial aid. If some matching financial aid committed by the institution cannot be provided, other matching financial aid must be substituted.

If a student who has been awarded an EOG is also employed under either the College Work-Study Program or the institution's own work program and quits his job or is fired for cause before the end of the assigned period of work, then neither different employment nor a different type of financial aid need be substituted solely to satisfy the matching requirement of the EOG Program.

In such cases the financial aid officer should, however, make every reasonable effort to meet the student's remaining need for assistance in order to prevent his being forced to terminate his studies prematurely for purely financial reasons. If no substitute aid is provided by the financial aid officer, the reasons for such action and its effect on the student's ability to continue his studies should be carefully documented. The financial aid officer should also counsel the student regarding his responsibility to any future employer before placing him in another part-time job.

302. Maintaining the Level of Undergraduate Financial Assistance

The Agreement, to which an institution must became a party prior to its participation in the EOG program, requires that the institution continue to spend, in each fiscal year in which the Agreement remains in effect, in its own undergraduate financial assistance program, an amount not less than the institutional average expenditure for such purpose during the three fiscal years preceding the fiscal year in which the Agreement is entered into. (See Chapter V, ...Section 505.)

Sources of financial assistance that can be used in computing the level of institutional undergraduate financial assistance would include: institutional scholarships and grants, institutional waivers of tuition and fees, institutional loans, institutional share for NDSLP loans, institutional employment, institutional share for CWSP payments.

Although the institution can use its own as well as the Federal contribution for NDSLP loans as matching financial aid, only the institution's contribution can be considered in computing the level of institutional undergraduate assistance. Also, the institution's share of CWSP expenditures can be applied in computing the level of institutional undergraduate assistance.

The following table summarizes the appropriateness of using various funds as matching for Educational Opportunity Grants and as components of the institutional maintenance of level.

Maintenance of Level	Matching Sources for EOG		
		A.	Gift Aid
Yes -------	Yes ----------	1.	Institutional grants-in-aid.
Yes -------	Yes ----------	2.	Institutional scholarships.
Yes -------	Yes ----------	3.	Institutional waiver of tuition.
Yes -------	Yes ----------	4.	Institutional waiver of fees.
No -------	Yes ----------	5.	Full amount of State Scholarships.
No -------	Yes ----------	6.	Full amount of scholarships or grants provided by a group outside the institution.
No -------	Yes ----------	7.	Law Enforcement Education Program grants.
		B.	Loans
Yes -------	Yes ----------	1.	Institutional student loans, including Insured Loans if the institution is a lender.
Yes -------	Yes ----------	2.	Institutional share* of the National Defense Student Loan Program.
No -------	Yes ----------	3.	Full amount of National Defense Student Loan Program.
Yes -------	Yes ----------	4.	Institutional share* of student nursing and health professions loans.
No -------	Yes ----------	5.	Full amount of student nursing and health professions loans.
Yes -------	Yes ----------	6.	Institutional share* of the United Student Aid Funds, Inc., College Reserve Program.
No -------	Yes ----------	7.	Full amount of the United Student Aid Funds, Inc., if institution provides guarantee funds under the College Reserve Program.

Maintenance of Level	Matching Sources for EOG		
			B. Loans (continued)
No	No	8.	Full amount of State loan in which institution does not provide any funds.**
No	No	9.	Full amount of loan if institution provides guarantee funds to a State or private loan program.*
No	No	10.	Full amount of Guaranteed Loan Program in which the institution does not provide any funds.
No	No	11.	Full amount of loan contracted independent of institution.
No	Yes	12.	Cuban Student Loan Program.
No	Yes	13.	EOG funds transferred to NDSLP.
No	Yes	14.	Law Enforcement Education Program Loans
			C. Employment
Yes	Yes	1.	Institutional employment during periods of full-time study.
Yes	Yes	2.	Income from employment contracted by an institution with a private concern, with a provision that a given number of student jobs (not paid from College Work-Study funds) are in the contract, e.g., food service and window-washing.
Yes	No	3.	Institutional employment not during periods of full-time study.
No	No	4.	Employment not related to the institution.
Yes	Yes	5.	Institutional share of the College Work-Study Program.
No	Yes	6.	Full amount of income from the CWSP.
No	No	7.	Income from jobs financed by the Federal Government, e.g., research under a Federal grant.

Maintenance of Level	Matching Sources for EOG	
No -------	No ----------	8. Other student income.
		D. Other Sources
No -------	No ----------	1. Social Security benefits.
No -------	No ----------	2. Vocational Rehabilitation benefits.
No -------	No ----------	3. GI Bill benefits.
No -------	Yes ----------	4. Federal grants to Indians.***
No -------	No ----------	5. Student savings.
No -------	No ----------	6. War Orphan Benefits.
No -------	No ----------	7. ROTC and NROTC scholarships or payments.

* Only the institutional share may be used for maintenance of level. The full amount may be used for matching.

** If the institution performs primary administrative functions and exercises control over the determination of loan recipients, then the full amount of the State loan may be used as matching. State loan programs of this category, however, must have prior approval, from the Washington Office, on an idividual basis before being acceptable as matching aid.

*** If the institution performs primary administrative functions and exercises control over the determination of Indian grant recipients, then the amount of the grant may be used as matching.

60-433 O - 71 - pt. 1 -- 34

CHAPTER IV

RECRUITMENT ACTIVITY

401. Identification and Encouragement of Eligible Students for the Educational Opportunity Grants Program

Each institution participating in the Educational Opportunity Grants Program has agreed, as condition of participation, to develop plans for, and engage in, vigorous efforts to seek out qualified youths of exceptional financial need and encourage them to continue their education beyond the secondary level. Article I, Paragraph 8, of the Terms of Agreement sets forth two areas in which activity could be performed to demonstrate such "vigorous" efforts": (1) establishing or strengthening close working relationships with secondary school principals and guidance and counseling personnel, and (2) making conditional grant commitments, where feasible, to qualified students with special emphasis on students enrolled in grade 11 or below who show evidence of academic or creative promise.

Above and beyond this, an institution of higher education might well benefit by coordinating its activities with other institutions of higher education in encouraging promising students to complete secondary school and pursue post-secondary educational opportunities.

An active campaign to publicize and explain the grants program to those students already enrolled at the institution will also locate eligible grant applicants, particularly in that segment of the student population attending school part-time because of limited financial resources. It should be noted, however, that although EOG Program benefits are available to any undergraduate applicant who qualifies for this assistance, it is anticipated that initial year awards will be given primarily to incoming freshmen.

In many sections of the nation there are a number of activities such as the Educational Talent Search and Upward Bound Programs which are designed to identify and encourage students from disadvantaged families to continue their education.

The Financial Aid Officer, and his counterparts in the Admissions Office, should carefully consider students referred by these projects since they may well be eligible for an Educational Opportunity Grant. A directory of these projects may be obtained from:

Division of Student Special Services
Bureau of Higher Education
United States Office of Education
Washington, D.C. 20202

CHAPTER V

FISCAL MANAGEMENT

501. Payment to Institutions

Payment for the Educational Opportunity Grants Program will be made to participating institutions by the National Institutes of Health (NIH), which functions as a disbursing agent. Institutions designated by NIH to use either the letter of credit or the cash demand system may draw EOG funds against their grant letter amounts as these funds are needed for disbursement to students.

The check that is forwarded by NIH will often include disbursements for more than one Federal Program. An enclosure will accompany each check, and the EOG payment listed in the amount column will be preceded by an eight-digit code. The first two digits - 77 - are the EOG program code. The third and fourth digits identify the State, and the remaining four digits are the institution's identification number.

502. Maintenance of Educational Opportunity Grant Funds

Educational Opportunity Grant funds may be deposited in a merged bank account provided there are adequate accounting controls to insure the integrity of the account and to avoid drawing on the EOG balance to support any other activities. It is unlikely that an institution will have sufficient EOG funds on hand for a long enough time to merit placing them in an income-bearing account. Should this occur, however, the interest earned on these funds must be returned to the Office of Education at the end of the fiscal year. Checks should be made payable to the Office of Education and mailed to the following address:

Fiscal Services Section
Finance Branch
U.S. Office of Education
Washington, D.C. 20202

503. Disbursements to Students

The institution may advance grants by checks or by crediting a student's account or by a combination of both. The institution must have a signed acknowledgment from the student that he received the grant. An endorsed check will serve this purpose. For non-check advances, two sample forms are included as Attachments A and B of this chapter. Where accounts are credited, receipts should be issued with duplicate copies being retained as documentation.

Grants are to be made on the basis of an academic year which consists of two semesters, two trimesters, or three quarters falling within a school year of approximately nine months' duration. An exception would be when the remaining eligibility of an EOG recipient is less than a complete academic year. This policy does not preclude a grant being given the student who enters at midyear, but a grant for less than a full academic year would be for the pro rata amount based on a full academic year of eligibility. Payments of grants shall be made in equal installments at least once during each registration period.

Payments for students attending summer session (see Chapter I, Section 103) will be made by the institution from a single fiscal year appropriation, and not prorated out of two fiscal years' appropriations.

Payments shall not be made during any period in which the student is not in full-time attendance at the institution which awarded him the grant, nor during any period when he is otherwise ineligible to receive a grant.

504. Matching Requirement

In awarding an Educational Opportunity Grant an institution must provide an equal amount of financial assistance to the student. Eligible matching financial aid for an EOG is described in Chapter III. There is nothing in the Act which prohibits the institution from providing matching financial assistance in an amount grater than the amount of the Educational Opportunity Grant. The matching requirement, however, pertains to each individual grant, and the institution may not balance out its matching obligation by over-matching one student's grant and under-matching another's.

505. Maintenance of Level Requirement

P. L. 90-577, Title I, sec. 152, provides that "Agreement between the Commissioner and an institution shall provide assurance that the institution will continue to spend in its own scholarship and student-aid program,...not less than the average expenditure per year made for that purpose during the most recent period of three fiscal years preceeding the effective date of the agreement."

As explained in Section 176.12 of the Draft Regulations, an institution shall not be deemed to have failed to meet the maintenance of level requirement if its inability to expend the amount required thereunder is solely attributable to the withdrawal of funds for student aid programs from outside sources.

For further discussion of maintenance of level, see the "Agreement Covering Institutional Participation in Programs of Student Financial Aid" and the FY 1971 Application to Participate in Federal Student Financial Aid Programs.

506. Fiscal Records

All accounting records for EOG funds will need to be maintained in a form permitting report preparation on a July 1 - June 30 fiscal year basis. Transactions should be recorded promptly, and subsidiary records, including the individual student ledgers, should be reconciled with the control accounts quarterly, preferably more often.

When the institution provides part-time institutional employment as all or part of the required EOG matching amount, time and wage cards, signed by student and approved by his supervisor, will need to be kept on file to support the earnings which are used as matching. The gross wages (before Social Security, Income Tax, or other deductions) to the student are to be considered as eligible matching funds.

A written authorization from the institutional representative, EOG, to the fiscal officer, EOG, indicating which students are to receive grants and in what amounts, by dates, is a necessary part of the records to be retained by the fiscal officer.

All records pertaining to program management and fiscal control must be retained by the institution for a period of three years or until audited by the audit staff of the Department of Health, Education, and Welfare (or its designee), whichever is later.

The accounting records and procedures set forth herein may be adapted to the accounting procedures of the institution so long as the records for EOG funds are maintained in accordance with generally accepted accounting principles and provide the necessary information for preparation of financial reports and for proper management. The following General Ledger Control Accounts will be essential to the fully-operational EOG program.

507. Maintaining Individual Student Accounts

Proper maintenance of EOG funds will necessitate the use of a student ledger card (see Attachment C) for each student awarded an Educational Opportunity Grant. The minimum information required will be:

(1) The full name, home address, Social Security number, or other identification of the student. The identification will need to be such as to enable the auditors to correlate the records maintained by the financial aid office, the business office, and the registrar's or other offices maintaining academic records.

(2) A record of the student's estimated cost of attending the institution for each academic year for which he receives an EOG award. This record, together with the application for an EOG award, the determination of need, and the parental contribution, may be maintained by the financial aid office and does not need to be duplicated by the business office.

(3) A record, by academic year, of the institution's EOG fiscal transactions with the student which includes: (a) the amount of the EOG award, identified as to whether it is an initial year award or a first, second, or third year renewal; (b) a notation on the ledger of incoming transfer students as to number and amounts of grants the students had previously received; and (c) a list of disbursements of EOG funds to the student with student's acknowledgment of receipt. The records will need to lend themselves to both fiscal and calendar year reporting of payments of both the EOG and the matching amount, together with a clear indication of the source of the matching amount. Ledger entries will need to indicate the date and nature of the transaction, and to identify the supporting documents by check numbers, the account numbers to which credit entries are made, etc. The information could be recorded as indicated on Attachment C, Individual Student Ledger, or by such other auditable method as the institution may devise.

508. Federal Tax Effect on Student's Income from EOG

Section 117 of the Internal Revenue Code provides in part that, "In the case of an individual, gross income does not include (1) any amount received (A) as a scholarship at an educational institution..." While there are certain limitations on this exclusion, they are unlikely to disqualify the EOG recipient. Tax consequences of an Educational Opportunity Grant are the recipient's responsibility, and he should refer questions concerning his particular situation to his tax counsel or the Internal Revenue Service.

509. Administrative Expenses

It is now permissible for your institution to withdraw from the authorized allocation an amount not greater than three percent of the amount actually spent for EOG awards to students, as a payment in lieu of reimbursement for administrative expenses. Since there is no separate allocation for administrative expenses, institutions may draw funds from the initial or renewal allocation or both. The total amount withdrawn for administrative expenses for the Educational Opportunity Grants, National Defense Student Loan, and College Work-Study programs may not exceed $125,000 per institution in any fiscal year.

UNITED STATES GOVERNMENT

Memorandum

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
OFFICE OF EDUCATION

TO : Coordinators of Student Financial Aid
EOG Participating Institutions

DATE: October 17, 1969

FROM : Hubert S. Shaw
Chief, Educational Opportunity Grants Branch, SFA

SUBJECT : Eligibility of EOG Recipients and Other Matters

EOG ADMINISTRATIVE MEMORANDUM NO. 1-70

I. Introduction:

This memorandum refines and extends Administrative Memorandum 4-69, February 14, 1969, Sections III and IV and deletes use of the table in Section I for purposes of determining a student's amount of entitlement to an Educational Opportunity Grant. It is effective for the fiscal year beginning July 1, 1970.

Since the issuance of Memorandum 4-69, many questions have been raised by financial aid officers about the criteria for selecting EOG recipients and the need for a clear description of the potential EOG student. The program staff has engaged in a series of exchanges with financial aid officers, culminating in two meetings with officers of the National Council of Student Financial Aid Associations.

This memorandum reflects the ideas of this group and of other financial aid officers and presents criteria, both objective in terms of the family and its financial condition and subjective in describing the potential EOG recipient. Basic eligibility factors previously established are retained, with added flexibility for the financial aid officer in selecting recipients and determining grants. In arriving at these criteria, many variables were considered: rising costs of education, size of appropriations, cost of living and its effect on income levels and on funds for education, new Bureau of Labor Statistics family budget figures, numbers of dependent children and both parents working, to mention only a few items.

The purpose of the program and of these criteria is to assist the most needy students. Therefore, the thrust of our criteria is toward those students from the lowest income levels and with the least contribution toward educational costs. Evidence shows again that approximately 70% of initial year students nationally come from families with incomes under $6,000. Your application should reflect the intent to hold and conceivably increase this proportion of low-income recipients. One new criterion sets an income limit of $9,000, which defines more clearly the group of potential EOG recipients. All recipients must come under this ceiling, with continued emphasis on those under the $6,000 level. Panels will review the applications of institutions showing a percentage under $6,000 of less than 70%.

The second criterion continues to be a $625 limit on parental contribution. Determination of the amount of the grant, however, will be based on calculated need, rather than the stipend table (page 2, Memorandum 4-69) previously used. Since this might result in a student with a zero parental contribution and one with a $600 parental contribution each being considered for $1000 grants, the financial aid officer should, in such cases, ensure the lower contribution case be given priority. Also, an institution should not limit recruiting among students with parental contributions at the $500 - $600 levels, but should aim at the zero end of the scale. The principle of "inverse proportionality" - lowest contribution, highest grant - is still an important consideration in determining the amount of a grant. However, the student's grant should be at a level appropriate to permit him freedom of final choice of which institution he may attend insofar as possible.

There will be circumstances which will offset low parental contributions, such as unusually high student savings, exceptional summer earnings, or such student benefits as social security, vocational rehabilitation, V. A. benefits, etc., and which give reason for lower priority than applicants with higher parental contributions. In essence, the priority should be given to those students with the least family contribution, which would include the students' own resources. There may be other reasons that would cause the financial aid officer to give priority to students with special problems which are not accurately reflected in the need analysis per se. Your goal should be to aid your neediest students first and continue through the eligible group until your allocation is committed. In addition to the philosophy of helping the neediest first, there is the more practical matter that such an order of priority is necessary as long as funding does not meet the national demands for the program.

Priority for freshmen and new transfers (80% or more) in making initial year grants is still essential. We again urge that a student's grant be as near the maximum size (the lesser of $1000 or one-half of calculated need) as possible, recognizing the problem caused by limited funding and the desire to spread grants among as many students as possible.

II. Initial Year Selection Criteria:

Step 1 - Eliminate applicants from families with gross annual incomes over $9000 (for farmers and business "gross" is income after allowance for operating expenses deductible for tax purposes but before income taxes). Family income above this maximum cannot be considered "low", even though financial need may be clearly demonstrated. They are, therefore, beyond the scope and purpose of the EOG program, even though they may be eligible for other forms of aid.

Step 2 - Next eliminate those having an expected parental contribution, based upon an approved system of need analysis, of more than $625 per academic year. This is the same measure of eligibility employed in the past.

Step 3 - Evaluate remaining applicants on the basis of the following description of the type of student for whom the EOG program was intended:

The Intended EOG Recipient

Is:	Is Not:
1. One whose family has historically been unable to provide adequate financial support for typical consumer goods and services. Income is inadequate before, not solely as a result of the additional expense of college. Therefore, the family can contribute little or nothing to the student's education.	1. One whose family has encountered temporary financial loss or strain, preceded and/or followed by adequate resources to provide at least a moderate standard of living.
2. One whose family has been unable to accumulate assets which will provide any element of financial security to the family members. There is little or no cash or property to be used for college expenses or other discretionary purchases.	2. One whose family has been successful in obtaining some degree of financial security through cash or real estate assets to which it can turn for retirement, emergency, or specialized uses, such as education. Business holdings and inventory or farming assets, while used for income production, have such size as to give substantial financial visibility.
3. One whose family operates a business or farm which has small cash turnover to go along with low gross income.	3. One whose family operates a business or farm which has large cash turnover and resulting ability to incorporate family needs into expenses of operation.
4. One whose environment has not allowed concrete plans for higher education to be formed because of the lack of money, family encouragement, proper counseling or any of several other deterrents.	4. One whose post-secondary plans have been supported by the environment to the extent that college was a foregone conclusion.

Is:	Is Not:
5. One who is admissible to the appropriate curriculum according to standards established by the institution. There is evidence of academic or creative promise and the ability to complete the course of study. This evidence, however, may deviate somewhat from standard selection criteria. While greater adjustment may be necessary than required of the average student, there is good reason to believe that the potential EOG recipient will respond favorably, given the available supportive services.	5. One whose potential is incongruous with the demands of the desired curriculum or higher education in general. Completion of the course of study seems doubtful, even with the supportive services available to the student.
6. One whose enrollment in higher education is dependent upon sizeable amounts of financial assistance which could not be provided through the available non-EOG resources without unreasonable quotas of loan and part-time employment.	6. One whose college financing can be provided through family support and the typical scholarship, loan, and part-time employment programs available through the community, State, and institution of enrollment.

Step 4 - From those applicants who fall within the financial and descriptive criteria above, select EOG recipients by proceeding from the most needy to the least needy of the eligible group until funds are exhausted. It is no longer necessary to observe the stipend table on page 2 of Memorandum 4-69 in setting the size of the grant. The EOG award amount will be left to the judgment of the financial aid officer, except that stipend cannot exceed one-half of the student's need or $1000 per academic year, whichever is less. Section 201.05 of the EOG Manual provides guidance for those occasions when less than the maximum grant is thought to be desirable.

Step 5 - Provide the necessary "matching" funds as in past years. Refer to the EOG Manual and Administrative Memo 3-69 for acceptable forms of "matching" aid. It is hoped that each EOG recipient will receive an aid package which meets his financial aid.

III. Renewal Year Awards:

Students receiving grants prior to July 1, 1970, will continue to be eligible for renewal grants, provided the expected parental contribution remains $625 or less per academic year and good standing is maintained according to the academic standards of the institution. However, the $9000 income ceiling set in this Memorandum will not apply to such renewal grants. Although it will not be necessary to use the stipend table in determining the amount of the renewal award, it is strongly recommended that stipends approximate the amounts provided in previous years, all other considerations being equal. Presumably, a satisfactory aid package has been constructed and could be continued. Sizable increases in renewal year grants will reduce the funds available for initial year use and should be avoided where possible.

IV. New Sources of Eligible Matching Funds:

Scholarship and loan funds provided by the Bureau of Indian Affairs are now eligible for matching educational opportunity grants. By arrangement with Bureau of Indian Affairs scholarship program authorities, institutions will control the selection of students, determination of their need, and amount of BIA funds as part of a total financial aid award. Institutions should contact the Bureau of Indian Affairs Scholarship Program, 5301 Central Avenue, N.E., Albuquerque, New Mexico 87108, for advice concerning making awards involving BIA funds. This new source of matching funds should allow institutions to make greater use of educational opportunity grants in meeting the needs of American Indian students.

Also, institutions which become lenders under the Insured Loan Program, and utilize their own funds for making such loans, may use such funds as an additional eligible source for matching educational opportunity grants.

UNITED STATES GOVERNMENT

Memorandum

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
OFFICE OF EDUCATION

TO : Coordinators of Student Financial Aid
Chief Fiscal Officers
EOG Participating Institutions

DATE: April, 1970

FROM : Hubert S. Shaw *Hubert S. Shaw*
Chief, Educational Opportunity Grants Branch, SFA

SUBJECT : Instructions concerning Allocation for Fiscal Year [illegible]

EOG ADMINISTRATIVE MEMORANDUM NO. 2-70

Your institution's allocation of Educational Opportunity Grant funds for use during Fiscal Year 1971 (July 1, 1970 - June 30, 1971) is provided on the enclosed allocation letter. A copy of that letter has also been sent directly to the President of your institution. The total allocation has been determined by the Regional panel recommendations for initial and renewal funds and by the required State allotment formula for initial year funds, as modified by the total amount available nationwide.

I. Use of Funds:

We have continued the practice of providing a portion of your renewal requests as approved by the Regional panels in the form of initial year funds, a practice that has been successful in Fiscal Year 1970 in maximizing fund utilization. However, please keep in mind that the authorizing legislation requires that eligible renewal candidates receive priority in the use of funds. Therefore, if your renewal allocation is insufficient to meet the needs of renewal candidates, you should transfer from the initial year funds whatever amount is necessary to meet the needs of renewal recipients. The reverse transfer, from renewal to initial funds, is not permitted. The amounts granted to students must not exceed the amounts indicated on the allocation letter for initial and total allocation.

II. Guidelines in Making Awards:

EOG awards made during Fiscal Year 1971 are to follow the program guidelines provided by EOG Administrative Memorandum 4-69, as modified and extended by EOG Administrative Memorandum 1-70. Please review these two documents before making your awards. Some of the comments we have received concerning Memorandum 1-70 indicate that steps three and four are being overlooked in some quarters. These eligibility standards are no less important than steps one, two, and five, and in fact require a high degree of professional judgment and discretion. Contrary to the suggestion of some observers, the EOG program has not been "loosened up" by the replacement of the $6000 guideline family income figure by an absolute limit of $9000. Actually the reverse is true, since initial year grants no longer may be made to students whose family incomes exceed $9000. Since this income limit must be accompanied by a parental or independent student

60-433 O - 71 - pt. 1 -

contribution of $625 or less, the effect of steps one through four, if properly employed, will result in a greater utilization of EOG funds for truly disadvantaged students. Giving priority to students with the smallest parental contribution reduces the importance of categories by income level.

A brief summary of the income guidelines in Memorandum 1-70 (steps 1 and 2) is provided here for your convenience:

Initial Year Awards - All students receiving their initial year awards in Fiscal Year 1971 or later must meet the following two criteria:

a. They must come from families with gross annual incomes of $9000 or lower;
b. They must have an expected parental contribution or independent student contribution of $625, or less, per academic year.

All students receiving initial year awards under the above two criteria must continue to meet them in order to receive renewal awards in future years.

Renewal Year Awards - Students who received their first EOG awards prior to Fiscal Year 1971 will be eligible for a renewal year award in FY 1971 and later years so long as their expected parental or independent student contribution remains $625, or less, and they continue to meet all other eligibility requirements which governed their first grant.

III. Payments of EOG Funds to Institutions:

The allocation letter which you have just received constitutes an authorization to spend a certain amount of EOG funds. Payment to your institution, within the limit of the authorization, is made by our disbursing agent, the National Institutes of Health, under either the letter-of-credit or cash-demand system, whichever is designated for your institution's use by NIH. Please note that your institution must take the initiative in requesting funds from NIH. All questions pertaining solely to payment of EOG funds should be directed to Mr. James Bouvet, Financial Management Branch, National Institutes of Health, Room 548, Westwood Building, Bethesda, Maryland 20014, telephone: 301-496-7239. Please include the NIH vendor number printed on your allocation letter in any correspondence with NIH.

IV. Carryover of Funds Not Permitted:

Please note that the total authorization printed on the allocation letter is the maximum amount that your institution may spend for Educational Opportunity Grants during Fiscal Year 1971. EOG funds are awarded for use during one fiscal year only; any authorized amount not spent by the end of the fiscal year lapses.

V. Administrative Expenses:

It is permissible for your institution to withdraw from the authorized allocation an amount not greater than three percent of the amount actually spent for EOG awards to students in FY 1971, as a payment in lieu of reimbursement for administrative expenses. Since there is no separate allocation for administrative expenses, any amounts so withdrawn must be taken from the initial or renewal allocation or both. Remember that the total amount withdrawn for administrative expenses for the Educational Opportunity Grants, National Defense Student Loan, and College Work-Study programs may not exceed $125,000 per institution in any fiscal year.

VI. DSFA Terms of Agreement:

Institutions which are participating in the Division of Student Financial Aid's college-based programs for the first time in Fiscal Year 1971 must have on file a signed Terms of Agreement with the Commissioner of Education before any program funds may be spent. A form for the execution of this Agreement will be sent to new participants later in the spring.

The 1970 fiscal-operations report will contain a section providing for the extension of the Agreement for Fiscal Year 1971, to be signed by an authorized officer of all institutions which executed the combined Terms of Agreement in FY 1970.

VII. Possible Reallocation in January 1971:

In Fiscal Year 1970 it was possible to reallocate about $3,000,000 primarily in initial year funds. These funds were used to make initial year awards to students who did not receive EOG assistance originally because of insufficient funds.

We encourage you to maintain a record of students who are eligible for EOG assistance but for whom you are unable to provide grants from this allocation. During the late fall we may again investigate the need for supplemental funds and reallocation. CAUTION: Do not make commitments now based on the hope that supplemental funds will be forthcoming next January. Any supplements depend on the release of uncommitted funds from other participating institutions. As additional experience in estimating needs and recruiting exceptionally needy students is gained, institutions have reduced greatly the availability of supplemental funds by more effective use of their allocated funds.

VIII. Summary:

1. Meet renewal commitments first, transferring funds, if needed, from the initial year funds.

VIII. Summary: (Cont.)

2. Do not exceed the initial year authorization indicated on the enclosed allocation letter.

3. Do not exceed the total authorization indicated on the enclosed allocation letter.

4. Observe all selection criteria in Memorandum 1-70 for initial year awards.

5. Keep a record of those eligible students whom you are unable to assist because of insufficient funds.

10302 - SPECIAL ACADEMIC QUALIFICATIONS

The Act provides that in the selection of students to receive National Defense Student Loans, "special consideration" shall be given to students "with a superior academic background". This means that, when the total loan funds available at a given time are insufficient to assist all qualified applicants in the amounts needed, the applications of those who indicate high academic achievement must receive first consideration. Each institution has stated the policies and procedures which it will follow in administering the "special consideration" provision, and these policies and procedures have been made a part of the institution's Agreement with the Commissioner.

10303 - GENERAL ACADEMIC QUALIFICATIONS

In order to be eligible to receive a loan, a needy student applicant must meet two academic criteria specified in the Act.

a. He must be a student carrying at least one-half the full-time academic workload, as determined by the institution, on either the undergraduate or graduate level.

A "full-time academic workload" is measured in terms of the course work and other activities that the institution requires of its students.

A student who is gradually acquiring credits toward a degree by part-time study (less than half-time) in regular or evening sessions, and/or by full-time, half-time or part-time study in summer sessions only, may not be considered an eligible borrower. However, a loan may properly be made for the purpose of full-time or half-time study in a summer session, if the applicant was enrolled in the lending institution during the preceding regular term, or can show evidence of his intention to be so enrolled in the following regular term.

b. He must be capable, in the opinion of the institution, of maintaining good standing.

A student is in "good standing" when he is eligible to continue in attendance at the institution in which he is enrolled, in accordance with the institution's standards and practices. It is the responsibility of the Institutional Representative to become informed when a student borrower ceases to be in good standing and thereby becomes ineligible to receive further advances on his loan. Academic probation when a student is permitted to continue in attendance at the institution, is not necessarily to be considered evidence of a failure to maintain good standing as required by the Act.

10304 - REQUIREMENT OF FINANCIAL NEED

The primary and most essential condition of an applicant's eligibility for a National Defense Student Loan is that he is in need of the requested loan in order to pursue his course of study during the period for which the application is made.

a. Determination of Need

In determining need, the institution must evaluate the financial circumstances of both the applicant and his family. Such an evaluation should be repeated at least annually for as long as the student continues to borrow. The most effective method of securing the information necessary for this evaluation is through the application form which the student submits when requesting a loan. A recommended application form is included as Appendix 7 of this Manual, and institutions are free to use it in its entirety or to make appropriate adaptations of it. In many institutions complete data concerning the applicant's family and personal resources will already be available in applications previously submitted for scholarships or other financial assistance.

The student loan application form used by the institution must provide for at least the following basic financial data:

1. the contribution which may be expected from the student's family in the light of its income, assets, and financial responsibilities;

2. the amount of savings of the student himself;

3. the earnings which may be anticipated from the student's part-time and summer employment (including payment in kind, e.g., board and/or room);

4. other available funds from scholarships, non-Federal loans, etc.

Against the total of such resources available to the student, the following college-related expenses should be compared:

1. tuition and required fees;

2. the cost of room and board; or, for the commuting student, the cost of transportation to and from the institution, and lunches;

3. cost of books, instructional materials, and equipment;

4. other educationally related expenses.

b. Cases Requiring Special Treatment

In the typical case, the difference between the total estimated resources and the total estimated college-related expenses will indicate the approximate amount of assistance which the applicant needs to see him through the period under review. Experience indicates, however, that there will be a variety of worthy cases which differ from the norm and which will require special attention and treatment.

1. It is recognized that special circumstances may exist in which an applicant may be considered an "independent student" and that it would not be reasonable to expect any contribution from a student's parents or other members of the family no matter what their financial ability may be. In making such a determination, however, the basis for the determination must be carefully documented by the institution. As a minimum, the institution should seek to determine that:

(a) for the previous college year, the parents (or other persons in loco parentis) have provided no financial support to cover the student's cost of education;

(b) for such year, the applicant has not been claimed by his parents (or others) as a tax exemption for Federal Income Tax purposes; and

(c) the applicant is not or has not during the preceding twelve months resided with his parents (or others in loco parentis).

2. Some applicants are married and have children. In those cases the basic living expenses such as food and housing may be considered legitimate items for inclusion in the list of college-related expenses. In evaluating need in the case of a married student, the institution should also obtain information concerning the possible earnings or other income available from the spouse. Both husband and wife may be needy full-time students, each of whom may properly be considered as eligible to borrow.

3. It has been determined that an applicant who is a member of a religious community, society, or order and who receives support and maintenance from the community, society, or order and is pursuing a course of study required by the supporting group, does not meet the test of demonstrated financial need.

c. Purposes for Which Loan is Granted

A National Defense Student Loan application ordinarily should be approved only for such college-related expenses as have been listed in Subsection "a" above. It may not be granted to repay prior obligations, unless such repayment is clearly necessary to enable the student to remain in college. A National Defense Student Loan should not ordinarily be made in order to enable a borrower to pay installments on an automobile. The ownership of an automobile, however, should not necessarily disqualify an applicant for a loan if, for example, he requires it in his part-time employment (income from which is indicated in his application) or for commuting to and from the institution. On the other hand, the payment of a prior medical bill might be deemed a proper use of the loan. In any case, at the loan approval stage, applicants should be made fully aware of the purposes for which the loan is made and the expectation that the proceeds will be used only for such purposes.

Each institution has stated the policies and procedures which it will follow in determining "need", and these policies and procedures have been made a part of the institution's Agreement with the Commissioner.

10305 - STUDENT LOAN APPLICATION

Institutional announcements of the Loan Program should be made known annually to the student body and to prospective students, with sufficient notice being given as to any deadline for filing applications.

Applications may not be accepted for periods covering more than 1 academic year. Although its use is not mandatory, a recommended student application form has been prepared by the Office of Education and is included as appendix 7. As previously indicated, this form may be copied or adapted according to the needs of the particular institution. Whatever application form is used, it must contain a space in which the Institutional Representative shall indicate the reasons for granting or denying all or any part of the loan. Each loan application shall be signed by the appropriate institutional official. Copies of all student applications, approved and disapproved, should be filed at the institution.

APPENDIX 2

(b) Application for Federal Institutional Loan.

(1) Each application for a Federal institutional loan shall include a statement of supporting data on which there shall be provided such information as the Commissioner may require (including information relative to the terms and conditions under which such funds are available from non-Federal sources) in order to make the necessary determinations under section 207(a) of the Act.

(2) The amount requested in each application for a Federal institutional loan shall be reviewed and approved by the Commissioner in the light of the requirements of section 207(a) of the Act and the amount of the Federal capital contribution that has been reviewed and approved in accordance with paragraph (a)(3) of this section.

(c) Agreement for Federal Capital Contributions.

(1) The institutional application to participate in the National Defense Student Loan Program shall also include a proposed agreement, signed by an authorized representative of the applicant institution, which shall be submitted for consideration and concurrence by the Commissioner.

(2) No application for a Federal capital contribution or for a Federal institutional loan shall be approved unless there is in effect an agreement between the Commissioner and the applicant institution for Federal capital contributions pursuant to section 204 of the Act.

(3) The agreement shall provide for the following items: (a) establishment of a Student Loan Fund by the institution; (b) deposit in the Fund of (i) the Federal capital contributions, (ii) the institutional capital contributions, equal to not less than one-ninth of the Federal contributions, (iii) collections of principal and interest on student loans made from the Fund, (iv) charges collected pursuant to section 205(c) of the Act, and (v) other earnings of the Fund; (c) that the Fund be used only for (i) loans to students in accordance with the agreement, (ii) capital distributions as provided in section 206 of the Act, (iii) routine expenses incurred by the institution in administering the Fund, not exceeding the lesser of either one-half of the routine expenses as estimated for that year by the Commissioner or one per centum of the aggregate of the outstanding loans made from the fund as of the close of that year, and (iv) costs of litigation, and other collection costs agreed to by the Commissioner arising in connection with the collection of a loan, the interest thereon or a charge assessed with respect to the loan pursuant to section 205(c) of the Act; (d) that in the selection of students to receive loans from such student loan fund special consideration shall be given to students with a superior academic background; and (e) include such other provisions as may be necessary to protect the financial interest of the United States and promote the purpose of this Part and as are agreed to by the Commissioner and the institution.

Sec. 144.5 Federal Institutional Loan Agreements.

Federal Institutional Loans shall be made subject to the terms of a note which shall be executed by an official who is duly authorized to execute such notes on behalf of the borrowing institution. Such loans shall be used only for institutional capital contributions to the borrower's National Defense Student Loan Fund. Each such note shall include such terms with respect to the payment of interest and repayment of capital as are not inconsistent with section 207(a) of the Act and shall include such other terms which the Commissioner finds necessary to protect the financial interest of the United States and to promote the purposes of the Act.

Sec. 144.6 Allocation and Payment of Federal Capital Contributions and Federal Institutional Loans.

(a) Allocation of Federal Capital Contributions to Institutions.

(1) Federal capital contributions will be offered to institutions within a State in relation to the amount of the requests for Federal capital contributions that have been reviewed and approved in accordance with section 144.4(a)(3). In the event that the total of such requested amounts in all the applications for the Federal capital contributions from a State exceeds that State's current allotment therefor, the amount of the Federal capital contribution that can be made available to

any applicant institution from that allotment shall bear the same ratio to such requested amount as the amount of the State's allotment bears to the total of such requested amounts within the State.

(2) In the event that an institution which has applied for a Federal institutional loan is unable to secure the necessary amount of loan funds from the Commissioner or otherwise to secure such funds as may be required in order to make the necessary institutional capital contribution, the amount of the Federal capital contribution which could have been offered to such institution pursuant to subparagraph (1) of this paragraph shall be reduced to an amount equal to not more than nine times the amount of such institutional capital contribution as the institution is able to make to the Fund.

(3) If an institution fails to accept all of the Federal capital contributions that have been offered to it, the amount represented by, such unaccepted offer shall be restored as part of the State's allotment.

(4) When funds that have been restored as a part of a State's allotment are sufficient to increase significantly the amount of the Federal capital contribution that can be made available to other institutions within the State, they shall be offered to such institutions whose requests for Federal capital contributions were reduced pursuant to subparagraph (1) and (2) of this paragraph.

(b) Allocation of Federal Institutional Loans.

(1) Federal institutional loans shall be made by the Commissioner upon the basis of his review of the data that are provided to him in the application for a Federal institutional loan.

(2) In the event that the funds available for the purpose of making Federal institutional loans are insufficient to satisfy the requests to which institutions would otherwise be entitled in accordance with section 144.4(b)(2), the Commissioner shall allocate such available funds among all of such requests therefor in the same ratio as the amount of each such request bears to the sums of the amounts of all such requests.

(3) If an institution fails to accept all of the funds that would otherwise be loaned to it, the Commissioner shall reallocate such unaccepted funds to other institutions if the amount of such funds is sufficient to increase significantly the size of the loans to such other institutions.

(c) Payments of Federal Capital Contributions and Institutional Loans.

Payment of the Federal capital contributions and institutional loans shall be made in such amounts and at such times as the Commissioner shall designate.

Sec. 144.7 Eligibility and Selection of Loan Recipients.

(a) Eligibility — In General. Loans shall be made only to a student who (1) is a national of the United States or is in the United States for other than a temporary purpose and intends to become a permanent resident thereof; (2) is in need of the amount of the loan to pursue a course of study on at least a half-time basis as a graduate, professional, or undergraduate student at the institution; (3) is capable, in the opinion of the institution, of maintaining good standing in such course of study; and (4) has been accepted for enrollment as at least a half-time student at such institution or, in the case of a student already attending such institution, is in good standing and is enrolled on at least a half-time basis at such institution.

(b) Determination of Need. In determining a student's need for a loan from the Fund, the institution shall where appropriate take into consideration (1) the income, assets, and resources of the applicant, (2) the income, assets, and resources of the applicant's family, and (3) the cost reasonably necessary for the student's attendance at the institution, including any special needs and obligations which directly affect the student's financial ability to attend such institution. All determination of need shall be made in accordance with the policies and procedures established by the institution and made a part of the agreement for Federal capital contributions.

(c) Limitations Governing Maximum Amount of Loans. In accordance with section 205(a) of the Act (1) the loans advanced from any Fund or Funds

CHAPTER IV DOCUMENTATION AND DETERMINATION OF THE COLLEGE WORK-STUDY AWARD

401 Documentation of Student Need

A determination of a student's financial need must be made before he can be placed in a College Work-Study position. It is the responsibility of the financial aid officer to calculate the amount of each student's need. He should utilize a systematic need analysis procedure in order to treat all applicants as fairly as possible. Once need is determined, financial assistance may be made available to the student in the form of a College Work-Study award, usually combined with other forms of financial aid.

Although there are certain standards to be considered in calculating a student's need, the financial aid officer must, of necessity, use his own judgment in applying these standards to specific cases. Whatever need analysis system is adopted, each student's need for assistance must be clearly demonstrable as indicated in the College Work-Study Regulations.

A. The Student's Application

It is important that the data required for determination of a student's eligibility and financial need be gathered in a uniform manner from each applicant for employment under the College Work-Study Program. The required data includes:

1. the student's budget, including both his expenses and his available resources (see Exhibit 4.1, Section 404), and

2. other eligibility data, including the applicant's citizenship status and his full-time student status. (See Section 302.)

To facilitate collection of this data, the institution may choose to adopt an application form or forms containing space for entry of the above data. Completed applications, whether approved or disapproved, should be kept on file for three years or until audited, whichever is later. Appendix 6 illustrates the type of information normally requested in a student application form.

B. Parents' Financial Statement

A parents' financial statement must be filed as part of the application procedure, unless the student can demonstrate that he is an independent student, as discussed below. The institution may use a standard form such as the Parents' Confidential Statement of the

4-1 } hold thereout

College Scholarship Service or the Family Financial Statement of the American College Testing Program. Whatever form is utilized for this purpose, however, the institution must ensure that the following information is included:

1. the parents' gross annual income,
2. net assets of the parents,
3. any other resources of the parents,
4. the number of dependent children in the family (including the applicant), and
5. the expenses currently payable by the parents.

C. Independent Students

In some instances, institutions have found that it is appropriate to exclude parental income as a source of support. The most common situation is that of the older or married student, who is and has been independent of parental support.

When, in the judgment of the financial aid officer, the facts surrounding a given application warrant exempting parental income and/or assets as a source of support, the institution may disregard the income of parents or other persons in loco parentis provided that (1) for the previous year, the parents (or other persons in loco parentis) provided no financial support to the student (see Sections 402 and 407); and (2) for the previous calendar year, the applicant was not claimed by his parents as a tax exemption for Federal income tax purposes. The financial aid officer is expected to satisfy himself that the foregoing conditions have been met, and to require such evidence as he deems necessary to support and document his findings.

It is important to note that the fact that a student is enrolled at the graduate level does not, in and of itself, classify him as an independent student. Unless the institution has classified the graduate or professional student as independent based upon the above criteria, the resources of the student's parents must be taken into consideration when determining the student's financial need.

D. Notation of Action by Institution

The following notations should also be made either on the student application form or elsewhere in the student's financial aid file:

1. entry of the amount of the College Work-Study award, if approved;

2. a brief statement of the reason for disapproval, if the award is not approved; and

3. signature of the financial aid officer.

The data mentioned in this section must be updated and reviewed at least once every 12 months.

402 Student Expenses

The student budget, like any other budget, shows the balance between expenses and available resources. This section is concerned with the expenses incurred by the student; the following section deals with his available resources.

The first step to be taken by the financial aid officer when calculating individual financial need is to establish as precisely as possible the educational costs to be incurred by the student during the academic year concerned.

A. Usual Kinds of Expenses

1. Tuition.

2. Fees payable to the institution.

3. Books, supplies, instruments, etc.

4. Housing: Residence hall costs, apartment rent, room rent.

5. Board or subsistence.

6. Personal expenses (such as a minimum basic wardrobe, where necessary, laundry, cleaning, grooming, attendance at social and cultural events, etc.).

7. Travel costs.

8. Student health insurance.

B. Other Expenses

Some students may have other expenses related to their attendance at the institution. In making allowances for any unusual expenses borne by the student, the financial aid officer must exercise considerable discretion. Whatever allowances are made, each item of expense must be clearly set forth in the record.

1. Dependents. A student may have persons dependent upon him for financial support. In the case of a married student, his spouse may either be dependent, or be a source of income. There may be children dependent upon the student for support. There are also cases in which the student may feel that he will have to drop out of school unless he may make a contribution toward the support of parents who are either aged, indigent, or in poor health or other family members who need his help. In all such cases, an allowance may be justified but should be clearly recorded with a specific statement on or attached to the student application.

2. Unusual Expenses. In some cases, a student may have necessary expenses which are not common to most students, such as unreimbursed medical costs due to an operation, allergy, or other chronic condition. Allowances in these cases may also be justified, but again must be clearly recorded.

3. Unforeseen Expenses. Since no system of need analysis can do more than closely approximate an individual student's need for financial assistance at a given point in time, the financial aid officer may wish to include a small extra amount to permit the student to meet unexpected educational costs (such as additional required textbooks, field trips, etc.) which may arise. When this procedure is followed, the student should be advised that, under ordinary circumstances, his financial need will not be reassessed for such reasons.

403 Student Resources

After identifying the applicant's educational expenses, the financial aid officer should determine what resources are currently available to the student to assist him in meeting these expenses. This information should be in the student's application and the parents' financial statement. The difference between the student's total educational expenses for the year and the financial resources currently available to him will indicate his need for assistance and will serve as a guide for the proper placement of the student in a job. Of course, the award must not exceed the student's actual need.

The financial resources available to students applying for assistance under the College Work-Study Program are contributions from parents and the student's other resources.

A. Contribution from Parents

Since it is accepted that parents have the primary responsibility for providing for the education of their children, parental contributions will usually form a portion of the student's resources. The amount which a given student's parents may reasonably be expected to contribute toward his educational costs will vary in size according to their income, assets, and the number of dependent children in the family. Determination of the parental contribution is central to the analysis of an individual student's need. The four need analysis systems most commonly used are

1. Federal Income Tax System.

2. Income System.

3. College Scholarship Service System.

4. American College Testing Program System.

For a complete description of the first two methods listed above, the institution should obtain a copy of the booklet, Determining Awards under Federal Student Aid Programs, from the appropriate Office of Education Regional Office. Information concerning the College Scholarship Service system may be obtained by writing to the College Scholarship Service, Box 176, Princeton, New Jersey 08540; Box 188, Evanston, Illinois 60201; or Box 1025, Berkeley, California 94701. For more information concerning the American College Testing Program System, write to American College Testing Program, Financial Aid Services, P.O. Box 767, Iowa City, Iowa 52240.

The institution may use any of these need analysis systems or it may develop its own method, provided each individual need computation is appropriately documented. If the institution chooses to develop its own need analysis system, there are two basic categories that must be considered in computing the parental contribution.

1. Contributions from Income. It is assumed that a student's parents should contribute a reasonable portion of their annual income toward the cost of his education. Therefore, the financial aid officer analyzes the resources currently available to the student by establishing the parents' current gross income (including the value of any noncash receipts). This gross income is then reduced by major unavoidable expenses incurred by the parents. The resulting net income, if any, is deemed to be available to meet important expenses such as the student's educational costs.

   It should be noted that while it is permissible to make allowances against income for all reasonable expenses indicated by the parents, care must be taken to distinguish between allowable and nonallowable types of expense. Some of the valid types of allowances against income are

   (a) unreimbursed medical and dental expenses (including the cost of the parents' health insurance premiums),

   (b) cost to parents of educating other children,

   (c) housekeeping expenses incurred by working parents,

   (d) cost to parents of maintaining dependents other than children,

   (e) business expenses,

   (f) income taxes paid currently, and

   (g) other expenses of an emergency nature.

   Expenses which are more or less discretionary in nature (such as vacation travel, major home improvements, or the purchase of a second automobile or "luxury" appliance) should not be treated as allowances against income, since they are clearly the product of a choice exercised by the parents. In other words, the institution should not assist in producing an artificially high standard of living for a family.

561

2. Contribution from Assets. Each of the four systems of need analysis listed above provides a formula for determining what portion, if any, of their unencumbered net assets it is reasonable to expect the parents to contribute toward the student's expenses for the academic year concerned. If the financial aid officer adopts a system other than one of these four, he should generally assume that at least one percent of the net cash value of parental assets in excess of $10,000 should be contributed each year toward the student's educational costs.

B. Contribution from the Student's Own Resources

In calculating the student's own resources, the financial aid officer should be aware that the resources available to a married or independent student may be different from those available to a single student living at home. Again, in such cases, the financial aid officer must exercise considerable discretion.

The student's own resources may consist of

1. Savings accumulated prior to attendance at the institution, derived from gifts, odd jobs, etc. It is reasonable to expect that the student will contribute a portion of such previously accumulated assets during each academic year in which he may be expected to be in attendance at the institution.

2. Net earnings from employment during the summer previous to the academic year concerned. The student may reasonably be expected to contribute the entire net amount of such earnings (after taxes and reasonable living expenses) toward his educational costs. (See Section 407 for a discussion of the appropriate treatment of summer earnings under the College Work-Study Program.)

3. Earnings from part-time employment during the school year (other than provided under the College Work-Study Program).

4. (Married Students) The income and other resources of his spouse.

5. (Where Applicable) Veterans' benefits, Social Security benefits, Vocational Rehabilitation grants, or other forms of assistance which may be available through Federal, State, or local government agencies.

6. Other forms of student financial aid which may already have been awarded to the student for a given academic year.

7. Other (estates, gifts, etc.).

60-433 O - 71 - pt. 1 -- 36

404 Determination of Need

Once the student's expenses and the financial resources available to him have been determined, it is possible to calculate his need for assistance by subtracting the total resources available from his total expenses. This need may be satisfied by a College Work-Study award alone or in combination with other forms of financial aid.

The following example illustrates the procedure by which the amount of need and the College Work-Study award are determined:

Exhibit 4.1
Determination of Student A's Need
for Assistance, Academic Year 19__ - 19__

Expenses		Resources	
Tuition	$ 850	Parents' Contribution	$ 500
Room and Board	800	Portion of Student's Previous Savings	100
Books and Supplies	150	Savings from Summer Work	300
Personal Expenses	400	Civic Club Scholarship	200
Travel Expenses	50	TOTAL	$1,100
Other Expenses	100		
TOTAL	$2,350		

* * * * * * * * * *

Expenses minus Resources = NEED: $2,350 - $1,100 = $1,250

Student Financial Aid Provided = $1,250
CWS - $600; EOG - $300; NDSL - $200;
Other (institutional scholarship) - $150

In the above example, the student's need is satisfied by a financial aid package. In each case, the financial aid officer must decide what portion of the student's need would best be filled by a College Work-Study award and what portion, if any, should be satisfied by other forms of financial aid, such as an Educational Opportunity Grant, a National Defense Student Loan, institutional scholarship, loans, or grants, etc.

563

405 Amount of Need in Relation to Gross Earnings

The maximum amount, net of taxes, which a student may be permitted to earn under the College Work-Study Program is the difference between his calculated financial need and the other financial aids made available to him.

In order to assure that a student's net earnings (i.e., after taxes) are sufficient to meet his needs, the financial aid officer may place the student in a job yielding potential gross earnings of a slightly larger amount. The amount of such excess earnings should be based on the approximate amount of taxes the student will be required to pay on his earnings under the program.

For purposes of computing the actual amount of taxes to be withheld from the earnings of students, the financial aid officer should consult Internal Revenue Service Circular E - Employer's Tax Guide, copies of which are available from the local office of the District Director of the Internal Revenue Service.

406 Classification of Positions in Terms of Approximate Gross Earnings

As discussed in Section 502, the potential amount of earnings possible in a given job is a function of three factors: (1) the hourly wage rate assigned to the job, (2) the number of hours per week of employment possible under the job, and (3) the number of weeks the job is expected to last. Before assigning any student to a given job under the program, the institution must establish the relationship between the amount of the student's need and the potential maximum net earnings in the job. These two items should be as nearly equal as it is possible to make them.

If a student earns the maximum amount to which he is entitled before the completion of his job assignment, for example before the end of a semester, and is suddenly removed from a College Work-Study position, the action is distressing both to the student and to the employer or supervisor concerned.

To facilitate the placement of a student in a position yielding net earnings which are suitable in relation to his calculated College Work-Study award, it might be useful for the financial aid officer to classify, in advance, all job openings available under the program (both during the academic year and during the summer) in terms of the approximate gross earnings applicable to each job. The following is an illustration of this procedure:

Exhibit 4.2

Classification of Jobs in Terms of Approximate Gross Earnings

Job X = Laboratory Assistant
$1.80 per hour
14 hours per week (average) (Average may not exceed 15 hours per week)
30 weeks during the academic year

Approximate Gross Earnings (Job X= $1.80 x 14 x 30 = $756)

407 Summer College Work-Study Awards

As discussed in Sections 303 and 510, a student may be found eligible for 40-hour per week employment under the College Work-Study Program during his summer vacation. The sole purpose of such employment under the program is to enable the student to meet his educational expenses. Summer employment which does not further this purpose is not permissible under the program.

A. Summer Living Costs

It is recognized that students working under the College Work-Study Program during vacations have certain expenses which they must pay from their earnings. However, the amount of such expenses must be kept to a minimum, since they are not directly related to the educational budget. The student financial aid officer who assigns a student to a summer job under the College Work-Study Program must inform the student of the maximum amount of allowable expenditures from his earnings under the program. All the remainder (net of taxes) is the student's summer saving expectation. For students living at home, the summer savings expectation should typically represent at least 80 percent of net earnings; for students living away from home, at least 60 percent. The higher the wage rate at which the student will be paid, the higher this percentage should be, since it may be assumed that a student's living expenses will be the same regardless of the wage rate at which he is paid.

The following items of cost are considered permissible:

1. When the student lives at home, as would normally be expected, expenses for room and board should be absolutely minimal; minor personal items, laundry and cleaning, carfare, lunches, and a reasonable amount for leisure activities are allowable.

2. When the student lives away from home, which should happen only in unusual circumstances, he may have to pay for room and board in addition to other expenses.

B. Travel

Each student's budget normally includes funds for two round trips per year between home and institution. No additional travel allowance above this amount should be incorporated into any student's budget in order to assign him to a summer job under the College Work-Study Program. Reasonable daily commutation cost is allowable.

C. Use of Summer Earnings to Purchase Clothing

A student sometimes uses a substantial portion of his summer earnings to purchase clothing. The student financial aid officer may allow for this by shifting all or a part of the allowance for clothing expenditures during the academic year over to the student's summer budget. The student should be made aware that this adjustment is being made. Clothing purchases in excess of the amount of the clothing allowance must come from some other part of the budget, such as the student's personal allowance. Both the

amount of the student's clothing purchases and the amount of his cash savings may be considered part of his savings from summer employment if this procedure is adopted by the college.

D. Cooperative Education Programs

The full-time work period of an organized cooperative education program, for purposes of the College Work-Study Program, is to be treated exactly the same as a summer vacation period. All of the guidelines spelled out above are applicable.

E. Audit of Summer Awards

When an institution's College Work-Study Program is audited, its adherence to the guidelines discussed above will be reviewed. When the financial aid officer has established a contribution from summer earnings lower than would normally be expected, the reasons for this should be made a specific part of the student's financial aid records.

D. Calculation of Summer College Work-Study Awards

If the student, after consultation with the financial aid officer, is awarded a College Work-Study position during the summer or other vacation period, as the source from which he will provide his expected summer earnings contribution, he should be placed in a job yielding net earnings (after taxes and living expenses) approximately equal to his expected contribution. As in the case with all College Work-Study awards, the summer award must be accurately documented.

To illustrate this process, assume that Student A, whose budget for the academic year appears in Exhibit 4.1, is single and claims one tax exemption. He plans to live at home during the summer and wishes to earn enough so that he can contribute $350 of his summer earnings and underwrite the following summer living expenses:

Personal Expenses	- $175
Carfare and Lunches	- 75
	$250

In this example, he should be given a summer job under the program in which net earnings of $600 ($350 + 250) are possible. Since approximately 14 percent of his gross earnings will be withheld for income taxes, he should be assigned to a position yielding approximate gross earnings of $700 in order to realize net earnings of $600.

[From the Federal Register, Vol. 34, No. 91—Tuesday, May 13, 1969]

RULES AND REGULATIONS

§ 175.5 Eligibility and selection of student participants.

(a) *Eligibility.* A student is eligible for part-time employment under the Work-Study Program only during periods in which he meets all of the following conditions:

(1) Is a national of the United States, or is in the United States for other than a temporary purpose and intends to become a permanent resident thereof, or become a permanent resident of the Trust Territory of the Pacific Islands;

(2) Is in need of the earnings from such employment in order to pursue a course of study at the institution;

(3) Is capable, in the opinion of the institution, of maintaining good standing in such course of study while employed under this program; and

(4) Has been accepted for enrollment as a full-time student at the institution or, in the case of a student already enrolled in and attending the institution, is in good standing and in full-time attendance there, either as an undergraduate, graduate or professional student.

(b) *Eligibility of students attending area vocational schools.* A student enrolled in an area vocational school is eligible for employment under the College Work-Study Program only if he meets the following conditions in addition to the provisions described in paragraph (a) of this section:

(1) Has a certificate of graduation from a school providing secondary education or the recognized equivalent of such a certificate, and

(2) Is pursuing a program of education or training which requires at least 6 months to complete and is designed to prepare the student for gainful employment in a recognized occupation.

(c) *Determination of need.* In determining whether, and to what extent, a resident is in need of the earnings from employment, the institution shall, at least annually, (1) determine what income, assets, and other resources (including other forms of aid) are available to the student for the time period under consideration; (2) calculate according to standards published from time to time by the Commissioner what portion of the income, assets, and resources of the student's family may reasonably be expected to be made available to the student; and (3) determine the cost reasonably necessary for the student's attendance at the institution, including any special needs and obligations which directly affect the student's financial ability to attend the institution on a full-time basis. A student shall be considered to be in need to the extent that such costs of attendance exceed the sum of the amounts determined to be available to the student and the amounts, if any, which may reasonably be expected to be made available to him by his family.

(d) *Selection of students.* In the selection of students for employment under the Work-Study Program, an institution shall give preference to students from low-income families.

(e) *Availability of student employment.* Each institution shall make employment under the Work-Study Program, or equivalent employment offered or arranged for by the institution, reasonably available (to the extent of available funds) to all eligible students in the institution in need thereof.

(f) *Record of approval or disapproval.* Each institution shall maintain records which reflect the approval or disapproval of all or part of each student's application for employment under the program and which identify the institutional officer who made each such determination.

§ 175.6 Limitations on the number of hours of employment.

(a) During periods of regular enrollment, when classes in which a student is enrolled are in session, he shall be limited to working no more than an average of 15 hours per week under the program, averaged over the semester or other time period on the basis of which the institution in which he is enrolled awards academic credits. Work performed during any week when the student is on vacation shall not exceed 40 hours and shall not be counted as contributing toward the average of 15 hours per week established in the preceding sentence.

(b) During periods of nonregular enrollment, when classes in which a student is enrolled are in session he may be employed under the program for as many as 40 hours per week or such lesser number of hours per week as the institution may determine in accordance with its own standards and practices and con-

sidering (1) the extent of the student's financial need and (2) the harm or potential harm of a particular combination of hours of work and hours of study on a given student's health or academic progress.

(c) During periods not covered under paragraphs (a) and (b) of this section, a student may work up to 40 hours per week under the program.

§ 175.7 Use of funds.

(a) Federal funds made available on the basis of an approved application submitted pursuant to this part may be used only (1) to pay the Federal share of compensation to eligible students employed in eligible Work-Study Programs, and (2) to meet administrative expenses, as defined in § 175.2(b). The amount for such administrative expenses may not exceed 5 percent of that portion of the Federal payments used for compensation of students in work for public or private nonprofit organizations other than the institution itself.

(b) Interest, if any, earned on Federal funds shall be remitted to the Commissioner in accordance with instructions issued by him.

§ 175.8 Limitations on Federal share of student compensation.

(a) The Federal share of the compensation of students employed in any Work-Study Program under an institutional agreement shall not exceed 80 percent of such compensation for part-time employment, except that in unusual cases a Federal share in excess of 80 percent may be approved by the Commissioner, but only and to the extent that he determines, pursuant to such objective criteria as may be established in regulations, that a Federal share in excess of 80 percent is required to achieve the purposes of this part.

(b) The Federal share of compensation for part-time employment shall be calculated on the basis of the hourly rate paid the student for actual time on the job but such calculation shall not include any compensation paid which is in excess of such maximum hourly wage rate as may from time to time be set by the Commissioner, or any costs of the employer's contribution to Social Security, workmen's compensation, retirement, or any other welfare or insurance programs which may be paid by the employer on account of a student employed under the Work-Study Program.

§ 175.9 Minimum wage rate.

The minimum rate of compensation for a student employed under the Work-Study Program shall be

(a) $1.15 an hour for work performed through January 31, 1969;

(b) $1.30 an hour for work performed from February 1, 1969, through January 31, 1970;

(c) $1.45 an hour for work performed from February 1, 1970, through January 31, 1971; and

(d) $1.60 an hour for work performed thereafter;

(e) Or such higher minimum wage as may be required under any applicable Federal, State, or local legislation; except that the Commissioner may approve a lower rate of compensation in cases (1) where a lower minimum wage for such employees has beeen established by the Secretary of Labor, under the provisions of the Fair Labor Standards Act, or (2) where exceptional circumstances warrant a lower rate and where the approval of a lower rate is not precluded by law and is consistent with and promotive of the purposes of this part.

§ 175.10 Nature and source of instiutional share of student compensation.

(a) An institution may use any source available to it pay its share of the compensation paid to students employed under the Work-Study Program.

(b) No institution shall solicit or permit any public or private nonprofit organization with which it has an arrangement pursuant to § 175.4(c) to solicit from a student or any other person any fee, commission, or compensation of any kind, or the granting of a gift or gratuity of any kind, as a consideration or a prerequisite for the employment of any particular student under the program.

§ 175.11 Maintenance of level of expenditures.

In each fiscal year during which the institutional agreement remains in effect, the Institution shall expend (from sources other than payments of Federal grants under this part) for the employment of its students (whether or not in employment eligible for assistance under this part) an amount that is not less than the institution's average annual expenditures for such employment during the three fiscal years preceding the fiscal year for which the institutional agreement is in effect.

§ 175.12 Coordination of student financial aid programs.

In order to carry out the purpose of the Work-Study Program, the institution shall provide for the coordination of this program with other programs of student financial aid, including the National Defense Student Loan and Educational Opportunity Grants Programs where the institution also participates in such programs. Responsibility for the general conduct of the operation of the Work-Study Program shall be assigned to an institutional official who has other student financial aid responsibility.

§ 175.13 Institutional agreement and application for funds.

(a) Applications for Federal funds under this part shall be approved only if there is in effect an institutional agreement. Such agreement shall be executed by an official of the institution who is legally authorized to commit the institution.

(b) Applications for Federal funds must be submitted to the Commissioner by an authorized official of the institution in such form and at such time as the Commissioner may prescribe.

§ 175.14 Criteria for approval of institutional applications.

In order to achieve equitable distribution of assistance as required by section 446 of the Act, institutional applications for the allocation of funds under this program shall be reviewed and approved, in whole or in part, on the basis of, but not limited, to the following criteria:

(a) Whether the institution employs under the program a large proportion of students from low-income families in relation to the total number of needy students employed under the program;

(b) Whether provision has been made for effective administration of the program, including effective coordination with institutional and other Federal programs of student financial aid;

(c) Whether public and private nonprofit organizations, especially those engaged in health, education, welfare, and related public service activities have been included;

(d) Whether the institution has demonstrated a strong commitment to enroll students from low-income famililes, as evidenced by (1) specialized recruitment and admission, such as that provided through the programs of Talent Search or Upward Bound, (2) remedial instruction, (3) specialized counseling, and (4) any other relevant factors;

(e) The anticipated number of students to be employed under this program as compared to the institution's anticipated enrollment;

(f) The anticipated average compensation of Work-Study students in relation to the institution's average educational costs;

(g) The institution's utilization of Work-Study Program funds, if any, allocated in previous years; and

(h) The institution's total request for Federal student financial aid funds (including Educational Opportunity Grants and National Defense Student Loans) in relation to the average cost of education at the institution and the institution's anticipated enrollment.

§ 175.15 Payment and reallocation of grant funds.

(a) *Payment of funds.* Funds will be made available in advance on the basis of substantiated need and periodic fiscal reports submitted by the institution.

(b) *Reallocation of unused Federal funds.* Any funds which are available to an institution but not used, or which the institution agrees will not be used, by the end of the period for which such funds were made available shall, in the discretion of the Commissioner, either remain available for use by the institution during a subsequent grant period or be made available for use by other eligible institutions.

(c) *No waiver.* Neither approval of any application nor any payment of funds to an institution shall be deemed to waive the right or duty of the Commissioner to withhold funds by reason of failure of the institution to observe, before or after such administrative action, any Federal requirement.

§ 175.16 Fiscal procedures, records, and reports.

(a) *Fiscal procedures.* (1) The institution shall administer the Work-Study Program in such a manner as to provide for an adequate system of internal controls. Wherever practical, the various administrative responsibilities shall be divided so as to prevent the handling of all aspects of the program by a single individual.

(2) If a fiscal agent is utilized by the institution, its function must be limited solely to the performance of ministerial acts. The responsibilities of the institution to make determinations relations the eligibility of students for employment under the program cannot be delegated.

(3) Payments to students shall be made at least once a month. The institution is responsible for ensuring that students are paid the full amount of wages earned under the program, whether the work is for the institution itself or for a public or private nonprofit organization.

(b) *Records.* The institution shall maintain, on a current basis, adequate records which reflect all transactions with respect to the program, and shall establish and maintain such general ledger control accounts and related subsidiary accounts as are prescribed by the Commissioner. Such records shall:

(1) Meet at least the minimum standards prescribed by the Commissioner as set forth in the most recent official College Work-Study Manual and other official guidelines that may be issued from time to time;

(2) Be maintained in such a manner as to separately identify all program transactions from other institutional funds and activities; and

(3) Be maintained in such a manner as to be readily auditable. All records pertaining to activity during a given fiscal year, including applications of students for employment under the Work-Study Program during that fiscal year, shall be retained for a period of 5 years following the end of the fiscal year and until audited by a representative of the Commissioner, whichever is earlier. Records involved in any claim or expenditure questioned by the Commissioner, or on audit, shall be retained until necessary adjustments have been reviewed and approved by the Commissioner.

(c) *Reports.* Institutions shall submit such reports and information as the Commissioner may reasonably require in connection with the administration of the Work-Study Program and shall comply with such procedures as he may find necessary to ensure the correctness and verification of such reports.

§ 175.17 Preceding provisions not exhaustive of jurisdiction of the Commissioner.

No provision of this part now or hereafter promulgated shall be deemed exhaustive of the jurisdiction of the Commissioner under the Act. The provisions of this part may be modified or further regulations may be issued hereafter as circumstances may warrant.

Dated: April 10, 1969.

PETER P. MUIRHEAD,
U.S. Commissioner of Education

Approved: May 7, 1969.
ROBERT H. FINCH,
Secretary of Health, Education, and Welfare.

[FR Doc.69-5667; Filed, May12,1969;8:45 a.m.]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
OFFICE OF EDUCATION
BUREAU OF HIGHER EDUCATION
DIVISION OF STUDENT FINANCIAL AID

AGREEMENT COVERING INSTITUTIONAL PARTICIPATION IN PROGRAMS OF STUDENT FINANCIAL AID

Pursuant to and subject to the provisions of parts A and C of Title IV of the Higher Education Act of 1965 (P.L. 89-329), as amended, and Title II of the National Defense Education Act of 1958 (P.L. 85-864), as amended, and the Regulations issued pursuant thereto

_____
Name and Location of Institution

(hereinafter referred to as the "Institution") and the Commissioner of Education, U.S. Department of Health, Education, and Welfare (hereinafter referred to as the "Commissioner") in order to provide for the conduct of each of the programs of student financial aid identified in Article I hereof (hereinafter referred to as the "Programs") hereby agree to the terms of Articles I, II, and VII, and so much of the remaining Articles of this Agreement as are applicable to each program identified in Article I hereof.

ARTICLE I. SCOPE OF COVERAGE

This Agreement covers the Institution's participation in each of the following checked programs:

/__/ EDUCATIONAL OPPORTUNITY GRANTS PROGRAM (EOGP)
Part A, Title IV of the Higher Education Act of 1965

/__/ COLLEGE WORK-STUDY PROGRAM (CWSP)
Part C, Title IV of the Higher Education Act of 1965

/__/ NATIONAL DEFENSE STUDENT LOAN PROGRAM (NDSLP)
Title II of the National Defense Education Act of 1958

and becomes effective on the date executed by the Commissioner.

(7-70)

ARTICLE II. GENERAL PROVISIONS APPLICABLE TO ALL PROGRAMS

1. The Institution shall use the funds which may be granted to it from time to time pursuant to applications submitted under this Agreement to the extent specified in such grant award for making deposits into its National Defense Student Loan Fund, for making payments to students who have received Educational Opportunity Grants, or for compensating students who are employed under the Institution's College Work-Study Program. An amount not in excess of 3% per fiscal year of:

(a) The Institution's expenditures from its allocation of Federal funds for such year for Educational Opportunity Grants,
(b) its total expenditures for such year for compensation (including the non-Federal share of such compensation) of students under its College Work-Study Program,
(c) the principal amount of loans made from its National Defense Student Loan Fund during such year

may, in the case of the College Work-Study and Educational Opportunity Grants programs, be withdrawn from their respective allocations or, in the case of the National Defense Student Loan Program, from its Fund, by the Institution as a payment in lieu of reimbursement for administrative expenses: Provided, however, that the total of the amounts so withdrawn for a particular fiscal year may not exceed $125,000.

2. The Institution shall: (a) maintain adequate records reflecting the transactions under each of the Programs, including withdrawals for administrative expenses, which records shall include sufficient information to indicate the basis of approval or disapproval of each student application for assistance; (b) retain such records for such periods of time as may be prescribed by the Commissioner; (c) submit such reports and information as the Commissioner may reasonably require in connection with the administration of the Programs; and (d) comply with such procedures as he may find necessary to insure the accuracy of such records and reports.

3. The institution shall use systematic methods for determining the financial need of applicants under the Programs, as indicated in Schedule A.

4. The Institution shall establish procedures for making loans from the Fund, Educational Opportunity Grants and employment under the College Work-Study Program (or equivalent employment offered or arranged for by the Institution) reasonably available (to the extent of available funds) to all students eligible for each particular type of assistance. The Institution shall, to the extent feasible, make

every effort to coordinate such of the Programs for which it has received an allocation of funds and its other financial aid programs.

5. To be eligible for assistance under any of the Programs the student must, among other things, (a) have been accepted for enrollment or in the case of a student already attending an Institution, be in good standing, (b) be capable in the opinion of the Institution of maintaining good standing and (c) be in need of such assistance to pursue his course of study. In addition, in selecting students for employment under its College Work-Study Program, the Institution shall give preference to students from low-income families. Students awarded Educational Opportunity Grants must have exceptional financial need, as determined by the Institution in accordance with criteria and schedules prescribed by the Commissioner, and but for an Educational Opportunity Grant, not financially able to pursue his course of study at such Institution.

6. In addition, in order to be eligible for any assistance provided hereunder, the student must: (a) be a citizen or national of the United States, or in the United States for other than a temporary purpose and intend to become a permanent resident thereof, or a permanent resident of the Trust Territory of the Pacific Islands, and (b) meet the particular program requirements regarding enrollment, good standing, and level of study, as set forth below.

7. The assistance made available pursuant to this Agreement is subject to the Regulations in 45 CFR, Part 80, issued by the Secretary of the Department of Health, Education and Welfare and approved by the President to effectuate the provision of Section 601 of the Civil Rights Act of 1964.

8. The Institution shall take such steps as are necessary and appropriate to assure that the financial assistance provided for under this agreement is not made available to students where prohibited by Section 504 of the Higher Education Amendments of 1968 (P.L. 90-575), or Section 411 of the DHEW Appropriation Act of 1969 (P.L. 90-557).

ARTICLE III. MAINTENANCE OF EFFORT

1. For each fiscal year for which it receives an allocation of funds under either the College Work-Study Program or Educational Opportunity Grants Program, or both, the Institution shall continue to expend, in its other student aid programs from sources other than funds received under this Agreement (or agreements superseded by this Agreement), an amount which is not less than the average expenditure per year made for that purpose during the three fiscal years preceding (a) the effective

date of this Agreement, or (b) the fiscal year for which the Institution receives its first allocation of funds under either the College Work-Study Program, or (c) the fiscal year for which the Institution receives its first allocation of funds under the Educational Opportunity Grants Program, whichever is latest.

2. The Institution shall not be deemed to have failed to meet the requirements of paragraph 1 of this Article if its inability to expend the amount required thereunder is solely attributable to the withdrawal of funds for student aid programs from outside sources.

ARTICLE IV. SPECIAL TERMS APPLICABLE TO THE EDUCATIONAL OPPORTUNITY GRANTS PROGRAM

1. The Institution shall make Grants available only to those full-time undergraduate students who meet the eligibility criteria stated in Article II, paragraphs 5 and 6.

2. The amount of the Grant and its duration shall be determined and payments thereunder shall be made in accordance with such policies and procedures as the Commissioner may prescribe.

3. The Institution shall make vigorous effort to identify youths of exceptional need and encourage them to continue their education beyond secondary school through such methods as:

(a) Establishing or strengthening close working relationships with other institutions of higher education, secondary school principals, guidance and counseling personnel, and community action agencies with a view toward motivating students to complete secondary school and pursue post-secondary school education opportunities; and

(b) Making, to the extent feasible, conditional commitments for Educational Opportunity Grants to secondary school students with special emphasis on students enrolled in grade 11 or lower who show evidences of academic or creative promise.

ARTICLE V. SPECIAL TERMS APPLICABLE TO THE COLLEGE WORK-STUDY PROGRAM

1. The Institution will conduct a program of part-time employment of eligible students in work for the Institution itself, except in the case of proprietary institution of higher education, or work in the public interest for a public or private non-profit organization, other than the Institution, under a written arrangement between the Institution and such organization.

2. Any such work:

a. Must not result in the displacement of employed workers or impair existing contracts for services;

b. Must be governed by such conditions of employment as will be appropriate and reasonable in light of such factors as type of work performed, geographical region, and proficiency of the employee:

c. Must not involve the construction, operation, or maintenance of so much of any facility as is used or is to be used for sectarian instruction or as a place for religious worship; and

d. Must not involve any partisan or nonpartisan political activity associated with a candidate, or contending faction or group in an election for public or party office.

3. The Institution shall be responsible for ensuring that any public or private nonprofit organization with which it enters into an arrangement is a reliable organization with professional direction and staff, and that the work to be performed by the student is in the public interest, properly supervised, and consistent with the purpose of the program. In no event shall work be considered to be in the public interest where (a) it is work for which the political support or affiliation of the student is a prerequisite or consideration for employment, (b) it is work to be performed for an elected official other than as part of the regular administration of Federal, State or local government, or (c) it is work which is primarily for the benefit of members of a limited membership organization (such as a credit union, fraternal order or a cooperative) rather than the public.

4. In making employment available under the College Work-Study Program, the Institution shall give preference to students from low-income families and shall make such employment available only to (a) students who meet the eligibility requirements stated in Article II, paragraphs 5 and 6 and (b) students who (i) are full-time undergraduate, graduate or professional students or (ii) in cases where the Institution is an area vocational school, have a certificate of graduation from a secondary school or the recognized equivalent thereof and are full-time students pursuing a program of education and training which requires at least six months to complete and is designed to prepare them for gainful employment in a recognized occupation.

5. The Institution shall provide that the hours of employment of a student under the College Work-Study Program shall not exceed an average of fifteen per week during periods of regular enrollment during which the student is enrolled in classes. Employment during periods of non-regular enrollment during which classes in which the student is enrolled are in session and during all other periods shall be in accordance with program regulations.

6. The Federal share of the compensation of students employed in a College Work-Study Program covered by this Agreement shall not exceed 80 percent of such compensation for part-time employment, except in unusual cases as may be approved by the Commissioner pursuant to program regulations.

ARTICLE VI. SPECIAL TERMS APPLICABLE TO NATIONAL DEFENSE STUDENT LOAN PROGRAM

1. The Institution shall establish a National Defense Student Loan Fund for the purpose of making loans to eligible students. There shall be deposited promptly in such Fund:

(a) Federal Capital Contributions received by the Institution pursuant to Section 203 of the Act;

(b) An amount, equal to not less than one-ninth of such Federal contributions, to be provided by the Institution;

(c) Collections of principal and interest on student loans made from the Fund;

(d) Charges collected pursuant to Section 205(c) of the Act; and

(e) Any other earnings of the Fund.

2. The Fund shall be used only for loans to students in accordance with this Agreement; for capital distributions as provided in Section 206 of the Act; for withdrawals pursuant to Article II, paragraph I, of this Agreement; and for costs of litigation, and other collection costs as agreed to by the Commissioner arising in connection with the collection of any loan from the Fund or interest thereon, or any charges assessed pursuant to Section 205(c) of the Act.

3. The Fund shall be deposited and carried in a special account of the Institution.

4. No payments shall be made from the Fund to any student unless such student has taken and subscribed to the oath or affirmation specified in section 1001 (f) (I) of the Act.

5. The Institution shall accept responsibility for and use due diligence in effecting the collection of the principal and interest due and payable on loans made from the Fund.

6. Proprietary Institutions shall meet such terms and conditions as the Commissioner determines to be necessary to insure that the availability of assistance under this program to students has not, and will not, increase the tuition, fees or other charges of the Institution.

7. The Institution shall make loans under this program available only to those full-or half-time undergraduate, graduate or professional students who meet the eligibility requirements stated in Article II, paragraph 5 and 6.

ARTICLE VII. TERMINATION AND SUSPENSION OF AGREEMENT

1. This Agreement shall terminate on the first anniversary of its effective date. It is the intention of the parties either to extend this Agreement or to enter into a new Agreement for subsequent years. This Agreement, however, may be terminated by either party upon 90-days notice to the other party. Termination shall not effect obligations previously incurred by either party under the Agreement. In the event of termination the Commissioner will advise the Institution as to what procedures are to be employed in terminating the Institution's operations hereunder.

2. If the Commissioner finds that any of the assurances or representations made in connection with this Agreement or any application for funds hereunder to be incomplete or incorrect in any material respect or that there has been a failure to comply with any of the provisions of the Agreement, he may after notice of and an opportunity afforded for a hearing take such action as

60-433 O - 71 - pt. 1 -- 37

may be necessary and appropriate to protect the interests of the United States.

LOAN INSURANCE COMMITMENT EXPIRES ON:

STUDENT APPLICATION FOR FEDERALLY INSURED LOAN

Print in ink or type — Be sure to read the instructions on the reverse side

PART A.—IDENTIFICATION DATA (*To be completed by student*)

1. Last name — First name — Middle initial
2. Social Security No.
3. Birth date (*Use figures*) — Month — Day — Year 19
4. Sex ("X" one) — [1] Male [2] Female
5. Race ("X" one) — [1] American Negro [2] American Indian [3] Oriental American [4] Spanish Surnamed American [5] All others
6. U.S. citizen or national — [1] Yes [2] No — If no, see reverse
7. Marital status ("X" one) — [1] Never Married [2] Married [3] Other
8. Permanent street address (*Number or RFD*)
9. City or town
10. State
11. ZIP Code
12. Congressional district
13. Area code and telephone no.
14. Major course of study
15. Name of nearest relative with whom not living
16. Permanent address of this relative (*Street, City, State, ZIP*)
17. Financial aid for this year (*in dollars*) (*Exclusive of family contributions*). If none, place "0" in total box.

A	College work-study program	$
B	Other campus employment	
C	Educational opportunity grant	
D	Scholarships and grants	
E	NDEA fellowship	
F	National defense student loan	
G	Other educational loans	
H	TOTAL →	$

PART B.—EDUCATIONAL DATA (*To be completed by school*)

The financial need of the student is not a relevant factor in completing this PART B. No assessment of the ability of the student or his parent to meet the costs of education is to be made.

18. Name and address of educational institution
19. Institution code no.
20. Student status ("X" one) — [1] Half-time [2] Full-time
21. Anticipated graduation date (*Use figures*) — Month — Year 19
22. Academic year ("X" one) — [1] 1st [2] 2d [3] 3d [4] 4th or 5th [5] Graduate
23. Educational costs for this year (*Est. where necessary*)

C	Books and supplies	
D	Personal expenses	
E	Transportation	
F	TOTAL →	$

24. Educational costs less financial aid (*Item 23f less item 17h*) $

The above-named student is enrolled and in good standing or has been accepted for enrollment. The student's statement of financial aid for this year is correct to the best of my knowledge.

25. Financial aid officer or registrar (*Signature*) — (*Typed name*)
26. Date

PART C.—FINANCIAL DATA (*To be completed by student*)

27. I hereby apply for a loan under the Federally Insured Student Loan Program to help pay my expenses while attending school.

Amount of Loan $ _____

For school period Beginning _____

Ending _____

28. Have you any other applications for a guaranteed or insured student loan pending at this time? — [1] Yes [2] No

29. List all indebtedness of $100 or more, including student loans

Name of creditor	Date Incurred	Amount	Unpaid Balance	Monthly Payment
		$	$	$
		$	$	$
		$	$	$

STATEMENT OF ADJUSTED FAMILY INCOME *(To be completed by the student, spouse, and parents as applicable: See reverse side for instructions.)*

Have you during the preceding 12 months (a) resided with, (b) been claimed as a dependent for Federal Income Tax purposes by, or (c) been the recipient of an amount in excess of $600 from one (or both) of your parents?

[1] Yes [2] No ("X" one)

If the answer to the above question is "Yes" (in whole or part) your parent or both of your parents, if they are living together, must complete and sign this statement of adjusted family income.

If married, are you legally separated, or have you for the preceding 12 months been living apart from your spouse?

[1] Yes [2] No ("X" one)

If the answer is "No," your spouse must complete and sign the Statement of Adjusted Family Income.

30	Adjusted gross income (*From Federal tax return or estimates*)				
A	Father $	Mother $	Joint $	$	
B	Student $	Spouse $	Joint $	$	
C	Total adjusted gross income (*Add lines 30a and 30b*)				$
D	Enter 10 percent of line 30c			$	
E	Multiply the number of exemptions claimed on tax return by $600			$	
F	Enter total of lines 30d and 30e				$
G	Adjusted family income (*Subtract line 30f from line 30c*)				$

IF THE AMOUNT SHOWN ON LINE 30G ABOVE IS LESS THAN $15,000, THE STUDENT IS ELIGIBLE FOR FEDERAL INTEREST BENEFITS.

I, each of us, certify that the information contained in this statement is true, complete, and correct to the best of my knowledge and belief, and is made in good faith; and I, each of us, authorize the U.S. Commissioner of Education to obtain from the District Director of Internal Revenue with whom it was filed, a copy of my Federal Income Tax Return or estimate for the tax year upon which this computation of adjusted family income is based, in order to verify the foregoing statement. **Signatures are required for all persons whose income is reported on this form. The student borrower must sign even though he has no income.**

31. Signature of applicant	33. Signature of spouse
32. Date:	34. Social security number:
35. Signature of father	37. Signature of mother
36. Social Security number:	38. Social Security number:

WARNING

Any person who knowingly makes a false statement or a misrepresentation on this form shall be subject to a fine of not more than $10,000 or to imprisonment for not more than 5 years, or both, under provision of the United States Criminal Code.

Lender's copy

INSTRUCTIONS FOR COMPLETING STUDENT APPLICATION FOR FEDERALLY INSURED LOAN

IMPORTANT.—THIS APPLICATION FORM SHOULD BE COMPLETED IN QUADRUPLICATE. PLEASE DO NOT SEPARATE COPIES OR ENTER LENDER IDENTIFICATION DATA UNTIL LOAN IS APPROVED BY LENDER. IF APPLICATION IS REJECTED BY LENDER, IT IS REQUESTED THAT THE ORIGINAL AND ALL COPIES OF THE FORM BE RETURNED TO THE STUDENT.

Part A.—STUDENT IDENTIFICATION DATA

Student completes Part A and submits this form to the educational institution. A foreign national who is in the United States for other than a temporary purpose and intends to become a permanent resident thereof may be eligible for a loan. Therefore, due to their inherently temporary nature, persons who are in this country on an "F" student visa or a visitors visa are not eligible for a loan.

The information on the student's race is requested in order to determine if minority groups are receiving the benefits of the act. No loan will be denied if this item is not completed.

Part B.—EDUCATIONAL DATA

The Financial Aid Officer or Registrar completes and signs Part B and returns all copies of the application form to the student.

Under the provisions of the Higher Education Act of 1965, the function of the educational institution in connection with a student's application for a loan under either program is to determine: (*a*) That the student applicant is enrolled or accepted for enrollment in the institution, (*b*) that he is in good standing, and (*c*) the estimated costs for educational expenses. Consideration should be given to marital status in determining a student's total educational costs. The Financial Aid Officer or Registrar should also review the student's statements of financial aid available before completing item 24 (educational costs less financial aid). The financial need of the student is not a relevant factor in making the foregoing statement, and no assessment of the ability of the student or his parents to meet the costs of education is to be made. The school's average cost for all students may be used in lieu of individual estimates.

Part C.—STUDENT FINANCIAL DATA

The student and applicable family members complete and sign Part C and then submit the application form to the lending institution.

1. The Statement of Adjusted Family Income must be completed to establish the student borrower's eligibility for Federal Interest Benefits on a loan made under the provisions of the Higher Education Act of 1965. A student is entitled to interest benefits only when the adjusted family income is less than $15,000 per year. However, all student borrowers—regardless of family income—are eligible for loan insurance coverage under either act.

2. If the Federal income tax return for the immediately preceding tax year has not yet been filed for any income reported on this statement, the computation on this statement and any Federal interest benefits received are subject to adjustment on the basis of the income figures that are actually reported. The student borrower must immediately report to the lender any differences in such later reported figures which produce amounts in excess of those reported on this form.

3. The adjusted gross income is the amount referred to as "Adjusted Gross Income" on line 15(c) of Form 1040 (U.S. Individual Income Tax Return). The amount to be shown in item 30, lines A, B, and C shall be based on the amount reported, or to be reported for the Immediately Preceding Tax Year for each family member whose income is required to be included in the determination of the adjusted family income.

4. Income earned abroad by any individual whose income is not subject to taxation under the Internal Revenue Code due to the fact that such individuals are U.S. citizens living abroad, shall be computed in the same manner as though it were taxable. Income of nonresident aliens shall be treated as provided for in instructions made available through the lender.

Part D.—LENDER APPROVAL

The lender reviews Parts A, B, and C for completeness.

1. If the lender approves the application, the lender completes and signs Part D.

2. The disbursement of funds should be withheld until the original of the application is returned with the insurance commitment. Disbursements will be reported to the U.S. Office of Education on the Federal Insured Student Loan Manifest (OE 1151).

ECONOMIC MAKEUP OF COLLEGE POPULATION

Senator PELL. Now another question of fact. In my reading upon taking on this chairmanship, I came across the statistics somewhere that the highest economic quarter of the population provide seven times the number of students as does the lowest economic quarter. Is this still correct?

Secretary RICHARDSON. It is certainly my impression but I would like to ask Commissioner Marland to respond.

Dr. MARLAND. This is generally true, Mr. Chairman, and indeed, in the materials we submit to your committee we can describe in charts, and indeed we could describe now in charts, if you wish, a more concrete answer to that question. But the quick and general answer is yes, a child from a family of $15,000 and over represents 85 percent likelihood of entry into college, whereas at $3,000 and under, about 19 percent of the likelihood of entry into college, under the present circumstances.

Senator PELL. That works out to the same 7-to-1 ratio.

Dr. MARLAND. About the same ratio.

EFFECT OF S. 659

Senator PELL. Approximately. Now why would my proposals—actually, all the majority members of the full subcommittee cosponsored it—why would our bill be regressive, for it would assist the students from the lowest economic quarter?

Secretary RICHARDSON. I would like to comment on that, Mr. Chairman. Perhaps the Commissioner will want to supplement my observations.

The basic point, I think, is that a family's income tax return, or the amount of the tax it pays, does not as sensitively reflect the family's capacity to support the cost of higher education for a child as we believe the approach that we have described in our legislation, and which I testified to a little while ago.

For example, the tax return or the tax paid by a family does not reflect the costs of supporting other children in college. It doesn't reflect any contributions the family have for support of children more than half the support of whom is not provided, or the support of relatives who may be living in the home. All of these things can be taken into account, and would be, under the form of determining the capacity of the family to contribute to a child's cost of education, under the approach that is set forth in our legislation.

I would like to stress, by the way, and I note your request for the supply of material, the committee did reflect its awareness that these determinations would be made by the college or the university, in determining the eligibility of a student for assistance, and the amount of assistance to be provided, not by the Federal Government. And so in short, we think that as between the use of the amount of taxes paid by a family and a determination of the family's ability to contribute to the cost of education, by the approach we have urged, that the latter is a more sensitive measure.

Senator PELL. Commissioner Marland?

Dr. MARLAND. No further comment, Mr. Chairman.

Senator PELL. I think you are undoubtedly right, that it may be more sensitive and more specific. There is another drawback, in our proposal; the family which has all its invested income in municipal bonds, such income would not be reflected in the income tax that they pay. But these, I think, would be exceptional cases. What I was looking for was a general rule of thumb that would be simple. But more important is the fact that the grant would be a matter of right. A student would not have to bare his soul, his family's economic soul. The university would receive a certificate or a thermofax, at the time he pays his income tax of the amount of money that is paid.

As to the point you made, Mr. Secretary, with regard to your allegation that your approach would help those families with more than one child who is going through college; such a family would also be covered by our bill, because the same grant would be accorded to each child of a family that carries them as a dependent. So actually, the family would come out, I would think, a tiny bit better than it would under yours.

In general, I would not agree that it is retrogressive, in that what I was looking for was some way of helping those families who pay little or no income tax, and in my part of the country, where there are large families and low incomes—you find families which pay no income tax. My bill would give them an automatic way of helping their children through college.

A $1,200 grant, as a matter of right, would mean that youngster could pay all his tuition, all his costs. The bill also provides a cost of instruction allowance following the student to help the colleges in their efforts.

I would like to ask you what in your view would be the specific costs on the enactment of my bill and, also, what the cost of the enactment of my bill would be if it did not include the cost of instruction factor.

Secretary RICHARDSON. We have an analysis of these prospective costs, Mr. Chairman, which we would be glad to supply for the record.

Senator PELL. Perhaps you could give us those two figures now, to the nearest billion.

Secretary RICHARDSON. Well, this is a tabulation with respect to the whole bill.

The cost of instruction allowances, we anticipate the cost for the academic year 1971, would be about $1.3 billion.

Senator PELL. That is the cost of instruction?

Secretary RICHARDSON. And the total cost of all of your proposed student aid provisions we estimate to be about $3.7 billion.

SUPPORT AS A MATTER OF RIGHT

Senator PELL. I wonder if that would not be a simpler way of going at this problem. I guess the difference in viewpoint that we have is that I am saying that the time will be coming soon, in my view, when college will be as much a matter of right, as high school has become a matter of right, although it was never expected to be, 80 years ago. Today not every youngster has a right to attend Phillips-Exeter Academy but he does have the right to go to a high school, and get a good education. And what I am trying to do, with my approach, is to make sure that

every youngster, as a matter of right, has the option of the post-secondary education that he can achieve, with no debts afterwards. However, if a student wants to borrow money, then he, too, can go to a more expensive college using the basic grant.

What concerns me is the idea of a youngster starting out in life with loans hanging over his head, when in fact, I think we would all agree, that because a youngster has finished high school, he should not start out in life with a loan from having finished high school. I am sure a hundred years ago if you and I had been facing each other up here, the view would have been expressed that for a kid to go to high school and get that added four years of education he ought to pay for it himself, and gradually we have changed our thinking.

What I am seeking and have sought to do for some years now, is to move ahead in this direction. If we continue the loan approach, I believe we are just postponing the day, and I would like to ask the general philosophical question; would it not be a correct statement that the objective of American education, and the objective of all of us, is to achieve this floor of college education as a matter of right. Or do you think that that is too ambitious, as an objective?

Secretary RICHARDSON. No; I think we can agree, Mr. Chairman, on the objective. Indeed, the President's message on higher education last year stated as the specific goal of the administration's recommendations the assurance that a lack of ability to pay should not be a barrier to education for any American, and I think it should be emphasized that the administration recognizes the importance, the necessity of grant assistance for many students. And, in fact, our proposals would provide a thousand dollars in grant assistance including work-study programs, with the proportion between grants and work-study determined by the college, for students in families in which it was determined that the family could not be reasonably expected to contribute to the cost of the student's education. And we would determine that in the way I referred to earlier, rather than simply by reliance on income tax returns.

In addition, a student would be able to borrow, with ultimate potential federally subsidized assistance, including grants, of $2,900.

I thought I would ask, Mr. Chairman, if Mr. Muirhead could at this point describe exactly what our proposals would do, because I think that as you go into the question of which route to take, it is perhaps helpful to have clearly, or more clearly in mind than just a written statement can make it, exactly what the financial impact of these proposals is.

May I just make one brief comment further while the easel is being set up: that is, that we are concerned by the thought that income taxes paid would be available to institutions as the measure of financial assistance. I would have thought that as a former U.S. Attorney, having been exposed to the sensitivity with which people regard their income tax returns, that they would rather follow the practice which is now well established, of dealing with a financial aid officer in the Student Assistance Office of the college or university, and go over with him the family's ability to pay, than to lay bare the results of their dealings with the Internal Revenue Service.

Senator PELL. I would interrupt here to say that the people who are sensitive in this matter are not usually those who pay less than $1,200

a year in income tax. If there is a man with a hundred thousand dollars a year income, who has worked out a way of paying less than $1,200 of income tax, I think he would be sensitive about it, and might be so sensitive he wouldn't take advantage of this program, and that is exactly what we intend.

Secretary RICHARDSON. Could we ask Mr. Muirhead to proceed?

Mr. MUIRHEAD. All right. I think, Mr. Chairman, that in order to put the program into focus that we should bring to the attention of the committee what the present situation is with regard to the college-going plans of young people with varying incomes.

This chart illustrates that if a young person comes from a family earning less than $3,000, his chances of going to college are about 18 per cent of that group of high school graduates; while if, by the good fortune of genetics, he comes from a family in the $15,000 bracket——

Senator PELL. Not because of genetics; because of luck, I would say.

Mr. MUIRHEAD. All right, yes. Suppose he comes from a family earning more money. The chances of that youngster going to college are about five times greater, and this bill, the whole thrust of the bill, as both the Commissioner and the Secretary have pointed out, is to bring some quality to the youngster from the low-income family. Basically this is accomplished, and I think this point should be emphasized as both the Secretary and the Commissioner have mentioned by increasing very dramatically the amount of money that will be made available in grants.

Now here, I think this chart shows this very well, that we are now providing $343 million in grants for young people.

This proposal that is before you would increase that to $575 million, in the first year, and to $635 million in the second year. And the net effect of that, or the other thing that is being done, is to increase what we have all come to admire, the NDEA student loan program. The NDEA student plan program at the present time is providing a great service——

RETENTION OF NDEA LOAN PROGRAM

Senator PELL. I must interrupt here to point out that there are those in the administration who did not admire it, and almost eliminated the NDEA program. However, there was such a squawk from around the country and the Congress, that the administration's presentation changed. I am delighted that this is the present view.

Mr. MUIRHEAD. Yes; I am delighted, too, and we have the principal architect of the NDEA as the Secretary of HEW; and it probably is no surprise, then, that we are increasing the NDEA program. Basically, the NDEA program at the present time provides $369 million through a combination of sources: from the Federal Government, the Federal capital contribution to the revolving fund that is now an established part of the NDEA student loan program; and from the institutions' own contributions.

This proposal would increase fourfold, from $369 million to $1.2 billion, the amount of money available to young people under NDEA terms.

Now it is done in a different way, but that doesn't make much difference to the students, and doesn't make much difference to the col-

lege. The money will be provided through the establishment of a secondary market. What we have chosen to call basic foundation loans to young people from the revolving fund and the NDEA will continue, and next year will be at the level of $140 million. We have changed the administration's bill from last year to put $250 million more of NDEA funds into the bill, to permit young people to have more freedom of choice in the institution that they might select.

The net effect of the legislation, Mr. Chairman, members of the committee, is just this: That we are presently assisting 1.6 million young people through the programs that are now in place. This bill would extend that, would expand that, to 2.5 million students, all of them in financial need. One million additional students would receive assistance under this bill. It would also provide, as has been pointed out, an opportunity for those who are not in financial need to have available to them credit, which is not now available to them, under long terms, and to increase the maximum line which they might have, with a Federal guarantee. Our best judgment is that this would provide insured loan assistance to about a million additional students.

Now, probably the best way to explain the point the Secretary was developing is to show this chart. This chart is intended to point out that the whole thrust of this bill is to say that the young person comes from a family earning about $10,000, with two children, under established procedures, is normally expected to provide about $1,400 toward the cost of education of their children. This bill says it is now time that families that have lower incomes have an opportunity to get some financial aid that will close the gap between that $1,400 of family contribution at the $10,000 level and the lesser amounts that families are able to pay at lower family income. And so it is graduated. The other interesting thing about it, as you will see here, is that the table is graduated in such a way that the grant provisions are targeted on students from families with the lowest incomes. Here is our best estimate of what the combination of grants and loans would be under this bill to young people coming from varying levels of family contribution.

I will show you in a moment what our best judgment is as to the family income that would produce this family contribution; but, addressing ourselves to the concept that we are trying to equalize family contribution, here we have a family contribution of zero, probably a family of $4,500 or less. That student would be eligible for a $1,000 grant, and a $400 loan. If that were not enough to pay for the cost of education at the college of his choice, then he would have available to him up to $1,500 additional subsidized loans, so that he could then have subsidized help up to the level of $2,900.

Secretary RICHARDSON. Those, I might interject, would be loans on NDEA terms.

Mr. MUIRHEAD. Yes.

Senator PELL. I was struck by the fact that you had originally started this program. Was that when you were an Assistant Secretary, under President Eisenhower, in the late 1950's?

Secretary RICHARDSON. Yes, the loan title, in fact, was actually drafted in my office.

Senator PELL. I congratulate you.

Mr. MUIRHEAD. As you will observe here, as we climb the contribution ladder the amount of grant support does decrease; the amount of loan support continues at the same level, except when we get to the top. In each instance the student can supplement the family contribution, the grant, and the loan with an additional NDEA loan. taking him to the level of $2,900.

The program is directed at saying that young people from low income families should have the same opportunity as young people from middle and higher than middle families. The best way to accomplish that is to provide them with some substitute for family contribution.

AVAILABILITY OF LOAN

Senator JAVITS. If I might ask you a question, do you take into account in any of that presentation of the ability to get the loan?

Mr. MUIRHEAD. I have not mentioned that, Senator Javits.

Senator JAVITS. That is all right. I am not questioning it. I just want to be sure that we all understand that before that program can be made good the individual student has to obtain the loan.

Mr. MUIRHEAD. Yes, sir.

Senator JAVITS. O.K.

Mr. MUIRHEAD. And the NSLA, which is an important part of the administration's proposal, is directed at that very problem.

Now here is what it would look like in terms of family income. I think sometimes a sort of first action to this program is to say that no assistance goes to middle or upper income families. And that is just not so. This chart shows that obviously the young people coming from the lowest income will, of course, get the largest assistance under the program. But we are saying that even at the $11,000 level the amount of assistance that would be available to this family, let us say earning $11,000, their family contribution is less than the $1,400, that young person would have available to him up to $1,500 in an NDEA-type loan.

We can look at a family earning $12,000, and having three or four children, and here is an instance of a family earning $12,000, that would benefit under this program, not only in terms of getting an NDEA-type loan, but also a basic loan. So that the benefits of the program extend to a very wide distribution of income, and include, as the Secretary pointed out in his testimony, a very substantial part of that community that we call the middle income group.

Secretary RICHARDSON. May I interrupt just a second?

I think that many of the people in this room, particularly our visitors from the community colleges, are interested in that chart, and that is the one chart, the lower lines of which were not very visible on that easel, Peter, and it might be good for them to see it.

Mr. MUIRHEAD. Oh, I am sorry. All right, this chart is designed to show that the benefits of the program extend over a very wide range of income. And as you will note, it is measured by the amount of family contribution. This chart is designed to illustrate that a family in the upper income brackets, $12,000 and over, a family, let us say, with four children, would be a beneficiary under this program, and would be a beneficiary under the subsidized portion of this program.

I think it is important to point out that in each instance, when the family is eligible for aid, and they have more than one child in college, that that assistance is available to each child in college.

Perhaps it would be helpful, Mr. Chairman, for us to show a chart in which it would be related to the colleges. The program is designed in part, to make it possible for young people from low income families to have freedom of choice in the selection of their institutions. These institutions have just been selected to indicate how a young person from a low income family who wishes to go to a private high cost institution can build the type of assistance that is in the President's program. I have selected here an institution where the costs would run as high as $3,200, and the program would make it possible for a young person whose family is not able to provide any contribution to have a $1,000 grant, to be able to get a $400 basic loan, and up to $1,500 NDEA loan. By earning $300 in the summertime, that young person would be able to meet the costs at a high-priced private institution. A similar example, or another example, would be in a public institution, where the average costs might be $2,000. Such a student could build a $1,000 grant, a $400 basic loan, a $300 NDEA-type loan, and, by earning $300 in the summertime, be able to meet the costs at a public institution charging $2,000, and have a total loan investment of about $700.

Senator JAVITS. Could I ask you a question?

Mr. MUIRHEAD. Yes, sir.

STATE GRANTS TO STUDENTS

Senator JAVITS. States like New York and Ohio give a student grant. How do you take that into account?

Mr. MUIRHEAD. We would propose that that would be on top of whatever basic assistance he received from the Federal Government, with the obvious limitation that the total of the benefits would not exceed the cost of education of the school he is attending.

Senator JAVITS. How does the Administration's bill, cover that contingency?

Mr. MUIRHEAD. The Administration's bill does not spell that out, Mr. Javits.

Senator JAVITS. It is put in the foundation bill.

Mr. MUIRHEAD. No, but the Secretary referred to it in his testimony today.

Senator JAVITS. Mr. Secretary, would you be kind enough to think that one through? I have put in a bill, S. 1074, for Federal matching, in order to give an inducement in the States for their own student aid programs, I think it would be more economical for the Federal Government. I know you have received a lot of sentiment from the educational community as to the desirability of some such approach. So whenever you can, I am not trying to push you, I would greatly appreciate it if you could submit for the record a reply to that question. How shall we accommodate and encourage States which do give a grant to the pupil, and encourage others to do the same thing?

Secretary RICHARDSON. We would like to do that, Senator Javits. We were aware of your bill, and in fact the question has come up in at least two of the meetings I have had with what we have been calling the higher education group, a group of representatives of the major organizations in the field of higher education, including the

community colleges and the President of the American Council of Education at the present time. We will give it further thought. One of the problems inherent in it is the problem of cost, insofar as we feel that there is also needed a program which does have uniform national applicability. But at any rate we will be glad to pursue it further.

Senator JAVITS. I might just call your attention to one other factor, Mr. Secretary. In this particular field, there happens to be considerable State pride, and I see no reason why that is not a legitimate incentive, of which the Federal Government can take advantage. I think State legislatures and governors rather like the idea that they have got a check on the college student, just like the Federal Government. This is a big inducement, notwithstanding this is a big money factor for States, so I don't think we should overlook that very important State pride factor, which can be very helpful to us in the Federal establishment.

Senator PELL. Some of these charts were not included in the testimony. Some were. I would also ask unanimous consent that all the charts that were submitted be included in the record of these hearings.

(The charts referred to follow:)

PROJECTION OF COSTS OF THE GUARANTEED LOAN PROGRAM

MAJOR OBJECTIVES OF THE PROPOSED PROGRAM

- PROVIDE SUFFICIENT GRANT, WORK, AND LOAN SUPPORT TO ALLOW EVERY LOW-INCOME STUDENT TO ATTEND POSTSECONDARY EDUCATION
- PROVIDE ADDITIONAL SUBSIDIZED AID TO HELP STUDENT ATTENDING HIGHER COST INSTITUTIONS
- HELP INSTITUTIONS OF HIGHER EDUCATION EQUALIZE THE DISTRIBUTION OF FEDERAL STUDENT AID
- REDUCE, REFINE, AND REDIRECT INTEREST SUBSIDIES IN THE GUARANTEED STUDENT LOAN PROGRAM
- TAP PRIVATE CAPITAL MARKET FOR SUPPORT OF STUDENT LOAN PROGRAM
- CREATE SECONDARY MARKET MECHANISM TO BUY AND SELL BLOCKS OF STUDENT LOAN NOTES AND INCREASE THE AVAILABILITY OF LOAN CAPITAL

SOO 106 SOO

Secretary RICHARDSON. Have we now given you a set of these?

Senator PELL. We now have them all. They will be put in the record.

Secretary RICHARDSON. I thank you very much, Mr. Chairman, for giving Mr. Muirhead an opportunity to make this chart presentation. I think it would at least help to make more vivid the interrelationship between grants and loans that we visualize, and to dramatize the significance of the family contribution, as the starting point for determining what combination of grants and loans is adequate to meet the student's needs, and finally, to underscore the point that this combination, with allowance for an opportunity to earn $300 in the summer, does permit the student to attend an institution where total costs are as high as $3,200.

One of the things that we have been concerned about is that the Federal student assistance program should be designed in a way that is capable of providing assistance in attending nontax-supported institutions.

Senator PELL. I would like to defer at this time to the ranking minority member of the full committee, and then I will come back to my line of questioning.

AVAILABILITY OF FUNDS FOR STUDENT AID

Senator JAVITS. Mr. Secretary, I would like to pursue this question of raising the money. It is one thing to give assurances that we are going to see a pupil through college, and it is another thing to find the funds.

Now as to the problem of appropriations, you can't do anything about it but just be hopeful that Congress will appropriate the money you need to make good on your grants. But is this going to be a situation where the United States will utilize its position on a full faith and credit basis, as it does, for example, in public housing, or will it be a situation where you are going to tailor the amount of grants you can give to either by number of students or by the size of the grant, depending upon what Congress appropriates?

I am sure you are sophisticated enough to understand what I mean by the full faith and credit operation. In other words, that the United States will undertake to make a grant to every student, and that it will post facto seek an appropriation to cover the grants made, which is what we do in public housing. We seek an appropriation to cover the annual deficit.

Now in public housing, that promise is considered good enough so that people will buy bonds at relatively low-interest rates, considering the full faith and credit to be a Government guaranty, which it is not. Now I just wonder how you intend to approach the grant business.

Secretary RICHARDSON. Well, I think, Senator Javits, it is important to distinguish between the three forms of funding or financial assistance that are proposed by the administration.

So far as the combination of equal educational opportunity grants and work study are concerned, the amount of student assistance that could be provided in any year in that form would be dependent upon appropriations. And we have proposed the budget, it is in 1972 budget, a 70-percent increase in funds under those programs.

In future years, as Mr. Muirhead said, we contemplate increasing the administration requests for funds for this, but it is fair to say that the amount available would be dependent upon the appropriations process.

BASIC GRANT AS AN ENTITLEMENT

Senator PELL. If I might interrupt for a moment. One of the virtues of my bill is that it is written as an entitlement, and so it is not dependent upon the vagaries of either the Appropriations Committees or the administration in withholding the funds.

Senator JAVITS. Well, Mr. Chairman, I like that concept very much, and I am going to ask the Secretary if he wouldn't be kind enough to consider it, and give us his judgment on it. I really think that in the student field, we ought to do something like that. I think that the moderating factor should be the number or students accepted, et cetera, a different income levels. We should do that first. In this particular field, you are not dealing with roads or rivers and harbors, or even defense. The student is entitled to know that if he undertakes this course in pursuing an education, that we are going to see him through it, and if I have anything to do with writing the legislation in this subcommittee, that is the way I am going to write it. The United States can handle it by setting student quotas, if it wishes, though I hope we never do that. I think that is one of our really high priority expenses.

But I do not believe that we ought to cut out a student who has legitimately undertaken a college course on the faith and credit of the fact that he is going to get this support, and then because some Appropriations Committee around here gets chinchy he doesn't get it and is left high and dry.

Secretary RICHARDSON. Well, I think there is, of course, a basic commitment on the part of the Government to the student. The issue really is only as to the manner in which this is carried out. I don't believe that any administration or any Congress would fail to provide the necessary funds by appropriations. The only question is whether to try to make the process of appropriations in some sense controllable.

Senator JAVITS. No, Mr. Secretary. We don't do that, sir. If you will allow me, I would like to submit it to you, because we do want your opinion, based upon a fact, not a theory. The fact is that the U.S. Government may fix any quota it pleases for the number of students for which it will be responsible, in any college or university. I am all for that. There is nothing uncontrollable about that. But having fixed that number, for the 4 years, whether the student goes, if he qualifies and if he has received passing grades, and remains, then we will see that he gets it. Now the only way you can do that, as I say, is by an analogy to the public housing, as Senator Pell has just said, the entitlement analogy. So I am not, sir, recommending something open ended. We had disastrous experiences with that, for example, in medicaid. So I am not going for that. But I say the controls should not be the appropriation process, which is post facto. The controls should be before the fact. That is, the student should not be admitted with U.S. backing, as it were, unless we go through with it. Don't tell him he can go to college with this backing if it is uncertain. "We are sorry, we can't undertake this commitment to you," just like we do in public housing.

After all, we have 6 or 7,000 public housing units in the country. That's all. You may be a poor person, but you still can't get into it.

I would much rather do that, because I think the idea of aborting a student because we won't appropriate in the second, third, or fourth year is really a shocking breach of good faith to that student.

That is all, Mr. Secretary. I suggest this to you. I hope the thoughtful people, like the Commissioner and others who are with you would help us with that, because this is a most important thing.

PRESIDENTIAL VETO

Senator PELL. I don't want to submit a jarring note here, either, but the question is, even if the appropriation is made, will it be vetoed? People get even more upset, when that occurs. This is one of the problems we in the Congress face, within the complexity of the authorizing and appropriating process. Indeed, this is one of the reasons some of us like the idea of an entitlement for then neither the uncertain kindnesses of the Appropriations Committees nor the administration will have an effect. An entitlement is automatic and the youngster can count on it, no matter what happens, unless the authorizing act is changed. Those are my reasons for supporting this approach.

Secretary RICHARDSON. Well, I don't think there is any difference between us in respect to the objective of nailing down the commitment of the United States to the student. And we can certainly work with the committee and committee staff to make sure that this is made good. I was glad to have the clarification by Senator Javits just now with respect to how he views that. And of course—well, I think that covers it quite well, at the moment.

CALCULATION OF NEED

Senator JAVITS. Mr. Secretary, I will just have another question or two. I am very troubled by one sentence in your presentation, which I didn't hear you deliver, sir, so if you omitted it, please correct me.

The sentence reads in your prepared statement. It says:

> The College or university would calculate each student's eligibility for aid by determining the expected family contribution toward his educational costs.

Now this immediately raises all kinds of questions about how you will determine that fact. It is has a big analogy in welfare. The Secretary certainly is clearly as familiar as I am with the whole conflict between the affidavit and the social worker.

Now has the Department thought about this particular matter? From the point of view of one, administrative burden, and, two, of technique? It is very important, and there are millions of people involved.

Secretary RICHARDSON. Yes; we have thought about it, Senator. Let me go back to the period in which the National Defense Education Act student loan program developed, since we touched on that earlier. At that time we sought advice from colleges and universities that had developed forward-looking student assistance programs, and we were impressed by the people speaking for those programs who sought to develop for each student a combination of grant assistance and work that were best adapted to his particular situation.

603 03

Now such student assistance offices have always sought to determine what the student's needs are, in the light of the family's capacity to contribute to the cost of his education. And we think that this is, barring a transition to a situation in which all higher education becomes free, or most of it, the way elementary and secondary education is, that there must be retained in the meanwhile some means of determining the student's need. And all we are saying here is that the student assistance office of the college or university should determine what the family's ability to contribute to their son's costs of education is, and that in so doing the student assistance office should ask the family questions like "Are you paying for or contributing to the cost of the education of any other student in higher education?" "What is your situation with respect to the support, for example, of elderly parents?" And so on.

This is the process that student assistance offices carry out now, and all we are saying is that this is the process we believe they should carry out in determining this combination of loans, grants, subsidized loans, or guaranteed loans that we described earlier.

Senator JAVITS. Has your experience with leaving the finding to the individual educational institution been satisfactory?

Secretary RICHARDSON. Yes, it was specifically provided for in the NDEA, in which we wanted to avoid a governmental determination of the student's need for a loan, or whether it was appropriate for him to borrow at all, as distinguished from receiving outright grant assistance, and I thought that our most innovative contribution at that time was a proposal whereby all loan funds should be institutionally administered. The concept was that the Federal Government would appropriate money, it would negotiate with the institution an amount proportional to the size of the student body, and so on, which the Federal Government would contribute to the institutional loan fund with a matching percentage in the form of a contribution of the institution's own funds, because the institution would be administering the loans, and we thought that it should therefore have some money in the pot, and since it would be administering the whole, as if the whole were all its own funds. We thought this was a sound approach, both because the institution could more sensitively judge the student's need, or the appropriateness for a loan at all, as well as because it permitted the institution to draw upon people in its employ who were dealing with the subject of student assistance anyway, even before the Federal NDEA loan program came along, thus enabling us to avoid the necessity of setting up the Federal bureaucracy designed to administer direct Federal loans.

Senator JAVITS. Now does this new plan in any way change the circumstances under which the institution itself made that determination?

Secretary RICHARDSON. No. Not to my knowledge. I might ask Mr. Muirhead, who was the first Administrator of the NDEA loan program, to comment on this, or clarify or correct anything I may have said.

Mr. MUIRHEAD. It seems to me that the Secretary has underscored a very important point here, that as a result of the 12 years of experience with the NDEA, there has been built up a fine competence in the colleges and universities, in dealing with this whole question of assessing fixed need. This program which we have before you would inject

one other point into it, as you will note in the language when it does come before you, that the Secretary will be asked to consult with a student financial aid council and, presumably, that will represent such well-established counselors as the college scholarship service, the American College Testing people, and representative people from financial aid, who will advise him upon what does represent a fair family contribution from the family in the normal circumstances, and the whole question of determining family contributions has been rather carefully developed over the 12 years, so that we can rely upon it.

The Secretary would provide to the colleges some guidelines as to under normal circumstances: A family earning this amount of money, with this number of children, should be expected to make this family contribution.

At the same time, the Secretary would say these would be cases that are not complicated, and those cases which are complicated, using the reference that the Secretary has used, where there is illness in the family, or whether they have had a loss in a previous year, or any number of situations that make them less than normal, then the student financial aid officer would counsel with the student at that time. But the very important point about this program, it seems to me, is that it says that, by and large, a young person, no matter where he is, will be treated evenhandedly in terms of the assistance that he will receive. And that evenhandedness will come from the guidelines that the Secretary provides.

ATTRACTING INVESTORS TO NSLA

Senator JAVITS. I have just two other questions, Mr. Secretary. I hope we can have them briefly, because my colleagues have questions. One is this: How do you sweeten up the National Student Loan Association to attract investors?

Secretary RICHARDSON. We have provided for an initial available appropriation of $400 million, to help it get started, or at least to bring the transition from direct loans to the NSLA, and there would be recourse, should expectations with respect to the administration of the program not be realized, to a kind of backup reserve of $250 million in the U.S. Treasury.

Senator JAVITS. So you think it would be advantageous because it will be safe?

Secretary RICHARDSON. Yes.

Senator JAVITS. They will be attracted to it because it is safe.

Secretary RICHARDSON. Yes. I think the precedent of housing loans, guaranteed loans, the operation of FNMA, is a fair precedent.

I used to work for a group of savings banks who couldn't get used to the idea at first that a guaranteed loan, that the note evidencing the loan, was for all practical purposes Government paper. After a while they became aware of this and dealt with FHA loans on that basis. This FNMA, in effect, thus became a means of facilitating the purchase and sale of them. And this is essentially what we visualize here.

COLLEGES' ABILITY TO ADMIT STUDENTS

Senator JAVITS. Now my last question is this: The Carnegie Commission says of course it costs the college or university much more to educate a student than he pays in fees. Now unless our colleges and

universities are going to raise their fees very considerably, don't you have to think about some matching basis for taking up the slack to induce colleges and universities to take in a lot of these low-income students?

Secretary RICHARDSON. It is true, Senator Javits, that the proposals we described here today do not address the problem of the cost of educating the student over and above the tuition and fees that he pays, or that it is made possible for him to pay, through the student assistance being proposed. We have given, and are giving, a lot of thought to the question of what ought to be the Federal role in support of higher education. We are not satisfied with the adequacy of a cost-of-education grant in effect attached to student assistance as a means of doing this. It is not, we think, sufficiently discriminating as between needs, costs of institutions, and beyond that, we think that its effect at this stage would be unduly to perpetuate status quo. We believe that there is urgent need for the development of new and much more flexible forms of higher education.

I hope to be back here tomorrow talking about this, as it relates to our proposal for a national foundation. So, in short, while we are aware of and sympathetic to the financial squeeze in which institutions of higher education find themselves at the moment, we are not convinced that the answer to that is a flat cost-of-education grant.

Senator JAVITS. But you realize there is a problem over, above and beyond the problem you are dealing with when you finance the student?

Secretary RICHARDSON. Yes, we do.

Senator JAVITS. Thank you, Mr. Chairman.

Senator PELL. Thank you for that line of questions, very much indeed. Do you have any more?

VARIATIONS DUE TO COST OF LIVING

Senator BEALL. One question with regard to the student aid proposals.

I notice in the formula for determining the amount of student aid, there is no mention of cost of living. It appears to me the cost of living does vary rather dramatically at various geographical locations around the country. I wonder if this isn't a legitimate matter for consideration when you are trying to determine the amount of aid that a student in a certain area might deserve.

Secretary RICHARDSON. Well, this is a valid point, certainly, Senator. I think the short answer is that the determination of the total amount that would be provided for him would in effect tend to take this into account, because it is designed to be enough money to enable him to pay the costs of attending the institution he is going to, including the costs of living in that area.

In other words, the cost of living is in itself a factor in determining what he needs.

DIRECT INSTITUTIONAL AID FOR OPERATING EXPENSES

Senator BEALL. Second, following what Senator Javits mentioned, do I understand you to say that you are studying methods of providing direct institutional aid for operating expenses?

Secretary RICHARDSON. Yes, we are. I can't speak for the administration as to any commitment to do this, or how to do it, but we are very acutely aware of the financial needs in the institutions of higher education. We think that we are at a critical turning point in potential redefinition in the Federal role toward higher education. The NDEA contained various categorical programs, in support of particular needs in higher education, that were clear and identifiable at that time.

We developed a program, for example, for the expansion of the training and teaching of Ph. D's for college educational needs, which has been so successful that, according to many people, we are now or have lately educated a surplus of Ph. D.'s. We had a program, which still exists, for the encouragement of area studies, various parts of the world, the language and cultures of various areas. And there have been a number of other such programs that were developed then, which still constitute the basic core of institutional support so far provided by the Federal Government. We think that we need to be thinking of the needs of the next decade, with a fresh eye on the opportunities for higher education to adapt itself to a situation in which a larger proportion of all high school graduates is seeking education beyond the high school than ever before. They are seeking varied forms of education to meet their needs because the system in effect is no longer a system that selects out a relatively small group seeking a 4-year education. We are trying to think how the Federal Government can best contribute not only to meeting financial needs, but to encouraging the kinds of flexibility and adaptation to new needs that we think is necessary.

Dr. MARLAND. May I add a little to that statement in response to Senator Beall.

I think it should be clear that we are not unmindful at all of the need for institutional help. There are some improvements. For example, in the funds to support construction, we have increased the budget from $470 million this year to $520 million, to provide subsidized loans for the construction of college facilities. We have also increased the resources for developing institutions, 60 percent of which will go to black colleges. We are also increasing the resources available for development and planning in community colleges, so that these are essentially institutional aid components, without the sweeping aid that you may be implying in your question.

Senator BEALL. Thank you, sir.

Mr. Chairman, at the request of Senator Prouty, I would like to ask unanimous consent to include at the appropriate place in the record a copy of the bill to amend the Higher Education Act of 1965, and a section-by-section analysis, and other——

Senator JAVITS. Would the Senator yield to me before he does that?

Senator BEALL. Yes, sir.

Senator JAVITS. Mr. Secretary, off the record.

(Discussion off the record.)

Senator PELL. Back on the record.

In other words, by unanimous consent, the text of the proposed bill is incorporated in the committee's record at the beginning of this hearing.

Senator JAVITS. Right.

Now, reserving the right to object, Mr. Chairman, I shall not object, but I would like to ask the Secretary a question.

Mr. Secretary, is this the bill, as presented by Senator Beall, for Senator Prouty, for introduction in the record, which is the administration bill, and which you have asked Senator Prouty as ranking member of this subcommittee, to introduce?

Secretary RICHARDSON. Yes, it is.

Senator PELL. Thank you very much.

Frankly, if there are any changes before tomorrow they can be made; I am sure we won't get it printed by then, anyway.

Senator JAVITS. That's what I was worried about, you see.

Secretary RICHARDSON. I appreciate that very much.

COST OF S. 659

Senator PELL. I want to return to your estimate of the costs of S. 659. It is my understanding of what you said, that the total cost of the bill would be $3.6 billion, of which $1.6 billion would be for the cost of instruction?

Secretary RICHARDSON. No; no; I didn't cover the—I was adressing only the costs of the student assistance provisions, which we estimate as $4,153 million.

Senator PELL. It has gone up.

Secretary RICHARDSON. The total costs of the bill, no, I said $4,153 million, I think, last time. The total costs of all the provisions we estimate to be for fiscal 1972 $8,748,520,000.

Mr. Muirhead?

Mr. MUIRHEAD. That is the total cost of the bill, but, Senator Pell, the figure which we are sharing with you as to the costs concerning student aid, which is——

Senator PELL. Right; you are quite right. What I was concerned with, was the total. The direct question asked was what is the cost of the basic education opportunity grant? The cost of those grants is estimated by the Department to be how much?

Mr. MUIRHEAD. The total cost of those basic opportunity grants is estimated to be 1.7 billion.

The Secretary reported to you the total cost of the student aid provision, including the cost of instruction allowance that would go with it.

Senator PELL. So, in other words, the enactment of our approach, to the effect that the student would receive the difference between $1,200 and the income tax paid by the student or the family that carries that student as a dependent, as a matter of entitlement, would be—could you repeat the figure again, Dr. Muirhead?

Mr. MUIRHEAD. Well, let me be precise on this, if I may. The total cost, as we have estimated it, for your basic opportunity grants, would be $1.7 billion.

Senator PELL. $1.7 billion?

Mr. MUIRHEAD. That is right. In addition to that Senator Pell, you are also providing a program of supplemental grants.

Senator PELL. To the institutions?

Mr. MUIRHEAD. No. supplemental grants to students in addition to the basic grants.

Senator PELL. Right.

Mr. MUIRHEAD. To very poor students.

Senator PELL. These are the present programs, in other words?

Mr. MUIRHEAD. No, the present programs go on from there. Your bill, as we read it, Senator Pell would provide basic opportunity grants of $1,200 less the tax paid, making $1.7 billion. The bill would also provide supplemental grants of a thousand, or one-half the costs of other financial aid to students.

And our estimate there is $266 million.

Your bill would also seek to extend other student financial aid programs which are now on the books. And our estimate there is $785 million.

In addition, we include this under the cost: Under the student aid provisions, you had a cost of instruction allowance which was to go with each student who was receiving aid, and the total cost of that was $1.4 billion, giving a total cost as the Secretary reported earlier of $4.1 billion.

Now, you can extract from any one of those—Excuse me. $3.7.

Senator JAVITS. Is that 1 year?

Mr. MUIRHEAD. That is a 1-year cost.

Senator JAVITS. What is his program? How many years?

Mr. MUIRHEAD. The program is authorized for 5 years.

Senator JAVITS. All right.

Mr. MUIRHEAD. Senator Pell, if it would be helpful, we would be pleased to submit this for the record, if it would be helpful.

Senator PELL. It would be helpful.

(The information subsequently supplied follows:)

COST COMPARISON OF THE PROVISIONS
CONTAINED IN S. 659
(EDUCATION AMENDMENTS OF 1971 INTRODUCED BY SENATOR PELL)
AND THE
HIGHER EDUCATION OPPORTUNITY ACT OF 1971)
(Dollars in Thousands)

	Administration Proposal[1/]	S. 659[2/]
Student Assistance (students aided)	$1, 628,100 (2,500,000)	$2,730,000 (3,700,000)
Cost of Instruction Allowance	0	1,423,000
Special Programs for the Disadvantaged	50,100	96,000
Developing Institutions Program	38,850	100,000
Higher Education Construction	34,407	1,470,500
Language Training & Area Studies	15,300	38,500
University Community Services	9,500	60,000
College Personnel Development	36,945	53,410
College Library Assistance	7,000	145,000
Higher Education Facilities Loan Fund	4,610	4,610
Networks for Knowledge	0	15,000
Graduate Programs, HEA IX and X	0	100,000
Law Schools Clinical Experience	0	7,500
International Education	0	90,000
Education Professions Development	135,000	600,000
SUB-TOTALS	$1,960,612	$6,933,520

The following programs would be authorized by S. 659 but are not included in the Higher Education Opportunity Act of 1971.

	Administration Proposal[1/]	S. 659[2/]
Vocational Education	$420,173	$975,000
National Foundation for Higher Education	100,000	200,000
National Institute of Education	3,000	500,000
Equipment and Minor Remodeling	0	140,000
TOTALS	$2,483,785 (FY 1972 Appropriation Request)	$8,748,520 (Proposed Authorization)

1/ FY 1972 appropriation request.

2/ Estimates based on enrollment projections and student family income data, or on the authorizations specified in the proposal.

Senator JAVITS. Mr. Chairman, now could you compare that to the administration's bill? I don't mean right here, but give us a chart, so we can take a look, as Senator Pell says, at relevant comparisons.

Mr. MUIRHEAD. Yes.

Senator PELL. That is right. Give us a comparison of the costs of the administration's approach, and of our approach, lined on a basic column basis. One other factor I wish you would add into it is how many additional students you think each bill would cover—this obviously can only be estimated.

Mr. MUIRHEAD. Yes; we would be pleased to.

COST-BENEFIT RATIOS

Senator PELL. Now to another subject. What is the cost-benefit ratio of tax dollars spent on education? In other words, how much will be the return, to put it very crudely, to the Federal Government, in the long haul, in tax dollars, for every dollar spent in improving education?

I have heard a variety of figures advanced. One of my colleagues used the term, I think it was $13 to $1. That seemed generous, and while I hope it is correct, I would like to know what the figure is.

Mr. MARLAND. My earlier testimony, Mr. Chairman, did offer some evidence on that; namely, that over the course of a lifetime, a college graduate, as distinct from a high school graduate, will earn $213,000 on top of the base of the high school level, from which we can project the tax revenues therefrom.

Senator PELL. I know these figures, and I use them in every high school graduation speech I make. I wonder if you couldn't extend it a little bit further, and generate a cost-benefit ratio and submit it for the record. The figure I alluded to is used quite loosely, but I believe it is correct that for every dollar that is spent on education, the return to the Federal Government is substantially more.

I know that experience under the GI bill indicates that the Federal Government came out far better, by that investment, which was a matter of right. What we need is your best estimate as to what the return in tax dollars is to the Federal Government for tax dollars spent in upgrading education?

Mr. MUIRHEAD. I would prefer not to speak for the record now, but we will do our best to respond to your question, and submit the material for the record.

Senator PELL. Right. I think it would be a very, very interesting figure, and one that would help us all, and of course we would appreciate the grounds for your estimate, too.

Mr. MUIRHEAD. Yes, sir.

Senator PELL. Thank you very much.

(The information subsequently supplied follows:)

COMPARISON OF ADDITIONAL FEDERAL INCOME TAX PAYMENTS MADE BY PERSONS COMPLETING FOUR YEARS OF COLLEGE

The Bureau of the Census reports that in 1968 the mean income of male full-time workers was approximately $8,000 for those workers who had completed four years of high school and approximately $13,000 for the workers completing four or more years of college.[1/] Using the College Scholarship Service estimates for Federal Income Tax payments [2/] by net income for three-child family it is found that at the 1971 tax rates a family earning $13,000 per year pays $865 more per year in Federal income taxes than a similar family earning $8,000 per year.

Assuming an average working life of 30 years per worker and that workers with college degrees pay $865 per year more in taxes, it can be estimated that a person completing four or more years of college pays approximately $25,950 more in taxes during his career than a person completing four years of high school. This estimate may be somewhat generous since it is based on the mean annual income of males. However, it can safely be stated that the higher earnings of college graduates contribute substantially to the Federal income tax revenues.

1/ Current Population Reports, Consumer Income, Series P-60, No. 74, October 30, 1970.

2/ College Scholarship Service, Manual for Financial Aid Officers, 1970; College Entrance Examination Board, New York.

Senator PELL. Now I have some specific questions to ask.

Secretary RICHARDSON. May I just interrupt a moment, Mr. Chairman, to say that we can furnish right away, for the record, cost estimates under your bill, under our bills, and a comparison of the two bills in vertical columns. These are all available. And we can supplement these comparisons with a comparison of costs by more or less comparable headings.

Senator PELL. And also as I said, the increased number of students who would be produced by the enactment of each bill.

Secretary RICHARDSON. That, of course, is somewhat conjectural, as I am sure you know.

COST OF INSTRUCTION

Senator PELL. I realize that. Just your best estimate. What is the average cost of instruction at this time on a broad basis for undergraduate students in colleges? Could you give us the rough range?

Secretary RICHARDSON. Yes; and here we could again submit a small tabulation, on the basis of current academic year student charges, including tuition fees, room and board, the basic costs of public universities is $1,460; public 4-year colleges, $1,175; public 2-year colleges, $867; with an average for all public institutions of $1,248.

For private universities, the figure is $3,168; private 4-year colleges, $2,558; private 2-year colleges, $2,267; the average charges in all private institutions, $2,722.

Senator PELL. What is the reason for the fact that the average tuition in proprietary institutions is less than that figure? Does that indicate that they are doing the job more efficiently, or what is the reason?

Secretary RICHARDSON. Where is the figure? Well, I think that proprietary institutions ordinarily focus on a fairly narrow function, and they don't have to maintain the resources of laboratory facilities, libraries, a range of curriculum offerings, and so on, that nonproprietary institutions do.

Senator PELL. Right. Tuition, of course, is not the same thing as the cost of instruction. What we are talking about here is cost of instruction. Is that correct?

Secretary RICHARDSON. No, the figures I gave up were the cost for the student of attending these various forms of institutions, including tuition fees and room and board.

Senator PELL. No, no, forgive me; I may have mis-expressed my question. I want to know the average cost of instruction. What you supplied is what is loosely termed-cost of education.

Secretary RICHARDSON. Do we have any such figures with us?

Mr. MUIRHEAD. We do not have such figures with us, Mr. Chairman, but we would be pleased to submit them for the record, if we may do so.

Senator PELL. I would appreciate it if you would, and would you include proprietary colleges as well, on an average?

Secretary RICHARDSON. We certainly will. We will include a whole variety of institutions.

(The information subsequently supplied follows:)

PER STUDENT EDUCATIONAL AND GENERAL EXPENDITURES BY TYPE AND CONTROL OF INSTITUTION

The Office of Education's National Center for Educational Statistics shows the following average educational and general expenditures per student in academic year 1967-68:

PER STUDENT EDUCATIONAL & GENERAL EXPENDITURES--1967-68 1/

All Institutions	$1,905
Public Institutions	1,702
Universities	2,814
Other 4-Year	1,252
Two-Year	677
Private Institutions	2,370
Universities	3,771
Other 4-Year	1,725
Two-Year	1,020

These educational expenditures have been projected to academic year 1970-71 by using a growth rate based on past increases in educational expenditures and in enrollments within each of the various types of institutions:

ESTIMATED PER STUDENT EDUCATIONAL & GENERAL EXPENDITURES--1970-71

All Institutions	$2,197
Public Institutions	1,920
Universities	3,220
Other 4-Year	1,424
Two-Year	794
Private Institutions	2,871
Universities	4,645
Other 4-Year	2,077
Two-Year	1,125

1/ Educational and general expenditures include expenditures for instruction and departmental research, extension and public service, libraries, plant maintenance and operation, general administration, organized activities related to educational departments organized research, other sponsored programs. Excluded are expenditures for student aid, auxiliary enterprises, and current funds expended for physical plant assets.

For purposes of comparison, the following table shows the estimated average student charges per full-time, resident degree credit students in the various types of institutions:

ESTIMATED AVERAGE CHARGES PER FULL-TIME, RESIDENT DEGREE CREDIT STUDENT

Public Institutions	$1,248
Universities	1,460
Other 4-Year	1,175
Two-Year	867
Private Institutions	2,722
Universities	3,168
Other 4-Year	2,558
Two-Year	2,267

It should be noted that a strict comparison between the educational expenditures and the student charges shown in the tables is not possible since the educational expenditures shown above include all students enrolled while the student charges are for full-time, resident, degree-credit students. Such a comparison would be particularly invalid for those institutions enrolling large numbers of part-time, commuting or vocational students. However, the tables do illustrate that in many cases, the full cost of education is not directly borne by the students or their parents.

Secretary RICHARDSON. Of course, Mr. Chairman, again I am sure you appreciate that such figures are subject to the inherent difficulty in allocating costs. For example, just to take my own college, or university, Harvard University maintains an enormous library, and this is a resources of the scholarly world. How much of the costs of maintaining that library are allocable to the education of any student, whether undergraduate or graduate, and how much of the costs should be regarded in effect as being devoted to the maintenance of an institution that has value not simply to the students of the university, but to a great many other people?

And that, of course, is an inherent problem in determining what amount of the costs of any institution of higher education are chargeable to, in effect, the cost of educating a student, specifically an undergraduate student.

Senator PELL. Right. Well, then, I realize the difficulty here, but if you could just do your best.

Secretary RICHARDSON. Oh, we will; I just wanted to make the point that these figuress are subject to considerable interpretation.

Senator PELL. Right.

The committee may decide to enact a cost of instruction allowance proposal for the benefit of the colleges. One that would pay solely the cost of instruction, and yet would stop an increase in tuition fees, which is the danger here?

Secretary RICHARDSON. We have no definitive views on this. This really involves the whole issue I touched on earlier, of what ought to be the Federal role in contributing to the costs of higher education, recognizing the great variety among institutions and so on.

And while, as I said earlier, we are acutely conscious of the seriousness of this problem, and the urgency that is felt with regard to coming up with better solutions on the part of many institutions of higher education, nonetheless, we think that it needs to be thought through carefully, lest the Federal Government, for the decade or more ahead, find that it has simply underwritten the status quo.

PHILOSOPHY OF FEDERAL ASSISTANCE

Senator PELL. Your general testimony indicates that what the administration is proposing is a long-range, perhaps a permanent, program of student assistance in which loans from the private sector would be the major form of assistance. And this view is reflected in the President's messages.

Moreover, there is no indication of any recognition of the need for assistance to the institutions, although you personally obviously do.

The air of permanency about the administration proposal requires us to examine the philosophy of student assistance as a national policy. And if a proposal, such as the one suggested by the administration, becomes law, it is only natural to assume that college tuitions are going to continue to increase, with the result that higher education will be almost completely financed by tuition.

Students will pay that increased tuition by borrowing large sums, which will then be repaid in the period after they graduate.

To my mind, we should be seeking tuition-free higher education as a floor, but that does not seem to be a goal of the program the administration offers.

Now the question I have is a specific one. Do you really believe that we want to adopt a policy for the time being, based on a philosophy of tuition-financed higher education, or do we want to go to this concept eventually of the floor, without tuition loans, tuition through loans?

Secretary RICHARDSON. I would say, Mr. Chairman, that the administration's philosophy, in advancing its proposals for student assistance, is that we would like to assure that the approach taken by the Federal Government toward the provision of student assistance does not unduly influence the process of the determination of tuition, or the process whereby choices are made by students as between public tax-supported institutions and private or independent institutions.

We would, in other words, like to so design, and believe we have fairly well succeeded in designing, a program that is in this respect. Pending a better opportunity to think through the philosophical issues you have touched on.

I, for one, don't feel prepared to say that we should be moving toward a period in which all higher education is, in effect, tuition free. I see no way, in the short range at least, whereby this can be made true for the independent institutions, and while I think that it would be desirable to find ways whereby the trend toward the assumption of a larger and larger share of the whole load of educating students beyond the high school, by tax-supported institutions, might be slowed down, I don't feel, speaking for myself at least, that we yet have any really good answers on how to do this.

(Further information subsequently received from Secretary Richardson follows:)

ADMINISTRATION POSITION ON GRANTS VS. LOANS

In any case, Mr. Chairman, you have suggested that enactment of the Administration's proposals for student assistance would establish a long-range permanent program emphasizing loans rather than grants. I would respectfully disagree, and make just the oposite point: that the Administration's proposals place heavy emphasis on the provision of more substantial grant funds more equitably distributed, and that establishment of the National Student Loan Association would not, in fact, set future patterns of student assistance in concrete.

No matter what the directions of future national policy with respect to the portion of higher education costs to be borne by the student, students throughout the scale of family income will continue to need loans of convenience and necessity to help meet the costs of their education. We say that such loans should be readily available to all students who need them, and that the National Student Loan Association would provide a mechanism for accomplishing this.

Our proposed legislation takes no position on the degree to which college costs should be met by grant assistance. Our budget proposal would increase grant and work-study funds by almost 70 percent for Fiscal 1972, but the legislation does not specify any family income ceiling on eligibility for these grants. The amount of assistance and the number of students eligible for it could be significantly increased in future years through the appropriations route, without any change in the legislation. Therefore, I would argue that our proposals are characterized by their flexibility with respect to future directions for national policy, and do not permanently lock in any particular mix of grants or loans. Their primary thrust is to make significantly increased federal funds available for student assistance, targeted more effectively on those students most in need.

Senator PELL. I agree with you, that I don't think all higher education should be tuition free. But what I am saying is that I be-

lieve we should move toward provision of a floor, the concept I gave earlier, of primary and secondary schooling, where there is public education available for every youngster through the 12th grade, without paying tuition, and I am saying that I think we should try and achieve that same goal before the century is out, at least, and I hope a lot sooner, with colleges.

Secretary RICHARDSON. Well, I think we are moving in the same direction on that score, as I hope Mr. Muirhead's exposition made clear. We don't believe that we are in anything we have proposed accelerating a process of reliance on tuition, or stimulating an increase in tuition charges.

Senator PELL. No, I would use your earlier word "neutral." I think it is a neutral approach, and we are trying to make it a "less neutral" approach. I guess that's the difference.

Secretary RICHARDSON. I am not sure that I would agree that this is the necessary consequence of what you are proposing, however.

PAYEE PLAN

Senator PELL. I recognize we have a difference of view in that. What is your thought with regard to your alma mater's rival, Yale under which money is lent to the students and then they will pay back .04 percent for each thousand dollars, for about 28 years or 30 years, no matter what your income is?

Secretary RICHARDSON. Well, as I stated publicly, Mr. Chairman, at the time when Yale announced this experiment, I feel that it is a potentially valuable contribution to the knowledge and experience of a lot of other institutions to see how this works.

As you know, the concept depends basically on the idea that the students who in their future careers are high earners should repay larger amounts to the institution than students whose careers turn out to be ones that do not produce much income.

And the theory, I take it, is therefore that a student is going to be willing to borrow to pay the costs of education, because he won't worry that if he chooses a career that does not produce substantial income, he will be carrying a debt load that he won't be able to manage.

And so we think that it can be helpful to other institutions, particularly to independent institutions, to see how Yale makes out in this. It is a difficult program to design. The determination of what rates of repayment are appropriate for particular income levels, and so on, is almost impossible to figure out satisfactorily in advance.

Senator PELL. But it has one point, I think, in the right direction, over the Zacharias proposal, which is that it gets away from the reverse dowry inherent in that proposal, as I understand it. Would this be correct or not?

Secretary RICHARDSON. Well, there the degree of obligation that you face is a function, really, of what you earn. And in that sense, I think it is basically similar to the Zacharias approach.

CAMPUS UNREST

Senator PELL. Another question, off of today's subject. One of the political reasons attributed to the fact that we didn't move ahead on a higher education bill last year was concern about violence on campuses. I think the record should be straightened out.

My understanding is that there are about 2,800 public institutions of higher learning, and about 700 proprietary institutions, and that the numbers of instances where violence occurred, in the last year, were less than 150. Would that be a correct statement?

Mr. MUIRHEAD. May I respond to that, Mr. Secretary?

That would be a correct statement, and also I should report to you, Senator Pell, that we were operating under a provision in the Higher Education Act that required all institutions to stop financial aid for those students who had been found guilty of violence and disruption. We have made a survey, as you would expect us to, and a report from those institutions shows that nationwide—nationwide—the total number of students who were found, after due process, were found guilty of violence or disruption, according to the provisions of the law, and whose student assistance was removed, totaled about 400. I think this underscores the point that I believe was the thrust of your question, and that is that the student violence and student disruption really occurs only in a small number of institutions, and is participated in only by a very small number of students.

Senator PELL. In the last calendar year, or fiscal year, which are we talking about?

Mr. MUIRHEAD. I am talking now about the last college year, ending last June.

Senator PELL. During the last college year, in the whole United States, there were 400 students who were convicted of acts of violence or impropriety.

Mr. MUIRHEAD. About 400 students who were receiving financial assistance whose financial assistance was removed as a result of being found guilty of violence and disruption.

Senator PELL. And how many incidents of violence were there in the country as a whole?

Mr. MUIRHEAD. I can't recall that figure, but we do have a report which I will be very pleased to share with you for the record, but the total number of instances are much less than most people imagined.

Senator PELL. This is what my belief is, too. Do you have any idea of what the total cost of damage of vandalism, breaking of windows and paint, and things of that sort, including that dreadful bombing incident in the University of Wisconsin would be?

Mr. MUIRHEAD. We do not have that information, Mr. Chairman.

Senator PELL. I think it would be of interest if you gave, again, a rough estimate of the total dollar damage, which I believe is less than people would think. I think many people in the country as a whole have visions of mayhem and violence occurring on every college campus, this is just not so.

Mr. MUIRHEAD. We would be very pleased to provide a report on that, and as much information on that point as we can find.

(The information subsequently supplied follows:)

EDUCATIONAL INSTITUTIONS ACTION

FISCAL YEAR 1969

On the FY 1969 Fiscal Operations Report which covers educational institutions actions under the NDSL, CWS and EOG Programs through June 30, 1969, the following was reported:

1. Three institutions reported action against 63 convicted students under the Higher Education Amendments of 1968, Section 504(a). They were:

   Harvard University
   Wisconsin State University - Oshkosh
   San Bernardino Valley College - California

2. Three institutions reported action against three convicted students under the appropriation act, Section 411. They were:

   Columbia University - N. Y.
   Bluefield State College - W. Va.
   University of California - Davis

3. Five institutions reported 26 actions against students found to have violated college regulations or officials orders under Section 504(b). They were:

   Columbia University
   Cheyncy State College - Pa.
   Belmont Abbey College - N. C.
   Alabama State University
   Wisconsin State University - Oshkosh

4. Another 584 students receiving Federal funds were suspended or expelled by 110 institutions under actions taken in accordance with the institutions' own rules and regulations.

5. Totals: 676 students out of 771,385
   117 colleges and universities out of 2,200 partipating

All participating institutions are required to sign a Terms of Agreement. This terms stipulates that "the Institution shall take such steps as are necessary and appropriate to assure that the financial assistance provided for . . . is not made available to students where prohibited..."

EDUCATIONAL INSTITUTIONS ACTION

FISCAL YEAR 1970

On the FY 1970 Fiscal Operations Report which covers educational institutions actions under the NDSL, CWS, and EOG Programs through June 30, 1970, the following was reported:

1. Two institutions reported action against 17 students under Section 407 of the fiscal year 1970 Appropriations Act for the Department of Health, Education, and Welfare (P.L. 91-204). They were:

   Northeastern University-Mass.
   Virginia Polytechnic Inst. & State Univ.

2. Two institutions reported action against 7 students under Section 411 of the fiscal year 1969 Appropriations Act for the Department of Health, Education, and Welfare (P.L. 90-557). They were:

   Mesa County Jr. College-Colo.
   Va. Polytechnic Inst. & State Univ.

3. Five institutions reported action against 5 students under the Higher Education Amendment of 1968, Section 504(a). They were:

   California State Poly. College-Kellogg-Voorhis
   San Fernando Valley State College
   University of Maryland
   University of Arkon-Ohio
   Wisconsin State University-River Falls

4. Three institutions reported action against 11 students under Section 504(b) of the Higher Education Amendments of 1968. They were:

   Western Michigan University
   Southwest Missouri State College
   Miami University-Ohio

5. Another 315 students receiving Federal funds were suspended or expelled by 72 institutions under actions taken in accordance with the institutions' own rules and regulations.

A total of 355 students had their financial assistance terminated because of Student Unrest.

The U.S. Office of Education does not have information concerning the dollar value of college disorders.

PRINCETON PLAN

Senator PELL. Now, there is one other question, somewhat related to this subject, not directly related to the testimony today, but I would be interested in your views.

You may recall the Princeton plan, which provided the opportunity for students to have 2 or 3 weeks off prior to the election to participate in a campaign. Last year, the students were very excited about this. They came down in droves, and seemed very concerned. And yet, the activity of students in the last election was really a dismal failure. The Princeton plan itself was rather unsuccessful. About 80 percent of the students did not use the time off for political activity, but used it as a vacation, and only half of the 20 percent spent their full time in this form of political activity.

Does the Office of Education have any statistics with regard to the extent of political activity of young people?

Mr. MUIRHEAD. We do not, Mr. Chairman. But we do have, through our regional offices, and through the reports that are made to us from the campuses, some rather, I think, extensive information on the amount of violence and disruption. But, in general, what you have just said, that what started to be a movement that many people thought would become quite popular, turned out to be a movement that was not engaged in very much on university campuses, and on those campuses where it was engaged in, really wasn't directed at the main thrust of involvement in the political campaign.

Senator PELL. I would emphasize the point that when I point out the failure of this plan, I do not reflect on the establishment of it, or the institution. What is reflected upon is the young people themselves, who failed miserably when given the opportunity to participate more fully in our elective process.

Do you have any figures with regard to college programs for getting students registered? Are the colleges making any efforts in this direction? Is there any voter registration section or man working in this field in the Office of Education?

Mr. MUIRHEAD. We do not have anyone assigned in the Office of Education to that particular field, and I don't think that in the records that we do have, the information we have from universities, that we would be able to report whether or not people on campus are engaged in that particular activity.

Senator PELL. I know in my own State, I am very disappointed, because there seems to be no effort as yet to get the many thousands of young people who are there to participate in elections. On the national level, in those States where they can vote between 18 and 21, the record again is dismal.

No reflection on the States, or the establishment. It is a reflection on the young people.

My recollection is that less than a third of those eligible between 21 and 30 take the bother to register and vote.

THEORY OF PROPOSAL

Going back to the direct subject in hand, your statements indicate a very strong emphasis on keeping the cost of education off the national budget. I realize that. This is one of the advantages of a loan program, because you don't have the figures appearing in the budget as you would in a grant program.

Do these budgetary factors play a role in your emphasis on loans over grants?

Secretary RICHARDSON. Yes. It undoubtedly plays some part. In general, though, we think that, so far as loans are concerned, that it is appropriate, and effective, to call upon the private sector.

I could supply here for the record a tabulation showing the extraordinary increase, or extraordinary volume increasing year by year, in guaranteed loans, under the program that started just about 5 years ago. And this tends to indicate that the private capital market is as prepared, given security of principal, to lend to students or to anybody else, and so our answer, in effect, is why not use it?

Mr. MARLAND. May I supplement that, Mr. Secretary?

I think, recalling the chairman's question as to the implications that this proposal tends to lean on loans as distinct from budget items, it should be noted in the record that our budget in 1971 is about point $9 billion. That is, $900 million. Our budget for 1972 will request more than double that, $1.9 billion for higher educational loans.

Now that, I must quickly add, that $1.9 billion will include forward funding, but nonetheless, allowing for the forward funding, there will be a 70-percent increase in the higher education budget line items, which does include, of course, the funding of the student loan association.

NATIONAL STUDENT LOAN ASSOCIATION

Senator PELL. As you know, I have had a somewhat dim view of the idea of this National Student Loan Association. One of the points here is that ultimately the association will be controlled by a board of directors elected by stockholders. There is no real control by either the executive branch of Government or by the Congress, and I am wondering if, as a matter of national policy, there is an argument to be made to the effect that it is a mistake to put such a public trust in an independent board.

Secretary RICHARDSON. Well, this association, Mr. Chairman, would have no authority over who gets loans or in what amount. Its only function is to operate a secondary market. Or to carry on the function of warehousing loans.

As we visualize the operation of the proposed student aid program, it would rely, as I think I tried to emphasize earlier, upon the student assistance office of the college or university itself to determine which students should get loans, versus grants, and what the combination of loans and grants should be.

Beyond that, insofar as it does have responsibilities for polices affecting the operation of the secondary market itself, the proposed National Student Loan Association would be a publicly responsible body, with appointment by the President of seven public members of its board, which would amount to one-third of the board.

Senator PELL. Right. Actually, who would set the interest rates?

Secretary RICHARDSON. The Secretary of the Treasury, Secretary of HEW, and the Director of the NSLA.

Senator PELL. The three of them, so two out of the three could decide what the rate would be. That decision would have an effect in and of itself.

Secretary RICHARDSON. Yes. Well, that is, of course, the ultimate, most fundamental policy decision to be made.

LENDER OF LAST RECOURSE

Senator PELL. Right. In how many of the States is there a lender of last recourse, where, if a student finds that the banks won't take him because his family does not have an account there, or he doesn't look like a good risk, he can turn to.

In many States is there an institution of last recourse?

Secretary RICHARDSON. I do not know. Mr. Muirhead may know.

Mr. MUIRHEAD. But let me respond to your question, first of all, by saying that the proposal that we have before you is directed at making sure that the student would have a loan available. At the present time. under the guaranteed loan program, as you know, Mr. Chairman, a number of States, 35 States, participate in the Federal program, because they have not set up their own guaranteed loan agency.

And this proposal would say, in effect, that there would be funds available, because not only would the lending institutions include the banks, but they would also include the colleges and universities.

And the Secretary, in consultation with the Secretary of the Treasury and the Director of NSLA, would set the volume of loans. So that. once and for all, we would have available credit for providing both the subsidized loans that the Secretary has explained and the guaranteed loans which are intended for those of upper income level.

WAREHOUSING

Senator PELL. If we go ahead and enact our approach, which is the warehousing provision but do not go ahead with the incorporated association, what would be the disadvantage of our approach?

Mr. MUIRHEAD. I think it would be very unfortunate, Mr. Chairman, if we were to have only a warehousing proposal. And now having said that, I think a warehousing proposal is very important. But the warehousing proposal would be more to the advantage of a banking, commercial banker, than it would to a college.

The warehouse, as you know, makes it possible for a commercial lender to put aside for a while loans which he has, with the clear understanding that he will purchase them at a later date.

We are saying that the colleges and universities should be involved in making these loans, and they can't have that difference of saying that they will turn over their capital to a warehouse for a while, and then repurchase at a later date. They don't have that type of resource.

So it seems to me that the warehouse is a very important part of this proposal, to benefit the commercial banks, but the other part of the proposal is crucial to make it possible for NSLA to purchase the loans in order for the colleges and universities to become effective lenders in this program.

Senator PELL. Well, the money is just as green, and worth just as much or just as little, no matter where it is borrowed from. Or how it is borrowed. And I would think the warehousing provision would meet the requirements of the students.

Secretary RICHARDSON. May I add a point to that, Mr. Chairman, Which goes back to discussion we had earlier of the NDEA student loans.

Generally speaking, while we think it is helpful for banks to stand ready to make guaranteed loans to students, on the other hand, we

also think that it makes sense for a college or a university to be able to administer a student assistance program as a whole, looking at the situation of the student, his opportunity to work parttime, if any, his family situation, and to work out with him an appropriate combination of work, grant, and loan. The institution really isn't in a position to do that unless it has loanable funds, and the great contribution of the NDEA student loan program has been that it has put loanable funds into the hands of the institution.

And what we are trying to do here is in effect to assure that the institution will continue to be in that position. And so the opportunity of the institution to unload its own paper on the NSLA is a vital ingredient in this combined approach.

ADMINISTRATION PROGRAM

Senator PELL. In your chart which showed the number of students to be benefitted, you indicated that your proposal would benefit 2½ million youngsters with subsidized programs.

How many of these students in that projection will be receiving loans as opposed to grants?

I think this turned out on the charts that you showed us, but I was wondering if you could translate it into numerical terms for us.

Mr. MUIRHEAD. Yes, the chart which we showed shows that we would increase the number of students from 1.6 to 2.5 million, and the 2.5 million students would receive a combination of loans and grants.

We have, for example, at the present time, a total program for equal opportunity grants, that is, proposed, of 559 million and 760.

Basically, the answer to your question, I think, Mr. Chairman, is that for all students coming from below—and again, I have to say it has to do with the size of the family—for all students coming from below about $8,000 family income, they would be the recipients of a combination of grants and loans.

For students who are eligible for support above the $8,000 and again I am speaking of a family with one child, and it might very well be $9,000 or $10,000, they would basically be supported under the subsidized loan program.

The whole essence of the proposal we have before you is to target the grant funds on low-income students.

Senator PELL. Looking at this chart, one of the effects I dislike is that a student from a poor family, with no family contribution, will still have to start out life with a loan hanging over his head. A small loan, but still a loan.

Mr. MUIRHEAD. I have now before me some figures which I can say with more precision than I did before what the distribution would be of students assisted under the grant provision, and students assisted under the subsidized loans.

We would expect that of the 2.5 million students assisted as a whole, that about 1.1 million would be receiving grants. And that about 2.5 million would be receiving subsidized loans, because all students would be eligible for subsidized loans.

Senator PELL. Right. I think this is a very important point to be emphasized, that all students would, no matter from what financial circumstances they came, would, when they finished college, if this

60-433 O—71—pt. 1——40

program of yours was enacted, have a loan hanging over them. Would that be a correct statement?

Mr. MUIRHEAD. That is a fair statement, but I think it is quite fair to point out that the student from the lowest income family would have the assistance which he received would be predominantly from grants rather than loans.

EFFECT OF PRESENT PROGRAMS

Senator PELL. Now if the presently authorized programs, were fully funded, how many students would be helped? 2.5 million would be helped under your proposals, if fully funded. How many would be helped under present programs, fully funded?

Mr. MUIRHEAD. Well, we are now supporting 1.6 under the program. But they are not funded at the authorized level. We have not computed the figures as to how many students would be assisted, if they were funded at the authorized level.

Senator PELL. Would you do that, just run through it through the computer and send us that figure?

Mr. MUIRHEAD. We would be very pleased to do so.

(The information subsequently supplied follows:)

STUDENT AID

The following table illustrates the estimated number of students who would be aided under existing student aid programs if such programs were funded at the FY 71 authorization levels:

	Authorization (Dollars in millions)	Number of Students Aided
National Defense Student Loan	$375	781,000
Educational Opportunity Grant	273	456,000
College Work-Study	320	749,000
Guaranteed Student Loan	---	1,246,000 1/

The above table reflects duplicated benefits; i.e., a student may be receiving both a EOG and Work-Study payments and would be included in the totals for both of these programs. It is estimated that the unduplicated total for all of these programs would be approximately 2,370,000 students.

1/ No authorization level in the law--number of students based on demand.

GUARANTEED LOAN PROGRAM

Senator PELL. Thank you.

Now in one of these charts, you predicted that the number of persons receiving unsubsidized guaranteed loans would increase from 25,000, 40-fold to a million. Isn't the reason for this increase the result of dropping the subsidy?

Mr. MUIRHEAD. I am not quite sure that I understand the question.

Senator PELL. In other words, the reason it goes up from 25,000 to a million is because you have dropped the subsidy that you had before?

Mr. MUIRHEAD. Yes; but we are not dropping the subsidy for the subsidized loans. We are—if I understand your question correctly—we are providing NDEA loans at four times the level.

BUDGET FIGURES

Senator PELL. Right. Now I understand that none of the figures that you have been using are in the bill that you submitted.

To put it another way, the bill that you submitted does not contain the figures that we have been using in this discussion. The bill simply asks Congress to give HEW the authority to carry out a grant program, and you are now telling us the policy you will use if we passed the bill, in the 1971–72 years.

Since you are asking for this open-ended, discretionary authority for 5 years, will you give us a comparable policy with numbers of students involved and cost estimates for the succeeding 4 years?

Because we have just been talking about 1 year here.

Mr. MUIRHEAD. Yes; we will provide you a 5-year projection for the proposed legislation.

Senator PELL. Right.

And if we should for some reason adopt the philosophy of your proposal, with the emphasis on loans, I suspect that some members of our committee will want to study the dollar figures and will want to write those figures into the legislation, as a matter or policy, rather than leaving it up entirely to the Department.

This is up to us to thrash out in executive session.

I have a couple more questions that I will submit for the record, and we would hope that you will furnish replies for the record.

(The information to be supplied follows:)

ADDITIONAL QUESTIONS SUBMITTED TO PETER MUIRHEAD OF THE U.S. OFFICE OF EDUCATION WITH RESPONSES

Question:

Section 404(b) of the General Education Provisions Act requires that HEW submit to the Legislative Committees and the Appropriations Committees a comprehensive and detailed review and evaluation of education programs. The report is to be submitted in the year prior to the expiration of the authorization of the appropriations for the program concerned. This report was intended to serve as the basis for the Administration's legislative proposal. In the case of higher education, the report was due last year. Has that report been submitted?

Since the Administration is proposing a major revision of the College Library Program and the Higher Education Facilities Act, and the repeal of many others, it would be helpful if the evaluation report were submitted to the Committee even if they are late. The evaluations must be the basis upon which the Administration rests its proposals.

Answer:

Separate reports on Title II, HEA and the HEFA have not been prepared. As you know, P.L. 91-230 extended the requirement for such reports to all applicable programs, rather than just programs authorized by the HEA of 65, the HEFA and NDEA. In order to economize on the expenses which are incurred in preparing a number of separate reports, the Office of Education plans to submit all such evaluation reports at once. This project is currently underway; however, we estimate that it will be several months before such a report is ready for transmittal to the Congress.

Substantial money for evaluation of education programs did not become available until late in FY 1970, when $9.5 million for these purposes was provided by final appropriations action in the closing months of the fiscal year. With these funds, some fifty planning and evaluation studies were initiated.

A report listing these studies was submitted to Congress on July 31, 1970. Begun just a year ago, they are still in progress, and significant results from most of them will be coming in during the summer of 1971. As a result, we have been unable to communicate their findings to Congress to date.

The Office of Education believes very strongly that our knowledge of the effectiveness of education programs is inadequate, and we are attempting to move as vigorously as possible to provide this knowledge. Because our first wave of serious evaluation studies was only in midstream in January of 1971, we have not been able to supply the specified report.

Question:

(a) The student aid proposal also contains a cost-of-instruction allowance for institutions. What is the average cost of instruction for undergraduate students in colleges? By cost of instruction, I mean the costs directly related to instruction, not capital investment, graduate schools, or research.

Answer:

The Office of Education's National Center for Educational Statistics shows the following average educational and general expenditures per student in academic year 1967-68:

PER STUDENT EDUCATIONAL & GENERAL EXPENDITURES
1967-68

All Institutions	$1,905
Public Institutions	1,702
Universities	2,814
Other 4-Year	1,252
Two-Year	677
Private Institutions	
Universities	3,771
Other 4-Year	1,725
Two-Year	1,020

Educational and general expenditures include expenditures for instruction and departmental research, extension and public service, libraries, plant maintenance and operation, general administration, organized activities related to educational departments, organized research, other sponsored programs. Excluded are expenditures for student aid, auxiliary enterprises, and current funds expended for physical plant assets.

It should be noted that expenditures for research are included in this definition primarily because national data excluding these activities are not available at this time. However, because most of the research efforts of institutions contribute substantially to the quality of the educational offerings, it is felt that the inclusion of research expenditures in instructional costs is valid. In addition, it is not possible to separate instructional costs for undergraduate and graduate education since the staffs, facilities and other expenses are jointly used on most campuses for both graduate and undergraduate education and since most institutions cannot provide separate expenditure data for these categories.

These educational expenditures shown above have been projected to academic year 1970-71 by using a growth rate based on past increases in educational expenditures and in enrollments within each of the various types of institutions:

ESTIMATED PER STUDENT EDUCATIONAL AND GENERAL EXPENDITURES
1970-71

All Institutions	$2,197
Public Institutions	1,920
Universities	3,220
Other 4-Year	1,424
Two-Year	794
Private Institutions	2,871
Universities	4,645
Other 4-Year	2,077
Two-Year	1,125

Educational expenditures per student tend to be higher in private institutions than in public institutions for a number of reasons. Many private colleges pay higher salaries to faculty and administrators than public institutions of higher education. Pupil-teacher ratios tend to be lower. Since private institutions tend to enroll fewer students than public institutions, there is a higher cost-per-student in the provision of equivalent services.

Question:

(b) If we decide to enact a cost-of-instruction allowance proposal, what type of approach would you suggest that would pay solely the cost of instruction, and would stop increases in tuition charges?

Answer:

As we indicated earlier, the Department of Health, Education, and Welfare is indeed aware of the financial difficulties facing many of our colleges and we are presently studying the magnitude of, and various approaches to meeting this problem. We expect to issue a statement concerning financial assistance to institutions of higher education in the near future.

Question:

The core of the Administration proposal is the National Student Loan Association. Ultimately, that Association will be controlled by a Board of Directors elected by the stockholders—with no real control by either the executive branch or the Congress. Should we, as a national policy, place the control of student assistance so far from public influences and from influence by the beneficiaries—the students?

Answer:

Section 443 of the proposed new Part D of title IV of the Higher Education Act of 1965 provides for the establishment of the Board of Directors of the NSLA and specifically requires that seven of the twenty-one members of the interim Board appointed by the President shall be representative of the general public. When in the President's judgment sufficient common stock of the Association has been purchased, stockholders which are eligible institutions of higher education shall elect seven Board members and stockholders which are lenders shall elect seven. The President shall appoint the remaining seven members. Elected members shall serve terms ending on the date of the next annual meeting of the common stockholders; appointed members shall serve at the pleasure of the President.

We feel that the diverse membership of the Board will adequately insure representation of the public interest in the decisions made by NSLA. However, it must be stressed that creation of NSLA will in no way "place the control of student assistance" in the Association. NSLA would merely be a private corporation financed by private capital, to serve as a secondary market for student loans insured under part C of title IV and to provide liquidity for those who make such loans. Control of student grant, work-study, and subsidized loan programs would remain with the financial aid officers of institutions of higher education, the Office of Education, and the Congress.

Supply a cost estimate of the Basic Educational Opportunity Grant proposal in section 142 of S. 659. Include the number of students which would be assisted and the various income levels of the families of those students. Note that the proposed section 402(a)(2)(A) of the Higher Education Act of 1965 uses the term "the amount of the tax imposed" rather than the amount of tax paid. Also, separate the estimated cost of grants to students from that of cost-of-instruction allowances in the proposed section 409. State assumptions.

COST ESTIMATES
S-659
EDUCATION AMENDMENTS OF 1971 STUDENT AID PROVISIONS

The funding projections described below are based on the assumption that the new student financial aid program will support all students who are eligible, as determined by the annual family income tax imposed in relation to the maximum grant of $1,200. The following calculations were made in order to ascertain the total number of eligible students, the grants to be received by students, and the total costs of the program.

I. Determination of Eligible Students

Department of Health,Education,and Welfare data indicate that the income distribution by quartile for full-time undergraduate students in both degree credit and vocational education for academic year 1971-1972 will be as follows:

INCOME DISTRIBUTION BY QUARTILE OF UNDERGRADUATE STUDENTS
ACADEMIC YEAR 1971-72

Income Quartile	Number of Students
1st (low)	1,040,000
2nd	1,090,000
3rd	1,585,000
4th high	2,085,000
	5,800,000

Since the data available for tax paid by families is in the form of income ranges, the above students by income quartile have been distributed by family income according to the latest 1969 Census median income groupings. The legislative proposal states that anyone eligible for a grant of less than $200 would not receive an award. Since the tax rates indicate that most students coming from families with incomes above $10,000 would receive

less than $200, the students falling into these income groups have not been included in the following table:

INCOME DISTRIBUTION OF ELIGIBLE STUDENTS
ACADEMIC YEAR 1971-72

Family Income	Number of Students (Rounded)
0 - $ 3,000 (25% of 1st quartile)	260,000
3 - 6,000 (75% of 1st quartile)	780,000
6 - 9,000 (90% of 2nd quartile)	980,000
9 - 10,000 (10% of 2nd quartile + 10% of 3rd quartile)	270,000
Total Eligible Students	2,290,000

It should be noted that these estimates are based on the assumption that the mix of dependent and independent students enrolled in postsecondary education will not change as a result of the proposed program.

II. Estimated costs for Basic Grants

The following assumptions have been made in order to produce an illustrative support schedule for students eligible for grants under this bill. As defined in the bill, eligible students would receive a basic opportunity grant of $1,200, less the amount of tax paid by their parents or themselves. Students in extreme financial need are also eligible for supplemental grants which would be the lesser of $1,000 or half of the sum of other financial aid received by the student. Students eligible for a grant of less than $200 would not receive an award.

For the basic grant portion of the bill, it is assumed that the average family has two parents and two children. The amount of each basic grant is calculated from the 1970 College Scholarship Service tax tables. The following table shows the average tax paid by such families in each income category and estimates the average grant for which students from these families would be eligible.

AVERAGE TAXES AND BASIC GRANTS BY FAMILY INCOME
ACADEMIC YEAR 1971

Family Income	Average Tax	Average Grant
0 - $ 3,000	$ 0	$1,200
3 - 6,000	219	981
6 - 9,000	647	553
9 - 10,000	977	223
10,000 +	1,130	0

The next table shows the number of eligible students in each income category and multiplies them times the average grants in each category to arrive at the total costs of the basic grant portion of this bill.

TOTAL COSTS OF BASIC GRANT PORTION BY INCOME LEVELS
ACADEMIC YEAR 1971-72

Family Income	1971 Number of Eligible Students	Volume of Basic Grants--1971 ($ in thousands)
0 - $ 3,000	260,000	$ 312,000
3 - 6,000	780,000	765,000
6 - 9,000	980,000	542,000
9 - 10,000	270,000	60,000
TOTAL	2,290,000	$1,679,000

III. Estimated Costs for Supplemental Grants

For the supplemental grant portion of this bill, it is assumed that students in extreme financial need can be defined as those coming from families of $6,000 annual income or less. It is also assumed that total tuition, room and board costs for 1971 will average $1,335 for all types of public institutions and $2,913 for all types of private institutions. (These costs are based on a 7% increase over the NCES projected costs for academic year 1970, with 7% being assumed as a reasonable annual rate of increase in costs.)

The following table is based on the assumption (derived from NCES projections) that 73% of the eligible students in 1971 will attend public institutions and that 27% will attend private institutions. The table shows the number of students in the two income categories eligible for these supplemental grants which will be attending public and private higher education institutions.

ELIGIBLE STUDENTS ATTENDING PUBLIC AND PRIVATE INSTITUTIONS
ACADEMIC YEAR 1971

Family Income	Number of Eligible Students	Students Attending Public Institutions	Students Attending Private Institutions
0 - $3,000	270,000	197,000	73,000
3 - 6,000	780,000	569,000	211,000

The support schedule for these supplemental grants to students in extreme financial need assumes some packaging of financial aid which would include some mix of the student's basic grant, College Work-Study program support, State, local, and institutional scholarships, as well as loans. (It should be noted that this bill continues the support under the existing College Work-Study, National Defense Student Loan, and Guaranteed Loan programs.) These financial aid packages would be matched to the cost for each student to attend a public or private higher education institution.

The following examples show the assumed student financial aid packages by income categories for attendance at either public or private institutions.

1. Student from the 0 - $3,000 income category attending a public institution (cost = $1,335)

$1,200 - basic grant
135 - other financial aid from all sources
0 - supplemental grant
1,335

In this case no supplemental grant would be given since the bill states that no supplemental grant can be less than $200, which would be more than this student would need to meet his costs.

2. Student from the 0 - $3,000 income category attending a private institution (cost = $2,913)

$1,200	- basic grant
813	- other financial aid from all sources
900	- supplemental grant
$2,913	

3. Student from the $3,000 - $6,000 income category attending a public institution (cost = $1,335)

$981	- basic grant
354	- other financial aid from all sources
0	- supplemental grant
$1,335	

Again in this case, no supplemental grant would be awarded because the bill requires that the supplemental grant must be the lesser of $1,000 of half the amount of other financial aid. In this case, then, the supplemental would have to be less than $200 and would not be awarded.

4. Student from the $3,000 - $6,000 income category attending a private institution (cost = $2,913)

$981	- basic grant
982	- other financial aid from all sources
950	- supplemental grant
$2,913	

The following table takes the numbers of eligible students in the 0 - $3,000 and $3,000 - $6,000 income categories and multiplies them times the assumed supplemental grants shown in the examples above to arrive at the total costs of the supplemental grant portion of this bill.

60-433 O - 71 - pt. 1 -- 41

TOTAL COSTS OF SUPPLEMENTAL GRANT PORTION BY INCOME LEVELS
ACADEMIC YEAR 1971

Family Income	Attending Public Inst. Number	Attending Public Inst. Total Grant Cost ($ in thousands)	Attending Private Inst. Number	Attending Private Inst. Total Grant Cost ($ in thousands)
0 - $3,000	197,000	0	73,000	$ 66,000
3-- 6,000	569,000	0	211,000	200,000

Total Supplemental Grant Program Cost = $266,000

IV. Continuation of Existing Federal Student Financial Aid Programs

The proposal continues the National Defense Student Loan program at a level of $375 million, the College Work-Study program at $250 million and the Guaranteed Loan program which is assumed to cost a total of $160 million in interest charges to the Federal government in 1971. It is estimated that approximately 1.0 million students who would not be receiving Basic Educational Opportunity Grants will be assisted under these programs. Academic year 1971 costs - $785,000.

V. Cost of Instruction Allowances

Under the proposal a cost of instruction allowance of $1,200 less the tuition charged to a student would be paid to the institution for each student who is a recipient of a Basic Educational Opportunity Grant. In order to arrive at cost estimates for this section of the proposal, the tuition and fees costs at public institutions is estimated to be $349 per student, while at private institutions such costs would average $1,664 per student. It is also assumed that 73 percent of the Basic Grant recipients will attend public institutions. Only public institutions would receive these allowances (an average of $851 per student) since

private institutions charge more than $1,200 tuition on the average. It is also assumed that institutions would not waive tuition and fees for the Basic Grant recipients in order to receive such awards.

Multiplying the average cost of instruction allowance for public institutions by the number of eligible students in such institutions would result in the following costs for this portion of the proposal:

Total Costs - Cost of Instruction Allowances $1,423,000

TOTAL COSTS ($ in thousands)

Adding the costs for each of the student aid provisions in S-659 will result in the following total Federal support levels:

Costs of Basic Educational Opportunity Grants	$1,679,000
Costs of Supplemental Grants	266,000
Costs of Continuing Existing Programs	785,000
Costs of Instructional Allowances	1,423,000
TOTAL	4,153,000

Amendment Number 85, proposed by Mr. Pell, would amend the "Cost of Instruction Allowances" section to read:

> SECTION 409. In addition to the amounts paid to institutions for supplementary grants, the Commissioner shall pay to each eligible institution a cost of instruction allowance for each student in attendance at such institution who is a recipient of a grant under this part. No cost of instruction allowances paid under this section shall exceed $1,000.

This language would apparently leave the amount of any individual cost of instruction allowance to the discretion of the Commissioner, and therefore is incapable of being definitively costed out. However, if one assumes a flat $1,000 per student cost of instruction allowance and the same 2.29 million student recipients of basic grants, the cost of the revised proposal would be $2.29 billion

Question:

As I said earlier, the text of the Administration bill did not reach the Education Subcommittee until yesterday; therefore, specific questions on that bill are not possible. However, I would like to ask questions on the primary bill before the Subcommittee, S. 659, the "Education Amendments of 1971," and discuss the testimony you have offered this morning only in general terms. More detailed requests for information will be submitted in writing at a later date. What is your opinion of an across-the-board student grant program such as the one proposed as the "Basic Educational Opportunity Grant" in section 142 of the bill I am sponsoring, S. 659?

Answer:

We find a number of serious defects in the Basic Educational Opportunity Grant program proposed by S. 659:

1. Reliance on the amount of tax imposed on the student or his parents is not a measure of the family's ability to contribute toward the student's education.

A. Middle- and upper-income families with some sophistication in dealing with tax matters could emancipate their college-age children at little tax loss to the family, in comparison with the $1,200 basic grant to which the student would be entitled. Lower-income families, whose children cannot afford to go away to school, would be unable to effect such emancipation. The result would be lower grants for students from low-income families.

B. A system based on tax imposed does not take into account the family's assets, which have a direct bearing on the amount a family is able to contribute for higher education.

C. The system does not include any unusual but necessary family expenses, unless such expenses can be classified as tax deductions. Such expenses would, however, affect the family's ability to contribute toward college costs.

D. Under present tax legislation, certain types of income, such as State and local bond interest, are exempt from Federal taxation. Primarily for economic reasons, capital gains are taxed at 50 percent of the rate imposed on income from wages. Certain fringe benefits are excluded from taxable income. All of these would affect the ability of a family to contribute to their child's higher education, but would not be reflected in the amount of a Basic Educational Opportunity Grant.

E. Under existing tax laws, certain persons with high incomes incur very little or no tax liability. As a result, students from these families would be eligible for Federal support.

2. The information furnished on individual income tax returns is generally considered to be confidential.

A. Many families have a strong reluctance to divulge infor ation which they have submitted to the Internal Revenue Service. This reluctance could cost needy students Federal aid.

B. Some are concerned that release of such information will prejudice their position with the Internal Revenue Service in future years. They may look upon it as an attempt to audit their tax return.

C. Others may see the inquiry as a way of verifying information that they have given to other agencies, such as the welfare department, and may be concerned that disclosure of the information may affect the benefits that they are receiving.

3. The tax imposed on a student or his family for the prior year could be irrelevant to the student's resources for the school year for which aid

is sought. Financial aid applications received in the spring, for awards to be made in September, will be based on information for the year ending the preceding December. In some cases significant changes in family circumstances will have occurred and the contribution that would be calculated would be unfair to the family or to the college.

4. The cost of the proposal is staggering. Estimates show the total costs of the Basic Grant portion alone to amount to $1.7 billion for academic year 1971-72.

A. These projections assume that no basic grants will be made to families with incomes above $10,000, since their taxes exceed $1,200. However, if upper income families elect to emancipate their college-age children, the cost of providing $1,200 grants to such student would have to be added to the cost estimates.

B. The projections also assume a minimum grant of $200. The legislation provides for no such minimum, unless appropriations are inadequate to fund all grants fully. Presuming full funding, the cost could be vastly increased, as several million more students became eligible for insignificant amounts of Basic Grant money.

C. The cost of the Basic Grant program cannot be looked at in a vacuum, since Supplemental Grants and Cost of Instruction Allowances hinge on receipt of a Basic Grant. The Supplemental Grant program has been estimated to cost $266 million. The Cost of Instruction Allowance provision, if retained at the level of $1,200 less tuition charged, could cost approximately $1.4 billion. If the Cost of Instruction Allowance provision is amended to authorize a grant of up to $1000 for each

student aided, it could cost nearly $2.3 billion. Therefore, the total cost of the proposal is approximately $4.153 billion (if the Cost of Instruction Allowance is not amended); if the amendment is adopted, the proposal would cost more than $5 billion.

5. The proposal makes a promise that will probably not be fulfilled. Initial Educational Opportunity Grants have been funded at a level of less than 40 percent in recent years. There is little likelihood that the funding levels contemplated in S. 659 could be attained, so its primary impact could be to raise expectations which must be unrealized.

6. The provision limits eligibility to full-time students. No allowance is made for part-time students or for students who wish to drop out of college for a period of time but retain their eligibility for aid. The "academic lock-step" would be preserved, at the expense of flexibility of access to higher education. We are examining our own proposal on this point.

7. The average age of a student in a community college is 25; many of these students have dependents of their own. Pinning eligibility for financial aid on taxes imposed on these students could cause additional complications which we cannot measure at this time.

8. It would be possible for a student to make a profit on the Basic Educational Opportunity Grant program, if he enrolled in an institution whose costs were less than $1,200. The amount of the grant is not dependent on the cost of higher education to the student.

A. In 1968-69, the total basic student charges for male undergraduates who were State residents were, at the median institution, $1,058.

B. In two-year institutions, the median charge was only $941.

9. New section 402 of S. 659 limits eligibility for Basic Education Opportunity Grants to students "in good standing at an institution of higher education." This would appear to exclude entering freshmen who have not yet attained academic standing. Current legislation also makes students "accepted for enrollment as a full-time student at such institution" eligible for grant assistance.

10. The program appears to contemplate a direct grant from the Commissioner of Education to each eligible student, rather than a program channeled through financial aid offices in institutions of higher education.

A. If 2.3 million students could be eligible for Basic Grants (presuming a $200 minimum and no resort to the device of emancipation), the paperwork required of the Office of Education merely to issue checks would be staggering.

B. If no minimum grant were set by legislation, the check-writing operation could achieve even vaster proportions.

C. To verify the amount of tax imposed upon parents of applicants, a system would have to be developed within the Treasury Department. Another costly and cumbersome new bureaucracy would be developed. It is impossible to project the total cost to the Federal Government of implementing such a proposal.

11. The total cost of S. 659 is estimated to be in excess of $7 billion. At a funding level even approaching that figure it is very likely that other education programs, particularly those in elementary and secondary education, would have to be correspondingly reduced.

Question:

I note that you have submitted a brief section-by-section description of your bill; however, neither the description nor the testimony provide a detailed justification of the many amendments you are recommending. Please supply a section-by-section justification of the bill.

Sectional
Justification of
S. 1123

Title I - Amendments to Title I, HEA

Sections 101 and 102 extend existing Title I HEA authorities through FY 1973. Because HEW is reviewing the place of categorical programs such as this in the context of the broader Federal role in higher education, a two-year extension is requested at this time.

Title II - Amendments to Title II, HEA

Sections 201 and 202 extend and amend existing programs under Part A of Title II. These sections would amend Part A programs by increasing the proportion of funds targeted on special purpose grants by reducing basic and supplemental grants from seventy-five to fifty percent of the sums appropriated for Part A. This would continue the redirection of the Title II program which has already been begun administratively, concentrating grant funds in those higher education institutions in critical financial need. These include developing institutions, junior and community colleges, and those institutions with a high proportion of disadvantaged students. The Administration recognizes the fact that funds under the College Library Resources Program have assisted many institutions in improving their library resources. The time has come, however, to marshall support in those institutions in direst need. The proposed amendments would do this.

The remaining fifty percent available for special purpose grants would Provide more assistance for:

—institutions or their branches which demonstrate a special need for additional library resources;

—institutions or their branches which can meet special national or regional needs in library or information science; and

—combinations of institutions which need special assistance in establishing and strengthening joint-use facilities. It is felt that a greater concentration of Federal assistance in such institutions will help to assure that the resources devoted to library materials will have the greatest impact on the quality of post-secondary education in this country. Again, since HEW is reviewing

the place of categorical programs such as this, a two-year extension is being requested.

Sections 203 and 204 amend Part B programs in two ways. First, in order to coordinate the training of library professionals with other education professions training activities, an amendment is proposed to transfer Part B training activities to Title V, HEA. Second, it is proposed to repeal the research and demonstration component of Part B. This authority merely duplicates more general authority contained in the Cooperative Research Act.

Section 205 would repeal Part C, which allows the transfer of HEW funds to the Library of Congress for the Library's use in acquiring valuable materials and in preparing cataloging information. The Office of Education merely acts as a conduit for these funds at the present time. This vital function will be continued more appropriately under the budget authority of the Library of Congress.

Section 206 makes a conforming amendment to the heading of Title II and section 207 makes the amendments made by Title II of the bill effective July 1, 1971.

Title III - Amendments to Title III, HEA

Sections 301 - 303 extend and amend Title III of the HEA. Two amendments to existing law are proposed.

First, the existing limitation on participation by institutions which have been in existence for less than five years would be removed for institutions which offer less than the bachelor's degree. This change would allow new community colleges, which are being established at the rate of 60 a year, to receive funds promptly under Title III. Such institutions would, of course, be funded under the existing set-aside of 23 percent for two-year colleges.

Second, it is proposed to amend the professors emeritus program to allow professors emeritus from developing institutions to participate in the program. The Office of Education has found that these faculty members often understand the unique problems of students at developing institutions much better than retired faculty from more traditional schools.

Title IV--Amendments to Title IV, HEA

Present Programs: Description and Problems

The Office of Education presently administers four major programs for aiding students: Educational Opportunity Grants, the College Work-Study program, National Defense Student Loans and Guaranteed Loans.

The first three programs are mainly funded by the Federal Government and administered by colleges and universities. The amount of funds available to the institution for these programs depends on the total funds appropriated by Congress, State distribution formulas and the approval of regional review panels. Once the college has its various allocations, the student aid office determines what mix of grants, work-study payments and loans is appropriate for each individual eligible student.

Commercial lending institutions, primarily banks, operate the Guaranteed Loan programs. Loans are made at a maximum interest rate of 7 percent to the student. The Federal Government guarantees the loans against default, pays the student's interest on subsidized loans while he is in college and makes a special payment to lenders during tight money conditions. There are several problems with this system of student aid:

- Availability of funds--Allocation formulas, matching requirements and insufficient funds limit the aid which institutions can award to individual students. Colleges enrolling large numbers of disadvantaged students are in an especially difficult position because of the matching requirements, 20 percent in the College Work-Study Program and 10 percent in the National Defense Student Loan Program.

- Limited loan funds--Existing loan programs provide an inadequate volume of lendable funds because (a) the National Defense Student Loan program requires capital outlays from the Federal budget which has been under severe fiscal pressures and restraints for the last several years; and (b) students must compete with other borrowers (who often offer more profitable investment opportunities) for the lendable funds of banks under the Guaranteed Loan program. (Low-income students with limited bank connections sometimes find themselves at a particular disadvantage.)
- Open-ended expenditures--The Federal Government is obligated to meet its commitment to pay the interest on subsidized Guaranteed Loans while students are in college. As interest rates rise, and as more and more middle and upper income families find it in their interest to take advantage of these subsidies, a larger and larger share of Federal funds for student aid is being diverted away from the most needy students. The system as a whole has a built-in tendency to become less progressive as these subsidies absorb a disproportionate part of any budget increase for student aid.
- Uncertainty--A student who wants to go to college cannot tell where he can get aid or how much he can count on in advance of his admission and the particular student aid office determination. Nor can a bank assure the student in advance that it will have funds to lend him.
- Inequitable distribution--Federal funds do not necessarily go to those students who need them most. Moreover, different colleges assess need in different ways. Substantial subsidies go to middle and upper income students, especially under the Guaranteed Loan program.

Section 401 of the bill makes several conforming amendments which are necessary because of amendments in later sections and amends the existing Part A of Title IV (dealing with EOG's) by replacing it with a new Part A "General Provisions for Student Assistance, Findings and Statement of Purpose." The provisions of this new Part A are designed to assure (1) that EOG's, work-study payments and subsidized loans are made available to neediest students first; and (2) that students with equal need are treated alike. The provisions of Part A would also provide a reliable basis for students to ascertain their eligibility for student assistance.

Section 402 of the bill is a conforming amendment.

Section 403 adds a new Part B "Educational Opportunity Grants and Work-Study Payments" to Title IV. (Existing Part B is redesignated as Part C by section 401). This new Part B combines the authorities for EOG's and work-study programs in an attempt to insure that the use of both forms of subsidized grant programs, as well as subsidized loans authorized by Title IV, will be coordinated by student aid officers as they make awards to students.

Section 404 provides for an effective date of July 1, 1971, for sections 401 - 403.

Section 405 - 413 amend the existing student loan programs under Title IV, HEA and Title II, NDEA. Taken together, these sections would have the following effect:

Subsidized loans: Subsidized loans would be available to those students with the greatest unmet financial need, as would EOG's and work-study payments. The objective of this emphasis is to use limited Federal

funds in a manner which will meet the needs of those students who have the least possibility of securing funds from other sources.

Existing cancellation provisions would be repealed in order to conserve capital funds in the NDEA revolving fund.

The repayment period for subsidized loans would be extended to twenty years, at the student's option. This would allow students to borrow with minimum fear that annual repayment amounts would be too burdensome.

Insured Loans. These loans would continue to be made, but Federal interest subsidy payments would not be made on these loans, since borrowers under this program would be primarily from families which could afford to contribute in a major way towards the student's educational expenses.

The maximum amount which could be borrowed would be increased and the repayment period for such loans would be extended at the borrower's option. These amendments are made in part as a recognition of the increased costs of attending an institution of higher education today. The extended repayment period would allow a borrower to more easily meet annual repayments.

Section 420 establishes a National Student Loan Association to act as a secondary market and warehousing mechanism for student loan paper. Such an agency is necessary in order to increase the amount of resources available for both subsidized and unsubsidized loans. By offering lending institutions (banks, colleges, and other eligible lenders) a source of liquidity, the NSLA will significantly increase the flow of funds into the student loan market. In periods of extremely tight credit, such an institution is absolutely necessary in order to assure continued participation by lenders.

Section 421 makes conforming amendments.

Section 422 would exempt loans made under Title II, NDEA or Title IV, HEA from the Truth in Lending Act. This amendment is proposed in order to relieve smaller lenders (particularly colleges) under these programs from the burden of paperwork which the Truth in Lending Act imposes. Borrowers are already adequately protected since (1) all loans are made under uniform federally established terms; and (2) the prommissary notes for loans under both programs already must contain information concerning interest rates and repayment provisions.

Section 423 sets July 1, 1971 as the effective date for sections 420 - 422.

Section 430 adds a new Part E "Identifying Qualified Low-Income Students; Preparing Them for Postsecondary Education; Special Services for Such Students in Institutions of Higher Education" to Title IV. This section would consolidate Talent Search, Upward Bound, and Special Services for Disadvantaged Students programs currently authorized under section 408 of the HEA. This consolidation is proposed for the following reasons:

1. To permit a greater coordination and uniformity in program planning, development, and operations than the present enabling legislation. Given the unevenness in the funding of the three separate programs, the new proposal is intended to permit the Office of Education to allocate sufficient funds for maximum effectiveness to the target population, and to take into consideration the varied needs of the different geographic locations that must be served.

The current programs tend to have a definite focus, and a definite target description that does not permit latitude of interpretation so that one or more services of each program might be made available to a

wider population. For instance, the student who only needs the tutorial aspects of Upward Bound without its summer residential program is currently excluded from participation. Both Talent Search and Upward Bound Project Directors often interview the same student, who, because he or she does not need all of the services of the separate programs, tends to be excluded from final participation in either program. Rather than a smattering of "limited" services, the new legislation would allow the Office of Education to focus its services in a more direct, systematic and flexible way.

2. The proposed legislation would also provide a more flexible approach to the specific needs of the target population by permitting the Office of Education to coordinate services with other government programs. The amendment would allow more extensive coordination with the student financial aid programs. It has become increasingly clear that the Office of Education must provide not only an access to postsecondary education for low-income and minority students but also the financial support to reach postsecondary goals. To achieve this objective, coordination becomes crucial not only with financial aid, but with Model Cities programs, Career Opportunity Programs, Adult Vocational and Basic Education, and with programs for returning veterans.

3. This amendment would permit improved utilization of the professional manpower of staff by allowing the staff to focus its considerable talent on the needs of the target population without regard to existing program limitations.

Program management would be greatly improved, by coordinating the field monitoring of Upward Bound and Special Services Programs under the same professional individuals. This would be especially true where both of

these programs operate on the same campus. Similarly, coordination at the Washington level should have a beneficial impact at the local level. Rather than three separate project directors in a given locality, one director with qualified assistants could offer the variety of services that the amendment anticipates. There is no difference between a Talent Search counselor and one in Upward Bound. Not only would a more effective utilization of staff at the local level reduce administrative costs, but coordination of services would have the same impact. Funds presently diverted into high overhead and administrative costs can be utilized for more program needs, and a larger number of students can be served as a result of this economy.

Section 431 provides that amendments made by section 430 are to become effective July 1, 1971.

Title V - Amendments to Title V, HEA
(Education Professions Development Act)

Section 501 extends the authorizations for the National Advisory Council on Education Professions Development and for programs under Part A of Title V for five years.

Section 510 extends the Teacher Corps authority for five years.

Section 520 extends the authority for programs for attracting and qualifying teachers to meet critical teacher shortages under Part B(2) of title V for five years.

Section 521 amends Part B(2) of title V by adding authority for (1) programs to employ high school and college students as tutors or institutional assistants for educationally disadvantaged children; and (2) to provide necessary training to teachers to enable them to teach other grades or subjects in which shortages exist.

At the present time tutors, typically selected by College Opportunity Program project directors from high school and college students, to tutor other disdavantaged children cannot be compensated for their services or even for expenses involving their services under EPDA, since the tutors themselves are not necessarily training to be teachers. Elaborate arrangements have had to be made with the Neighborhood Youth Corps in order to arrange for compensation. Experience to date indicates that youth-tutoring-youth programs are an effective means of attracting and involving low-income students in the educational process and of improving the learning capabilities of both the tutor and tutee. We feel that the program would be more effectively administered if authority to minimally compensate tutors (who often come from low-income homes and cannot even afford bus fares) were included in EPDA.

Current legislation allows the recruitment and training of people who have never been, or who are not now, employed in the schools. The State grant program was designed as a means of attracting people to the field of education, particularly in critical shortage areas. However, there is now a national surplus of teachers, and many States would prefer to use Federal funds to retrain teachers already employed to meet shortages rather than recruiting new personnel. This amendment would allow States to use funds in this manner. It was recommended by the Advisory Committee for the State Grants Program.

Section 522 reduces the minimum State allotment under B(2) from $100,000 to $50,000. This action is proposed in conjunction with a decrease in the appropriations request from $15,000,000 to $8,000,000 because of the general surplus of available trained teaching personnel and the desire of many States to retrain existing faculty, rather than attracting new teachers.

Section 523 makes conforming amendments and raises the maximum amount which a State may spend for administration of the State plan from 3 percent of the State's allocation to 5 percent or $20,000, whichever is greater. This amendment is proposed because the 3 percent figure has proven to be insufficient for most States to assess critical needs, to administer the program, and to evaluate projects. It was recommended by the Advisory Committee for the State Grants Program.

Section 524 amends Part B(2) by eliminating the existing ceiling on the amount which States may expend for teacher aides. Currently the States can utilize only one-third of their allotment to attract, train, and qualify teacher aides. The amendment removes this one-third restriction and allows

State discretion as to the proportion of funds expended for training teachers. This amendment is included since experience has indicated wide variation among States in the needs for recruitment and training of teachers and teacher aides. It was recommended by the Advisory Committee for the State Grants Program.

Section 530 extends Part D authorizations for five years.

Section 531 amends Part D by authorizing programs or projects designed to employ tutors or instructional assistances in preschool, elementary, and secondary school classes, especially for educationally disadvantaged children. This amendment is proposed for the same reasons as the similar amendment in section 521.

Section 532 authorizes the use of Part D funds to pay tutors and instructional assistants authorized by section 531.

Section 533 authorizes a new use of Part D funds — programs and projects for the development, expansion, or improvement of undergraduate programs for preparing educational personnel. This amendment is designed to fill a gap in EPDA. The present authorization does not permit grants for the direct reform of regular undergraduate programs for the

development of educational personnel. Since those programs prepare over 90 percent of all teachers and other educational personnel, the gap is a serious one insofar as it affects BEPD ability to deal with "improving the quality of teaching," one of the two primary purposes of the EPDA. The proposed amendment does not authorize stipends and other types of support for individual students. It would direct all of its resources to the development of better programs for training those undergraduates. The amendment would provide a more productive vehicle than the traditional institutes for bringing those concerned with the academic disciplines together with those concerned with teacher training in joint efforts to improve the quality of teaching.

Section 534 makes a conforming amendment.

Section 535 would allow the use of Part D funds to support the preparation of teachers of children on Indian reservations serviced by the Bureau of Indian Affairs schools and schools supported by the BIA. Federally run and Federally supported Indian schools under the Bureau of Indian Affairs are not presently eligible for funding under Part D of EPDA. Inclusion of these schools would allow for on-premises staff training in these schools and a wide variety of other benefits. The National Advisory Council on EPDA has recommended that BIA schools be made eligible for personnel development benefits.

Section 540 extends Part E of Title V for five years.

Sections 541 - 543, taken together, are intended to consolidate Title IV NDEA fellowship programs with Title V-E, HEA. Effective July 1, 1971 Title IV, NDEA would be repealed; however, fellowships awarded before that date would continue to be paid from Title V appropriations. The reason for

effecting this consolidation is that there now appears to be an adequate supply of Ph.D's to meet teaching demands in most disciplines. The unmet need for teaching faculty in higher education which does exist tends to be limited to a few disciplines and to certain types of institutions.

Section 550 extends Part F of Title V for five years.

Section 551 makes the amendment made by Title V effective July 1, 1971, except where otherwise provided.

Title VI--Repeal of Titles VI, VIII, IX, X, and XI, HEA

Section 601 repeals titles VI, VIII, IX, X, and XI of the HEA, as of July 1, 1971. These are all relatively narrow categorical programs and the last four have never been funded. Rather than maintaining these categorical authorities , the Administration is proposing the creation of the National Foundation for Higher Education. The broad authority for the Foundation, one of the purposes of which is "to provide assistance for the design and establishment of innovative structures for providing postsecondary education and innovative modes of teaching and learning therein," will permit funding of projects of merit in most of these areas.

Title VII--Amendments to General Provisions

Section 701 amends Title XII of the HEA (1) by redesignating such title as Title VIII, and (2) by inserting a new section which provides for uniform application requirements applicable to applications under titles II, III, and V of the HEA. Similar provisions in titles II, III, and V are repealed. These amendments continue the efforts already begun in P.L. 91-230 to standardize general provisions wherever possible.

Title VIII--Amendments to Higher Education Facilities Act

Section 801 amends titles I - IV of the HEFA by extending the authorities in each of these titles for two years. These programs are being extended for only two years at this time since the Office of Education hopes to examine in detail the entire question of how higher education is financed during the next two years.

Section 802 amends title III of the HEFA by adding a new program of insured loans for the construction of academic facilities at nonprofit private institutions of higher education. The Federal insurance of both principal and interest on these loans should greatly improve the borrowing power of these institutions, as well as reducing the cost to the Federal Government in the form of loan subsidy payments.

Section 803 makes a conforming amendment to title III of the HEFA by allowing the use of funds in the HEFA revolving fund to insure loans as well as to make direct loans.

Section 804 makes amendments made by sections 801 and 802 effective July 1, 1971. Amendments made by section 803 are to be effective as if enacted on the date of enactment of section 305 of the HEFA.

Title IX--Extension of Program Under Title VI of National Defense Education Act

Section 901 amends title VI of the NDEA by extending the authorizations for two fiscal years. Once again, a two year extension is requested because of the general review of categorical programs.

Section 902 makes the amendments made by section 901 effective as of July 1, 1971.

Title X--Nondiscrimination on the Ground of Sex in Federally Assisted Education Programs

Section 1001 provides that no person in the United States shall, on the basis of sex, be discriminated against by a recipient of Federal financial assistance for any educational program or activity. This language does not, however, preclude differential treatment based upon sex where sex is a bona fide ground for such differential treatment. This section also provides that no recipient of Federal financial assistance shall, because of an individual's sex (1) fail or refuse to hire (except in instances where sex is a bona fide occupational qualification) or discharge that individual, or otherwise discriminate against him or her with respect to compensation, terms, conditions, or privileges of employment; or (2) limit, segregate, or classify employees in any way which would deprive or tend to deprive that individual of employment opportunities or otherwise adversely affect his or her status as an employee. This section is intended to deal with the well documented discrimination against women which exists in some parts of the educational community.

Section 1002 permits termination of Federal financial assistance to any recipient of Federal funds for education who fails to comply with section 1001. This provision is modeled on existing procedures in civil rights legislation enforcement.

Section 1003 provides for judicial review of administrative action taken pursuant to section 1002.

372 178

Section 1004 provides that nothing in title X shall add to or detract from any existing authority with respect to any education program or activity under which Federal financial assistance is extended by way of a contract of insurance or guaranty. This section conforms with existing language in section 602 of Title VI of the Civil Rights Act of 1964 which excludes contracts of insurance or guaranty from the provisions of title VI and is intended to protect the rights of a lender who is an innocent third party.

Section 1005 defines "education" for the purposes of title X as including preschool, elementary, secondary, and postsecondary education.

60-433 O - 71 - pt. 1 -- 43

Question:

Generally, the bill you propose is a five-year bill; however, you are recommending only a two-year extension of title I of the Higher Education Act of 1965 (Community Service Programs and Continuing Education) and title VI of NDEA (Foreign Language and Area Centers). Why only a two-year extension?

Answer:

HEW is currently reviewing the place of categorical programs such as this in the context of the broader Federal role in higher education; therefore, we are requesting a two-year extension at this time, pending the results of this review.

Question:

You are proposing that the NDEA student loan program be financed with private capital. Back in 1966 the Johnson Administration made a similar proposal--as a means of phasing out the program. The two proposals are so similar that the two ideas must have had a common source--the Budget Bureau. The Congress rejected the phasing out of NDEA student loans in 1966. What is your rationale for reproposing financing the program with private capital?

Answer:

Our proposals for financing NDEA-type loans with private capital is not an attempt to phase out low-cost subsidized loans. Rather, our rationale is to vastly increase the amount of capital available for the award of such loans. Our proposal would more than triple the amount available for such loans by increasing available funds from $369 million in academic year 1970-71 to $1.2 billion in academic year 1971-72.

Question:

Your testimony indicates that you are proposing a long-range, if not permanent, program of student assistance in which loans from private capital are the major form of assistance. Moreover, there is no indication of any recognition of a need for institutional assistance. The aid of permanence about the Administration proposal necessarily requires us to examine the philosophy of student assistance as a national policy. If a proposal such as the one suggested by the Administration becomes law, it is only natural to assume that college tuitions will continue to increase, with the result that higher education will be almost completely financed by tuition. Students will pay that increased tuition by borrowing large sums, which will then be repaid during the twenty-year period after they graduate. Tuition-free higher education will never be the goal of the program. Do we want to adopt a policy based on a philosophy of tuition-financed higher education, or do we want to encourage the concept of free higher education? How do you justify loans as opposed to grants?

Answer:

The immediate aim of the Administration's proposals for student aid reform is to make equality of educational opportunity a reality as quickly as possible. For this reason, the Higher Education Opportunity Act of 1971 proposes to make available to students from all family circumstances the same resources which a middle income family can readily provide towards the higher education of a child. It is only at the point where these resources are equalized that the Administration's proposals offer loans, rather than some form of grant. While tuition-free higher education may very well be a desirable long-range goal in America, current economic realities suggest that the resources for support of such a goal simply do not exist. We feel that it is more important in the interim to insure that all students are guaranteed the support necessary to enable them to meet institutional charges.

Question:

Your statements indicate a strong emphasis on keeping the cost of education off the budget. I suspect that the Fiscal Year 1972 budget limitations had a strong influence on your proposal. Should a long-range national policy, affecting millions of young people for at least the next quarter of a century, be based on budgetary limitations in this year--especially since the budgetary problem is caused by a war?

Answer:

The Higher Education Opportunity Act of 1971 seeks to serve two ends; first, to distribute existing resources available for student assistance in a more equitable manner, so that those students with the greatest need receive the same opportunity for higher education as students with a larger amount of personal resources; secondly, to increase the total available pool of funds.

While we would all like to see a world in which demand was totally satisfied, the economic realities of our system insure that competing demands will always exist for available resources. We feel that our proposals do fulfill these dual goals and that they create a framework which is capable of expansion as additional funds become available in future years.

Question:

How do you intend the work of the National Foundation to differ from that of the National Institute? Please provide the Committee with a dozen examples of projects that each of these organizations will fund.

Answer:

Activities of the National Institute of Education
and the National Foundation for Higher Education: Examples

The likely program thrusts of each agency will be different in kind. Foundation programs will relate particularly to higher education innovation, whereas the Institute will address fundamental questions and solutions relating to the processes and environments for learning. Examples of activities which each agency might be likely to support are:

National Foundation for Higher Education

--The development of a national policy toward higher education, including an examination of the Federal Government's impact on policy formulation and institutional behavior.

--Studies of the costs of higher education and alternative ways of financing them.

--The creation of institutions and programs involving new paths to career and professional training, and new combinations of academic and experiential learning.

--The carrying out in postsecondary educational institutions of changes in their internal structure and operations designed to clarify institutional priorities and purposes.

--The introduction of institutional reforms designed to expand individual opportunities for entering and re-entering institutions and pursuing programs of study tailored to individual needs.

--The creation of new institutions and programs for examining and awarding credentials to individuals, and the introduction of reforms in current institutional practices related thereto.

National Institute of Education

--Research on the social and environmental factors affecting education--and the development of a solution to the problem of economically disadvantaged children falling further behind, once they have entered the formal educational system.

--Research into the nature of language acquisition skills, and the development of improved curricula and materials for learning to read.

--Experimentation with various new technologies in education such as TV, the computer, or cassette, etc.

--Further research into early learning and the development and testing of alternative forms, curricula, and teaching strategies for early childhood education.

--The development of improved testing and evaluation procedures.

--Research on the administration and organization of the schools and the development of alternative concepts and organizational forms for the learning setting.

--Research on the demonstration, dissemination, and adoption processes and the development of an effective delivery system to provide the schools with validated R&D products and practices fitting their needs and population.

Question:

I note that you propose discontinuing construction grants for colleges in two years. Do you believe that the need for construction to accommodate increased student enrollments will be satisfied in two years?

Answer:

These programs are being extended for only two years at this time since the Office of Education hopes to examine in detail the entire question of how higher education is financed during the next two years. We plan to make further recommendations concerning the financing of construction at a later date as a result of such study.

380 878

Question:

Your budget request of $336 million for grants and work-study payments, when added to the $239 million available from the 1971 appropriations, would make $575 million available for grants and work-study payments. Excluding loans, compare:

(a) The number of students who would be benefitted if that sum of money were spent under present Educational Opportunity Grant and Work-Study Programs with the number benefitted under your proposal.

(b) Make the same comparison for an appropriation of $635 million (the amount proposed for 1972-73 school year).

(c) Make the same comparison for $364 million (the amount spent for the 1970-71 school year).

Answer:

(a) Approximately $575 million for the College Work-Study and the Educational Opportunity Grants Programs under existing legislation would assist 968,600 students. Our Grant/Work proposal would aid 1,107,500 students.

(b) If $635 million were appropriated for the existing EOG and CWS programs, 1,069,400 students would be aided. 1,289,000 students would benefit under our proposal.

(c) The $364 million spent for 1970-71 school year assisted 668,320 students. If our proposal had been implemented in FY 1971, 700,000 students would have received grant/work aid.

Question:

In your chart showing the number of students benefitted, you indicate that your proposal will benefit 2.5 million students with subsidized programs. How many of these students will be receiving loans, as opposed to grants?

Answer:

The Administration's proposal is intended to provide a floor of support consisting of parental contributions and Federal assistance of $1,400 per student. In spite of the significant increases in Grant and Work-Study funds which have been requested in the Fiscal Year 1972 budget, a portion of each student's $1,400 entitlement would consist of a subsidized NDEA type loan. As a result, each of the 2.5 million students to be aided will be receiving loans. It is also estimated that 1,157,600 students will be benefitted through Grant and Work-Study payments.

Question:

In that same chart, you predict that the number of persons receiving unsubsidized guaranteed loans will increase from 25,000 to one million. Is not this supposed increase the result of dropping the subsidy? Would not about one million students receive guaranteed loans with no change in the present program?

Answer:

The primary reason for the expected increase in the number of students who would receive unsubsidized guaranteed loans is due to the increased availability of loan capital to be generated by the National Student Loan Association. Some students who are presently receiving subsidized loans would undoubtedly be aided through a guaranteed unsubsidized loan under our proposal. However, the number of such students is expected to be less than one-third of the one million students to be aided through the proposed Guaranteed loans. The above estimates are based on the belief that loans should be made available to all students who need them, and that the National Student Loan Association would provide the mechanism for accomplishing this.

The presentation on the Administration's student aid proposal indicated that, of the $2,765,000,000 to be available for student aid, $2,190,000,000 would be based on private capital. What would be the actual cost to the Federal Government for that $2.19 billion in fiscal 1972 and in each of the subsequent years until the cost on the initial $2.19 has been paid? Itemize the estimated costs. Assume costs of the National Student Loan Association to be costs to the Federal Government.

The $2,765 million for student aid cited in the question would appear to consist of:

EOG/W-S	$ 575
NDEA-type loans	1,050
Loans from NDEA revolving funds	140
Unsubsidized guaranteed loans	1,000
TOTAL	$2,765

The only cost to the Federal Government attributable to the use of private capital would be the subsidy costs on the $1,050 in NDEA-type loans. These would be as follows, assuming an 8 percent interest rate on the loans, 3 percent of which is assumed by the student following his leaving school:

FY 1972	$ 84.00 million
FY 1973	84.00
FY 1974	84.00
FY 1975	52.50
FY 1976	47.25
FY 1977	42.00
FY 1978	36.75
FY 1979	31.50
FY 1980	26.25
FY 1981	21.00
FY 1982	15.75
FY 1983	10.50
FY 1984	5.25

Question:

How many students would be assisted under Part A of Title IV of the Higher Education Act of 1965 under present law if the amount appropriated for initial and continuing Grants were $635 million? How many if such amount were used for work-study payments under present law? State assumptions?

Answer:

If in FY 1972 $635 million were appropriated for the Educational Opportunity Grants Program, 1,026,470 students would be aided. This is assuming an average award of $600 and constant retention percentages. These retention percentages are that: 60 percent of the FY 1971 initial year recipients will receive first year renewal awards; 65 percent of FY 1971 first year renewal recipients will receive second year renewal awards; and, 85 percent of FY 1971 second year renewal students will receive third year renewal awards. The total renewal students aided would be 153,800 and the total initial students would be 872,670.

If the $635 million appropriation were used for work-study payments, the unduplicated number of students aided would be 1,460,000. This student count is based on the assumption of an average award of $525.

Question:

What is your opinion of the manner in which the National Foundation for Higher Education and the National Institute for Education are associated with the Office of Education in title III of S. 659? How is it different from the manner in which you would organize these two new agencies if they are enacted? Should we create a Department of Education?

Answer:

We understand that Secretary Richardson has been invited to appear before the Subcommittee to discuss the National Institute for Education. We would therefore prefer to submit our views on this question at greater length in the form of such testimony.

Question:

I understand that none of the figures you have been using are in the bill you submitted; and that the bill does not even indicate the level of funding necessary to accomplish what you are talking about. That bill simply asks the Congress to give HEW the authority to carry out a grant program, and you are now telling us the policy you will use for the 1971-1972 school year. Since you are asking for this open-ended discretionary authority for five years, will you give us a comparable policy--with the number of students involved and cost estimates--for the four succeeding school years? If we should for some reason adopt the philosophy of your proposal, I suspect that some members of the committee will want to write these figures into the legislation, rather than leave it to the discretion of the Department.

Answer:

We believe it would be undesirable to write into law the aid levels to be established under the Higher Education Opportunity Act, e.g., the grant ceiling of $1,000 proposed by the Administration for FY 1972 and the $400 basic NDEA-type loan ceiling also proposed.

A major purpose of the proposed legislation is to use Federal resources to give as many students as possible as wide a choice as possible in deciding upon the kind of educational program they want. The changing differentials between the cost of attending commuter and residential institutions, and between public and private institutions mean that the mix of grant and loan aid will probably need to change from time to time, in order to meet this goal of wider choice. Moreover, to stipulate levels in the authorizing legislation would either (1) by-pass the appropriations process or (2) or involve a return to the present situation, in which students are eligible for far more aid than is in fact funded, a

frustrating situation which the pending legislation is intended to correct.

Attached are tables showing the cost of the President's proposals on varying assumptions about grant and loan ceilings.

Five-Year Student Aid Costs

Chart I: Assuring Continuation of the First-Year Support Levels of the Administration Proposal

	Academic Year (Million $)				
	1971	1972	1973	1974	1975
Equal Opportunity Grants and Work-Study	575	635	590*	545*	500*
NDEA-Equivalent Loan Subsidies	85	85	77	75	74
Loan Subsidy Commitments from Prior Years	165	170	200	225	260
Totals	825	890	867	845	834

*Decrease from prior year results principally from expected growth in family income and contributions for education.

AID ELIGIBILITY--ALTERNATE PROGRAM*
(Cost of Education Loans and All Other State and Private Aid Would Be in Addition to These Benefits)

Typical Resources for a Student from a Two-Child Family, One of Whom Is in College

Family Income	Family Contribution	Equal Opportunity Grant/ Work-Study	NDEA-Type Subsidized Loan	Family Contribution Plus Aid	Average Summer Savings	Total Student Resources
$0-3500	$ 0	$ 800	$600	$1,400	$300	$1,700
4,500	220	680	600	1,400	300	1,700
5,500	430	370	600	1,400	300	1,700
6,500	640	160	600	1,400	300	1,700
7,500	850	0	600	1,400	300	1,700
8,500	1,050	0	350	1,400	300	1,700
9,500	1,250	0	150	1,400	300	1,700
10,000 and above	1,400	0	0	1,400	400	1,700

Typical Resources for a Student from a Five-Child Family, Two of Whom Are in College

$0-5500	$ 0	$ 800	$600	$1,400	$300	$1,700
6,500	110	690	600	1,400	300	1,700
7,500	195	605	600	1,400	300	1,700
8,500	280	520	600	1,400	300	1,700
9,500	360	440	600	1,400	300	1,700
10,500	440	360	600	1,400	300	1,700
11,500	510	290	600	1,400	300	1,700
12,500	580	220	600	1,400	300	1,700
13,500	650	150	600	1,400	300	1,700
14,500	700	100	600	1,400	300	1,700

Expected family contributions at higher income levels will depend importantly on the amount of capital assets available for meeting educational costs, and on other special family circumstances, as well as on family income. Hence, any aid to students from large families at higher income levels will depend on the overall financial situation of the family, and not simply on income.

* Maximum grant/work-study is $800, for an EOG/WS budget outlay of $405 million, and a loan subsidy outlay of $244 million, including prior year commitments, in 1971-72.

AID ELIGIBILITY--ALTERNATE PROGRAM*
(Cost of Education and Loans and All Other State and Private Aid Would Be in Addition to These Benefits)

Typical Resources for a Student from a Two-Child Family, One of Whom Is in College

Family Income	Family Contribution	Equal Opportunity Grant/ Work-Study	NDEA-Type Subsidized Loan	Family Contribution Plus Aid	Average Summer Savings	Total Student Resources
$0-3500	$ 0	$1,200	$500	$1,700	$300	$2,000
4,500	220	980	500	1,700	300	2,000
5,500	430	770	500	1,700	300	2,000

7,500	850	350	500	1,700	300	2,000
8,500	1,050	150	500	1,700	300	2,000
9,500	1,250	0	450	1,700	300	2,000
10,000 and above	1,400	0	300	1,700	300	2,000

Typical Resources for a Student from a Five-Child Family, Two of Whom Are in College

$0-5,500	$ 0	$1,200	$500	$1,700	$300	$2,000
6,500	110	1,090	500	1,700	300	2,000
7,500	195	1,005	500	1,700	300	2,000
8,500	280	920	500	1,700	300	2,000
9,500	360	840	500	1,700	300	2,000
10,500	440	760	500	1,700	300	2,000
11,500	510	690	500	1,700	300	2,000
12,500	580	620	500	1,700	300	2,000
13,500	650	550	500	1,700	300	2,000
14,500	700	500	500	1,700	300	2,000

Expected family contributions at higher income levels will depend importantly on the amount of capital assets available for meeting educational costs, and on other special family circumstances, as well as on family income. Hence, any aid to students from large families at higher income levels will depend on the overall financial situation of the family, and not simply on income.

* Support level is raised to $1,700 (the expected family contribution of a typical two-child family with $12,000 family income) and the maximum grant/work-study support to $1,200. The required EOG/WS budget outlay for 1971 would be $836 million, plus $256 million in loan subsidies, including prior year commitments.

AID ELIGIBILITY--ALTERNATIVE PROGRAM*
(Cost of Education Loans and All Other State and Private Aid
Would Be in Addition to These Benefits)

• Typical Resources for a Student from a Two-Child Family, One of Whom Is in College

Family Income	Family Contribution	Equal Opportunity Grant/ Work-Study	NDEA-Type Subsidized Loan	Family Contribution Plus Aid	Average Summer Savings	Total Student Resources
$0-3500	$ 0	$1,200	$1,100	$2,300	$300	$2,600
4,500	220	980	1,100	2,300	300	2,600
5,500	430	770	1,100	2,300	300	2,600
6,500	640	560	1,100	2,300	300	2,600
7,500	850	350	1,100	2,300	300	2,600
8,500	1,050	150	1,100	2,300	300	2,600
9,500	1,250	0	1,050	2,300	300	2,600
10,000 and above	1,400	0	900	2,300	300	2,600

Typical Resources for a Student from a Five-Child Family, Two of Whom Are in College

$0-5500	$ 0	$1,200	$1,100	$2,300	$300	$2,600
6,500	110	1,090	1,100	2,300	300	2,600
7,500	195	1,005	1,100	2,300	300	2,600
8,500	280	920	1,100	2,300	300	2,600
9,500	360	840	1,100	2,300	300	2,600
10,500	440	760	1,100	2,300	300	2,600
11,500	510	690	1,100	2,300	300	2,600
12,500	580	620	1,100	2,300	300	2,600
13,500	650	550	1,100	2,300	300	2,600
14,500	700	500	1,100	2.300	300	2,600

Expected family contributions at higher income levels will depend importantly on the amount of capital assets available for meeting education costs, and on other special family circumstances, as wellas on family income. Hence, any aid to students from large families at higher income levels will depend on the overall financial situation of the family, and not simply on income.

* Support level is raised to $2,300 (the expected family contribution of a typical two-child family with $15,000 family income) and the maximum grant/work-study support to $1,200. The required EOG/WS budget outlay for 1971 would be $836 million, plus $326 million in first-year loan subsidies, including prior year commitments.

FILMED FROM BEST AVAILABLE COPY

Question:

I note that you are recommending repeal or discontinuation of titles II-C (transfer to the Library of Congress), IV-D (cooperative education), V-C (teacher fellowships), VI (instructional equipment for colleges), VIII (Networks for Knowledge), IX (Education for the Public Service), X (Strengthening Graduate Schools), and XI (Clinical Experience in the Law) of the Higher Education Act of 1965, and titles III (Instructional Equipment for Elementary and Secondary Schools) and IV (Doctoral Fellowships) of NDEA.

What is your justification for each of these recommendations?

Answer:

We have not recommended extension of titles VI, VIII, IX, X, and XI of the HEA because of their relatively narrow categorical nature. Rather than maintaining these categorical authorities, the Administration is proposing the creation of the National Foundation for Higher Education. The broad authority for the Foundation, one of the purposes of which is "to provide assistance for the design and establishment of innovative structures for providing postsecondary education and innovative modes of teaching and learning therein," will permit funding of projects of merit in most of these areas.

Our recommendation for repeal of Title IV NDEA fellowships is based on the evidence which is now available which shows an adequate supply of Ph.D's to meet teaching demands in most disciplines. The unmet need for teaching faculty in higher education which does exist tends to be limited to a few disciplines and to certain types of institutions. Teaching fellowships under Title V-E of the HEW would continue.

FILMED FROM BEST AVAILABLE COPY

Activities under Part II-C of the HEA will be continued, more appropriately we feel, under the budget authority of the Library of Congress. At the present time, the Office of Education merely acts as a conduit for these funds. The Office has no operating responsibility for this program. We have been assured by the Librarian of Congress that budget requests for Part C will be made by the Library to carry out these activities.

The Cooperative Education authority contained in Title IV-D is not being repealed; rather, the authorizing language is not being extended. Section 415 of the new Part A in S. 1123 would authorize the use of Federal funds to pay for the administrative expenses incurred in developing or carrying out a program to demonstrate or explore the feasibility of a program of Cooperative Education.

While it is true that the appropriations authorizations contained in Title V-C of the HEA are not being extended in the HEOA, the fact is that V-C-type activities will be continued under Part D. The language of Part D is much broader than that of Part C; for this reason, the Bureau of Educational Personnel Development has not funded activities under Part D authorities at all during this fiscal year, but has used the broader language of Part D.

Title III NDEA programs for the acquisition of instructional equipment and materials are being terminated since funds for acquisition of equipment are available in Titles I and III of ESEA and in other Federal education programs.

FILMED FROM BEST AVAILABLE COPY

Question:

In a theoretical Fiscal Year 1972, assuming no interest subsidy from previous years under Part B of Title IV of the Higher Education Act of 1965, how many students would be aided under present law if the following amounts were to be appropriated:

HEA Title IV, Part A	$ 350,000,000
HEA Title IV, Part C	350,000,000
NDEA Title II	375,000,000

What would be the actual cost to the Federal Government for FY 1972? Assume no interest subsidy under Part B of Title IV.

Answer:

An appropriation of $350,000,000 for the Educational Opportunity Grants Program (Title IV, Part A) would assist 565,720 students. 800,000 students would be aided if the College Work-Study Program's (Title IV, Part C) appropriation were $350,000,000. An appropriation of $375,000,000 for the National Defense Student Loan Program (NDEA, Title II) would provide loans for 784,900 students. The total cost to the Federal Government would be $1,075,000,000.

Senator PELL. In conclusion, I would congratulate and thank you for the time you have given in coming before us. We look forward to seeing you again tomorrow, as we discuss the other aspects of the bill not dealing with student aid, and we will do our best to get the Secretary moving along quite rapidly.

With unanimous consent, I would like to ask that the hearings on higher education taken last year be considered as part of this year's record.

We will recess now until 10 o'clock in the morning.

Secretary RICHARDSON. Thank you, Mr. Chairman.

(Whereupon, at 12:20 p.m., the subcommittee recessed, to reconvene at 10 a.m., Thursday, March 4, 1971.)

EDUCATION AMENDMENTS OF 1971

THURSDAY, MARCH 4, 1971

U.S. SENATE,
SUBCOMMITTEE ON EDUCATION OF THE
COMMITTEE ON LABOR AND PUBLIC WELFARE,
Washington, D.C.

The subcommittee met at 10:03 a.m., pursuant to recess, in room 4232, New Senate Office Building, Senator Claiborne Pell (chairman) presiding.

Present: Senators Pell and Randolph.

Staff members present: Stephen J. Wexler, subcommittee counsel; Richard D. Smith, associate counsel; and Roy H. Millenson, minority professional staff member.

Senator PELL. The subcommittee hearing on the Education Amendments of 1971 will come to order.

I understand that the Secretary is under some time pressure himself and is not here yet, so I think we had better go on. Do you have a prepared statement?

Dr. MARLAND. We have no prepared statement at this time. The Secretary will have one, Mr. Chairman. We will be glad to submit to cross-examination as we can, Mr. Muirhead and I, on the subject that is before us.

Senator PELL. Right. Well, I would like to start promptly, so why don't we move ahead? We have a fairly good idea of the text of the Secretary's statement. You don't happen to have it with you, do you?

Dr. MARLAND. I believe that it can be distributed right now, if you wish, sir.

Would you care to have me begin the reading of the Secretary's statement, subject to his arrival?

Senator PELL. I think that would be a very thoughtful procedure. Thank you very much.

Dr. MARLAND. I trust the Secretary will not be upset by my diction, which is not of the quality that his is, but in any case, I will proceed, Mr. Chairman.

STATEMENT OF HON. ELLIOT L. RICHARDSON, SECRETARY OF HEALTH, EDUCATION, AND WELFARE; ACCOMPANIED BY SIDNEY P. MARLAND, JR., U.S. COMMISSIONER OF EDUCATION; PETER MUIRHEAD, EXECUTIVE DEPUTY COMMISSIONER, U.S. OFFICE OF EDUCATION; CHRISTOPHER CROSS, DEPUTY ASSISTANT SECRETARY FOR LEGISLATION (EDUCATION); AND RUSSELL EDGERTON, SPECIAL ASSISTANT TO SECRETARY RICHARDSON

Dr. MARLAND. Mr. Chairman and members of the committee, I am pleased to be here today to testify on the President's proposal to establish a National Foundation for Higher Education. The pro-

posal has been introduced as S. 1062 by Senator Javits, ranking minority member of the Labor and Public Welfare Committee, and cosponsored by Senators Prouty, Beall, Dominick, Griffin, Schweiker, and Scott.

Our student aid proposals which I testified on yesterday are directed at the highest administration priority in higher education, the need to equalize opportunities for attending college. Our proposal for a National Foundation is directed at the second clear need—to assure that these opportunities will be meaningful ones. The mission of the Foundation is reform—and not just any reform, not just change for the sake of change, but new orientation, programs and innovative structures which will substantially enhance the capacity of higher education to serve the needs of all our citizens.

While our proposal is based upon the legislation we submitted last year, it has been improved in major ways. Since last year we have benefited from the thinking of leaders in higher education. The Commissioner of Education and I have consulted with the educational associations, and we have taken into account the views expressed last year and this by Members of Congress and their staffs. The result is a proposal which many have helped design and for which I am personally responsible as Secretary and believe in.

We have not only listened, but we have tried to incorporate into our conception of the National Foundation those ideas which would advance the purposes I have stated. We have weighed and pondered the diagnoses of what is wrong with higher education which have been made by such groups as the Carnegie Commission, the Assembly on University Goals and Governance sponsored by the National Academy of Sciences, the Scranton Commission, and the Newman Task Force. As a result, I am confident that the proposal before you addresses itself to the right problems in higher education and deals with them in the right way.

These problems have many sources, yet surely a major one is the sheer and unparalleled growth of higher education in the last two decades. Twenty years ago less than a quarter of our young people went to college; today over half do. Twenty years ago most of our post-secondary institutions served a select and relatively homogenous student population. Today they serve students from all kinds of economic and social backgrounds and a wide range of academic abilities and interests.

Twenty years ago more institutions were relatively small, and the balance between public and private institutions was about even. Today a quarter of our students attend institutions where enrollments are over 20,000, and large public multicampus systems dominate the field.

This swift growth had to occur if we were to keep faith with the expanding demand for higher education. Yet this rapid growth left a number of problems in its wake which might have been avoided had there been a chance to proceed more cautiously, to experiment, to assess what worked and discard what did not.

With some notable exceptions, higher education kept doing what it knew best; namely, what it had been doing all along. The structures and methods of years' standing simply were extended and expanded to a larger universe. Now the problems created during these two decades are all around us.

Secretary RICHARDSON. Thank you, Mr. Chairman and Commissioner. Sorry I am late. I came over from the House side.

I suppose claims from the other side are not really entitled to recognition in this body. I apologize.

Senator PELL. The Commissioner is reading in fine style.

Secretary RICHARDSON. Thank you.

Academic departments and disciplines designed for advanced training and research have been extended throughout undergraduate education. Modes of teaching suited for students who have been raised to enjoy and excel in academic pursuits have been extended to students from very different social backgrounds. Requirements and practices which were designed for the selective few persist—yet today, less than half of the students who enter college ever graduate.

The expansion of research and graduate education, too, was largely accomplished by extending traditional departments and disciplines into institutions where they had not previously existed. Departments were expanded to enroll more students, often without consideration as to whether a market existed for the skills the Department provided. The congruence of lines of research with problems of society has been often a matter of luck rather than intention.

In the structure and administration of post-secondary institutions, the same phenomenon can be seen. Many have grown enormously, without adequate examination of their mission, how they were changing, and their competence and resources for doing more and different things. Under pressure of financial need, institutions have taken on outside activities which are unrelated to their central purposes and which other agencies can perform better.

Even the ordinary processes of administration have generally expanded along traditional lines. The lack of sophistication in planning, programing, costing, and operating even in some of our most prestigious universities is distressing.

In turn, these outmoded forms and practices have been reinforced by equally outmoded habits and practices outside the institutions. Going to college has become a now-or-never proposition immediately following high school rather than an experience to be undertaken when individuals are eager and ready to acquire a higher education.

Career ladders are so encumbered with requirements for certificates and credentials that "doing time" in school has become nearly the only avenue to advancement. Accrediting bodies have come to protect the professional views of guilds more aggressively than the changing needs and interests of consumers.

And not the least of the problems is that we have continued to perpetuate modes of financing higher education without understanding their impact or experimenting with new financing methods. State and Federal Governments alike have been so concerned with finding revenues for an expanding system that questions about how to reward quality and performance, as well as provide financial stability, have been shunted aside.

Now this is a formidable list of problems, and I have by no means exhausted them all. All of these are problems defined from a traditional conception of what higher education is all about. But patterns of work and leisure are changing so rapidly, the demand for advanced skills is rising so fast, surely higher education will be called upon in

the coming decade to perform tasks never before even attempted. The worker, the housewife—individuals of all ages and circumstances—also represent "problems" for—and opportunities to—higher education.

I do not want to suggest that the National Foundation will solve or even address each and every one of these problems. Other programs of HEW and other agencies will make major contributions. But the National Foundation will be involved in a particular way. If we can agree upon the need for Federal leadership to facilitate basic reform in higher education, then I believe we can agree that the National Foundation is the right instrument for exerting this leadership.

We have adopted the Foundation form of organization and administration because it seems so perfectly adapted to the things we want to do—to innovate, to seed and stimulate, to sponsor and encourage. A foundation is not an institution which deals with all clients in an even-handed way, but an institution designed from the start to be selective, and given the flexibility to attract for varying periods of time the highest order of staff and counsel.

The National Foundation will have this capability. It will not be an organization for operating programs or carrying on large and continuing financial transactions but a grant-making organization. It will be free of responsibility for operating any existing programs now conducted by HEW.

The Foundation will be located within the Department of Health, Education, and Welfare in the same way as other agencies of the Department such as the Office of Education itself. This is a major change from last year's proposal which established the Foundation as an independent agency in the executive branch reporting directly to the President. It is a location which we believe will retain the advantages of independent action and add to these the benefits of full-coordination with other major educational programs.

The Director of the Foundation will have close working relationships with the Commissioner of Education and the Director of the proposed National Institute on Education.

Since I have made it clear that the Commissioner of Education is the chief education officer, I intend to ask the Director of the Foundation to report to me through him.

I also intend to seek maximum coordination between the Foundation and other agencies outside HEW which transact considerable business with post-secondary institutions. The Foundation will have my backing to share information and stimulate jointly supported projects with other agencies. And we intend to establish, within the executive branch as a whole, a mechanism through which the Director of the Foundation can routinely do business with the leaders of other agencies.

Communication with the world outside the Federal Government will be fostered by an advisory board of public members representing both the educational community and the general public. We want a strong board. Hence we have provided for its appointment by the President as a way of recruiting top people from education and other walks of life.

In addition, the board's advice will reach to all important matters of policy and all important projects and programs. There is enough experience in higher education to be sure that a strong board can serve

important purposes; rightly operated it will strengthen the hand of its executive officer, and that is what we intend.

Among all the key elements of the Foundation, the director is the most important. We want someone who is dynamic, one who has fresh and progressive views about higher education. To recruit such a person, the bill provides a number of incentives. He is to be a Presidential appointee, confirmed by the Senate. He will have an exciting program to develop and administer, and a strong board to help him formulate policies and programs.

These are powerful incentives, but he needs others. Thus, the bill includes a very important provision to give him the tools he needs and to enable the Foundation to carry out its mission. The bill exempts the professional and technical staff from the requirements of civil service laws and regulations regarding appointments, tenure, and classification of personnel.

This is not an exemption for the sake of exemption. Rather, it recognizes the unique characteristics and mission of the Foundation, a recognition which Congress has previously accorded to other governmental foundations.

Existing civil service rules, designed for the settled operations of diverse governmental operating activities, would severely constrain the Foundation from pulling together—often quickly and for varying lengths of time—teams of skilled and experienced people.

The image of freshness and new starts that the exemption would convey to the individuals we want to attract should also not be underrated. The exemption could make the crucial margin of difference between assembling a staff of the first or the second order.

I am confident that with these key features I have mentioned the Foundation can be the vehicle for bringing a bold new emphasis to Federal higher education policy. The President's budget requests $100 million for operation of the Foundation. This is a substantial sum. But we are dealing with a large and very important system, and we are seeking much more than piecemeal reforms here and there in existing institutions.

The Foundation will bring substantial new elements of diversity to higher education by supporting exemplary programs in a wide range of areas. Excellence and innovation in higher education has for too long been associated with one activity—academic research.

Those institutions which are excellent in this activity should continue to be so, and other institutions should be encouraged to join them. But we also need institutions which are excellent in training individuals for particular careers and professions, excellent in providing motivation as well as knowledge, excellent in educating particular groups, excellent in equipping people with the attitudes and skills required to serve others.

Excellence in all these areas will entail not just strengthening of existing programs but the development of new ones based on new sequences and modes of education. The high school graduate today who wants to enter a profession such as the law, must undertake 3 or 4 years of general education followed by 3 years of formal training, and may never see the inside of a law office during this whole period.

Women have no institutions seriously devoted to experimenting with sequences and courses of study related to their special needs and

capabilities. Minorities other than blacks have no programs to speak of which are devoted to the study and enrichment of their particular cultures.

We need institutions and programs devoted to all these needs—and others. We need wholly unstructured educational programs for those who use freedom well and can learn by experience, and highly structured, disciplined programs for others.

We need colleges with broad-based programs and colleges with narrow missions, colleges of 3 years and 5 years as well as 4 years and 2 years. Nothing short of such diversity will meet the range of contemporary needs. The Foundation can encourage this diversity.

We believe, too, that the Foundation should seek to make higher education more responsive to public needs. One such need is the efficient use of public resources, and the Foundation can do much in this area. It can support evaluations and transitions to new kinds of administrative structures and procedures, new uses of faculties and facilities, and experimental modes of financing higher education.

But it can go beyond this as well, and direct attention to the more general problem of accountability. It can support evaluations of what kind of educational programs are needed by our fast-moving society, where the distortions and imbalances are, and can encourage new programs in needed areas.

The Foundation should, thirdly, encourage new ways of going to college. The Carnegie Commission recently issued a report entitled "Less Time, More Options" which suggested the kinds of things which could be done to break the lockstep pattern and rigid sequences of college education.

The Foundation can support these steps. And it can also establish programs and institutions which can provide higher education within the home, the neighborhood center, and the work place.

As the President said in his message on higher education, Great Britain and Japan have already made impressive strides in developing open universities based on televised courses and innovative tutorial and examining arrangements. Our citizens are no less deserving.

Mr. CHAIRMAN. I thank you for allowing me the time to elaborate on the reasons why we feel the Foundation is so necessary. I urge the speedy enactment of the President's proposal.

Senator PELL. Thank you, Mr. Secretary, very much, indeed.

We have with us the ranking member of the committee as a whole, and of the subcommittee, the Senior Senator from West Virginia, and I will defer to him for any questions he might have.

Senator RANDOLPH. Mr. Chairman, I am grateful that you permit me to have colloquy with the witnesses prior to your questioning their testimony. As you know, it is another appointment that calls me away; yet I am intensely interested in the subject matter being discussed.

In your statement Mr. Secretary, you stress the advisability of patterns of work and leisure, and you speak of the change. You discuss the demand for advanced skills as one rising so fast, and you talk about in the coming decade, that higher education is going to have to enter new fields of service.

You combine the worker and housewife, persons of many ages, and you indicate that there are problems for higher education, as well as opportunities for higher education, in the years ahead.

I presume this is not a question that bears directly on what you are saying, but I am wondering where, in all of our educational effort, the stress is being given, at least in part, on people working with their hands, as well as people who work at desks, or people that work within the structure of Government and business generally.

Would you care to discuss this for a moment, sir?

Secretary RICHARDSON. I would like to respond briefly, Senator Randolph, and then ask the Commissioner of Education, who is extremely interested and whose whole career has focused very strongly on the importance of the world of work, to supplement my comments.

We do realize, I think, Senator, the importance of strengthening opportunities for people who want to work with their hands, and we recognize the importance of adding to the prestige that is attached to forms of work other than those that depend upon a 4-year college degree.

And so we believe that the development of technical institutes for postsecondary education, the introduction of a wider range of career opportunities in the community colleges, are of basic importance to widening the kinds of range of educational opportunities that we think are important.

May I ask the Commissioner to respond?

Senator RANDOLPH. Mr. Secretary, before you leave that thought, and the Commissioner speaks, is there a danger that with the emphasis constantly on the skills, let us say, that are inherent in the development of the mind and its application to subject matter, is there a danger that the reservoir or the complement of people who use their hands, that we depreciate that effort to such a degree that we do not have the manpower or the womanpower to do the jobs which are necessary to be done with the hands?

Secretary RICHARDSON. I hope not, Senator, and I would hope that one of the byproducts of the creation of the proposed Foundation would be to focus attention more sharply upon just what it is that our young people are seeking in higher education.

I think that most of us, in HEW, and I think I speak also for the Commissioner and his associates, in saying that we feel that there has been an unreflective tendency to assume that going to college is a good thing for all young people, and that it doesn't matter much what kind of college it is, as long as it can be called a college.

In fact, we believe that a great many young people are going to kinds of colleges and taking kinds of education that doesn't really motivate them very strongly, and that isn't particularly important to the kinds of life that they will want to lead.

And we would hope that by emphasizing the need for reform in the sense of breaking the lockstep that I referred to, creating more diverse opportunities, that another consequence would be to help strengthen respect for the kinds of work to which you have been referring.

Senator RANDOLPH. And that is not being done today, sir.

Secretary RICHARDSON. No, it is not, adequately.

Senator RANDOLPH. There is an attitude of looking down on the person who works with his hands, the skills that come from the hands. I hear it constantly. You hear it, you know about it?

Secretary RICHARDSON. Yes, sir.

Commissioner Marland was a real leader in secondary education, particularly as a superintendent in Pittsburgh, in expressing this concern. Would you like to comment further?

Dr. MARLAND. I would be pleased to, Mr. Secretary; Senator Randolph.

I think it is important to note here that the Office of Education, very closely in line with Senator Randolph's feelings and expression of concern, is now launching a national objective which we will hope to present to the Secretary within days, that will call for the ideal that every young person concluding his high school career shall be prepared either to enter the world of work, with a salable skill, in which he has keen interest and readiness, or he shall be equipped and ready to enter higher education.

It should not be an either-or choice, and it is the latter that I am calling particular attention to, nor should it be limited to a period of time.

I think that it is very clear that now something over 50 percent of our young people are going on to college, in the sense that the Senator has implied, because this is a world in which we as a society have attached excellence, and our definition of excellence speaks to college, as distinct from working with the hands or in any other form of technology, which isn't always necessarily with the hands.

This is a dreadful thing.

Senator RANDOLPH. Thank you, Commissioner, for recognizing it, and speaking out, as you are now doing.

You go ahead. I just felt I had to break in at that point.

Dr. MARLAND. Very good, sir. I have a few more points I would like to put on the record, in line with your question, sir, because they relate very closely to the Secretary's message and the President's message concerning the Foundation for Higher Education.

Those in the elementary and secondary schools are now mounting programs that we believe will demonstrate, in a number of cities in the course of the next 2 or 3 years, that we can turn that world of work around, as it relates to the schools and the elementary and secondary schools; correspondingly, we need the force of the Foundation to turn around the scope, the message, and the Federal role for national priorities and what is happening in the community colleges and in higher education in general.

Everyone is engaged in career development in some form, and I should like to have us begin to use the word career as distinct from vocational-technical, whether the person spins off from our system of education at age 16, or 17, 18, or 24, 26, or 28. Whether he becomes a welder, at age 18, having completed the necessary work for that, and with dignity moves into welding, or whether he becomes a physician, or a philosopher, or what he may be at the end of the cycle of conventional learning years.

Now in this context, we are facing up in a national program, which I attempted to launch in Houston about 3 weeks ago, addressing all of the high school principals in our land, on reaffirming the fundamental American truth that work is good, and that working with the hands is as good as any other kind of work. We are asking the high schools particularly in this country to look again at their numbers of young people, whom they are engaging in preparation for this goal of enter-

ing the world of work with pride and readiness, at the end of 12th grade, or 14th grade in the case of community colleges, and to discard forever this thing that we have called the general education curriculum, which is the crack through which so many of these people fall.

It has somehow crept into our way of life that only roughly 12 percent of our young people in high schools are truly engaged in vocational program preparation, that perhaps 40 or 50 pecent will go to college, and of them, only a third will complete college, leaving anywhere from 30 to 40 to 50 percent of our young people unschooled and unskilled.

And it is the effort of the Office of Education, with the strong encouragement of the Secretary at this time, to redress this national embarrassment.

Senator RANDOLPH. Commissioner Marland, I am sure that this hearing will be benefited by the statement you have made, and that the record will indicate that there is an intense interest on the part of the administration reflected in the Secretary's remarks and by your very helpful comments.

I am not sure that I want, Mr. Chairman, to ask unanimous consent to include in the record the article in the Washington Post of Sunday in its entirety. There are points made, however, in the article, which is entitled "College Has Been Oversold," that I believe I would want to include portions of that material, which is the thinking of Fritz Machlup.

Dr. MARLAND. I am not familiar with that name, sir.

Senator RANDOLPH. Well, he is a professor of economics at Princeton University, and a former president of the American Association of University Professors. I am not sure that you have had the opportunity to read the article, but there is much that is provocative in it, and, Mr. Chairman, I will ask unanimous consent, because I do not want to encumber the record with too much material that might be extraneous in any degree, to include such portions as I feel might lend themselves to enlightenment on this subject we are now discussing.

Senator PELL. It will be done.

(The article referred to follows:)

[From the Washington Post, Feb. 28, 1971]

COLLEGE HAS BEEN OVERSOLD

(By Fritz Machlup)

Machlup is professor of economics at Princeton University and is a former president of the American Association of University Professors. The following is excerpted from a paper he delivered to a conference sponsored by the Educational Testing Service.

What I am going to argue will sound crude, cruel and perhaps untrue if the words I use are given meanings other than those I intend them to convey. Yet, if I first defined the terms, my main thesis would seem to reduce to a truism.

First thesis: Higher education is too high for the average intelligence, much too high for the average interest, and vastly too high for the average patience and perserverance of the people, here and anywhere. Attempts to expose from 30 to 50 per cent of the people to higher education are completely useless.

Second thesis: Longer education (beyond high school) has become the marching order of our society, but since it cannot aspire to provide higher learning, longer education can only be thinner or broader.

Third thesis: Longer education, even if it is not higher education, may still overtax the interest, patience and perseverance of most people. Young men who have reached physical maturity resent compulsion or other pressures that impose

on them several years of boredom and inactivity; the result is frustration, alienation, delinquency and rebellion.

Fourth thesis: If longer education becomes mainly thinner education—a given curriculum being stretched out so that it takes, say, 16 years to cover what can be learned in 10—it will have disastrous effects upon the working habits and attitudes even of those students who do not reject the system but who submit to it contentedly or in apathy.

Fifth thesis: If longer education is broader in that it adds subjects and approaches to those taught in secondary school, it may perhaps hold the attention of the more patient ones in the age group; but we cannot expect any substantial benefits either for the graduates or for society.

It must have become evident that my definition of higher education is not the one commonly used. Those who talk about "universal higher education" or "higher education for everybody" are not talking about what I call higher education; they mean, in my terms, "longer education for everybody" or "universal post-secondary schooling."

I do not define higher education by the age of the student, or by the number of years of prior schooling, or by the name of the institution. A student who is over 18 years old, has had 12 years of school, has graduated from a high school, and is attending a college or university, is not necessarily getting what I call higher education.

Not even a man 24 years old, with a bachelor's degree, registered for full-time study in a graduate school, is necessarily getting higher education in *all* his courses. He may be taking elementary French or intermediate German in order to prepare for a language examination—if this is still required in some graduate schools. Such language study is not part of higher education, either graduate or undergraduate; it is elementary, or at best secondary, education. Likewise, an undergraduate who takes a college course in elementary algebra or in trigonometry is not engaged in higher learning but rather is making up a deficiency in his secondary-school program.

DILUTION OF QUALITY

There is nothing new about the fact that colleges and universities include elementary and secondary education in their programs; the question is merely whether the share of higher education has been diminishing.

The mixture has been different at different institutions. The most prestigious colleges and universities have offered much heavier doses of higher education, heavier than would have been possible at institutions with academically less talented, less prepared, and less interested students. Even in institutions of high prestige it has usually been possible for some students to get by with a selection of subjects and courses that could not be characterized as higher education.

At the other end of the scale, there have always been colleges and universities which competed for students by offering academic programs that made it easy for the academically untalented to qualify for passing grades. Thus our colleges and universities have always been institutions of higher *and* broader education, with various mixtures of height and breadth.

This statement is not meant to refer to extension classes, to programs in continuing education, to evening schools designed for adult education. It refers to the college curricula for regular full-time students who are willing and able to expose themselves to broader education, but who would not be willing or able to receive higher education.

I suspect that the mixture has been changing in recent years in the direction of lesser height (or depth) and greater breadth. This probably has not happened everywhere; a number of colleges and universities have been receiving better-prepared students from academically strong high schools, which enabled them to step up the level of undergraduate instruction in several subjects.

In most places, however, the admission of academically less prepared and less interested students has made it necessary to offer less demanding courses and to reduce or remove requirements that compelled students to include at least some higher education in their course programs. The statistical facts that in the last 20 years the per cent of the age group enrolled has more than doubled, and that now more than 55 per cent of high school graduates enter college, have made the dilution inevitable.

I define higher education as the level of scholarly teaching, learning, and researching that is accessible to only a small fraction of the people. Any level of education that is designed for a larger portion of the population is, if extended beyond the age of completing high school, in fact only continuing second-level education. An affluent society can offer continuing education to as many people as may want to take it. But we should not kid them, and still less ourselves, by the fake assertion that this is higher education.

HOW BIG AN ELITE?

I have spoken of a "small fraction" of people qualified for higher education. Can this restrictive term be quantified? In order to be outstanding or excellent, what is the top percentile of achievement that deserves these designations? Everybody is able to lift some weight, but how heavy a weight does one have to lift to be a weight-lifter?

Few of us know the answer to the last question, but we might guess that nobody would be called a weightlifter unless he could lift weights which only the strongest five per cent of the people are able to lift. The highest percentile of academic achievers qualifying for higher education may also be five per cent, but perhaps the economic demand for highly qualified scholars influences the standard applied. Thus, we might stick to the top five per cent for weightlifters, ski racers, and concert pianists, while going to 10 or 15 per cent as the fraction we regard as qualified for higher education.

Some of the classical definitions of higher education are much more restrictive than mine. Wilhelm von Humboldt, for example, held that, while the "school" had the task of disseminating received, accepted knowledge, the "university" was concerned chiefly with new knowledge; he insisted on a strict separation of higher education from schooling and on an exclusive concern with the "pure idea of scholarship."

I firmly believe that higher education should be open to all who want it and can take it. But we cannot change the fact that perhaps 80 per cent of the people find it "not relevant" to their interests and capacities.

Senator RANDOLPH. In your statement, Mr. Secretary, you indicate a bold new emphasis in Federal higher education policy will come into being with the work the Foundation will set itself to do.

I have listened to what you have said, and have been helped by your comment, but I am wondering if you would, perhaps, delineate just a little further?

Secretary RICHARDSON. I would be very glad to, Senator.

I think the essential theme that I would like to stress is that of the enchancement of diversity. I think we have seen, over the past several decades, and increasingly in the most recent period, a progressive tendency for our institutions of education beyond the high school to converge toward certain common models, and especially to gravitate toward the concept of a university as an institution awarding advanced degrees.

And the result has been that the universities have gotten bigger and bigger, State colleges——

Senator RANDOLPH. That is not always good, is it, sir?

Senator RICHARDSON. We think not, for a lot of students. I am sure many of them get along well, but I am sure also that others feel submerged by the sheer weight of the size of some of our present institutions.

Senator RANDOLPH. I think, if I may interrupt again, Mr. Secretary, that there is rather general agreement that the university or the multiuniversity, of course, is in most cases, because of the teaching staffs, and facilities, attached to that type of structure, that for graduate

work, that of course has a preference, but the liberal arts and the programs of that type in our 4-year colleges, which I think are very important, these, I believe, can help the student more in an institution less in enrollment than one of these greater, larger universities.

What is your feeling?

Secretary RICHARDSON. This certainly is my own feeling, Senator. I noted earlier in my testimony that today a quarter of our students are attending institutions with enrollments over 20,000, and many of these are students who are there simply because they feel that it is expected to have a college education, in the years 18 to 22.

We think that among the kinds of innovations that the Foundation could be used to encourage would be one in which colleges and universities moved in the direction of letting it become taken for granted that a student might attend for a year, then leave for a period of work and wider experience, and come back with a clearer sense of his own career direction. This might encourage greater opportunity to transfer from one campus to another, taking with the student any credits earned at the first one. This would be particularly important, we feel, with respect to educational opportunities for women.

There is the opportunity, we think, also, to recognize as credits toward a degree a variety of activities broader than sitting in a classroom, or a library, that there might even be established institutions like two, I believe, which exist in England, that don't have any classes at all of their own, but serve to examine and attest to the educational attainments of an individual, whose education may have been assembled out of a variety of experiences and reading.

And I think we have referred also to the concept of the university without walls, as a way of enabling an individual to put together a particular combination of exposure to academic learning and work that is most suited to his or her personal aspirations.

In fact, the U.S. Office of Education has already funded a program called the university without walls, which involves a consortium among 25 different colleges and universities. There is opportunity, certainly, in the field of educational television, to make more economical and more dramatic use of the skills of great teachers.

There are opportunities for improved management and governments of colleges and universities, for the creation of new career programs at all levels, and, not least, for the introduction of fiscal reforms and improvements in efficiency in the utilization of higher education resources.

Senator RANDOLPH. Thank you. Thank you very much, sir.

Off the record, please.

(Discussion off the record.)

Senator RANDOLPH. On the record, please.

And so, as you have indicated, there is a need to make this college, this university, training, the type which will best develop and strengthen the young man or young woman for a life of wholesome living, not just financial return, but to strengthen the fabric of our system. Is that correct?

Secretary RICHARDSON. I think it is absolutely correct. Yes, sir.

Senator RANDOLPH. Mr. Secretary, would you turn to page 12, please, of your testimony?

You talk about the foundation and its encouragement, and I quote, "of new ways of going to college."

I am not just certain that I understand, although I do know your reference to the Carnegie Commission, and its report.

Just what do you mean by this, sir?

Secretary RICHARDSON. I touched on this a moment ago with reference to the university without walls, Senator Randolph.

Senator RANDOLPH. Yes, sir.

Secretary RICHARDSON. And I might expand on that a little.

Senator RANDOLPH. All right.

Secretary RICHARDSON. And perhaps ask Mr. Muirhead to comment further.

The university without walls is simply an example of what we mean by new ways of going to college. Under this approach, a student may enroll for a program that is mapped out in consultation with a group of representatives of participating colleges.

Let's say that it is a program that is concerned with the means of improving reading skills and educational opportunities in the inner city. This program might call for some work in psychology, at a college that is strong in the psychology of education. That might be supplemented by a period of exposure to the actual problems of teaching reading and remedial reading in the public school system, in an inner city area, and the student could go on from there, for another period of supplementary education, in a different college entirely, which would round out the basic understanding of the educational process.

And in each case, the program would be an individually designed one. It would intersperse periods of work with periods of attendance at a campus, and the student could work toward a degree which might, in the course of that process, involve his or her attendance at three or four different campuses. This is one example.

Another would be a kind of education in which a person might be doing work primarily at home, and in reliance partly on reading, partly on television, be appropriately examined from time to time to assure that he or she had actually done this work, and eventually be awarded some appropriate recognition of achievement, without ever actually having been attending classes on a particular campus.

Senator RANDOLPH. Mr. Secretary, there was a time when, let us say, a body of college thought was that, let us say, an organization such as qualified correspondence school, that it really was tearing the educational fabric apart. You are coming back, now, reversing that thinking, that there are correspondence courses of one type or another that might be valuable. Is that right?

Secretary RICHARDSON. Yes. Certainly, correspondence courses supplemented by modern technology in the form of videotape, or closed-circuit television, or audio tape, all of which can enrich what used to be done only on paper.

Senator PELL. I would like to interrupt here to say that correspondence courses are of great value. I know I have taken many, and moved all the way from Coast Guard lieutenant to captain through correspondence.

Senator RANDOLPH. Is the correspondence school still operating at Scranton, Pa.?

Dr. MARLAND. I beg your pardon, sir?

Senator RANDOLPH. Do you know?

Mr. MUIRHEAD. The correspondence school at Scranton is operating, Senator, and you may be interested to know that we have now devised ways so that such correspondence schools are fully accredited and are participants in the financial aid program to go to their students.

Senator RANDOLPH. Well, I appreciate that, because I had some contact with that institution.

Dr. MARLAND. I think that it is important, if I may add, and just expand very briefly, Senator Randolph, in the line of this later question, on the note I reported earlier in responding to your question on vocational technical education or, preferably, career education.

This is the very kind of institution, you see, which we find liberalizing our people, not only through our proposed legislation on student aid, but also to include such things as proprietary institutions, in which there can be access for the same type of vocational development, supported both through the student support, now being urged in Congress, and the reform mode growing out of the Higher Education Foundation, so that, particularly community colleges, and similar institutions, will respond to the career needs of our society.

Senator RANDOLPH. Thank you, Commissioner.

Mr. Chairman, I am grateful that you have given me this time.

There is just one other point to which I must direct our attention, and that is the financial squeeze in which higher education finds itself at this time. It affects the larger university, and of course the smaller college. It has crossed the spectrum of our higher education today.

It casts not only a shadow, but there is a genuine impact, because I have been studying this problem, as a trustee of institutions of higher learning.

Now I want to bring a specific case into our thinking, and let's see if we can use it, perhaps, to give our thoughts about this problem a focus.

Commissioner Marland, I have used this illustration because you were so long identified in Pittsburgh, Pa.

Senator PELL. If the Senator will forgive me, we promised the Secretary that he could leave early, as he has another engagement. I wonder if he could leave, and whether this question could be directed at the Commissioner.

Senator RANDOLPH. Yes; it is.

Do you want questions to the Secretary?

Senator PELL. It might as well be directed to the Commissioner afterwards.

Thank you very much, Mr. Secretary, for being with us, and we appreciate your coming up today and yesterday, and, as we have more questions, we will be in touch with you.

Secretary RICHARDSON. Thank you very much.

May I, in leaving, identify Dr. Russell Edgerton, seated at my far left, who is Special Assistant to the Secretary in the Office of Deputy Under Secretary for Policy Coordination, who has worked with the Commissioner and me, and with Mr. Muirhead, on this foundation proposal. And should there be questions that you might otherwise have directed to me, I am sure that he could answer them or supplement other answers.

Thank you very much, Mr. Chairman.

Senator RANDOLPH. Thank you, Mr. Secretary.

Commissioner, I indicated your term of educational leadership in Pittsburgh.

Dr. MARLAND. Yes, sir.

Senator RANDOLPH. So I have checked two institutions of higher learning in the extreme northern portion; we call it the Northern Panhandle of West Virginia. As you know, we have Bethany College, at Bethany, W. Va., which is some 35 minutes' driving time from the Pittsburgh area. Now that is a smaller college. That was church oriented in its beginning. The Christian Church, Disciples of Christ.

It draws its student body from the United States as a whole, and even other countries.

The information given to me earlier this morning by the registrar, Joseph Curry, at my request, indicated these facts: The tuition, plus the fees, for all students—there is no differentiation between in-State and out-of-State students—is $925 a semester, $1,850 a year. There are now 1,029 students enrolled in the so-called second semester.

Dr. MARLAND. I missed that figure, sir.

Senator RANDOLPH. There are 1,029 in the second semester now. There were 1,070 enrolled in September at the beginning of the so-called college year.

Now, within 5 or 6 miles of Bethany College is West Liberty State College. This, as its name implies, is a State-supported institution, the taxpayers of West Virginia supporting it.

Bethany College, of course, with no State support.

The tuition and fees at West Liberty are $116 a semester, $232 a year. Now that is the tuition for in-State students. The out-of-State students pay, beginning with this coming fall, $491 a semester, $982 a year. At the present time, that tuition, the fees, are $832 a year, but we will use the incoming figures.

Now here are two institutions that are almost side by side in proximity to an industrial area, and other parts of the country. That student who comes from Pennsylvania, to West Liberty State College, he is paying at the present time $832 a year. If he is at Bethany College, he is paying $1,850 a year.

Now if the State institutions in West Virginia, and perhaps in other States, were serving just State students—and I am not attempting to be provincial; I think there is a value, an approximate one, whatever the institution—I might not raise this point.

But today approximately 31 percent of all the students at West Liberty State College are out-of-State students. These figures continue to rise. Why do they rise?

Well, they rise because of the differentation, which I have indicated, which is very real to the Pittsburgh youth, or to the family, his family, between Bethany at $1,850-a-year tuition and fees, and West Liberty State College, at $832 a year.

Now all over America, this situation is becoming apparent. The figures on West Liberty were also given to me by the registrar, Nelson Kane.

I want to have your comment on this situation, as it affects higher education, and the financing of students, either by themselves or through their parents, or foundation assistance, scholarships, grants, one type or another.

Dr. MARLAND. Very good, sir. There are two parts to your question, as you view it, Senator Randolph, and we will soberly respond to both.

As I would suggest first that I invite Mr. Muirhead to provide for you a brief recall of some diagrams and charts he used yesterday with other members of this committee, and as he develops that, it will relate to how both types of young people, those choosing private institutions and those choosing public institutions, would be served with our proposed program for student assistance, which is part of your question.

And he would illustrate, for example, that both of those institutions are well within the range of our expected support for the very needful families.

As he proceeds with those charts let me touch briefly on the second part of your question; or perhaps, Peter, you would rather do the charts first, and then I will deal with the instiutional aid question.

Mr. MUIRHEAD. All right.

Senator Randolph, yesterday we did have occasion to discuss in some detail the student aid provisions of the bill that is now before the committee. The principal thrust of the student aid provision is to maintain a principle that this committee has maintained over the years, and that is that we should do all that we can to strengthen both public and private higher education; and that as this committee has consistently held, that in the use of Federal resources, higher education is a single great natural resource, public and private, and that we should support it as evenhandedly as we know how, and that we should do all that we can to preserve the pluralism that is inherent in higher education.

The student aid proposal that is now before the committee is directed to upholding that principle, by saying that a student coming from a very poor family can receive sufficient assistance, both through grants and subsidized loans, so that he can have freedom of choice, Senator Randolph, as to whether or not, in this instance, he would opt to attend Bethany or opt to attend the State college.

Dr. MARLAND. If the Senator wishes, we can present to you reproductions of these charts, with notes that would help you comprehend the message that Mr. Muirhead is stating.

Senator RANDOLPH. Are you going to place those in the record?

Senator PELL. They have been.

Senator RANDOLPH. Thank you.

Mr. MUIRHEAD. I think, Senator, that your question is so very pertinent, however, that I would like to illustrate that in a situation such as Bethany, and this particular example is not Bethany, but it is of the Bethany type.

Senator RANDOLPH. Yes.

Mr. MUIRHEAD. Where the costs to attend that college approximate perhaps $3,200 a year per student. You reported that the tuition and fees amounted to $1,850. I think it would be a reasonable thing to assume that, including room and board and personal expenses for the student, that it would approximate $3,000 or $3,200.

The proposal that is before you in support of student assistance would make it possible for a student, coming from a very low income family, to receive a thousand dollars in grants, and to receive a total of $1,900 in NDEA-type loans—the type of loans that you have so long supported, Senator Randolph—and to add to it perhaps $300 from his summer earnings. Putting that package together, a student would be able to maintain his freedom of choice.

Now turning to the other side of your question, what benefit would this out-of-State student receive, if he should opt to attend the State college? In this instance, our example indicates that the public college would have a total cost of $2,000, and that is probably close to the total cost at West Liberty for room and board and tuition.

Such a student could, coming from a poor family again, receive a thousand dollars in grants, and he could then take $700 in NDEA-type loans, and with the use of his summer earnings, be able to put together a package that would enable him to attend that school. So, I think that what we would like to report to you is that the student aid provisions, as they were amended in presentation this year, do address themselves to the problem that you have just mentioned.

I should also like to report to you in passing that another very important provision of the legislation that is before you is to reauthorize the developing institutions program. And this is a program which you have supported, this committee has supported, which says that we should provide assistance to colleges such as Bethany.

Senator RANDOLPH. And Salem.

Mr. MUIRHEAD. And Salem.

Senator RANDOLPH. And Wesleyan, and Davis-Elkins and Alderson-Broaddus.

Mr. MUIRHEAD. You read the list, Senator.

Senator RANDOLPH. Yes; these West Virginia colleges that are doing such a good job.

Mr. MUIRHEAD. And we are pleased to report to you that the legislation that is before you would seek to reauthorize that program, and at the same time, we would be seeking additional funds for the program.

Senator RANDOLPH. Mr. Commissioner, I am glad that you had Dr. Muirhead utilize this time. It has been helpful to me. And I want to say for the record that through many years, I have had the opportunity to confer with Dr. Muirhead in reference to specific problems, and he has always been sympathetic to our situations, that sometimes, in a sense, are unique, and I am gratified that this situation is being developed in the proposal in the way that it is.

Dr. MARLAND. I should like to respond a little bit more, if I might, Senator Randolph, very briefly, to your question which dealt with the question of great concern to all of us, and I am sure to you as a trustee of a number of institutions, as to what is the position at this time on the subject of institutional support. It was mentioned by Mr. Muirhead that we are making some modest improvements in the support—and not so modest at that—in terms of opportunities for lending at 3 percent interest rates for school construction.

We are adding roughly $100 million to that program, to encourage this low-cost guaranteed borrowing for general support to institutions. We are increasing modestly our work for developing institutions with a high emphasis on the black colleges.

However, you have today, as the principal theme of this hearing, the question of the National Foundation for Higher Education. As your executive officer concerned with education in this country, I could not at this time present to you what I would find to be a feasible and equitable plan for the deployment of Federal Treasury in support of higher education, until there is a more clearly established Federal policy as to what role the Federal Government can and must play in higher education.

I would count it one of the first and highest priorities of our proposed National Foundation to investigate thoroughly that very question which you are raising. I would have to say that the wide diversity you have cited, even among two neighboring institutions could be extended to many even wider disparities in the nature of institutions, the cost of institutions, the kinds of public they are serving, and the kinds of goals they have. We well know that even some of the most favored institutions, traditionally wealthy, are in serious financial difficulty, as well as those of modest means at the start.

Therefore, we hold that a simple and obvious kind of per capita grant is not an adequate solution to this. It takes great study. It would be, as far as I am concerned, among the highest priorities of the National Foundation to investigate this subject and to return in due course with proposals that could be designed, conveivably, to serve this need at some point in the future.

Senator RANDOLPH. Thank you, Commissioner.

Mr. Chairman, I want the record to reflect that I am in support of the general purposes of the administration's effort in this regard, and specifically, the bill presented by Senator Javits, Senator Prouty, and others, and I commend the efforts that are being made. I am a co-sponsor of Senator Pell's bill. I think there is a realism which must be written in, now as never before, to what we do, an attempt to find—to use an overused word—the priorities which I think are inherent in a strong educational program at the higher levels, that we lack in this and so many aspects of our national life.

The chairman knows that I am now making an effort to have our fuels and energy resources in this country understood and husbanded, in a sense. We have no policies, no goals whatsoever, that are woven into the environmental factors. We go at it hit and miss, in a haphazard manner, and this is just one of the situations economically that we fail to address ourselves to, and we have failed to address ourselves to this very important problem. And Mr. Commissioner, to you and your associates, I want to pledge my continued effort to understand and to study, and hopefully, to be helpful, under the chairmanship of the Senator from Rhode Island.

Thank you.

Dr. MARLAND. Thank you, Senator Randolph.

Senator PELL. Thank you very much, Senator Randolph. Commissioner Marland, there are a few questions here that I want to go over with you now, and I will have a few more that I will submit for the record, so that we can have them in the hearing record.

S. 659—TITLE III DIVISION OF EDUCATION

The National Institute of Education is included, in S. 659. What I sought to do, as you know, is to create a setup, which could provide for a spinoff some day of the Office of Education, into a separate Government department.

Now, I realize that this runs completely counter to the present proposals of the administration, which are to make HEW into even more of a multihued monster than it is presently. I think it would be called the Department of Human Resources. How do you view the relationship of the Institute, the Foundation and the Office of Education?

The Secretary earlier mentioned that they would be changed a bit, and they would be reporting to you, or through you to him. But will you be in charge of this troika, how would it work?

Dr. MARLAND. I will be pleased to respond to that, Senator Pell, because the issue can be easily clouded. We use different words at different times, and it is important, I think, for the record to show how we view the difference between these quite different institutions.

First to respond to your question as to the organizational structure, the lines of authority. Indeed, this legislation does call for these two institutions to be established under HEW. The National Institute of Education, the National Foundation for Higher Education—each, in turn, declared by the Secretary to be accountable and responsible to him through the Commissioner of Education.

I think if you could mentally view an organization chart, it would show the Office of Education, indeed, as it is now, substantially, omitting a good many of our research components, under the Commissioner of Education. And then in that same chart, to view a block to the left and a block to the right of the Office of Education, each flowing into the Commissioner and, in turn, to the Secretary.

There was reason for this, and I will come back to it after defining the two institutions.

One, the National Institute of Education. This body addresses itself, in our plan—and I must assure you that the plan is in its early stages, and has had the benefit of an intensive study by the Rand Corp., under Dr. Roger Levien, and his report, I am sure, is at your hand—but this institution is conceived as embracing and addressing the total span of our people, in terms of their educational careers, formal and informal, from early childhood education on through graduate school, in the search for better ways to teach, and better ways to learn.

We are dealing with something that would have its counterpart in the National Institute for Health, for example, where scholars and physicians and scientists gather to work in depth over years, on frustrating problems concerning education, the problems which have haunted this committee as well as the Office of Education.

Why aren't children in minority groups learning as well as others? Why aren't children of poverty learning as they should? What are the great obstacles to turning the world of work around, as Senator Randolph has noted this morning? And how can research respond to these great social needs?

We address the whole spectrum of education, therefore, with a new institution where the finest wisdom, creativity, and scholarship of the Nation could be gathered, to address these great problems, in a form free of the conventions of bureaucratic government, but still having access to the bureaucratic government, which is essential to its input and its output. The NIE will be a steadily increasing instrument for searching out the great social issues implicit in education, and resolving them through research, development, demonstration, and then flowing back through the Office of Education, for that implementation, dissemination and adoption as new national procedures, techniques, and goals.

It behaves, if you will, as a research institute. It does a lot of its work on the premises, it does some of its work outside the premises, through contract.

Now, as to the Foundation, it is quite different. It behaves as a foundation. It has money, to deploy in the wisdom of its trustees on important projects consistent with its goals, and its goals are reform of higher education.

Senator PELL. To interrupt here, in other words, the National Institute will be concerned both with elementary and secondary education, and higher education. Is that correct?

Dr. MARLAND. It will, indeed. The National Institute services the whole house of education, in all of its parts. The National Institute is concerned with the theory and practice of teaching and learning.

Senator PELL. It doesn't matter if you are 5 years old or 50 years old.

Dr. MARLAND. Precisely, sir. Early childhood to graduate study and beyond, including the many aspects of human growth in between that are germane to educational systems.

Now, the Foundation is solely and strictly limited to the needs of higher education, and here we include, of course, the community colleges, and such institutions as may be classified as post-secondary. Here, as the Secretary has noted earlier, there is a different context for work. Why different? The higher education system of our country is widely diversified, and properly so. Widely variable in its aspects. It is not the network of school systems through State structures that is conventional elementary and secondary, but quite properly our higher education system has grown up in an atmosphere of academic freedom, diversity, wide disparity as to method, mode, size, means, resources, style, and Government.

And, therefore, unlike elementary and secondary education, the Foundation is an exclusive resource to serve higher education, as it reforms itself.

The way the Foundation would work is that it would declare, of course, its large purposes and goals, and gather together, as the Secretary noted earlier this morning, the best brains in our society to determine how these reform modes shall be encouraged and what kinds of reform shall be pressed consistent with national priorities and goals to serve our society.

An institution, large or small, prestigious or nonprestigious, would come to the Foundation with a proposition, and ask for funds to support a reform program, and say here we are now prepared to enter into a whole new system of arranging our schools; we will move from a 4-year baccalaureate institution to 3-year or 2-year institution or sorts, that will still accomplish what we are proposing to do here. The cost benefits of this will be x dollars, the human benefits will be y in number, and this would be a reform instrument.

Some of the reform would be writ large, as we create perhaps new models of reaching our society through television and Telstar type of communications systems. Others would be writ small, where there is indeed still a need for lower scale reforms in existing institutions. But you would have a resource here, serving higher education itself at the initiative of higher education. Higher education seeks reform at this time.

Mr. Muirhead and I, together with the Secretary, have over this past 6 months been deliberating elbow to elbow and intensively with the leaders of higher education, both administrators themselves and

their agents, through their many organizations of higher education, some 23 different organizatons of higher education institutions alone. This reveals again the need for an instrument which can bring together the many parts, differences and diversities of higher education in order to seek better ways to do the job and to serve this Nation.

Now, how do these two parts come together in their widely different roles? They are concerned with education. They are concerned with the total needs of education. The Office of Education is the bureaucratic governmental instrument for the identification of needs in parts and will direct into the research institution the great questions, including those questions that will be raised by society at large, through its trustees. As the answers come out of the National Institute of Education, and as new findings begin to show promise, they must flow back through a network of respectability, reliability, and system. And it is here that the Office of Education provides that system.

The NIE will provide arrangements for producing new products, moving them swiftly into the field where the young people are, both children and college students, and placing them in position for further development.

The need for communication, system, and the flow of materials in and out is implicit in the design which I have attempted to sketch orally for you, of the need for one central personality, if you will, or one central office of government, in this case, delegated to the Secretary fo HEW and in turn to the Commissioner of Education, in such a way as to give cohesion, system, input and output, to these large new institutions being conceived.

SCOPE OF THE FOUNDATION

Senator PELL. If the National Institute is concerned with research on means of learning from 5 years to 50, why could not the Foundation be concerned with an equally broad spread, when it comes to the awarding of grants? I would have thought innovation is needed in elementary and secondary schools as much as it is in colleges.

Dr. MARLAND. This is true, sir; and as you will recall from last year's legislation, we have a counterpart program, which we have called the experimental schools program, which is conceived as an instrument for gathering the research being carried on in our research resources, and mounting it as demonstrations by contracting with the school systems for the development and demonstration of new practices, much as the Foundation would serve higher education.

Senator PELL. I don't follow the logic of the separation in one case, and the joining together in the other. Is there a reason for it?

Dr. MARLAND. The separation of which one, sir?

Senator PELL. The separation of the schools into——

Dr. MARLAND. The experimental schools?

Senator PELL. The experimental schools.

Dr. MARLAND. The logic here refers back to my earlier statement, which was perhaps put clumsily, that there is now a network in the elementary area and secondary systems, through the States and localities, and into which there is a reasonably systematic flow of communication, understanding, governance, laws and responsibilities. This does not apply in the field of higher education. Therefore, the instru-

ment which we call the experimental school program is indeed a vehicle for elementary and secondary education, well within the construct of the Office of Education, because that system is there.

Now, there is no such system, outside in the real world of higher education, that provides a similar network for the Foundation, to give it, if you will, increased autonomy, increased freedom, and increased access to this widely variant population of institutions.

Senator PELL. The Foundation is basically a grant awarding mechanism.

Dr. MARLAND. Precisely.

Senator PELL. And the Institute is more of an in-house research operation.

Dr. MARLAND. Precisely.

Senator PELL. What is the difference between the Foundation on a large scale, and national research on a much smaller scale?

Dr. MARLAND. I am going to ask Mr. Muirhead, if you will permit Senator, as he is closer to the National Foundation for Higher Education than I am.

Mr. MUIRHEAD. I think, Senator Pell, that the principal difference between the two would be in the objective or the function of the National Foundation for Higher Education, which would be directed at the whole spectrum of higher education, involving, as the Commissioner has pointed out, higher education in the sense that it is post-secondary, through the graduate school. And that the focus of the National Endowment for the Humanities as the name implies, is on a very specialized Federal interest to be supported.

The National Foundation for Higher Education would run across a wide spectrum of activities and would support, through project grants, many of the changes, the innovations and new ideas that are needed in higher education. Another very important point that has been underscored by both the Secretary and the Commissioner is that the National Foundation for Higher Education would be under the direction of a board of topflight people, who would be called upon by the Federal Government to help develop policy with regard to the Federal interest in higher education.

I think you would agree, Senator Pell, that at this time in our history we do need to develop a rational and viable policy as to what the Federal interest should be in higher education.

Senator PELL. I think it would be helpful for the record, if you would submit to the committee a dozen examples, one or two lines only in length, of projects that would be typical of each of the projects that each of these organizations you are proposing would be doing.

Dr. MARLAND. We will do so, Senator.

Senator PELL. And very broad, and one or two lines in length. Nothing longer.

(The information subsequently supplied follows:)

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
OFFICE OF EDUCATION

Activities of the National Institute of Education
and the National Foundation for Higher Education: Examples

The likely program thrusts of each agency will be different in kind. Foundation programs will relate particularly to higher education innovation, whereas the Institute will address fundamental questions and solutions relating to the processes and environments for learning. Examples of activities which each agency might be likely to support are:

National Foundation for Higher Education

--The development of a national policy toward higher education, including an examination of the federal government's impact on policy formulation and institutional behavior.

--Studies of the costs of higher education and alternative ways of financing them.

--The creation of institutions and programs involving new paths to career and professional training, and new combinations of academic and experiential learning.

--The carrying out in postsecondary educational institutions of changes in their internal structure and operations designed to clarify institutional priorities and purposes.

--The introduction of institutional reforms designed to expand individual opportunities for entering and re-entering institutions and pursuing programs of study tailored to individual needs.

--The creation of new institutions and programs for examining and awarding credentials to individuals, and the introduction of reforms in current institutional practices related thereto.

National Institute of Education

--Research on the social and environmental factors affecting education--and the development of a solution to the problem of economically disadvantaged children falling further behind, once they have entered the formal educational system.

--Research into the nature of language acquisition skills, and the development of improved curricula and materials for learning to read.

--Experimentation with various new technologies in education such as TV, the computer, or cassette, etc.

--Further research into early learning and the development and testing of alternative forms, curricula, and teaching strategies for early childhood education.

--The development of improved testing and evaluation procedures.

--Research on the administration and organization of the schools and the development of alternative concepts and organizational forms for the learning setting.

--Research on the demonstration, dissemination, and adoption processes and the development of an effective delivery system to provide the schools with validated R&D products and practices fitting their needs and population.

CONSTRUCTION GRANTS

Senator PELL. I notice that you proposed discontinuing construction grants for colleges in 2 years. What is the reason for that? Do you think there will be enough construction to accommodate students within 2 years? What is the rationale for this decision?

Mr. MUIRHEAD. Senator Pell, you have noted that we have not supported construction grants, and inasmuch as consistency is any virtue in this regard, we did not do so last year, either. The rationale for doing so is that with the Federal resources that are available for the support of higher education, we felt that a more important priority was to put those resources into the support of student aid.

You will note that in our budget for this year, a very dramatic increase is included for the support of student aid. We have, rather than providing grants for construction of facilities, expanded the interest subsidy program. As the Commissioner noted, yesterday and today, we will have sufficient funds in the Federal budget to support about $520 million worth of construction costs under the interest subsidy program.

We felt that this was possibly a better way to use the available resources at this time.

Senator PELL. This is, I guess, part of the philosophy of the administration, having the private sector carry a larger load, but I think if you could carry that ad infinitum, we would have to print a lot more money in order to be able to do it without exorbitant rates.

Mr. MUIRHEAD. Yes, of course, but as you know, the Federal program would guarantee to the institution that they would pay no more than 3 percent. The Federal interest program would close the gap between the interest which the college and university had to pay the lender, and 3 percent. One of the amendments that is before you is not only to provide the interest subsidy, but also to provide a Federal guarantee, which hopefully will make loans available at lower interest rates than heretofore.

Senator PELL. It will be pretty good for the banks, for there is little or no risk attached, because they would be guaranteed.

Mr. MUIRHEAD. That is quite correct. I am sure that that is not why we are suggesting the amendment. I think we are suggesting the amendment because it will result in less expenditure on the part of the Federal Government. As a result of the Federal guaranty, the total interest will be reduced.

Senator PELL. It also presupposes a larger money supply, and I think again it is a question, I guess, of philosophy, and of whether we are running the Government on a current basis, or whether we are going to run the Government on a debt basis.

Mr. MUIRHEAD. Yes; I think your point is well taken, Senator, but I think that that is quite fair for me to point out that the budget that is supporting the proposal that is before you does include very substantial amounts of money for grants for the support of low-income students, and that you have a proposal before you that is supportive of the budget, with the highest level of grants for students that we have ever had.

DECENTRALIZATION

Senator PELL. On another subject, as you know, we have often discussed between ourselves this question of the decentralization of the Office of Education. I have taken a dim view of this, because I felt that with only 50 States, there is no reason why the States should not be able to communicate directly with Washington, and what I see in my area of the country is just one more mishmash of bureaucratic layers that my people, that Rhode Island educators have to go through in the various departments before they can get a decision from Washington.

TALENT SEARCH

I realize I am stating a prejudice, but it is a certain view of this matter. A good example, though, of what I am driving at was in my own State, where they had a program called the talent search program, and now there is a move to decentralize it. I was up last weekend, and some of the people from the program came to me and very vividly explained the problems that were involved with this policy of decentralization.

The administrators in Rhode Island informed me that the decentralization would work to their disadvantage, to the effect that the talent search program was increasingly becoming an arm of the university administering it, and the benefits of the program is not felt by other schools in the region.

Decentralizing this program would make the program even more captive, for the single institution which has been able to generate a close relationship with the regional office, as often seems to happen, would consolidate its position.

Here we have the problem of regionalization on a very simple point, the generation of personal friendship, which would work against development of wider program use, and I had two conscientious people come into my office, most upset about this. What can be done to make sure that if your views do prevail—and I hope they do not, but if they do prevail and we do have regionalization, that there is the possibility of quick appeal to Washington in cases of this sort?

Dr. MARLAND. Let me respond, if I may, in general, to your question, Mr. Chairman, and I will ask Mr. Muirhead to deal particularly with your observations concerning the talent search program, with which he is closely familiar.

You are quite right in saying that there is a danger of a layering of bureaucracy implicitly in the decentralization process in which we are now engaged.

We hope that it will not be this, of course.

In the Office of Education, and I speak only for the Office of Education, obviously, we have over the past year or year and a half designated some 23 programs out of a total in the Office of something over a hundred, as being suitable to redirection in their authority and responsibility to the regional areas.

Senator PELL. Would you submit for the record the list of those 23 programs, suitable for decentralization?

Dr. MARLAND. We would be pleased to.

Senator PELL. Thank you.

(The information subsequently supplied follows:)

LIST OF 23 OFFICE OF EDUCATION PROGRAMS LISTED AS SUITABLE FOR DECENTRALIZATION BY DEPT. OF HEW

Listed below are the 23 programs suitable for decentralization.

Higher Education:

- Educational Opportunity Grants
- Work-Study Programs
- National Defense Education Act Student Loans
- Insured Loans to Students
- Undergraduate Facilities Construction
- Loans to Construct Academic Facilities

Elementary and Secondary Education:

- School Assistance in Federally Affected Areas
- Construction of Schools in Federally Affected Areas
- Disaster Assistance
- Title IV of the Civil Rights Act
- The Emergency School Assistance Program

Vocational and Technical Education:

- * Vocational Education Act of 1963, Part B, Part C, Part D, Part E, Part F, Part G, Part H
- Adult Basic Education
- Manpower Development and Training

Libraries and Educational Technology:

The Library Services and Construction Act

Research:

Small Research Grant Programs

Fundamental Research Grants

*Parts B through H of the Vocational Education Act of 1963 to be repealed by Education Special Revenue Sharing.

Dr. MARLAND. Further, I would say that each program, as it is considered for direction or delegation to the regional commissioners, is viewed very carefully in the light of its efficiency and productivity vis-a-vis the central mode, with a headquarters system in Washington, or the decentraliezd mode in the regions.

I think the record should show that in no case have we been quick to deploy a program to the regions without examining its feasibility, and I would offer one or two examples of where I think you would agree that it is feasible to have a regional activity.

Let us speak for the moment of the bilingual program, as related principally to the Southwestern States. Here you have key experts in the area, able to provide technical assistance to schools and communities, ranging out from a central office, let us say, in Dallas, or San Francisco, and reaching into school systems in States where there is a unique problem.

Let us think of another. The beginning exercises of the emergency school assistance program of last summer, where you will recall $75 million were invested in attempting to reduce racial isolation. Here again, there were regional offices, heavily engaged in this process, where the people near the situation understood the problem better than it could be understood in Washington, and indeed, served as Washington's arm in many cases to rise above what might have been State biases or preoccupations that would have run contrary to the intent of Congress.

Now, these are illustrations of ways in which the region does have relevance. I would agree with you that in many instances there are programs unlikely to be served well by their deployment in a manner other than through the States and local districts from Washington. I would ask Mr. Muirhead to comment further, if you please.

Mr. MUIRHEAD. It seems to me, Senator Pell, that you have raised a very important question. If we were to move toward decentralization in a way that resulted in having programs administered in the 10 regional offices according to the standards or criteria set up by each of the regional offices, that would be nothing short of chaos.

Similarly, if we were to move toward decentralization in such a way that the regional office would not be able to make decisions, but would only act as a middleman, pending the decision being referred to Washington, that would be unfortunate, and we would be imposing an unnecessary layer of bureaucracy.

Fortunately, as we have moved toward decentralizing programs we have set up criteria or objectives that are addressed to both of those problems, as the Commissioner has indicated. When a program is decentralized to the region, it is decentralized through the program officer who has responsibility for programs of a similar nature. And there continues to reside with the Commissioner and his associates in Washington the whole question of the development of policy, rules, and regulations for those programs, which are then shared with the regions.

On the second point, concerning the possibility that if we were to decentralize, that it could delay decisionmaking, the Commissioner has been quite insistent that as we examine programs that lend themselves to decentralization, that we make very sure that the regional office carries with it the responsibility for making the decision and it is not merely a stopping place on the way to Washington.

The Commissioner has also made it very clear that in those instances where there is, in the mind of the client, a need for a review of the decision, that there is an appeal procedure and that appeals can be directed to Washington to the Commissioner and his associates.

Now, with particular regard to the program that you have mentioned, the talent search program. At the present time it is not decentralized. We are considering whether or not the talent search program, along with its associate programs of Upward Bound and special services for the disadvantaged, programs which were enacted by your committee and which are all directed to helping the disadvantaged, whether or not that combination of programs could be more effectively administered in the regions. We have not reached a decision on that yet.

Senator PELL. In other words, they are not one of the 28 programs you are thinking of?

Mr. MUIRHEAD. They are not one of the 23 programs, that is right.

Senator PELL. The 23. I am sorry.

Mr. MUIRHEAD. Now, let me share with you an example of a program which we have decentralized.

Senator PELL. Let me just keep on this talent search question for a moment.

Mr. MUIRHEAD. Yes, sir.

Senator PELL. Now, the budget that is being submitted for 1972 calls for an expenditure of $50 million, $50,100,000, for all three of those programs. How much of that is for talent search, itself?

Mr. MUIRHEAD. I have the budget before me, and if you will permit me, I will find it.

We have submitted a budget, as you have reported, in fiscal 1972, for $50,100,000 for the three programs. Talent search is earmarked for $5 million, special services for the disadvantaged, $15 million, and Upward Bound, $30 million.

Senator PELL. How many regional offices are you proposing to have, or do you have?

Mr. MUIRHEAD. We now have 10 regional offices, and I expect that that will continue to be the number.

Senator PELL. Well, 10; if you provide $5 million to decentralize it among 10 offices, and must still support the appeals structure and the overhead in Washington does not this mean a rather small program in each of your districts; doesn't it?

Mr. MUIRHEAD. It certainly would, if we were to do it that way. If we were to take the $5 million and divide it by regions. I think that we would be more likely to distribute the money in terms of where the greatest need is, in support of the talent search program. But I should report again, Senator Pell, that the decision to decentralize talent search has not been taken.

Senator PELL. Thank you.

(Further information subsequently received follows:)

Re: Decentralization of Talent Search/Special Services Branch of the Department of Health, Education, and Welfare.

As Chairman of the Senate's Education Subcommitee, we are sure that you are familiar with the Talent Search/Special Services Branch of HEW. What you may not be aware of is that as a part of the Nixon Administration's "New Revolution Plan"—as outlined in the State of the Union Address—machinery is

being set in motion to effect the decentralization of the Talent Search/Special Services Branch of HEW. This is a drastic action that would not assist but only impede the educational progress that we are making. Clear-cut ramifications of such an action are as follows:

1. Our effective lobbying power and contacts in the nation's capitol would be eliminated. Our power in the nation to operate as a program staunchly supported by the Federal Government would be seriously curtailed.

2. We would be compelled to communicate with Regional HEW Offices alone. Our project proposals would be sent to Regional Offices and decisions on refunding would be made on the regional level. This would be especially harmful in areas where Regional Offices are reactionary, recalcitrant or intransigent regarding implementation of policies and guidelines that demand improved services for minority group students.

3. The possible loss of Area Representatives who are located in Washington would become definite. They would be asked to seek lesser positions with the Regional Offices. These representatives would find their new positions proscribed especially in Regional Offices where there exists an insensitivity to the needs of disenfranchised minority group students.

4. Our Financial Aid contacts would diminish because we would no longer have national recognition from organizations such as the National Association of College Admissions Counselors (NACAC), the United Student Aid Fund, Inc., and other supportive agencies that give us services for student referral on the national level.

5. Talent Search has such a small budget—$5 million—that decentralization is of no advantage. Decentralization may be good in the case of larger departments with much more funds. Programs which focus on the education of minority groups and which have relatively small funding levels must have strong representation in Washington, D.C. to ensure that they will not suffer the "benign neglect" that is so characteristic of the present administration. We cannot give the administration the opportunity to ignore the disenfranchised students of minority groups.

6. In light of the above the efficiency and effectiveness of the Talent Search Program on a broad level would be lost.

We implore you to contact other Rhode Island Congressmen in the Senate and House of Representatives in order to enlist their aid in an action to prevent decentralization of the Talent Search/Special Services Branch of HEW. We also need to receive communication from you concerning the progress that you and other Congressmen from Rhode Island and other States will make in your efforts. You cannot let us down.

THE SECRETARY OF HEALTH, EDUCATION, AND WELFARE
WASHINGTON, D. C. 20201

MAY 19 1971

Honorable Claiborne Pell
United States Senate
Washington, D.C. 20510

Dear Senator Pell:

Please accept my apology for not responding sooner to your letter of March 2 in which you asked that I comment on the issue of decentralization with respect to the Talent Search Program.

Under the President's Federal Assistance Review Program, a HEW Task Force has been reviewing each grant program in the Department seeking opportunities to simplify or eliminate unnecessary procedures and paperwork, and to place decision-making closer to the point where services are actually being provided. The Talent Search Program is one of the programs that has been studied and Commissioner Marland is presently considering recommendations on this program which relate to improving the administrative procedures and to decentralization of some of the functions.

As to the points set forth in the attachment to your letter, the Task Force's recommendations state that there will continue to be a Talent Search Program in which OE headquarters' staff would continue to develop overall program policy, prepare guidelines, write regulations, allocate funds, conduct training of regional personnel, evaluate overall program effectiveness and institute changes in the programs when required. Thus, a national emphasis and focus would be maintained for the Talent Search Program. What has been recommended for decentralization is the receipt, review, and technical assistance related to individual grants--all to be done within criteria and methods established in Washington.

With the foregoing as background, the following specific comments relate to the points raised by your constituent:

1. Since a national emphasis and focus for the Talent Search Program would be maintained in Washington, the lobbying power and contacts of your constituent would not be impaired.

2. Persons concerned with the Talent Search Program would not be compelled to communicate with DHEW regional offices alone; project applications would, however, be sent to regional offices and funding decisions on individual grants would be made at the regional level, within program policy established at headquarters. Therefore, it would be helpful to maintain communications with the DHEW regional offices.

3. If any Area Representatives should relocate to regional office positions, these would not be lesser positions but would be commensurate with the background and experience of the affected Area Representatives. Again, we would not accept the idea that such positions would be prescribed by insensitivity to the needs of minority group students.

4. We do not see how the recommendations currently under study would have any bearing on national recognition from organizations listed by your constituent.

5. The decentralization being considered concerns individual project decision-making and technical assistance, not program leadership which will remain in the OE national headquarters in Washington, D.C. This national headquarters will continue to be responsible for justifying the Talent Search Program budget.

We appreciate your concerns about decentralization. In order to insure a careful approach to this problem, we are conducting our reviews on a program-by-program basis, rather than attempting to make an arbitrary across-the-board determination on what functions can best be performed in Washington as opposed to the field.

With kindest regards,

Sincerely,

Secretary

P.S.: I'm makimg a desperate (and I hope ultimately successful) effort to prevent delays like the one on this letter. I'm very sorry!

Senator PELL. We have a few more questions, that I will want to submit for the record. I notice that you did give us a section-by-section description of the bill, but it does not include a justification of the various amendments that you have been suggesting. I wonder if you would give us a section-by-section justification of the bill, as opposed to a description?

Dr. MARLAND. We can do that. Can we endeavor, in the interest of brevity, to offer both a brief description and defense of the proposition in the form of my testimony of yesterday which was submitted for the record? If you would like us to amplify on the justification, we can do that.

Senator PELL. I think we would like to see a justification of each of the sections.

The record will be kept open, as I said, for the submission at a later date of any questions, and I thank you very much for being with us. We will recess now and be in touch with you as time goes by.

Dr. MARLAND. Thank you, Senator Pell.

Senator PELL. We are in recess.

(Whereupon, at 11:38 a.m., the subcommittee was recessed, subject to the call of the chair.)

EDUCATION AMENDMENTS OF 1971

WEDNESDAY, MARCH 31, 1971

U.S. SENATE,
SUBCOMMITTEE ON EDUCATION OF THE
COMMITTEE ON LABOR AND PUBLIC WELFARE,
Washington, D.C.

The Subcommittee on Education met at 10 a.m. in room 4200, New Senate Office Building, Senator Claiborne Pell (chairman of the subcommittee) presiding.

Present: Senators Pell, Mondale, Eagleton, and Javits.

Staff members present: Stephen J. Wexler, subcommittee counsel; Richard D. Smith, associate counsel; and Roy H. Millenson, minority professional staff member.

Senator PELL. The Subcommittee on Education will come to order. We are resuming hearings on the Education Amendments of 1971 and the various amendments and bills that are being brought before the subcommittee with regard to education beyond the high school level. I am very glad to say that our first witness this morning is my colleague and friend and a man I very much admire, Senator Metcalf.

STATEMENT OF HON. LEE METCALF, A U.S. SENATOR FROM THE STATE OF MONTANA

Senator METCALF. Thank you very much, Mr. Chairman.

Of course, as you know, as chairman of the Committee on Education, I am in wholehearted accord with many of the principles of this legislation. I only want to talk this morning about one very narrow issue, but that does not mean that I am not in accord with various other aspects that are going to come before you.

I appreciate your prompt scheduling of hearings on S. 404, the Consumer's Education Act of 1971. S. 404 would authorize the Commissioner of Education to make grants to universities and nonprofit organizations to assist them in four ways:

First, in making studies and reports relating to consumer needs in the fields of energy, communications, transportation and the special problems of consumers in the areas served by regulated industries;

Second, in making studies and reports relating to Federal and State laws, regulations, decisions and rulings affecting consumers;

Third, in training persons for research relating to such studies and reports, and

Fourth, in development of curricula and programs of study in consumer interests in these fields.

There was substantial testimony for this legislative proposal during the 91st Congress. S. 404 was originally part of S. 607, the proposed

Utility Consumers' Information and Counsel Act, which you cosponsored, and on which the Senate Subcommittee on Intergovernmental Relations conducted 21 days of hearings.

During markup of S. 607, members of the subcommittee expressed support for this proposal but suggested that a consumer education program belongs in the Office of Education, rather than in the proposed independent Office of Utility Consumers' Counsel and that therefore a separate bill should be introduced and put before your subcommittee.

I was in complete accord with this suggestion and consequently introduced S. 4153 last July and reintroduced it this year as S. 404, the bill now before you.

Government, industry and university witnesses endorsed this proposal in their testimony before the Intergovernmental Relations Subcommittee.

I chaired all 21 days of hearings on S. 607 and do not recall any adverse testimony on the education grant proposal. The supporting witnesses included spokesmen for the Federal Power Commission, the Federal Communications Commission, the American Gas Association, the Independent Telephone Association and university professors.

With your permission, Mr. Chairman, I shall include the pertinent portions of their testimony in your hearing record.

Senator PELL. It will be printed in the record.

(The information referred to follow:)

Commissioner Kenneth A. Cox
Federal Communications Commission

"I think one of the benefits of the legislation would be creating new interest in this area. There would be the stimulation to young people, and to others, to develop a specialization in this field, which could supplement the work which has to be done."

Charles R. Ross
Former Member of the Federal Power Commission
Visiting Lecturer at the University of Vermont
and a Member of the International Joint Commission

"Therefore, I wholeheartedly endorse the concept of this bill. Regulation needs the assistance this bill would provide. As a visiting lecturer in regulation at the University of Vermont, I would welcome the opportunity to apply for a grant under section 107. It was my hope that by teaching this course, and hopefully others, I could repay the public for the last 10-year graduate course in regulation. Since I returned to Vermont in October, I have lectured at a number of universities throughout the country. I have enjoyed it. I am hopeful I have been able to pass along a few of my experiences. I would like to continue to do it in the future, but it becomes somewhat difficult to do that and still earn a living.

"Furthermore, so far, for all intents and purposes, I have managed to avoid becoming too involved -- I with too many utility clients. This is a fact that I desire. I have turned down some and I have done this because it allows me to teach a little more objectively, I think, but this is why this particular section of this bill by providing some assistance to the universities, to lecturers, to people who want to specialize in the study of regulation, would enable them to continue to do so without the necessity of seeking clients, either public or private power clients. The public might thereby gain something in objectivity from these people."

(Part 3, p.626)

James G. Richardson
Associate Professor of Finance
University of Florida
former Mayor-Commissioner of Gainesville, Fla.

"Second, I want to strongly endorse title I, section 107 and section 108. For many years, both the quality and quantity of research coming out of our universities on the economics of public utilities has been woefully lacking. As you know, rightfully or wrongfully, research effort is directed where there is financial support. The private sector of the utility industry has given virtually no support to research efforts in universities on the economic aspect of the industry. One can only wonder why. Have they been afraid to let the cold, unbiased eye of the academic researcher take a good look at their operations, rates, structure, and other areas? As far as I am aware, the money that the private sector -- the I.O.U.'s -- has spent at the university level, has largely been of a public relations type.

(Part 6a, p. 1490)

Douglas Gleason
Executive Vice President
United Utilities

appearing as a witness for the U.S. Independent Telephone Assn.

"The fourth objective of S. 607 deserves support. Regulators and managers of utility companies alike should welcome well supported studies of regulatory matters. It would be helpful to all concerned if a broader understanding of the objectives of utility regulation could be achieved. It is and will continue to be useful to explore ways to achieve these objectives more efficiently and more effectively."

(Part 4, p. 1035)

William Crowley
Executive Vice President
American Gas Association

"It would be wonderful if we could do something to stimulate public utility departments or teaching public utility courses in our major universities, because we need a backlog of people both in our utility companies and in our regulatory staffs..."

(Part 4, p. 874)

"Unfortunately, there is an extreme paucity of utility economic expertise in universities. Virtually no universities possess public utility departments devoted to the education of students in public utility economics and related concepts."

(Part 4, p. 793)

Curtis L. Wagner, Jr.
Special Assistant to the
Judge Advocate General of the Army
for Communications, Transportation and Utilities

and Chief of the Regulatory Law Division
Department of the Army

"One of the most difficult areas to fill is a job in the utility area, primarily because the people who are experienced in the field are making far more than the Government could offer them. There is no question about it.

"And No. 2, the opportunities to gain experience in this field are extremely limited."

(Part 5, p. 1187)

Senator METCALF. One of these witnesses was Charles Ross of Vermont. Mr. Ross now lectures on regulatory affairs. He spoke from a rich background as chairman of the Vermont Public Service Board and a member of the Federal Power Commission.

The education grant proposal is important, he said, because it would provide:

> Some assistance to the universities, to lecturers, to people who want to make constructive criticisms of regulation, would enable them to continue to do so without the necessity of seeking clients, either public or private power clients. The public might thereby gain something in objectivity from these people.

Mr. Chairman, when I started several years ago to familiarize myself with regulatory matters, I was appalled to find out that very little has been written on this subject in recent years, except for what has been prepared or endowed by the regulated industries.

Some of the questions propounded by the utility endowed studies are as irrelevant to today's problems as was the ancient theologian's argument as to the number of angels who could stand on the head of a pin.

On the other hand, literature is extremely scarce or non-existent in the following relevant and important areas which readily come to mind.

1. Beneficial ownership and control of energy companies.

2. Use of automatic data processing by regulatory commissions to obtain timely, detailed information on utility expenditures. Under the present primitive procedures, utilities have received literally hundreds of millions of dollars in annual rate increases based upon their 1969 data.

We now are well into 1971, yet the Federal Power Commission and Federal Communications Commission have yet to publish their bare bones statistical comparisons for 1969. Commissions and opponents of rate increases were thus disadvantaged because they did not have comparative data when the rate increase requests were heard and decided.

Mr. Chairman, to digress a moment from my prepared statement, this morning I received from the military, the U.S. Air Force, a rundown on their computerization of various losses. They have taken the U.S. Code, the Armed Services Procurement Regulations, and the Manual of Courts Martial and put them on computers. These computers can print at the rate of 1,100 lines per minute or, in 2 or 3 minutes, the amount of material that would take hours and hours and hours of manual research to run down as a practicing lawyer.

This kind of system has not even been conceived of for the automatic data processing and retrieval systems at the various Federal regulatory agencies. A system like that at the Defense Department would provide a breakdown of great value to a newspaper reporter or a scholar or anyone trying to find out the statistical basis for rate-making purposes.

3. Customer advance deposits and interests rate thereon. Courts have held that these deposits, totaling in the hundreds of millions of dollars, belong to the customers. Yet in some States these deposits end up in the utility rate base, interest paid is below the going rate and some customers have encountered difficulty in obtaining refunds.

In the District of Columbia, poor people have to pay as much as $50 to get their Pepco Service. The more affluent people, of course, don't have to pay anything. These advance deposits are not only a deterrent to the people who are trying to get these essential services, but they stay in the coffers of the utilities for year after year, drawing interest, and as I say, sometimes they become part of the rates.

4. Flat rates, under which large users of our dwindling energy supplies would not, as at present, be rewarded by lower rates.

5. Differing State policies in allowing various items—ranging from deferred taxes to deposits from friendly banks—in the rate base and the effect of this padding on rates charged customers.

6. Use of industry advisory committees to influence policy and Government officials.

7. Allowance of advertising as an operating expense.

8. Truth in advertising, and use of advertising to forestall divestiture, as in the case of Western Electric's advertising extolling the alleged benefits of being part of the Bell System.

9. The lack of adversary proceedings before regulatory commissions, who hear elaborate customer-financed presentations by utilities but who often receive little informed comment from the public, which does not have access, as the utilities do, to customer-supplied funds for use in rate cases.

10. Policy among the various commissions regarding requirement of disclosure of the fundamental information upon which regulation should be based.

11. Recapture of hydroelectric projects by the Federal Government or relicensing to other than the present license.

12. Savings that would be possible to low-income housing projects through use of master meters rather than individual meters.

13. Policy and procedures in the different States for franchise renewal.

14. State by State comparison of regulatory commission effectiveness. A nonprofit group recently made a study of the relative effectiveness of the various State legislatures. A similar regulatory commission comparison would be most instructive.

15. Anticompetitive consequences of utility entry into real estate and other business. The list could go on and on.

Occasionally an independent scholar will take a hard look at the Federal regulatory commissions. But that is not where most of the action is. The principal regulatory responsibility rests with the State commissions, on which the literature is sparse and outdated.

A few weeks ago I noticed a favorable review in Public Utilities Fortnightly on a new book, "Electric Power in America," by Robert McCaig. The book is published by Putnam's and is part of its "Industries of America" series. According to the Fortnightly review this book "seems especially written for the young reader" and presents its material in a "straightforward, uncomplicated manner that should appeal to persons of any age who might appreciate an opportunity of informing themselves."

Now I don't usually present book reviews to committees of Congress but I think, Mr. Chairman, that you would be interested in some of the information which young readers are getting from this new book.

60-433 O—71—pt. 2——4

It tells them that "Federal, State and local taxes (on electric utilities) have gone up almost astronomically."

This is of course not true. Electric utility taxes have been steadily decreasing, from 24 percent of revenue in 1960 to 18.2 percent in 1970. I would add that the reduction in the Federal portion of those taxes is even more pronounced during the past decade—down from 13.8 percent to 8 percent. The prospects for even further reduction, as we both know, are bright in view of the Treasury Department's recent decision to provide a depreciation windfall for utilities which could amount eventually to an estimated $1 billion a year.

Another thing which students "learn" in this new book is that the rate of return set by State utility commissions "is a ceiling."

That is not so. Usually the "rate of return" is a floor and commissions do not bother utilities until earnings are substantially above the allowed rate of return.

The students are told in this new book that "the rates specified usually, though not always, provide a net return of about 6 percent." Some time ago I reported on the basis of the utilities' own statistics, that a 6-percent rate of return was as rare as the whopping crane. It still is.

This book tells the students that investor-owned utilities are rigidly regulated, but that consumer-owned power systems are unregulated, which is almost 180 degrees from the truth. The book states and I quote, that the State utility commission: "Polices all the operations of every electric company; keeps watch constantly over rates charged and profits made by utilities; has the complete accounting records of the company at its disposal; and prevents discrimination between customers by the company."

On the other hand, according to "Electric Power in America," "Government bodies and bureaus, REA cooperatives, public utility districts, municipally owned systems and such exempted groups, are free to set their own rules, write their own standards and make their own rate schedules."

Mr. Chairman, the facts of regulation, in Rhode Island, in Montana, and in other States are in stark contrast to the fictionalized version of regulation quoted above. When your colleague from Rhode Island, Congressman Tiernan, testified on S. 607, he pointed out how the telephone company operating in your State had exceeded its rate of return for more than 10 years, but the commission did not have the staff to do anything about it.

The staff consisted of two executive secretaries, earning $4,100 a year, one engineer, who earned $9,200, two inspectors who made $4,700, two accountants at $8,200, one other professional, and three clerks. They and the $10,000 a year commissioner were supposed to regulate all the gas, electric, and telephone companies and the transportation companies, too. So it is understandable why they did not take on the New England Telephone System with all its experts.

The situation in any State is no better than in yours. Customers regulate consumer-owned systems more than the average State utility commission regulates investor-owned systems.

My point here is that studies of utility matters, written from the public's point of view, are in scarce supply. On the other hand, the public, especially students, does not get the truth about regulation

from books such as "Electric Power In America" whose author was for many years an employee of the Montana Power Co.

The public, the Congress, State legislators, sorely need authoritative and independent studies of regulation, in the field of transportation as well as energy and communcations. Earlier this week I inserted in the Congressional Record the detailed plans of the railroad conglomerates to persuade the Congress to provide them with a multibillion dollar subsidy package.

And, of course, I am aware of the chairman's long time interest in protection and preservation of our transportation system.

Their massive, nationwide lobbying campaign could well overwhelm the Congress—as I am afraid we were overwhelmed in agreeing to Railpax, which sems bent upon destroying much of the railroad passenger service we need.

The activities of railroad conglomerates, including use of Federal subsidies to obtain more Federal subsidies, also needs thorough examination.

Mr. Chairman, before I conclude, I want to say in all the years that I have been studying the various regulatory agencies, I have been unable to find any instances in which universities or foundations or State educational programs teach about this very important and vital subject. The only way you can find experts to testify before commissions or before the agencies is to find someone who has gone to work for one of these investor-owned utilities.

It is a dwindling group of people who have come down from the old days of the 1930's when there was some campaign for effective regulation. A dwindling group are available for testimony on the people's side before commissions. And there is an ever increasing need for scholarships and for educational programs in all the schools to teach this very vital and important aspect of consumer relations.

I urge this subcommittee to include S. 404 in the education bill which you bring to the floor.

Senator PELL. I have two questions for the record here. One is, what do you believe the cost would be of setting up this office?

The bill talks about an open ended authorization.

Senator METCALF. It could be set up, of course, with a relatively minor cost of providing for grants-in-aid to universities who want to set up, or establish, chairs and programs in this area.

Even on a nationwide program it would only be a few million dollars. It could, of course, if there were a lot of applicants, be a very great cost, but as I conceive of this program I doubt if in its inception there would be need for more than $3 or $4 million a year for assistance to departments of economics in universities to set up a chair for the training of these people. Such a relatively inexpensive program, when we consider the effect of it, would have great impact in giving an opportunity not only to people who want to be experts in this consumer area in teaching and research and discovery, but in giving the people counsel to offset the tremendous amount of money that is spent by utilities in preparation of their cases.

PLACEMENT OF PROGRAM

Senator PELL. The other question I have is, do you see any other branch of Government where this office could be better placed than in

the Office of Education? Can you see it in the Office of the President's Adviser on Consumer Affairs?

Senator METCALF. In my major testimony, I told about the long hearings that we had on a consumer bill to establish a consumer counsel to represent the public before regulatory agencies, because as a lawyer I feel that an adversary hearing before an agency is in the highest tradition of American law.

My original concept of a consumer education grant program had it within the office of consumers' counsel. But as various experts testified, some of whose statements I've put before you today, it became evident most of them felt that this specific educational program should be put under the Office of Education. We have no opposition to that concept.

We have no opposition to that concept.

Several of them said that it was not a part of the consumer program as such, or the new counsel for consumers that I conceive. They felt the education program should be more objective and more independent.

So listening to those arguments, and respecting the people who advanced those arguments, I concur, and that is why I introduced this bill to come before your committee at this time.

Senator PELL. Thank you very much, and I assure you that the subcommittee will look at it. Thank you for coming here and making this presentation.

Senator METCALF. Thank you very much, Mr. Chairman.

(Further information received for the record follows:)

CONSUMER
FEDERATION of
AMERICA

SUITE 1105, 1012 14th ST. N.W., WASHINGTON, D.C. 20005 (202) 737-3732
ERMA ANGEVINE, EXECUTIVE DIRECTOR

MAR 5 1971

March 4, 1971

The Honorable Claiborne Pell
Chairman, Subcommittee on Education
Senate Labor & Public Welfare Committee
Congress of the United States
Washington, D. C. 20510

Dear Mr. Chairman:

Consumer Federation of America, the principal organization of consumer groups in the United States, wishes to take this opportunity to submit its views on the need for an expanded program of consumer education in America's schools.

We support S. 404, Senator Lee Metcalf's bill to authorize the U. S. Office of Education to carry out certain activities concerning consumer education, and urge your subcommittee to give this measure favorable consideration.

The cry of our students and educators today is for greater relevance between school curriculum and everyday living. We are consumers all of our lives. Young people, therefore, need to be taught how to get the most for their dollar, what to look for in credit contracts and product guarantees, and how to spot fraudulent advertising. Consumer education must become an integral part of education in order to prepare young people for competent and effective utilization of their incomes.

Recognizing the need for increased consumer education, our 190 affiliates representing some 30 million Americans adopted the following resolution in 1970 and reaffirmed it at their 1971 annual meeting in January:

> We commend national legislative recognition of the need for consumer education and authorization of funds to meet that need. We recommend further support for consumer education throughout the school system, with innovative use of existing resources.

The Metcalf Consumers' Education Act of 1971 (S. 404), we believe, is a positive approach to be used in a consumer education program.

We respectfully request that the views of our membership be made a part of the hearing record. Thank you.

Sincerely
Erma Angevine
(Mrs.) Erma Angevine
Executive Director

OFFICE OF THE PRESIDENT

April 22, 1971

The Honorable Claiborne Pell, Chairman
Senate Education Subcommittee
Room 325, Old Senate Office Building
Washington, D. C. 20510

Dear Senator Pell:

The National Education Association urges that S. 404, the Consumers Education Act of 1971, be incorporated into S. 659. This bill, by Senator Lee Metcalf, authorizes the Commissioner of Education to make grants to universities and nonprofit organizations to assist them in making studies and reports relating to federal and state laws, regulations, decisions and rulings affecting consumers; in making studies relative to consumer needs in energy, communication, transportation and special problems served by regulated industries; in training persons for research relating to such studies; and in developing curricula and programs of study in consumer interests in these fields.

The schools and colleges of the nation are concerned, along with other consumers, that consumer needs in the fields of energy, communications, and transportation be met in a fair and economical manner. At present, there is no stated federal policy that the institutions concern themselves with this matter, and certainly no evidence that, except in rare instances, have such studies and programs as provided in S. 404 been carried out. The costs to schools and colleges have risen in these consumer areas just as they have in the private consumer sector.

The NEA believes that the inclusion of S. 404 in S. 659 will be a significant step forward in consumer education.

Sincerely,

Helen Bain

(Mrs.) Helen P. Bain
President
National Education Association

HB:HW

NATIONAL EDUCATION ASSOCIATION

Senator PELL. We now have a panel representing the American Council on Education, would the chairman, President Cosand, introduce his colleagues and proceed as you will.

STATEMENT OF A PANEL COMPOSED OF JOSEPH P. COSAND, PRESIDENT, JUNIOR COLLEGE DISTRICT OF ST. LOUIS, MO.; AND HERMAN BRANSON, PRESIDENT, LINCOLN UNIVERSITY, PENNSYLVANIA; JAMES H. HESTER, PRESIDENT, NEW YORK UNIVERSITY; DONALD C. KLECKNER, PRESIDENT, ELMHURST COLLEGE, ILLINOIS; ALAN C. RANKIN, PRESIDENT, INDIANA STATE UNIVERSITY; AND WARNER BAUM, THE UNIVERSITY OF RHODE ISLAND

Mr. COSAND. It is a great pleasure for us to be here this morning and to discuss with you our views on higher education.

Senator PELL. Would you present your colleagues?

Mr. COSAND. Yes; I will.

Senator PELL. I notice that your statement is rather long, and there may be some dialog and questions after it, so any abbreviation of it would be helpful. I assure you the full text will be printed in the record.

Mr. COSAND. I am Joseph Cosand, president of the Junior College District of St. Louis, and I have been asked to chair this panel with the board of directors of the American Council on Education.

As you will see from the cover sheet of our testimony, many higher education associations have joined together in this statement. I believe it is safe to say that every accredited college and university in the United States is represented by one or more of these groups.

I should like to introduce my colleagues on the panel, even though I am sure that many of them are well known to you. On my left, Herman R. Branson, president of Lincoln University.

Albert C. Rankin, president, Indiana State University.

James M. Hester, president of New York University.

Donald C. Kleckner, president, Elmhurst College in Illinois.

Werner Baum, president of the University of Rhode Island.

If it meets with your approval, as we suggested previously, Mr. Chairman, I would like to submit our entire statement for the record and limit my remarks to a summary of our positions. Then we can devote such time as you may give us to a back and forth discussion of the issues.

Accompanying us are the key staff members of the association representatives, and I hope that when it is appropriate I again may call on them to assist the panel in answers to questions the committee may raise which are of a specific nature. You will see that the bulk of our testimony is not directed to any specific bill, but instead suggests what we believe the basic elements of a bill should be.

The reason for our taking such an approach is that there are so many higher education bills before both houses of Congress that it is rather difficult to bring them into focus.

We would, however, like to supplement our basic testimony with some specific comments on S. 659, the bill authroized by the Chairman and a number of his colleagues on this committee. We would say first

of all that if the bill were enacted just as it is written and could be funded, higher education would be greatly strengthened.

We see only one serious flaw, and that is that it does little to even relieve the financial crisis in which all of higher education, but particularly the private institutions, find themselves.

We are no longer facing that crisis. It is upon us, and it is urgent. As noted elsewhere in our testimony, we are eager to see title I of the Higher Education Act continued. We can also even enthusiastically endorse the set aside proposal in S. 659, that would authorize the commissioner to make grants for projects seeking solutions to national and regional problems relating to urbanization, to conservation, to ecology, and the like.

In addition, the proposed metropolitan area program appeals to us greatly. The American Council on Education has recently established an office of urban affairs, because we believe that our colleges and universities have growing expertise in the area that has never been properly utilized or exploited.

The American Association of State Colleges and Universities has long had such a division. This proposed addition to title I, although modest in scope, might provide a breakthrough.

Lastly, the provision for evaluation is greatly needed and there are those who would abandon title I on the grounds that it has failed. There are others who deny this, but add that if it has it is because not much can be done with 9.5 million dollars spread across the country.

We now in higher education and you in the Congress need something more than this kind of minimal support. All we can say at the moment is that title I is potentially one of the most valuable provisions in the Higher Education Act.

The proposals in S. 659 would strengthen it. We rely heavily on the American Library Association and the Association of Research Libraries to provide the intimate knowledge the committee requires on how library programs must operate.

We know your committee has heard extensive testimony from these experts.

Senator EAGLETON. Mr. Chairman, if I could interrupt the witness, I apologize for being late.

I am conducting hearings in another room pertaining to aging, and that is another subcommittee of the full Labor and Public Welfare Committee, but I did not want the opportunity to pass without paying my personal respects to the witness now testifying, Dr. Joseph Cosand of St. Louis and St. Louis County.

It is traditional, Mr. Chairman, as you know, for Senators to speak lavishly of witnesses from their own home State. I do this not only from a traditional point of view but in this instance very sincerely.

He is one of the best informed people in this country insofar as junior colleges and other facets of education are concerned. This committee could not have a more appropriate or knowledgeable witness, and I would like that to be part of the record.

Senator PELL. It will be, and I thank you very much. I am very glad that you could introduce him, since he is the chairman of the panel.

Mr. COSAND. Nevertheless, we would make certain general comments about part B, S. 659, first, it is impossible to overestimate the importance of colleges to basic grants, and second, there is clear need for maintaining the training and research programs.

Third, there is clear need for empowering the Commissioner to exercise understanding and discretion in the imposition of maintenance of efforts.

Fourth, there are few examples in Federal legislation of a greater return on the dollar invested than in the Library of Congress catalog services.

If it were not for this centralized service, our universities and research libraries would have to spend many times this amount, and with less efficiency in order to accomplish the same end. Our basic testimony indicates the importance we attach to title III, strengthening developing institutions.

It is enough to say here that we support the language and the changes encompassed in title III of S. 659. We particularly support the provisions that empowers the Commissioner to waive non-Federal matching when in his estimation the matching requirement is unrealistic and perhaps therefore discriminatory.

There was something highly irreconcilable and ironical in the administration's having announced some months ago that funds available for direct academic facility loans were being reserved for the predominantly black institutions.

The statement was made in good faith, and we in higher education supported it. Unfortunately however, only two such institutions can make use of the funds since the others were totally unable to raise the matching money, necessary to build facilities.

Matching requirements, to the extent they stimulate a flow of funds, from other sources makes sense. However, in many cases and especially in the developing institutions, they preclude, in fact they eliminate, the possibility of participation.

Our greatest concern with the provisions in S. 659 revolves around part B, student assistance. We can support entirely the thought that lies behind this section, and we trust that we shall not seem overly wedded to the status quo if we fly a cautionary flag. There is something basically appealing about the concept that every student should receive basic support as an entitled person if he comes in a family in given economic circumstances.

We view the proposals for basic educational opportunity grants as a kind of a civilian Bill of Rights. It is greatly to be hoped that eventually every citizen may count on some form of basic support just as the returning GI's do now.

Of course, that is the principle that lies behind our whole system of public education, which seeks, although it appears to be a losing battle, to make higher education available to all at a minimal or no cost. We would question seriously, however, relating the stipend paid to each student to the income tax by his parents, or if he is independent of his parents, paid by himself.

We say this for several reasons. One, if one were to determine the need of students by some rigid, arbitrary imposed system of measuring financial strength, probably one would turn to the income tax system as the fairest that could be devised.

Nevertheless, we know that it contains many inequities as have recently been publicized in the media, which we believe have been eliminated in higher education's development of need analysis systems.

Two, the tax paid by American citizens is subject to change because of economic and investment procedures, unrelated to costs of education.

There are many in higher education who believe it essential that taxes be raised if the Nation is to meet its social obligations. If this were to come about, parents trying to support their children this college would find that as their taxes were raised, the resulting entitlement of their children to a basic grant would be lowered.

Obviously, then it would be necessary to rewrite the grant legislation each time the income tax laws were revised. We believe that the system of student assistance already in operation, a system that you would extend in your bill, is defensible and adequate to meet current needs.

We discuss this extensively in our basic testimony. If there are shortcomings in that system, they result primarily from an inadequacy of appropriations.

If even close to the amount of money that would appear to be required to fund your proposal for basic opportunity grants could be devoted to the existing programs we believe that no motivated student would face an insurmountable barrier to post-secondary education.

Under the existing system, there is an incentive for parents to do what they can within the limits of their own resources to help their children through college. We would be fearful that under the income tax system there would be strong incentives for parents to declare their children not dependent, thus enabling them by default to qualify for the maximum grant.

A word may be in order about the provisions contained in section 409 that would make available a grant of $1,200 minus any tuition charged to each institution in which a federally assisted student enrolled. We feel then sure that the committee intended this as a form of institutional support, and as an incentive for institutions to maintain or even to lower their current fee structure.

For public institutions that are struggling to keep fees low, this would be true, and would be of tremendous benefit. For private institutions that must rely on the student fees, since they do not enjoy State support and find that private philanthropy is lagging ever further behind increased costs, the provision would be of no assistance.

In general, their fees are already well over the $1,200 figure. I believe, Mr. Chairman, a recent study indicates that the average tuition cost of private colleges was now in excess of $1,400.

Most of the rest of the proposals contained in S. 659 are covered in detail in our basic testimony. I would propose therefore that we move into our basic testimony.

If the committee has questions on other facets of S. 659, it would seem not to have been covered, that would seem not to have been covered, we will be happy to answer questions or supply later responses for the record.

What I shall do is to summarize our positions briefly and ask our full statement be made a part of the record, if that is permissible.

Senator PELL. That will be done.

Mr. COSAND. The basic thrust of our testimony is that the time has come for the Federal Government to develop a balanced program for

aid to students, aid to institutions and aid for academic facilities in those institutions so that they can accommodate increased numbers of students, especially as proposed by the President.

We look at this, Mr. Chairman, as a three-legged stool, and for the stool to remain strong and upright, all three of these elements must be treated at the same time.

The legislation that has been written during the past 13 years has been greatly beneficial both to higher education and to the Nation. The emphasis, however, has quite understandably been heavily on aid to students.

The facilities program in the late 1960's was providing significant help in making more space available.

But unfortunately it has dwindled to almost nothing, and the shortage of space is again becoming acute, especially in certain types of colleges and universities.

Most important of all is the fact that the costs of educating an ever increasing number of students have far outstripped the resources available for operating expenses, and in this area there has been no assistance from the Federal Government.

The addition of 1½ million students to our roles since 1965, the general inflation, the increasing strain on State and local revenue sources, and here especially again as it relates to public education, from elementary through the 12th grade, and the state of the national economy as it affects philanthropy, all have combined into a frightening financial crisis.

There is an urgency with respect to all higher education and in one of the last reports of the Carnegie Commission there was a statement made that never in the history of higher education had there been such urgency as there is at the present time. It is for this reason that we place our first emphasis on the need for Federal assistance, for general operating support.

We are grateful that Mr. Quie and a number of his colleagues have recognized this need and have introduced a bill, H.R. 5193, and that last year Senator Dominick and his colleagues introduced a companion bill, S. 3817.

The concept embodied in the bills is precisely what we support. We do somewhat question, however, relating assistance exclusively to the award of baccalaureate degrees, with a set-aside for community colleges and nondegree programs.

We believe that a formula related to full-time equivalent students in terms of credits earned, not necessarily just credits taken, but credits earned, with appropriate weights given to different levels, lower division, upper division, and graduate education, for expenses of education might be more satisfactory.

Such a formula would be quite simple to administer. The need as we said is urgent, and we hope the committee will consider our proposal in that light.

I would like to further digress on the weights, and say that weights could perhaps be used for small colleges, especially for black colleges, where there is a great need for assistance, now and those involved in career and compensatory education, where, again, there are high costs involved.

We are in full accord with the administration's determination to remove all financial barriers to higher education, and by that term we mean all kinds of possible secondary school studies. We believe the basic structure of the existing programs is sound, and if they are extended and are adequately funded they can achieve the administration's and our own goals.

We see the opportunity grant program as providing the base of support for the neediest students. These grants can be supplemented, as they are now, with work study or NDEA loans or by a combination of both where there is a built-in flexibility based upon the need of particular students.

We see the guaranteed loan program as a means of assisting students who would not qualify for the three basic programs, but we recognize that since its inception in 1965 it has had to pick up the slack when appropriations for NDSL have been inadequate.

This has not always worked.

We do suggest certain changes in existing programs, and stated briefly we recommend:

1. Eliminating the interest subsidy, 5 years after a borrower has completed his educational program.

2. Elimination of the forgiveness feature of NDSL.

3. A provision that will give the student aid officers some flexibility in packaging awards by allowing him to transfer perhaps up to 15 percent of appropriated funds from any one of the three basic programs to another.

That, again refers back to my comment about the need for flexibility in the financial aids office. The establishment of some kind of a secondary market to give greater liquidity to commercial lenders.

5. Elimination of the interest subsidy in the guaranteed program, unless the borrower furnishes a certificate to the lender signed by a student aid officer indicating that the student is in need of the amount of the loan and that this need can be justified.

6. Extending all forms of financial aid to part-time students. The point there is that many of our part-time students are working outside, trying to earn enough money for a living and also, perhaps, to pay some of their fees, and yet they are discriminated against and are simply told, "Well, you are working part time, pay for it."

We think all aid should be extended to these students.

7. Extending with proper safeguards aid to students attending proprietary schools.

We urge the continuation of the Higher Education Facilities Act in 1963. We recognize the importance of grants if capital construction is not to push student fees ever higher as a means of paying for it. We urge the continuation of title III direct loans, since institutions, many institutions must pay high rates of interest, or find they cannot borrow at all in the private market.

We have testified at length and on many occasions before this committee on the importance we attach to a number of existing programs. At the top of our list would be the several programs relating to disadvantaged students and disadvantaged institutions, specifically upward bound, talent search, special services for the disadvantaged, and the title III program for developing institutions.

Title I, Community Services, and continuing education has limped along with inadequate funding but we believe it is potentially the proper vehicle for tackling a variety of our most serious urban, suburban, and community problems.

Regional centers emphasizing cooperation among the various colleges, and I would like to emphasize the need for this cooperation through consortium activities or whatever they may be, could assist greatly in helping to solve urban problems, conservation concerns and growing ecological concerns.

The college library resources program and particularly the basic grants of the program has been of advantage to small institutions, especially private colleges.

Precisely the same thing can be said of the undergraduate instructional equipment program. Both of these programs, Mr. Chairman, have helped in the past to prevent obsolescence in the libraries and sciences laboratories, which, if not done, can result in these facilities becoming museums rather than continuous, up to date educational units.

It is also important that the Federal Government continue to support graduate education through NDEA title IV fellowships, and the Education Professions Development Act to train college teachers and administrators.

At the moment there seems to be an oversupply of people educated at the doctoral level. We are not sure of the extent of this oversupply, or even whether it is real. It may simply reflect general economic conditions, and especially the financial crisis in our institutions.

We can all remember back in 1950's when there was an oversupply of engineers. Then there was an undersupply of engineers, and then there was an oversupply of engineers. Maybe we are going through something similar to that at the present time. I think it would be unfortunate to act too hastily.

We urge that the pipeline be maintained, and that these programs be authorized and funded at a modest level. The title VI language and area studies program has built a strong cadre of experts and has established a chain of foreign area centers which did not exist in this country in 1958, when the program began.

Investment of small dollars should continue to pay rich dividends, especially as our world becomes smaller and smaller. Chairman Pell, we urge that all these programs be continued.

Lastly, we strongly support the establishment of a higher Education Foundation such as was introduced in the Senate under S. 1062.

It seems the logical vehicle, and one that does not now exist, for the support of improvement and innovation in higher education. We see no conflict between this and the proposed National Institution for Education. We do believe it important to assure a high degree of independence for the foundation, and indeed the independence of institutions of higher education.

In this connection, we recommend certain provisions having to do with the authority of the board, the composition of the board, the selection of the chairman, the position and duties of the director, and the place of the foundation in HEW, or wherever it may be, with respect especially to this independence we are talking about.

But these suggestions are made only in the hope that they may make the foundation more effective. We are in full support of the basic objectives behind the proposal. Chairman Pell, that should be enough, and perhaps more, by way of summary to indicate our basic positions. All of us here in Higher Education, singly and collectively, stand ready to discuss them in further detail, or to move to other topics in which you and the committee may be interested.

I would like in particular at this time, perhaps, to have President Hester comment again, as he, president of New York University, sees the urgency of this.

Mr. HESTER. Mr. Chairman, I would like to comment particularly on the financial crisis. This is unlike anything that people presently living have experienced with regard to Higher Education in the past.

We are facing deficits in public and private institutions, small and large institutions, that are genuinely frightening. These problems have been illustrated in two excellent studies, one for the Carnegie Commission by Earl Cheit, called "The New Depression in Higher Education" and the other prepared by AAC, called "The Black and the Red." To illustrate the kinds of problems we are facing, let me report a computation we made in New York State. In the five largest universities in New York State in the last 3 years their capital has been invaded to the extent of $77 million, meaning we are eating up the basis of our independence in an effort simply to maintain our operations.

This condition is a result of the inflation which has affected us all. It is the result of the leveling off and cutbacks in Federal funding which has forced the universities to assume responsibility for costs that were being shared with the Federal Government, and it has brought a unamity of opinion in many sectors of higher education that the time has come finally to face up to the issue of the Federal Government taking a part in the maintenance of our colleges and universities.

We all believe that the individual should play a part to the extent of his ability. We all believe that the States should play a part to the extent of their ability, but we also recognize that the Federal Government has an interest in maintaining the strength of all our colleges and universities and should play a share in providing operating funds.

As you know, there have been discussions of the appropriate way for the Federal Government to do this for a long time. There is a deep concern to preserve the independence of our institutions from the possibility of Federal control.

This has led to a great deal of examination of the possible formulas that might be used. The formula that has been worked out in New York State and has been operating for 2 years has provided a certain kind of rough justice, which has put an end to the kinds of dispute which preceded the institution of this formula.

People were afraid the rich institutions were going to get too much, or that weak institutions would get too much, and would survive when they should be eliminated.

Finally, a commission was appointed that worked out a formula, and it was based on degrees, but we recommend here it be done on the basis of full time equivalent students.

It has operated for 2 years. It is not adequate, but it has played an important role, and I think people feel it is a just and equitable system to introduce State support.

We are suggesting a formula that would apply to all institutions, public and private, and would establish the Federal responsibility for maintaining our dual system of higher education.

Mr. COSAND. Mr. Chairman, one other member of the panel I would like to have comment, Mr. Branson.

Mr. BRANSON. Thank you. There is one point where there has been a major change since this document was mentioned. The $20 million which President Cosand referred to we checked on yesterday, and it is our information that these institutions are using this money.

The latest figures are that loans have been made for $4 million, and under review are roughly $16 million worth of applications at this time. Furthermore, more than $1 million in interest subsidies will be let.

So this money will be used. Institutions which are hard pressed to find the 30 percent matching money have really moved and bestirred themselves and done this.

As a major concern, as President Cosand has mentioned, these institutions do want and need a nonmatching provision, for programs which they do not participate in.

I would like to tell you that these institutions were able to go into their endowments and meet their expenses. That $77 million that President Hester mentioned is such a wonderful figure, but if I were to put together all of the research funds for the institutions I could not buy lunch for the gentlemen at this desk this afternoon.

So we are talking about institutions which are contributing greatly to America, but who nevertheless do not have any research funds of any magnitude whatsoever.

We are concerned, Senator Pell, especially in whatever legislation is put forth that it would truly be made available to the young people in this particular category.

In this category, I am talking about the young people from roughly one-sixth of the American families. I am talking about 22 million blacks roughly, and 10 to 11 million Spanish-speaking Americans, and roughly half a million to a million American Indians who are not participating in higher education in America as they should.

I think our major concern is to assure that whatever legislation does go through that it will really make available to these young people this opportunity.

This is necessary, sir, because if we think in terms of what we must do, we now are undertaking, as you know, in many areas, trying to convince young people far enough back in their lives that they can have realistic aspirations.

They can aspire to go to law school, for example.

They can aspire to go to medical school. We need to assure them that if they meet certain minimal requirements there will be an opportunity for them to do that. Right now we cannot say that. We can't say it because it just is not true. But we would hope that whatever Federal legislation comes forth that this provision would be a strong one therein.

To give you one figure, you probably have read the Federal interagency committee's report, and if you look in the FICE report, you will see that despite the rhetoric and all the seeming moneys that have been spent in these areas, the predominantly black institutions which I would say enroll between 100,000 and 120,000 young people, got only $39.3 million, which is less than $300 per student.

Yet if we look around at other institutions—for instance, I just happened to pick up last night, that typically for instance, the University of Iowa for the fall of 1969 had 20,235 students, and they had direct and indirect financing which would give to their students roughly $21.6 million in student aid.

In brief it is an institution which has over a thousand dollars per student in student aid. Now we would like to see that type of thing, for example, for our students, because here we are talking about young people who come from families, where the family income just cannot support this, and yet we find that as far as the Federal Government is concerned that the amount of money put there for support is entirely inadequate.

So we would urge your consideration, sir. The first one is that whatever bills are passed that they will really make a reality of the fact that young people from low income families can aspire to the higher education in America, which would lead on to professions especially, not only just graduating from college, but law school, graduate school, and the allied medical professions.

Number 2, we would urge that whatever legislation is put forth that the nonmatching provisions for these schools would be looked at carefully, and that the Commissioner would be given certain powers that they can be abrogated if necessary.

Number 3, we urge that there must be a heightened sense of urgency about this whole problem. President Hester mentioned that this is not something we can think about next year. It is upon us.

It is certainly upon these institutions. It is certainly upon this particular segment of the American population. Human beings are not things we can stockpile. We can't put them back and say, "You wait and in 2 or 3 years things will be worked out and you can go forward.

During that period they are picking up habits and thoughts and values that make it difficult for us to do anything. We urge you to think of doing something immediately to make help available to one-sixth of the American people to bring reality to our aspirations.

Senator PELL. Thank you very much.

That is a very high powered panel, indeed, and there is so much wisdom to be drawn from it, I find myself almost at a loss where to start.

CAMPUS UNREST

Do you feel that the national climate is fortuituous, is favorable, toward enactment of a higher education bill of this nature?

Do you feel that there will be unrest on the campuses this spring that will make it more difficult for us in the Congress to move ahead?

I want to ask if any of you have any reaction on this, and also, whether in the legislation you feel you can handle any more limitations

on Federal assistance relating to whether you have plans to contain or curtail violence on the campus.

Mr. COSAND. President Kleckner, would you want to respond?

Mr. KLECKNER. Well, I think no college president can predict whether unrest will come about in negative and strong or violent tensions.

However, if this year is any indication, let's say I am more optimistic than I have ever been as far as the unrest being controlled.

I have noticed, however, that there is developing on the campuses a sort of a cynical negative attitude, and I think this needs to be watched very carefully There are many people who are disturbed, but I do not think that this disturbance, this cynicism, this negativism, will emerge—certainly will not emerge in a violent disruption as last spring.

Mr. COSAND. President Rankin, would you care to comment?

Mr. RANKIN. I share my colleague's statement. I would like to add that the attitudes of our young people in the colleges and universities today is going to be influenced by the level of support afforded to these institutions of higher learning.

I am rather glad I am not the president of a university in Ohio at the moment with the plan that has been proposed recently there to ask students to pay back a certain portion of the funds that have gone into their higher education.

I think this will create an environment that is unwise and precarious.

Senator PELL. I think this is a difficult and tricky argument, because if we feel there is any element of blackmail involved, I can assure you that it works just the opposite to this.

Mr. RANKIN. Forgive me, sir, if I have created that impression. It was not my intention at all.

Senator PELL. Also, I question whether it really is the support to the university that produced the violence on the campus. I think there are other factors in our national life that have more of a role and effect on whether or not the important programs that you and I are concerned about will pass.

Mr. RANKIN. I think my point is that these other issues are not resolved—our students are learning how to approach them, and we may be giving them a new kind of issue to tackle if we don't find ways to assist education. I don't think the Federal Government should do all this.

18–21 VOTE

Senator PELL. I think that as a general policy, now that we have the 18-to 21-year-old vote in effect, more universities should facilitate and encourage registration. Activity like that would have an effect in your communities and here in the home.

What has happened in the past is that the only groups of people who bother to participate in the elective processes seem to be the conservative ones. The liberal and middle of the road citizens tend to be completely turned off. Indeed look what happened in Great Britain, with the enactment of the 18-year-old vote. They elected a conservative government.

The only group of young people who worked in the last election were for my colleague, Senator Buckley, who ran on the Conservative Party ticket.

One way of turning off some of the violence, would be to turn some of the activities into normal elective processes.

NEWMAN REPORT

As you probably know, the so-called Newman report has become almost required reading for us. I was wondering what your reactions were to the ideas of more emphasis on continuing education, and less emphasis on degrees. Do any of you have any particular ideas on that?

Mr. COSAND. President Baum, would you like to speak on that?

Mr. BAUM. Yes, I would be glad to comment on it.

Senator PELL. I would ask Dr. Baum of my own State, a State where we have our fiscal backs against the wall, if he has a particular view on this question of cost effectiveness.

Mr. BAUM. Senator, let me, with your permission, first turn the tables around a little bit, though, from normal procedure. You made some comment earlier about Senators speaking for the record with regard to their constituents.

Being one of your constituents, I would like the record to show that Rhode Island is proud that you are the author of S. 659, and as was pointed out in the earlier testimony, we feel that the bill which you have authored and a number of your colleagues have cosponsored, if it were enacted just as it is written and if it could be funded would be a source of great strength for higher education.

With regard to the specific report that you mentioned, I have not had an opportunity to study it in detail. I realize in general terms that it places great emphasis on the needs for innovation and restructuring in higher education. In that area, I might make several comments.

One is that I think there is a tendency to over-criticize higher education for lack of innovation and lack of restructuring and I believe that by and large higher education engages in as much or probably more experimentation than does most of private enterprise or most of governmental enterprise, for that matter, and to a certain extent the charge is a straw man.

On the other hand, it is also clear that we are not doing enough, or as much as we might do, but that relates precisely to the question of finances. When we are in a situation as President Hester described, of virtually fighting for survival, then innovation and experimentation of necessity take second place.

If we have to make a decision as to whether to allocate resources to maintaining decent class sizes and providing minimal adequate instructional equipment or whether to, so to speak, defraud our students by inadequately staffing and funding the commitments to them in order to divert money to experimentation, we naturally take the first course of action.

Our first priority is to the existing obligations we have. So to a certain extent the financial crisis can be directly related to the limitations on innovation and experimentation.

I think these two problems go hand in hand.

Mr. COSAND. Mr. Chairman, I would like to comment briefly on your question, because I think it is a very important question. Continuing education to me is something we have to look at as a part

of our whole society, and it is terribly important. There was a word coined by Clark Kerr who chairs the Carnegie Commission, of which I serve as a member, the word stop out, rather than drop out; that is, the student who will stop and come back in, and stop and come back in, perhaps for a good share of his life, up into the forties and fifties and sixties and I think this is becoming more and more urgent as our society changes.

The rapidity of change can render a person obsolete quickly. I am not talking about education as preparation for employment. That is part of it, but I am thinking of this more in the terms of the cultural aspects of it, the member of society aspect of it. I read an article in one of the Washington papers, I think it was yesterday or the day before, about suburbia, and it interested me because I have spoken on this several times about the barrenness, if you will, of surburbia, where the cultural centers are in the city, your art museums, your symphony, and your drama.

And in suburbia you have the television screen and the shopping center, and that is about it. I think our colleges in suburbia as well as in the inner city have to become cultural centers as well as occupational centers as well as change centers, and this is one of the things about continuing education that impresses me very much. On the Newman report I would also concur with President Baum's comment that the Newman report came about a little differently than most reports.

It had an introduction by the Secretary of HEW in which it was given more credence than most reports, and because of this, the media picked it up rather rapidly and many of the media, and I speak with respect to the two papers in St. Louis, rather sensationalized the report that higer education perhaps is no good.

I am exaggerating but this was the implication given. I think this is a mistake, because the Newman report does not say that. Many of the criticisms in the Newman Report are the same as many of the criticisms in the Carnegie Commission report. They are very similar in many cases.

I would say that out of that report comes an increased emphasis for the need of a national foundation for higher education that can work toward innovation, work toward better methods of teaching. Very specifically, there is a league in the community college membership in the United States of 15 college districts which make up a group called "The League for Innovation" and the whole purpose behind this league is really what was talked about in these various reports.

But there is a concern here, because as the financial problem becomes more and more urgent, you watch the squeezing of innovations of research and development, if you will. These seem to be the first things to go, and so you have a direct conflict between need and urgency. You can't let the innovations be discouraged.

Senator PELL. The thing that struck me the most about this was one of the comments, that in so many college faculties the teachers never seem to teach. Indeed, I don't remember any politicians in the political science departments, and psychiatrists in psychology departments. I thought it was a valid point.

COST EFFECTIVENESS

I want to ask you about cost effectiveness. If we go along the route you are suggesting, and I am very sympathetic to it, we have a re-

sponsibility to the taxpayers as to how effectively the dollars will be spent.

Do any of you in your own institutions, and you are all very distinguished chief executives, have a cost effectiveness section where you try to determine the cost effectiveness of a particular department, or of a particular professor and his work, or am I correct in my assumption that we really don't go into it at all in higher education.

Mr. HESTER. I think that is one implication in that report which is quite inaccurate. We have been studying cost effectiveness in higher education for well over a decade, and the recent financial crisis which has been coming upon us now for 5 years has forced us all to study economies in our methods of operation.

We are all becoming increasingly aware of the areas where we can save money and the areas where we can't. The kind of money that would be possible for us to receive in operating grants from the Federal Government is not going to be enough to enable us to be lazy about cost effectiveness. We are still going to be under financial pressure, and we will be for as far as we can foresee, and it will be our responsibility if we are going to maintain our institutions to be as economical as possible.

Senator PELL. That is not my direct question: My direct question was whether any of you had a cost effectiveness unit, or individual charged with such a responsibility in your institutions?

Mr. HESTER. Yes, we do. We have an officer charged with that research. He makes a computation of the number of hours taught by each faculty member, so we can determine whether faculty members are in fact reaching what we believe to be the number of students they should in order just to justify their salaries.

Senator PELL. I am not suggesting that all decisions be made that way, but do you have a cost effectiveness study with relation to one department versus another department?

Mr. HESTER. Yes, indeed, and we have to accept the fact that some things have to be taught differently than others, and in some areas costs are going to be different than in others. These things are studied course by course, department by department.

Senator PELL. Dr. Baum?

Dr. BAUM. Thank you, Senator.

Senator PELL. This is the kind of thing you are going to face in the legislature shortly.

Dr. BAUM. Yes, that is right, but I would like, despite your very kind remarks about the University of Rhode Island to be a little critical of the question, if I may, particularly with regard to the term effectiveness and I know you full well realize personally that we are not engaged in the production of nuts and bolts at any of our institutions, especially not nuts, I hope. [Laughter.]

Dr. BAUM. Effectiveness is a very difficult concept to apply in the area of higher education, and I hope that we would not seek to engage in the kinds of measures which might be appropriate to a typical production enterprise.

The effectiveness of our product, if I may call it that, is often difficult to determine until many years have elapsed, and it is difficult to make comparisons between departments and even between institutions.

I suspect that the effectiveness of Princeton is perhaps better than

the effectiveness of the University of Rhode Island, which may be related to funding. I am not sure. But I won't know how to measure the effectiveness of Princeton as compared to that of the University of Rhode Island.

Senator PELL. I was thinking more in terms of the expensive programs, for which an endowed university has the money, but if it does not, and has taxpayers funds, I think it has to be watched as to the returns.

Dr. BAUM. The great measure I have of effectiveness comes about this time of year when we are making our admission decisions and I find many of our legislators, who at other times of the year are rather critical of us, picking up the telephone several times a week to make certain that a constituent or a nephew or whatever it is gets into that very effective institution.

Senator PELL. Right.

Mr. COSAND. Mr. Chairman, I would like to answer specifically your question. There is a group centered in Denver called Western Interstate Commission on Higher Education. They are in the process, and have been for the past year or two, in studying the question you're talking about, trying to come up with procedures which are comparable, and which can be analyzed where you are talking about oranges and oranges and not oranges and apples. But with respect to President Hester's comments about New York University, in our district we have three colleges, and we know what you are talking about, and we can give you the cost of instruction by credit-hour of any particular subject, and when we do this, we assist ourselves greatly in making decisions on a priority basis.

For example, we find that it costs us $70 a credit-hour to teach nursing. We also find that we can teach some classes for as little as $9 a credit-hour. The inclusive figure for everything is $19, just for instruction, and so we have to ask ourselves can we afford nursing, and how much?

Dental hygiene is about $60 an hour. So we have the comparable costs, and then we come in with compensatory education, which is hitting us very hard, and it is going to hit most colleges I suppose, if we enroll the million students that are expected to enroll according to recent requests.

We find if you do the job for compensatory education, for remedial students, that you can't do it the same way that you do in a regular academic class. It takes a different type of instructor and a different type of teaching method, and a more costly method. So in answer to your question, I think every college has to do this to find out exactly what it is costing to teach this, and this, and this, and where the priorities come in.

Senator PELL. As I break down your testimony, I gathered what you really would like to see in general is a continuation of all the present programs, which to me is a patchwork.

S. 659

In connection with my own approach, S. 659, which includes as a matter of right, the differences between the income tax paid and a grant of $1,200.

I hasten to add that if taxes change as time goes on, those figures would change, too. Would you basically support or oppose this idea as being the floor of Federal assistance to higher education? The philosophy being that everybody has the right to higher education if they have the ability to absorb it, and the desire to do so.

I know there are difficulties here. A family whose income came from municipal bonds, that would be one out of the 100,000, and would be a great exception, but it seems to me to be the fairest way to do it. A student would show receipt for the income tax paid, and get his grant as a matter of right.

Pushing you a little on this, would you support or oppose the concept?

Mr. COSAND. I am willing to throw this around a little bit. President Hester, would you comment?

Mr. HESTER. It is not that part of your proposal that causes us the greatest concern. What bothers us is the institutional grant portion of it, which would virtually eliminate any support to private institutions.

We believe that the Congress would want to keep both private and public education functioning, and that is what gives us the greatest concern.

Mr. KLECKNER. I would also underscore that, being with a private college. For example, Elmhurst College with $2,200 tuition, it would just eliminate any institutional grant.

Senator PELL. My original approach had no deduction of tuition, but was an automatic thousand dollar grant to the institutions, but we were trying to figure out some way to make sure it was not passed on in the form of higher tuition.

I think this is a problem that can be handled legislatively by either a direct grant or relating it to a percentage, or a portion, or relating it so that there would be no change or increase in fees.

Mr. KLECKNER. Then I think I could very definitely support that type.

Mr. HESTER. If this approach could be combined with a meaningful form of institutional grants, then we would not oppose it.

Senator PELL. It was in the original idea.

Mr. COSAND. Mr. Rankin?

Mr. RANKIN. Nothing.

GUARANTEED LOAN PROGRAM

Senator PELL. With respect to the guaranteed loan program, the administration is pressing for an agency called the Sallie Mae. What we are seeking to do is provide authority for a warehousing account in the Treasury Department. We are trying not to institutionalize the guaranteed student loan program, but consider it as a more temporary thing. If we create a Federal agency, I think it will stay forever.

Do you have any thoughts on the differences in approach here, which is better, which is worse?

Mr. COSAND. I would like to refer that question to Mr. Morse, who is qualified to speak to it.

Mr. MORSE. I am John Morse, with the American Council on Education. Senator, the higher education community cannot claim exper-

tise in the establishment of a secondary market. We are convinced that the commercial lenders, and we are thinking of the guarantee program, sir, as basically a commercial lender program, are in trouble in terms of liquidity, and they must find some way to put the paper out in order, we hope, to get more funds to relend.

Whether it is warehousing or whether it is the Fannie Mae, Sallie Mae, type of operation, I think we would defer to the judgment of the Treasury and the banking community.

Our objective is to have the program continue.

Senator PELL If you defer to the treasury and the banking community, they want it institutionalized, because it is more profitable for the banks, and the Treasury usually speaks for the banks.

The Congress speaks differently on this.

Mr. MORSE. The point is that we are not qualified, I think, to determine how best to give the commercial lenders the liquidity we are convinced they need if they are to keep the program going, and we see a need for the program.

Senator PELL. Senator Javits?

Senator JAVITS. First, Mr. Chairman, I would like to welcome President Hester of my own New York University. He is a distinguished educator, and is a great leader of education and civil life in New York. I would also like to welcome Dr. Branson, of whose university, Lincoln, I am an honorary alumnus. I was given an honorary degree some years ago. I would like to explain to all the gentlemen that I was detained this morning on a matter involving pension and welfare funds involving this same committee but another branch of it. We are rather busy with all the things that we are doing.

I would like to ask you gentlemen something about a number of bills I have introduced. I did not cosponsor S. 659 with Senator Pell, who is my real brother in almost everything, because I had some doubts about the student aid provision tied to the income tax, but you helped immeasurably with that. I shall certainly do my utmost to cooperate with our chairman so that we may assure legislation, assuming that the formulation you have just given voice to stands up, as I think it may.

INCLUSION OF PART-TIME STUDENTS

I would like to ask you about a bill that I am putting in tomorrow which tries to reach the problem of the part-time student and seeks to extend the education opportunity grant program to the part-time students, which I hope very much will find favor with this committee.

I gather this was something of the testimony you gave before I came. If any one wishes to answer, I would appreciate it.

Mr. COSAND. We are strongly in favor of extending aid to the part-time students. Many of these students are working 5 to 40 hours a week, and excluding them from this kind of assistance is saying, "go and work and pay your fees, but if you didn't work, we would pay your fees." I think that is discriminatory.

Senator JAVITS. I am grateful to you. Is there any disagreement to that?

CONSTRUCTION ASSISTANCE TO DEVELOPING INSTITUTIONS (S. 1072)

Dr. Branson, I was going to ask you about S. 1072, another bill of mine, which increases the maximum Federal share for higher education facilities under the Higher Education Facilities Act in the case of developing institutions. I would like your comments on that.

Could we have your opinion about that, especially its need?

Mr. BRANSON. We would certainly favor that, sir. Before you came in this morning, I mentioned that we desperately hoped that these institutions would be relieved from that 70/30 formula, that 100 percent would be much more favorable for them, that the need is indeed desperate.

At your alma mater, for example, we are in desperate need for facilities, and we find that to build a library we must go to commercial lenders, with Government subsidy of interest. The library is nonrevenue producing, and consequently how can we pay for that except by raising our fees?

This, we think, is a desperate problem. So we would favor that, sir.

NATIONAL FOUNDATION FOR HIGHER EDUCATION

Senator JAVITS. Thank you.

I also gather from my assistant, Mr. Millenson, who is here, that you favor another measure which we have for an effort to find innovations in higher education.

The traditional 4-year academic pattern somehow must be bent to suit modern needs.

So I have introduced the administration's bill for a national foundation for higher education, S. 1062 and I gather this is something you are aware of.

Mr. COSAND. We are very appreciative Senator, and we support it strongly.

Senator JAVITS. You feel that is necessary?

Mr. COSAND. Yes.

Senator JAVITS. I understand it is also in Senator Pell's bill, S. 659.

Senator PELL. It is placed in HEW, the reason being that some day I hope to see it spun off as the Department of Education.

But I guess we have the same idea.

Senator JAVITS. Yes. Gentlemen, I won't to get you in this particular vice, but there is a question here as to the advisability of delegating the functions to a subordinate agency within the Department, while not delegating it to the Department. There is all the feeling on the part of the Department head that this deprives him of the ability to operate with flexibility, and on the other hand we lack the assurance that it is going to go where we want it to go.

So we always have to fight things out on that whole basis. That is by way of explanation.

Mr. COSAND. Senator Javits, I would say what we feel in this area. We would like for the foundation to have a high degree of independence. We would like for the board of directors or whatever you call them, to be composed of very eminent individuals.

We would like to have the Commissioner of Education become an ex officio member of this body to create a tie so there won't be duplicative effort in different cities and situations. We would like for the director to be a man highly respected not only in the community of education, but throughout all elements of our society that is interested in higher education. We would like for that director to have a considerable degree of autonomy in making decisions, and not have to clear every decision that he makes with some official either within the U.S. Office of Education, or within HEW, itself.

In other words, we feel if you are going to get innovations as you are talking about, it has to be unfettered. Otherwise, it is simply going to be a directive type, which might pigeonhole higher education, which we certainly don't want.

Senator JAVITS. That would lead me to believe that I should stand by my provisions and put it in HEW. Again, I don't want to get you gentlemen——

Mr. COSAND. Well, I am not going to get into that argument.

Senator JAVITS. I don't want you to.

Mr. COSAND. But we do want independence, Senator.

MEANS OF HIGHER EDUCATION AID

Senator JAVITS. Senator Pell and I have no differences in philosophy on that. I would like to ask President Hester a philosophical question. On the whole, what does higher education think helps the most, if we buttress the students ability to study by grant, work study, scholarship, loans, many other things, or if we pass the money directly to the intitutions?

To what extent then, if we do that, will the institution give us assurances of the possibility for seeing that every American of merit has a chance to go to college?

Mr. HESTER. If you were starting from scratch, I would answer that question the way you have asked it, Senator Javits.

Senator PELL. Excuse me, in answering that question, how do we handle the question of aid to religious institutions?

Mr. HESTER. I am not addressing myself to that particular thing but if we were starting from scratch to set up a system of higher education, and we could be given the funds to administer a scholarship program in a lump sum to every institution, that would be marvelous, but that is not the world we are living in.

We have got to have both. We have got to have funds granted to individuals so that they can go to college, so that their particular economic needs can be addressed, but we have reached a condition in the Nation now where the institutions that these youngsters want to go to simply are not going to be able to give them the educational experience they aspire to unless they are also aided.

So the effort has to be split, but both of them have to be performed, and we must begin receiving institutional grants from the Federal Government, because the State government, as you know, well, just don't have enough to carry this burden on. You are going to see the decline of a number of our fine colleges and universities.

I mentioned before you came in, Senator Javits, that the five largest private universities in New York State, Cornell, Rochester, Syracuse,

Fordham, Columbia, and New York University—I included one that was not included—invaded capital during the last 3 years in order to survive, to the tune of $77 million.

This is eating away at the strength of these institutions have attempted to build up over the years. We are going in the wrong direction. Rather than building up the institutions to which the young people can come, we are tearing them down, largely because of inflation, and this is why we are coming to the one power in the United States that can give us relief and saying we must have institutional support at this time.

Mr. COSAND. Senator Javits, on this, and I commented previously before you came in, during the past 5 years, I guess, there has been a move on the part of many colleges and universities, ourselves included, to grant faculty members time and remuneration for research and development, for innovations, if you will, for finding better ways to teach, better curricula, better courses.

I am now faced and so will other college presidents be faced with this squeezing, and I hate to use this word, but that is what some people say it is when you get squeezed—this luxury.

It is not a luxury, and if you're going to find a better way to teach you have to give funds to this type of research and development. That is where your national foundation can be of assistance in developing new methods that are innovative, and in many cases doing a better job for less cost.

STUDENT AIDS

Senator JAVITS. I would like to put you gentlemen on this tack. My own judgment is that we are going to be scratching very hard against ceilings in the massive amounts of money required for grants to higher education institutions and to students.

I think there are two directions in which we can move. One direction is an inventive way of lending the student money which he must repay. Incidentally, you should not deprive a poor student of this kind of aid because he is poor. I was very poor, too, and I became a relatively successful New York lawyer and a Senator, because my parents had absolutely nothing was not a criterion for me.

So I think you have got to think in terms of a loan, which under certain economic circumstances may be suspended in payment or waived, but everything else being equal, will be paid, even by the poor student. He would rather have a college education and debt than no education at all because we can't always get to him in terms of grants.

So that is one way, and I think you ought to enlist the banking community as your allies. Let them use their brains; they are very ingenious when it comes to money. They ought to be just as ingenious in terms of these questions which beset us here.

INNOVATIVE APPROACHES

The second thing I think you ought to use your ingenuity on, and come to us with your ideas, you could not have a more receptive audience than this one. We are hungry for ideas. We develop them ourselves, as Senator Pell said, but obviously you gentlemen are right there and can do a lot more than we.

This second area, I think, includes the question of why should you have colleges and universities do its own research and development?

Why shouldn't you computerize your business, like other businesses do? This would save enormous overhead. Hospitals are the biggest culprits in this. Their costs are astronomical.

Perhaps you are a bigger culprit as we being to look into your system.

I would hope, Mr. Chairman, that we could encourage the stellar gallery to be fruitful in these areas

I am giving you gentlemen the opportunity to participate on the inside of the legislative process. We can't do it all through the center line. They all have to be end runs and forward passes. We are suggesting you come up with some fruitful ideas for us.

Mr. COSAND. Mr. Chairman, we appreciate that, and we will come to you with recommendations.

COST OF INSTRUCTION

Senator PELL. I would also appreciate it if you could submit for the record a paragraph or two from each of you, your views as to the differences between costs of instruction and tuition. This is a question that we are trying to resolve in our own minds to ascertain how we can help you increase the number of students.

If any of you have any thoughts on what the differences are in your own institutions between cost of instruction and tuition, and also how you think the cost of instruction should be, or could be reduced from the Federal viewpoint, if there is any other way besides contributions we would be grateful for it.

Maybe you would like to comment on that right now.

Mr. COSAND. Mr. Hester would like to comment on it.

Senator PELL. That would obviate the written paragraph asked for.

Mr. HESTER. We have reached the limit, I believe, in our institutions. It will be 2,750 next year, and there is a prospect that it will be to 3,000 after that. I don't think there is going to be any sense in maintaining private institutions in a mixed economy of higher education when the State university system charges somewhat less than that, and the city university charges less.

So that we are not going to be able to increase tuition. We should find a method of reducing it if we are going to keep these institutions working side by side. We are proposing a very simple formula that would provide us with funds that would help us meet the emergency of deficits, but here eventually we had hoped it would become part of our normal funding so we don't have to go on increasing tuition.

This comes nowhere near meeting the cost of our instructions and perhaps 5 percent is what we are going—what we are suggesting as a portion of our costs that we believe would represent the Federal interest in the education that we provide each student, the remainder coming from the students themselves, from the States, and from other sources.

Senator PELL. Thank you, thank you very much, indeed.

COMMENTS ON STATE HIGHER EDUCATION STUDENT AID ACT (S. 1074)

Senator JAVITS. Mr. Chairman, I just want to make one request of the chairman of the group. It would be very helpful if we could get a comment from you on the bill S. 1074, which provides for certain payments to students by way of incentive grants, and also provides for educational opportunity centers in areas with major concentrations of low income population with respect to outreach.

If we could get your comment about it, I ask you for unanimous consent that it be inserted in the record.

Senator PELL. It will be inserted in the record.

I thank all you gentlemen. This is as distinguished and illustrious group a panel as we could have had. I thank you for your patience in coming here and sharing your knowledge with us. Your prepared statement will be printed in its entirety at this point in the record.

Thank you very much.

Dr. COSAND. Thank you, Chairman Pell.

It has been our privilege. Thank you very much.

(Information subsequently supplied and the prepared statement of the panel composed of Dr. Cosand, Mr. Branson, Mr. Hester, Mr. Kleckner, Mr. Rankin, and Mr. Baum follows:)

REC'D APR 22 1971

April 19, 1971

Senator Jacob K. Javits
Old Senate Office Building
Room 320
Washington, D.C. 20510

Dear Senator Javits:

When I, together with other college and university presidents, appeared before your subcommittee on March 31, you asked for our comments on your bill S. 1074. After carefully studying this bill, I concluded that I can support it enthusiastically. Your attempt to assist state student aid programs is sound in my judgment. States without such aid programs ought to be encouraged to establish them -- your bill would be an incentive to do so.

Please know that we appreciate your interest in, and concern for, higher education. Thank you so very much.

Sincerely yours,

Donald C. Kleckner
President

FOUNDED 1871

AMERICAN COUNCIL ON EDUCATION
ONE DUPONT CIRCLE
WASHINGTON, D. C. 20036

COMMISSION ON FEDERAL RELATIONS

Rec'd APR 9 1971

April 8, 1971

The Honorable Claiborne Pell, Chairman
Subcommittee on Education
Committee on Labor and Public Welfare
United States Senate
Washington, D. C. 20510

Dear Mr. Chairman:

During the course of our testimony on higher education legislation before your committee on March 31, Senator Javits asked that we supply for the record our position on S. 1074.

Our Commission considered this bill carefully at its most recent meeting and voted its support for the bill with one important proviso. This proviso is that language should be written into the bill which would require that the state matching program would go into operation only when appropriations for the Federal program are equal to the authorizations. In a sense, this would be a kind of Federal maintenance of effort provision comparable to the maintenance of effort the bill would require of the states.

Our concern is that the appropriation to fund the provisions of S. 1074 might be taken out of the funding we seek to maintain the Federal program at the authorized level.

The following are the numbers of students who have received initial year awards since the beginning of the program (the number for FY 1971 is USOE's estimate):

FY	First-time students supported
1967	123,165
1968	132,791
1969	146,858
1970	116,000
1971	112,900 (est.)

These figures show that in the face of increased numbers of eligible students and increased assertions of a determination to remove the financial barriers to a college education, we are experiencing a decline in the number of young people we can help get a start. While our Commission sees merit in the proposed incentive to have the states make a greater effort, we do not believe that they should be urged to do so until the Federal government itself is in a position to carry out its responsibilities.

While we see some merit in the proposed establishment of the educational opportunity centers in Part B, we believe that the objectives could be reached just as, or perhaps even more, effectively by providing larger sums for the support of Talent Search and Upward Bound.

Sincerely yours,

John F. Morse

Introduction

Mr. Chairman and members of the Subcommittee. You will see that the bulk of our testimony is not directed to any specific bill, but instead suggests what we believe the basic elements of a bill should be. The reason for our taking such an approach is that there are so many higher education bills before both Houses of Congress that we have not known how to bring them all into focus.

We would, however, like to supplement our basic testimony with some specific comments on S. 659, the bill authored by the Chairman and a number of his colleagues on this committee.

We would say first of all that if the bill were enacted just as it is written, and could be funded, higher education would be greatly strengthened. We see only one serious flaw in it, and that is that it does little to relieve the financial crisis in which all higher education, but particularly the private institutions, find themselves. We are no longer facing that crisis; it is upon us.

As noted elsewhere in our testimony, we are eager to see Title I of the Higher Education Act continued. We can also enthusiastically endorse the set-aside proposal in S. 659 that would authorize the Commissioner to make grants for projects seeking solutions to national and regional problems relating to urbanization and the like. In addition, the proposed metropolitan area program appeals to us greatly. The American Council on Education has recently established an Office of Urban Affairs because we believe that our colleges and universities have expertise in the area that has never been properly exploited. The American Association of State Colleges and Universities has long had such a division. This proposed addition to Title I, although modest in scope, might provide a breakthrough. Lastly, the provision for Evaluation is greatly needed. There are those who would abandon Title I, on the

grounds that it has failed. There are others who deny this, but add that if it has, it is because not much can be done with $9.5 million spread across the country. We in higher education and you in the Congress need something more than this kind of rhetoric. All we can say at the moment is that Title I is potentially one of the most valuable provisions in the Higher Education Act. The proposals in S. 659 would strengthen it.

We rely very heavily on the American Library Association and the Association of Research Libraries to provide the intimate knowledge the Committee requires of the way library programs must operate. We know that your Committee has heard extensive testimony from these experts. Nevertheless, we would make certain general comments about Part B of S. 659. First, it is impossible to overestimate the importance to colleges of the basic grants. Second, there is clear need for maintaining the training and research programs. Third, there is clear need for empowering the Commissioner to exercise discretion in the imposition of maintenance of effort requirements. Fourth, there are few examples in Federal legislation of a greater return on the dollar invested than in the Library of Congress cataloguing services. If it were not for this centralized service, our universities and research libraries would have to spend many times this amount, and with less completeness, in order to accomplish the same end.

Our basic testimony indicates the importance we attach to Title III--strengthing developing institutions. It is enough to say here that we support the language and the changes encompassed in Title III of S. 659. We particularly support the provision that empowers the Commissioner to waive non-Federal matching when, in his estimation, the matching requirement is unrealistic. There was something highly

ironical in the Administration's having announced some months ago that funds available for direct academic facilities loans were being reserved for the predominantly black institutions. The statement was made in good faith, and we in higher education supported it. Unfortunately, however, only two such institutions could make use of the funds, since the others were totally unable to raise the rest of the money necessary to build needed facilities. Matching requirements, to the extent that they stimulate a flow of funds from other sources, make sense. But in many cases, and especially in the developing institutions, they preclude the possibility of participation.

Our greatest concerns with the provisions in S. 659 revolve around Part D--student assistance. We can support entirely the thrust that lies behind this section, and we trust that we shall not seem overly wedded to the status quo if we fly a cautionary flag.

There is something basically appealing about the concept that every student should receive basic support as an entitlement if he comes from a family in given economic circumstances. We view the proposal for basic Educational Opportunity Grants as a kind of civilian bill of rights. It is greatly to be hoped that eventually every citizen may count on some form of basic support just as the returning GI can now do. Of course, that is the principle that lies behind our whole system of public education, which seeks (although it is a losing battle) to make higher education available to all at little or no cost.

We would question seriously, however, relating the stipend paid to each student to the income tax paid by his parents, or if he is independent of his parents, by himself. We say this for several reasons.

(1) If one were to determine the need of students by some rigid, arbitrarily imposed system of measuring financial strength, probably one would turn to the income tax system as the fairest that could be devised. Nevertheless, we know that it contains many inequities which we believe have been eliminated in higher education's development of need analysis systems.

(2) The tax paid by American citizens is subject to change because of economies unrelated to the costs of education. There are many in higher education who believe it essential that taxes be raised if the nation is to meet its social obligations. If this were to come about, parents trying to support their children in college would find that as their taxes were raised, the entitlement of their children to a basic grant would be lowered. Obviously then it would be necessary to rewrite the grant legislation each time the income tax laws were revised.

We believe that the system of student assistance already in operation, a system that you would extend in your bill, is adequate to meet current needs. We discuss this extensively in our basic testimony. If there are shortcomings in that system, they result primarily from an inadequacy of appropriations. If even close to the amount of money that would be required to fund your proposal for basic opportunity grants could be devoted to the existing programs, we believe that no student would face an insurmountable financial barrier to postsecondary education.

Under the existing system there is an incentive for parents to do what they can within the limits of their own resources to help their children through college. We would be fearful that under the income tax system, there would be every incentive for parents to declare their children not dependent, thus enabling them to qualify for the maximum grant.

A word may be in order about the provision contained in Section 409 that would make available a grant of $1,200, minus any tuition charged, to each institution in which a Federally assisted student enrolled. We feel sure that the Committee intended this as a form of institutional support and as an incentive for institutions to maintain or even lower their current fee structure. For public institutions that are struggling to keep fees low, this would be a tremendous benefit. For private institutions that must rely heavily on the student fees, since they do not enjoy state support and find that private philanthropy is lagging ever farther behind increased costs, the provision would be of no assistance. In general their fees are already well over the $1,200 figure.

Most of the rest of the proposals contained in S. 659 are covered in detail in our basic testimony. I would propose, therefore, that we move into our basic testimony. If the Committee has questions on other facets of S. 659 which seem not to have been covered, we shall be happy to answer questions or supply later responses for the record.

What I shall do, if it meets with your approval, is to summarize our positions briefly, and ask that our full statement be made a part of the record.

Intro-5

OPERATING GRANTS

In a time of fiscal constraints, it is imperative that first things come first. In the case of higher education, the first priority is, without question, grants to institutions for operating costs which will enable the higher education system to maintain viability and perform its basic mission.

There are three basic components in the maintenance of a system of higher education. One is students -- many of whom will need assistance to meet the costs of education. We agree with President Nixon that no qualified student should be barred simply for lack of money. But there is more to educational opportunity than that. The second component is capital investment to provide the plant - dormitories, classrooms, laboratories, etc. The third is operating money to meet the ongoing costs of institutions. These costs are accelerating rapidly. Light, heat, fuel, salaries, and supplies - all are increasing in cost. It is they which constitute the real financial crisis in higher education today.

As the higher education community and the Federal Government join in a partnership to educate our young people, it is necessary that the character of the financial problem involved in this endeavor be clearly understood. It would be cruel indeed if the hopes of young people were raised by promises which cannot be kept because institutional resources cannot meet them. If fiscal constraints seem to preclude the provision of adequate support, we should tax ourselves to provide the funds. In any event, there must be a proper mix of funds for student assistance, capital investment and operating costs in order to educate as many additional students as possible. Providing money only for students will magnify the other two needs, not make them go away.

No institution charges all its students the full cost of their instruction. An additional student, therefore, is no financial boon to a college; instead he represents an additional cost, which, somehow, must be met. To the college, success

in meeting the goal of wider enrollment results in fiscal hardship. Even if not a single student is added to future enrollments, colleges now are strapped for operating funds today because of the very substantial enrollment increases in recent years. A million and a half students have been added to enrollments since 1965. Institutions are stretched to the breaking point from this influx of students and from rising prices which escalating tuition charges have not been able to match.

If the Federal Government did not help a single additional student to go to college, the higher education system still would face financial strains of crisis proportions. If the Government adds to those strains by providing aid only for students, the predictable result will be disappointment for hundreds of thousands of young people.

What is needed now from the Federal Government is support to institutions to be used to meet their day-to-day operating costs. It should be understood that while cost-of-education grants to provide compensatory education for disadvantaged students are necessary, they do not constitute aid to the institution. They merely pick up the specific extra costs required for educating this kind of student.

What are the alternatives to general aid to the institution? One suggestion has been made that tuition be increased to cover the full costs of education, with long-term loans to students to enable them to pay the entire charges. We oppose this proposal. It makes the institution a marketplace where the student, as a consumer, has the exclusive right and the power to decide what is "relevant." It rests on the mistaken belief that only students benefit economically from higher education, a belief which ignores the substantial benefits to society. And, finally, it undoubtedly will reduce the number of students - just the opposite of the President's goal.

Another suggestion proposes that categorical aid (project grants) aimed at a

public purpose be the sole means by which the Government helps institutions meet the burdens imposed by rising enrollments. Project grants have been, and will continue to be, essential to higher education, but they alone cannot fulfill the institutions needs, since they can be used only for specific enumerated purposes and do not cover the ordinary costs of running any institution.

Some Principles for Operating Grants

At this juncture it should be useful to elaborate on what we are talking about - and what we are not talking about.

1. We are proposing direct Federal aid to all institutions, private as well as public. Operating grants should be made on the basis of objective, easily measured factors. Since the amount of the grant would not be discretionary, but determined by the application of objective criteria, there is no point in having the grants distributed by the states. This would merely add another administrative layer to the distribution process.

2. We are not recommending the substitution of aid to institutions for aid to students. We feel that aid to institutions and aid to students must be provided simultaneously.

3. We are not suggesting aid for operating expenses as a replacement for aid for construction of buildings. Buildings are as necessary to accommodate students as the money to make up the difference between what the student pays in tuition and the cost to the institution of instructing him.

4. Operating grants should not be restricted to any category of educational costs, such as faculty salaries, innovative programs, interest on indebtedness and so on. Operating grants should be unfettered funds, which each particular institution could use where and as needed to educate its students and operate its facility.

5. All regionally accredited institutions of higher education should be eligible for operating grants. Each type of institution serves a purpose, or a mix of purposes, important to society - from short-term vocational training to the

education of Ph.D.'s in science.

6. Operating grants will encourage innovation. A central barrier to innovation in higher education is that it costs money. Unless an institution has a reasonably firm financial base, it cannot afford to devote the leadership, talent and money to experimenting with new methods and devices. The idea that colleges and universities must be restructured and reformed before general support is provided is a prescription for disaster. Change and adaptation are needed, and support for operating costs is essential if large scale innovation is to come about.

7. Institutions should be accountable for the funds they receive in operating grants. Institutions of higher education already are accountable in varying degrees to their students, the students' parents, alumni, donors, foundations, trustees, the Federal Government, and, in the case of state institutions, to their legislatures. The addition of Federal grants for operating cost would merely add another link to this accountability chain. The academic community stands ready to work with others or on its own in developing guidelines for holding institutions accountable for the operating grants they receive.

The Size of the Program

A program for support of operating costs should provide a significant contribution to the general educational expenses of all eligible institutions. The minimum annual payment should be large enough to permit a meaningful contribution to the institution's educational capability.

A grant in the range of 4.5 to 5 percent of the institution's general educational expenses is a reasonable minimum level. A grant at this level has been found to provide significant, though not sufficient, assistance under the New York state program of institutional assistance.

The general educational expenses of institutions which would be eligible for grants approximate $10 to $12 billion annually. Accordingly, a grant in the 4.5 to 5 percent range would require from $450 to $600 million. In view of the desperate financial condition in which most institutions find themselves, we would hope that the authorized figure might approximate $1 billion.

How such a total sum would be distributed among institutions depends upon the formula used. The urgency of obtaining additional funds for operating expenses is so great that the details are secondary. Many good formulas already have been worked out. A satisfactory formula should be simple and equitable. It should recognize that lower division undergraduate education is less costly than upper division, and both less expensive than graduate work toward the master's or Ph.D. degree. The portions should be weighted accordingly.

A word should be said about graduate work and especially that which produces Ph.D.'s. Much is said currently about the surplus of Ph.D.'s, and indeed there is a temporary surplus in some fields. But the research capability which is tied inextricably to the production of Ph.D.'s is a national asset of inestimable value, costly to develop and almost prohibitively slow and expensive to replace if it is allowed to deteriorate. This capability was expanded by universities at the behest of the Federal government, which has now reduced its support about 12 percent in real terms below the peak level reached in 1968. Thus it is that apparently rich universities are sorely beset to maintain a national resource which should be the concern of us all. The temptation to over-react to short-term over-supply should be resisted.

We are grateful to the ranking minority member of the full committee, Representative Quie, for introducing in the last Congress and again in this 92nd Congress, a bill providing institutional support. (Its counterpart last year was introduced by Senator Dominick and his colleagues as S. 3817.) The formula in Mr. Quie's bill

would award aid on the basis of baccalaureate degrees awarded by each institution, weighted in such a way that smaller institutions would get a proportionately larger share. Community colleges are provided for by a 20 percent set-aside. Mr. Quie's formula is a good one. At the same time, formulas may be constructed many ways; and Mr. Quie has generously invited us, in an exchange with President Harrington last year, to suggest others.

We believe that a formula which recognizes the differences in costs of various levels of education and the variety of functions performed by institutions of higher education, would more satisfactorily distribute Federal assistance. Such a formula would employ an ascending scale of weightings which would begin with lower-division undergraduates and increase for upper-division undergraduates, master's degree students and doctoral candidates. Allotments would be based on full-time equivalency as measured by credit-hours earned. A double payment for, say, the first two hundred students in each of the undergraduate levels would accomplish the objective of increasing assistance to smaller institutions. This is the kind of formula we prefer because it is framed more flexibly to the costs that are actually sustained at the various levels of instruction.

T-6

Student Aid

We submit that existing student aid programs, created in a series of measures beginning in 1958, have, within limits of often inadequate appropriations, been remarkably successful. If they could be funded to meet the approved institutional requests for funds, we would come close to achieving the goal so often proclaimed--the removal of all financial barriers to postsecondary education.

The following elements in the existing programs seem to us sound, and we see no reason to change them.

1. The need of each student, or to put it another way, the resources a student and his family can provide toward the expenses of his or her education, is determined by the institution under systems approved by the Commissioner.

2. Opportunity grants of up to $1,000 are awarded to the neediest students. This in effect means that if a student can provide no resources of his own, he is eligible for the maximum grant. If he can provide as much as $800, he is eligible for only $200 in grant assistance.

3. Beyond this basic grant all students demonstrating need are eligible for work-study assignments. Theoretically, this means that they can earn as much as $720 during the academic year, assuming 15 hours of work per week at the prevailing minimum wage of $1.60 an hour. In fact, typical earnings are closer to $450. This reflects not only the fact that many students cannot possibly carry a 15 hour load of outside work but also that in many areas of the country and on many campuses there is not enough work available.

4. National Defense Loans are available to bridge the gap between the resources already described and the expenses the student must meet. They also are available to the student whose academic problems are such that he must devote full attention to them without the burden of a job during the college year.

It seems to us hard to fault this system. It assures that the greatest amount of aid will go to the neediest students. Equally important, it recognizes that need is not absolute, but relative, and that with college costs what they are, even families and students in the so-called middle income brackets require assistance.

The key to the system requires that it be institutionally administered. The student financial aid officer can determine need on an individual basis and put together an appropriate mix of assistance. He can take into account aid being received by the student from other sources, such as Social Security, Veterans benefits, and state and private scholarships and loans and adjust the mix accordingly. In 1958 when aid programs began with the National Defense Loan Program, there were few professionals in the field, and need analysis was in its infancy. That situation has changed. There are undoubtedly still institutions inadequately staffed with competent student aid officers, as, indeed, they are inadequately staffed with other professional administrators. They should be and are being helped by both the Office of Education and professional societies to upgrade their operations. But we would be reluctant in the extreme to see the present system abandoned and a new one established, when we see no evidence that the approach in the last decade and a half has failed or even has serious flaws.

We do have some suggestions for change in existing programs, and since we have testified on them in the past, we shall touch on them only briefly today. Many of them are designed to effect economies so that we may stretch available dollars farther.

The Guaranteed Loan Program. Ideally, we see this program as providing assistance--call it loans of convenience--to families and students who need to stretch out over a longer period of time the payment of college expenses. Viewed in this light, there would appear to be little need to subsidize the program, other than to guarantee payment to the lenders. The National Defense program should be the vehicle for loans where demonstrated need exists.

In practice, unfortunately, appropriations for NDSL have never been adequate to meet fully demonstrated needs, and, therefore, the Guaranteed program has picked up the slack. As long as this situation prevails, we would urge that the interest subsidy feature of the Guaranteed program be retained, but that the subsidy be available only when the lender is furnished a certificate by a college student aid officer indicating the amount of loan the prospective borrower needs to balance his budget. All other borrowers should pay the going interest rate as established by the Commissioner.

Interest Subsidy. We suggest that the committee discontinue the interest subsidy for all students under all programs five years after they have left the academic institution. By that time they should be launched in their careers and able to meet interest costs at market rates.

Forgiveness of loans. We continue to believe that forgiveness of loans for borrowers who enter particular careers serves little purpose and that the funds devoted to forgiveness might better be used to assist students when they have the greatest need, that is, when they are students. We favor its

total elimination, but can see certain merits in it where workers go into really deprived areas, rural and ghetto, at salaries not commensurate with those paid in more prosperous areas.

Flexibility. It will be clear from our testimony that we favor maintaining separate identity for Opportunity Grants, Work-Study, and NDSL loans. In financing students, each award is built on the foundation of the other. Nevertheless, we would favor authorizing a financial aid officer to shift funds back and forth among programs to to the extent of 10 - 15 percent of its institutional allocations. This would give him the flexibility he needs to meet the particular requirements of each student.

Secondary Market. Only with great reluctance would we see funding of NDSL removed from direct appropriations. With $1.9 billion already in the revolving fund, we see a real possibility of this program's eventually becoming self-sustaining, particularly if we eliminate forgiveness. Getting a program "off the budget" does not mean that the Government's commitments are any less. They may even be greater in the long run. Nevertheless, we sympathize with those who must manage the Federal budget and cope with its inability, unlike that in any other American enterprise, to distinguish between an outright grant and a gilt-edged loan. Therefore, we do not oppose, although we cannot support, the concept of getting NDSL off the budget. The Congress must decide, after hearing both sides, which approach in both the short and long run is economically sounder.

We do recognize that commercial lenders, and particularly banks, face a liquidity problem. This has nothing to do with yield or risk. Student loans must compete with all other demands for funds, and yet they are, by their very nature, long-term (10-15 years) with no return of principal or

interest for several years. With no expertise in how such an institution would work, we do, however, support the creation of a secondary market that would warehouse or buy student loan paper, issued by commercial lenders, that would give them the necessary liquidity to make new student loans.

Lastly, we would favor extending all student aid program to part-time students. There will be difficulties entailed, but we are confident that the financial aid community can work them out. As we move into an era of perhaps life-long, in-and-out, education we can no longer afford to think only of the 18-21 year old full-time student as worthy of support. We also think the time has come to support, through the various Federal programs, students in proprietary schools which are providing quality training. Many such schools offer the only rational programs available to many students. If the Congress sees fit to include students attending these schools in all Federal programs, we hope it will write the eligibility and accreditation requirements tightly and demand an annual report from the Office of Education on the ways in which it determines eligibility and ineligibility.

Construction of Academic Facilities

As we mentioned earlier, the assurance of educational opportunities depends on the provision for physical space for, as well as financial aid to, students, and the necessary funds to keep colleges in operation. This Committee pioneered in establishing grant and loan programs to enable institutions to build new facilities in order to serve the increasing number of students entering higher education. Regrettably, appropriations in the last few years have not matched authorizations.

Let us examine the need as it exists today. Even if we could assume that all institutions, public and private, four-year and two-year, had adequate facilities at this point, they would still need aid for expansion to meet increasing enrollments that can be anticipated for the remaining years of this decade. Clark Kerr, in a Carnegie Commission study, estimated that enrollments would continue to rise until the late 1970's when they would peak; then level off during the 1980's only to pick up once again in the 90's.

A report entitled "Federal Support for Higher Education Construction; Current Programs and Future Needs", published by the Office of Education in the autumn of 1969, estimated that by 1977 there would be 3.2 million more college students than in 1969. The report stated that "there is an urgent need to begin the long overdue job of rehabilitating and converting obsolete and substandard academic facilities in many institutions." It further estimated that $2.8 billion per year would

be needed from 1970 through 1974 for construction of academic facilities.

The Administration's plan to aid economically disadvantaged students will, according to the testimony of Office of Education officials, bring into the colleges each year approximately 75,000 high school graduates who would not otherwise pursue a higher education. It is likely that other student aid plans introduced in pending legislation may have similar impacts on enrollment. These students will further swell the normal enrollment increases which may be anticipated.

The demand for new facilities takes many forms. In urban centers large numbers of students who a decade ago might not have considered the possibility of college-level education now are demanding it, and require accommodations. On well established campuses, the need for academic facilities is affected to an important degree by changes in instructional methods. New kinds of scientific laboratories and language laboratories are required. There is a growing demand throughout the country for training in such fields as allied health sciences, which may require specialized facilities that do not exist on enough campuses today.

The higher education community has been involved in experimentation with new forms of postsecondary education for some time. Special courses and programs for adults are being expanded. In urban areas colleges and universities are opening extension centers in storefronts to serve disadvantaged persons residing in the community.

While the term "facilities" generally connotes the idea of constructing new buildings, we wish to emphasize that colleges and universities are confronted with a need to alter and rehabilitate older structures as well as build new ones. At times, new students can be accommodated by converting an obsolete gymnasium into a classroom building, provided the funds are available for the necessary wall separations, corridors and the like. For example, in Denver, Colorado, a relatively new institution, Metropolitan State College, was established to serve the center city. It has been doing that, but its campus consists of 11 buildings strewn through the downtown area of Denver. Few of these buildings are new. The greater number consists of converted older structures. With better funding, the structures chosen for the campus might have been closer geographically and better suited to the needs of the students and faculty. It would be more efficient to operate that campus if students were not literally required to drive from class to class because of the distance between classrooms.

To meet the needs of colleges such as this, Federal funds should be granted for rehabilitation. Colleges and universities are very conscious of the shortage of funds for such improvements. Studies of new techniques are constantly underway to determine more efficient means of using existing facilities and how to get more facilities for the dollars available. But

institutions can do only so much with the existing space they have. Ironically, funds made available often may be used only for new construction and not for renovation. At the state level, funds for renovation are scarce to non-existent. For example, a recent study at the University of California indicated that the institution was operating with $6 million of deferred maintenance and needed tens of millions of dollars for alterations that would enable it to accommodate an increasing number of students. There has been no state money available.

The details in the 1969 Office of Education report previously cited make it clear that the Higher Education Facilities Act of 1963 played a major role in enabling institutions to add academic space providing a capacity for almost 700,000 students. It is worthy of comment that, while the Act was not focused on the disadvantaged, the fact that it increased the capacity of 1,600 colleges and universities made it possible for many of these institutions to admit more low-income students who were being assisted by Federal programs.

This panel, representing the great majority of institutions of higher education, recommends continuing both Federal grants and direct loans for the construction of academic facilities, as well as the program of interest subsidies on loans obtained in the private market. We feel, as we did in 1963, that reliance solely on loans will inevitably lead to increased fees for students. Therefore, we recommend $1 billion

annually in authorizations for grants for building needed academic facilities. We continue to support the direct loan program as well as the interest subsidies, since some institutions still find it almost impossible to borrow in the private market. We recommend that Congress authorize $500 million annually for the two loan programs.

Once again, we wish to emphasize that while we recognize the pressing need to increase student aid, we do not see how institutions can reasonably be expected to continue absorbing more and more students without the means of preparing facilities in which to educate these students.

III-5

Miscellaneous Programs

Finally we come to a number of categorical programs that have, through the years, proved their worth in developing specific competences or overcoming specific deficiencies in higher education. We would urge this committee to continue the authorizations for all of them. We refer explicitly to the following programs:

Aid for Disadvantaged Students. Three programs--Upward Bound, Talent Search, and Special Services for the Disadvantaged--are designed especially for students whose educational backgrounds are not on a par with their colleagues'. All three are needed--Upward Bound and Talent Search to seek out and prepare disadvantaged students for college, and the Special Services program to help colleges provide remedial and tutorial assistance to them once they are enrolled. We urge a generous authorization for the Special Services program, since these services are costly. Without extra help, colleges cannot provide them, except at the expense of other services and programs for the student body as a whole.

Aid for Developing Institutions. A sizable number of institutions, located largely, but not entirely, in impoverished areas of the country, are performing extraordinary service in educating minority students. Their resources are totally inadequate to their task. It was with great foresight that this committee sponsored a program especially for these institutions in 1965. With more and more minority students, particularly blacks, seeking a higher education as the years go by, it becomes even more essential to assist the developing institutions to upgrade the quality of their education.

Community Services and Continuing Education. Through the years, this nation has been generous with its agricultural extension funds, an investment which has paid a rich return. Surely in a nation now largely urban and suburban, the time has come to invest as handsomely in urban extension work. There is an acute need to marshal higher education resources to attack the many social and physical problems of the urban society. Many colleges and universities have in some measure related their programs to urban needs, but few have done as much as they could do if they had more adequate financial resources. Therefore, we recommend continuance of Title I of the Higher Education Act of 1965 with a substantial increase in the $60 million now authorized (but not appropriated) for this program.

College Library Resources. It is axiomatic that a college must have a good library to provide a good education. The library program under Title II of the Higher Education Act, though modest in its funding, has been a godsend to many institutions, and a major source for acquisitions for the libraries of the most impoverished colleges. Inflation has hit library materials costs, as well as other costs, since Title II was originally enacted. We would hope for a generous authorization for its continuance.

Instructional Equipment. The instructional equipment program under Title VI of the Higher Education Act is another example of a program which has produced results of greater proportion than the modest sums provided for it. The State Commissions responsible for allocating these funds are unanimous in their belief that few small Federal programs have been more beneficial to colleges and to students than this one. For many institutions, Title VI has afforded the one source of funds they could tap to make use of new educational technology.

Fellowships. The Administration has proposed phasing out the fellowship program enacted in 1958 under Title IV of the National Defense Education Act, on grounds that the nation now has an oversupply of Ph.D.'s. We feel that this would be a grave mistake. To cite an example, we recall that in 1951 there was an oversupply of engineers who couldn't find jobs. Immediately engineering enrollments in the colleges declined. Just a few years later engineering schools and industry were setting up enormously expensive crash programs to train engineers because the shortage of them was so acute.

We would caution against moving too rapidly in the current period of transition in the employment of Ph.D.'s. The long-range relationship between the demand for, and supply of, these highly trained persons is by no means clear. We may not need as many Ph.D.'s as we have produced in recent years; but neither can we afford to dig up the pipeline. We recommend, therefore, a continuation of the NDEA fellowship program at a minimum level of 1,500 new fellowships per year.

We also recommend a continuation of the program under Part E of the Education Professions Development Act to train college teachers and administrators at less than the doctoral level. This program is needed to train teachers with special skills for special kinds of teaching, and is of particular benefit to our burgeoning community colleges.

Language and Area Studies. The expenditure of modest sums under Title VI of the National Defense Education Act has enabled colleges and universities to develop a foreign language and area study capacity that was almost totally lacking when the ACT was passed in 1958. We now have strong centers spread through the country with competence in languages once rarely studied. It is essential to continue this program in order not to lose the expertise so long in building.

The Higher Education Foundation

We support the Administration's proposal to establish a National Foundation for Higher Education because we believe that innovation and experimentation in higher education are urgently needed, and because we are convinced that only support by the Federal government will make possible the range of innovation that we consider desirable.

In our judgment the five purposes of the Foundation as stated in Section 3 of H.R. 5192 are clear, important and attainable. The kinds of activities which the Foundation is authorized to support by Section 5 (a) of the bill are practical and of high priority in adjusting higher education to new needs and opportunities. The authority in Section 5 (b) to make studies in the field of post-secondary education, including studies related to post-secondary education finance, organization and management, are in our judgment an integral part of the activities of the Foundation, particularly because it must be able to assess critically the innovative efforts which it funds. Any bill which would state the purposes and activities in the general terms stated in H.R. 5192 would in our opinion be satisfactory.

We see no conflict or overlapping between the proposed Foundation and the proposed Institute for Education. The Institute will concentrate on research relating to education, concentrating but not confined to the pre-school, elementary and secondary levels. The Foundation will concentrate on innovation and implementation at the post-secondary level. The Institute will be heavily engaged in research on such matters as the learning process, motivation, family and cultural influences upon learning, curricula and so forth. The Institute would not be heavily engaged in supporting or evaluating innovative efforts in higher education, as would the Foundation. Since both organizations are related to education, there will be a border area where the legitimate interests of the two organizations should and will converge. Reasonable administrative judgment on the part of the Directors of the two organizations, together with use of authority to transfer funds, would resolve any problems that may arise.

We wish to commend the Secretary for modifying his proposal for the Foundation so that operating functions are removed from the Foundation. We advocated this removal, and now find the statement of objectives and the activities entirely acceptable.

Since the Foundation is a new concept, it is our earnest hope that the proposal will be discussed intensively with a view to arriving at a proposal which will become law.

As contrasted with the statement of purposes and activities, we see a need for further discussion and modification of the portions of the bill which spell out the relative authority and responsibility of the Secretary, the Director of the Foundation and the Board of the Foundation. Two separable but related problems are involved here -- the degree of independence which the Foundation should have, and how the independence of institutions of higher education is to be preserved when the Federal government can to some degree decide the direction and nature of change in higher education.

We consider it to be of the utmost importance that the Foundation be able to act with a high degree of independence. By this we do not mean that the Foundation should be another branch of government. It should be broadly responsive to the policies of the President. However, it should not be the machinery for administering to higher education prescriptions decided upon by government. The Department of Health, Education and Welfare and other agencies of the Federal government should be a source of ideas for the Foundation to consider, but it should not have executive authority to tell the Foundation which kinds of innovation should or should not be tried. In this connection, we were pleased to note that in his testimony before this Committee on March 18, Secretary Richardson was sensitive to this problem. He said: "I think it important to emphasize that we visualize the Foundation as operating under a strong higher-education Foundation board and a strong director. ...it is not, I can confidently say, a relationship under which we would expect the Commissioner to tell

the Director what to do but rather a relationship designed ... to try to make sure that the pieces fit together in a complementary way." Moreover, the Commissioner of Education expressed these views in testimony before this Committee on March 18: "The Director of the Foundation would not be a handmaiden, if you will, of a Commissioner; he would not be a person subordinate to the Commissioner in the sense of taking direction. I would see the roles as very compatible, collegial and mutually supportive."

However, we have some reservations as to the adequacy with which these concepts are stated in the Administration's bill. For example, it states (Section 2) that the Director of the Foundation, "shall perform such duties in carrying out this Act as are prescribed by the Secretary of Health, Education and Welfare." This conveys a tone of subordination rather than independence.

Without suggesting that the Foundation for Higher Education be outside the Department of HEW, we see in the National Science Foundation some structural principles and some internal arrangements which deserve careful consideration. This consideration is indicated because the functions of the proposed National Foundation for Higher Education and the National Science Foundation are broadly analogous. Both would provide governmental funds to institutions -- one for research and one for higher education. The innovative as contrasted with the research function of the Higher Education Foundation is stronger, but this is not a critical difference. Both would provide governmental funds to areas of activity that must be protected against the imposition of central authority. Yet both must have a set of broad purposes which will inevitably influence the actions of individuals and institutions.

One might say that science, as contrasted with higher education, is not beset by deep philosophical differences and involved in political decisions. However, science on the national scene is in fact as deeply involved as is higher education in fundamental and controversial questions relating to the purposes of the entire undertaking and the proper role of the Federal government. One need only reflect on

the deep disagreements as to the responsibilities of the National Science Foundation for the solution of social problems to realize the close parallels between the way in which science and higher education become politically involved. Incidentally, it is worth noting that the National Science Foundation has retained the respect of all parties concerned, and that it has not been politically dominated in a partisan sense, in large part because its structure and distribution of authority have been worked out with great care.

In the light of this background, let us look briefly at the structure and distribution of authority proposed in H.R. 5192. It is simple. The President appoints the Director, who performs duties prescribed by the Secretary of HEW. (Section 2) A Higher Education Foundation Board advises the Secretary and the Director on matters of general policy, and prepares an annual report to the Secretary. (Section 4). The President designates one of the members of the Board as chairman. (Section 4). The Secretary is empowered to make grants or contracts to carry out the purposes of the Act.

Proposals for Modification

Recalling the dual objective of giving the Foundation an adequate degree of independence and of protecting the independence of institutions of higher education -- objectives which we share with the Secretary -- the bill as written does not in our judgment present an optimum solution.

1. Authority of the Board. As a central means of assuring an adequate degree of independence, we suggest that the Foundation (as is true of the National Science Board) be given unambiguous authority to set the policies and priorities of the Foundation for Higher Education, after consultation with the Secretary. H.R. 5192 does not clearly state who sets the policies and priorities of the Foundation but this authority is not given to the Board. In fact, the Board has only two functions, as stated in Section 4. It advises the Secretary and the Director with respect to matters of general policy, and it prepares an annual report to the Secretary.

We believe that an annual report should be prepared by the Board, but that it should be sent to the Secretary for transmission to the President, and for submission to the Congress. We also believe, as in the case under the National Science Foundation, that the act should specifically empower the Board to make in its annual report such recommendations as it deems timely and appropriate.

This degree of independence of the Foundation does not relieve the Office of Education of authority and responsibility for innovation. The activities of the Foundation would simply demonstrate for the Office of Education, as well as for others, which experiments and innovative modes of higher education are productive and ready for large-scale application.

It is important to recognize that not all innovations work, and that all experiments do not succeed. One of the values of a Foundation is that it, to a greater degree than a standard operating arm of government, is designed to take chances on untried ventures and to lose some bets without being accused of incompetence, poor judgment or wastefulness.

2. Composition of the Board. In our judgment, the composition of the Board is an extremely important matter. H.R. 5192, Section 4(b) requires only that the members be broadly representative of the general public as well as the education community. We believe that this is highly desirable, but that twenty years of experience with the National Science Foundation have demonstrated that additional factors are important. For one thing, the members should be eminent in the field of higher education and public affairs. We do not want this Board to be a haven for mediocrity. The members should be selected solely on the basis of established records of distinguished service as the National Science Foundation Act provides. Finally, they should be so selected as to reflect views of leaders in all areas of the Nation and all major elements of higher education. We stress the need for broad representation on the Board.

In the selection process we believe that the President should be requested - again following the lead of the National Science Foundation Act - to consider recommendations of the National Association of State Universities and Land-Grant Colleges, the Association of American Universities, the Association of American Colleges, the Association of State Colleges and Universities and other educational organizations.

3. Chairman of the Board. To emphasize the independence of the Board, we believe that it should elect its own chairman, as is the case with the National Science Board, rather than to have the chairman appointed by the President.

4. Director of the Foundation. While we agree that the President should appoint the Director of the Foundation as provided in Section 2 of H.R. 5192, we believe that this authority should be greater and more explicit than the bill provides. As in the case of the National Science Foundation, we believe that the Director should exercise all of the authority granted to the Foundation (including authority delegated by the Board) and that all of his actions should be final and binding upon the Foundation. Under H.R. 5192 as written, the Secretary alone is authorized to make grants or contracts. While he would undoubtedly delegate this authority to the Director, the ultimate authority (including authority to set conditions under which the delegation would be withdrawn) would remain with the Secretary. We suggest that failure to lodge authority to make grants and contracts in the Director, together with the requirement that the Director carry out such duties as the Secretary prescribes, reduce the independence of the Foundation to such a low level that it will be difficult to attain the goals which we share with the Secretary.

Incidentally, we wish to point out that the National Science Foundation has devised a system for making grants and contracts which has the full confidence of the higher education community. It is based upon a concept often missing in governmental operations -- wide and open participation and involvement by the groups concerned with decisions, and avoidance of predetermined answers. A National Foundation for Higher

Education free to adopt the principles and procedures for contracts which have made the National Science Foundation such a conspicuous success would be welcomed by higher education.

Finally, the Director should be required in exercising his executive functions to consult with the Board to ensure that the programs which he formulates are in conformity with the policies set by the Board.

5. Place of the Foundation in the Department. We do not have a precise formula for stating the place of the Foundation in the Department, and the relationships between the Foundation, the Secretary and the Commissioner. Some of the suggestions made above relate to this question, but they do not provide a complete answer.

We suggest that the Foundation be considered as an element of the Department with a collegial relationship with the Secretary, as the Secretary and the Commissioner have proposed. We also suggest that the Commissioner of Education be a non-voting member of the Board of the Foundation in order to ensure a close working relationship between the Department and the Foundation. (We suggest a non-voting status not to reduce the status of the Commissioner, but to retain his freedom of action in adopting or rejecting ideas put forward by the Board.) Finally, we suggest that the budget proposed for the Foundation be presented by the Secretary to the President in a single lump sum for contracts, plus another sum for administrative expenses. For reasons stated above, we believe that the Foundation should be empowered to make grants and contracts and to do so under terms and conditions set by the Foundation. Finally, we note that Presidential appointment of the Director and the Board are means of ensuring the proper degree of responsiveness to the general policies of the administration in power.

Consideration of suggestions of this sort should lead to a reasonable resolution of this thorny problem.

Conclusion

Our proposals are made with the intention of establishing the principles, structure and relationships which will attract the best people, enhance confidence in the

independence of the Foundation, protect the independence of colleges and universities while encouraging them to be responsive to needs for change, lead to the formulation of superior programs, and enhance the quality of administration. We do not make these proposals dogmatically or with the feeling that we know the ultimate answer to all of the problems, but with concern that the existing proposal needs modification in the general direction which we suggest.

In conclusion, we wish to emphasize our belief that innovation and general institutional support are related. General support is needed if productive changes are to be widely adopted. Poverty can, and often does, inhibit change. On the other hand, specific funds for innovation and experimentation are necessary to show what will and will not work.

Senator PELL. The final panel today is the Panel on Legal Education. Prof. Alfred Conard, president of the Association of American Law Schools, will act as the de facto chairman of the group.

STATEMENT OF A PANEL COMPOSED OF PROF. ALFRED F. CONARD, UNIVERSITY OF MICHIGAN LAW SCHOOL, PRESIDENT, ASSOCIATION OF AMERICAN LAW SCHOOLS; HON. EDWARD F. BELL, CIRCUIT JUDGE, WAYNE COUNTY, DETROIT, MICH., AND PRESIDENT OF THE NATIONAL BAR ASSOCIATION; PROF. MORRIS L. COHEN, BIDDLE LAW LIBRARIAN, UNIVERSITY OF PENNSYLVANIA LAW SCHOOL, PRESIDENT, AMERICAN ASSOCIATION OF LAW LIBRARIES; EDWARD W. KUHN, ESQ., MEMPHIS, TENN., CHAIRMAN-ELECT, SECTION OF LEGAL EDUCATION AND ADMISSIONS TO THE BAR OF THE AMERICAN BAR ASSOCIATION; WILLIAM PINCUS, ESQ., NEW YORK CITY, PRESIDENT, COUNCIL ON LEGAL EDUCATION FOR PROFESSIONAL RESPONSIBILITY, INC.; PROF. MICHAEL H. CARDOZO, EXECUTIVE DIRECTOR, ASSOCIATION OF AMERICAN LAW SCHOOLS

Mr. CONARD. Mr. Chairman, and Senator Javits, we are very happy to appear to present the special interests of legal education in the general cause of higher education.

Senator PELL. May I interrupt you here to say how much I welcome you, how much I regret not having taken advantage of the facilities you offered many years ago, being in a minority of the Senate who is not a lawyer, and wishes he were.

Mr. CONARD. Thank you, Senator. We wish you were, but lawyer or not, you have long shown a deep and sympathetic interest in legal education, for which we are deeply appreciative.

On my immediate right is Prof. Morris Cohen, president of the American Association of Law Libraries, and on his right is Edward W. Kuhn, past president of the American Bar Association, and chairman-elect of the bar association's section on legal education, and on his right is the executive director of the Association of American Law Schools.

On my immediate left is Judge Edward F. Bell, of the National Bar Association, the president, and circuit judge of Wayne County, Mich., and on his left is William Pincus, president of the Council on Legal Education for Professional Responsibility.

Accompanying us, also, is John Tracy, of the American Bar Association, Washington office, and Peter L. Wolff, of the AALS Washington office.

We will be brief because we know of the long-time and loyal interest and support which you, Senator Pell, and Senator Javits, have given to higher education and to legal education.

We are here to mention the special needs of law schools as they are differentiated from other higher education needs. In the first place we would like to stress the importance of tailoring all higher education programs so that they do not omit professional education, and particularly legal education, and this has often happened because the main educational pitch is commonly divided into undergraduate education and Ph. D. education.

The health sciences commonly get grants under separate order, and consequently legal professional education is frequently neglected.

To take a specific example, we called attention in our last year's report to the fact that educational opportunity grants had been so stated that they applied only to undergraduate students.

We think that is particularly appropriate that they should include law students, because we believe that nowhere more than in the law do the underrepresented fractions of American society obtain an opportunity of access to positions of influence and power, and consequently recognizes that part of our social crisis today is the uniting of our minority groups with the establishment, we think there is a special importance that legal education opportunities should go pari passu with other educational opportunities.

Furthermore, we think the crisis in our society today, the crisis in our society, the crisis of minority rights, of civil rights, the crisis of safety in the streets, the crisis in our international relations are problems of justice and the study of justice and the education of people for the administration of justice is a central problem throughout society and it must not be neglected.

I will ask you to simply incorporate my printed statement in the record and I will only mention to you at this moment, Senator, three principal points that are involved in it, if I may.

Senator PELL. I might add here that all the statements will be incorporated in full in the record, and I appreciate that, because we have questions of a specific nature that we would like to ask as well.

(The prepared statement of the Panel on Legal Education follows:)

STATEMENT OF ASSOCIATION OF AMERICAN LAW SCHOOLS

on

Legislation for Higher Education

March, 1971

I. Background

The Association of American Law Schools renews the urgent plea for federal support of clinical teaching in law schools and other specific programs of benefit to legal education that it made during last year's hearings held on legislation for higher education. Our plea remains essentially the same as that made last year, and we reiterate in summary form that plea.

We wish particularly to stress our belief that sound and effective legal education is vital to the success of our legal system. The lawyers of the nation, numbering about 330,000, have a crucial role in preserving liberty, in maintaining equality before the law and equality of opportunity, and in providing the framework necessary for ordered progress in all aspects of our national life. A legal profession worthy of its responsibility is crucial to sustaining and reaffirming the validity of the democratic process of this nation. Our law schools, through their teaching function, are the wellsprings for the profession. They can also, and should be, increasingly important centers of research into the workings of justice in the community and sources of public understanding of the proper role of law, legal institutions and processes. This function of the law schools and of the legal scholars in their faculties can, if adequately supported, make a truly significant contribution to the solution of the problems of society in the nation and even beyond its borders. We seek the help of this Committee to obtain the Federal support needed if the law schools are to fulfill their function.

As we pointed out in our testimony in the spring of 1970, the dimensions of legal education have been increasing steadily and steeply. Enrollment

---

NOTE: The position on behalf of legal education was presented to the House Special Education Subcommittee on April 15, 1970, and appears in Part 2 of the printed Hearings on H.R. 16098 and related bills (91st Cong., 2nd. Sess.), the "Higher Education Amendments of 1969", at pages 1059-1116. A formal statement was also filed with the Senate Subcommittee on Education, and appears in Part 1 of the printed hearings on S.3474 and related bills (91st Cong., 2nd. Sess.), the "Higher Education Amendments of 1970", at pages 858-894.

in all law schools in this country increased from about 49,000 students in 1962 to over 72,000 in 1969. The growing desire of college students to attend law schools has suddenly taken a phenomenal turn, with enrollment in 1970 rising to about 86,000 students. The number of students taking the law school admission test during this "test year" appears to have increased over the previous year by about 45%, meaning that approximately 110,000 college students will have taken the test to help determine if they have been equipped by their prior training for the rigorous demands of modern law schools.

A survey conducted by the American Bar Association a few months ago revealed a threatened shortage of space for any more law students, despite the growing number of applicants. The universities have relied heavily in the past years on the Higher Education Facilities Act for law school buildings, and Title II of the Higher Education Act of 1965, for assistance to law school libraries. In view of the growing number of students applying for admission, assistance of this kind from the Federal Government will be urgently needed in the next few years, and we emphasize the importance of continuing these programs.

The increase in the number of law students, and of applicants for admission, from minority groups, spurred by the encouragement of the law schools and the legal profession, is also striking. In our testimony last spring, we commented in some detail on the very great increase among not only black law students, but among Mexican-American and American-Indian students. The trend this year has continued at a strong forward pace, although at this time final enrollment figures are not available.

Another concern of the law schools has been improving the opportunities of women in the profession. We reported in our testimony last spring that the number of women law students had increased from about 1,800 in 1962 to nearly 5,000 in 1969. The number is now over 7,000 women law students, an increase of almost 50% from the previous year, while the total law school student body was increasing about 20%. The members of the Association of American Law Schools are hopeful that this promising increase in the number of women law students will be accompanied by improved opportunities for women lawyers. The recently adopted amendment to the Articles of Association, now makes it clear that "equality of opportunity in legal education without discrimination or segregation" on the ground of sex is of parallel concern with equality of opportunity regardless of race, color, religion, or national origin. Further, at the annual meeting in December of 1970 the membership of the Association amended the Association policy to discourage discrimination in law school employment and in career placement practices at law schools.

II. Financial Assistance for Students

Law students generally have received less financial aid from all sources than any other group of graduate or professional students. It is often the student who is not from a minority or educationally disadvantaged

group, but who is from a financially secure but salaried family, who is frequently placed in a position of gravest financial disadvantage, because even available forms of financial aid rely on family means tests. Such tests are commonly irrelevant for law and other graduate students who often are, in fact, emancipated, and even heads of families themselves. Furthermore, reliance on loans exclusively is generally not helpful to students at this level of education because so many of them have already built up a staggering loan obligation through their undergraduate years.

For the present, however, a major concern of the legal profession and the law schools is making legal education available to students from minority and disadvantaged backgrounds. Particularly notable in this area has been the work of the Council on Legal Education Opportunity (CLEO), organized by the leading national bar associations and by the associations representing the law schools. In addition to the summer training institutes provided through the Council's program, law students assisted by these programs have received stipend assistance through their law school years. The law schools themselves have granted tuition scholarships for these students and the private bar has contributed heavily in various places to supplement these programs. The tuition scholarships alone, it is estimated, averaging approximately $1,000 per student per year, have already aggregated over $1,000,000. During the three years after the establishment of CLEO in February of 1968, its particular program was financed primarily by private foundations and the research and development funds of the Office of Economic Opportunity. However, thereafter the supporting foundations indicated that they could no longer continue providing the necessary finances. We have no question, however, that support for a program of this nature is now an appropriate responsibility of the Department of Health, Education, and Welfare. We are anxious to be sure that the Department is given the appropriate statutory authority to provide stipend assistance to disadvantaged students in schools of law regardless of which bill is ultimately passed.

This can be accomplished by consolidating existing special services programs in a new provision in the Higher Education Act of 1965, providing for the indentification of low-income students with "academic potential," preparing them for post-secondary education (which would include legal education) and making available special services for such students in institutions of higher education. Such a program would have to include disadvantaged law students encompassed by the CLEO program and other programs having a similar purpose. The Administration's bills, H.R. 5191 and S.1123, contains some provisions along these lines, in Section 461, but we are concerned that this new Section limits stipend assistance to $30.00 per month unless there are "exceptional cases as determined by the Commissioner." We support these provisions in principle, as they would allow for the development of guidelines permitting administrative flexibility in providing essential support. Such flexibility would be necessary because $30.00, or any comparably small amount, per month is patently inadequate for disadvantaged students in law and other graduate study.

III. Experimentation and Innovation in Teaching Methods and Curriculum

There has always been some experimentation and innovation in legal education. One of the most striking recent developments in teaching methods in the law schools has been teaching law through the clinical method. Supported by funds from The Ford Foundation, a large number of schools have exposed students to experiences with real "clients" outside the classroom, but under the close supervision of experienced instructors. In 1968, the Congress recognized the value of experimentation of this kind, and, to this end, enacted Title XI of the Higher Education Act, authorizing appropriations for clinical teaching in law schools. Unfortunately, funds for this program have never been appropriated. We hope there will be appropriations under Title XI for the next fiscal year, or that a new authorizing provision, and appropriation, will be enacted this year.

We are encouraged that such an authorization would be continued by H.R. 32, introduced by Congressman Perkins, and by S.659, introduced by Senator Pell. We are distressed that H.R. 5191, drafted by the Administration, actually repeals Title XI. We understand, of course, that the repealer provision in Title VI of that bill was inserted with the intention of transferring the basic purposes of that innovative and experimental program, along with a number of other Titles from the 1968 Amendments, to the proposed National Foundation for Higher Education, described in H.R. 5192 and S.1062. Of course, we hope that this important program in legal education will be considered worthy of Congressional support.

Another program of particular interest in legal education is that part of the Educational Professions Development program that authorizes the funding of clinics aimed at the improvement of teaching. Such a clinic has been funded by the Department of H.E.W. to permit a number of younger law teachers to participate in a program expounding new and traditional teaching methods.

Mr. CONARD. I would like to emphasize the needs, one of which is for educational facilities. The number of admissions to law schools have multiplied. Last year, we admitted about 20 percent more students to legal education than a year before, and a survey by the bar association shows there is not space for more than about 700 more students in the law schools.

The Cook Quadrangle, and the Sterling Quadrangle, again were made by private gifts. The private gifts do not exist any more, and we have to have public funds for additional facilities.

We need money for financial assistance for students, and this is a feature which has already been emphasized in prior testimony. We would like to stress its importance for law.

The lending programs are very important, but they have certain weaknesses.

In the first place, persons from poor backgrounds have very little confidence in their ability to earn and pay back those loans. I would say students from middle-class, even lower middle-class families with assured prospects of employment in corporations and law offices are not afraid to take those loans.

The loans are not adequate as a way of introducing minority groups, under represented groups, into the legal profession.

Finally, there is the matter of experiment and development in legal education, and we recognize as has been already remarked, that the program has got to get better.

It has to relate more to the problems of today. There are many areas in which law schools have been innovating, have been experimenting. For example, computerized program education is an interesting development where we teach the Federal Rules of Civil Procedure through a computerized method.

It is very helpful.

There are tremendously hopeful innovations in international legal education. At the time I moved up to this seat, a group of foreign students as part of an international legal program had entered the hearing room.

I believe they are still here. They are led by professor Walter Gelhorn, of Columbia University and a past president of our association, and their group is an illustration of the international education activity in law schools.

Finally, though, I want to mention the type of the innovative program which I think, of all others, calls for support, and that is one Senator Pell, in which you have taken a special interest, the clinical education program.

On behalf of the Association of Law Schools, I would like to say we are grateful to you. We are aware and conscious of the effort you made in 1970 to fund this program, and we want to ask that in the higher education legislation that authorization for this very important program is continued.

Senator PELL. It is the appropriations. The amendment to which you referred to was in the appropriations bill.

Mr. CONARD. Yes. I realize that. I mentioned the authorizations, because that is the subject of the higher education act. I would like to give an opportunity now for statements to be made by my colleagues on the panel.

Senator PELL. Mr. Kuhn.

Mr. KUHN. I represent the American Bar Association's section on Legal Education and Admissions to the Bar. We are deeply concerned over the phenomenal increase in applications for admission to our law schools. I see from an article appearing in today's edition of the Washington Post that the local situation is comparable to the situation that exists throughout the United States.

According to that article, Georgetown has room for about 600 new students each year, and they have reported applications of 3,578 students, and they could reach 6,000.

The National Law Center of George Washington University said applications for next fall already total 4,300, compared to a corresponding figure of last year of only 2,287, and they can only admit 400 students.

We have made a survey of the need for space in our schools, and we find out that as of last year only 16 schools indicated that they could enroll more students. All of them together could accommodate only about 650 new students, which is 2 percent of the first year students enrolled in 1970.

DOUBLE SESSIONS

Senator PELL. When you say accommodate, that means on a one session basis, but if you use the classrooms for two sessions or two stages, couldn't you double the enrollment?

Mr. KUHN. Not for the first year classes. We have only so many seats in the law schools, and the students just have to have a seat.

Senator PELL. The seat is filled for 8 hours a day. How about the other 16 hours?

Mr. KUHN. Of course, I don't know——

Senator PELL. You can have two shifts, I would think.

Mr. KUHN. Well, we do have day classes and night classes in a number of schools. Of course, legal education is not an around-the-clock classroom attendance process, because the students have to spend 2 or 3 hours every day for every class that they attend in preparation.

Senator PELL. I well realize that. All I am saying is that there is a question of cost effectiveness here, and there is nobody more willing to help you more than this committee, but the fact is that you say there are so many seats. There should be ways of getting around the number of seat limitations. Professors are a different thing, but seats I would think, you could handle on a shift basis.

Mr. KUHN. I am sure the schools are trying every way they can to accommodate the students who want to attend, and of course we have only so many professors to go around for each class.

Senator PELL. I am just suggesting that maybe shifts could be used to increase the capacity of the classrooms. At any rate, carry on.

Mr. KUHN. I am sure your question could be better answered by Professor Conard, of the University of Michigan.

I do want to bring to the attention of this committee, the phenomenal increase in the applications for law schools. I understand from the LSAT which administers the law school admission test, that they expect to have 110,000 candidates take that test this year, and obviously that means that there are going to be something like 62,000 students who are going to apply for the 32,000 seats in the law schools.

We have also experienced a phenomenal increase in ladies aspiring to be lawyers. It appears that ladies are going into the law at a greater rate than any other class.

We are also pleased to note a continuing increase in the applications from the minority groups, and we are encouraging that in the United States.

There are no new law schools opening. We have no prospects in the next 2 or 3 years of any new law schools being established, nor do we have firm plans for existing law schools to expand their facilities.

We did establish some new law schools in the past 5 years, but at the present time there are no firm plans for new law schools.

I believe that brings to the committee's attention the great expansion in applications for legal training. I want to emphasize and underscore the chairman's remarks about the necessity for educating our youth in the law in order to bring about the social changes necessary in this Nation.

I also want to stress the great emphasis now being placed on international and comparative law in many of our schools. The schools are training students for representation of our interests abroad, including business and cultural interests in all parts of the world.

We need assistance to train these men to take part in the affairs of the world, not only from representing their clients, but also in bringing about a better place for the people to live.

ALTERNATIVE POSSIBILITY

Senator JAVITS. Mr. Chairman, may I ask a question? I did want to ask you one question, as a lawyer myself. Could you give us now or later your collective judgment as to what, if any, other alternative program you might suggest that would be of help to the law schools which could fit into the pattern of what seems to be indicated as aid to higher education that might not necessarily be this particular item of clinical teaching?

It may be that we could help you in some other way, maybe not in this way. In view of the fact that the administration seems to want to shift this particular program, you may find yourself falling between two stools or beating a dead horse. So I think it would be helpful to us if you could, somewhat in the same order of magnitude, suggest one or more other programs.

I am a lawyer and very interested in the profession. Aren't you a lawyer?

Senator MONDALE. One of the best. [Laughter.]

Senator JAVITS. There are quite a few lawyers on the committee, and we are very sympathetic.

Senator Pell is sympathetic as he himself has said. We may be helped with alternatives which you gentlemen could suggest if we cannot, for whatever reason, structurally or otherwise do anything under the program you are here on.

Thank you.

Senator PELL. Don't you want to reply to that now?

Mr. CONARD. Thank you, Senator. I think we can probably give you a written statement most effectively. In our statement filed in 1970, we made a number of suggestions, but we would be happy to make a supplementary statement.

Senator JAVITS. Would you cost them out?

Mr. CONARD. Yes; we will give a shot at it.

(The information referred to and the prepared statement of the American Bar Association follow:)

STATEMENT OF

AMERICAN BAR ASSOCIATION

on

LEGISLATION FOR HIGHER EDUCATION

March, 1971

The American Bar Association associates itself with the statement contemporaneously filed with the Committee by the Association of American Law Schools.

Throughout its century of existence, the American Bar Association has been deeply concerned with the quality of the preparation of those who enter the legal profession. We recognize that the quality of the legal services that the American people and their institutions receive is dependent upon the quality of America's lawyers. Their competence and their commitment to the best traditions of the legal profession are, in turn, critically shaped by the character of American legal education. Representing almost one-half of the nation's 330,000 lawyers, the

American Bar Association is vitally interested in the capacity of the American law schools to present sound programs of legal education. American legal education in this century has a fine record. Greater demands than ever are now being made on it to prepare an ever larger number of students for more demanding profession. The national interest will be served by providing from federal funds the added resources that will enable the law schools to meet the new challenges.

We understand that the statements filed last year by the American Bar Association and the Association of American Law Schools are considered by the Committee to be still before it. Therefore, we understand that we need not restate the material presented there for the Committee's use. These two statements describe well and in detail the general needs of American Legal Education.

Demand for Legal Education. American law schools are experiencing an unprecedented demand for legal education. Enrollment in American Bar Association-approved law schools has more than doubled in the past decade, having grown from 40,381 in 1960 to 82,041 in the fall of 1970. Over one third of this growth occurred this past fall, when total enrollment grew by 13,655. The American Bar Association survey shows that almost all of the approved law schools enrolled as many entering students

this past fall as they had room for; the 659 of "unfilled seats" represented less than two percent of first year enrollment.

The demand for legal education this coming fall will be even greater. Almost all approved law schools require their applicants to take the Law School Admissions Test. The current registration figures for this test (nearly 110,000 as against 74,092 last year) suggest that the number of applicants for entrance into law school this fall will be about 45 percent greater than last fall. This unprecedented and unexpected growth in interest in legal education will occur at a time when there is no expansion of opportunities for legal education. Although several universities have announced decisions to establish law schools, no new law schools will open their doors this fall and no firm plans have been announced for the opening of any new law schools in the fall of 1972. Further, several law schools are reported to be considering expansion of their existing programs to accommodate more students, but none are reported to have made firm plans.

While we have no precise data to explain this remarkable increase in the number of law students and in the unanticipated surge in applicants for the fall of 1971, several factors are apparent. Women are finding the law to be a more attractive and viable professional opportunity. The number of women taking the Law School Admission Test has quadrupled in the past four years and the number

of women enrolled in law schools is 2 1/2 times that of four years ago, having grown from 2678 in 1966 to 6937 in 1970. Many young people have come to believe that the law is where the action is; they want to express in the practice of their profession their social concern. They want to work within the system for orderly change. The shortage of opportunities for holders of other graduate and professional degrees is certainly another factor.

Student Financial Aid. Federally supported programs of student financial aid are obviously not needed to encourage an interest in the legal profession on the part of qualified college students. They are necessary, however, to avoid screening out on economic grounds deserving and qualified students.

Minority and Disadvantaged Students. The American Bar Association is proud of the role it has played in establishing in 1968 and in supporting the Council on Legal Education Opportunity (CLEO) and its program for increasing significantly the number of minority group and disadvantaged law students. The Office of Economic Opportunity has funded CLEO's summer institutes and foundations, including the American Bar Endowment, has funded the scholarships for the successful participants in the summer institutes with the law schools granting tuition scholarships. Supplemental funds have been furnished by lawyers and local foundations in many areas. The national foundations have declared

that they cannot continue to fund the scholarship program; it is at a scale in time and amount that requires federal funding. We support the establishment of this program on a permanent basis with adequate government funding.

Innovation and Experimentation. Because we believed that clinical legal education represented an important opportunity to enrich the students' legal education, the American Bar Association has been a major advocate of Title XI of the Higher Education Amendments Act of 1968. Although this program has not been funded, the moderate support that the Council on Legal Education for Professional Responsibility (CLEPR) has been able to give for experiments in clinical legal education persuades us that this is a legal education method that deserves to be exploited with the aid of federal funds. We prefer explicit statutory recognition of the program.

Law Buildings. The major deterrents to the establishment of needed, additional capacity for legal education are the capital expenditures needed to build the necessary buildings and to acquire the law library collection. The grants made under the Higher Education Facilities Act helped importantly in the last decade to increase American legal education's capacity to serve more students. The present unprecedented increase in the demand for legal education suggests that the reactivation of that effort would serve the national interest.

Library Development. The establishment of a new law school or the major expansion of an existing one requires a significant capital expenditure for library collection. Federal programs addressed to this could assist institutions in responding to phenomenal increase in the demand for legal education. Other law library needs are generated by the changes in the profession and in legal education. The broadening definition of the lawyer's tasks and what materials are relevant to legal questions has had an important impact upon the law library. This and the accelerating growth of strictly legal material is straining library budgets. Growing interest in foreign legal systems adds a further demand. The changing character of the legal education experience means less reliance on the traditional classroom dialogue. Among other things, this development places the student in the library for a larger portion of his time. All of this means a demand for more books and, even more importantly, a demand that the library share in the teaching function.

International and Comparative Law. American interests, governmental, business and cultural, in other parts of the world continue to grow. The practitioner and legal scholar can play an essential role in this development. With government and foundation help, the law schools during the past two decades have responded to this development. The study of American law, by students

and scholars alike, is enriched by the comparative study of foreign law and legal systems. Teacher exchange programs and travel grants for American and foreign scholars and teachers can, at modest cost, make a significant contribution. The International Education Act, if funded, would have made an important contribution to American legal education.

Honorable Jacob K. Javits
United States Senate
Washington, D. C. 20510

Dear Senator Javits:

When representatives of legal education appeared before the Subcommittee on Education on March 31st to testify in connection with hearings on higher education legislation, you requested that I submit for the record some suggested programs that might be considered as alternatives to law school clinical experience, in the event that this program could not be continued by the Congress. Since my understanding was that you were primarily interested in alternative innovative programs in legal education, I have prepared a short memorandum outlining three possible programs, with some indication of costs included, which I enclose with this letter.

In thinking about this request, it also occurred to me that it would be not inappropriate to stress the importance of providing adequate financial assistance to law students as a priority program in legal education. You have heard us discuss in great detail the program for minority and disadvantaged students, currently operated by the Council on Legal Education Opportunity. There are, however, other concerns in the area of student financial assistance, particularly with respect to the middle income student who so frequently finds himself not covered by any adequate program for financial aid. Many of these students attend law school on a part-time basis, but are discouraged to discover that they are ineligible for federal financial aid because they are part-time students. I would urge that consideration be given to extending elibility to part-time students for programs of financial assistance, as you have done by your proposed amendments to the Education Opportunity Grant Program.

I would also like to stress the importance of the Work-Study Program. Some of the pending bills appear to make this Program unavailable to graduate and professional students, and to limit this assistance only to those working toward an undergraduate, or baccalaureate, degree. To remove graduate and professional students from elibibility in this Program would work a great hardship on large numbers of law students and also on the operation of many of our law

schools. In this connection, Dean Frank J. Trelease, of the University of Wyoming College of Law, has written a very eloquent letter concerning this matter, and I am also enclosing with my letter to you an excerpt from Dean Trelease's letter concerning this matter of the Work-Study Program.

Very respectfully yours,

Alfred F. Conard
President

INNOVATIVE PROGRAMS IN LEGAL EDUCATION

1. Video-tape Equipment

Substantial gains in instructional effectiveness can be obtained through the use of video-taping equipment, involving a television camera, a video-tape recorder, a video-tape viewer, with appropriate carts, cords and lenses.

Video-tapes can be used in three ways to augment instruction. First, they are useful for students of oral advocacy, who can see a reproduction of their conduct and their voice. This is far more practical than attempting to provide individual coaching, which requires too many expensive personnel. (In athletics, coaching is concentrated on the "varsity" while the ordinary student gets none.) Furthermore, many students react defensively to coaching. Seeing and hearing themselves, especially in comparison with other people recorded on the same medium, is the best way for them to learn. It permits each one to perfect the style which he himself wants, rather than what somebody else wants him to have.

A second use of the video-tape recorder is to record a professor in his class, and let him play it back later. By viewing and hearing himself, he can perceive ways in which his teaching techniques could be improved. Since professors are even more sensitive to student criticism than students are to professional coaching, the video-tape offers a uniquely valuable means of improving teaching.

A third purpose of video-tape recording equipment in legal education is to tape a short course of lectures which a student or group of students can play at their convenience. This is particularly desirable in order to permit students to take a brief capsule treatment of subjects in which they do not want to take a full course. Since the possible subjects of study in a modern law school far exceed what any one person can take, it is essential to find means of quick absorption. Video-tapes are preferable to books because they permit the addition of personal emphasis and coloration which can never be present in the printed word. Moreover, the professor may use props, models and charts of various sorts to augment the spoken word.

A fourth possibility is to make video-tapes of regular classes, so that absent students can pick up what they miss. This is a convenience, but must be regarded as a low priority reason for the video-tape system. Since most students are expected to be present, the cost per absent student runs rather high. Moreover, in order to take such tapes of all classes for all absent students, one would need a multiplication of equipment which is not otherwise necessary.

Every law school should have video-tape recorder equipment. Probably large schools would need several sets, but there is insufficient experience to show how many sets will receive sufficiently intensive use to merit duplication. The initial cost of one set of reasonably priced equipment was recently estimated at the University of Michigan to total $3,500. Repair service is estimated at $200 a year. The equipment will probably be obsolete in five years, so that the entire cost should be regarded as $700 a year obsolescence plus $200 a year maintenance, or $900 a year per school. For approximately 150 accredited law schools in the United States, at one set of equipment per school, the cost of a five-year program would be slightly under $700,000.

2. Closed Circuit Television of Court Proceedings

Closed circuit television offers an effective way of exposing students to what really goes on in a courtroom without the tremendous waste of time involved in visiting courts. Although it may seem like a good idea for students to take a trolley car down to the courthouse and see justice at work, there is usually a tremendous waste of time involved. Aside from the time in going and coming, trials are constantly recessed while onlookers sit by twiddling their thumbs. Furthermore, there is no opportunity in the actual courtroom for a professor to explain to the student what is going on. Even if the professor were to waste his time by sitting in the courtroom waiting for something to happen, he would not be allowed to lecture to his students there.

A solution to this problem has been found in the creation of an adjunct courtroom in the law school, connected by closed circuit television with the courtroom downtown. A major problem in this connection has been satisfying the court that there is no violation of the canons against broadcasting of court proceedings. There is no broadcast, because the proceedings are visible only in a particular room, which is subject to the same rules as the courtroom itself. It is open to the public, it is uninterrupted by commercials, and there is no opportunity for editing.

Another consideration which has disturbed some people in this connection is the fear of cluttering up the court with whirring cameras and klieg lights. This is completely unnecessary. It has been found possible to mount a television camera in a remote corner of the courtroom which plays upon the trial area, and which can be pointed and zoomed by remote control from the adjunct courtroom in the law school. There is no special lighting, and absolutely no noise in the courtroom. Only a detective can even detect in the courtroom that a television camera is playing on the scene.

This device makes it possible for students in the law school to become familiar with what is going on in court without wasting time going to and fro. When proceedings are recessed, the professor may interpret the court proceedings, or the students may pursue their own reading.

Successful experience with closed circuit television in an adjunct courtroom has been conducted for over ten years at the University of Michigan.

The initial cost of equipment, including installation of coaxial cable, was about $15,000. Yearly maintenance charges are about $500. Assuming a five year obsolescence for such equipment, the annual costs would be approximately $3,500 per school. For 150 accredited law schools in the United States, the total cost for five years would be about $2,625,000.

3. Computerized Programmed Instruction

The classic dream of education has always involved a "dialogue" in the literal sense of a conversation between two persons -- Socrates and Phaedo, or Mark Hopkins and a student on opposite ends of a log. Unfortunately, one-to-one instruction has never been available except to a very few privileged persons, like the Emperor Marcus Aurelius and his philosopher-slave, Epictetus.

One-to-one conversation on a technical topic has been made possible on a mass basis by computerized programming. On the subject of the Federal Rules of Criminal Procedure, Professor Arthur Miller has prepared a program in which the computer flashes a question to the student, giving him a choice of answers; if he answers one way, he is presented with a further question or comment; if he answers the other way, he has different responses coming from the computer. The student can thus be given a dialogue on the Federal Civil Rules which will cover every point in them, and will make him think as he proceeds. The same dialogue can be engaged in by hundreds or thousands of different students.

Similar programs could be developed with regard to other statutes. A prime example would be the Uniform Commercial Code.

Requirements for the program are a terminal or "console" with keyboard, and a data bank. Most large universities now have a data bank, so that the expense is simply the service time for recording the program, and then for use of the terminal by the student. A terminal can be rented for about $100 a month.

To make effective use of the Federal Civil Rules program, with a class of 100 students, probably 500 hours of computer time (approximately 5 hours for each student) should be allowed, along with the cost of a contribution to development and maintenance of the program, which might be roughly estimated at $1,000 a year. Thus $3,500 a year could sustain a computer program on this one subject. For 150 schools this would involve a cost of $525,000 for one year, or $2,625,000 for five years.

FEDERAL WORK-STUDY PROGRAM

Excerpt from Letter dated March 26, 1971, from Dean Frank J. Trelease of the University of Wyoming College of Law

* * * * * * * * * *

"I've been informed by our student personnel office that there is an administration bill that would remove graduate students, including law students, from eligibility for *** work-study eligibility. I don't have the references to the bill. This will be a serious blow not only to the students at this school but to the school itself. Our law library is practically run by work-study students, who act as clerical help, reference librarians, monitors, man the desk, keep the library open during the late hours and weekends which law study demands. Some work-study students are research assistants to law professors. The administrative office receives clerical and office boy help from the program. We have an internship program with the United States Attorney funded in part by these funds. But most important, our clinical programs, the Wyoming Defender Aid Service, under which students assist the appointed cousnel for indigents, and our Legal Services office, in which students given legal aid to disadvantaged students and members of the community, are both manned in the summer time by work-study students. We would be literally crippled without this help. The worst effect, of course, would be upon the students themselves. This is a poor man's law school. Most of our students are married. Most are independent of their families and are supporting themselves. Many are older than the typical law student fresh out of college. The work-study program has been not only a help but the only way in which many of them can finance their legal education."

(5/21/71

Senator JAVITS. Thank you.

Mr. CONARD. I would like to present Judge Bell, who will respond to the evening program, because this is an area in which he has had special experience.

Judge BELL. Senator Pell and Senator Javits and Senator Mondale, I am a graduate of the Detroit College of Law, and at that school we did have a day program and a night program. There are two other law schools in the city of Detroit which also have like programs.

I think that is the effective utilization of the space you are talking about, and I think the answer to your question is why is that not being done in large universities; and quite frankly, I see no reason why it is not being done, or could not be done.

I do not envision necessarily the addition of a great many faculty members to accomplish this purpose. I am sure that most of those who are on the faculty would be delighted to receive some additional remuneration for teaching an extra course, law professors being notoriously underpaid.

Senator JAVITS. I might tell you, Judge, that I am a product of a law school from 4 to 8, and I think that, I feel that my education—certainly I have been up against the best—was reasonably adequate. I did not fall asleep in class.

Judge BELL. I would like to further respond to Senator Javits, if I might. I think perhaps one of the answers to your question is contained in this longhand statement that I was compelled to prepare, and if I am permitted to read it, and it is very brief, it will sort of indicate why, and I think perhaps it occurs to me that a legal clinic program has in many instances been associated with minority students, and I am not prepared to say that that may be the reason the administration is frowning on it, but I do think the legal clinical program is necessarily related simply to minority students.

I would like to indicate where.

Senator PELL. I would like to indicate in the record that the counsel of the subcommittee is a product of the 4-to-8 law school.

Senator MONDALE. I guess I am the only one who went to a respectable law school. [Laughter.]

Judge BELL. I am president of the National Bar Association and a judge in the Wayne County circuit court. That court is in Detroit, and is one of general and original jurisdiction, having both a criminal and civil docket.

Let me eliminate some of this, because it simply indicates that when I left yesterday I had prepared both an opinion dealing with the lawsuit that I had heard on recission of a contract, then also a statement that I was going to read here this morning, and I must now confess my mischief, and tell you that had I not reviewed that statement this morning, I would have read to you this morning a brilliant discourse on the rights of a defrauded party to rescind a contract.

I will forward this to you in writing as soon as I return. My brothers who sit here with me at the witness table have forcefully argued the need for clinical legal training in law schools and how and why it is needed to help minority students. When I say minority students, I refer to the blacks, Mexican-Americans, Indians, et cetera.

The position they have taken on the value of such clinical training with its effect on minority students is shared by the National Bar

Association and is consistent with my view as the president of that organization. That position is by now well known to the members of this subcommittee. It is not my wish to persuade you on these points by exhausting you with repetitious facts and figures.

I would like, rather, to tell you how I as a judge view some often neglected but positive effects of the legal clinics. Detroit has one of the major metropolitan court systems in our country.

We do not have a unified State court system, but the problem of which I speak would be present no matter how the courts are structured.

I refer to the tremendous backlog of docketed untried cases that prevail in large cities or large urban areas. Let me share first with you in the Philadelphia experience in the Federal courts.

In an effort to resolve docket congestion, an analysis was made of the kinds of cases pending. Having broken this down into types of cases, a further analysis was made as to the law firms that were trying these cases.

It was discovered that a certain type of case which comprised approximately 40 percent of the docket was being handled by about six law firms—not the small neighborhood law office, or the single practitioners, but the large establishment-oriented law firms.

The chief judge of the district organized conferences with these law firms, and it was discovered that despite their tremendous size in terms of personnel, only a small number actually did the trial work.

They further claimed that those who did were the only ones qualified to do so. After some general and gentle urging by the chief judge, backup men were designated, and the law firms had to send an untrained lawyer into the court with an experienced lawyer.

Within a 6-month period, the trial docket was significantly reduced. The same kind of situation is true in Detroit. There, the law firms will say that their lawyers who do trial work are tied up.

It was determined that about eight lawyers were responsible for over 60 percent of the docketed cases. The criminal-courts judge refused to permit those lawyers to accept any other cases until they disposed of the ones they had on the docket.

These lawyers complained they had to employ unskilled lawyers. No matter, within a period of a time less than a year, the docket was reduced then so that the average trial time of 8 to 9 months was now approximately 4 months. I submit that clinical training would fill this void in terms of having experienced lawyers for trial work.

Docket congestion can be reduced if we meet the challenge of producing lawyers with those skills. I share this with you because you understand that the need for excellence is not just applicable to minority students.

Applicable training in the kinds of situations it is designed to meet goes a long way to attaining a higher degree of professionalism in our young lawyers. The classroom can never be replaced, yet for the most part it is a sterile situation.

Just a simple technique of introducing an exhibit into evidence has produced a minor trauma in an otherwise competent lawyer.

That is one example, and I submit to you there are others. In closing, let me say that my departure from clinical legal programs for minority students is in no way intended to minimize that argument.

Certainly that is one of the most cogent reasons for funding the program. Rather, I have seen how the legal professions and the community as a whole would benefit from the creation and continuation of these clinics.

I would suggest that the application of these clinics would in fact have just that effect on our dockets in our major metropolitan areas, and I think that is one of the most persuasive and cogent reasons we could have for funding this sort of operation.

I hope that answers your question.

Senator PELL. Thank you.

(The prepared statement of Judge Bell follows:)

PREPARED STATEMENT OF EDWARD F. BELL, PRESIDENT, NATIONAL BAR ASSOCIATION, AND JUDGE OF THE WAYNE COUNTY CIRCUIT COURT IN DETROIT, MICH.

Mr. Chairman, my name is Edward F. Bell. I am the President of the National Bar Association and a Judge of the Wayne County Circuit Court in Detroit, Michigan. That Court is one of general and original jurisdiction, having both a criminal and civil docket.

During this past weekend, in the midst of preparing a statement for this Honorable Body, I was also engaged in writing an opinion on a lawsuit that had been tried before me which involved a breach of contract and the remedy of rescission. Upon concluding my Court session yesterday afternoon, I grabbed what purported to be my statement for this (Sub) Committee and fairly raced to the airport so as not to miss my flight. Following my customary procedure, I decided to review that document for the purpose of making last minute revisions. Had I failed to do so, you gentlemen would have heard an absolutely brilliant discourse on what a defrauded party to a Contract must do in order to avail himself of the equitable remedy of rescission. At any rate, I have confessed my mischief and stated publicly that even Judges are mortal.

I would therefore request permission to read into the record what I feel is an embodiment of my original statement and again with your indulgence, I shall forward the same in writing immediately upon my return to Detroit.

My brothers, who sit with me at the witness table, have forcefully and I hope persuasively, argued the need for Clinical Legal Training in law schools and how and why it is needed to help minority students. When I say minority students, I refer to the blacks, Mexican-Americans, Indians, etc. The position they have taken on the value of such clinical training with its effect on minority students is shared by the NBA and is consistent with my view as the President of that organization. That position is by now well known to the members of this (Sub) Committee. It is not my wish to persuade you on these points by physically exhausting you with repetitious facts and figures; Rather, I would like to take a moment to tell you, how I as a Judge, view some oft neglected, but some very positive aspects of the cause of legal clinics, we now champion.

Detroit, as you know, has one of the major metropolitan court systems in our country. We do not have a completely unified state court system as I see it, nevertheless the problem about which I speak would be present no matter how the courts were structured. I refer to the tremendous backlog of docketed, untried cases that prevail in large cities or highly concentrated urban areas. To comprehend the point I am about to make, let me share first with you the Philadelphia experience in the Federal Courts. In an effort to resolve docket congestion, an analysis was made of the kinds of cases pending. Having broken this down into types of cases, a further analysis was made as to the law firms who were trying these cases. It was discovered that a certain type of case which comprised approximately 40% of the docket was being handled by about 6 law firms. Not the small neighborhood law office or the single practitioner, but the large establishment oriented law firms. The Chief Judge of the district arranged conferences with these law firms and it was discovered that despite their tremendous size in terms of personnel, only a small number actually did the trial work. They further claimed that those who did were the only ones qualified to do so. After some very gentle urging by the Chief Judge, back up men were designated and most of the law firms had to begin to send an untrained lawyer into Court with the experienced trial lawyer so that the cases could be disposed of. What happened

is now history and suffice it is to say that within a 6 month period, the trial docket of pending cases was significantly reduced.

The same kind of situation is present in Detroit. The large law firms will say without any reluctance, the guys who do our trial work are tied up in trials in other courts. Their position is not unlike the legal firms in Philadelphia, namely they just don't have the trial lawyers. In our criminal court in Detroit, it was determined that about 8 lawyers were responsible for over 50% of the docketed cases. The criminal court presiding judge refused to permit those lawyers to accept any more cases until they disposed of the majority of their cases on the docket. These lawyers complained, sometimes bitterly, that they had to employ unskilled lawyers in terms of criminal trial work, to assist them. No matter, within a period of time less than a year, the docket was so reduced that the average trial time of 8 to 9 months was reduced to approximately 4 months. I submit that clinical training would fill this void in terms of having experienced lawyers for trial work. Docket congestion can be significantly reduced if we meet the challenge of producing lawyers with these skills.

I share this with you, because it is most important that you understand the need for excellence is not just applicable to minority students. Clinical training in the kinds of situations it is designed to meet, goes a long way toward achieving a higher degree of professionalism in our young lawyers. The classroom can never be replaced, yet it is for the most part a sterile situation devoid of the basics so necessary for today's lawyer. Just the simple technique of introducing an exhibit into evidence, I have observed, has produced a minor trauma, with an otherwise competent lawyer who has received no prior courtroom training. That is one example. I submit to you, there are many and if you have questions regarding them, I shall be happy to respond.

In closing, let me say that my departure from clinical legal programs and minority students in no way is intended to minimize the validity of that argument. Certainly that is one of the most cogent reasons for funding this bill. Rather, I have attempted to show how the entire legal profession and the community as a whole would benefit from the creation of and the continuation of these clinics. In closing, it was the great Dean Roscoe Pound who said and this may not be an exact quote, "The law is a social mechanism and must be judged not by the majesty of its logic, but by the results it achieves."

Thank you for having invited me.

Mr. CONARD. Professor Cohen?

Professor COHEN. We support the statement of the Association of American Law Schools, but urge that law library assistance be included in legislation.

The details of our need are set forth in the formal statement which I submitted, but the problem rests on the fact that existing legislation in aid of higher education or in aid of libraries, have not made specific provision for law libraries. As a consequence, we have received virtually no benefit from any of the existing legislation. Neither the Higher Education Act, the Library Construction and Services Act, nor the other programs have not been effective in reaching our needs.

None of the pending bills I have read included any substantial provision for law libraries, and as a consequence I think the result would be the same. We have been left out of these areas of legislative assistance.

Law libraries are an essential part of legal education, and of the administration of justice in this country. We are faced with two problems, a bibliographic problem with respect to the amount of material we have to handle, and a financial problem in supporting our collections and services.

At a time of increased need, neither the law schools nor private philanthropy, nor the State governments have been forthcoming with funds to meet this situation.

Senator Metcalf mentioned computer applications in legal research and Senator Javits mentioned computer applications in higher ed-

ucation. We in the law library field are excited by these possibilities but we lack the resources to do anything about them.

The Higher Education Act provided help for research in the information sciences. But, again, we have not had receptive responses from the agencies involved in the administration of these programs.

As an example, the Library Services and Construction Act had regulations promulgated under it, and these regulations specifically excluded law libraries, among other specialized types of libraries. (See 45 C.F.R. 130.1[h].)

It would be very desirable to have a law library assistance act, like the Medical Library Assistance Act of 1965. Failing that, we think that amendments could be made to the pending legislation to include specific reference to law school libraries in the higher education acts, in order to get assistance in these areas, the areas of research, library networks, training of librarians and collection development.

We have been in a way the forgotten children in these programs, and we therefore strongly urge you now to make specific reference in the legislation.

With your permission, I would submit a supplementary statement indicating specific provisions in the programs which could be so amended, and to save time now I would be glad to submit that for the record at a later time.

Senator PELL. We would be very grateful. When the record is closed, the staff will examine all the suggestions that have been made, and then we will see what can be done with each one of them.

(The information subsequently supplied follows:)

HIGHER EDUCATION ACT AMENDMENTS APPLICABLE TO LAW LIBRARIES

The specific provisions in the Higher Education Act which we would like made expressly applicable to law libraries are Part A (College Library Resources) of Title II (College Library Assistance and Library Training and Research); Part B of that Title (Library Planning and Research); Title III, Strengthening Developing Institutions, particularly Section 304(a)(5) of that Title; Title VIII, Networks for Knowledge; and Title XI, Law School Clinical Experience Programs.

These various provisions do not now offer any assistance for law library collections, staffing, research and development, but are potentially very useful for improving the contribution of law libraries. If specific reference could be made to law libraries and law librarianship as objects of your intended assistance, either in a catchall provision of overall applicability or in each of the individual sections, we would be assured of the support which we so badly need to improve the contribution of law libraries to both legal education and the administration of justice in this country generally.

COMPUTERIZED LEGAL REFERENCE

Senator PELL. Is there any computerized law library in the United States today?

Professor COHEN. Not as such. Computer experimentation has been going on in a number of institutions.

Senator PELL. Is there any place in the United States or the world where you can take, say, a particular crime, a particular class of offense, and then have all the opinions come out on a series of cards?

Professor COHEN. No. This is a promise that has been held out in the past few years by various groups. It does not seem to us a very realistic

one in the near future. There is a program in Pittsburgh, whereby the State statutes of all 50 jurisdictions have been computerized, so you could run a search through statutory material on a crime, and get references to every statute that is in effect today which would apply with respect to that situation.

However, this has not been done with respect to judicial experience yet.

(Additional information subsequently supplied and the prepared statement of Mr. Cohen follows:)

SYSTEMS ANALYSIS APPROACH TO RESEARCH IN THE LAW

Question. The subject of systems analysis has been discussed in many industries. Has there been any thought given to the systems approach to research in the law?

Answer (Mr. COHEN): We have given a great deal of thought to the utilization of systems analysis, computerization and other developments in information science and administrative management. We have had many discussions in our professional forums and meetings and a substantial literature has developed on these possibilities. There have also been several interesting experiments with respect to the automation of some aspects of legal research and a few attempts at commercial development of computerized research.

However, as was indicated at a recent conference on automation in law libraries held at the University of Chicago, there are many more possibilities for development than there are opportunities to pursue them. Our big problem in this regard is financing. While the scientific information specialists, including those in the field of medical bibliography, have been supported in extensive research and development by Federal funds, we have not had the same stimulus for research and implementation of the ideas now available. For that reason, we strongly urge the amendment of pending bills, both the administrative measure and that introduced by Senator Pell, to make specific reference to law librarianship and law school libraries as intended recipients of funds for these purposes.

AMERICAN ASSOCIATION OF LAW LIBRARIES
53 WEST JACKSON BOULEVARD
CHICAGO, ILLINOIS 60604

Statement of

Professor Morris L. Cohen, President
American Association of Law Libraries

before the

Subcommittee on Education
Committee on Labor and Public Welfare
United States Senate

For Hearings on
Legislation for Higher Education

March 31, 1971

(829)

Statement of Morris L. Cohen, President
American Association of Law Libraries

Before the Subcommittee on Education
Committee on Labor and Public Welfare
March 31, 1971

The American Association of Law Libraries, on whose behalf I appear, is a non-profit educational association of libraries and individuals interested in law librarianship. Among our approximately 1400 members are included practically all of the law school libraries in the United States. We support the statement of the Association of American Law Schools, but, by virtue of our own professional interests and problems, are particularly concerned with the plight of law school libraries. This statement is designed to describe the needs of academic law libraries and to urge that any legislation relating to libraries in higher education specifically designate its applicability to law school libraries.

The law library is at the center of the educational and research program of the American law school. It serves, at once, as a teaching facility for legal research, as a laboratory for the study and analysis of legal problems, and as an archive in which the traditions and sources of our legal system are made available, not only to scholars and students, but also to the bench and bar, legislators and government officials, and the general public. Among the many law libraries in the United States, those in law schools occupy a leading position and render many services beyond the immediate needs of their own institution.

Despite these increasing demands, law school libraries are not now receiving the financial support necessary to acquire the materials, provide the staffs, and offer the services required by their users. The law school library is probably the single most expensive component of a law school's budget. However, the law schools have been unable to develop adequate libraries and now cannot even meet the steadily rising costs for books and materials (10% a year in many cases) and provide the library staffs required for today's law libraries.

Law libraries are unusual in having to provide not only a broad collection of legal materials from the past, but also a complete range of the latest developments from legislatures, courts and administrative agencies. Increasing need is also being felt for foreign, comparative and international legal materials, which, although very expensive, are essential to a fuller understanding of our legal problems, as well as to our relations with the rest of the world. The compounded demands for materials from the past and the present, from foreign countries as well as our own jurisdictions, and from all branches of government which contribute to legal development, require new sources of financing for law libraries.

In 1968, the Association of American Law Schools formulated new standards for law school libraries, including minimum requirements for collection, staff, budget, and facilities. At the

present time, well over one-third of the libraries of member schools in this association have less than the minimum of 60,000 volumes required by those standards. A recent statistical survey showed that 52 of 137 libraries were below the standard in that regard and over 90 libraries had less than 100,000 volumes, which is much closer to an adequate law school library.

Among the other standards adopted was one calling for a minimum book budget of $40,000 for new acquisitions. Thirty-five law school libraries are not presently receiving that very low minimum sum. Most law school libraries are finding it impossible to maintain even the continuations which are essential to provide the current primary legal materials of American law. Such fixed commitments are taking between 75% and 90% of law school library budgets and leave very little for new publications and improvement of the basic collection.

The new developments projected for legal education in the statement of the Association of American Law Schools are having and will continue to have considerable impact on law school libraries. These developments require increased outlays for law school libraries in the following respects:

(a) New methods of instruction in legal education increase the use of library facilities and the demand for additional materials.

(b) Clinical work in legal education requires practice manuals, form books and other tools of the practicing attorney which are not usually acquired in law school libraries and are among the most expensive of legal materials.

(c) The increase in law students from minority and low income groups results in special demands on the library's collection and facilities.

(d) Introduction of new subjects in the law school curriculum, such as environmental law, local government and urban affairs, poverty law, and computer technology, requires major additions to law library collections.

(e) The increase in the law school's interest in foreign and international legal problems requires great expansion of collections in those areas. There are only a few law schools in the United States today with libraries sufficient to support those programs. To provide a really useful foreign law collection in addition to Anglo-American materials, would require a balanced library of at least 300,000 volumes and only six law school libraries now reach that size.

Present salary levels for law school librarians are not adequate to attract and hold personnel with the necessary qualifications. The median salary for all professional librarians (exclusive of head librarians) in the law schools surveyed recently was only $9856. Low salaries of approximately $7000, however, were

reported in several libraries in all size groups. Head librarians, who generally have graduate degrees in both law and library science, show a median salary of $17,112. In the category of libraries with less than 100,000 volumes, however, the median goes down to $13,225 and lows are reported of $7500 and $8000 for libraries of less than 50,000 volumes and between 50,000 and 100,000 volumes.

Financial restrictions affect law school libraries of all sizes. The two law libraries with the largest budgets in the United States are not law school libraries and in fact only one law school library has a budget over $160,000. The average book budget of the thirteen largest law school libraries is only $112,016 and the lowest of those is $89,500. Among the fifty-four libraries with less than 100,000 volumes, the average book budget is a meager $46,415 and the low is $6,700. If we view the expenditure in terms of books per full-time student, we find an average of $158 for law school libraries of all sizes. The number of volumes per full-time student averages only 279 volumes for all groups. Both of these are very low figures in view of the heavy library use in legal education.

Despite this situation, there has been very little private or government assistance to law school libraries. College and university libraries have gained significantly from federal legislation; the nation's medical and scientific libraries have been aided by special legislation; elementary and secondary

school libraries and public libraries have also received wide legislative support over a period of years. However, there has been almost no benefit to law school libraries from any of this legislation or from federal aid to higher education. Law school libraries are rarely the beneficiary of grants from private foundations and are not usually favored as an object of alumni giving.

Although we support the proposed Education Amendments of 1971 and similar legislation, there are a number of areas in which specific improvement should be made to extend its benefits to law school libraries. Where grants are authorized to assist college and university libraries, specific mention should be made of law school libraries as possible beneficiaries of those funds, or at least reference made to subject-oriented academic libraries or professional school libraries. Very little money has filtered down to us from grants to academic libraries under prior legislation of this kind and specific reference is necessary to encourage such allocation. Where grants are continued for library research and the training of librarians, specific reference to the needs of law librarianship, or at least to those of special libraries, would encourage the use of funds for those groups and perhaps assure more adequate consideration from the agencies charged with the administration of those provisions. Finally, if allocations for law library purposes were included in all

grants made to law schools, that would also assure a more adequate degree of the support we do badly need.

The American Association of Law Libraries submics that present financial support for law school libraries is inadequate. As a result, many law school libraries are presently below established standards with regard to collection, staff and budget and most are unable to meet the increased needs of their users and provide the services required of them. We feel that specific governmental assistance is necessary to remedy this situation which is detrimental to legal education and to the whole legal system in our country.

Table I

Number of Law School Libraries in the United States according to Size

Size	Number of Libraries
Very Small (less than 50,000 volumes)	40
Small (between 50,001 and 100,000 volumes)	54
Medium (between 100,001 and 200,000 volumes)	29
Large (over 200,001 volumes)	14
Total	137*

Between 100,001 and 200,000 volumes	21%	273
Over 200,000 volumes	10%	439

Senator PELL. We have one more witness.

Mr. CONARD. Mr. Pincus.

Mr. PINCUS. Thank you, Professor Conard. If it would be possible, Mr. Chairman, I would like to submit for the record a brief editorial in the new and current issue of the American Bar Association Journal, entitled "Clinical Legal Education."

Senator PELL. It will be received.

(The information referred to follows:)

[From the American Bar Association Journal, March 1971]

CLINICAL LEGAL EDUCATION

Clinical training for law students is burgeoning like the flowers that bloom in the spring. A new booklet, *A Survey of Clinical Education Programs at American Law Schools*, prepared by Robert W. Brown of the University of Illinois College of Law and distributed by the Law Student Division of this Association, indicates the number of programs and their variety.

Clinical legal education programs are calculated to serve several purposes. They please those practitioners who feel that law school should teach students how to find the courthouse. They please those students who have become bored with the traditional courses in the curriculum. And if, as is usually the case, the program has a *pro bono publico* aspect, it enables the participants to feel that they are doing something "relevant".

If these programs are judged purely from an educational standpoint, how good are they? On this question there are conflicting views.

One has been expressed by William Pincus, President of the Council on Legal Education for Professional Responsibility (an offshoot of the Ford Foundation), writing in the November, 1969, issue of the National Legal Aid and Defender Association magazine, *The Legal Aid Briefcase*. According to Mr. Pincus, a student learns several things from clinical exposure that he cannot from the classroom:

"First, he learns a standard of performance, a standard that most students will never have the opportunity to learn as they are catapulted into the marketplace and have the pressures of paying secretaries, office rent, and other expenses at the same time they are learning to conduct a practice. Second, a student learns how much of a commitment he can and should make as a human being to a client. . . . Third, the student can learn . . . a sense of injustice, and instinct for needed reform in the machinery of justice and in the social system. . . . Fourth (and related to the third point just mentioned), the law student should learn the distinction between what he can and should do as a professional and what he should be doing as a responsible citizen. The two are not always the same."

On the other hand, Erwin N. Griswold, former Dean of the Harvard Law School and now Solicitor General, recently voiced the hope that Harvard would not go overboard on "so-called clinical training". He conceded that student activities such as legal aid are useful, but he thinks their usefulness and their relevance to the law school's basic function are limited. He said in part:

"There are forces today which are going far, it seems to me, to turn the law schools back to trade schools in the area that is called, somewhat grandiosely, "clinical legal education." This is financed by a large grant from the Ford Foundation and advanced with considerable fanfare and singleness of purpose . . .

"Such work has the pleasure and attraction of immediacy. On the whole, though, it has little intellectual content. There is something to be said for it as an incidental along with the basic law school work. But I would hope that it would not be allowed to displace truly substantial and difficult intellectual work . . .

"I have done a measure of practical work of one sort or another during my professional life, and I feel reasonably sure that my efforts have not suffered from lack of clinical training in law school."

Dean Griswold seems to be answering the argument, often aired by various writers in this magazine, that law schools do not place sufficient stress on practical training. But that is not Mr. Pincus's argument at all. Practical training may be a useful by-product of clinical legal education programs, but it is not what they are aiming for primarily. They seek to provide a new dimension to the student's academic experience and to heighten his appreciation of the actual

ministry of his chosen profession. They are aiming at something more intangible than practical training—the quality which distinguishes the true professional from the craftsman.

Whether clinical training will fulfill this promise remains to be seen. Experience with the experiments now under way should provide the answer.

Mr. PINCUS. Since Judge Bell has been so cogent and eloquent in his statement about clinical legal education, I would like to stress a few points in connection with that. Our organization, the Council on Legal Education and Professional Responsibility has been the source of philanthropic funds for government in this field.

I would like to underscore what Judge Bell said in this area, in this way, that there are more than 80,000 law students in the United States now. This is literally an army of manpower which in the legal field, and I am leaving aside the educational values of clinical education, because they have been well expressed and will be in your record, and are included in fact in summary in our first biennial report, copies of which I have left with Mr. Wexler.

But leaving aside the educational aspect. I would like the Senators to particularly give the law schools consideration because this army of manpower in getting a better education can make an indispensable and so desperately needed contribution to the administration of justice.

We don't have in the legal machinery of our country the kind of contributions by law schools, and this is what we would like to make with your help, as we have in the case of medicine.

As Professor Conard pointed out, the medical students don't have to come to your committee. They are being considered as part of the health services of the United States.

Can you picture what the situation in health services would be if there were no medical students and no medical interns and residents working as part of the health machinery, the health process, or the process of providing health services?

What we are trying to do and say in the law schools is that we can have a better education for the law student and by bringing those law students into the machinery of justice and the delivery of legal services do like the medical schools do for medicine.

I think I would just like to underscore that public benefit aspect and to ask in that connection, which I know your bill does, Senator, to try to have clinical education specifically recognized as in title XI, and not lost in the shuffle somewhere as it easily can be in a general authorization for experimentation and so forth where the administrator may or may not ever become aware of the importance of clinical legal education.

That is all I have to say at this point. I appreciate your courtesy.

Senator PELL. Thank you very much indeed for a very valid point.

BAR REQUIREMENTS

How many States in the Union do not require graduation from accredited law school in order to become a lawyer?

Mr. CONRAD. I think we decided yesterday there are two in that category.

Mr. PINCUS. We could present a statement on that. These are historical remnants of a situation where you could become a member of the bar before that time without going to law school in any State.

ASSOCIATION MEMBERSHIP

Senator PELL. Is being a member of the bar and a member of the American Bar Association two entirely different things.

Mr. PINCUS. Yes.

Senator PELL. Thank you. I think you said more than half the lawyers belong to ABA.

Mr. KUHN. Approximately half do belong, yes. However through the house of delegates, the American Bar Association represents the legal profession in the United States, because while you have to be a member of the American Bar Association to be a member of the house of delegates, we have delegates from the State and local bar associations, affiliated professional organizations, and other categories, so the American Bar Association does represent all of the lawyers in the United States.

Senator PELL. I would like to ask Judge Bell, president of the National Bar Association, how many Negro lawyers are members of the bar and how many non-Negro lawyers are members of the National Bar Association.

Judge BELL. We have nonlawyers who are members.

Senator PELL. Do you have non-blacks?

Judge BELL. Yes, we have nonblacks too who are members.

Senator PELL. What would be the rough percentage?

Judge BELL. Less than 20 people; let me say something else, we number approximately 4,500 in the National Bar Association and there are occasions when we dispute that the American Bar Association represents all of the lawyers in the United States.

Senator PELL. Also how many Negro members are there in the American Bar Association?

Mr. KUHN. I can't answer that question, but there is a considerable number. I don't know just exactly how many belong to the American Bar, because we dont ask the question on the membership application.

Senator PELL. Would you have an informed guess?

Judge BELL. I would have an informed guess. I would say less than 500.

Senator PELL. Less than 500?

Judge BELL. Yes.

Senator PELL. Is there any possibility of both law associations amalgamating, is that on the horizon?

Judge BELL. Not as I view it at the present time, simply because there are certain basic fundamental differences in positions that the American Bar takes as opposed to the National Bar Association on issues, and I think that prevents an amalgamation.

We feel that black lawyers represent a special interest group, the black people, and we have to be in a position to be independent and to speak on behalf of black people on any given issue at any time.

Senator PELL. You can belong to both?

Judge BELL. Oh, yes.

Senator PELL. What are the dues?

Judge BELL. Our dues are $30 a year.

Mr. KUHN. ABA membership dues range from $7.00 per year for attorneys newly admitted to practice law to $40.00 per year for those admitted prior to 1960.

Judge BELL. So it is not exorbitant in terms of cost.

Senator PELL. This was off the subject but I wanted to be informed.

I will ask my good colleague, the former Attorney General of Minnesota if he has any questions.

Senator MONDALE. Let me express my appreciation to the chairman for having the panel of legal educators. It is important, and I appreciate his scheduling this testimony.

I wanted to make one comment about part time law schools. All the law schools we have in Minnesota—full time and part-time—perform a very important function, and in what I say, I don't wish to denigrate any of them, because they all do terribly important work. I think, however, that should pursue a policy in this country of encouraging full legal education, with a full focus on what kinds of responsibilities lawyers have.

I have a very high impression of what a lawyer ought to be, and I think our law schools should reflect the highest standards of the profession, so that their students do not become just tradesmen, but really social philosophers and educators as well, who understand the philosophical and social implications of the profession in the cases and the work they are doing.

This takes a good law school, and it takes a good student a lot of time. You can't wholesale it, and I think if I have any criticism of legal education, I don't think we do enough of it. We don't turn out as many broad gage attorneys as we should.

I think we have been doing well, but making a B or an A minus when we should be getting straight A's.

So just to have a treadmill to turn out lawyers is not enough. The second point I want to make is that I think there is something wrong with the way Congress has approached legal education in all of its aspects, and we must take responsibility for that, but there must also be something very wrong with the way the legal profession approaches the Congress.

We have a lot to learn from the medical profession. You have a lot to learn from Lockheed Aircraft, and the Pennsylvania Railroad, and North American Aviation.

The legal profession and what it brings to this country is desperately needed. We need many more talented lawyers, we need them in many positions.

The organizations have done wonderful work is supporting the legal services program. Indeed, without their efforts there would have been no legal services program, or it would have been one which was hardly worthy of the name.

Senator PELL. I would like to throw out a comment here, that the Senator from Minnesota has fought like a tiger to get a legal fee provision in a presently pending education bill. Indeed I believe his support for these programs, is as strong as anybody in the Senate in that regard.

Senator MONDALE. I appreciate that comment. We also have this new proposal for a separate legal services corporation to preserve the independence of the attorney in representing the poor and disadvantaged.

But I still believe that the legal profession and those of you who represent it must do a far better job of making your case, not just formulating it tacitly on a record, but in a political sense, like you did when the Murphy amendment was up.

In that case the American Bar and the rest of you really did the job,

and that is the only reason the Murphy amendment was dropped and the legal services program was saved.

Mr. KUHN. They did a good job on the 25th amendment, too, Senator Mondale.

Senator MONDALE. That is right.

You are a tremendous lobby if you will work at it. I think we have to look at the pittance for the legal services program, practically nothing for the CLEO program, and nothing for an existing title for a clinical legal education program, and library programs which for no good reason at all excludes law libraries—this reflects a failure not only on our part, but on your part, on the part of the profession to make its case.

I suspect one major reason we are seeing the phenomenal jump in the number of people wanting to go to law school is that young people with a social conscience are more than ever seeing the importance of the legal profession in making this country adjust.

The Ralph Naders are the real reformers in America today, and they are lawyers. The legal services staffs have done remarkable things around this country, and they are lawyers. One of the best arguments we have for a gifted young person who is about to turn off American society is what these magnificent young people are doing in the legal professions.

They are now responding by now wanting to go to law school and learn the same skills, and we have to meet that need, it seems to me, with adequate financial assistance for these students and with good law schools, with good law libraries, with good clinical legal programs, with outreach programs for the gifted young black and brown and red because we need people who are sensitive to the problems of the poor and disadvantaged—and we need a strong CLEO program.

But we don't have it. I would be glad to cooperate with in any way possible on any of these proposed amendments if no one else wants to. I would be glad to sponsor it and try to make certain that our higher education bill clearly includes all those proposals.

I am sure we could get bipartisan response and sponsorship on any of these proposals, and I would be glad to work with you. Then we get to the point that the chairman talks about, which is funding.

You know, we are always authorizing dreams in this committee, and then we appropriate peanuts, and we need your help on the appropriation side as well.

I remember the last time—in the 1969 OEO amendments—we really made a strong recommendation for CLEO. We suggested $5 million. What did they come up with?

Mr. CARDOZO. CLEO has been batted between OEO and HEW under programs that are labeled for other things. In OEO, it was the legal services program funded, and then in HEW it is going to be another program that it has been fitted into.

So there is no line appropriation for CLEO. We had to get it, as far as the Government is concerned, from the other funds.

Mr. PINCUS. I think it was $800,000, Senator.

Senator MONDALE. Yes, and we suggested $5 million. We had some bargains with them up there. The man who made the bargain got canned, but the other man that——

Judge BELL. There is a point that I would like to bring up. If in fact the funding of these kinds of programs is made on strictly a minority-type basis as an aid to minority students, I suspect that you are always

going to have a problem with funding, which is principally the reason I switched my thrust and started to talk about improving the overall administration of justice, and I think that is something that is salable.

If you go to some of your colleagues in the State houses and senates and you start talking about we are going to do this for black people, you can be shut out at the gate. But if we can do it as, again, I say, from an overall picture of helping the entire spectrum, the entire overall administration of justice, we can show how that will be improved by these programs, that is pretty hard not to buy, as I view it.

Now, I could be totally naive in this aspect but as I view it, I think that may be a better route.

Senator MONDALE. There is a point in the association of law schools statement that I agree with, and that is that it is not just very poor who are having trouble going through good law schools. The cost of legal education today is so high that the average middle class family has trouble funding their son through law school, or their daughter. They all need help.

I agree on that, but I don't think we should underestimate the importance of continuing to focus on the particularly difficult problems of the disadvantaged. Now, we say there is a dramatic rise in Indian education. How many Indian kids are there in law school in the country today?

Judge BELL. Less than a hundred, I would say.

Mr. CARDOZO. I would say it is close to a hundred.

Mr. PINCUS. I have met five now in the University of Montana Law School. I believe they and the University of New Mexico are about the only places that have sizable contingents.

Senator MONDALE. Does the Association of Law Schools have estimates, or do you keep records, on the approximate number of minority students, black, brown, and red?

Mr. CARDOZO. We do make an annual survey of the number from minority groups, and we have the number of blacks and Indians and so forth that were in the law schools last year. We have not got it for this year, because the survey has not yet been made.

Senator MONDALE. Could we have, for the record, the figures from last year?

Senator PELL. I think it would be very helpful.

Mr. CARDOZO. We put them in the testimony last year.

Senator MONDALE. Could we have, for the record, the estimated number of minority students in law schools around the country who graduated?

I would like to know how many graduated. I would like to know how many students were a part of the CLEO program, what the breakdown of those students were, I would like to know how many students there are, which law schools have them, and I would like to have somebody submit, I guess, a proposed series of amendments to deal with the problems—I see Mr. Tracy back there. He can probably see this is done.

I think it would be helpful to have those things for the record and then proposed amendments.

Senator PELL. It is a very good idea indeed.

(The information referred to follows:)

COUNCIL ON LEGAL EDUCATION
FOR PROFESSIONAL RESPONSIBILITY, INC.
280 PARK AVENUE
NEW YORK, NEW YORK 10017
697-6800

April 2, 1971

Honorable Claiborne Pell, Chairman
Subcommittee on Education
Committee on Labor and Public Welfare
United States Senate
Washington, D. C. 20510

Dear Senator Pell:

On March 31, 1971 when I appeared before your Subcommittee, you requested me to submit two paragraphs on the nature of clinical legal education to be inserted into the record of the hearings.

Clinical legal education, properly defined, is experience in lawyer-client work under law school supervision for credit toward graduation from law school. This involves work with clients from initial interview through court appearances, if the case goes to court. While students in every jurisdiction work in the pretrial stages as lawyers with clients and also assist their supervisors in court, 33 jurisdictions now authorize students themselves to practice as lawyers in court -- the number having doubled in only two years in order to encourage law school clinical programs. A clear definition is found in the Maryland rule for student practice adopted in 1970: " 'Clinical program' is a law school program for credit, held under the direction of a faculty member of such law school, in which a law student obtains practical experience in the operation of the legal system by assisting in the handling of cases before the courts." This definition of clinical legal education is reiterated in part of the statement of the Association of American Law Schools filed with your committee last year as follows: "The simplest definition of clinical legal education is any program which takes students out of the classroom and into the presence of 'clients' in the outside world. A typical example is letting students work on actual live cases -- civil or criminal -- under the supervision of a licensed lawyer. Usually this takes place in a legal office, an OEO-funded neighborhood law office, a public defender agency, a prosecutor's office, or a legal clinic operated by a law school."

There are other field experiences -- not clinical -- which may add to the education of a law student, as they would to the education of any student in higher education. These include experiences as observers, as interns in private or governmental agencies, or simply field research. Such experiences should not be mislabelled "clinical". They are not unique to legal education. Political science, economics, journalism and sociology students, among others, are increasingly turning to such field experiences. But clinical legal education -- the pretrial lawyer-client experience, and the preparation and trial of cases -- is the unique opportunity and responsibility of law students and their teachers. It expands legal education itself, producing better prepared and better lawyers -- the hope of an improved bar. It also puts more than 80,000 law students into public service, providing legal services to the poor, helping public defenders and prosecutors, and helping the overburdened judiciary. All this public service is done as a normal part of professional education in clinical work just as medical students provide an army of manpower for health services. Both the educational and the service aspect depend on the proper definition of clinical education given above and its distinction from other field experiences.

I hope these comments will help you and your colleagues to frame legislation which is specific and directed to clearly understood purposes. I stand ready to be of further assistance to the committee.

It was a great pleasure to appear before your subcommittee.

Sincerely,

William Pincus

Area Code 202, 296-8851

May 25, 1971

Honorable Walter F. Mondale
United States Senate
Washington, D.C. 20510

Dear Senator Mondale:

When representatives of legal education appeared before the Subcommittee on Education on March 31st to testify in connection with hearings on higher education legislation, you requested that we submit for the record some information concerning the program of the Council on Legal Education Opportunity. You were particularly interested in the number of students who were part of this program, how many have graduated and schools attended.

We think the best way to answer your questions is to enclose with this letter a copy of a draft of a report which was recently prepared by the CLEO staff detailing the operation of this program, which was begun in 1968. Of course, the CLEO students are only a small part of the total enrollment of the minority and disadvantaged students in law schools around the country. Unfortunately, enrollment statistics for the current academic year are not yet available, but we are under the impression that there has been a significant increase in the number of these students from that which we reported for the 1969-70 academic year in our prepared statement submitted for the record last year when the Subcommittee on Education was considering higher education legislation. This appeared in Part 1 of the printed hearings on S.3474 and related bills (91st Cong., 2nd Sess.), the "Higher Education Amendments of 1970", at pages 858-894. The information specifically about enrollments appears at page 866.

One of our principal concerns, as you know, is that federal financial support for the continuation of the CLEO program be assurred by the granting of appropriate statutory authority to the proper federal agency or department to insure this result. In the prepared statement which we submitted to the Subcommittee on March 31st, we briefly reviewed the history of funding arrangements

for this program from private sources and through the research and development funds of the Office of Economic Opportunity. We further indicated that, in our view, support for a program along the lines of the CLEO program seemed to us to now be a proper responsibility of the Department of Health, Education and Welfare, in the absence of any other existing appropriate federal agency. Thus, we noted our concern that the Department be given the appropriate statutory authority to provide stipend assistance to disadvantaged students in schools of law. In this connection, you will note that we commented on the proposed new Section 461 in the Administration bill (H.R. 5191; S.1123) which would grant authority to the Commissioner of Education to provide stipend assistance to such students. We support this provision in principle, but we feel that the limitation of $30.00 per month, or any comparably small amount, is patently inadequate for disadvantaged students in law and other graduate studies. Perhaps the proviso that exceptions may be made in "exceptional cases as determined by the Commissioner" will alleviate this problem, especially if it is understood that this language would encompass all of the students covered by a program of the CLEO type.

Very respectfully yours,

Peter L. Wolff
Assistant to the
Executive Director

Enclosure

cc: Honorable Claiborne Pell

CLEO

GENERAL DESCRIPTION

CLEO (Council on Legal Education Opportunity) is a federally funded program, begun in 1968, seeking to enable the "minority" or "economically disadvantaged" student, with "marginal" or less conventional admissions credentials, to have an opportunity to attend law school. To this end, CLEO inspires and cosponsors recruiting programs to inform and encourage students, particularly minority students, to choose law as a career; operates six-week summer institutes, with the cooperation of many law schools, so as to provide the selected students with a vehicle to identify their capability to succeed as law students and to become acclimatized to the process of law study; and provides an annual living stipend to those summer students who continue on in law school. CLEO is sponsored jointly by the American Bar Association, the Association of American Law Schools, the National Bar Foundation and the Law School Admission Test Council.

For the 1971-72 program year CLEO will be funded by both O.E.O. and H.E.W. Approximately 85 per cent of the total federal funds will come from O.E.O.'s Legal Services Division and the balance will come from H.E.W.'s Office of Education. These funds will provide for the operation of seven regional institutes this summer, accommodating 200 students. These 200 students will then receive $1,000.00 per year to help defray their living expenses while in law school. The conditions on this grant are: (1) the student must enter law school in September, 1971; (2) he must continue on in good standing for the three consecutive years; and (3) the law school in which he enrolls must provide for the student's tuition in the form of a grant, loan or combination of the two.

Most summer institutes are operated by a consortium of law schools, with the host school assuming primary responsibility for administration. This year's host schools for summer institutes are:

1) Howard University

2) University of Florida

3) Tulane University

4) St. Louis University

5) Texas Technological University

6) University of Denver

7) University of California - Davis

All of the institutes will conduct six weeks of course study. They will provide students with exposure to three substantive law school courses and a legal writing course. The courses will be taught by experienced law faculty. In addition, the institutes will be staffed by student assistants. These student assistants are minority students already attending law school.

CLEO enrolled its first class in 1968. Of the 93 students who began law school in September, 1968, six graduated mid-year of this academic year, and the bulk of the 65 remaining will graduate this June. These students receive an annual living stipend of $1500.00, provided by a grant from the Ford Foundation. The class of 1969 was considerably larger than that of 1968 and the funds for stipends has been a patchwork of various private sources. For those of the 399 students of the class of 1969 who entered law school in September, 1969, and continue in good standing, the level of support is fixed at $800.00. The 1970 class is the first to receive its stipends from federal funds. Beginning that year O.E.O. Legal Services not only provided for the costs of administering CLEO but granted funds for a class of 200 sufficient to provide stipends in an average annual amount of $1,000.00.

PROGRAM DATA

During the past three summers, 1968, 1969, 1970, CLEO has sponsored a total of twenty-two Regional Summer Institutes enrolling a total of 817 students. Established and operated very largely on an experimental basis, the purpose of these institutes has been varied: some were primarily compensatory or remedial, some were primarily screening devices to identify students who showed promise of success in law schools and others aimed primarily at orientation and conditioning students for the law school. All had mixed purposes.

Although the target groups for CLEO were originally designated as "Negroes, Spanish-Americans and American Indians," applications have appeared from a very wide spread of ethnic, geographic groups. On the face of it, it is very clear that CLEO's existence and its activity in pursuing its goals--particularly through summer institutes and recruitment conferences which it has also co-sponsored--has stirred enormous interest on the part of minority and disadvantaged group members in the law as a profession. Likewise, great interest and support on the part of laws schools of the Bar has been stimulated.

The Summer Regional Institutes and Law School Admissions:

Seven of these Regional Summer Institutes, lasting six weeks, were held in 1970 at Miami, Florida, Washington, D.C., Philadelphia, Detroit, Seattle, Tempe, and Houston. A total of 211 students were

registered in these institutes, of whom 195 were certified for final admission to law school. Detailed statistics on the performance of all three classes of CLEO students are shown in the following table:

Total number of students all CLEO Institutes, 1968-70----------817
Total number of CLEO students entered Law Schools 1968-70----------677
Total number CLEO students enrolled in Law School Sept., 1970------584
Total number CLEO students receiving Financial Aid Sept., 1970-----577
Total number Law Schools Enrolling CLEO students, all classes------105

1968 Class -- Total number post-senior CLEO students 122

No. of Students Entering Law School	Year	No. of Law Schools Enrolling
93	1968	33
2	1969	31
6	1970	28
101	1968-1970	33

77 at present (September 30, 1970) enrolled in law school;
8 of original enrollees failed;

The others either resigned from the program or left it temporarily while in good standing for good cause such as military service. Contingency eligibility is possible under the terms of the funding grant only for the 1968 class. Hence, of those who left temporarily in good standing, six have returned to law school this year. Six more of those who have deferred entrance for military service have indicated that they will enter law school in 1971.

1969 Class -- Total number post-senior CLEO students 444

No. of Students Entering Law School	Year	No. of Law Schools Enrolling
399 *	1969	91

* Includes 16 post-juniors from 1968 class

322 at present (September 30, 1970) enrolled in 80 law schools
44 failed
24 did not enroll because of military service or other good cause
9 status unknown

322 at present (September 30, 1970) enrolled in 80 law schools and receiving financial assistance. Of original enrollees, 44 failed; 24 withdrew or did not re-enroll because of military or other good cause; 9 status unknown. Of the 61 students in this class who did not enter in 1969, approximately 25 entered first year in law school in September, 1970, or returned after having withdrawn during the previous year.

Since the grant of financial assistance for all who did not register, or who failed or withdrew during the year 1969-70 was vacated, it has not been possible to ascertain precisely how many of this group are presently in Law School. Apparently, therefore, there is a total of approximately 340 CLEO students of the 1969 class and juniors of the 1968 class at present in law school.

1970 Class - Total number post-senior students 211

No. of Students Entering Law School	Year	No. of Law Schools Enrolling
187	1970	70

3 failed to enroll in law school for reasons unknown
5 status unknown
16 failed at the Institute

The first CLEO graduate is expected to finish law school in December, 1970. The main portion of the class, numbering 68, should complete law school in June, 1971.

Financial Assistance to CLEO Students:

Financial assistance at varying levels has been provided all CLEO students who successfully completed the Institutes. It cannot be argued that the amount of assistance available for any class has been as large as hopefully it would be. Consequently, within the limitations of funds received, and the terms of the grant, the members of the 1968 class have received $1,500 for living expenses only for each of their three years in law school, while the law schools provided tuition and fees. The members of the 1970 class will receive an overall average of $1,000 per year for living expenses for each of their three years in law school.

For both the 1969 and 1970 classes, the law schools provide tuition and fees by grant, loan or a combination of the two in accord with the policy of the law school applicable to all other students. Unfortunately, it has only been possible to guarantee the 1969 class $800 per year one year at a time. Furthermore, it has been necessary to reject all contingency eligibility for this class because of lack of funds. In fact, for each of the classes the careful husbanding of funds available has been necessary in order to meet the demands made upon them.

Financial Assistance to CLEO Students in Law School:

Financial assistance while in law school to the 1968 class was provided from a three-year grant of $450,000 made in 1968 by the Ford Foundation. By its terms, the grant was to provide $1,500 per year to each of 100 successful members of this class for living expenses only, and the law schools were to provide for tuition fees. Assistance to the 1969 class has been provided grants in 1969 and 1970 totalling $689,400. Two of these grants, from the Ford Foundation for $250,000 and Rockefeller Brothers Fund for $225,000 were three-year grants. The remainder is provided from annual grants totalling $194,400 by the American Bar Endowment and $20,000 from the International Business Machines Corporation. Nevertheless, the funds raised for support of the 1969 class fell far short of our expectations. Consequently, since more than three times as many students were to be supported in this class than in the 1968 class, it has been possible only with greatest of care to provide these students with assistance at the level of only $800 for 1969-70 and 1970-71. At the present time, it is not possible to guarantee even that figure for their third year in law school (1971-72).

For the class of 1970, a more encouraging situation exists. The terminal renewal of our grant by the Office of Legal Services of OEO included an item for the in-law support of the 1970 class of 200 students for three years at an overall level of $1,000 per year, totalling $466,000. One of the conditions of this grant, however, presupposes an annual attrition of 30%, at the end of the first year and 10% at the end of the second. This may actually be too high for the second and almost certainly for the third. Because of the more rigid screening of the 1970 class, the second year re-enrollment may well be larger than the anticipated 140 and the third year larger than the anticipated 126.

The following is a summary of funds received for financial assistance:

	1968	1969	1970	Totals
Ford Foundation	$450,000	$250,000	----	$700,000
Rockefeller Brothers Fund	----	225,000	----	225,000
International Business Machine Corp.	-----	20,000	----	20,000
American Bar Endowment	----	194,400	----	194,400
Office of Legal Services, OEO	----	-----	$466,000	466,000
	$450,000	$689,400	$466,000	$1,605,400

A note should be made of the very substantial contributions of law schools in form of tuitions and fees, and funds raised by the state and local bar associations, and some individuals for the support of minority and disadvantaged law students. Some of these efforts have been independent of CLEO and some have been in cooperation with, or as consequence of CLEO's efforts. Unfortunately, it has not been possible to list all of these efforts or to give the total amount of the funds thus raised. Finally, the Ford Foundation has provided one additional source of financial assistance to minority students by establishing a guaranteed loan fund through the United Student Aid Funds, Inc. of New York.

Recruitment of Minority and Disadvantaged Students for Law Schools:

During the winter of 1968-1969, CLEO co-sponsored with certain law schools and local bar associations and the LSAT Council two Recruitment Conferences. In the winter 1969-1970, the number was increased to ten, held at Boston, Cleveland, Washington, Atlanta, Chicago, Santa Fe, El Paso, Tempe, Denver, and St. Louis. In addition, a special circuit-riding type of recruitment conference was staged jointly by the four Louisiana law schools, CLEO and the LSAT Council. With the exception of the Louisiana effort, these were one-day affairs, and were deemed highly successful. Six one-day conferences were held in the winter of 1970-1971, as well as a group of conferences geared especially to the Southwest and the special conditions of that area.

The Information Clearinghouse and the Toledo Review Symposium:

There has been established at the University of Kentucy Law Library an Information Clearinghouse, containing a collection of reports, published articles and other materials relating to the problem of the mincrity group lawyers, and legal education and minority group members. This material has been catalogued and prepared for lending on an inter-library loan basis. A catalog or index of materials included in the collection will be available shortly.

There also was publication in November of a special issue of the Toledo Law Review, devoted entirely to a symposium on "Disadvantaged Students and Legal Education--Programs for Affirmative Action." It is a double issue, containing 31 articles. CLEO has participated in the organization, editing and support of the symposium in this issue of the Review. Some copies are available for distribution by CLEO and others will be placed in the Information Clearinghouse Collection at the University of Kentucky Law Library.

CLEO Funding, 1971

At the time the last grant authorization for the support of CLEO was made, OEO arrived at two important conclusions. First, it concluded that CLEO was an extremely valuable and productive endeavor. Secondly, it concluded that given the limited financial resources available to OEO and the apparent aura of uncertainty surrounding that agency's future funding, it was in the best interests of both OEO and CLEO that CLEO seek out permanent funding from some other source.

Various meetings have been conducted with OEO and HEW officials; and CLEO has analyzed HEW legislation, and prepared various documents on the existing legislative authority pertaining to its program design. It is clear that present legislation severely limits the power of CLEO to serve the community.

THE CLINICAL COMPONENT
IN
UNIVERSITY PROFESSIONAL EDUCATION

by
William Pincus, President
Council on Legal Education for Professional
Responsibility, Inc.

On the occasion of the Centennial Celebration of
The Ohio State University
Columbus, Ohio

THE CLINICAL COMPONENT IN UNIVERSITY PROFESSIONAL EDUCATION

In other times and circumstances one might take up clinical education directly for its intrinsic merits within the professional school curriculum without reference to other problems of education. We might forego examining even briefly the university and higher education outside the professional school. But the broad title of this program, Professional Education in the Contemporary University, suggests a wider look at the university and higher education, at least for perspective. An even stronger incentive for such a look comes from the recent upheavals on campuses in which physical violence became commonplace.

Because of such an abundance of wide-ranging social protest with tactics and philosophy of destruction, it is in order to point out that there are critics of the university who are friends of the university and of higher education, and who are concerned with preservation of human values and improvement of education through reform. Advocates of clinical experience in the law school count themselves as such critics.

What is the clinical component in university professional education? The clinical component is that in which the professional actually performs a specialized service for a person who needs his particular skill. It is the practice of the profession as a student

under faculty supervision. When done in a professional school as part of qualifying for the professional degree it is properly called clinical education since it involves the teaching, supervising and rating of the student's performance by someone representing the professional school. In medicine the customer for the service is called a patient. In law he is called a client. The same or similar terms are used in other professional-customer relationships.

I. CLINICAL EDUCATION AND THE UNIVERSITY

In the overall scheme of higher education, because it takes the advanced student out of the classroom, clinical education in the professional school is a corrective for the deficiencies inherent in a long process of classroom type education where the student has larger and larger doses of so-called knowledge pumped into him over a longer and longer period of time on the assumption that it is all good for him. Educators tend to overlook the corrosive effect of so much confinement to the campus on the human personality. The student's role is passive. He is locked away from the rest of the world in the sense that he is a consumer and not a producer of foods, services, or even ideas. He reaches and passes well into adulthood still being spoonfed from various sources, and most especially by the university and its faculty whom he sees more than anyone

except his fellow students. At most the student may have an occasional opportunity to become an observer in some field experiences. He fails to find anything that is peculiarly his as a contribution to the world. He suffers from an increasingly poignant sense of lack of fulfillment. A fundamental part of the student's personality is retarded in its growth - that part which takes us through life with at least that small sense of security which comes from the knowledge that we can do something of consequence to others in the larger world. The older we get, the more we need to participate in a productive way in the larger world and not just in the university world, for we know instinctively that somewhere out there is the real world for all of us; and that for most of us formal education is the preparation for the real thing - not the real thing itself.

Because human development also requires learning through doing clinical education is a necessity at the professional school level in higher education. It gives the student a real life role in the world as an integral part of his education. Though not the whole answer to what is best for the human personality and soul in a prolonged educational process, the clinical element can serve to make educators aware that they should concern themselves with the whole being which is the student as well as about how to make a

better technical or intellectual contribution in their specialty. For we will not truly educate, or even know the tranquility we need to educate, if we do not also address ourselves to the basics in human development, as well as to cutting out the cancer of war, the vices of society at large, and even the corruption in the university. For it is the innate restlessness of the frustrated and unfulfilled adult student, as well as these other factors, which results in the phenomena we are witnessing on campuses.

We shall continue to be shortsighted if we do not read these signs correctly. Certainly educators have to be concerned about what appears on the students' placards, although they do not have to adopt the same viewpoints. But they also need to be concerned about what is not on the posters and placards. How long should higher education be? Can the students afford the price, psychologically and otherwise, of so much exposure to intellectual brilliance? Or could they do with a semester or two less here and there along the way? Universities are not organized at all, let alone organized to consider such problems. But they will have to reorient their thinking along these lines if the definitions of the problems and their answers are not to be dictated from the outside.

Unfortunately, even educationally-oriented foundations have not awarded attention to

378

such fundamental educational matters. They have catered to and encouraged questionable propensities in universities, instead of acting as constructive critics whose strength comes from steadfast support of higher education. Philanthropy has been uncritical instead of being the private, friendly critic higher education needs. Its record is not good enough. How many grants have been made for quality education in fewer years as contrasted with grants encouraging longer years of study? How many have even raised the possibility of going one way rather than the other? Perhaps the fact is that philanthropy too has viewed higher education so much in terms of the teacher that the student is all but forgotten. Foundation grants have tended so much to encourage research, consulting, travel, etc. - all activities which by and large reduce teacher-student contact, rather than increasing it. How to reverse these tendencies involves tough problems worthy of the best brains in philanthropy and in higher education. The directions we need to take may be indicated by suggesting that we should get agitated over what we may be doing to our students, as well as for them. Clinical experience in the professional school is a force for making us confront this issue because it does make the student an actor as well as a spectator.

Peculiarly enough the isolation of students in prolonged higher education of the traditional type also leads the student to assume an air of intellectual arrogance and superiority. There is a prevailing tendency always to substitute great thoughts for the apparently small deeds which human existence calls for. One can detect such arrogance even in the so-called revolutionary campus rhetoric and most certainly in the actions of those who perpetrate deeds on the academic community in the name of change or revolution for the better. In this sense, it appears, the student learns too well some of the lessons of the academic community. The longer he stays on campus the more he deals in the currency of the realm; large issues; masses of people; intellectual gymnastics; verbal fireworks - either hissing sparklers or exploding charges.

The human experience is distilled into abstractions, necessarily so, for the purposes of teaching. But there is a dehumanizing element in all this. Individuals and their petty lives become reduced in size and consequence. We forget that smallness and decency are more of the essence of humanity than greatness and brutality. We don't learn how to deal with one person's problems, or even with those of hundreds or thousands. These become intellectually expendable. Physically removed on the campus from the masses, teachers and students seem to believe that their thoughts grow in importance as

they deal with millions and with larger issues. Smaller quantities of people can be ignored or brushed aside. We do it subliminally in the educational process at the higher levels, particularly in law and in the social sciences.

It is an easy leap from learning about life in this dehumanized way to believing that this is the way actually to approach the solution of life's problems: exclusively on a grand scale. Think big! This is the lesson the students learn well, capitalizing as well on the natural affinity and need of the young for arrogance. Analysis on a global or cosmic scale leads easily to "solutions" on a global or cosmic scale.

Clinical education, in its confrontation with the individual's share of the world's headaches, humanizes the educational process. It teaches that while the professional's intellect dissects the larger problems and places the individual's plight in the larger setting, the professional's dedication and skill also has to be used in solving the individual's problems for the sake of the individual and not for the sake of the answer to the big problem. In the person-to-person helping role, the professional, still as a student, begins to add to his intellectual competence a feeling for humanity and decency. He learns through the insistent demands of another personality the necessity of placing restraints on his own leanings: to work out approaches that are suitable to more than his own inclinations, to

088
881

repress the arrogance which would dictate answers for others.

Related to this is clinical education's value in inculcating a bent for persistence and application, for sustained constructive effort, despite the inevitable frustrations of life. It should be easier to appreciate the destructive inclinations in many today, when all of us have heard the shrill exhortation to burn and otherwise destroy, coupled with the assurance that the aftermath of an orgy of destruction is bound to be paradise on earth. Some of us may suspect that, instead, the intervening fires of hell may serve as the model for the ensuing state of affairs. But the important thing is the recognition that the educational process has to take into account the development of maturity by encouraging experience which teaches us how to live with frustration as well as achievement, in fact to use each frustration as a launching pad for achievement.

It is not surprising that the rage of rebellion vents itself so fiercely on the university. Thus it is in regard to those from whom we expect the most. Rage against parents can be savage. A whole profession of psychotherapy has been built on this phenomenon. The university inherits the same unenviable position. It becomes the object of fury stemming from frustration when the young discover the imperfections in their parents and in the

university, and, of course, in the rest of the world. When we are small we instinctively strike out at the loved one when we do not get what we want. As we mature, we learn to turn our propensity for violence and destruction because of frustration into an energy for constructing our own version of the world. We realize instinctively that there is no merit to destruction per se. We enjoy decreasing satisfaction in what others can hand over to us. We move to constructive action for ourselves in what is known as responsibility. We learn how to live with loss as well as with gain along with those who say: "You can't win 'em all."

Clinical education contributes to accelerating this passage to maturity and to constructive behaviour. It rewards the person with an instinctively well-ordered direction and philosophy by giving him the opportunity to move toward his goal by tangible acts. Clinical education teaches that, no matter how well-conceived a grand scheme, it takes dedication and work over a long period to move toward realization of the scheme. It also instructs that no scheme, however brilliant intellectually, has any meaning if it cannot be translated into the demands of human existence and individual lives. Clinical work prepares us additionally for life as people and professionals by making us able to mov ahead in spite of loss and frustration, by giving us enough avenues of forward motion and

new opportunities, because there are always individuals who can open avenues of success for us, in addition to those who are our companions in failure.

There is still another aspect of higher education which stands to be humanized by clinical education. The reference here is to the phenomenon of so-called credentialism and the self-centered outlook it engenders. Parenthetically it should be noted that self-centeredness is also at the root of other problems already referred to: educators who see the schools as serving their purposes with an accompanying lack of concern for students; educators and students who develop an arrogance that they know best for the rest of the world; and students who want what they want and now, so that persistence beyond frustration is not considered an important human trait to be cultivated.

American higher education has provided, and continues to provide, credentials for those who did not inherit them, making it possible for such persons to move to higher positions professionally, socially, and economically. With all of the criticism that any aristocracy is subject to, credentialism based on higher education is like democracy "the worst system except for all the rest." It needs to be improved, not scrapped - at least until a better system is devised.

Being so widely available in this country, higher education has contributed enormously to social mobility. In the process it has been sold on the basis of economic and social benefit to the individual. Statistics have been marshalled showing the higher life earnings of a college graduate. There has been little subtlety in this effort, because the purpose has been to appeal to the strongest personal motivations of the young generation, and of their parents who pay the taxes and vote the public policies which are the foundation of support for institutions of higher education.

If these motivations are strong at the college level, they are stronger at the graduate and professional school level. They have to be, to justify the added investment of time, money, and everything else. They are, because the professional school is even more clearly designed to lead into a paying occupation of high standing.

Thus there is a powerful element in education stressing that it is for the personal benefit of the student. Probably the unspoken assumption is that society benefits this way - according to Adam Smith - as each one pursues his own end.

While these motivations are essential, educators can and do take steps to broaden the outlook and the development of the student beyond his own career ambitions. To be effective this must go further than intellectual content of teaching or exhortation. Clin-

ical work involves the student in the problems of other people as a central part of training for a profession. Without undermining the personal motivations, clinical work perforce exposes the student to the fact that he has to serve another in order to bring respect to himself and his profession, as well as earn from others the income which determines his standard of living. In clinical work the student learns to give as well as to receive, to do it with grace and compassion, with understanding and satisfaction, and also that his professional education is for rendering service to others and not just to be exploited. All this is learned as part of, and not separate from, formal education, broadening its content and meaning, and making it more than the acquisition of a personal benefit in the form of credentials.

In the Age of Aquarius how does one tell the spurious? How does one distinguish non-values or false values from genuine values? It is difficult and there is no single answer. But education has to deal with this problem as well as with data. This involves the development of judgment, an indispensable asset, as well as the acquisition of knowledge.

The difficulty of teaching as well an appreciation of, and sensitivity for, true and

lasting values is made greater by the fact that man does not live by bread alone. He must have diversions and entertainment as well as the company of other human beings, in short: theatre and community. Monotony and solitude result in madness - even the monotony of good works and good causes. There is such a thing as too much of a good thing. It leads to restlessness, and restlessness has made man move upward and forward, or downward and backward, as a geology professor used to say, "to the mesozoic slime." The choice of directions is dictated in large part by responsiveness to values as distinguished from distraction by entertainment or happenings as powerful as the pull of the latter is. In our age some of the best examples of good theatre are outside the traditional theatres themselves. In fact the enchantment and delight broadcast by theatrical performances has invaded the world of teaching, research, and other university activities - the latter category being constantly enlarged by so-called innovative and creative projects in which there is indeed greater and greater difficulty in telling the educationally sound from that which is spurious. Undoubtedly this is characteristic of a dynamic age. But here too clinical education can help in part as a yardstick for the developments of a time with so much emphasis on change. It does so by returning us regularly as part of education to

the context of service to another human being. It brings to the forefront an important criterion for measuring true value: Is what we are doing a benefit as well for other individual human beings in our society? This helps to balance the attractiveness of newness and innovation per se, suggesting that the new garments ought to be cut to fit the real needs of real people, rather than the other way around. It should sometimes encourage a second look to examine whether something is new, and to what end. It should reduce the propensity to embrace false advertising and false claims in the merchandising of educational and social gimmicks. There is no prospect, however, that anything will eliminate completely our desire to be fooled occasionally - all the more reason why we should try to develop as sound a judgment as possible in and through clinical education, given the clash of needs in the human personality.

What has been suggested up to this point is that those in higher education cannot educate if they maintain a stance that education is only concerned with the student and not with the person. Educators are dealing with people, and clinical education involves students as people. It returns educators to the function of general practitioner and expands their role beyond that of brain specialist.

It is significant that in some professions like medicine, social work, and teaching below the college level some clinical work is a well established part of professional education. There seems to be the realization that the professional here is dealing with people's lives in a profoundly important way, and that he should begin to learn how to do this while he is still in professional school. Indeed, it is assumed that he cannot learn his profession without such experience. Also evident is the fact that these professional schools have a fairly clear vision regarding the school's goal: It is to prepare members of a practicing profession. This is their acknowledged role, although it is understood that some graduates go off into other occupations - some related, some unrelated. To put it baldly: there is no hangup about the fact that the schools are there to produce the practitioners for a given profession.

In preparing for college or graduate teaching - another profession - the schools have gone to what might fairly be called the opposite extreme. There is no clinical work - indicating that teaching is not considered the real goal of the outstanding college or university professor. The extra hours of credit required for the Ph. D. are not important, nor are the oral exams. The payoff is in the written dissertation - a demonstration

of research and writing capacity. This is not a preparation for teaching but for subsequent research and writing - the hallmark of a good college or university professor. He writes and performs primarily for his colleagues, and possibly for the world. He is rewarded for this in the form of bonuses. What he does to educate his students is incidental. From this he derives his base pay - almost as a matter of routine. As a practical matter teaching encroaches on the time required for research, and very often is incompatible with the research temperament. It is assumed that the important thing is the knowledge gained from research; and that anyone can, or at least can learn how to, teach in a relatively short exposure to students. The graduate - read professional - training of professors is as though they were all to be practitioners in some vast research institute not as though they were going to be teachers of generations of students. This may in part account for the fact that educators and administrators in higher education do not dig into the total development of the student, preferring to limit themselves to the intellect of the student.

To recapitulate up to this point: First, clinical education at the professional school level is especially important at this time in higher education because it serves to correct

certain tendencies now encouraged and which need modification. It does so by putting the student in a practitioner-client relationship as a normal part of his professional education. The particular ways in which it helps are:

a) It brings the student out of the classroom in a prolonged period of higher education - serving as a half-way house,if you will,on the way to the outside world.

b) In so doing it makes educators view the student as a whole person, and also view the effect of higher education on the person as well as the student.

c) It helps to offset the development of arrogance - a self-satisfied intellectual elitism. It gives reality to other people whom the professional serves, and puts them in the picture, so to speak, as partners in life with a worth of their own.

d) It teaches the necessity of persistence and application, and develops the fiber to withstand the crushing effects of frustration. It develops the capacity for constructive work for change of a sustained character, and lessens the emotional attractions of instant destruction.

e) It diminishes the self-centeredness of higher education - the all-consuming drive for credentials to cash in - by placing the professional-to-be in a helping relationship to another.

f) Finally, it helps to develop the judgment which instinctively leans toward the real values over the spurious ones - reducing to proper proportions the natural attraction of the theatrical, the entertaining, the new, per se.

II. CLINICAL LEGAL EDUCATION AND THE LAW SCHOOL

In its flight to the university setting from the practitioner-apprentice tradition legal education has up to this point built itself a niche away from the professional schools frankly preparing practitioners. Legal education is closer to the graduate faculties of social sciences with their bias for research as opposed to the practice of teaching; a bias in favor of self-improvement as a scholar; a belief that mankind will benefit automatically as the scholar or researcher pursues his own interests whether or not there is any apparent link to the tangible needs of others.

In this self-imposed segregation from the practitioner, legal education has stretched to the limit, and possibly beyond, the thesis that practitioners are not teachers, and teachers are not practitioners. In doing so, the self-styled national or quality law schools, which are the "Establishment" of legal education, have even professed that they exist not to produce practitioners, but to be the intellectual progenitors of the philosopher-kings of Plato, men and women who can rule in a democracy because of their merit (demonstrated

by admission to and graduation from these outstanding schools), and by virtue of the legal education received (again from certain outstanding schools).

While the bulk of the law schools have not and cannot lose sight of their mission - to prepare practitioners - they too are put in conflict and in some confusion by the so-called leaders in legal education. This has been the situation in legal education until quite recently. It has only begun to change, although the indications are that there will be more changes in legal education than any of the experts have been imagining. The principal agent for change in the law school is clinical education, a growing phenomenon. The effects of clinical education will be felt not only in the law school, but at the college level, and, of course, in the administration of justice and the society.

Clinical education in the law school will exert a profound influence on legal education, probably by moving legal education closer to the professional schools like medicine and social work, where the avowed purpose is to produce practitioners and to be involved in the delivery of professional services to the public. As has just been mentioned, in the flight from the apprenticeship system the so-called leading and image-setting law schools in the university have modeled themselves on graduate faculties in those disciplines where

the professional preparation through the Ph.D. is for research and writing, and not for practice, as teachers. Yet in both law and these other disciplines, the professional degree (Ph.D. or J.D.) is used to admit to practice as teacher or lawyer. Clinical education will serve to change this development which is more understandable historically, than justified by the needs of the public, the machinery of justice and the legal profession.

To focus more specifically, clinical legal education, in its stress on practice with a client, should help to clarify the real mission of the law school, which is to produce practitioners. This is always a plus, for we can always do better when we understand what we are about. There is every reason to be proud of the American system of legal education, but not because its teaching produces better lawyers than any other system of teaching the law. In fact there is not one shred of evidence to suggest that the American law schools produce better practitioners than the system in England, where there are no law schools as such.

The important distinction between the American law school and the British scheme, where legal education per se is so much in the hands of the practitioners, is that the American law school has opened entry to the bar for all classes. Both systems seem to

prepare good practitioners. The American system makes possible more open access and more upward social mobility. The schools essentially control who studies for the bar, and not the profession. In this sense the law school here is part of the social revolution wrought by the American colleges and universities. For these reasons successively upward mobile groups have sought the benefits of what has been called credentialism, which for all its drawbacks, has achieved an overriding social purpose of opening the paths of entry into the American Establishment. Catholic law schools are in part an evidence of this phenomenon, as are the substantial disparities in resources among law schools generally. The point is that many law schools with poor resources have been the launching pads to achievement for many financially poor boys and girls who were rich in talent.

These are the real facts of American legal education which are often lost sight of in a fog of shibboleths, the result of much oft-repeated talk among legal educators when they gather in professional conferences and meetings. An almost impenetrable miasma is caused by talk about the law schools producing - not lawyers - but so-called public leaders, as though the methods and curriculum for doing so exist, and even more important, as though this would be a desirable enterprise in a democracy - a kind of

West Point for all important jobs outside the military. Clinical legal education is an imperative to save us from this immoral, anti-democratic, and thank goodness, nonsensical talk because it says the job of the law school is to produce lawyers first - some of whom will become leaders.

Those who talk about producing public leaders are making around the facts, choosing what they like, just like at a smorgasbord. In all of this there is a lot of fuzzy thinking, promoted by narrow-minded self-interest, frequently embellished by high-sounding phrases. Of course, lawyers are bound to be public leaders. One whole branch of the government is largely a monopoly of lawyers. This is judicial administration. It includes public positions, like that of prosecutor and judge, as well as those who represent persons. In addition, because of the link to politics in the judicial system, lawyers move quite easily in and out of legislatures and executive posts. Lawyers, like the military, have a well staked-out governmental and political base. It is not strange that they too are a strong power group in government and out. Any assignment of an area of government to any segment of the population turns over substantial power, and also enhances the self-image held by the members of such a group - in this case, the lawyers. Such a situation quite readily leads some in the preferred profession to believe that what

the public has given or allowed them to take "is an inalienable right", in recognition of some special virtues not possessed by other members of the society. The same attitude begins to pervade the professional school, although significantly the perceptions are different in different schools.

In most law schools there always has been and there still is a fairly clear vision that the role of the school is to prepare practitioners to serve people; that the rewards of public office, if any,come because of this. But there are some schools which have reached the point of skipping over their reason for being - to produce lawyers for legal services. If they recognize the reality of practice,it is to practice, as they sometimes put it, "in the grand style." Keeping their eyes on the stars, so to speak, they are avowedly in business really to produce those earlier referred to as Plato's philosopher-kings: those who will wield important power and rule society because of their self-evident intellectual superiority and educational attainments.

Perhaps the culmination to date in this kind of thinking is the announcement by a well-known Northeastern university of its intention to start a law school to train "policy makers." Presumably because the public has not yet accepted the validity of such a degree from a university, the prospective students were advised in a footnote

that they would also be prepared to take the bar.

One can begin to suspect in the circumstances that "quality" and "standards" in some of these schools are almost synonyms for aristocratic and elite, rather than standing for what all would strive for: bettering legal service to all the people. By incorporating the reality of lawyer-client work through clinical education the law school may prevent its severance from the people without losing its opportunities for intellectual freedom.

Clinical legal education should help to restore balance and proper perspective. By its nature - lawyer-client work - it should inject into the life of the law school an instinctive appreciation of the fact that the legal profession and the professional schools which serve the profession exist to serve the people: whenever a client believes he needs legal service, as well as when the professional feels prepared to give service. It should also bring back an understanding of the democratic principle that power is given by the people to those who serve them and because of this deserve the delegated power, and also that those who a priori assert a special claim and competence for public power are not living in the democratic tradition. This can be true of professions

and professional schools, as well as of others.

Finally on this point - it is rather difficult to understand why those connected with a law school will not readily respond to a query on function and rationale with a proud response that their business is to prepare persons for the practice of the law. Is there anything disgraceful or demeaning about such a statement? If there is then the teacher-lawyer and the practitioner-lawyer had both better clean up the house they both live in. They should look to their responsibility for doing so, rather than attempting to avoid it.

A large part of the impetus to avoidance of such a direct response as to role comes from the fact that the confusion about the role of the law school thrives on the failure to deal directly with how one prepares law teachers as distinguished from law practitioners. Though unstated as a rule, the practice seems to be that the graduates of certain favored law schools are best qualified to teach, especially if on law review cum post-graduate experience with an appellate judge. This surpasses in unfounded presumptiveness even the non-sequitur treated above in discussing the use of the Ph.D. as a license for college teaching. Nevertheless there always has to be some system,

"the system" only being the one inveighed against at the moment by those pushing for change. Since not all the graduates of these favored schools choose to become law teachers, these same schools have invented a so-called graduate degree in law, to be bestowed upon those who wish to teach although they were not fortunate enough to receive their first degree in law from these schools.

Only rare and passing attention has been given to the possibility that it might be desirable to have law teachers have some experience in practice before joining a faculty. All of this contributes to a gap between law teachers and law practitioners, as though they are not really members of the same profession. It is not a desirable state of affairs. Clinical work in the law schools also should help to give everyone, whether he becomes a teacher or practitioner, the feeling that he is a member of a practicing profession and honored by being part of such a profession.

Sad to say, history suggests that in and of itself clinical work as in medical education, for example, does not guarantee a greater concern with medical services for all. There is this one respect at least in which the records of medical and law schools coincide: They both have atrocious records of disregard for the problem of

better professional services for all, regardless of the ability to pay. Only recently has this started to change. In this respect the records of the respective practicing professions are not much better, although in each case the practicing professions are doing much more now than the professional schools. In medicine there certainly was a first-hand awareness that working class and poor people get sick. There just was no attempt to insure service. In law schools and in the upper echelons of the legal profession the mythology was created and propagated that working class and poor people don't have legal problems, or certainly not any "intellectually challenging" to law faculties: a landlord might have legal problems with a tenant, but a tenant became part of the landlord's problem, and not a human being who required his own legal counsel and representation. It would appear that the outside society has to impose its requirements for better professional services for all. When this happens clinical work can help too by preparing law graduates, as it does in medicine, to be better able to serve as practitioners.

It is also important to recognize that there are certain areas where the intervention of law schools through clinical work is an indispensable element for improving

0001

the administration of justice. For the foreseeable future law students and law faculty are the only ones who can do something which holds promise, day in and day out, of upgrading the machinery of justice.

Investigations, reports, reorganization are occasional actions with an impact of their own. But the continuing pressure for improvement must come from the permanent addition of a new factor in legal institutions. This can only be the ombudsman-like role of law students and their professors, which is in addition to their service as lawyers and what they learn in the process.

The ombudsman role and its effect will come from clinical work in such places as the local courts, police stations, prosecutor's offices, and jails and prisons. Experience already indicates that the physical presence of law students and their teachers in such locations has a salutary and elevating effect on practitioners, judges, and various public officials. It also has strengthened confidence in justice on the part of those who have not had the legal advice and assistance required. The law school which is satisfied with an occasional study of one of these settings is far from discharging its responsibilities. Over and above studies the law school can provide the continuing impulse to improvement

302

through using such settings for some of its clinical programs. Incidentally, this creates the process through which the law school can much more readily be in touch with situations requiring study.

There is much to be learned about how to conduct clinical education in such settings. Some judges and opposing counsel have not taken kindly to zealous students who have forced them to go back to the library and look up cases. The same has been true of the reactions of some others. But by and large the effects have been accepted - if not heartily welcomed at first - and the public has benefited.

Is it all right to assume that the life of law students is to be comfortable in the future, as it has been up to now? Or that they even want it thus? It is taken for granted that medical students have to spend nights, weekends, and even summers learning the dirty work on emergency calls, in wards, etc. Why not law students to advise those who are arrested in the middle of the night? To provide counsel in certain lower courts on a regular basis? To do the same in jails and prisons? If not the law schools through clinical work, then who? The answer cannot be that this is no concern of the law school. Nor can it be that law students are incapable of doing the job - because there is enough

experience to show that they are able to do it very well, with some training and supervision, the latter being the task of the law school.

Unless clinical education grows and expands into these areas there is no likelihood that the law schools and the legal profession will succeed in cleaning up their own house - the machinery of justice. This is not a suggestion that law schools should not have other and more general concerns. It is only a strong plea to make the necessary contribution where they are uniquely qualified, and where no one else will or can contribute as much.

Once the law school becomes involved as the place to train practitioners, and as a center working to reform the machinery of justice through clinical work, it will adopt a different posture about matters relating to practice. No longer will the law school take the position that "the bar" can do it better as though "the bar" is a foreign agency. The bar itself can help in making things better, but it too needs the disinterested and specially-endowed machinery of education.

The improvement of the machinery of justice is a responsibility of the law school, but equally important is the teaching of such responsibility to the law student in the setting

of the practice of the law. In several of its newsletters the Council on Legal Education for Professional Responsibility (CLEPR) has set forth the major educational values of clinical legal education for the law student. Teaching responsibility for improving justice has been described as follows:

> ".... clinical legal education.... can develop in the future lawyer a sensitivity to malfunctioning and injustice in the machinery of justice and the other arrangements of society, as they are reflected in the individual case. It is the lawyer's work on the individual case and with his individual clients that constitutes the essence of his professional job. It is in this environment, therefore, that he needs to learn to recognize what is wrong with the society around him - particularly what is wrong with the machinery of justice in which he is participating and for which he has a special responsibility. This is a special social aspect of clinical legal education, apart from the delivery of legal services by the law student."

"Some legal educators have argued that a law student can learn more, or at least as much, about social problems by an adequate exposure to certain kinds of research including field and empirical research. There is no doubt that this is so. This is also so for students in any social science discipline - or indeed in any discipline. For a good research experience per se can yield extraordinary insights into social problems. However, the future lawyers are not going through law school to learn how to conduct social science research projects on social problems. They are going through law school to learn how to serve persons who need legal services. This is still the primary function of the law school. Consequently it is important for

the person training to become a lawyer to develop an instinct which leads him to perceive, from the specific facts of a case involving a client, a general social problem. For this is the form in which he will be exposed as a lawyer to the social problem, and not by way of the opportunity to make a special study of the problem apart from the handling of individual clients and cases. Of course law students should have the benefit of participating in good social science research - but not in lieu of a clinical experience with clients and cases."

A considerable part of the machinery of justice is the practice of the law. It happens to be a private practice but lawyers are officers of the court. This has to be recognized and dealt with explicitly. Clinical work in the law school plunges the law school into the myriad of matters involved in how the law is practiced. It moves the law school closer to the practicing bar, closing the undesirable gap between the two which has hitherto been referred to. It gives the professional school the opportunity to deal with standards of practice and behavior in a way which holds more promise than mere academic discussions of ethics. It takes up directly the fact that the machinery of justice creaks because of the disparity in standards of practice among different segments of the bar. We have written about responsibilities of the law schools in this respect, drawing attention as an educational value

".....to the teaching of standards for the performance of the basic skills involved

60-433 O - 71 - pt. 2 - 14

in service to a client and a cause by a lawyer. By this we mean such skills as interviewing, collecting facts, counselling, writing certain basic documents including pleadings, preparing for trial, and conducting trial matters, as well as following up after the conclusion of a trial. For years legal educators have eschewed the task of working these areas. The most commonly given reason has been that the law graduate will learn these skills best when he enters on his practice. The result has been to leave most law graduates to their own devices for they will have no postgraduate tutorial experience as an intern. Even those who will be tutored as interns after law school should gain from what they can learn in law school, for even in the best of settings and with the best of tutors there are certain commercial or institutional forces which restrict the young lawyer's efforts to the purposes of his employer and client as quickly as possible. In no institution outside the law school is there as much tolerance for abstract perfectionism and repeated efforts at refinement."

One of the most important standards to be taught is behavior in the sense of the professional managing his own emotions and intellect, and resolving the clashes which occur in him. We have described this as

".....the opportunity for a law student to learn about the management of his emotional commitments to a client and his cause."

"In the law school, removed from the necessity to earn a fee, the law student has his best and possibly his only opportunity to learn about managing a proper commitment to a client and his cause. The student can learn what a high order

00907

of commitment should be. He also should be able to learn when a commitment becomes distorted in a professional service setting, when it may become destructive and counter-productive both for the lawyer and his client. There is a delicate sensibility about involvement and restraint which continues to be developed through extended life experience, but the law school can provide the best start at training these faculties. It should be the place first to become aware of these nuances in the rendering of professional services. Every experienced practitioner will recognize the tensions created in attempting to strike the proper balance in each lawyer-client relationship, and between one client and another."

"In the live setting the law student will have to respond in a way that is fundamentally different from the response he is asked to give to a written problem. In the live situation the facts do not come in the relatively orderly sequence which is provided by writing. In real life the facts come quite often in a chaotic way. Indeed, the facts will not come without hard work at eliciting the facts. Quite often the source of facts turns out to be an abrasive or even abusive human personality. Yet this person is typical of many personalities who will be requiring legal services from the practicing lawyer. Instead of the comfortable and convenient printed page, the law student will be confronted with someone who may seem to be more of an antagonist than a person asking for his assistance. Still this is how people behave in periods of stress and strain when legal services are required. It is important that the law student be rubbed by a repetition of such experiences to find out how to maintain his capacity to think and to be useful as a lawyer under such circumstances."

008

These are indeed dimensions which legal educators are only beginning to explore as they enter the realm of clinical teaching. These areas have to be thoroughly developed if there is to be a more complete education of the lawyer, as well as a concern with the total machinery of justice which includes the private practice of the law as well as public rules, laws, and institutions.

There is already enough experience to suggest that student reaction and faculty involvement are moving quite rapidly to recognize the values of clinical education for the student. They do see the hastening of professional maturity and competence as a legitimate and vital function in legal education, as well as the benefits in broadening student involvement in the problems of reforming the administration of justice.

But while the goals are accepted there are still troublesome paths to be traveled on the way to achieving the goals. In fact there are painful choices as to which paths to travel.

Some of the greatest agonies, where they exist, come from a struggle in law faculties on how clinical legal education changes their existing world. It also comes from the uncertainties of a transition period when the unknown is so much more threatening

than the known. There is a strong unsettling factor in the prospect that clinical legal education may become an important part of the law school curriculum. It is probably the greatest change proposed in legal education since the creation of law schools as the replacement for the apprentice system. On this point we have said:

> "Legal clinics provide the opportunity to turn the constructive analytical skills of law teachers on law teaching itself in a way that goes beyond discussion of tweedle-dee and tweedle-dum, altogether different from the usual consideration of curriculum reform. The usual discussion of curriculum reform involves such alternatives to existing courses as using the problem or case-method; including written materials other than cases alone; experimenting with films, video tapes or simulations; or even devoting so-called new courses or seminars to the latest substantive area 'discovered', be it 'poverty law', 'urban law', or 'environment'."
>
> "It is remarkable that in a professional school like the law school discussions of new subject matter and methodology have so largely ignored and avoided the educational potential of the real practice setting involving clients and practitioners."

It is often a favorite pastime to stress the great change that came from so-called hornbooks to so-called casebooks. Yet such discussions really show a willingness to manipulate apparent changes through teaching materials as against a real change such as

happened by taking the law student out of the law office where he wasn't being taught adequately by lawyers, and placing him in a law school under professional teachers. Since that time nothing of equal significance has happened in legal education, although law professors have filled publications with articles on the assumption that changes have occurred, in the meantime urging more of the same - non-change or pseudo-change. These are good in-house pastimes, even if unimportant from the viewpoint of the world at large.

Clinical legal education does promise to make some major changes because it means taking some of the time now used for lectures and seminars and devoting it to the practice of law, step by step, under the tutelage and guidance and supervision and rating of law school faculty. It confronts the law school with putting together a curriculum and teaching staff which may be quite different in its various parts, instead of variations on the same theme played by the same kind of artists.

After two years of experience the Council (CLEPR) has learned much and seen certain trends developing. Everything that has been learned has come from the experience of the more than half of the ABA approved law schools which are involved in some clinical legal education effort with the aid of one of the 70 CLEPR grants made to date, and from

the experience of other schools which have involved themselves in clinical legal education without any financial assistance from CLEPR.

Certain things are apparent and should be considered as indicative of what lies ahead in the development of clinical legal education. Most schools which placed law students in legal services offices operated by other agencies have discovered that it is too difficult or even impossible to supervise their law students through the attorneys working in the office. Those who are operating lawyers cannot do justice to a workload and teach students at the same time. The workload in legal services offices is too heavy per attorney to successfully impose an additional burden on these attorneys. In addition there is always the question of whether every attorney is temperamentally suited to being a teacher-supervisor.

To get away from farming out their students in such situations law schools are setting up their own clinic operations. Some schools have started and operate their own legal services office. Others have taken over a part of an existing office and installed their own teacher-supervisors.

In having their own clinics the law schools have enhanced their potential for

supervision. Students and teachers are clearer about the educational part of the venture. An accompanying phenomenon has been the restriction of caseload in order to permit more teaching and emphasis on quality work.

Along with such developments has come an increasing allocation of time and credit for such clinical work. It has become obvious that clinical work is very time-consuming; that it is easier to earn 2 or 3 credits in a class or seminar with a limited work liability. Clinical work is open-ended - much more so than regular classroom work. Live clients and the dynamic legal process do not fit neatly into a predetermined few hours a week. Law schools, therefore, are becoming involved in experiments with several days a week being devoted exclusively to clinical work, or even with clinical quarters and semesters. Credits awarded for such work have gone up correspondingly. In some cases the credits have gone up to the point where few traditional classroom courses are required to round out a semester. This too frees the student for more clinical work.

Except in one case the schools have not bridged the gap between indigent clients and those who are more affluent. Clinical work is still largely a practice of poverty law - civil or criminal. Neither have the schools worked out a way to utilize the practicing bar as part-time teachers - as is done in medicine. Both of these problems are

unsolved and not being given enough attention.

As the states enact student practice rules, enabling students to appear in court, there is more attention to preparation of students for clinical work. The rules put the onus for certifying a student on the dean of a law school. This formality encourages attention to what the school should require for certification. This is good because schools are starting to set up a sequence of experiences and teaching situations which precede the privilege of going into court. In so doing schools are also beginning to consider what preparation a student should have before even interviewing and counseling a live client.

Not much attention has been given to the role of judges as students move into court. As they do so judges are inevitably drawn into the teaching process. They are tolerant of and helpful to students and their teachers, but they must temper this cooperation with an abiding concern that the judicial process must function quickly and effectively in the interest of the public. As the role of the judge develops he will undoubtedly be drawn into a more explicit teaching relationship with the law school and the bar.

There is, of course, also the question of who the clinical teacher should be and the difference between clinical education and apprenticeship. Viewing developments as

they are occurring, we have had the following to say on these points:

"We should emphasize briefly the difference between clinical education and apprenticeship. The former belongs to formal educational institutions. The latter belongs to the practitioner-employer. One cannot substitute for the other, although either or both may be omitted at a price paid in terms of educational benefit (clinical experience) or proficiency (apprenticeship). Proficiency comes from the kind of repetition of a task or tasks on the job which educational institutions cannot provide for any student. Educational benefits can be found and exploited in law school supervised clinical work."

"The teachers who are and will be clinicians may not be the same kind of personality as the teacher who enjoys the reflective life, research,and who teaches mainly through lecturing. Perhaps the clinician will be more like the practitioner in personality. But he has to combine some of the practitioner's qualities with a desire to teach. He is the counterpart of the ideal classroom teacher who is supposed to combine the qualities of a scholar with a desire to teach. What is needed is as much tolerance at this stage for the practitioner-teacher who falls short of perfection as the tolerance we have developed for the scholar-teacher who doesn't quite measure up. We shall probably find a few practitioner-teachers who are really only practitioners, just as we find a few scholar-teachers who are really interested only in scholarship. And most likely we shall find teachers who fall down a bit on practice, just as their counterparts do on scholarship."

It may then be asked what the legal education of the near future may look like.

First, one would hope for a reduction in the total number of years spent in college and law school. If the consideration of higher education reaches the fundamentals touched on at the outset of this paper, this would become a matter of highest priority, although perhaps the most painful for educators to confront.

Six years, instead of the present seven, should be enough time for college and law school. Like some other professional and graduate schools, law schools should require certain courses to have been taken at the college level. An entering law student should have had certain courses in the social sciences, particularly in political science and public administration. And efforts should be undertaken immediately to have jurisprudence and the legal process made an integral part of these disciplines at the college level. Is there a valid reason for having college students learn how a bill goes through Congress while they remain totally ignorant of judicial proceedings and other parts of the legal process? A college graduate ordinarily knows nothing of the organization and selection of juries (on which he will be expected to serve) or of the difference between a civil and criminal trial. Why shouldn't all college students and particularly one who intends to go into the bar have such knowledge before he enters law school? Of course,

a great deal of this needed material simply does not exist even at the law school level, and there will be work for some time to come while the materials are developed and put into use.

There needn't be a sharp break between college and law school. Those intending to go into law should be able to take certain basic law courses in their fourth year of college. This would help to ease the transition, and also to make it easier to make the final commitment to continuing into the fully professional part of the curriculum.

The first year in law school should be devoted to the basic law courses, torts, contracts, property, criminal law - those that teach the basic relationships being regulated by law between man and man, and man and organized society. The summer between the first and second year of law school should be devoted to clinical work in interviewing and counseling and to observation of trial work by way of preparation for clinical work. The second and final year of law school should be all clinical, including trial work.

If such a basic reform makes the academics unhappy it will at least serve far better the needs of society for adequate legal services and a profession which is practice and people-oriented. Clinical legal education should help to move higher education in this direction.

Mr. CARDOZO. Since you have urged us, as other members of Congress have, in the past to use our clout more, and you used the word "lobbying," I hope you bear in mind that section 501(c)(3) of the Internal Revenue Code puts a sword in the hands of the Internal Revenue Service Commissioner to take away our tax exemption if we do a substantial amount of lobbying.

Senator MONDALE. I understand that, but that is a favorite refuge for many associations. There is a constituency here. There are lawyers that can lobby, there are associations that can make their points of view known. You must obey the law to retain your tax exemption, but I was around here when we had the assault on foundations and I was impressed by how they could make their point of view known consistent with the law.

I can't believe that if this is a legitimate concern that the associations are prohibited from writing their membership or from making these points strongly in their own professional journals.

If worst comes to worse in light of this need, there ought to be a nontax exempt lobbying clearinghouse for the legal profession in Washington which strongly makes the case in this whole spectrum.

It is absolutely fantastic that we have a major national and long overdue debate about the Nation's health needs, and I am glad we do, and Senator Pell agrees, I am sure, but why didn't we see the same need in the legal field?

Because we have not made the case. I think many times disaster is visited upon the poor and not so poor because they can't afford a lawyer. Indeed, the more I study the laws, whether it affects the migrants, student assistance, civil rights, education, or Indian rights, I don't care what it is, I am always appalled by the degree to which these laws are ignored, or perverted, or twisted after we pass them.

I don't think you could do that for a law that was passed to help General Motors, because they would not stand for it.

But what do the poor do, and why have we been so unable to make this case? This is law and order, this is justice, but we have not made our case as well as we should. We are beginning to. But I think we have got to make it better. This is one of the reasons the poor have turned us off.

Judge BELL. That is right.

Senator MONDALE. Did you see that Senator Inouye just walked around Washington and went into a welfare office. Three cops came up to him and nearly threw him out. They said, "What are you doing here?"

They almost wanted to fingerprint him. That is what poor see. One of the reasons they see it all the time is that they know no lawyer is going to show up.

I know that in one county where there is a good legal services program, every time a welfare representative went for food stamps, he took a lawyer with him, because if he had a lawyer with him he got food stamps, and if he did not, he went hungry.

Sometimes it is a matter of life and death. As lawyers we know this, but for some reason it is just pennies, just a pittance, and we have to get effective and militant on behalf of justice.

This is a due process appeal. This is why we have conservative attorneys as well as liberal attorneys, who can agree on this. Look at the

cosponsors of our Legal Services Corporation. It covers every political philosophy in the Senate, and that is part of our strength, but I don't think we are even scratching the surface.

I am trying to get some money in the desegregation bill to reimburse successful private law suits. I think it will do more good than the whole bill will. More and more, I think, if we pass a law around here for poor folks, or for the average American, if we really want to do work, we ought to couple it with a private legal remedy. This is where we need the bar associations and our profession.

That is my speech for today.

CLINICAL APPROACH

Senator PELL. Thank you very much. I have two further inquiries here. Would you give me a couple of brief descriptions for the record explaining what you mean when you talk about the clinical approach, which you are emphasizing more now than you did in the past; would you describe it?

Mr. CONARD. I think I would like to ask Mr. Pincus to do that.

Mr. PINCUS. Would you like it in writing, or now?

Senator PELL. In writing will be fine.

Mr. PINCUS. I will be happy to present that.

(The information subsequently supplied follows:)

COUNCIL ON LEGAL EDUCATION
FOR PROFESSIONAL RESPONSIBILITY, INC.
280 PARK AVENUE
NEW YORK, NEW YORK 10017
697-6800

March 12, 1971

Stephen Wexler, Esq.
Counsel
Subcommittee on Education
Committee on Labor and Public Welfare
United States Senate
Washington, D. C. 20510

Dear Mr. Wexler:

I have received from Mr. Cardozo of the Association of American Law Schools advice that your committee is holding hearings on legislation relative to higher education, and that on March 31st the Association would like to testify. I understand the Association also suggests the presence of representatives of the American Bar Association and the American Association of Law Libraries.

It is most appropriate for these organizations to appear and give testimony, because of their interest in legal education. I am anxious that the Congress be as informed as possible when it frames legislation. Therefore, I am taking the liberty of writing you this letter and sending you some material because clinical legal education is the priority item for Congressional attention in connection with the law schools.

We are the principal proponents and financial supporters of clinical legal education at present. Our Council is particularly interested in the future of the Title XI authorization for support of clinical legal education and in actual appropriations which have hitherto not been provided. Created and funded by the Ford Foundation, we have in the last two years granted about 2-3/4 million dollars to support clinical experiments in 66 of the 146 ABA-approved law schools. We expect to support more such experiments, but we can only do so on a "shoestring" basis for a very brief period of time. This is the limitation of private philanthropy.

The important thing for the members of Congress to be aware of is that this movement for clinical work in law schools is the first real move for change since legal education was taken out of private law offices and placed in schools. Clinical work in law schools breaks down the wall between academic, classroom instruction and the kind of instruction which is based on practice with clients under law school supervision. It follows the medical school model. It is a movement for change which

improves legal education per se, and also brings substantial benefits to the society where they are desperately needed right now: in the neglected and forgotten areas of the law, such as criminal and juvenile law, legal services for the poor, and in the lower courts generally. For these are the places where the students and their teachers do their clinical work. It is important to remember that there are more than 80,000 law students. This is manpower for these parts of the machinery of justice where no one else is going to invest much of his professional career at present. Moreover, these 80,000 students will be better members of the profession because of their clinical work.

Clinical legal education is not just an arid theory about legal education. It doesn't simply decry how bad things are in our lower courts, in jails and prisons, in legal services for the poor, etc. It doesn't merely agree that the third year law school is being wasted. It is doing something tangible about improving, at the same time and in one effort, both the school and the machinery of justice, as a normal, constructive part of professional education. It is bringing an excitement to legal education which it never has had for students or for faculty.

The importance of clinical legal education is also evidenced by the fact that the supreme courts of the various states are moving quickly to endorse clinical legal education. In the last two years, 14 states have adopted student practice rules -- making a total of 36 jurisdictions with such rules at the end of 1970.

All human institutions are blessed and afflicted with our human propensities. One of these propensities is resistance to change. Law schools and legal educators are no exception. Change in the form of the movement for clinical legal education has overtaken the law schools and the law faculties. The ABA and the AALS are represented on our Council. It is good that they are supporting what is happening in legal education by way of clinical work.

However, Title XI owes its existence to the work of General Charles L. Decker, the former administrator of the National Defender Project of the National Legal Aid and Defender Association. And, before and since Title XI, initial and sustained support for clinical legal education has been the work of this Council and its predecessors. We vigorously advocate strong and ample support of clinical legal work in the law schools by the Congress. It presents a rare opportunity to spend public funds for better education and for an immediate public benefit by way of the services performed by law students in the course of clinical work.

If you wish, I could appear in person to acquaint your committee in greater detail with the Council's program and activities. In the meantime, I am enclosing copies of two of my papers in which I have dealt with the basic concepts underlying clinical legal education. The shorter statement will give you a quick perspective.

We now have at the printer a pamphlet containing and analyzing all the thirty student practice rules in effect at the end of 1970. Also at the printer is our first biennial report. It tells our story and explains our grants. Copies of each of these should be available by the end of the month and will be sent to you then.

Sincerely,

William Pincus

William Pincus
President

COMMENTS BY WILLIAM PINCUS, PRESIDENT, COUNCIL ON LEGAL EDUCATION FOR PROFESSIONAL RESPONSIBILITY, INC., AT THE PANEL DISCUSSION ENTITLED "TO MAKE LEGAL EDUCATION MORE PRACTICAL," ASSOCIATION OF THE BAR OF THE CITY OF NEW YORK, NOVEMBER 20, 1970

When I agreed to chair a panel on clinical legal education I hadn't the slightest idea that I was to be part of a two-day discussion entitled "Young Lawyers and the Legal Revolution." I doubt that what we at the Council on Legal Education for Professional Responsibility are trying to bring about can be termed a revolution. We are trying to reform the law school curriculum, and the reform we are promoting, if clinical experiments work out, is the first real reform since the establishment of law schools as separate educational entities.

Law teachers are inclined to discuss at length changes in teaching methods and materials in the classroom as though they are real changes in legal education. They are not, and this goes for the much-vaunted and often referred to change in the case system pioneered by Professor Langdell and now studied everywhere.

The first and last change of consequence until now in legal education in the United States took place when the education of future lawyers was moved out of the law office and into the law school, with the accompanying demise of the apprentice system. Few will argue that this was not a move for the better, in view of the abuses of the apprentice system by the practitioner, who too often saw it as a source of cheap office help rather than as a responsibility for teaching a future lawyer. In this respect lawyers were no different from other professions and crafts who did and still use the apprentice system.

In the move from the law office to the law school there was created a chasm between the schools and the practicing bar which exists to this day. The results are not healthy for legal education or for the bar. What is needed for the benefit of both and for the public is a rapprochement—a new partnership, in which education remains under the law school roof, but in which clinical practice with live clients under educational supervision for credit assumes a major role in the education of the law student. This is the real reform CLEPR is trying to bring about—the second reform in the history of American legal education. We would take the law student out of the classroom again to work with live clients—this time only for part of his legal education, and under educational supervision. The law schools can and do utilize members of the practicing bar for supervisors and teachers, just as medical schools do, but the entire enterprise must remain under law school auspices just as the classroom work has been.

CLEPR is a specialized foundation making grants to law schools to encourage experiments in clinical legal education. Its money comes from the Ford Foundation for a period of ten years for this work. Established in 1968, CLEPR is the successor to two predecessor councils, also Ford supported, which worked toward the same end although on a much more modest scale.

To date CLEPR has made 71 grants, totaling about two and one-half million dollars. Most ABA-accredited law schools have a clinical program of some kind. In New York City three of the six law schools have CLEPR grants. There is a high level of interest on the part of legal educators. But reforms involve struggles, and educators are at least as resistant to change as any other group of persons, perhaps more so.

We at CLEPR do not underestimate the challenge to psyche and ego in saying to classroom professors that their students could better spend some of their classroom hours to better advantage in a clinic and under the tutelage of such non-academic types as practice-oriented professors, or worse, practitioners who are part-time professors. But we at CLEPR have a passionate belief that higher education and particularly the law school need the benefits of clinical education. Why clinical education?

Clinical education takes the advanced student out of the classroom. In the professional school it is a corrective for the deficiencies inherent in a long process of classroom type education where the student has large doses of knowledge pumped into him over a long period of time on the assumption that it is all good for him. Educators tend to overlook the corrosive effect of so much confinement to the campus on the human personality. Clinical education can serve to make educators concerned about the whole student, and whether he can function as a lawyer outside the classroom as well as inside. It gives the student a real life role in the world as an integral part of his education, and helps him achieve a sense of maturity from functioning outside. It accelerates the student's development.

Clinical work is also an antidote for the intellectual arrogance produced by prolonged higher education of the traditional type. The longer a student stays on campus the more he deals in large issues and masses of people. The human experience is distilled into abstractions for the purpose of teaching, and there is a dehumanizing element in all this. Individuals and their petty lives become reduced in size and consequence and they appear to be intellectually expendable.

In this setting students become so accustomed to dealing on a grand scale that they do not acquire enough of the capacity to work on the real life problems of only one individual or a few. Clinical education humanizes the educational process. It teaches that while the professional's intellect dissects the larger problems and provides the larger setting, his dedication and skill must also be for solving the individual's problems for the sake of the individual and not for the sake of the answer to the big problem.

In the person to person helping role, the student adds to his intellectual competence a feeling for humanity and decency. He learns through the demands of another personality the necessity of placing restraints on his own leanings. Moreover, clinical education helps to inculcate a capacity for persistence despite the inevitable frustrations of life.

In working with real live clients, clinical education forces the student to come out of his self-centeredness to a certain extent, in this respect offsetting at least slightly the concentration on his own advancement through acquiring the credential provided by higher education and particularly the professional school.

Finally, by keeping students close to real life problems of individuals, clinical work places in perspective the attraction of the theatrical, the spurious, and the seemingly novel. In an age when communications have developed to the point where one well-known personality has taught us that the medium is the message, we need all the more to be connected with real people and their real problems to enjoy but not to overvalue the enchantment and delight broadcast by theatrical performances which have invaded the world of teaching, research, politics and every other aspect of our existence. Clinical work can help to balance the attractiveness of newness and innovation per se, suggesting that new garments ought to be cut to fit the real needs of real people, rather than the other way around.

Clinical education exercises a profoundly beneficial influence on the law schools themselves. It moves them closer to the professional schools, like medicine and social work, where the avowed purpose is to produce practitioners and to be involved in the delivery of professional services to the public. In the flight from the apprentice system the so-called national law schools in the university have modeled themselves on those disciplines where professional preparation is for research and writing and not for practice. Clinical legal education, in its stress on practice with a client, should help to clarify the central mission of the law school, which is to produce practitioners. We can always do better when we understand what we are about. Clinical legal education also helps to emphasize the fact that the legal profession and its professional members exist to serve the people: whenever a client believes he needs legal service, as well as when the professional seems prepared to give service.

An almost impenetrable fog is caused by talk about the law schools producing not lawyers but so-called public leaders, as though the methods and curriculum for doing so exists, and as though this would be desirable: to have a series of West Points for all important jobs outside the military. Clinical legal education can help to save us from this immoral, antidemocratic, and thank goodness, nonsensical talk because it says the job of the law school is to produce lawyers first—some of whom become leaders. Incidentally, talk about lawyers as leaders is always "puffing" because lawyers, like the military, have a well-staked-out governmental and political base. It is not strange that they are a strong power group in government and out.

Perhaps too, clinical legal education can help to eliminate the confusion which comes in part from the failure to deal directly with how one prepares law teachers as distinguished from law practitioners. By affirming its purpose to produce practitioners, the law school will better be able to deal with the problem of how to produce more teachers. In this regard, it might also come to pass that law teachers would be viewed as having to have some practical experience before joining a faculty. When this occurs, there will be a closing of the gap between law teachers and law practitioners. We shall eliminate the all too common feeling that they are not really members of the same profession. This is not a desirable state of affairs.

We expect that the machinery of justice will benefit directly from the expansion of clinical legal education. There are many areas where the intervention of law schools through clinical work is the indispensible element at present for improving the administration of justice. Investigations and reports are all right. But there is a need for the continuing presence of law students and their supervisors who, almost like ombudsmen, can begin to influence on a day to day basis what happens in local courts, police stations, prosecutor's offices and jails and prisons. Experience already shows that such physical presence has a salutary and elevating effect on practitioners, judges and various public officials. Clinical work has strengthened the confidence in justice on the part of those who have not had the legal assistance required before now. The law school which is satisfied with an occasional study of one of these settings is far from discharging its responsibilities.

Law schools cannot afford to be fainthearted when they first undertake clinical work even though some judges and opposing counsel have not taken kindly to zealous students who have forced them to go back to look up cases. By and large, these student have been accepted and the public has benefitted.

And so far as students are concerned, why should we accept that the life of law students is to be as comfortable in the future as it has been up to now? Or that they event want it this way? It is taken for granted that medical sudents have to spend nights, weekends, and even summers learning the dirty work on emergency calls, in wards, etc. Why not law students to advise those who are arrested in the middle of the night? To provide counsel in certain lower courts on a regular basis? To do the same in jails and prisons? If not the law schools through clinical work, then who? The answer cannot be that this is no concern of the law school. Nor can it be that the law students are not capable of doing the job. There is enough evidence to show that they are able to do it very well, with some training and supervision, the latter being the task of the law school.

We have with us today on this occasion a number of persons who have been involved in clinical programs in the law schools. Their students have been showing what the benefits of clinical legal education are. They have also been finding out what some of the problems are. Each of them will tell you something about his experience and give you his observations including any he may have on my own comments.

COST EFFECTIVENESS

Senator PELL. Also, I wanted to get back to the question of cost effectiveness, and I wanted to ask Mr. Conard, if you know of any law school which has engaged in some measurements of the effectiveness, cost effectiveness, of the programs?

The point we made earlier was that there were only so many seats. To my mind that is not an overwhelming drawback, because there can be shifts.

I was wondering if any of those schools has such a study going on.

Mr. CONARD. I think in the present straightened circumstances we are all studying how to save money, but in terms of giving you statistics on this program or that program, I do not know what we could produce.

Certainly we do know a good deal about the differences between educating our senior class and our freshman class and the student teacher ratio which becomes a factor in the different kinds of teaching.

Are you interested in a survey of that, or are you just interested in knowing whether we are looking at it?

Senator PELL. I am interested in two things, one, knowing whether you are looking at it, and, two, a couple of representative samples, if you have them.

Does the University of Michigan for the sake of argument, does it have a computer which would show the comparative costs as between criminal law and some other field of law?

Mr. CONARD. I would be happy to provide what I can on that, sir.

Senator Claiborne Pell
Senate Office Building
Washington, D.C. 20002

Dear Senator Pell:

At the appearance of a group of persons from the Association of American Law Schools before your Subcommittee on Education on March 31, you requested that further information on the type of cost effectiveness studies being conducted by law schools and universities regarding their activities.

I am happy to enclose copies of some of the documents which have been prepared at the University of Michigan. First, you will find a twelve-page document entitled Statistical and Analytical Data for Budget Conferences. As you will see, it includes extensive information on the number of students, the number of credit hours for which they enroll, and law school budgets. I think you will find most interesting Table 13, which shows the direct instructional salary cost per student credit hour. You will be interested in observing that from 1966 to 1968, in spite of a considerable increase in the general cost of living, the direct instruction cost per student credit hour rose hardly at all, and indeed fell from 1967 to 1968.

Later figures are in preparation, and cannot be supplied at this moment.

In addition to studying all-over cost of instruction, the University compiles costs for each course. I enclose a single page of this tabulation, marked "Page 653." You will see that the salary per student credit hour is shown in the extreme right-hand column for each instructor in each course, and the total for all the instructors in a given course.

Also included is a page from Cras Table 10 which shows for the Law School the cost per student credit hour in the 1970 fall term of all courses in the 500-699 level and in the 700 plus level. In general, the first group of courses are those offered to freshmen and juniors, and the second group are those offered to seniors and graduate students. It is not surprising to find a considerable difference in the costs, with the latter group costing more than twice as much per student credit hour as the first group.

Similar collections of figures are made for each department of the University, and are extremely voluminous. If you have any suggestions for refining these data, or if you have any further questions about them, I hope you will feel very free to let me know.

Very respectfully yours,

Alfred F. Conard

THE UNIVERSITY OF MICHIGAN OFFICE OF INSTITUTIONAL RESEARCH—STATISTICAL AND ANALYTICAL DATA FOR BUDGET CONFERENCES, JULY 28 TO AUGUST 15, 1960

PRECIS, LAW SCHOOL TABULAR DATA

In quantitative terms the attached material reveals little significant change in Law School operations over the last five years. However, the data are striking when contrasted with similar characteristics of most other schools and

colleges of the University. The two factors most directly responsible for this contrast are evidently the common curriculum and the prevalence of large classes. These permit the law faculty to spend relatively less time on instruction, more time on research and public service, and still handle heavy student credit hour teaching loads. Relatively high faculty salaries in the Law School can also be at least partially attributed to this combination of circumstances.

In reviewing Law School data one cannot help but wonder whether the subject matter in Law is so different that instructional efficiencies which are evident cannot be effected in some of the other units of the University. Probably that question should not be raised without raising the question of whether or not Law School students would benefit from smaller classes and more frequent individual association with faculty members.

TABLE 1.—HEADCOUNT ENROLLMENT BY STUDENT LEVEL (FALL TERMS, 1964 THROUGH 1968)

Senator PELL. I don't think seats are all that relevant and I wonder if there is information on what is being done to go into more than one shift.

Mr. CONARD. In that area, specifically, the ceiling we get is in library seats. We have rules in our association that you have a certain number of library seats for the number of students, and as we use the classrooms more intensively, we have to have more space in the library, because the students are going to use that to a large extent at the same time. This is real ceiling. We have a number of law schools today that we are having to crack down on, because they have too many students for the number of library seats, and this means the students can't go to the library and do the work they are supposed to do.

We have a specific problem there, and library seats are the kinds of seats which you need the most, and they are being used in the evening, and in the morning, and we can't double them up any more.

Senator PELL. Thank you very much and we would welcome any information later.

Professor COHEN. I want to say a word about cost effectiveness of law libraries. Most law libraries, regardless of the number of sessions in the school are open generally from about 8:30 in the morning to 12 midnight.

In most schools we have a terrible time getting students out of the library in order to close up. The students want 24-hour service. This is an area we could increase our effectiveness tremendously if we had the resources to keep open on a 24-hour basis.

One school, the University of Texas, is open 24 hours a day. This is an area where assistance is needed, and I think it would improve cost effectiveness in a dramatic way.

Senator PELL. At this point I order printed statements and other pertinent material submitted for the record.

(The information referred to follows:)

UNIVERSITY OF CALIFORNIA
HASTINGS COLLEGE OF THE LAW
198 McALLISTER STREET
SAN FRANCISCO, CALIFORNIA 94102

MAR 29 1971

March 24, 1971

Dr. H. Carroll Parish, President
National Association of Student
Financial Aid Administrators
2324 Murphy Hall
University of California
Los Angeles, California 90024

Dear Carroll:

The critical need for Federally funded student aid programs at the graduate level deeply concerns me as I am sure it must concern you and other members of the community of Student Financial Aid Administrators.

It would seem that the student assistance programs inaugurated and extended under the Higher Education Act of 1965 have been eminently successful, if we are to judge by the number of students from minority races and others from low socio-economic backgrounds whose applications swell the files in graduate and professional school Admissions Offices today.

Yet many of these students who, while yet in high school, were encouraged under the aegis of the Federal Educational Opportunity Grant Program (EOG) to raise their sights and enroll in College, now find their aspirations for study beyond the baccalaureate degree threatened by the ubiquitous financial barrier. They may find the doors to graduate and professional schools opened to them, but unless significant Federal financial assistance is made available, for many, these doors will lead to disappointment in the Financial Aid Office rather than to learning in the graduate seminar.

Unfortunately, except for the Health Science Professions, there is at present no Federal support for grants to graduate students <u>based upon need</u>. Moreover, the proposed Higher Education Act of 1971 <u>excludes</u> graduate students from consideration for even self-help under the Work-Study Program and the subsidized low-interest loan program. At Hastings College of the Law, with only a small endowed scholarship fund, we depend heavily upon the Work-Study Program and the National Defense Student Loan Program to help meet the cost-of-education for those studentes enrolled in our Legal Educational Opportunity Program as well as for others whose family incomes are less than $10,000. Without this assistance many students, though admitted to school, will not be able to enroll, and some continuing students may be forced to withdraw.

The unsubsidized, high-interest loan of $2500 that would be made available to graduate students under the auspices of the proposed National Student Loan Association makes less money available at a much higher cost to the student than has heretofore been available to the neediest graduate student eligible for a combination of aid from the Work-Study Program, the NDSL Program and the Federally Insured Student Loan Program. Even though the graduate or professional degree may assure a higher income for those who enter the private sector of the economy, those graduates from low socio-economic backgrounds, already heavily indebted for loans made to cover their undergraduate costs, will be hard pressed to repay additional high-interest loans which may necessarily total more than $10,000.

Thus, I would urge that NASFAA direct its attention to encouraging legislation which would make Federal funding available to provide grants, part-time employment opportunities, and subsidized low-interest loans for students at the graduate level of education. The primary purpose of such legislation would be to fill the void in student aid specifically directed toward graduate students from low socio-economic family income backgrounds.

Very truly yours,

Sylvia I. Diegnau
Director of Financial Aid

cc: Mr. James E. Nelson
Dr. Edward Sanders
The Honorable Edith Green
The Honorable Walter F. Mondale
The Honorable Claiborne Pell
The Honorable Carl D. Perkins
The Honorable Albert H. Quie

Senator PELL. Thank you very much. The subcommittee is recessed until 10 o'clock tomorrow morning.

(Whereupon, at 12:45 p.m. the Subcommittee on Education of the Committee on Labor and Public Welfare adjourned, to reconvene at 10 a.m., April 1, 1971.)

EDUCATION AMENDMENTS OF 1971

THURSDAY, APRIL 1, 1971

U.S. SENATE,
SUBCOMMITTEE ON EDUCATION OF THE
COMMITTEE ON LABOR AND PUBLIC WELFARE,
Washington, D.C.

The subcommittee met, pursuant to notice, at 10:05 a.m., in Room 4232, New Senate Office Building, Senator Claiborne Pell presiding.

Present: Senators Pell (presiding), Randolph, Williams, and Javits.

Committee staff members present: Stephen J. Wexler, subcommittee counsel; Richard D. Smith, associate counsel; and Roy H. Millenson, minority professional staff member.

Senator PELL. The Subcommittee on Education hearings on the Education Amendments of 1971 will come to order.

Our first witness today, and we are very honored to have him, is our colleague in the majority party, Senator Frank Moss of Utah.

STATEMENT OF HON. FRANK E. MOSS, A U.S. SENATOR FROM THE STATE OF UTAH

Senator Moss. Thank you very much, Mr. Chairman.

I do appreciate this opportunity to appear before you this morning and offer my amendment to S. 659, which is printed amendment No. 22, to constitute the College of the Virgin Islands, and the University of Guam, as land-grant colleges, I seek to end a longstanding inequity.

The Virgin Islands and Guam are the only two areas under the American flag which have schools of higher learning, and no participation in the land-grant college programs.

The population of Guam is approximately 100,000, and that of the Virgin Islands about 65,000. Young people in these territories looking toward careers in agriculture, the extension service, community services, environmental sciences, dietetics, home economics, mechanical arts, and the many other disciplines in which land-grant colleges excel, must apply to colleges in the States, or in Puerto Rico, for this training.

This is unsatisfactory, both because of stringent out-of-State student enrollment policies at many of the schools, and because even if admitted, out-of-State tuition is often beyond the means of many of the young people living in either Guam or the Virgin Islands.

In addition, the citizens of these two territories are denied the advantages of the cooperative extension programs which are connected with land-grant universities. Over the years, the Cooperative Extension Service has vastly increased its services in home living, community

development and youth development. All of these services would be helpful and welcome in both the Virgin Islands and Guam.

Under the provisions of the amendment I offer to S. 659 the College of the Virgin Islands and the University of Guam would:

(1) Be considered land-grant colleges established for the benefit of agriculture and mechanic arts in accordance with the act of July 2, 1862, the first Morrill Act.

(2) Receive an appropriation of $3 million each as an endowment, in lieu of public land, to be used for the maintenance of the colleges in accordance with the provisions of the first Morrill Act.

(3) Qualify under the Morrill Act of 1890 for annual grants to be used for instruction in agriculture, mechanic arts, and related subjects.

(4) Participate under the Bankhead-Jones Act of 1935 with the 50 States and Puerto Rico in further grants made available for the support of land-grant colleges. The colleges would receive an equal share of an annual national grant of $8,100,000, or $150,000 each, for teaching purposes, and an additional $20,000 annually for the respective institutions.

(5) Participate in the grants for research and service work in the distribution and marketing of agricultural commodities authorized by the Agricultural Marketing Act of 1946.

(6) Participate under the Smith-Lever Act in the Federal Extension Service program administered by the Department of Agriculture for cooperative agricultural extension work. An appropriation of $100,000 is authorized for each territory annually beginning in fiscal year 1971.

(7) Qualify for inclusion under the provisions of the Hatch Act of August 11, 1955.

The funds which would be made available to the College of the Virgin Islands and the University of Guam could be used for instruction equipment and supplies in agriculture, mechanic arts, English, mathematics, natural and physical sciences, economic sciences, and the special preparation of teachers. The funds could not be used for the purchase or preservation of buildings or the purchase of land. I would anticipate also that fields of instruction which have particular importance to the evolving needs of the citizens of each of the territories would be added to the college curriculum.

The College of the Virgin Islands began operation in 1962 and the University of Guam in 1952. It is time that both of them had the advantages that the Congress, down through the years, has made available to land-grant colleges—and it is also time that the citizens of the territories of Guam and the Virgin Islands had the benefits of the Extension Service—which has been a truly cooperative organization mutually serving the university, the students, and the citizens.

As the chairman may remember, the amendment I offer here today to the Higher Education Act was passed in an amended form as S. 1148 by the U.S. Senate in the second session of the 91st Congress.

This bill—S. 1148—which I introduced, was first reported unanimously by the Senate Interior Committee in the form I am presenting to the subcommittee today. At the request of the chairman of the Senate Agriculture Committee it was taken from the Senate calendar and referred to that committee for consideration. It then was reported, again unanimously, but with amendments.

It was passed unanimously by the Senate, and referred to the House Interior Committee, where, after hearings were held, it was referred to the House Agriculture Committee. It was killed there in the closing days of the 91st Congress by a 2 to 2 Agriculture subcommittee vote.

I tried every way I could to get the bill before the House for consideration in those last few days of the session, but was not successful.

I am appearing here because I feel that since the purpose of the measure is to improve higher education in U.S. territories, amendment No. 22 properly belongs before this subcommittee. As the chairman knows, the full text of the amendment is incorporated in S. 32 as title VII, the bill to amend the Higher Education Act of 1965 and other acts dealing with higher education which has been introduced by the distinguished chairman of the House Education and Labor Committee, Mr. Perkins.

The principal difference between S. 1148 as reported in the 92d Congress by the Senate Interior Committee and the version reported by the Senate Agriculture Committee was in the funding for the colleges.

The bill I introduced, and which was reported by the Senate Interior Committee, provided that each college would receive an appropriation of $3 million as an endowment, in the place of public land, to be used to maintain the colleges, in accordance with the intent of the first Morrill Act. This sum was approved by the Department of the Interior.

The Senate Agriculture Committee, however, reduced this amount to $1,019,000 for Guam and $714,000 for the Virgin Islands. The Agriculture Committee argued that the lump-sum payment cleared by the Department of the Interior should be reconsidered in the light of the ratio-basis funding provided to the University of Hawaii and later to the District of Columbia when each of these jurisdictions was accorded land-grant status.

The Agriculture Committee based its arguments on information presented by the Department of Health, Education, and Welfare which argued for the same approach which was taken when Hawaii became a State and in Public Law 90–354 which extended the land-grant concept to the District of Columbia. HEW stated:

> We believe that the proposed authorization of a $3 million lump-sum payment each to Guam and to the Virgin Islands should be reconsidered in the light of prior lump-sum authorization payments to other jurisdictions for a like purpose. When Hawaii became a State, it was granted a lump sum of $6 million in lieu of land or scrip grants under the first Morrill Act. In Public Law 90–354, following the precedent set for Hawaii, the amount authorized to be appropriated to the District of Columbia in lieu of extending to the District the provisions of the first Morrill Act was $7,241,706, which bore to the $6 million authorized for Hawaii the same ratio as to population of the District bore to the population of Hawaii. This method of computation was evidently not used in fixing upon the amount of $3 million for Guam and the Virgin Islands, respectively, in the present bill, and we are not aware of the basis upon which the sum of $3 million was determined. We would, therefore, suggest that the proposed lump-sum amount for the two territories be reconsidered in that light.

That is the end of the quote from HEW.

The Department of Agriculture advised that on such a proportionate basis to Hawaii the correct amount for Guam would be $1,019,000,

60–433 O—71—pt. 2——16

and the correct amount for the Virgin Islands would be $714,000 and the Senate Agriculture Committee recommended these amounts. They were in the bill the Senate passed.

I am sorry to have to bring a disagreement between executive departments of the Federal Government, and between two other committees of the U.S. Senate, before this subcommittee in discussing the adoption of this amendment.

But I did not think it would be fair, Mr. Chairman, to come here this morning to testify and not call to your attention the full history of this measure. It is only by having the full background that I feel the subcommittee can make a wise decision.

I trust I have presented the proposition in a favorable light, and I most sincerely hope that the subcommittee will agree that granting land-grant status to the College of the Virgin Islands and the University of Guam is desirable, and that you will recommend S. 659 to the full committee with this provision included.

I also hope that you will feel that the higher amount of money—the $3 million—should be authorized, as I understand Chairman Perkins feels it should. Both of these small colleges in territories removed from mainland United States need and deserve this financial assistance.

I do thank you very much for permitting me to testify for you this morning. I will be happy to answer any questions that you may wish to propound.

Senator PELL. Thank you very much.

As you pointed out, your amendment was passed before by the Senate, but not by the House.

I have just two questions. You say the population of the Virgin Islands is 65,000, roughly?

Senator Moss. That is correct.

Senator PELL. How does one handle the argument that a community of 65,000 is too small to have an institution of higher learning?

Senator Moss. Well, I think the best answer is: It already is supporting an institution of higher learning in the College of the Virgin Islands which is doing rather well but having a hard time financially. The college has a sizable student body, and is giving these young people instruction. This is in an area where I think particularly we ought to make a little extra effort to help those people who are citizens of the United States but live on an island removed from the mainland and finding it much more difficult, therefore, to get college training. If they could not have the College of the Virgin Islands, then they would all have to go to the mainland of the United States, which is much more expensive, and most of them couldn't afford to do it.

Senator PELL. Is the college there now accredited?

Senator Moss. I would have to check that, but it is my understanding that it is.

Senator PELL. Thank you very much, indeed, and I assure you the subcommittee will take a very friendly look, both in respect to you and at the bill, and we will consider it in the course of our executive sessions.

Senator Moss. I do thank you. I know the subcommittee and the full committee are very much dedicated to improvement of our facilities for higher education in this country. It seems to me that the Virgin Islands and Guam stand out as two black spots where we haven't done anything, whereas we have helped all of the States and the territories that have now become States, and we have helped even the District of Columbia. We have made a land grant college right here in the District of Columbia, which is appropriate, proper and desirable.

I think we ought to fill in these two blank spots.

Senator PELL. Thank you very, very much.

(A prepared statement submitted by Antonio B. Won Pat, Guam's representative in Washington, D.C. follows:)

STATEMENT OF ANTONIO B. WON PAT
GUAM'S REPRESENTATIVE IN WASHINGTON, D. C.
BEFORE THE SPECIAL SUBCOMMITTEE ON EDUCATION
"IN SUPPORT OF S. 659 - LAND-GRANT COLLEGE PROGRAM"

MR. CHAIRMAN AND MEMBERS OF THE SUBCOMMITTEE:

I AM INDEED GRATEFUL FOR THIS OPPORTUNITY TO SUBMIT MY TESTIMONY ON BEHALF OF S. 659, AMENDMENT NUMBER 22 OF WHICH WOULD BRING THE UNIVERSITY OF GUAM INTO THE NATION'S HIGHLY SUCCESSFUL LAND-GRANT SYSTEM OF ASSISTING INSTITUTIONS OF HIGHER LEARNING.

IN THE ONE HUNDRED AND NINE YEARS THAT HAVE PASSED SINCE PRESIDENT ABRAHAM LINCOLN SIGNED INTO LAW THE MORRILL ACT, THEREBY PUTTING THE FEDERAL GOVERNMENT IN THE BUSINESS OF SUPPORTING THE ESTABLISHMENT AND ENDOWMENT IN EVERY STATE FOR A COLLEGE FOR THE COMMON PEOPLE, THOUSANDS OF AMERICAN COLLEGE STUDENTS HAVE BENEFITED FROM THE PROVISIONS OF THIS UNIQUE LAW TO RECEIVE A LOW-COST, QUALITY EDUCATION.

THANKS TO THE FUNDS DISTRIBUTED TO THE SCHOOLS UNDER THE PROVISIONS OF THE MORRILL ACT, TUITION COSTS IN STATE COLLEGES HAVE BEEN KEPT DOWN TO THE POINT WHERE MANY YOUNG PEOPLE HAVE BEEN ABLE TO ATTEND COLLEGE WITH ONLY THE ASSISTANCE OF A PART-TIME JOB. IN ADDITION, THE ACT CHANGED OUR WHOLE CONCEPT OF WHAT A COLLEGE WAS SUPPOSED TO TEACH, RESULTING IN THE ACADEMIC EMPHASIS BEING PLACED ON ENGINEERING AND AGRICULTURE COURSES, RATHER THAN THE TRADITIONAL GREEK

OR LATIN PHILOSOPHY STUDIES.

THE FUNDAMENTAL SOUNDNESS OF THIS CONCEPT OF FEDERALLY SUPPORTED STATE COLLEGES AND UNIVERSITIES WAS DEMONSTRATED WITH SUCH THOROUGHNESS THAT SUBSEQUENT CONGRESSES PASSED THE HATCH ACT IN 1887 AND THE SMITH-LEVER ACT IN 1914, EXTENDING THE ORIGINAL ACT INTO THE GREAT PROGRAM WE SEE TODAY. IN THE COURSE OF RECENT YEARS, CONGRESS HAS ALSO PASSED ADDITIONAL LAWS THAT PROVIDE FOR INCREASED FEDERAL PARTICIPATION IN ALL LEVELS OF EDUCATION. HOWVEVER, THE STRONG FOUNDATIONS OF THE ORIGINAL LAND-GRANT SYSTEM WILL STAND AS A MONUMENT TO THE LEGISLATIVE PIONEERS WHO FIRST MADE HIGHER EDUCATION AVAILABLE TO THE LESS AFFLUENT MEMBERS OF OUR SOCIETY.

AS I MENTIONED EARLIER, LAND-GRANT AID WAS ORIGINALLY OFFERED TO STIMULATE TEACHING PRIMARILY IN THE AREAS OF AGRICULTURE AND THE MECHANIC ARTS. AND THOUGH THE SCOPE OF THE LAND-GRANT SYSTEM HAS BROADENED TO FIT OUR MODERN TECHNOLOGICAL SOCIETY, THE NEED IN GUAM OF ADDITIONAL COURSES IN AGRICULTURE AND THE MECHANIC ARTS IS AS REAL TODAY AS IT WAS FOR THE FLEDGLING AMERICAN STATES AND TERRITORIES BACK IN 1862. I CAN ASSURE YOU THAT S. 659 AMENDMENT NO. 22 WILL HELP US MOVE FORWARD SUBSTANTIALLY IN THAT DIRECTION.

THE UNIVERSITY OF GUAM IS A PROUD EXAMPLE OF WHAT AMERICAN DETERMINATION AND INGENUITY CAN ACCOMPLISH. ESTABLISHED BY AN ACT OF THE GUAM LEGISLATURE IN 1952, ONLY TWO YEARS AFTER THE REINS OF LOCAL GOVERNMENT SHIFTED FROM MILITARY TO CIVILIAN HANDS AND OUR PEOPLE BECAME AMERICAN CITIZENS, THE UNIVERSITY

HAS STRIVEN TO PROVIDE ITS STUDENTS WITH A QUALITY COLLEGE EDUCATION AT A COST EVERYONE COULD AFFORD, IN ADDITION TO MAKING CERTAIN THAT THE COURSES OFFERED WOULD ENABLE THE FUTURE GRADUATES TO FILL THE NEEDS OF OUR RAPIDLY GROWING SOCIETY.

THE ORIGINAL EMPHASIS WAS ON TEACHER TRAINING, BUT GROWTH HAS BEEN RAPID AND WE NOW HAVE A MULTI-PURPOSE INSTITUTION DEDICATED TO THE DEVELOPMENT OF THE ARTS AND SCIENCES, A WIDE RANGE OF TECHNICAL AND VOCATIONAL SERVICES, AND PROGRAMS OF GENERAL CULTURAL ENRICHMENT FOR ADULTS. IT IS THE ONLY AMERICAN INSTITUTION OF HIGHER LEARNING IN THE WESTERN PACIFIC, AND HAS COME TO BE A CULTURAL CENTER FOR ALL OF MICRONESIA, INCLUDING THE STRATEGIC ISLANDS OF THE PACIFIC TRUST TERRITORY.

MOST OF THE YOUNG PEOPLE OF THE TRUST TERRITORY CANNOT AFFORD TO GO FARTHER AFIELD THAN GUAM IN PURSUIT OF ADVANCED EDUCATION. THAT IS EQUALLY TRUE OF OUR OWN YOUNG PEOPLE. WE MAKE HIGH-QUALITY UNIVERSITY WORK AVAILABLE FOR THEM OR THEY DO NOT GET IT. AND THOSE FEW WHOSE PARENTS SOMEHOW ARE ABLE TO SEND THEM TO THE MAINLAND FOR STUDY OFTEN ARE RELUCTANT TO RETURN TO OUR ISLAND LIFE, AND THUS WE LOSE THE ADVANTAGES OF THEIR PROFESSIONAL TRAINING.

TO OFFSET THAT DRAIN OF SORELY NEEDED MANPOWER AND TALENT, WE HAVE BEEN CONSTANTLY UPGRADING OUR UNIVERSITY. IT NOW HAS A FULL FOUR-YEAR PROGRAM, AND A GRADUATE SCHOOL WAS ADDED RECENTLY, STARTING WITH COURSES LEADING TO A DEGREE OF MASTER OF ARTS IN EDUCATION. THE UNIVERSITY IS ACCREDITED BY THE WESTERN ASSOCIATION OF SCHOOLS AND COLLEGES.

THIS YEAR, OUR UNIVERSITY HAS AN ENROLLMENT OF 2,989 STUDENTS, OF WHOM 293 ARE GRADUATE STUDENTS. TWO HUNDRED AND NINETY-SIX OF OUR STUDENTS ARE FROM THE TRUST TERRITORY, AND SEVERAL HUNDRED ATTEND EXTENSION CLASSES AT ANDERSEN AIR FORCE BASE AND AT NAVY INSTALLATIONS.

IF THE UNIVERSITY OF GUAM IS TO CONTINUE IN ITS EFFORTS TO SERVE THE INCREASING NEEDS OF OUR COMMUNITY AS WELL AS THOSE OF THE SURROUNDING AREAS, ADDITIONAL ASSISTANCE, SUCH AS THAT OFFERED BY PARTICIPATION IN THE MORRILL ACT WILL BE NEEDED. THERE IS A SOLID RECORD OF LAND-GRANT HELP TO THE TERRITORIES. THE UNIVERSITY OF HAWAII, NOW ONE OF THE NATION'S FINEST, WAS BROUGHT INTO THE SYSTEM BEFORE THE TERRITORY ACHIEVED STATEHOOD. IN ADDITION, THERE IS A FLOURISHING PROGRAM OF LAND-GRANT ASSISTANCE TO THE UNIVERSITY OF PUERTO RICO. RECENTLY WE SAW THE FEDERAL CITY COLLEGE, HERE IN WASHINGTON, D. C., BECOME ELIGIBLE FOR LAND-GRANT ASSISTANCE.

WHEN OUR FOREFATHERS PASSED THE ORIGINAL MORRILL ACT, IT WAS DONE WITH THE HOPE OF SUPPLYING THIS YOUNG NATION WITH THE INTELLECTUAL BACKBONE NEEDED TO SUCCESSFULLY CHALLENGE THE VAST WILDERNESS THAT LAY BEFORE IT. THE TERRITORY OF GUAM IS NOW IN A SIMILAR POSITION OF NEEDING SCORES OF HIGHLY TRAINED YOUNG PEOPLE IN THE COMING YEARS, TO MEET THE CHALLENGE THAT A NEW SOCIETY AND MUSHROOMING ECONOMY PROVIDES.

THE TERRITORY OF GUAM IS AT THE CROSSROADS OF ITS FUTURE; WHAT GUAMANIANS DO TODAY WILL AFFECT NOT ONLY THE LIVES OF FUTURE GENERATIONS OF GUAMANIANS, BUT PERHAPS THE DESTINY OF OTHER PEOPLES IN THE WESTERN PACIFIC. THE UNIVERSITY OF GUAM STANDS READY TO MEET THE CHALLENGE TOMORROW OFFERS. WITH YOUR ASSISTANCE, IT WILL BE ABLE TO DO SO.

ACCORDINGLY, I URGE FAVORABLE ACTION ON THIS LEGISLATION.

Senator PELL. Our next witnesses will be a panel on junior colleges, representing the American Association of Junior Colleges.

Dr. William Flanagan, president of Rhode Island Junior College, I understand, will be acting as the chairman.

Mr. Harry Smith, Mr. Dana Hamel, and Mr. Martorana, are from respectively: the Essex Community College, community college system of Virginia, and 2-year colleges, State University of New York.

Would you all come up, please, and introduce yourselves. By coincidence, we have some interns from Rhode Island Junior College in my office this week. I was wondering if it was all right with Dr. Flanagan if one of them could sit at the committee table. We haven't had a student appear yet. So, would one of your interns draw lots and come up? Decide it among yourselves.

STATEMENT OF WILLIAM S. FLANAGAN, PRESIDENT, RHODE ISLAND JUNIOR COLLEGE, PROVIDENCE, R.I.; ACCOMPANIED BY J. HARRY SMITH, CHIEF EXECUTIVE OFFICER, ESSEX COMMUNITY COLLEGE, NEWARK, N.J.; DANA HAMEL, CHANCELLOR, COMMUNITY COLLEGE SYSTEM OF VIRGINIA; AND S. V. MARTORANA, VICE CHANCELLOR FOR 2-YEAR COLLEGES, STATE UNIVERSITY OF NEW YORK

Mr. FLANAGAN. Senator, this is Dr. Martorana, the Vice Chancellor for the State of New York for Community Colleges and Dr. Dana Hamel, from the State of Virginia Community College System, and Dr. Harry Smith from New Jersey, Essex Community College in Newark, N.J.

Senator PELL. And the student from Rhode Island?

Mr. DESESRO. Michael DeSesro.

Senator PELL. Thank you very much.

I would hasten to say the principal sponsor of S. 545, Senator Harrison Williams, is going to be along soon. He has fought long and hard for junior colleges for a good many years.

I notice there is a lot of testimony here. I can assure you it will all be printed in the record. I was wondering if you would care to digest it a bit and proceed as you will.

Mr. FLANAGAN. Thank you, Mr. Chairman.

I shall attempt to digest this.

May I express my appreciation for your invitation to be here, and for your great concern about higher education, in fact, all education.

My name is William F. Flanagan, president of the Rhode Island Junior College and the State System of Colleges in Rhode Island. I am very honored to be here representing the American Association of Junior Colleges and its commission on legislation. Obviously, we represent public institutions, but the concern for the private sector is in our hearts.

We take this opportunity to testify. We, in fact, feel we would be derelict in our duty if we failed to bring to you our views on important bills now before you.

In our view your omnibus bill on higher education and the Vocational Educational bill, S. 659, and Chairman Williams' Comprehen-

sive Community College bill, S. 545, are great bills that promise historic contributions to the progress of post-secondary educational opportunity and services in this land. We want to comment in detail on both versions, but let me begin with some personal observations.

From over three decades of experience in public education, from grade seven through university teaching and graduate administration, I should like to assure you that the world of the comprehensive community junior colleges is the most exciting educational world that I have experienced. It is a distinctly American answer to our educational and social needs; needs for social mobility and, indeed, societal change.

Just as compulsory free education from grade 1 through secondary school became the goal of American education systems in the early days of this century, so education beyond high school—days, evenings, summers, part-time, full-time, accelerated, and leisure oriented—must be the reality of the late 20th century. And we believe the comprehensive junior community college—flexible and dynamic—is the instrument of today to accomplish this goal.

The miracle of the junior college, as it actually exists, has been its ability to respond quickly and untraditionally to the very real needs of people.

The age when education—higher education—was the privilege of an economically or an academically elite, available only for the few, is passed. Our expansion of knowledge; our technological developments; our mass communications; our thirst for social mobility; all these demand that upward mobility which promises the good life; and the good life with material possessions available not just to the fortunate but to all our citizens.

We in the junior community college movement feel that our comprehensive institution holds the greatest promise for the greatest number with the least cost in the whole complex structure of higher education—least cost to the student—and least cost to the taxpayer who endows it.

By "comprehensive" we mean that it provides things for a variety of people. For the classical scholar who wishes, for various reasons: economic or social, to begin his collegiate life in the community in which he serves, for the scholar who wishes to learn salable skills, the post-secondary nonscholarly person seeking job training at degree and non-degree levels to prepare him for initial work experience, or to retrain him when his old skills are no longer adequate, for all these we make a commitment.

Let us state frankly, however, that in view of our dramatic growth of student patronage and despite our continued response to public needs, we have been neglected by the public treasuries of support. Only about 40 percent of the severally authorized funds have been appropriated in many vital programs, and even that which we have had may be taken away, and I refer to the higher education grants, and particularly the construction grants.

As far as I know there is only perhaps one junior college on a permanent campus as yet in New England. The need for construction funds is vital to our programs.

It troubles me somewhat that this absence of permanent campuses exists in our region, which is historically the center of the prestigious

educations of our country. May I just cite one example of our own institution, which has grown from a student body of 325, 6 or 7 years ago, to a student body of 3,600 this fall while we are still in old inadequate quarters, an old factory which you recall is a converted machine tool plant with rather interesting motif for any kind of education.

I might at least give the local twist that it is enriched by the Woonasquatucket, following on to pollute the Narragansett Bay. Nevertheless, two-thirds of our students who graduate in our program go on to employment and higher education, from the ivy league in the East to the great universities, State universities throughout our country and to some colleges as yet emerging even now, emerging as we are.

We of the junior college sector are faced with many crises. We will either be limited in our classes or taking them into the makeshift quarters which I have mentioned. All this we are doing well, if inadequately. A job that has to be done for humane and patriotic reasons, the cause and commitment of so many people is noble; the needs for support are great.

Mr. Chairman, we reiterate our vigorous support of Chairman Williams bill, S. 545, the comprehensive community college bill, and again express the fervent hope that its major provisions will be enacted this year by the Congress.

S. 545 recognizes the urgent need for comprehensive State planning for community college systems, and our later witnesses this morning will have additional comments to make about meeting that need. S. 545 provides definitions on the community college that we strongly support. And it calls for sharply expanded Federal support to community colleges.

COMMUNITY SERVICES

S. 659 recognizes the pressing need to amend title I and we applaud the changes you propose.

Junior colleges have not widely participated in the title I program, and yet we feel this program has great promise and would be vastly strengthened by the general involvement of our colleges. We ask that provisions be added which would require stronger State plans utilizing all colleges that want to participate.

The program has never had the chance to show its real potential, primarily because it has been underfunded.

We then suggest a basic annual Federal grant of $25,000 to each school participating in the State plan. Costs of such grants would aggregate perhaps $35 million, far-below the present authorization, yet they would in our view revolutionize the community service effort in higher education and accomplish the aims originally envisioned in this program.

COLLEGE LIBRARY PROGRAMS

Mr. Chairman, we commend you for retaining the essential purposes of title II of the Higher Education Act, which provides basic, supplemental, and special purpose grants to institutions for the acquisition of library materials and for training and research in librarianship.

We think it would be a great mistake to abandon the basic grants to all institutions. This sum of $5,000 has been extremely helpful to

all institutions, large and small, as they try to keep up with the "knowledge explosion" and keep their collection up to date, both as to content and form: "library materials" these days are much more than books. The new media are an essential part of a modern college library (which many people now prefer to call a "learning resources center") and an effective teaching program, and they are costly. But I would like to emphasize that library materials are far more than books and periodicals. Our own concept of an ultra-media center contains electronic devices and recording equipment that is available today which has revolutionary implications, both for the traditional library service and research. It has also had tremendous implications for the learning process itself.

We are grateful to you, Mr. Chairman, for including a waiver of maintenance-of-effort requirements under title II. The requirement has posed a real problem for new colleges who spend vast sums for library purposes at first, but obviously cannot keep up this level of spending.

However, we wonder if the language of the waiver is sufficiently clear, and fear that the term "special and unusual circumstances" on lines 18 and 19 of page 11 may not mask the intent of the waiver. We would suggest that the matter can be clarified by changing the language of line 17 to read "except that if an institution has not been in existence for 5 fiscal years, or if the Commissioner determines * * *.

We commend a change in language such as this to your consideration.

DEVELOPING INSTITUTIONS

The title III program has been enormously helpful to struggling community colleges, as well as to the black colleges, and we fully support your extension at an authorization of $100 million annually.

Progress for many community colleges has been hindered because this program has not been better funded. The U.S. Office of Education continues to receive about three applications from qualified community colleges for this program for every one applicant it can fund at the current level of support for title III.

It seems an ironic coincidence, but if the present set-aside of 23 percent for the community colleges were actually funded it would just about cover the applying colleges; but other colleges should be encouraged to apply, and should be helped. Present support does not offer that hope.

In the light of this pattern, we strongly urge that the set-aside for community colleges be raised to at least 40 percent of the $100 million authorization. Bear in mind that we have new colleges coming into the junior college sector every week.

Further, we renew the plea that the five-year requirement be eliminated as a condition of eligibility.

STUDENT FINANCIAL AID

The bold approach you have proposed in S. 659 for new student grants, Mr. Chairman, holds the shining promise of making universal educational opportunity for young Americans a living reality almost overnight. We all know such opportunity will be a long time coming on the existing programs, although we take pride, and we think the

Nation can take pride, in the progress made in this direction in the last decade, spearheaded by the community college, which have more than tripled their student load.

Certainly the community colleges would benefit tremendously if your $1,200 guarantee to the low-income student were enacted, along with the cost-of-education allowance to the institution.

On the cost-of-instruction allowance, Mr. Chairman, we recommend that in section 409 of your bill, in line 9, the phrase "each student" be expanded to read "each full-time equivalent student."

The way the system works now the self-supporting part-time student is penalized twice in pursuit of a college education. While he is usually paying all his own college expenses, he also is paying Federal and State taxes to help educate the full-time students with whom he must compete in the classroom.

This is a terrible inequity, and one that pinches hardest in the community colleges, since we serve at least 1 million part-time students. Some of the colleges show part-time enrollments as high as 80 percent.

EOG-type assistance is especially important for the part-time student because college work-study normally would conflict with his regular job.

We favor the existing student financial aid programs over the administration's proposals.

We want to emphasize that the EOG and work-study programs have been and are particularly helpful in the junior community colleges, despite the present exclusion of the part-time students.

However, the loan programs have been less attractive to community college students and to community colleges. We see two reasons why: one, it calls for additional administrative staff to act, and secondly, that many of the low-income, disadvantaged, marginal students hesitate to involve themselves in an indebtedness which may not be concluded with a satisfactory academic experience.

Senator RANDOLPH. Let me question the witness at that point, Mr. Chairman.

Do you recall the rate of repayment of loans under the Defense Education Act? That was about 1½ percent; the program involved what, about a billion, $200,000, is that correct? Are you saying now that what we did under the Defense Education Act in another day, we can't expect such a repayment in another loan program?

Mr. FLANAGAN. I am not saying that we shouldn't have student loans in this form of support for education. I am saying that I am concerned about the establishment of a permanent loan interpretation as support for public higher education. We would much prefer a grant. We are concerned that public—that students, particularly in junior colleges, often coming from economically or socially disadvantaged areas, will begin their careers with enough indebtedness. I think that is what I am trying to say, that if there is nothing else, then by all means: loans, but it would be secondary to the public benefit.

Senator RANDOLPH. President Flanagan, do you not believe, though, there is a danger of constantly stressing scholarships and grants and a lessening of emphasis of loan programs for college students, either 2- or 4-year institutions?

Mr. FLANAGAN. No, Senator. I am not worried about that. As I recall, historically, that in the early days of this century the extension

of public education to grade 12 was itself subjected to much criticism and considerable opposition.

I think what we in the junior college field, particularly the public junior college field, feel that public education now to grade 12 is not sufficient and that we need to go beyond this for a variety of reasons: the exploration of knowledge, the need for trained people in areas in which society in the early days of the century did not need that training.

Senator RANDOLPH. Well, certainly I think we can agree on the framework of additional years. I know our able chairman has discussed very often the 16 years of education in his own right, as a Senator and chairman of this subcommittee. I know he strongly believes in it.

I don't say that that has really a bearing on what I am discussing with you, 12 years or 16 years, as to the loan problem.

Mr. FLANAGAN. Well, I think what I am saying is that in principle we believe in free public education K through 14. That was why my reference was that it was extended K through 12.

Now, the student who is academically successful, kindergarten through 14, in all probability will need the junior and senior years of his life, to, or at least we will have opened the doors as we have for so many in the junior colleges. We have opened the doors for higher education for so many who never expected to have the opportunity. At least for the present if we could postpone this indebtedness and loan involvement. I have a picture of two young people today who are marrying, who are marrying at an early age with a mortgage on their education and a mortgage on their house and almost a mortgage on their future. I think what I am saying to you, Senator, is that we would just like to postpone this. Or if there is nothing else to come, then loans. If there is no hope of our sustaining public education in America through grade 14.

Senator RANDOLPH. You see, there is where we disagree. If there is no hope you turn to loans. I think we must stimulate a loan program with all the other efforts we are making. That is what I am attempting to say. I think if we constantly bear down on the points that you make with great vigor, that we are inclined to lessen the feeling that loans are a very important part of the help which can be given, money to be repaid by those persons who are pursuing higher education.

I will tell a story which is a factual story, of one man whom I know very well, who participated in a loan program at one of our State universities. He, of course, repaid the loan, and he was grateful that it was in existence so he might be a participant. Later in his life, when he had accumulated a considerable sum of money in this or that industry, he turned to that institution in the hope that he might give a substantial contribution to the loan program under which he had been assisted.

President Flanagan, those in authority, so he tells me, began to talk to him immediately about placing that contribution in a scholarship fund, and were not too interested in having it in the loan fund. For better or worse, he lost interest in helping the institution at that particular time because of the attitude which he indicated to me was prevalent at that conference.

I give this as just one shred of evidence, but there are those who have been helped by loan programs who believe that they were very valuable

to them. They were not something taken, President Flanagan, as a last resort. This is where we part company on the philosophy that you express.

I think we can move with loan programs and other assistance programs by way of grants. I think we need to do that. It is just a suggestion I had during your excellent testimony.

Mr. FLANAGAN. Thank you, Senator.

I think perhaps in principle we are all seeking higher education for the maximum number, but there are various ways of supporting it.

We feel, I think, in the junior college movement, that we will not be satisfied until we have provided the open door and the reality that goes with that open door and the responsibility that goes with that open door to provide more than curricula once the student has arrived, or perhaps we would be using this open door as a public relations device, rather than as a reality.

Senator RANDOLPH. We have no argument on the points you now make.

FACILITIES SUPPORT AND OPERATING GRANTS

Mr. FLANAGAN. Mr. Chairman, I will just pass over the need for facility grants, facility support. I don't know of any area in which we feel more strongly the need for the Higher Education Facility Act be funded and the need for construction funding.

I don't suppose there has ever been a time when it is more difficult for bonds to be passed. In fact, in our own State, Senator, I am sure it will be quite a while before a public education bond. We are happy to say we were there in November, rather than in June.

But this is tremendously important, and we hope that it will be kept in the act.

Without dwelling on the formula for Federal operating grants for colleges, which was proposed and covered at length in yesterday's hearing, we urge that this committee give it earnest consideration. It has the vigorous support of most of the major interests in higher education, including the American Association of Junior Colleges. And the cost would run only a fraction of the estimates made for the guaranteed student grants which S. 659 proposes.

The community colleges are acutely pinched by the financial crisis which hangs over almost all of higher education, and we regard an operating grants formula that provides a $100 FTE annual grant for lower division, $150 for upper division and $250 for graduate work as equitable to our colleges. We also concur in the proposal that the rates triple for the first 200 students and double for the next 200 students in each college, to give the extra boost to small independent colleges and preserve the diversity and balance they give to higher education.

We also take the position that the $100 grant for lower division work should double for the low-income students, provided they are not already counted in one of the two multiplier rates noted just above.

MANPOWER AND VOCATIONAL EDUCATION

A word about manpower and vocational education. We have considerable concern in the public community colleges on the role of vocational education broadly and manpower education in particular. In a few States, such as Oregon and North Carolina, the community col-

leges have become the bulwark of the post-secondary manpower programs. But in far more States they are vastly under utilized in this work. And in this matter, we are thinking first of the students' interest—not the colleges'. Manpower training given in the comprehensive community college gives the student a mobility and negotiability in the educational and job marketplaces that he cannot get, in equal measure in institutions outside higher education. Part of the vision of the "open door" is that ours are not dead end programs and are more than entry level programs.

In vocational education, progress has been made by the community colleges in many States under the 1968 amendments. Yet in many States the community colleges carrying out the post-secondary occupational programs are not receiving equal support for equal services, vis-a-vis traditional vocational programs. For example, officials in New Jersey tell us that the community colleges there carry roughly two-thirds of the post-secondary load in vocational education, yet receive only 7 percent of the Federal support. We urge that this committee assert more strongly the oversight function on the 1968 amendments, and review in detail what the various States are actually doing with post-secondary vocational support. The Commissioner of Education should withhold this support from the States which continue to discriminate against the 2-year colleges in their distribution of the funds.

S. 545

Turning in detail to S. 545, the ideal for the community colleges, as we have suggested, would be the adoption of the Williams bill. It offers both the flexibility and the support we think the States should have in shaping and operating progressive systems of comprehensive 2-year colleges, integrating both public and community-responsive independent colleges into the State coverage and thus providing universal accessibility in the 13th and 14th years for the greater population, in keeping with the criteria set forth in the bill's statement of purpose.

This again is bold legislation which overnight would close the resource gap and the imbalance under which the junior community colleges have labored and still labor in the existing Federal programs for higher education.

If, however, under current budget pressures the committee believes it cannot go all the way on the Williams bill, we would urge the following priorities, drawn from basic concepts of S. 545, and I will note the suggestions, the alternatives we have in the interest of time.

The State planning priority. We are very much in support of the start-up assistance. In addition to State planning, start-up assistance to help speed communities to establish new junior colleges and new campuses.

Startup grants in a 3-year declining sequence. These should start when the governing board is installed and should cover both planning and operations. The formula that would cover 30 percent of such costs in the first year, 20 percent in the second year, and 10 percent in the third year we suggest.

Obviously many of our colleges, as we have said earlier in our testimony, begin in inadequate quarters, from everything from church

basements to old factories to old schools and often after hours. We feel that the rental of equipment would also be very helpful.

We also hope that there would be stronger staffing for community colleges in the U.S. Office of Education.

S. 545 should continue to press the Department for a much larger unit or professional staff allocation addressed to community college interests.

These new thrusts, along with the proposals we have made to improve the on-going higher education programs that have been highly beneficial to junior community colleges, e.g., construction, developing institutions, student financial aids, library resources, and undergraduate equipment, would usher in a new day in the Federal contribution to these colleges. We will be deeply grateful for whatever consideration and help you can give us and the vast enrollments we serve on these priorities.

We hope some of our thinking has been helpful, and we will be happy to respond to your questions, Senator.

Senator PELL. I thank you very much, indeed, Dr. Flanagan.

May I add: what a joy it is to find the president of our own junior college system in Rhode Island as the spokesman for the junior college organization. It is one more example of the fact that Rhode Island may be a small State in size, but its excellence is known outside its borders. As an old friend, I am glad to see you.

Thank you for your testimony.

We want to get your views. Then, as you know, there is another panel with somewhat different views concerning S. 545 who will also speak to us. But I think at this point I will defer—are there any other witnesses who want to say something first before we move into questions?

Mr. FLANAGAN. There is prepared testimony from two more.

Senator PELL. Right. I would hope, since the testimony will be in the record in full, in any case, you might abbreviate the testimony as you present it, proceed, please.

Mr. SMITH. Mr. Chairman, I am J. Harry Smith, the chief executive officer of Essex County College, Newark, N.J.

Our concerns center upon the perceptions manifest in the various sectors so germane to the mandated growth of the comprehensive community college. The enormity of the charge placed before us bespeaks an awareness, in this quarter, which engenders a spirit which causes us to address our publics with confidence.

The community college growth pattern is quite familiar to each of you; however, though we have grown more than 200 percent in the last decade, there is every indication that we have not met the need nor have we significantly affected a societal thrust. Moreover, our task is made more a burden by the awareness generated by our very existence and the success that gives testimony to the validity of our purpose.

953

Current figures, derived from the latest survey by the American Association of Junior Colleges, show that the combined full-time and part-time enrollments in 2-year colleges now exceed 2.5 million. This attainment was in some measure, attributable to assistance garnered at this level of government.

Structured into our existence—and this is quite critical—is the denial of a luxury heretofore essential in the development of institutions—that luxury being time. Because of the pressures and apparent needs of our constituencies, whatever the prescripts, they must be instituted now, those things we garner and consider cherished.

Any insouciance evidenced at this level of government will cause serious reverberations which will encumber the thrust and destroy the integrity of community colleges throughout the Nation.

Historically, the performance of this Nation has fallen short of the promise by a significant margin. As an Afro-American, my presence here today addresses the promise while the millions who are ghetto-ridden migrants, and impoverished without regard to color, await a manifestation that is obvious and an opportunity for something other than lateral mobility. Without having obtained a decent existence, lateral mobility is an albatross not easily worn with an empty stomach or shoeless feet.

A moment ago I alluded to integrity. Let me amplify this essential element of our construct. If Government is to serve the masses as well as the powerful, it must then follow that vehicles be established to honestly present opportunity to those lacking the wherewithal. Without clout, having been exploited by the powerful, manipulated by mid-people and plugged into a system that militates against their every activity, this segment has every right not to believe the promise or pronouncements of institutions or Government or Government-related.

The community college has done so much by its approach to the masses, to create an integrity never before ascribed to the Higher Education sector. We, at Essex County College in Newark, N.J., fully understood this; consequently, the open door policy became an instrument of community use.

Gentlemen, the community college is the hope of the masses. Your constituencies turn to us for relief. Our business is the mass production of human repair. One of our most salient attributes, is our ability to effect mass human repair. This factor alone causes people to develop and rally to us. Our growth is a phenomenon that can be measured by the confidence of the people in our institutional integrity. The lack of resources can deter us. New resources are essential if we are to maintain current levels, and most assuredly, if we are to answer the current needs.

Moreover, we can and do derive a measure of comfort from what we have done, but there must be the realization that too few have been reached. There are impositions presently which center upon our limited capacity that force us to constraints that touch our very essence. Basically, the open door, comprehensive community college cannot remain so unless assistance is forthcoming.

I would like to, if I may, just add a few more paragraphs.

Thomas Jefferson's early aspiration to see democratic values fully implemented has not yet had an opportunity to be tested for the non-white masses. In order to live up to his expectations, an informed and

generally responsible citizenry is essential. Prior to the advent of the community college movement, there was little opportunity for many Americans to be nurtured in an informative and systematic fashion. Educational training and easy access to objective information about America and the world were left to chance or the circumstances of birth.

The post World War II development of the philosophy of some kind of guaranteed higher education for all Americans who are interested and feel they may benefit from continuing their education has made possible for the first time an increasingly informed, better prepared and interested electorate. Although now the increase is manifesting itself more noticeably among teenagers and young adults, there is hope that all Americans can be encouraged and afforded the opportunity to continue their education as conveniently and humanely as possible. As this occurs, more Americans will be able to participate in the growth and future of America, decreasing the likelihood and need for violent or destructive methods to reform the system.

I think I can end there because most of that has been said will somehow touch on what I said.

For the sake of time, we will yield—or we will be happy to respond to your questions.

Senator PELL. Thank you very much, indeed.

I yield to Senator Javits.

DISAGREEMENTS BETWEEN TYPES OF INSTITUTIONS

Senator JAVITS. I just have a question. I must be leaving soon as I am introducing today a bill to include in the education opportunity grant program part-time students and to recognize academic achievement.

Also, I understand there is a very sharp difference of opinion developing here, between the 4-year institutions and you gentlemen representing the junior colleges which we, generally speaking, have been greatly favorable to because we are not married to the traditional concept of the 4-year liberal arts education for everybody. We believe some people can prosper better with the 2-year college.

But we do want to ask you two things. One is to comment—if you cannot now, we will insert it—on the plea which will be made to us, which we see from Dr. Auburn's testimony, to include nonbaccalaureate programs of 4-year institutions in the legislative proposal under discussion.

Secondly: I would ask for any comments upon the interrelationship between the 2-year and 4-year which may be engendered by Dr Auburn's testimony and that of his colleagues which will succeed yours.

So we ought to have the benefit of the juxtaposition in the record, even though this time the challenge to the program will come later in the hearing.

Mr. FLANAGAN. Mr. Chairman.

Senator PELL. Mr. Flanagan.

Mr. FLANAGAN. We have reference to this in the testimony which I have just given, and I would just take one paragraph which I think is worth repeating.

There is a terrible inequity in leaving out full-time students——

Senator JAVITS. What page is this?

Mr. FLANAGAN. Page 9.

There is a terrible inequity, and one that pinches hardest in the community colleges, since we serve at least 1 million part-time students. Some of the colleges show part-time enrollments as high as 80 percent.

Now, I am sure that I and my colleagues will tell you that this is something a part-time student should be equated on an FTE and should receive prorated full-time support.

Senator JAVITS. We are going to do that.

Now, the important thing I wanted from you was to—either now or later—give us the answer to the argument which is going to be made by Dr. Auburn on behalf of the 4-year colleges, that we ought to have in this legislation an inclusion of nonbaccalaureate programs.

Mr. FLANAGAN. In a brief conference here, Senator, we concluded that this is a lengthy matter, and we would like to get into this at some——

Senator JAVITS. Submit it.

Mr. FLANAGAN. And insert it in the record.

Senator JAVITS. And also the other points which Dr. Auburn may make.

You understand, I have the highest respect for your points and Dr. Auburn's, but it would be very valuable to the committee to have the interplay between the two. As they will succeed you in testifying today, I ask unanimous consent that the comments of this panel and the Auburn panel may be made part of the record.

Senator PELL. That will be done.

Senator JAVITS. And also, incidentally, there is no reason why the Auburn group should not have the right of reply in anything that they think is——

Senator PELL. Right; and I guess just to be fair, there should be the right of rebuttal to that, too.

Senator JAVITS. Right. We can go on ad infinitum.

Senator PELL. All right. Each side has to have a fair exchange.

Senator JAVITS. They have testified; the Auburn group will testify; they will make their comment on the Auburn group, the Auburn group will make their comments on that. That is two each. Then they will stop.

Senator PELL. That is enough.

Mr. SMITH. May I respond?

You are asking that the 4-year colleges be able to give a baccalaureate degree for areas in which they haven't been functioning prior to this. I am speaking as a person that comes from a highly industrialized area, New Jersey, and particularly about the city of Newark, and I would like to address myself to what has historically been the posture of 4-year institutions.

Four-year institutions in our State and almost all States historically have excluded black and minority people as students. They have excluded them as faculty members, and they had excluded them as administrators.

Now, when you say that they are now, as a consequence of an open-door policy, being manifested in the community college area, that we would want to then give to this particular sector the responsibility of

moving certain practices of this community college sector to that level, I find that even our community, our community college, which is a small community college with 5,000 students, we have established as thrust as a consequence of our own efforts, and we feel that if it is now going to be moved to another level, we may be put right back in to the tyranny of testing and all the other guises that were used to exclude minority people from full participation in higher education heretofore.

Senator JAVITS. President Smith, may I just comment as follows: We are about to settle a big problem about equal educational opportunity in an emergency bill by trying to, on the one hand, encourage what we call stable, integrated schools, and on the other hand, deal with problems of desegregation.

I rather think also that we will certainly value the interchange between the two points of view for this reason: I am sure, President Smith, you would be the last one to want community colleges to be known as the haven of the minorities only, and 4-year colleges to be what you have just said they are, in effect, institutions for whites. We will have to find some way of making a contribution to the selectivity on the basis of educational excellence and educational capability. I think that if we did that it doesn't necessarily mean that we are going to make a change in this 2-year and 4-year approach which we have had, but I do think we have to keep in the back of our minds that the greatest contribution which we can make to the education of minorities is still to give them absolutely even opportunity, both in the climate and in the frame of reference in which they learn as well as the learning itself. Wouldn't you agree with that yourself?

Mr. SMITH. I would endorse that, sir.

Senator JAVITS. Of course.

Mr. SMITH. But I just want it to be inferred that the community college is not of excellence of its own performance.

Senator JAVITS. We will be very solicitous.

With all respect, I don't think you will find a better balanced set of men than in this educational subcommittee. Thank you very much.

Mr. FLANAGAN. Mr. Chairman, Dr. Martorana. He would like to make a comment.

INTRODUCTION OF DR. MARTORANA

Senator JAVITS. May I say, Mr. Chairman, before Dr. Martorana starts, I have known him well for a long time. I am very pleased he is one of the witnesses, and I consider him one of our outstanding educators.

Dr. MARTORANA. Thank you very much, Senator.

It is a privilege to be again before a Senate committee to present testimony.

My main purpose here this morning is to show full support of the council to the testimony which Dr. Dana Hamel will present. However, Senator Javits, before—you indicated you were going to leave—before you leave I would suggest another answer or comment of the moment to the question you have raised beyond that which might be inserted in the record later; the observation that the question you raised is directly related to the importance of State planning, and it

may be that beyond the comments of Dr. Hamel, with respect to State planning, the relative roles of different colleges, the allocation of resources for higher education that exists in the States, to the purposes for higher education to be rendered in the States be required as elements for coverage in the State planning.

This, then, would create a situation where the allocation of resources is made a responsibility of the States. The roles, the missions in the educational framework of the 2-year colleges and 4-year colleges would be faced up to and State plans would emerge that would make, hopefully, maximum utilization of resources against the needs of the particular State.

Senator JAVITS. Thank you very much. Dr. Martorana.

I want to thank my colleagues and their chairman for allowing me this privilege.

Mr. FLANAGAN. Dr. Hamel, chancellor, Community College System of Virginia.

Mr. HAMEL. Mr. Chairman, I know your time is short and I will make my presentation short, since you are going to make it a matter of record.

I can say that as a New Englander who is now in the great Commonwealth of Virginia, and who has been reared in traditional higher education, that the community college development is one of the most exciting things that has come about in probably decades and decades.

In the Commonwealth of Virginia in 4 years we have jumped from 1,200 students to 38,000. We have 16 institutions and 77 percent of our enrollment is in occupational technical education. This is related to some of the things I have been asked to comment on.

Very quickly, we at the State council of State directors are concerned about planning. I am not going to cover all of the bills. We think the Senate bill 545, Senator Williams' bill, is a great thing. It has certainly created a lot of national interest and certainly people are aware now that the comprehensive community colleges are coming of age.

The first provision in that bill provides for stronger State planning. This, gentlemen, is what we are concerned about, and I think it addresses itself to Senator Javits' comments and to our colleagues who will follow us in their testimony.

As you know, the tax dollar is getting taxed very heavily. Priorities have to be made, and we submit respectfully that a proper planning as provided in Senate bill 545 would allow for all of these differences and certainly develop a program that would be meaningful to the people that we are trying to serve.

The important part of this planning, as we see it, is that the criteria set forth broad goals which you all would consider as essential for accomplishment of national interests in postsecondary services. First, through the planning process, and second in the formation of expansion of comprehensive community colleges in accordance with those plans.

This has been set forth, the criteria, in the statement of purpose in the Senate bill 545. I won't read that. You all know what it is.

But, gentlemen, the key to this is to stress the role of the community college, the role that it is to play to bring about universal accessibility and higher education for the general population, the development of

institutions within reasonable commuting distance of all citizens of the respective States.

Now, second, and I think this is not inseparable from the total project and total master plan, is the development of a comprehensive community college program. We are talking here about placing appropriate and proper emphasis on occupational technical education. We feel very strongly that appropriate planning and appropriate development of comprehensive community colleges may help to return dignity and worth to the occupational and technical programs and give them the status, if you please, of the liberal arts transfer that already exists.

Now, we would like to suggest respectfully that this plan be flexible, because each of our States obviously has developed from different groups and has gone different ways. We know that in the Commonwealth of Virginia we have one plan; very frankly, a plan that would fit California, but if it were universal, might not suit Massachusetts or Rhode Island. We would respectfully suggest it be a flexible plan and we have spelled this out just as an idea that you might want to consider.

The development of a planning group: 15 to 20 seats that would represent all of the agencies in your respective States that have any interest in community colleges, and this might again include the issues that were raised by Senator Javits a moment ago, and that half those seats be filled by officials with responsibility for direct operations of the institutions that meet the Senate bill 545 definition of a community college and that the chairman of the committee be one of those officials.

We not only suggest that the committee write the plan, but that it hold public hearings on the plan, according to broad guidelines in the act. It might require them with a 30 days of any notice and have the hearings in any county that has at least a minimum of 100,000 population or more.

Now, once the plan has been ratified by the State ad hoc committee and then by the State agency with responsibility for the community colleges in that respective State, then from there, and only then, would it go on to a coordinating board for all of higher education, if the State has such an agency. It should go on to those people for their review and finally be transmitted to the U.S. Commissioner of Education for his evaluation and approval, with the act clearly stipulating that he shall reject plans which do not meet the basic criteria.

We feel, gentlemen, that this planning process can bring about a very important item, and that is greater accountability on the postsecondary educational investment. There were nine objectives that the National Council of State Directors have read into the record, and we would ask you to review those again as you develop your bill. We would ask you that as you work on this to also recognize that the State and the Federal Government must consciously guard against framing their programs in such a fashion that they foresee comprehensive community colleges to become carbon copies of traditional higher education, or to become simply feeder institutions for the senior colleges and universities.

Mr. Chairman, I would stop at this point, since this is a matter of record, and answer any questions, if you have them.

Senator RANDOLPH. Thank you, Chancellor Hamel.

Senator Williams, do you have a comment or colloquy?

Senator WILLIAMS. First I will make an observation.

I am sorry our subcommittee chairman isn't here, as I wanted to personally express my appreciation to him for putting the proper focus and emphasis on our concern with Federal association with community colleges. In this dimension it is new, as you gentlemen know better than any of us here. Certainly the communities have rushed on in this relatively new dimension of education. We are catching up.

You said that in Virginia in 4 years you have gone from students in community colleges of 1,200 to 34,000?

Mr. HAMEL. 38,000.

Senator WILLIAMS. Well, that, of course, is a most dramatic statistic which makes the point that the communities have certainly realized this is a dynamic and vital relatively new way of meeting the needs of postsecondary education.

Now, coming back to my friend, Dr. Smith, Essex County Community College, what is your comparable growth figure, if I might ask?

Mr. SMITH. Well, we started in 68—1968—with the largest freshman class of 3,500 of full and part-time people, and presently we are over 5,000 after 3 years in existence.

Senator WILLIAMS. And you know what the situation is in the State of New Jersey, don't you?

Mr. SMITH. Yes, sir; the State of New Jersey now has about 30,000 enrolled in community colleges, and we have gone to that figure for 1971 from about 5,000 in 1968. We also went from four community colleges to 13 presently in operation.

Senator WILLIAMS. In that period of 3 years?

Mr. SMITH. It is actually 4½ years, from 4 to 13.

Senator WILLIAMS. Well, that again makes my point from another State.

You mentioned S. 545, which is a separate bill that I have introduced, dealing with community colleges. That bill is set in the framework here of this hearing of the education amendments of 1971, and I think that Senator Pell, the chairman of the subcommittee, is wise to relate it or to weave it into our programs for higher education as distinct as they are in approaches, it is still higher education, and it is now still not a distinct carbon, but it is part of the family of programs—it will be, I trust, as part of the evolution here through the hearings and even though it was separately introduced.

I will say that I have many questions, and this is the worst day to have conflicts, but I have them and I will have to go on.

But it would help our considerations if I could submit questions to all of you in writing, and I think that would make a better record, because this record, believe me, is going to be very important. This isn't going to be the easiest legislation to pass through. Again, we might have a great surprise. There might be more awareness of what you gentlemen are talking about.

But, at any rate, the record is going to be very important and we will continue in the committee and then, of course, go through the floor of the Senate. I will submit the legislation.

Senator RANDOLPH. We will have questions of Senator Williams given to the witnesses and others on the subcommittee will be given this privilege also.

I have the same difficulty.

President Flanagan, are there others in your panel?

Mr. FLANAGAN. Thank you, Senator Randolph and Senator Williams. I am sure all the colleges, public and private, this committee's service to our cause is tremendously appreciated.

I am sure, Senator Williams, your name has become a household word wherever junior colleges are. I say that with due respect to my long friend, Senator Pell.

We hope this marriage can come about so that all education can benefit from it, and I am sure I speak as a State director, as a member of the Commission of the American Association of Junior Colleges, in expressing our appreciation for your courtesy and attention to us.

Thank you.

Senator RANDOLPH. Thank you, President Flanagan.

President Auburn, President Randolph, President Lawshe.

STATEMENT OF NORMAN P. AUBURN, PRESIDENT, UNIVERSITY OF AKRON, OHIO; ACCOMPANIED BY HARLAND RANDOLPH, PRESIDENT, FEDERAL CITY COLLEGE, DISTRICT OF COLUMBIA; AND CHARLES LAWSHE, PURDUE UNIVERSITY

Mr. AUBURN. Senator Williams, I am Norman P. Auburn, president of the University of Akron, and joining me is the president of Federal City College, President Harlan Randolph, on my left, and the vice president of Purdue University, Dr. Charles Lawshe, on my right.

We are speaking today, sir, for the major associations in higher education; namely, the American Association of State Colleges and Universities, American Council on Education, the Association of American Colleges, Association of American Universities, Association of Urban Universities, National Association of State Universities and Land Grant Colleges, and the National Council of Independent Colleges and Universities.

Senator Javits referred to the fact that you have had the prepared testimony that we have submitted, and we hope, sir, that it will be included in the record. We know that your time is limited, and therefore we will try to make this in a staccato fashion. But please feel free to intervene at any time and ask questions that might help on the presentation of this case.

We start, sir, by commending you on Senate bill 545. We find ourselves in agreement with nearly all of its proposals with one exception: we favor a program of Federal grants to States for the purpose of strengthening and improving and developing educational programs, especially arranged to meet the needs of educationally and economically disadvantaged persons.

We agree educational institutions must increase their responsiveness to the needs of the community in which they are located. But I will subsequently point out that many of them are now doing that.

We believe, however, and this is the one point that we find ourselves in variance with your position—we believe to accomplish the

position and the purposes that you have in mind there should be an amendment to S. 545, expanding its provisions for Federal grants to include not only junior colleges, but also all other colleges and universities which offer educational programs, which prepare students for career opportunities.

We will develop that case and then respond to questions that you and Senator Pell may have. I think the best way that I could try to convey to you the understanding that there are many 4-year colleges that are engaged in less than baccalaureate programs is to use the example I know best of all: the State of Ohio. Then thereafter we will hear from my colleague at the Federal City College and my colleague from the State of Indiana.

But, from the State of Ohio there are institutions similar to mine, the University of Akron, which embrace not only comprehensive community colleges, granting the associate degree, but also baccalaureate, masters, and doctor's programs.

In other words, we cover the full spectrum of higher education.

What has happened in the State of Ohio recently that is directly in line with what you are suggesting? It is this, sir: the expansion of higher education in the State of Ohio will be at the community college level. There is before the legislature at this very moment a freeze on enrollment at the baccalaureate level, but an expansion possibility at the associate degree, 2-year level.

The present law in Ohio is open admissions in its public institutions of higher learning. That law is to be amended to eliminate urban admissions or at least selective admissions at the baccalaureate level. But it will not be changed so far as the 2-year programs are concerned.

Another example from my own institution: we have tripled in five of the last 10 years and doubled in seven. We have an institution now of nearly 20,000 students, day and night. Many of those students are in what you are referring to as the comprehensive community college program in all areas in which I think you are interested.

In other words: business and industry, engineering technology, paraprofessional fields, health sciences. All of those areas they are now offering.

As we see the bill as it is now constituted, it eliminates institutions of this kind from any possibility of Federal support. It is for that reason, sir, that we feel that an amendment is in order. We agree that the junior colleges have made great progress and we commend them for it, but we think that legislation as it now is constituted, is in a sense, divisive and in a sense might result in requiring States to set up a new program, a duplicate program at the very time, sir, when resources are in short supply.

So the burden of our remarks are that we believe that you have a very desirable bill. We know from our experience that a large percentage of the young people who are now aspiring to postsecondary school education can be accommodated and should be accommodated at the less than baccalaureate degree level, at the 2-year associate degree level, which provides them with the training they need for career opportunities.

That, in essence, because your time is limited, is all that I need to say at the moment.

I am very happy to answer questions, but I would now like to ask my colleague, President Randolph, if he will comment so far as his institution is concerned and any other comments he may have.

Mr. RANDOLPH. Mr. Chairman, my name is Harlan Randolph, president of Federal City College, located here in the District of Columbia.

I have just six points that I would like to share with you.

Point No. 1, is that some 4-year institutions of higher education are presently serving the same function as community colleges. By this I mean that we are providing career programs and community services.

Now, I have listened to the presentation of the representatives of the Junior College Association. In the course of that presentation they listed about 14 different criteria to define a community college, a comprehensive community college. Federal City College qualifies according to each of those standards in terms of its function.

Now, we do not have here in the District of Columbia an institution so labeled: Comprehensive community college. But the legislation establishing Federal City College authorized and required the college to establish, conduct, and operate programs at the associate of arts level, in addition to the bachelor's, in addition to the master's; so that we have the substance of the community college, if I may use the phrase; we do not have the sound of the community college in the sense that there is a unique title called: "The Community College" in the District of Columbia.

As the legislation is presently written, the Nation's Capital would not receive the benefits of this particular program, and I can assure you that many residents of the Nation's Capital desperately need to have the services and funds of this particular legislation.

Now, it seems to me, one essential question that we need to talk about, and that is the question that some 4-year institutions do not, in fact, meet the career objectives, do not meet the community service objectives, and do not open the doors, in the sense, of opportunity to the residents of their States. We are, as one might say, an "Elitist" institution, and I am not one who takes an arbitrary and capricious concern against "elitist" institutions, but that is not the problem we are concerned with in this particular legislation.

So, one question might be asked, and that question is: How can we distinguish between those institutions who serve the function of this legislation and those who do not, while at the same time not arriving at an arbitrary definition which reduces from the resources of this Nation those institutions which historically have, in fact, been provided career programs and community services, such as the 3-year institutions presently before you at this time.

I would like to recommend or suggest five factors which might help us distinguish between those 4-year institutions which are not a part of the spirit of this legislation and those 4-year institutions who, in fact, have been historically a part of this particular legislation.

Those five factors might be: one, a prior history of programs in the area of education career opportunities; second, present performance and performancer data in this particular field; three, a systematic relationship between the educational program, the employer, the community and statewide education planners; four, measurable objectives and accountability; and five, a recognition that all 4-year colleges

have not failed to meet the objectives typically assigned to community colleges.

Senator RANDOLPH. On that point, Dr. Randolph, did I hear you say that there were 4-year colleges that have met the objectives of the so-called "2-year community college?"

Mr. RANDOLPH. Yes.

Senator RANDOLPH. And that we believe to be true in West Virginia. We have no community colleges in our State. I don't know how many States are without community colleges, perhaps a dozen. I really haven't checked as to that figure.

But there are certain institutions within our educational system, higher education in West Virginia where I believe I know personally, or at least have access to the fact that they are carrying forward these programs—career education—what I believe to be the realism of the world we have today, in a manner that I think we must provide for those institutions in this legislation or in separate legislation because certainly it would be improper—I think unfair, to just say to these institutions, 4-year colleges, you have been left out of the emphasis which you and others have discussed in your testimony today.

I shall not use the time now, but I will place, Mr. Chairman, with your permission, the record, the attainment record which I believe we have been able to carry forward in certain institutions in the State of West Virginia under present programs. Some of them offer as many as 14 to 16 separate 2-year career programs.

Now, if we have no community colleges in our State and legislation is drafted to assist community colleges, and yet within the framework of our 4-year institutions there is, in fact, this program or programs that are practical, and doing what it is thought we must do here—and that is strengthen the 2-year program—why I think we ought to be very careful and not do a damage to such a structure as we might have in West Virginia where, with appropriate diploma or recognition degree at the end of 2 years, why there is a definite recognition of the fact that that student has completed a course of work, often vocational or technical in nature.

Senator PELL. The information you supply will be made a part of the record.

Senator WILLIAMS. I have nothing. I will just say in your brief absence I have expressed my great appreciation to you, Senator Pell for the way you have woven consideration of community colleges into these hearings on the Higher Education amendments.

Senator PELL. Thank you.

Actually, in the bill we have put forward, there is a rather empty spot into which the junior college legislation will dovetail. The question is how we dovetail it in and to take into the dovetailing the points that are made by both panels.

Senator WILLIAMS. I appreciate that.

I just came from the dentist. I have a perfectly fitting inlay. I have appreciation for it, I will tell you.

But just one thing: you suggested the questions to the other panel might better be put in writing to them and they agreed?

Senator PELL. Right; it might be the same set of questions to both panels.

Senator WILLIAMS. Yes.

Senator PELL. Were you here when Senator Javits suggested they have each side make a comment?

Senator WILLIAMS. Rebuttal and surrebuttal?

Senator PELL. Only to the second degree.

Senator WILLIAMS. I have a feeling that it will be necessary to communicate further with the associations and probably through the staff. If you could indicate to us who would be the representative of the various groups——

Mr. AUBURN. We shall appreciate that, Senator Williams.

Senator PELL. I understand it has already been scheduled for this afternoon. Actually it has been taken very quickly.

Senator RANDOLPH. Vice President Lawshe.

I wonder if it would not be inappropriate for me to say your new athletic director is from West Virginia. George King had an enviable record at Morris College. You are able to hire people and pay them more in a college that is not State supported. But seriously, we think that he is not only a very excellent coach, and athletic director, but he does have the ability to have a rapport with young men. We hope that you will enjoy him as much as we have in West Virginia.

Mr. LAWSHE. He has been a tremendous addition to our institution, and he certainly epitomizes what we say athletics ought to do as a part of education.

Senator PELL. Thank you.

I think you were going to make a statement.

Mr. LAWSHE. Yes.

What I would like to do, Senator Pell, is as best I can, reinforce what my two colleagues have said about the multiple role of 4-year institutions, but to do so within the context of the Branch University concept.

I have listened this morning to the witnesses pointing out phenomenal percentage growths where community colleges have been newly brought to the scene. I did some quick mental arithmetic and I think the number of students enrolled in the branches of three State universities in the State of Indiana is roughly the same as the number of people enrolled in the community colleges in Virginia, if I heard the figures correctly.

Instead of quoting phenomenal growth figures, we are talking about 12 and 15 percent per year—the reason being at Purdue University it has been awarding 2-year diplomas since 1947 in the metropolitan areas of the State of Indiana. So we have in our State, leaning on President Randolph a little bit, we don't have the language that identifies institutions as community colleges. We have, in fact, had community colleges in the State of Indiana for many, many years, and we have attached to our State universities, primarily Indiana University and Purdue University, but Indiana State University also has a branch.

VOCATIONAL EDUCATION

Senator PELL. Do you have vocational education offered there as well?

Mr. LAWSHE. I think we might have a definition problem here. I think I can say we have technical education.

Senator PELL. Dental assistants?

Mr. LAWSHE. Indiana University: dental assistants; Purdue: electrical engineering, a technology computer, technology associate degrees in nursing.

Senator PELL. What about training to be a machinist?

Mr. LAWSHE. No; not vocational education in the——

COST OF INSTRUCTION

Senator PELL. Could you give us some kind of cost of instruction figure in the junior college system.

Mr. LAWSHE. First of all, I don't have those data at my fingertips.

Senator PELL. Do you have them at all?

Mr. LAWSHE. Yes, it is available. But I think if the committee wants those kinds of data it should specify the criteria by which the data are to be collected, because to compare cost figures from institution to institution and not make sure that you haven't treated the same things at both institutions can produce distorted results that I am sure nobody wants.

RELATIVE COSTS

Senator PELL. I have no ax to grind, but my own common sense tells me the cost of adding a thousand students to your institution, with its many facilities, would probably be larger than the cost of adding a thousand students to Rhode Island Junior College. Would I be incorrect in that or not?

Mr. LAWSHE. I simply couldn't answer that.

Senator PELL. No derogation of your institution, but I simply thought——

Mr. LAWSHE. Frequently one finds that instructional costs are less the larger the base, but I don't want to speculate on this because I don't honestly know.

Senator PELL. Excuse me.

COST OF INSTRUCTION

Do any of the three of you have any figures on cost of instruction in your institutions?

Mr. RANDOLPH. Do you want it broken out just for the AA degree program?

Senator PELL. For the AA degree and for the AB degree, too, if you have it by any chance.

Mr. RANDOLPH. No, but we can submit them for the record.

I would again go along with my colleague that the important thing here is to determine what you include in the cost of instruction, because if you are talking about an instructional cost then your cost per student is much lower than if you are talking about dividing total cost, including capital cost, by number of students. We need a definition of what you would consider to be the cost for competitive purposes.

Senator PELL. I think as a general rule of thumb, to my mind, it includes all costs except capital costs, which would be the cost of doing business, the operational costs.

Mr. RANDOLPH. We would look at it in terms of recurring costs and not those costs required for the initial establishment of the program, regardless of whether it is operational or capital costs.

Mr. AUBURN. Mr. Chairman, we can get such figures for you and we will do so.

I would like to make this particular point, and I am sorry that Senator Randolph isn't here, but I know it will be in the record, and that is with respect to the large number of State universities and land grant colleges which do now offer less than baccalaureate degree programs. A recent survey shows that 40 percent of these institutions, or some 134, are now offering the type of programs that Senator Williams' bill asks for.

It would seem to us, and I would say this in summary, sir, that unless there is an amendment to this bill it creates a divisiveness among the institutions of higher learning. It could force States to set up new programs, and this is costly, at a time when there is already a scarcity of resources.

So we hope that the amendment would be of the character which would bring together all elements of higher edcuation to serve the purposes so well set out in this bill.

EQUIVALENCY ACCEPTANCE

Senator PELL. Would you believe that—do your organizations support the idea of equivalent degrees, work outside combined with continuing education courses of diplomas?

Mr. AUBURN. Do you mean do we consider the idea of associate in science or arts——

Senator PELL. No, let us consider a man working in his field for 7 years in the outside world who needs one course, to complete the equivalent of what a man who received a degree would receive; would it give him that degree?

I think some universities in New York are moving in this direction. It is being discussed.

Mr. RANDOLPH. Federal City College does that. We are really recognizing work experience for the equivalent of classroom experience. If a person is capable of demonstrating competence in a given field he can receive either certification or a degree from the institution.

Senator PELL. Your institution, I think, is a particularly exciting one with many new concepts in it.

Mr. RANDOLPH. We would like to have an amendment so we can qualify for some of this additional money. Our treatment on the part of Congress over the last few years presently has us at a $14 million deficit in terms of our accreditation in 1972. Any amount of money, like the $1 million for planning or the other funds which would come out of this program would permit us not only to be exciting in terms of rhetoric, but also to be effective in terms of service.

Senator PELL. I appreciate those words very much. How many undergraduates would you consider in the first 2 years and how many in the last years?

Mr. RANDOLPH. This is our third year of operation.

Senator PELL. But you have many students because of the equivalent experience that might be considered in their third or fourth years, you know.

Mr. RANDOLPH. We have approximately 20 percent of our students who are now between the second and third year within the institution.

Senator PELL. Thank you.

Mr. RANDOLPH. I might add as a key point that I would like the committee to consider that in making a definition as to what institutions shall receive these funds, I think the key concept should be the functional use of the institution and not its structure, and that the key objectives should be not the institution, be it two or four, but the services that the institution is to provide to the community. And at the same time I think it should be underscored or considered that if we move too harshly and too narrowly confined toward the 2-year institutions that for many persons in the poverty communities, be they white, black, brown, or any other color, that we may not be able to develop the leadership needed in those communities to, in fact, deal with the major urban problems. We may find ourselves creating within poverty communities or the equivalent of the janitor's job in the new technocratic society.

What many of those communities need is a liberal arts, the professional and technical capability and they, in fact, are going to be what the development of the inner city of the United States, which more and more is being turned over to poverty groups. I think it is of critical importance that 4-year institutions such as Federal City College and others testifying before you have an opportunity to demonstrate that they can combine the career objective at the 2-year level with the professional and technocratic objectives at the four and the advanced degree level.

Senator PELL. I don't think these objectives about which you speak are irreconcilable with the approach of the junior college bill and there could be some ways of fitting all of these differing viewpoints in. I believe the junior college bill calls for a separate bureau, separate office in HEW.

What are the essential differences, if you had to define the differences, between your approach and that of President Flanagan's view? What would you say are the two or three key points of difference?

Mr. LAWSHE. Well, I think that branches of universities, such as those I represent, are comprehensive community colleges. They are just a little more comprehensive in that they offer some opportunity beyond the associate degree.

In direct answer to your earlier question, in our branch the campus is 55 percent working toward associate degrees or other less than baccalaureate objectives. The remaining 45 percent, 35 percent of the 45 are in freshman and sophomore status, leading—I don't know about my arithmetic—something like 10 percent in what you would call the upper division.

Pursuing President Randolph's point a bit further, the General Assembly in our State has considered the matter of community colleges, junior colleges, if you will, time and time again in the past 2 decades; has always rejected the concept in favor of the thought that the branches of the universities can do the job.

So, we in the State of Indiana have one junior community college. All of the rest of the metropolitan areas are served by branches of one or more than one State university.

Now, legislation raised as this would possibly encourage the creation of additional institutions in the same area, and I think this is my major concern in these days when we have such great difficulty

funding the institutions we already have and branches we already have—the thought of an additional system paralleling these in the same areas.

One of my concerns is economic, but the other is very intimately concerned with the notion that we need to expand opportunities for the disadvantaged groups, and what I am afraid of is whereas our branches at the present time are not "elitist" institutions, that somehow or other the State of Indiana was compelled to create another group of institutions alongside those, they would become "elitist" institutions and the disadvantaged would all be relegated to the new institutions that carry the necessary label: "community college."

So, I just want to bring to the attention of the committee again, as I did last year when I testified before Senator Williams, that not all States are alike. We have great diversity in the structure, in the organization of higher education, and I would be greatly concerned if Federal legislation inadvertently caused all States to be poured into a mold that is perhaps, I feel, for some States, but certainly not desirable for others. I want to make perfectly clear that I suppose the purposes of Senator Williams' bill and that I want to see these community colleges that we are representing here this morning, I want to see them supported. I think it is absolutely necessary they be supported. But I don't think it should be done at the exclusion of institutions who have been performing these functions for a long, long time, and I would say just as well.

As I listened to the various criteria this morning and various gentlemen speak, it sounded like they were talking about my branch campus in Hammon, Ind. It was doing all those things. It just happened to offer a baccalaureate in addition.

Senator PELL. You say you want to make it clear; I think this is what we are proceeding to do, to make it clear to the administration as well, which often never make things clear to us, and this is a very necessary area in which to move.

Mr. RANDOLPH. I think it might be helpful for the record if the statement by Peter Muirhead, Associate Commissioner of Higher Education, before the Subcommittee on Education of the Committee on Labor and Public Welfare, were included or associated with this.

Senator PELL. It is already in.

Mr. RANDOLPH. In addition to that, let me say two other things.

The National Advisory Council on Comprehensive Community Colleges, from our point of view, should be expanded to include others than just community colleges. I suppose the suggestion that I would like considered perhaps more than any other is that if we could increase the sum of money in law, then it would take the two panels out of conflict and argumentative position. It seems to me as long as we are talking about a small sum of funds, then they have reason to say: "We would prefer you not to be in" and we have more reason to say we would prefer to be in, but if we could in some way work out a funding formula which would take us out of a direct competitive position at the starvation level, then perhaps you would have only one panel and not two.

Senator PELL. I sympathize with your views.

Mr. AUBURN. To ask a question, I have two very brief points.

First, Dr. Lawshe talked about the branch universities. I would like to say the same thing for the urban universities. They have been close to their communities; they have offered the type of education that Senator Williams has indicated, but under this bill they are excluded.

A second point I would like to make is to read a very brief paragraph from our testimony, because it is pertinent to what you asked.

We would question the ultimate wisdom of establishing a separate bureau in the Office of Education to deal with 2-year institutions. As noted earlier, the 2-year junior colleges are very much an integral and major segment of higher education. They have special problems which deserved special attention and it would be wise to establish a separate division in the bureau of higher education.

This is a distinction between bureau and education. This is in answer to your questions.

Senator PELL. Thank you very much.

Thank you very much, sir; and we look forward to your comments and wish you luck in the meetings this afternoon.

Our final witness this morning is the Rev. Richard E. Mandeville, Salve Regina College, in Newport, R.I.

I assured him once he could make his views officially known to the Senate and we are glad to have this opportunity to hear you.

STATEMENT OF FATHER RICHARD MANDEVILLE, PROFESSOR OF SOCIAL ETHICS, SALVE REGINA COLLEGE, NEWPORT, R.I.

Mr. MANDEVILLE. Thank you very much, Senator.

I don't represent any high-powered organizations in education coming here this morning, but I can assure the Senator and members of his committee that what I have to say has been submitted to many of my colleagues in Rhode Island and to many of my students, who are from the States that the members of this committee represent and from others who are from States other than that.

I would like to address myself this morning to title III of this bill entitled: "Establishment of a National Foundation for Higher Education and a National Institute for Education". In particular to the sections of title III discussing the National Foundation for Higher Education and the National Institute of Education.

It is quite clear that education today, especially higher education, is involved in two great crises: the one dealing with serious financial problems, the other dealing with a lack of public confidence in its goals. Both are related, indeed the financial crisis may to some degree be caused by the public's lack of confidence.

If we are to continue to discuss these crises separately, bills such as this one, giving financial aid to colleges and universities are essential if higher education is to survive in an acceptable form. As far as we know Federal financial aid is now maintaining and supporting a great many of our colleges and universities, especially the smaller ones. As for finances, I have little to say except that public mistrust of our institutions of higher education is generally unfounded. Anything we can do to lift this veil of mistrust will go far in solving higher education's financial woes.

Public confidence in our colleges and universities must be reestablished. I believe it can be reestablished if colleges and universities are

60-433 O—71—pt. 2——18

established in the minds of the people as communities of the future. Communities in which new organizational and institutional forms can be found to help man cope with the accelerating rate of change. It is in colleges and universities that new ideas can be tried, new assumptions about the future can be made, new ways of living together can be realized. It is in the colleges and universities that the communities of the future must be nurtured. It is in the colleges and universities, and the hope for a better future that they are always signalling to modern man, that modern man is able to see that he is not consigned to the despair of his present condition. Anything that can be done to insure that colleges and universities continue to be beacons showing us the hope of the future must be encouraged.

The traditional outlook on education as a conserver of knowledge and traditions will have to be scrapped. The concept of absolute fixed, unchanging truth, particularly from a polarizing good-bad perspective is out-of-joint. The concept of certainty; there is always one and only one right answer, and it is absolutely right. The concept of isolated identity, that A is A period, simply and once and for all. The concept of fixed states and things with the implicit concept that if you know the name you understand the thing. The concept of simple, single, mechanical causality; the idea that every effect is the result of a single, easily identifiable cause. The concept that differences exist only in parallel and opposing forms: good-bad, right-wrong, yes-no, short-long, up-down, and so forth. The concept that knowledge is given that it emanates from a higher authority and that it is to be accepted without question.

Postman and Weingartner list the above as representative of the ills of the old education, the list certainly is not exhaustive. Most criticism of the old education makes the point that the students who endure it come out as passive, acquiescent, dogmatic, intolerant, authoritarian, inflexible, conservative personalities who desperately need to resist change in an effort to keep their illusion of certainty intact.

I cannot imagine any educational establishment less liable to help society cope with a drastically changing future than one which fosters and encourages the development of concepts and attitudes such as those listed earlier.

The new education must have as its goal the development of a new kind of person. A person who is constantly and actively inquiring, flexible, creative, innovative, tolerant, a liberal personality who will be able to face the ambiguity and uncertainty of the future without disorientation. A person who can formulate possible new assumptions to meet changes which threaten individuals and mutual survival.

Decidedly, there is no more pressing function for education to fulfill than that of helping us to recognize our world and help us master ideas that will increase our ability to cope with it. This is the essential criterion for judging the relevance of today's educational process. We have to help the young people in our culture learn a new set of beliefs, a new set of institutions, a new set of values, which will allow them to live in a totally different world.

Robert Theobald poses the ultimate question: "How do you change the thinking of a culture with enormous speed?" The response is that you do it through the school system—which is the only social institu-

tion that exists to fulfill this function. Although churches should have this as a prime purpose, in this country they do not.

The basic function of all education even in the most traditional sense, is to increase the survival prospects of the group. If this function is fulfilled, the group survives. If not, it doesn't. There have been times when this function was not fulfilled, and groups and entire civilizations have disappeared.

Our culture, our civilization, our group will disappear if our educational institutions are unable to respond to the demands of an accelerating rate of change.

This bill's provision for a National Foundation of Higher Education are farseeing, necessary sections to the entire bill. There will be strong temptation to defeat these sections to the entire bill. There will be strong temptation to defeat these sections due to the financial crisis in the land, but to defeat this section will only serve to perpetuate what I consider the old form of education. To pay for a continuation of the old ways of education would be a mistake of the first magnitude. The Foundation and the Institute are important to the future of the country, since they will insure that men and women are professionally concerned about the future of our educational system and consequently the future of our society.

Building an effective educational research and development system, strengthening of the scientific and technological foundations of education; advancing the practice of education as an art, science, and profession; helping to solve or to alleviate the problems of and achieve the objectives of American education are all goals in which Americans everywhere must take an interest.

Preparing ourselves for the future is such an important task, that I would propose a further step for consideration. That every college or university that benefits directly by financial aid from the Federal Government as a result of this bill, or any college or university that benefits even indirectly by financial aid to its students as a result of this bill, be directed to form an active council of the future.

A council of the future would be made up of teams of men and women organized to probe the future in the interest of the present. By projecting "assumed futures" by defining coherent educational responses to them, by opening these alternatives to active public debate, such councils could, as Alvin Toffler says, have a powerful impact on education.

Since no group holds a monopoly on insights into tomorrow, these councils must be democratic. Specialists are vitally needed in them. They will not succeed if they are captured by professional educators, planners, or an unrepresentative elite. They must include young people who must help lead and initiate these councils so that "assumed futures" can be formulated and debated by those who will presumably invent and inhabit the future.

Alvin Toffler in "Future Shock" says that the council of the future movement offers a way out of the impasse in our schools and colleges. The creation of future-oriented task forces in education could revolutionize and make obsolete, as in many cases they already have become, the revolutions now taking place in our society.

For those who recognize the bankruptcy of the present system, the council could provide purpose as well as power through alliance with,

rather than hostility toward, youth. And by attracting community and parental participation—businessmen, trade unionists, poets, scientists, artists, clergymen, and others—the movement could build a broad political base of support for the revolution necessary in education.

The purposes of such councils of the future in the colleges would certainly be much the same as the purposes outlined for the Foundation and the Institute of this bill. Isn't there a duplication of effort being called for here, a multiplication of organizations doing the same thing? Perhaps; but I don't believe we can dismiss the idea of councils of the future in every school so easily. Although it is true that its goals will be the same as the Foundation's and the Institution's, councils of the future in every school will perform one function that the Foundation and the Institute cannot. They will work at the most radical level possible, at the grassroots; they will force people to consider society in light of the future. The revolutionary change that we need today must begin at the grassroots of society. Our ability to cope with future shock is not something that can be decreed from above. It is not primarily a change in rules and regulations from above that we need. It is more a change in attitudes and habits. Such a change can only take place by beginning at the grassroots.

By all means let the Federal Government conduct meaningful research into education, but let it also assert its leadership in setting up the mechanism of change at the grassroots level by totally involving people in all communities in preparation of the future.

Senator PELL. Thank you.

This idea of councils of the future is a very interesting one. One problems is that, as you know, there is the old bugaboo of the Federal Government controlling the educational process too closely. Personally, I think the Federal Government has a good deal of wisdom in it. It doesn't worry me too much as it does some of my constituents and people around the country.

But I think this idea is counter to the problems we face.

Mr. MANDEVILLE. It would certainly run counter to that. We talked about that. We still felt that because of what we considered in our experience of teaching, we considered that our students were not able to make assumptions about the future. We were dealing with higher education, and in some cases some of my colleagues were dealing with them on the graduate school level.

We considered that since they were not able to do this and that since these people were the most educated in our society, after in some instances, having gone through 16 and getting into 18 years of education, we felt that it was absolutely imperative as these colleges make a contribution to the community by enabling the community to make fairly educated assumptions about its own future. I think that this simply will not take place as we have seen, I think, and I don't have any facts readily available to substantiate this impression that I have. But evidently we haven't been able to get rid of poverty in this land with the considerable expense of the Federal Government and its economic opportunity programs. These are programs that have worked from the top down. They have worked to some extent, but certainly have not made the significant effect that they should have made in some parts of our land.

I think this is the same thing here. I think that the Federal Government, if it is going to expend what amounts to $700 million, that the bill provides for 5 years, I guess, that the bill will find itself in this same bind. It is going to be doing research that will not be accepted by the people. This will probably be accepted by the people about 10 years too late. By that time things will have changed so fast and so often that we will still be in the same things that we are now.

Although I agree with you that the Federal Government is probably not going to be looked upon too favorably by many of our people in the colleges, if it dictates, in effect, and makes giving Federal money—makes a requisite of these councils a condition for Federal money, I feel that we have got to start doing something like this, and I think the Federal Government should exert its considerable moral leadership and tell people they had better start thinking about the future. I don't think we are doing this at all. I know we are not doing this in Rhode Island. I know we are not. I speak professionally as a clergyman in a church in Rhode Island, in the Roman Church, we haven't though an agenda for the future, and I know of no substantial organizations except for leading businesses that does, and we had better start getting them. This applies for education, too.

I think that the assertion, which is well-taken, which you make, that the Federal Government will be trying for this by the higher education people is worth the risks, but because I think it is absolutely essential that we do this.

I noticed this morning when you asked—and I thought that was grand—when you asked one of the interns from Rhode Island to sit at the table with his president. That was great. I wondered to myself then, you know, as I witnessed this war in higher education that was developing here this morning, what the students would say about it. They were talking about money. I don't know what you have had for testimony up until now, but my impression of this morning's testimony and from what I gathered from what went on yesterday, it was kind of, you know: Who gets the money and how much and how fast. Those aren't the issues any more. They are important.

Senator PELL. They are part of it, an important criterion.

I thank you very much, indeed, Father Mandeville, and like your ideas. I think on first impression, that on a volunteer basis I would like to see these ideas discussed and these councils in the future established.

Thank you very much.

The subcommittee will recess, subject to the call of the Chair.

(Whereupon, at 12:18 p.m., the subcommittee adjourned, subject to the call of the Chair.)

EDUCATION AMENDMENTS OF 1971

TUESDAY, APRIL 20, 1971

U.S. SENATE,
SUBCOMMITTEE ON EDUCATION OF THE
COMMITTEE ON LABOR AND PUBLIC WELFARE,
Washington, D.C.

The subcommittee met, at 10 a.m. pursuant to call, in room 4232 New Senate Office Building, Senator Claiborne Pell (chairman of the subcommittee) presiding.

Present: Senators Pell and Schweiker.

Staff members present: Stephen J. Wexler, subcommittee counsel; and Roy H. Millenson, minority professional staff.

Senator PELL. The subcommittee on Education hearing on the Education Amendments of 1971 will come to order. The first witness today is Father Joseph A. Cardoza. Before he speaks, I think the man who is really responsible for today's hearing, whose bill we are discussing, without any question at all, is Senator Schweiker.

I have to go to the floor at 11:15; however I am sure Senator Schweiker will stay right through the hearing this morning, and will take over at that time.

Senator Schweiker has an opening statement, and before he speaks, I would just like to say that I congratulate him on his bill, I think it is an excellent one. I look forward to seeing the subcommittee weave it into our general legislation.

(The text of S. 23 and introductory remarks of Senator Schweiker follow:)

92D CONGRESS
1ST SESSION

S. 23

IN THE SENATE OF THE UNITED STATES

JANUARY 25, 1971

Mr. SCHWEIKER introduced the following bill; which was read twice and referred to the Committee on Labor and Public Welfare

A BILL

To provide a program to improve the opportunity for the study of cultural heritages of all ethnic groups in the Nation.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That this Act may be cited as "The Ethnic Heritage Studies
4 Centers Act of 1971".
5 SEC. 2. The Higher Education Act of 1965 is amended
6 by redesignating title XII as title XIII, and sections 1201
7 through 1210 (and references thereto however styled in such
8 Act or any other Act) as sections 1301 through 1310, re-
9 spectively. The Higher Education Act of 1965 is further
10 amended by inserting after title VII the following new title:

376

1 "TITLE XII—ETHNIC HERITAGE STUDIES
2 CENTERS

3 "STATEMENT OF POLICY

4 "SEC. 1201. In recognition of the heterogeneous com-
5 position of the Nation and of the fact that in a multiethnic
6 society a greater understanding of the contributions of one's
7 own heritage and those of one's fellow citizens can contribute
8 to a more harmonious, patriotic, and committed populace,
9 and in recognition of the principle that all students in elemen-
10 tary and secondary schools of the Nation should have an op-
11 portunity to learn about the differing and unique contribu-
12 tions to the national heritage made by each ethnic group, it
13 is the purpose of this title to provide assistance designed to
14 afford students an opportunity to learn about the nature of
15 their own cultural heritage, and to study the contributions of
16 the cultural heritages of the ethnic groups of this Nation.

17 "ETHNIC HERITAGE STUDIES CENTERS

18 "SEC. 1202. The Commissioner is authorized to provide
19 for the establishment and operation of ethnic heritage studies
20 centers through grants to public and private nonprofit educa-
21 tional agencies and organizations. Each such center will have
22 courses of study related to all ethnic groups represented in
23 the regional area to be served by such center.

24 "ACTIVITIES OF ETHNIC HERITAGE STUDIES CENTERS

25 "SEC. 1203. Each center provided for under this title
26 shall—

1 "(1) develop curriculum materials for use in elemen-
2 tary and secondary schools and institutions of higher
3 education which deal with the history, geography,
4 society, economy, literature, art, music, drama, language.
5 and general culture of the groups with which the center
6 is concerned, and the contributions of those ethnic groups
7 to the American heritage,
8 "(2) disseminate curriculum materials to permit
9 their use in elementary and secondary schools and institu-
10 tions of higher education throughout the Nation, and
11 "(3) provide training for persons utilizing or pre-
12 paring to utilize the curriculum materials developed
13 under this title.
14 "ADMINISTRATIVE PROVISIONS
15 "SEC. 1204. (a) In carrying out this title, the Com-
16 missioner shall make arrangements which will utilize (1)
17 the research facilities and personnel of institutions of higher
18 education, (2) the special knowledge of ethnic groups in
19 local communities and of foreign students pursuing their
20 education in this country, (3) the expertise of teachers in
21 elementary and secondary schools and institutions of higher
22 education, and (4) the talents and experience of any other
23 groups in the regional area to be served by centers assisted
24 under this title such as foundations, civic groups, and fraternal
25 organizations which would further the goals of the centers.

1 "(b) Funds appropriated to carry out this title may be
2 used to cover all or part of the cost of establishing, equipping,
3 and operating the centers, including the cost of research
4 materials and resources, academic consultants, and the cost
5 of training of staff for the purpose of carrying out the pur-
6 poses of this title. Such funds may also be used to provide
7 stipends (in such amounts as may be determined in accord-
8 ance with regulations of the Commissioner) to individuals
9 receiving training in such centers, including allowances for
10 dependents.

11 "AUTHORIZATION OF APPROPRIATIONS

12 "SEC. 1205. There is authorized to be appropriated to
13 carry out this title for the fiscal year ending June 30, 1971,
14 the sum of $10,000,000, and for the fiscal year ending June
15 30, 1972, the sum of $20,000,000."

[From the Congressional Record—Senate, Jan. 25, 1971]

(Introductory Remarks of Hon. Richard S. Schweiker on the floor of the Senate on S. 23—The Ethnic Heritage Studies Centers Act of 1971)

Mr. SCHWEIKER. Mr. President, I introduce the Ethnic Heritage Studies Center Act of 1971.

This bill authorizes the Commissioner of Education to create a series of regional centers around the Nation which will develop, and make available to schools, colleges, and community groups, materials concerning the history and culture of all the various ethnic groups in our country.

Mr. President, the decade of the sixties began in relative quiet, but ended in ashes of misunderstanding, hatred, and violence. During these riot-torn years, we witnessed the tragic events of race fighting race, religion opposed to religion, and ethnic groups hostile to ethnic groups. Independent study groups, Presidential Commissions, academicians, and reporters alike were in general agreement that polarization among Americans was rapidly increasing, and that misunderstanding and distrust among Americans at all levels of society was dangerously high, and getting worse.

In representing a large, diverse State like Pennsylvania, and in reading my mail, talking to constituents, and following newspaper reports, I have become vividly aware of the feeling among Americans of all races, colors, and creeds that they are being neglected by government and society at large.

This high level of distrust and discontent at all levels of society is a serious problem, particularly in view of the broad problems we face in modernizing all public services, in maintaining a strong viable economy, and in helping to insure the best possible life for all Americans, in urban and rural areas alike. If our people are divided, we will never be able to make our democracy work. If all persons can come together, and work together, the American dream can slowly but surely become a reality to everyone.

The bill I am introducing today, creating Ethnic Heritage Studies Centers, is designed to help bridge the gaps of misunderstanding between people by fostering the study of ethnic history and culture.

America is a new land in world history, still only a few hundred years old. One of our strengths has always been the rich mixture of baskgrounds and traditions of the countries from which our forefathers originally emigrated to start a new life with new hopes and new promises. With the single exception of our great American Indians all Americans derive from other countries' cultures background, and heritages, which have existed for many hundreds of years before America.

However, in the development of our country, and in the history of American people, persons came to our shores in order to make a new life for themselves, became embarrassed with their old country mannerisms and customs and felt they had to take on new "American" traditions. Historians and social commentators have referred to the great "melting pot" theory of America, whereby the cultures and backgrounds from around the world would merge in our new country to create a new homogenized culture that would provide everyone with a new, better life.

As the years have gone on, however, and as we analyze, in particular, the trouble-filled era of the sixties. I have come to the conclusion that too much faith has been put on the dream of a "melting pot." In the process, our peoples have lost a sense of identity. We now see many Americans in a fluid state, with few community ties, and a lack of any firm roots to provide stability for their lives. What was seen as the opportunity for unlimited growth, has instead resulted in insecurity, and a loss of the important values of community, identity, tradition, and family solidarity.

Mr. President, I feel that the focus of the American dream is no longer the "melting pot" mixture of people, but should be our own motto, "E Pluribus Unum," one out of many. Rather than ignoring the many ethnic and traditional differences of all Americans, it is time to emphasize them, and combine the strengths of all ethnic groups, to have these groups work together to build a better society and bring harmony to all people.

I have talked with a number of people who have worked with minority and ethnic groups, and who have been active in promoting ethnic cultural activities, and I have become convinced that greater study, awareness, and application of ethnic traditions and cultural activities can help to increase personal identity and stability which is lacking among so many people today.

Even more important, however are the prospects for members of one race, color, or creed, to be able to learn about the background of other groups, to understand their different ways of life and traditions, in the hopes that each group, through this new understanding will be able to get along better with each other, to work together, and begin the necessary task of creating a more harmonious society.

The Ethnic Heritage Studies Centers to be created by this bill will begin to provide the resources to begin this task of greater ethnic understanding. I envision the creation of regional centers, utilizing colleges, universities, civic groups, existing ethnic organizations, and any other community resource in that region, which will foster the study of the history, traditions, and cultures of the various ethnic groups within that region. Eventually, when these individual regional centers are working effectively, coordination on a national scale can be easily accomplished, but we will have to begin with smaller steps. They can develop libraries of ethnic studies material, develop curriculum material for use in elementary and secondary schools and colleges and universities, help promote ethnic cultural events in their local communities, and work closely with fraternal organizations, student groups, civic associations, women's clubs, and any other community group which can help to foster the goals of mutual understanding of the ethnic centers.

The centers would be under the general scope of the Office of Education, since these goals are ultimately educational in their outlook, but the centers would have separate staffs which should be encouraged to exercise considerable flexibility and independence based on the needs and wishes of the ethnic groups within the areas served by each regional center.

Mr. President, community solidarity through ethnic communications can work. One of the largest mixtures of ethnic and racial groups in our country exists in Pittsburgh. I have sat in on a number of meetings of a new ad hoc ethnic committee in Pittsburgh, which has been meeting to discuss how different ethnic groups and people can work together for the benefit of the entire community. Let me list the different groups represented in this committee: African, Bulgarian, Carpatho-Russian, Croatian, German, Greek, Hungarian, Irish, Israeli, Latvian, Lebanese, Lithuanian, Netherland, Polish, Russian, Scandinvian, Scottish, Serbian, Slovak, Slovene, Spanish, Syrian, and Ukrainian. The mere fact that leaders from these ethnic communities, representing nearly all of the population in the greater Pittsburgh area, are sitting down, meeting together, and talking about mutual projects is in itself a significant development. But the potential for continued close cooperation among these peoples is enormous, and it can take place everywhere in our country, with the ethnic groupings of each region of the country, not just in Pittsburgh.

In summary, I feel that ethnic solidarity and ethnic indentification can be instrumental in eliminating many of the tensions between different groups of people today. Members of all ethnic groups, of all races, colors, and creeds, share the American hope for meaningful employment, healthy families, strong communities, and peace and harmony within their daily lives. Tension and turmoil brings out the worst of human tendencies and motivations, and it is our responsibility to help encourage understanding and identity which will bring out the best in human goals and aspirations.

The creation of ethnic centers can become regional and national focal points for this goal. The study of ethnic heritages will not in itself solve social problems. But the mutual understanding and tolerance between people, and the self-confidence and identity within ethnic groups, can. I urge serious study by the Senate of this small, but significant step; and swift approval of ethnic heritage studies centers.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 23) to provide a program to improve the opportunity for the study of cultural heritages of all ethnic groups in the Nation, introduced by Mr. SCHWEIKER, was received, read twice by its title and referred to the Committee on Labor and Public Welfare.

Senator SCHWEIKER. Thank you, very much, Mr. Chairman. As a sponsor of S. 23, the Ethnic Heritage Studies Centers Act of 1971, I would like to express my gratitude to the distinguished chairman of the Subcommittee on Education, Senator Pell, for scheduling this morning of hearings on the important subject of ethnic studies.

I would also like to express my deep thanks to the many experts in the field of the ethnic studies who have taken the time out of their busy schedules to come to Washington to give this subcommittee the benefit of their expertise.

I regret that many persons who have worked in this field and who could make significant contributions to the discussion today are not able to testify personally due to the shortage of time, but I am pleased to be able to submit statements later in the record from a number of groups.

Mr. Chairman, this bill has the support of the following colleagues who are cosponsors: Senators Brooke, Fong, Gravel, Griffin, Hruska, Inouye, Mondale, Nelson, Percy, Scott, Stevens, Stevenson, Taft and Tunney, and I am grateful for their support.

I do not want to take any time away from valuable testimony of the experts assembled here today, and thus would like to submit an opening statement I have prepared for these hearings at the end of these oral remarks.

Briefly, the bill provides for the creation of centers to promote the study of the heritages, cultures, and traditions of the various ethnic groups which make up our great country.

One purpose of this emphasis on ethnic studies is to help foster an awarness of the positive contributions to our culture which have been made by our respective ethnic groups on the part of the members of each ethnic group.

Thus one purpose is to foster self-pride and a sense of dignity so lacking in society today.

Secondly, however, this bill will also foster comparative ethnic studies, so that members of one ethnic group will have a better understanding of the cultural differences and backgrounds of other ethnic groups.

In addition, members of ethnic groups can come to realize that their experiences in coming to America were often shared by other ethnic groups.

Thirdly, this bill is designed to help bring about mutual cooperation on common social problems by members of all different groups in society today. It is hoped that through education and understanding we can bring about greater peace within society, with all persons and groups working together.

I think the wide variety of witnesses who will appear today will give a fair indication of the broad based support within the whole country for ethnic studies, and I hope the Congress will listen to their eloquent statement and provide the necessary national leadership.

(The prepared statement of Senator Schweiker follows:)

PREPARED STATEMENT OF HON. RICHARD S. SCHWEIKER, A U.S. SENATOR FROM THE STATE OF PENNSYLVANIA

Senator SCHWEIKER. Recently, the attention of educators, sociologists, and urban affairs planners has been directed toward the field of ethnic studies. Today, I am pleased that the U.S. Senate is turning attention toward this important area.

As the sponsor of S. 23, the Ethnic Heritage Studies Centers Act of 1971, I am delighted that today's hearings have been scheduled on

the bill. I am confident that the sampling of opinion and support for this relatively new approach to solving many of our social and educational problems will be educational for all the members of the committee, and for the Congress as a whole.

These hearings will show wide spectrum of individuals and organizations, embracing nearly all elements of our society today, that recognize the need for increased educational emphasis on ethnic heritages, backgrounds, and traditions, and support legislative efforts to give the necessary thrust to ethnic studies to insure that they play an important social role.

The bill provides for the creation of a series of centers for the study of individual ethnic groups. Although the specific details of how and where the centers will be created, and how they will be operated, remain, to be worked out in the legislative process, it is important for the Congress, representing all citizens of America, to declare its commitment to the theory of ethnic studies, and to express its recognition of the positive benefits that this emphasis on individual ethnic backgrounds can provide to society at large.

Let me outline three distinct purposes and stages in this study of ethnic groups.

First, it will encourage members of each different ethnic group to study, and have a greater awareness of, their own ethnic backgrounds and culture. The melting pot theory of assimilation in America has not worked, and in the face of an automated society today, individual roots have been lost, and many individuals suffer from identity crises. The study of ethnic backgrounds can help an individual feel pride in his heritage and pride in himself.

Second, ethnic studies can help foster comparative studies of ethnic heritages. Not only can an individual learn about his own background, but he can learn about the backgrounds of others. A member of one ethnic tradition can understand the meaning behind differences between his way of life and another person's culture. In addition, however, he can realize that despite specific cultural differences between himself and his neighbor, there has also been a similarity in the experiences of the different ethnic groups as they began their new life in America.

Third, through self-understanding an mutual understanding, the groundwork can be established for mutual cooperation. If prejudices and misunderstandings between groups of people can be eased or eliminated through ethnic education, then these same groups of people can start working together to solve their mutual problems, whether they be living in an urban or rural environment.

The American dream of equal opportunity for all citizens has not been realized by all Americans. These steps of self-awareness, mutual understanding, and mutual cooperation can make important contributions toward creating a harmonious society within which this great dream can be finally realized by all Americans.

Today, we will hear from a diverse group of representatives who are actively working in this field, and who are only a sampling of the many different organizations and interests, whose representatives could testify eloquently about the positive benefits that ethnic studies can bring to society at large.

I hope the Congress will respond to their ideas and experience and take the necessary legislative steps to make their dreams a reality.

Senator PELL. As the Senator knows, the reason I have not cosponsored his bill is that I as a general policy do not cosponsor bills that are being considered by the subcommittee. Nevertheless I fully support it.

Senator SCHWEIKER. I undestand that, Mr. Chairman. The fact that you are giving us hearings today convinces me strongly of your feelings in this matter. I understand your policy, and I might say I think it is a very wise one.

Thank you, again, Mr. Chairman, for scheduling these hearings.

Senator PELL. I am delighted. Our first witness this morning is Father Joseph A. Cardoza of Newport, R.I.

STATEMENT OF FATHER JOSEPH A. CARDOZA, PASTOR, JESUS SAVIOR CHURCH, NEWPORT, R.I.

Father CARDOZA. Thank you, Mr. Chairman.

Senator PELL. Father Cardoza is well known to me. He has long been interested in this idea, and he enjoys a very fine reputation in our city. I would particularly be interested in the Portugese problem, because my father was in Portugal as a minister, and I used to go there and visit. I hope some day to get a Portuguese cultural center or museum going in our own state.

Father CARDOZA. Thank you for your kind words, Senator. This proposed bill is one that I am quite enthused about, and I feel that my own particular background gives us some insights since I was actually born in the Azores and grew up in this eminent perspective.

This bill, I feel, would contribute greatly to our realizing the ideal of the open society. In order for this ideal to be realized, we feel that people must have their identity fully established, and one of the crises of our nation now is precisely this, where people seem to have no identity whatsoever.

They seem to be wandering about. We live in a pluralistic society, and this is a fact of life. It is a policital fact of life and far from the preconceived notion of the melting pot, which was to hold forth for some short time and people would then be caught into an American press, ethnicity has endured, and we feel that it actually has real value in helping to solve some of the identity crises that so many people in our country are going through, and also to diffuse this polarization which, of course, is doing much damage to our cities, to our communities, and to our country, and I feel that in order for there being respect on the part of one group for another, the individual must respect himself, and so it is a question that the ethnic centers would do precisely this, would encourage and show a real sense of appreciation for the particular cultural and linguistic background on the individual.

Again, from my own experience sometimes you would feel that the community tolerates these differences and suffers with these differences until they are happily obliterated, and in the process of this attitude there is harm and damage done to individuals, psychic harm and damage, whereas the ideal as espoused by this bill would be to appreciate the differences.

I feel to the extent that this materializes, we would be doing away with the ghetto and the ghetto mentality. I feel the ghetto mentality is brought about precisely where the individual is demeaned, and where he feels himself threatened to becoming a non-person, then he withdraws if the general community and establishes his own particular enclave, where at least there he will be respected as an individual, and at least there he will find his values.

So to the extent that the community in general appreciates the differences, then you won't find people withdrawing. Rather, you will find the very opposite. They will come out, they will flower forth into what we would hope would be the ideal of the open society.

This is not retrogression as some people feel. It is not a question that we are committed to perpetuating the ghetto, but rather to disintegrate the ghetto mentality and to develop a community where the differences are appreciated, where we have this pluralistic society vigorously being lived.

In this, one can become thoroughly American while retaining the distinctive and creative individuals of one particular background.

This enriches the community, this enriches the country, and we find now we are conscious of the members of the community of nations, we have so much that could be of real service to the United States, and also to the maintaining of the respect for the dignity of the individual, which I think is basic to our way of life, and in order for these different groups to live at peace with one another they must first of all respect themselves, and herein is the particular merit of this bill, which I heartily endorse.

Thank you.

Senator PELL. Thank you very much, indeed.

It is of particular interest to me to know how you would see this working out in our own State of Rhode Island.

Father CARDOZA. It would be a process of formulating programs that could be presented at one of our colleges. URI or elsewhere, where you can have curricula that would be devised to bring in the contributions of the ethnic groups residing in our own State, the contribution of the Italian, Irish, Portuguese, the Poles.

In this way, you would be able to actually enhance the status of the college, where they would be providing something positive and something constructive and at the same time possibly setting up programs where your teachers of sociology would be able to get the background necessary to go to their respective schools and classrooms and be able to teach these courses, which would lead, hopefully, to the members respecting one another as individuals.

Senator PELL. I don't know if you are familiar with the tower of learning, I think it is called, at Pittsburgh, with different rooms for different ethnic cultures, all brought together.

Do you see the possibility of a center of that sort in our State, perhaps in Providence, in the central population area?

Father CARDOZA. That certainly could be one idea, Senator. With all this, we are going to have to feel our way about.

Senator PELL. Thank you.

Do you have any questions?

Senator SCHWEIKER. No; I just want to commend Father Cardoza for his statement, and express my appreciation for his support.

Senator PELL. Thank you, Father.

Our next panel is headed by Msgr. Geno Baroni, director of the National Center for Urban Ethnic Affairs, Washington, D.C., and Mr. Irving M. Levine, Mrs. Fred Harris, and Al Velarde.

We are delighted that Mrs. Harris is here. I see that one member of the panel is missing.

STATEMENT OF MSGR. GENO BARONI, DIRECTOR, NATIONAL CENTER FOR URBAN ETHNIC AFFAIRS, WASHINGTON, D.C.; IRVING M. LEVINE, DIRECTOR, NATIONAL PROJECT ON ETHNIC AMERICA, AMERICAN JEWISH COMMITTEE, NEW YORK, N.Y.; MRS. FRED HARRIS, PRESIDENT, AMERICANS FOR INDIAN OPPORTUNITY ACTION COUNCIL; AND AL VELARDE, SOUTHWEST REGIONAL DIRECTOR, DIVISION OF MIGRATION AFFAIRS, U.S. CATHOLIC CONFERENCE, EL PASO, TEX.; COMPOSING A PANEL

Monsignor BARONI. Mr. Levine is going to be here.

Senator PELL. Would you like to turn it around and wait for him, and have the next panel on?

Monsignor BARONI. That might be all right. What do you think?

Senator PELL. Would you like to wait?

Senator SCHWEIKER. We could maybe add him to the next panel.

Monsignor BARONI. We could go ahead and maybe submit statements.

Senator PELL. All right, let's go ahead.

Monsignor BARONI. Senator Pell and Senator Schweiker, we are very happy to be here and have this privilege to show our concern and support for S. 23.

(The prepared statement of Monsignor Baroni follows:)

STATEMENT OF MONSIGNOR GENO C. BARONI
DIRECTOR, CENTER FOR URBAN ETHNIC AFFAIRS
702 LAWRENCE STREET, N. E.
WASHINGTON, D. C. 20017

Presented to:
Senate Committee on Education
Hearings on S-23 THE ETHNIC
HERITAGE STUDIES CENTER BILL
APRIL 20, 1971

Senator Pell, members of the committee, I am Monsignor Geno C. Baroni, Director of the Center for Urban Ethnic Affairs. It is my pleasure to appear before you and testify on behalf of S-23, the Ethnic Heritage Studies Center Bill.

Public and private agencies devoted to the restoration of urban America have largely ignored working class whites in designing programs to eliminate poverty, substandard housing, racial discord, declining schools, and physical decay. It is difficult to rationalize the neglect of these residents given their size and strategic location in our Northern metropolitan areas. The most prominent segment of this group are the first, second, and third generation Americans of European ancestry.

While the sons and grandsons of European immigrants can be found in various social-economic strata, a large number of them are blue-collar workers. They are the backbone of the labor force in most of our industrial cities, mining towns, and manufacturing centers. They still reside in older, mixed-ethnic neighborhoods or have relocated in predominantly blue-collar suburbs. The needs, frustrations, and problems of this metropolitan population are urgent and varied.

We reject the accusation that these people are the citadel of racism in our society, although we do not deny that racism exists. We find that race relations in America's big cities have come to mean increasingly the relations between the blacks and white ethnic working class people. This has happened because, increasingly, business and institutional leadership no longer lives in the city. The upper middle class has either fled or is fleeing. It is therefore obvious that if there is to be a resolution of the racial crisis which grips our society, a critical role will be played by white working class communities.

Since the end of World War II, scholars, journalists, and social reformers have devoted little attention to the white ethnic community. It was assumed that the offspring of European immigrants had lost their identity in the "melting pot," that they were well entrenched in the middle class, and that the plight of the new urban immigrant, the non-white minority, deserved priority attention. Recent probes show that many elderly white-ethnics are poor, that most working-class families do not earn "middle class" incomes, while white blue-collar youth must grapple with the same kind of problems that have produced alienation among affluent college youth.

As a consequence of two decades of neglect, we know little about the white ethnics, their precise numbers, the composition of their communities in terms of age, occupations, income, and education; the importance of their cultural heritage in understanding their behavior. However, the academic community, mass media, the foundations, and a growing number of people in Washington have rediscovered the "white ethnic." This renewed interest is

based on the realization that to ignore their valid needs is to jeopardize those efforts which are designed to restore urban America and to reduce social discord which is rooted in economic insecurity and racial misunderstanding.

What, then, is the importance of an Ethnic Heritage Studies Center Bill? The importance is basic and I specify only a few of a plethora of reasons that support this bill.

First, utilizing the accepted metaphor of melting-pot, what really has melted in this famous pot? We don't really know because the decades of neglect has robbed us of the determining data.

Second, is America--perhaps the most culturally and ethnically diverse nation in the world--really a melting pot? Perhaps, as so many of us working the field more and more realize, the uniqueness of America and its source of strength consists precisely in its multi-diversity. Again, our decades of neglect has robbed us of the determining data.

Third, at a time--our time, right now--that our society appears to be searching again for its identity (so it may know better its true purpose) the passage of S-23 will provide to so many, many Americans of Eastern and Southern European origins a prospective of their origins, their heritage and traditions, their customs and languages, their life-force! To assist in discovering a people's origin (and fortunately for the American of European ancestry this is possible) is to assist an American to answer what always remains a basic question--who am I?

Fourth, the urban turmoils of American cities today is rooted in one basic question: Is America today, yet able to provide a "pursuit of happiness" for the totality of Americans that make this nation the most culturally and ethnically diverse nation in the world? As various groups see and think they see other groups receiving more of our government's attention, its time, its money; then, that group sees itself as a foster child at best; as alien at worst.

To show that America is a nation of peoples--each fully free, each fully alive, each fully developing, each fully inter-dependent in brotherhood, then America in its "pursuit of happiness" for all its peoples can truly show "all men are brothers."

Thank you.

Monsignor BARONI. I came to Washington from Pennsylvania, where I read all those free Andrew Carnegie library books that told us everybody was going to make it and everybody was going to be the same, everyone would be an "American." By the time 1970 came around I wondered whether or not the American dream was becoming an American nightmare.

I was director of urban affairs of the archdiocese of Washington, and recently of the U.S. Bishop's Conference task force to look into the urban problems, and I have looked at 58 northern cities. Who lives in the northern cities?

You take cities like Newark, Pittsburgh, Detroit, Gary, in those cities with the growing brown and black populations, the people in those cities are largely—the white population—first, second, and third generation from Eastern and Southern Europe.

These people have a growing anxiety about American society. Where is America at and who are we? My nephews and nieces are not sure of their own heritage, their own strength. I think we have an important possibility here if we look at our American cities, if we look at our urban society, in this bill.

I think we have a possibility of helping to find a new source of strength America desperately needs. I was on the National Committee on Cities with Senator Harris and others.

The great disaster, besides the lack of money, in our cities is the lack of hope. Take Newark. Newark is like a patient that the doctors have said, "Maybe you could get well if you had money," but many people in Newark don't believe they can get well. Many of our people have lost their sense of pride, have lost their sense of history, have lost a sense of appreciation for backgrounds of their parents and grandparents, and even their historical experience in the American scene.

We have a kind of historical amnesia among our people. As we look at American cities and American society, we lack a national identity, a national purpose. I believe this bill is crucial and very important in the elementary and secondary levels as well as the higher education level; it is crucial in developing a greater sense of sensitivity, of awareness on a personal level.

A person who knows who he is, who can have an identity, that person has self-respect, that American can begin to respect other cultures and other heritages. But to the degree one has lost his own self-respect, then he may have a hard time respecting the cultures of others.

We are saying that America is not necessarily a melting pot, that America is the most culturally and ethnically pluralistic country in the world.

One national commission said we were building an inevitable group conflict in our society. I think the only alternative to that is for us to recognize the contributions of all ethnic Americans, the Indians, the blacks, browns, and other groups. If we develop a healthy respect for the cultural heritage of other Americans, that respect will show us that perhaps we can live as an ethnically and culturally pluralistic society, with mutual interdependence, and work to meet the human needs of our society, and work in a way that we can share our value systems, and create a more decent American way of life.

I believe that ethnic Americans have a great role to play in our urban crisis. I believe our young people, especially young people of the second and third generation, need to find and strengthen the hopes of their heritage and background in order to survive a fast changing technological, socially moving society. Therefore, I believe one of the greatest strengths and resources of American society is in the hopes, values, and resources of ethnic Americans, black, red, white, and brown.

We are very, very grateful for this opportunity, and we hope that this bill has important priority, not only with this committee, but with the Senate and the House, and I think that America's national identify, its purpose, its foreign and domestic policy, and our life style—I think all this is related to some very basic questions that are connected with this bill.

Senator PELL. Thank you very much for that eloquent statement. Do either of your colleagues have statements?

I welcome particularly Mrs. LaDonna Harris.

Mrs. HARRIS. Thank you. I am pleased to appear on this panel, particularly with Father Baroni. I know of his active interest and activities in the area of ethnic pride and the response he has received from people for what he is trying to do.

I would like to be able to submit a statement later, a written statement, but basically I wanted to be here today to say something of my own personal experience and personal knowledge of being involved in the community and having traveled all over the country in regard to Americans for Indian Opportunity, and Oklahomans for Indian Opportunity gives me a great deal of insight, things I have known myself but have not really been able to put into words.

One of the things we spend most of our time doing at Americans for Indian Opportunity is to try to educate non-Indians to what Indians are about.

The lack of knowledge in the United States about American Indians is phenomenal. I think it is a great disaster, that has led us to the social and economic conditions of the American Indian today. This lack of understanding by the general public is reflected in Congress, particularly the lack of funds that are needed. We could just go on.

American Indians are the lowest on the economic and social ladder in America today, mainly because of the complete lack of understanding from the non-Indian community. I think with the kind of legislation that is before us today and availability of facts about cultures and peoples this will help people to understand what Indians are about. Every day I am personally asked if I can go from Oklahoma to New Mexico and speak with the different tribes in their languages.

There are 300 different Indian tribes in Oklahoma, all speaking 300 different languages and all having separate cultures. It is like talking about Europeans when you talk about American Indians, because we are that different.

These kinds of things are very important particularly for a schoolchild to know so that he can grow up and have a broader view instead of the romantic stereotypes about the American Indian. I know in my own experience, about the attitudes and prejudices of people, the discrimination and the kinds of subtle insinuations about "You should

not be proud." Well, the pride of being an Indian is taken from him, and from many, many people. In fact, I think we have lost two generations of American Indians because of this kind of discrimination.

I know in my own experience, that Commanche was the first language of our home.

I really cannot now speak it very fluently, mostly because of the attitudes of other people. I can understand it, I can think in Comanche, but I can't speak it very well, because I was made to feel that language was not a good language, and that you should speak English.

If we had the kinds of institutions that could hold and keep the history and culture of the people, where our young people could come and find pride and find something interesting in my tribe and my culture, this would give them some self-respect.

I agree with Father Baroni in thas rescept. When we started Indian youth councils in Oklahoma, we tried all kinds of techniques to get youth involvement, and it was not until we started separate Indian clubs in the public school that the children came around—mostly because in doing so—having a separate organization with rewards of being involved in the whole school community, we finally caught on to what was happening.

Children need to have self-respect and a positive self-image, and that image, particularly if you are a dark-skinned person comes from your idenity, the same that black people have in "black is beautiful," the same kind of concept that Indians have in arriving now at pride in Indinanness.

There are no books for children to read, Indians or non-Indians, to read about themselves in the lower classes in public schools.

So the need for books and materials are rejected in the kinds of mail that we receive at Americans for Indians opportunity and it is just insurmountable—people needing and wanting materials—children saying, "I am writing a paper on American Indians, and I can't find anything in my school." "I am writing my thesis, or writing a paper to get my master's degree, and I can't find material."

People are writing us for those kinds of materials, which, unfortunately, we don't have. We can refer them to a few places, but the Bureau of Indian Affairs does not have a very good collection of material.

The University of Oklahoma has probably the largest collection of anthropological studies of different tribes. But still that is inadequate.

So little or nothing is really known, and with the generation, for instance, of my grandmother and her passing, we will lose a great deal. So time is of the essence in getting this kind of information from Indian people themselves because my own mother can't speak the language or know the culture and customs of the tribe that she belongs to.

Very, very few Indian people my age really know that much about the tribe.

Now, younger people are studying and going back to their tribe, but the lack of information, if they are not in contact with their own tribe, it is very difficult to do. So I am very pleased to have an opportunity to testify on behalf of this legislation, and I hope that it will pass.

Senator PELL. Thank you very much, Mrs. Harris.

Mrs. HARRIS. Thank you, Mr. Chairman. It has been a pleasure to be here this morning.

Mr. VELARDE. Senators, my name is Luis Velarde, Jr. I am regional director of the Southwest area for the Division of Migration Affairs, U.S. Catholic Conference.

Due to my background of having taught in the El Paso public schools for 5 years in latin American studies, and now that my territory, dealing with migrants and the Mexican-American community throughout the Southwest is from Brownsville at one end to California on the other, all the way up to San Francisco—we have offices in San Francisco, Los Angeles, Phoenix, and El Paso—I feel that I can supply some information that will be helpful to this subcommittee on the need for such centers throughout the United States, and would emphasize that these centers are needed quite a bit among the Mexican community.

I have found that in the Southwest as perhaps you will find in other sections of the country, the attitudes of the schools and the policies set forth by certain school districts and systems concerning Mexican-Americans has resulted in many students coming to hate education.

It is not that these students don't have the ability. The educational system, the majority society, as some people call it, seem to kill his aspirations, to move forward.

The student is made to feel that he is not only different, but also inferior because of his surname. He looks at our American culture as the objective that has caused him pain and also neglect. Then he looks at his Mexican heritage and says, "Because I am Mexican, this is the reason I am being held back."

The curriculum in general, the textbooks in particular, as I have found, neglect to inform all students, both Anglo and Mexican American and other ethnic groups, of the tremendous contribution that the Mexican-American has made in the Southwest and also in the contribution to history of this country.

These systems deprive the students of a chance to gain an understanding and a pride of his origin or his heritage. I was reading some material on my way from El Paso on this subject, and read a study submitted by the Civil Rights Commission of which you Senators are well aware, and I read a quote which sums up the general attitude that I think must be destroyed.

This is a quote from a Los Angeles high school student who said that "the teacher's negative opinion of Mexico would not bother me so much except that this is the only image portrayed to me in America. I look around for something to be proud of, and I question my parents, and they tell me 'Be proud to be a Mexican.' "

His parents are too busy working to explain what he should be proud of, and since they do not tell him these things and the schools will not, he begins to wonder if the teacher is not correct, if he is not in fact inferior, that he is unwanted in our American culture, and that in fact he was aware of teachers telling him face to face, "Why don't you go back to Mexico and quit causing problems to Americans?"

This type of attitude, should be changed. I think this bill, by presenting these cultural centers, will make students such as this one aware

of the fact that he is an American of Mexican origin. He is not a Mexican. He is part of the American community. He must be proud of his origin.

This crisis of identity is obviously very acute. As an ex-teacher, I have noted these things, having taught Latin American studies. Students who had recently immigrated and came into my class were not knowledgeable in English.

They were having trouble with spelling. However, they were quite good in the sciences. In social studies we talked about the 16th of September, Cino de Mayo, Nuestra Señora de Guadalupe and other events, these Mexican-American students who had just immigrated were keenly aware and proud of their origin.

Yet you have Mexican-American students of 1- or 2-year generations, who, unknowing, were ashamed and very insecure about these things. Many of them did not even know their own family background.

We have long asked for textbooks and other teaching materials and centers such as these that are being proposed today to properly represent our ethnic backgrounds, in my case, my Mexican-American background, history, and culture.

But to have these things is not sufficient. We need well trained, knowledgeable teachers of the same background, who are also proud to be Italian, Mexican or Indian, and who will in turn put this pride forward in teaching the minorities.

I wish to go back to something Mrs. Harris said, that the first language that was taught in her home was Comanche. The first language that I learned was Spanish, and the reason I flunked the first grade is because I did not know any English.

Then I was made to feel ashamed of Spanish, and in my home my mother especially said, "learning English, speak it at home, speak it in school."

I found later that his very attitude within my own home stymied me in my college work, and I actually learned how to read and write Spanish in my senior year of high school. Yet now, going back and working with my own people, I find that only in the later years when I have really studied my own background and ethnic heritage, and I prepared to go and work among people of my own ethnic background.

For these reasons, I feel that ethnic centers of this type should be beneficial, the bill should be passed, the centers should be created.

Let's take an example in my area. You have what I call the upper Rio Grande Valley. Within a distance of 450 miles you have four major universities, the University of Texas at El Paso, New Mexico State, New Mexico in Albuquerque, and Denver. Each of these universities had tried to some extent to establish ethnic studies—Mexican-American studies.

Many of them have been stymied because of the lack of material and the lack of money. Recently we had a demonstration by Chicago students at the University of Texas at El Paso on this very point.

"Why are we"? This is the one thing that the Mexican-Americans in Los Angeles, in San Jose, Calif., in San Francisco and Albuquerque are saying, "Chicanos are Mexican-Americans, but what does it all mean?"

Just over the last 5 or 6 years this awareness is starting to come forward, and this bill, if passed, in the creation of these centers will

do more toward projecting this pride than, anything that has been done in the past. A recent law that has done more for our educational system than anything else was the recent bilingual Education Act.

There needs to be more done, and I compliment you gentlemen for holding these hearings and hope that this bill moves forward to final realization.

I thank you.

Senator PELL. Thank you very much.

Mr. Levine, do you have any statement you would like to make?

Mr. LEVINE. Yes; I will make a short statement.

Some of my testimony has been made before the Pucinski committee, and is in the record. I commend you for introducing S. 23 into the Senate.

If I may I would like to express my deep happiness that the House and Senate are moving in this direction, but also take time to comment on some technical matters, I have been concerned with, as they relate to S. 23.

I am Irving M. Levine, director of the National Project on Ethnic America, which concerns itself with the problems of white ethnic groups in America, ecpecially as they are currently related to polarization between black and white Americans we are working both to depolarize group life and also to focus attention on the needs of white ethnic Americans as well as the priority needs of blacks. Puerto Ricans, Mexican Americans, and American Indians.

We are interested in the technology of deplcrization of black-white tensions, depolarization of tensions between students and workers, and depolarizations of tensions between what we called established leadership and alienated constituencies.

Much of our work is based on a recognition of ethnic identity as a potentially positive force even while admitting that group chauvinism and extreme separation can be very destructive to a pluralistic society.

So your desire to produce legislation that would bring about a deeper understanding of the way in which these groups are developing is commendable. Since many of our historic group conflicts grow out of an inadequate understanding of ethnic succession the study of ethnic group behavior can help reduce current tensions as well as explain past ones. Not only would I want to associate myself with this effort, but also bring the resources and findings of the national project on ethnic America to your attention and the considerable technical expertise we have developed be made available if requested.

I would like in that contex to introduce some of the problems we see emerging in the introduction of this legislation.

We don't want to make the mistake we seemingly made in the poverty programs, where the Congress created with the best of intentions, a result where one group by the very nature of their needs began to compete viciously with another group for a piece of the small pie. We would hope that some caution in the draftsmanship and design and administration of this bill would take note of the fact that when one is trying to meet the needs of all ethnic groups in America with a very small budgetary allocation, there will be competition. It is in those areas that we have technical suggestions.

I don't know if it is the appropriate moment to make them now.

Senator PELL. I think it would be, and we would like to have your specific suggestions.

Mr. LEVINE. No. 1, I think the bill ought to make clearer the intentions around not just ethnic identity, which I think is laudable and much needed, but also some areas that we are concerned with in the definition of what centers would do. For example I am suggesting not specific language, but basic ideas. If I might read some of these phrases, you might find the appropriate place for them.

When you talk about the purpose of the regional centers in your bill I would suggest that part of those purposes now incorporate some of the following language or following concepts. "Carry on activities relating to improving interracial, interethnic, international, intercultural and in general intergroup relations in the area in which the center would be authorized to operate."

I feel also that since there is not a marked tradition in American legal history in defining the word "ethnic," that this might be the appropriate moment to begin to think through that definition and include it in the bill.

I think one can find some sort of consensus among scholars as to what we mean. By ethnicity without offending or excluding relevant American groups.

The Jewish community is especially sensitive for sound historic reasons in avoiding governmentally imposed definitions as to what constitutes Jewishness. Other groups similarly would probably prefer generic categories that allowed for a wide range of acceptance.

I suggest here again that it might be well to identify the two words "ethnic groups" maybe with the following conception.

For purposes of your bill "ethnic groups" would mean "ethnic, nationality, cultural, historic, racial, and—or those groups whose members define themselves as a people claiming historic peoplehood."

We are moving finally after 200 years of American history into a deeper appreciation of the reality of American life. We have for a long time lived with a lot of mythology. We have literally destroyed what some people, maybe in exaggerated but meaningful language, have called "cultural genocide" many, many people's movements, life styles, including the vast cultural wealth and riches of the variety of American ethnic groups.

We have sought an assimilated pattern when we should have been seeking "integration with indentity," or "identity without exclusiveness."

You do know, and we know, that this is a complicated matter with thousands and thousands of years of confusion and struggle but nevertheless I think the introduction of your bill is a moment of some truth, I do commend you for the effort you are making and I do believe short of a number of technical reservations that you are moving in the right direction.

May I finally comment on some cautions that I might recommend about the administration of the Ethnic Heritage Study Centers, I hope the legislative history begins to indicate concern that the manner in which the centers are administrated will be so developed as to realistically deal with the tremendous complexity of such a large variety of ethnic groups vying for attention we may wish to set up a kind of national network where the kind of study guides and curriculums will be made available to groups in particular regions, even though in their region they may not have the expertise or assertiveness.

What I am saying is that in the administration of this act I think it ought to be indicated not only that each center should have, as you say in your bill here, a course of study related to all ethnic groups represented in the area. But also in terms of the reality of that goal, the kind of interchange among centers to guaranty that all ethnic groups would be adequately represented in terms of scholarly quality, I think it would be awfully difficult to obtain the kind of scholarly quality in each center that one might attain on a cross national level with the availability of whatever the collective centers' work was with particular groups. On the other hand I do not favor separate centers for any one group in a region. This would create destructive competition.

I think many of these things have to be thought through in more detailed form than I am presenting in this time limited testimony I do not know whether I am intruding administrative forms into legislative forms, but I hope that the record at least will show we have been interested in these kinds of administrative matters.

Thank you very much.

Senator PELL. We always appreciate specific suggestions, they are of great help to the committee. In going ahead with the legislation, we take all the suggestions that have been made, put them on a broad piece of paper, and check them off one by one.

The more specific there are, the more helpful to the committee it is. I think everyone now understands what the bill is for. When I first heard of it, I thought it was an attempt to establish different ethnic centers built around different groups.

Then I found its real purpose was to bind together the different ethnic groups and give them pride in themselves, but also, more important, the ability to work with each other.

In drafting this bill, I think we will do our best to make sure that this is a bill which binds together.

I have no other particular questions, but I am sure that the organizer of this bill will have some.

HOMOGENIZED MILK THEORY OF AMERICA

Senator SCHWEIKER. Thank you, Mr. Chairman.

First, I would like to compliment Father Baroni and other members of the panel for your very forthright and also very helpful statements. I think that—I know Father Baroni and I have discussed this at different times—this is really a radical change in our educational approach—and it does represent a change in educational policy.

I think Father Baroni touched on it in his remarks, and the others did, too, that we had the melting pot theory of America, that we are now changing perspective, and I call it the homogenized milk approach, we are now going to a tapestry theory, or a mosaic pattern.

This to me is a very radical change, but I think it is obviously long overdue. I think, again Father Baroni's terminology of "historic amnesia," is good.

When people came to this country, they would shorten their name, change their name.

Senator PELL. Really, it is a bouillabisse approach. It is like a stew.

Senator SCHWEIKER. Exactly, and the tendency to shy away from your true name is symptomatic of this problem, and now we are turning it around. I think one group that learned this as fast as anyone was the black group.

They found the system did not work for them, and that it was self-defeating, so they came out with a "black is beautiful" approach.

Really that is what we are all saying in many different ways, that first of all, before I can understand you, I must understand myself, and before I take pride in others, I must take pride in myself, and I think this is a radical departure, and I know, Father Baroni, in the work that you do, you find this to be true.

Father Baroni, could you explain the kind of work you do and how you got into it, and why you feel this is a very important thing for America?

Monsignor BARONI. First, Senator, Mrs. Harris has to testify at another hearing. May she be excused, unless you have questions?

Senator SCHWEIKER. I did not know her time schedule. We appreciate your role, Mrs. Harris. I know with your work in another group. you have been an outstanding leader, so if you would, comment on the general questions raised. Do you have a minute before you go?

Mrs. HARRIS. Yes.

Senator SCHWEIKER. Just add your comments to some of the questions I have raised, and we appreciate your willingness to help and come here.

I know both you and your husband have been very constructive and most influential in this field. Go ahead.

Mrs. HARRIS. Thank you. It is very difficult for many Anglo Americans to really understand why dark skinned people are becoming separatists and pulling themselves away. It adds to their frustrations, and a little bit of the fear that we have in America today, and I think what you propose is the kind of thing that needs to be said again and again, and to larger audiences, that in order to have, or be able to work with someone, you said it more beautifully than that, but in order to take pride in something larger than yourself you first have to have pride in yourself, and that whole concept is difficult for others to understand, that those who have been repressed and have been made to feel inferior by other kinds of ways know what this is about, and that it should not be a fearful thing.

It should be a prideful thing, and what we learn from one another, what we learn in the differences from one another, I think, will help us internationally as well as nationally. The melting pot theory is a myth and particularly if you are dark skinned. In our hurry, in our anxiety to kind of make us one country, because we did have all different kinds of people coming to this country, we have tried to thin out the differences. Now the frustration of identity is really on us, and one of the things that is adding to our national dilemma right now, is a little bit of envy, as one of my Chicano friends said, there is a little bit of envy from the white community that the blacks and browns are creating this self-identity and pride in who they are.

Now the white community is finding it a little harder to go back to their original ethnic group. I think that is one of the reasons for having an ethnic center. They will be useful, because people need to understand what the blacks and browns are doing in trying to identify their own and making something positive.

So I compliment you, Senator, for introducing this bill and for the contribution it is going to make. Because I think the situation is worse than you realize. I have traveled with my husband and Father Baroni

and seen the problems of the cities in the seventies, and you see this now.

Minority people are having problems, and majority people are having psychological problems. I think your approach will be very helpful.

Senator SCHWEIKER. Do you have suggestions as to what kind of coordination and relationship there should be between an ethnic centers program and the bilingual education program? What kind of relationship do you foresee or visualize, or what kind of structure shall we look for in terms of tying the two together?

Mrs. HARRIS. I have not thought that question through, but I do feel strongly that it is important to tie together these things because the language is an important element of identification particularly for the Mexican-American people, and for the Indian. I think because we have been with this melting pot myth so long in America, anything different sort of gives us the attitude we have toward Asians.

They have different sounding voices that we can't understand. We even fear them because we can't understand them.

I do think it is important to have the language aspect incorporated in your proposal and maybe some way related.

I think it would give it more strength in the school system, as you have heard from the Mexican-American community. It is very difficult sometimes to get the school community to take on the bilingual studies. They have been opposed to it, and this attitude has been harmful to children in the past. They really don't see the need for this.

I think giving attention to language in the cultural centers will help to motivate school boards and school administrators to see the need for it. I think we need to work with educators more than any group of people in the country.

Senator SCHWEIKER. We appreciate your coming and participating. We will be in touch with you later on the specifies, because we do need specifics, and people like yourself who have done so much work in your own group are helpful to us.

We appreciate it and we know your time pressure now and we understand it.

Mrs. HARRIS. Thank you, Senator.

Senator SCHWEIKER. Thank you very much.

Father, do you want to comment on the questions I raised, some remarks or anything else you would like to add?

I would like to hear a little bit about your present work and how you got into it.

Monsignor BARONI. I came out of Johnstown, Pa., and Altoona, Pa., and I went through the whole thing of "Put away the salami, eat your homogenized baloney, everybody is going to make it," what I call the Reader's Digest religion.

Then I go back after 10 years of working in the black community, 10 years of working in Washington, watching legislation, watching the Nation, working with the youth, working with my own family. I began to see that in the urban scene, in looking at our urban cities, four problem areas caused anxiety in the white ethnic communities.

I see an economic problem, I see a social one, I see a cultural one, and a political one.

Political anxiety, if I again may put that first, I think too many political leaders have tried to indicate this, and cater to the fears and anxieties of many different groups, and many of those fears are caused by the fact that people don't have a sense of self-respect, don't have the strength of their background, their heritage, their historical experience, and so on, and don't have much to stand on.

I think this anxious sense is found in our children and many of our people who have been ashamed of their background, I hate to say this, many of our own people are ashamed of their backgrounds and ashamed of their parentage.

I have nephews and nieces ashamed of some of the value systems for life style of my mother, and yet the children of affluence are walking up and down the streets of Georgetown looking for a community, for a life style, for something more decent or humane. Perhaps they are looking for the old neighborhood.

I think we have a major national crisis in our cities, but I think the hope of the cities is not money alone. I think the energy of the person who has a sense of pride, the person who has the source of energy needed to rebuild urban America in a mutually interdependent way, that source of pride has to be turned loose.

So many youngsters I taught in Altoona and Johnstown don't want to go go back to the old neighborhoods as doctors, nurses, lawyers, teachers, and want to get away to suburbia.

I am saying many people in this group have to go back to their communities because we need their strength, their leadership, their capabilities, if we are going to restore an urban society.

I go into cities like Gary. I was called to Gary because there seemed to be community problems there, and people were interested in finding new leadership.

I resent some of the academic or media mentality that describes what is wrong with the middle American person. I would rather look for the hopes and strengths as well as the felt needs in many of these communities. We have a lot of neighborhoods in our cities that should not be destroyed.

We have a lot of social relationships that are negative and not positive. I think crucial to that is a cultural base, crucial to that is not only heritage of our ancestors and the heritage of our people in this country, but I would like to see, the studies of the labor unions and the history of the different groups and their different struggles and the history of the labor movement being incorporated in this, like in our own State of Pennsylvania.

My nephews and nieces don't know anything about the labor struggle of their parents and grandparents. That is part of America.

As I walk in cities, I find people, like a young friend of ours who says, "I am Polish, I am American, I am Catholic, and I am all confused with all of them."

Do we have a sense of identity, do we have the sense of purpose we need? In many communities, with fast changing social and technological changes, I am finding in second and third generations a loss of ethnic pride, a loss of an ethnic way of life and a large amount of fear and a large amount of confusion. I think that is very important to us if we are going to talk about our domestic policy, if we are going to talk about our foreign policy, if we are going to talk about the kind of

60-433 O—71—pt. 2——20

programs needed socially and economically for restoration of American society to meet our priority needs. Since you mentioned and others mentioned, our older cities are going to become ghost towns.

I have had experience in many cities like Steubenville. High school teachers and high school students were wondering what was happening in the black community. Teachers want to teach black studies right away to working class students. These students and teachers had to go and look up the labor history, the background of their families, their value systems, and only after they looked up their own traditions and history, the struggles of their grandparents and felt a sense of respect for that, could they even begin to understand the social turmoil that happened in our country in the 1960's, and even then to get some kind of a vision or dream of the American society we will have in the future.

I think to the degree that we can "turn on" many of our younger people to do the research, to become involved, to study the ethnic factor in our urban communities we will find new hope for our cities. Some of the groups, scholars and practitioners and others ought to be brought together to talk about some of the technicalities of implementation and coordination.

Maybe that ought to be done in some other way, but here is where I think many young people can do research, can begin to develop sensitive studies, and look at American society from their own backgrounds and own perspectives, and I really am grateful that, in the cities I have been working in, young people are interested. The ethnic heritage is there like an iceberg, it is there beneath the surface.

If it can be opened up, not out of fear or shame, but out of a sense of self-respect, if that source of strength can be opened up, and to the degree it is positive, I think this is America's greatest reservior for a great age of making it big as a multi-ethnic, pluralistic society.

Otherwise, I see less and less of a sense of energy, less and less sense of respect for other groups, less and less self-respect, less and less sense of some kind of decent way of life, and I see an increasingly cultureless society that leads us increasingly to the drug scene, leads us increasingly to an emptiness, and leads us increasingly to celebrating a dollar culture rather than a more humane society.

These are the kinds of things that I think are necessary for our Nation, our cities, our children and our society. I believe that this is quite basic. I think we are seeing just the tip of an iceberg in the white ethnic communities, where the Indians, blacks, browns have perhaps had a greater upsurge in growing self-identity.

Mrs. Harris has letters, individuals, young people are wondering, "Who am I? Who are we? Where are we going? What is America?"

These are basic questions, and to me they are the logical questions.

Senator SCHWEIKER. Once again, Father Baroni, I think you have provided a valuable service as a national leader in this idea, this concept, which you in your own way have pioneered. So we are very indebted to you for your help and support. You may be assured that we are going to keep in touch with you as the bill progresses and legislative activity gets more specific.

I would like to invite the other two members of the panel to comment. I think Mr. Levine had some practical suggestions. At some point in time, when we work on the bill, we do need this kind of infor-

mation. So whoever would like to comment at this point before we finish the panel may do so.

Mr. LEVINE. When we began the national project on ethnic America, which was touched off by a program at Fordham University in 1968, we never anticipated the kind of a revolutionary sense of identity search that has begun to percolate in certain elements in the white community.

Our files are full of assertions of this fact, while ethnic identity still is complicated by other factors and there is a differential level of identity, search among Polish-Americans, Italian-Americans, Jewish-Americans, et cetera. We are still surprised at the rapid growth of feelings of ethnic identity. A recent New York Times article indicates that there are now 66 campus oriented student Jewish newspapers, whereas there were four a few years ago.

A recent effort to form a Polish students club in Chicago got 200 people to sign in 2 days. So there is a deep interest. While your bill may turn out to be a major step ahead, there is a broader question of the whole business of ethnicity in America which is only tangentially reached by this bill and that is the deeper question of the saliency of ethnicity. This is what I think Father Baroni is talking about. We define it as the making of a community, we call it the new pluralism.

What will the new pluralism be? In the making of a new community we must know a great deal more about our past. One of the horrors of American historiography is that we stopped looking 20 or 25 years ago at how ethnic groups were developing in American life.

So we have a tremendous gap in knowledge. My suggestion, Senator Schweiker, is that either in this bill or perhaps in another bill that your committee is considering, the National Institute on Education Act, or in amendments to our basic education acts, that we seek to incorporate the subject of ethnicity as an important organizing subject of American life. And make allowances for appropriate financing of investigations into this factor.

In addition to answer such vexing questions as "what is education and how does one educate?" We have recently correctly adopted through congressional action the need for bilingualism among certain minority groups who claim educational disfunction in conventional models. Similarly we may soon learn that it may be more basic to how people learn that we now know that to deal more positively with their self-identity and to deal with their ethnic identity is tremendously imporant in learning effectiveness.

So I recomend that thought be given to the possibility of a more embracing amendment which would open up possibilities beyond the $20 million in the Ethnic Heritage Studies Act—which I think is the beginning minimal point.

For example, in the National Institute of Education bill you assert the goal to deepen America's scientific and technological knowledge.

I agree with that, but unless we also deepen America's understanding of itself, and its intergroup relations, we will really not be able to prosper technologically, because we will be killing each other off with intergroup squabbles.

Senator SCHEIKER. We appreciate your remarks, and we value them.

Now, Mr. Velarde, if you would like to put closing remarks in the record.

Mr. VELARDE. Thank you, Senator. In reading your own opening statement and the new release and hearing what has been said this morning, I believe it boils down to the two essential words "pride," and "awareness."

You can take whatever words you want, but as you develop awareness and pride in your own self, you automatically gain values that are projected into the unity and the total community.

I have seen this in my area, for instance, due to this bilingual education act, where a child learns a subject, learns about oneself, through the language that he best understands, this understanding idea, and then from having an understanding he is able later to communicate his ideas with others.

In my type of work, for instance, dealing with the migrant, the farm migrant, the industrial migrant, with the newly arrived immigrant, with the Mexican-American community as a whole, I find that over the last 5 years when a person develops this pride and awareness, he no longer comes into my office and says, "I want to become a U.S. citizen because I can gain a better job because of it."

He now is coming in and saying, "I want to become a citizen because I want to become involved."

He knows that by getting involved he partakes in our political system, being able to vote, to voice a choice.

He is no longer a second-class citizen. As he develops this awareness, he gains knowledge of the issues. He begins to participate. Then he starts to interchange and cooperate with others within the community, and I have found that over the last 4 or 5 years in our own city this awareness has made our city a better place to live in.

Of course, our city is quite unique in that right across the border we have a twin city, and the interchange, the interdependence of the people from one culture to the other adds to the betterment of the people especially on our side of the border.

I grew up with Syrians, with Jewish fellows, with Mexican-Americans. When I went to college at UTEP there in El Paso, one of my best friends was the first basketball player that ever played in the Texas system who was colored.

I learned about them, their background, their heritage, and found out that the similarities between all these people were very much alike, and what you read about other people is not automatically true and you then interchange ideas.

This idea of the heritage centers is a tremendous step forward, and I compliment you and the Senators who have sponsored this bill, and hope that very soon we will realize the centers in actual work, and I compliment also the other panel members for their support here today.

Thank you.

Senator SCHWEIKER. Thank you very much. I am very deeply indebted to all of you for your help and participation, and I am sure the subcommittee and the subcommittee chairman would want me to say that we will continue to consult with you as the legislation unfolds.

We appreciate your participation here today. Thank you very much.

We have now another panel, if they will come forward, please, panel No. 2.

STATEMENT OF A PANEL COMPOSED OF JOHN BUONCRISTIANI, URBAN PLANNING OFFICE, BOSTON, MASS.; DR. JAIPAUL, DIRECTOR, NATIONAL COMMUNITY RACE RELATIONS PROGRAM, NATIONALITIES SERVICE CENTER, PHILADELPHIA, PA.; FATHER JOSEPH KUBIK, DIRECTOR, POLISH DAILY NEWS, DETROIT, MICH.; COL. CASIMIR LENARD, DIRECTOR, POLISH AMERICAN CONGRESS, WASHINGTON, D.C.; AND PHILIP J. RUFFO, DEPUTY DIRECTOR OF COLLECTIVE BARGAINING, CITY OF NEW YORK, N.Y.

Senator SCHWEIKER. I wonder if we could identify, starting with Mr. Ruffo, on the right, and who you represent, so that the reporter may have that, and then we will proceed.

Mr. RUFFO. My name is Philip J. Ruffo. I am from New York City and represent the Congress of Italian-American Organizations.

Mr. JAIPAUL. I am Dr. Jaipaul, director of the Nationality Community Race Relations Program of Nationalties Service Center, Philadelphia. Pa.

Colonel LENARD. I am Col. Casimir Lenard, director of the Polish American Congress, Washington, D.C.

Mr. BUONCRISTIANI. I am John Buoncristiani, of the Urban Planning Office, Boston, Mass.

Father KUBIK. Father Joseph Kubik, Director of the Polish Daily News, Detroit, Mich.

Senator SCHWEIKER. I assume most of you will have statements you want to submit, but because of our time factor we will go back in the same order and maybe ask for your informal comments or anything you want to underscore or emphasize.

We would be glad to get at this time, and we will start again with Mr. Ruffo and go right down the panel.

Mr. RUFFO. Once again, my name is Philip J. Ruffo. I am a resident of Brooklyn, N.Y. At the present time, I am fully occupied as the deputy director and general counsel of the New York City Office of Collective Bargaining, though I think it appropriate to emphasize that my presence here this morning is not in any way associated with any governmental agency, or that my views reflect the views of any governmental agency.

I say this not to be cautious, but to be accurate. My appearance before this committee is to express support for S. 23, which is a bill to provide a program to improve the opportunity for study of cultural heritage of all ethnic groups in the Nation.

In this connection I would like the record to note that I speak in behalf of, as I stated previously, the Congress of Italian-American organizations, known by its acronym, CIAO.

CIAO is an umbrella organization consisting of some 32 affiliates. In addition, it maintains a very close liasion with other Italo-American organizations, such as the various Columbian Associations whose members are employed in the government service, and Order of the Sons of Italy, and other fraternal organizations.

We have talked to the various organizations constituting a cross section of the New York City Italo-American community, and I may say that what I express here today reflects in an overwhelming degree

the thoughts and sentiments of the grass roots Italo-American community in New York City.

Undoubtedly, the bill reflects what I believe is the advent of the ethnic age, a phenomenon that is peculiar and indigenous to the American sociological scene.

The bill seeks to foster the study of ethnic cultures and heritage. There is a need for the kind of study contemplated by the bill. Ethnicity, as a sociological force, whose emphasis is focused on rivalry and competition, is debilitating and enervating, therefore tending to generate hostility among ethnic groups.

On the other hand, ethnicity when placed in a proper commonity perspective, with a twin emphasis on self-identity and the recognition that the other fellow also has an identity that requires respect, is constructive and workable.

Thus the objective of the bill is neither illusory nor an idle dream, but rather sets its sights on realistic goals capable of achievement within the next decade.

Indeed, it may very well be that our survival as a Nation makes it imperative that we begin to understand each other. This is true not only of individuals, but of all ethnic blocks. In this respect, it has been said that the dangers a nation faces are not from without its borders, but from within. I submit to you that in this particular respect our work is cut out—the blending of ethnic blocks in an American mosaic where diversity in identity and unity in purpose exist side by side. The recent disturbance in a major American city—Newark—demonstrates the imperative need for this kind of a mosaic blend.

I may, parenthetically, add that there is an organization, Senator, now actively functioning within the New York City known as the Center for Migration Studies, and in a large measure is engaged in the kind of activity contemplated by S. 23.

I would like in that respect to indicate by some visible and concrete evidence the kind of work that the Center for Migration Studies is doing at the present time.

I hold in my right hand a textbook known as "The Italian Experience in the United States." It is authored by Silvano Tomassi and Madeline H. Engel.

I would like to, Senator, for the record, merely read some of the chapters that this text deals with. Incidentally, the text has been officially adopted by the regents of the State of New York, and will soon be in use in institutions of higher learning.

Senator SCHWEIKER. What is the name of the book again?

Mr. RUFFO. "The Italian Experience in the United States." It will soon be in use in higher institutions of learning in New York State.

Here are some of the subjects. "Italian immigrants in the United States in the 1960's."

"Italians in urban America."

"Institutional Ties of Italo-Americans, some case illustrations."

"Italians in organized labor in the United States and Argentina."

"The role of the Public School in the Assimilation of the Italian."

Now, this, I submit to you, Senator, is the kind of work that, as I stated previously, I believe your bill contemplates or should contemplate. This is the kind of work, the kind of reference and source material that I think would be a boon in promoting the principle and objective of ethnicity.

Another text published by the Center for Migration Studies, indicative of its versatility, is known as "The International Migration Review" and I shall not read all of the articles it deals with, or the subject matters, but merely mention one by way of illustration, "Survival of the Village in Urban America, A Note on Czech Immigrants in Chicago 1914."

I would like, in conclusion, to note that the establishment of the center for migration was anticipatory, and hopeful that a bill such as S. 23 would attract congressional attention.

It appears such a day is at hand. S. 23 should be made the law of the land. Thank you.

Senator SCHWEIKER. Thank you very much. I do want to say for the benefit of the people attending here that this panel is by and large selected from various groups in various parts of the country.

We tried to pick not exactly a representative sample, but some sprinkling of the problem from different areas and cities. We will now hear from Philadelphia; Dr. Jaipual, would you go ahead with your summary of remarks?

Dr. JAIPUAL. First, I want to thank you, Senator Schweiker, and Chairman Pell for inviting me to testify before this committee.

I appreciate very much for this opportunity to testify on S. 23, a bill of great importance and interest to me and the Nationalities Service Center of Philadelphia.

It is important to us because it can make a real contribution to bringing about unity in diversity of America. It is of interest to us because our center, as one of the 38 affiliate agencies of the American Council for Nationalities Service, works primarily with urban ethnic groups to assist them in becoming part of the mainstream of American life.

A major objective of our national movement is to promote American unity by developing understanding and closer association among different ethnic, social, and religious groups in the community.

The proposed bill suggests "the value of ethnicity." Therefore, my comments will focus on this supposition and illustrate its social, political, and economic implications. Further, I will try to develop a general framework for ethnic studies.

Diversity is in the roots of America. We are proud of the fact that America is a pluralistic society made up of multinational, multiracial, and multireligious people. Clearly, multiethnic composition of our society makes us unique in the world.

Historically, therefore, ethnicity is not a new phenomenon and we would be justified to claim that America is a land where differences are accepted and allowed to flourish. But even a superficial study of American history shows that this has hardly been the case.

Generations of Americans have been brought up on the idea that all immigrants must shed their "foreigness" in order to become "true Americans"—which probably meant White Anglo-Saxon Protestants.

Somehow, all Americans were supposed to be the same. Differences were illegitimate, un-American. In other words, economic and social success was to be achieved by being all American, by absolutely assimilating into the pot of American sameness.

Quite simply, we have an ambivalent attitude toward differences. On one hand, we profess to be a nation built on differences; on the other

hand, we have actively suppressed differences. Much of this ambivalence stems from the "great melting pot" theory.

In their effort to achieve a meaningful identity, the Black Americans were the first to stand up and proclaim that it is a positive value to be different. "Black is beautiful" demonstrates that they recognize and are proud of their cultural heritage, and demand respect for it.

This forthright stand has helped kindle and awaken a quest for cultural and ethnic identity in many of America's ethnic people. The customs that they partly disregarded are now being reclaimed with pride. They are demanding and creating through their actions a new definition of what it means to be an American; a definition that includes the ethnic American, his experiences and ways of life.

This quest for ethnic identity long suppressed has now surfaced with a force which makes it impossible and probably unwise to stop it. A large population of Americans are increasingly seeking opportunities to learn about their respective cultures and histories. They want to see their cultural heritages respected and given the chance to further flourish and develop. They are also insisting on being given their place in the history of the development of this Nation and demanding that any stigma of "un-American" be removed from their culture and its manifestations. Ethnicity is now a fact of American life.

In my opinion, addressing oneself to "the value of ethnicity" is rather like talking on a topic such as the "The Worth of Personality." There is no convenient starting point. Perhaps a more feasible consideration is one of the "potential value of ethnicity," for in itself, mere ethnicity is neither a positive nor a negative phenomenon. It can serve either constructive or destructive ends.

Depending on the degree to which we romanticize the benefits of immersing ourselves in a "cultural heritage," ethnicity, or more appropriately, "ethnic identity," may be a cohesive social force necessary to the survival of a particular minority group in a larger society; or it may generate different appreciation leading to mutual understanding among different groups; or it may be a vicious kind of ethnocentrism, preserving the cultural integrity of one group at the expense of another; or it may be simply a luxury of culturally anglicized nominal ethics.

We know ethnicity exists, and with all these options the question arises, how are we going to deal with it?

Whether ethnicity becomes a positive progressive and unifying social force for our Nation or a destructive polarizing violent phenomenon depends on us.

There is a lesson for us to learn from history. For years no one knew what to do with the black race. Not knowing what to do, most people and institutions did nothing. The result of this inertia and insensitivity is evident today in the dramatic confrontation which continues between black and whit Americans. Clearly, American ethnicity once again poses for us a similar but more complex situation. Thus ethnicity both in the past and present has been a major source of social conflict.

We cannot afford to let history repeat itself. We must ask ourselves the hard questions. Are we really a pluralistic society? Can we live in such a way that different cultures are allowed to flourish and con-

tribute to a harmonious ensemble of peoples living and working together for their good and the good of mankind?

Still there is a more fundamental question: Given a society with a multireligious, multinational, multicultural, and multiracial population, how does one minimize the social conflict and at the same time increase the awareness of the riches of ethnic diversity?

An answer lies in utilizing education as an instrument of change and growth. When the riches of a heritage are forgotten, so too is a clear understanding of the political struggles associated with the efforts at their preservation. There is then no possibility for a respectful empathy with other minorities presently facing similar situations. If a Polish-American worker, so imbued with the American version of the melting pot, feels embarrassed participating in the traditional folk dances, he is not likely to look kindly at black Americans resurrecting an African dance.

"Know first thyself" must be our primal dictum. That is, one must first have a well informed respect—this is not to condone enthnocentric chauvinism—for his own heritage—his own ethnic identity—before he can be appreciative of and respectful toward the heritages of others. Ethnic education, then, must first concentrate on providing individuals with a sense of identity of which they can be rightfully proud. Secondly, the contributions of all people that have made up this country must be explored. The struggles of both voluntary and involuntary immigrants and black, brown, and white people can at once illustrate the vast differences and great similarities of all peoples. This will give understanding of the past as well as an appreciation of the backgrounds of others. Therefore, mutual understanding will be effected through self-identification and difference appreciation, and the American way of life will be studied as the American ways of life.

The foregoing is my experience from the Nationalities Service Center's program. We are working in several directions which have a common link and are interdependent. Over one-half of the population of our city, according to census, is identified with one or another ethnic group. If we add this to the black and Puerto Rican population, the total ethnic population is well over 75 percent. Ethnic group identity plays an important role in conflict situations. Mutual misunderstanding and resentment can work to turn ethnicity into an attitude of hostile ethnocentrism, thereby worsening the problem. It is this attitude which is the most important single element in any tension or conflict situation. Our concern has always been to become part of problem-solving processes in such situations.

COMMUNITY PROGRAMS

We have organized a consortium, called the Committee on Ethnic Affairs, of various representatives of interested nationality organizations and concerned ethnic people. The process of identifying and developing relationships with the leaders of various ethnic groupings is a long and difficult one—but quite rewarding.

This committee, for instance, has played an important role in developing an "ethnic newsletter." This newsletter Ethnic Philadelphia deals with issues related to ethnic affairs. It serves as a clearing house of information concerning the organizations, activities and cultural

affairs of all ethnic groups in Philadelphia and the Delaware Valley.

The following comment from the editor of the publication of the Polish Heritage Society of Philadelphia gives some idea of the value and importance of Ethnic Philadelphia to ethnic groups themselves:

Thank you for volume 1, No. 3 copy of Ethnic Philadelphia, which I found exceedingly interesting. It appears that 1971 is the year for ethnic organs in the Philadelphia area, for the Polish Heritage Society of Philadelphia just published Vol. 1, No. 4 of the Heritage Herald, a copy of which is enclosed for your information.

Ethnic Philadelphia, seems to be a much more ambitious undertaking, much larger in scope than our Herald, which is more or less confined to the affairs of the Polish Community, especially as it impinges on the Polish Heritage Society of Philadelphia. Your publication seems to be the result of great painstaking and is very well put together. Would you permit us to extract from it from time to time items which we feel might be of interest to our readers? We would of course extend the same courtesy to you.

The Committee on Ethnic Affairs has, moreover, cooperated and assisted us in our youth-in-schools program mentioned below. It is important to note that this Committee of Ethnic People has expressed an active interest in the whole idea of Ethnic Heritage Studies Centers.

Recently, the Nationalities Service Center has established El Centro, a neighborhood service center in a section of north Philadelphia which has a concentration of Puerto Ricans.

The primary purpose of this service instrumentality is to enhance the competence of the community group to solve its own problems and bring services closer to the community members. The basic reason for establishing El Centro is to be sensitive to cultural differences, language and social barriers Puerto Ricans experience.

YOUTH-IN-SCHOOL PROGRAM 1969–70

The second area of our work is our program with youth in school. These programs combine the difference appreciation and self-identification models in curriculums designed to increase the awareness of human worth in all situations and in all people. This combination avoids the often encountered pitfall of reducing prejudice at the expense of self-respect.

Education, as we know, is an instrument of change, growth, and development, and we are consciously using it as such. The combined goals of our school programs are as follows:

1. To effect a common educational experience about different cultures and sensitize the participants to the values and histories of cultures other than their own;
2. To improve intergroup understanding through learning and to make education more relevant;
3. To establish positive channels of communication;
4. To instill self-identification which gives confidence and a feeling of security and equality;
5. To develop an intelligent appreciation of cultural differences and the realization of the influences of the traditions which formed this country;
6. To promote the realization that "different" does not mean "inferior";

7. To encourage an appreciation of the contributions of the various cultures and peoples which make up the United States of America.

Hopefully, an intelligent attitude on the parts of both students and parents in dealing with all cases of difference will result. Greater human understanding will thus lead to better human relations in our community.

During the academic year 1969–70, we launched an experimental program in attitudinal change in intergroup relations, involving two multiethnic, multiracial 10th grade classes—one from William Penn High School (public), and one from John W. Hallahan High School (parochial).

These classes were paired together for a course in comparative world cultures. A summer institute (August 1969) involving students and teachers from these schools and Nationality Community Race Relations staff resulted in the development of an innovative curriculum which emphasizes a comparative approach to cultural systems and implements factual content through liberal use of audiovisual material, human resources (this includes both indigenous representatives of other culture groups and professional social scientists specializing in studies of the area under consideration) and miscellaneous materials from embassies, our own State Department, libraries, etc.

Local ethnic communities were intensively involved at every turn. Their contributions ranged from academic analyses of social structure to expert tortilla making.

These special methods of instruction were employed when the classes met together 1 day every week at Nationalities Service Center. The class at Nationalities Service Center was discussed and evaluated at a joint meeting the following day either at Hallahan or William Penn. This left 3 days per week for "traditional" classroom instruction in their respective schools. But, needless to say, the excitement of the 2 "special" days carried over into the classroom. Dialog amongst the students, their teachers and nationality community race relations program staff was always encouraged, and reached its peak during "Dialog Day," a special day of retreat conducted jointly by our staff with the staff of the Office of Community Affairs of the Philadelphia School District.

At the elementary school level, two fifth grade classes in South Philadelphia—one each from Abigail Vare (public) and Sacred Heart (parochial)—were involved in a course of study of the ethnic groups represented by the students themselves. This included Jewish, Scotch, Irish, German, Italian, Afro-American, and Puerto Rican groups. Resource persons were found among the students' parents, whose contributions, along with the support and assistance of the two school systems, city's commission on human relations and cardinal's commission on human relations, helped to make this course in American ethnic heritage studies a success.

The impact of both of our programs has been felt at various levels. We are instrumental in generating processes of institutional change in both the Philadelphia school systems. We have brought both school systems together, encouraged and assisted them to apply their resources jointly in developing new curriculums; these curriculums are designed for solving community problems. Both systems jointly with us are implementing these curriculums on a collaborative basis in 14 schools.

Our program has also been cited as a smooth and successful effort in integration.

Youth-in-schools programs expanded, 1970–71:

With the foregoing as experience and to serve youth and deal with the problems of difference, we have expanded our joint social studies program several times. The project for the current school year involves 14 schools and the program is now offered at the elementary, junior high, and senior high levels.

The participating fifth graders are studing "American ethnic heritage." A "comparative world cultures" course is designed for the ninth and 10th grades. The 12th graders are pursuing a course on "ethnic groups and social change."

We have paired a fifth-grade class of Abigail Vare Elementary School with one from Sacred Heart Elementary School and have formed a similar pair with classes from St. Thomas Aquinas Elementary School and G. W. Childs Community School. Fifth graders from these schools are studying American history from the viewpoint of the various ethnic and racial groups which have contributed toward, and are part of, our American culture.

The particular ethnic and racial groups selected for study were those represented by the various members of the classes in the program as well as other ethnic groups which are located in the community around the school. This is a study of ethnic history as an instrument of finding self-identity.

In our high school "Comparative world cultures" program the participating schools include William Penn High School, John W. Hallahan High School for Girls, and South Philadelphia High School, Bishop Neumann High School, Benjamin Franklin High School, and Roman Catholic High School.

In this course a set of common values that prevail in most cultures are identified. Instead of following all aspects of each culture before moving on to the next, the students compare each value in all the cultures under study. The traditional text books are replaced with monographs.

The classroom teaching is supplemented with outside seminars and with indigenous speakers from various cultures.

The course in ethnic groups and social change in the United States, pursued by the 12th graders from West Catholic High School for Boys and West Philadelphia High School, includes the study of the history of Afro-Americans, Irish-Americans, Italian-Americans, and Jewish-Americans. The students explore those things that divide and unite different Americans.

America's numerous ethnic groups have been a significant force in attempting to make the words of the Declaration of Independence come true for all. It is necessary, therefore, that the students learn more of the history and experience of ethnic groups in America.

Each group can learn from the struggle of the others. From this process of learning, the student will begin to understand the differences and discover that to be different is neither "superior" nor "inferior," it is only different.

The common goals set forth for these courses are:

1. To make education more relevant for the students;
2. To seek and test new approaches to curriculum;
3. To improve relations between people of varying backgrounds.

This program was planned during the summer of 1979. Nationalities Service center organized a curriculum development and teacher training institute as a part of a larger social studies institute offered by the instructional services department of the school district of Philadelphia. The nationality community race relations program staff conducted this institute. In addition to the teachers from the participating schools, student representatives were also involved in the summer institute.

We planned two additional components to this program. We are collecting data from the lectures of guest speakers and the discussions in special seminars. In addition, we are receiving written materials from the teachers participating in the program. We had hoped that by the end of the year we shall have enough data to develop some formal educational materials for future use in schools. During this school year we were to develop additional teacher training institutes for the teachers participating in the current program, along with other social studies teachers drawn from the two school systems. This would have assured a cadre of trained teachers for next year's program. But due to lack of funds, we have not been able to implement these two phases of the program.

During the summer we provide an ethnic culture component to a day camp program in a black community. We arrange demonstrations of different ethnic arts and crafts for the children at the camp giving them a chance to see, appreciate, and understand several cultures different from their own. This program has likewise been very beneficial in helping the white ethnics better understand the culture of their black brothers.

It is evident that education is fundamental to the recognition and promotion of cultural diversity. If recognition is to be given to the histories and cultures of the various ethnic groups in our country, historical research must be done to get at the true facts. American history must be examined anew. Research must result in publication and teaching if it is not to remain sterile. The process of discovering and disseminating the truth in regard to ethnic heritage affairs is fundamental both to the different ethnic groups themselves and to Americans as a whole if true recognition is to be paid to ethnicity.

Discovering and disseminating knowledge is, moreover, one of the most powerful means of promoting ethnic heritage and culture. There exist other means, of course, which must be utilized, but education still remains fundamental.

The fact that this educational process should be fostered by a series of centers or focal points is crucial. The notion of "center" implies a focal point where mutual assistance and cooperation take place. Besides the obvious advantage of efficiency, this mutual cooperation can help to overcome the obvious potential danger of ethnicity—polarization. Already, various ethnic groups are individually engaged in this process. The proposed centers could also serve as integrating forces for the efforts of these groups. The ultimate goal of each group to maintain its own identity, to respect and be respected by others must be present in some way right from the start.

Ethnics and all Americans must realize that the quest for ethnic identity is a mutual venture enriching one and all alike only if one and

all are treated with the same respect, allowed the same opportunity to become and to be themselves.

There is no better way to learn this than to cooperate right from the start. It is not a question of competing for a prize which can be possessed by only one. This is a unique race. If only one or several finish the race they have gained nothing. Only if all finish together is there a prize. The notion of ethnic heritage studies centers is a step in the direction which ethnic revival must take if it is to benefit America.

Before I suggest general format and functions of the proposed centers, my preference would be that these centers be ethnic heritage affairs centers and not merely studies centers.

While comparing Congressman Pucinski's H.R. 14910 to Senator Schweiker's S. 23, I note that the former amends the Elementary and Secondary Act of 1965 while the latter amends the Higher Education Act of 1965.

My question is how this will affect the actual intent of bill S. 23 in promoting ethnicity at the grassroots level involving elementary and secondary schools, voluntary social agencies working with ethnic communities, and the ethnic groups themselves. It is my understanding that H.R. 14910 provides for grassroots participation as defined above whereas S. 23 may lead to ethnic studies becoming institutionalized in impersonal centers of higher education.

I hope the issues that I have raised above can be clarified to insure the participation of ethnic communities, voluntary agencies, cultural centers, et cetera, in developing programs in ethnic studies and affairs.

General functions:

I. Discovery.

1. Scholarly research: Inaccuracies, imbalance and serious lacunae pervade the present histories of ethnic groups and treatises about their cultural heritage. Serious research is required to unearth the hard core data which are fundamental to authentic treatises of ethnic history and culture. The Center will promote, support, and encourage research in this area. It will also call upon and draw from the research facilities and personnel of local colleges and universities.

2. Central depository of materials: The wealth of materials pertaining to ethnic cultural heritage which already exists and those materials which are developed in the future need to be brought together in a central place for them to be accessible. Even more important is the creation of a central catalog which would list, describe and give the location of all materials pertinent to ethnic heritage affairs which cannot be located at the Center. Besides material resources, all persons proficient in this area should be cataloged for easy reference.

II. Dissemination:

1. Publication of materials. In order that research does not remain sterile, it must issue in publications. These publications would cover a wide range from monographs on particular points to elementary text-

books and popularized presentations for mass public consumption. The writing of theses and the preparation of journalistic articles would be encouraged and facilitated. The development of audiovisual materials would go hand in hand with written publications. The latest methods of communication must be employed in utilizing the discoveries of research.

2. Specific curriculum development: The use of developed materials in school situations requires careful planning if they are to be utilized profitably. The subjects of history, geography, economy, literature, art, music, drama, language, sociology, etc. will be reviewed to see how the notion of ethnic heritage should be incorporated. This will take place at all levels, elementary through university. The expertise of curriculum specialists will be employed to come to grips with this gigantic problem. Imagination and initiative will be employed to make the best possible use of written and multimedia materials in curriculum.

   A. Teacher training: Textbooks may be written and new curriculum approaches developed, but the success of any school program depends ultimately on the teachers involved. The center will make available to teachers an ongoing teacher training and development program.

   B. Adult education: Programs will be developed that reach out to all those beyond the school age. American adult citizens need constant education regarding the development of the concept of ethnic heritage affairs in order that they may better understand and appreciate ethnicity and not feel threatened by it. The center would reach some adults by actively involving them along with their children in the school programs. Other programs would be devised to reach out to a broader segment of the community.

   C. Language promotion: Language and culture are intimately connected. Any study or promotion of culture should not lose sight of this. The center will develop programs to insure that the relationship of languages to each other and their contributions to various cultures are better understood. Languages will be preserved, studied, taught and utilized as inseparable components of culture.

3. Cultural displays and exchanges:

A. Museum displays: The center will seek to motivate and assist existing museums to collect and display works of art, artifacts, and realia, etc., which pertain to various ethnic groups, their culture and their contributions to America. The center would have its own displays, seeking to set up constantly changing shows around a permanent collection of materials.

B. Living arts: The center would provide an opportunity for festivals, pageants, drama, folk dances, musical concerts, and so forth. Experience has shown that these living art productions and cultural exchanges are highly effective in promoting better understanding among different peoples.

III. Application.

1. Service Models: The center would apply required knowledge and know-how to the development of models for the delivery of human services for ethnic communities and peoples. Too often these ethnic communities do not or cannot avail themselves of, or profit from, the services which are due to them. The Center would work with these communities to bring both public and voluntary services closer to people in order to help them enjoy a fuller human life of respect and dignity.

2. Institutes: The Center would conduct training and refresher institutes for community leaders, human service professionals, and others who work in ethnic communities. These institutes would be aimed at sensitizing these persons to different ethnic values, thereby enhancing the value and effectiveness of their service.

3. Community problem solving: Many of the pressing issues which face various ethnic communities are the same. Poverty, for instance, is an obvious example of a problem common to many urban ethnic groups. What is not so obvious, however, is the fact that the reactions of these groups to this common problem are quite dissimilar. Because of their different histories and cultures, various ethnic groups respond differently to the same issue. Many problem-solving theories and mechanisms have failed by not recognizing this element of diversity. The Ethnic Heritage Affairs Center will provide consulation and know-how to help agencies and communities understand these different approaches and responsed to similar issues. This service will greatly benefit the community as a whole as well as the individual ethnic groups.

In conclusion, I must urge this committee to move for the passage of this bill to enable America to realize the full potential of the riches of our multiethnic society.

Also I wish to draw the attention of the committee to my testimony before Congressman Pucinski's committee, where the fifth graders, their teachers and mothers, the 10th graders, their teachers, school principals, the representatives of various ethnic communities and the two school systems came along with me to testify to really show what the study of ethnicity can do to improve relationships between and among peoples of varying backgrounds.

My specific suggestions are two: first, that the establishment of these centers should be on a regional basis; and second, that they should have a kind of tripartite function as described earlier. We need to use rather apply the acquired knowledge to develop human services models that would be sensitive to the values of different ethnic people.

In other words, what I am saying is that the value of the ethnicity is not only to find identity, or that it raises the whole question of whether ethnicity has to restrict itself to the history or self-identification, but I am saying that it is also related to all of the human service professions.

Having suggested this, I repeat my question, Senator, that how by amending the Higher Education Act of 1965, your bill S. 23 will help to promote ethnicity at the grassroots level involving elementary and secondary schools, voluntary social and educational agencies working with ethnic groups and the overall community, and the ethnic groups themselves?

It is my understanding that Congressman Pucinski's bill provides for such participation; whereas, S. 23 may lead to ethnic studies being frozen and institutionalized in the impersonal centers of higher education. I hope my misgivings and fears can be alleviated by you. Thank you.

Senator SCHWEIKER. I think we are dealing here with a vehicle. In the legislative trade, you have to look for the most immediate vehicle and I think that vehicle whatever it might be, does not necessarily ultimately define the scope or the operations of the program.

Because we are now holding hearings under the chairman's leadership here in this particular area, which my bill would be pertinent to, it gets a priority. If we addressed it to another phase of the problem, it gets a lower priority. It is a matter of legislative priorities, and it does not connote particularly how it would be implemented or administered or carried forward. This would be first defined by the subsequent amendments that we would put in the language, and second by the report of the committee.

So it is really a technicality in terms of high priority in the Congress.

Dr. JAIPAUL. Thank you.

Senator SCHWEIKER. Thank you very much. Now we will call on Colonel Leonard, director of the Polish American Congress, who will give his remarks.

STATEMENT OF CASIMIR I. LEONARD, EXECUTIVE DIRECTOR, POLISH-AMERICAN CONGRESS, INC.

Colonel LEONARD. My name is Casimir Leonard.

Mr. Chairman, and members of the Senate Subcommittee on Education, thank you for giving me the opportunity of appearing here today in support of S. 23, the Ethnic Heritage Studies Center Act of 1971.

My name is Casimir I. Leonard. I am the executive director of the Polish American Congress, which represents over 12 million Americans of Polish descent.

The Polish American Congress concerns itself with the welfare of Americans of Polish extraction in political, national, religious, social, and economic matters.

The PAC's purpose is to give complete support to the Government of the United States and to unify actions of persons of Polish descent in the United States within the lawful limit of their rights and duties as citizens or residents of this country.

Senate bill 23, introduced in this Congress by Senator Schwieker of Pennsylvania, is legislation of the utmost interest to these 12 million people—it means that the youth of the Polonia can avail themselves of knowing more of their heritage and background.

Too long a time has elapsed for many of these young people to realize the cultural achievements of their ancestors, and to be able to maintain pride in their beginnings.

The youth of Polonia has a sincere desire to be good Americans and on many occasions has presented itself in upholding all that is good in America. By fully developing strong ties with their background, they can more easily enter the mainstream of American life. To be proud of one's background is a glorious thing, to be ashamed is quite another matter. Unless the young people of this country are made aware of prideful accomplishments of their forefathers, sheer ignorance could make them shameful.

The Ethnic Studies Center bill is a giant step in the direction of making knowledgeable and proud ciitzens. If we are to have future generations take their places among the leaders of the United States, much must be done to make them fully aware of all that has gone before.

Though the study of history, literature, music, drama and language and general culture of their country of origin, these young people will be enriched and more equipped to be leaders.

I would like to state at this time that the Polish American community has always expressed and shown an interest in matters pertaining to study and maintenance of their ethnic heritage. It is only in the last 15 or 20 years that because of economic and social conditions, these centers of Polish ethnic education; that is, parochial schools have been disturbed and have not been able to pursue this course.

This is why we strongly recommend and support H.R. 14910, legislation introduced in the House by Representative Roman Pucinski. Representatives of our community testified at the House hearings.

I ask at this time the opportunity to state that I have been given authority to express these identical views on the part of the Lithuanian American Committee of the United States, Inc.

Once again, thank you for letting me express these views. I am hopeful that these hearings will culminate in the approval and implementation of these study centers. I also ask permission to submit additional material in writing at a later date.

Senator SCHWEIKER. Thank you very much, Colonel Leonard. We are delighted to get additional material.

Just check with the committee staff on the timing to include it in the committee report.

Saint Mary's College
Orchard Lake, Michigan

THE ORCHARD LAKE TESTIMONY
IN BEHALF OF
THE ETHNIC HERITAGE STUDIES CENTERS BILL

PART I -- ETHNIC HERITAGE STUDIES -- A RATIONALE

A. The American Dream
B. A Time of National Crisis
C. Rootless Youth in Our Society
D. Language Provincialism
E. Deification of Technology
F. Education in Cultural Pluralism
G. The Reality of Diversity
H. The Orchard Lake Schools' Ethnic Tradition

PART II -- POLISH AMERICAN ETHNIC STUDIES -- THE ORCHARD LAKE PLAN

A. History of the Orchard Lake Schools
B. Academic Institutions
C. Research Centers
D. What Orchard Lake Has Done:

1. Development of Language Curriculum Materials:

a. Present Polish Curriculum
b. Polish Language and Heritage Program (FLICS)
c. Language Laboratory
d. Polish Room
e. Polish and Polish American Books
f. Library and Archives
g. Art Gallery
h. Museum
i. Artists-in-Residence

2. Training Programs and Workshops:

a. Workshops on Cultural Pluralism
b. Conference on Racial Prejudice
c. Summer Abroad 1970 Program

3. Research:

a. Polish Language Teaching in the United States
b. Polish Language Usage in Religious Services
c. Research in Polish and Polish American Topics
d. Historical Research -- Founder's Day Symposia
e. Visiting Artists and Scholars
f. Professional Contact with Poland

4. Polish American Public Relations:

a. Polish-Jewish Relations
b. Polish-Black Relations
c. Polish-Canadian Relations

E. What Orchard Lake Plans To Do:

1. Development of Language Curriculum Materials:

a. Distribution of FLICS Program
b. Translation and Publication of Books
c. Films and Filmstrips

2. Training Programs and Workshops:

a. Summer Workshops
b. Summer Sessions
c. Adult Education Classes
d. Seminars and Lectures

3. Sociological Research

4. Polish American Public Relations:

a. Orchard Lake: Focal Point for Organization
b. General Information Center
c. Bi-Lingual Radio Program

F. Conclusion

THE ORCHARD LAKE TESTIMONY IN BEHALF OF S. 23 -- ETHNIC HERITAGE STUDIES CENTERS

Presented to the Education Subcommittee on
Labor and Public Welfare
United States Senate
Washington, D.C.

PART I-- ETHNIC HERITAGE STUDIES -- A RATIONALE

The American Dream

A profound and disturbing change has somehow taken place in America. It is impossible to pinpoint the exact time and place, but somehow, somewhere, imperceptibly, the American dream has become a nightmare. The disappointment is felt all the more keenly because the expectations were so very high. I had to visit a peasant village in Eastern Europe, surrounded by the vestiges of a monstrous war, to begin to understand the meaning of the word "America." It was in the eyes of a gnarled and weathered man, who easily betrayed his experience of humanity's suffering, wherein lay the mystery of the word. It was hope. It was hope that several million years of evolution have taught us how to live together in peace with one another. Nothing is quite as bitter as hope betrayed.

The hope in America was consistently proclaimed by men of vision, men gifted with the ability to verbalize the innermost longing of the human heart. Washington, Jefferson, Adams, were among the first. As early as 1782, Michel de Crevecoeur, in his Letters from an American Farmer, called the American the "new Adam." "Here," he said, "individuals of all nations are meted into a new race of men, whose labours and posterity will one day cause great changes in the world." Walt Whitman carried the American dream into the 19th century. And in

1908, Israel Zangwill, a Jewish immigrant, gave it almost religious meaning:

> America is God's Crucible, the great Melting Pot where all races of Europe are merging and reforming . . . Germans and Frenchmen, Irishmen and Englishmen, Jews and Russians -- into the Crucible with you all! God is making the American!

In our century Archibald Macleish wrote:

> America is a symbol of union because it is also a symbol of differences, and it will endure not because its deserts and seacoasts and forests and bayous and dead volcanoes are one mind, but because they are of several minds and are nevertheless together. . . . It is where the sand and the marsh and the rock and the grass and the great trees of the eternal wind compose the frontiers of diversity that there is greatness.

Mankind's one great hope was described by F. Scott Fitzgerald in The Great Gatsby as "the last and greatest of all human dreams." And he added:

> . . . for a transitory enchanted moment man must have held his breath in the presence of this continent, compelled into an aesthetic contemplation he neither understood nor desired, face to face for the last time in history with something commensurate to this capacity for wonder.

A Time of National Crisis

It is precisely because so much was expected from this country that the disappointment in its failure has been so traumatic. The streets that were to flow with milk and honey are now blocked by the rubble of the latest demonstration or riot. Our embassies, heretofore the concretization of the dream, have been burned, and our representatives, the living witnesses to the dream, have been stoned and mocked. Some of our greatest leaders have been shot down in an orgy of violence.

America is in a time of crisis, the winter of its discontent. And we search for the structure of a spring we hope will come. The greatness of a nation does not depend upon its military or economic strength; our experience of history should have taught us that. Greatness depends upon the concept of man we are

able to institutionalize in our society. Good will and sincerity are not enough. The image of the "ugly American" is not so facilely dismissed.

Our history tells us of our past mistakes. Our solutions of the "Indian problem" and of the "Black problem" only emphasize the Biblical warning that the sins of the father are paid for by the son. We have inherited the curse of the expediency of our forefathers. Whenever immediate comfort and material security dictate answers to human problems, we can expect to inherit the wind. There is a theory that the only lesson we learn from history is that we learn no lesson from history.

Rootless Youth in Our Society

There is something very wrong with a nation in which a human being must change his name or dye his hair to merit our respect. There is something very wrong when an American girl feels compelled to say "I am of Dutch ancestry, but I am doing something to cure that." We gravely violate the dignity of a human being when we create a climate in which a young boy must ridicule the cultural heritage which has made him what he is. Insofar as we have mocked the national background of any group of people, we have added to the destruction of the American dream. Whenever we insist that a youngster deny his parents, we tamper with the very essence of our humanity.

For man is a strange creature. His life can only be lived forward, but can only be understood backward. He must have one foot in the future and one in the past. Our own sons and daughters, suburban and sophisticated, blessed with every consumer-item we can possibly deliver, suffers from an alienation which makes Sartre's Nausea read like Alice in Wonderland. Kenneth Keniston's description of them in The Uncommitted makes it understandable why they should seek escape from the pain of being in sex, alcohol, or drugs. Absence of roots

can do this to a man. It makes him all shell and no substance, ready to splinter by the slightest discomfort. Such youth seek their redeemers in the passing fad of the moment, ready to follow any Pied Piper promising relief from the gnawing pain of being. And the self-appointed saviors, be they Hefner of Playboy fame, or O'Leary with his LSD, serve as the gurus of a new but frightening age.

Language Provincialism

Part of this difficulty of Americans is their reliance upon one language. Only recently have we discovered the relationship between language and our very ability to think. Alfred Korzybski, the founder of general semantics, maintains that the structural assumptions implicit in language are of necessity reflected in how we act and what we are. He says:

> A language, any language, has at its bottom certain metaphysics, which ascribe, consciously or unconsciously, some sort of structure to the world. Now these structural assumptions are inside our skin when we accept a language, any language. We do not realize what tremendous power the structure of an habitual language has. It is not an exaggeration to say that it enslaves us through the mechanism of semantic reactions and that the structure which a language exhibits, and impresses on us unconsciously, is automatically projected upon the world around us.

A significant part of our difficulty in world diplomacy is the straitjacket of our one-language culture. It is simply impossible to understand another people of another culture and language unless we are freed from the limitation of our own cultural assumptions. Our difficulty in international relationships should prove this weakness. S. I. Hayakawa says in his The Use and Misuse of Language that:

> Words . . . are more than descriptions of the territory of human experience; they are evaluations. How we think and evaluate is inextricably bound up with how we talk. . . . How we act is determined by how we think. Even when we act without thinking, our actions are likely to follow in turn the lines laid down by our patterns of thought, which in turn are determined by the language we use.

The common insistence that any people who wish to do business with us must learn our language strikes one as an outstanding example of Yankee chauvinism.

Deification of Technology

We are well aware, I think, that the decisions we make at this point in human history, carry a responsibility for the future of mankind on this planet. All of us are infected by the fever of technology -- the latest in a series of idols mankind has placed in its temples. The view of our planet from the lunar surface changes perspectives for all of us. Does it really profit man to gain the moon and suffer the loss of his home?

We know so well that the problems of earth are not technological but human. And while computers feed us with sophisticated information of staggering complexity, our knowledge of our neighbor next door is still in the stone age. Resources are not unlimited. But when we spend 70 billion dollars in the United States for defense, one wonders what we are defending. Is it worth defending? Many of our youth think not!

Education in Cultural Pluralism

How can we learn to live together unless we know who we are, and where we come from. We will survive only if we can find the best ideas about man possible, and then act upon them. John Graves expressed this when he wrote in Goodbye to a River:

> If a man couldn't escape what he came from, we would most of us still be peasants in Old World hovels. But if, having escaped or not, he wants in some way to know himself, define himself, and tries to do it without taking into account the thing he came from, he is writing without any ink in his pen. The provincial who cultivates only his roots is in peril, potato-like, of becoming more root than plant. The man who cuts his roots away and denies that they were ever connected with him withers into half a man. . . . It's not necessary to like being a Texan, or a Midwesterner, or a Jew, or an Andalusian, or a Negro, or a hybrid child of the international rich. It is, I think, necessary to know in that

> crystal chamber of the mind where one speaks straight to oneself that one is or was that thing, and for any understanding of the human condition, it's certainly necessary to know a little about what the thing consists of.

Educators throughout the land have deduced from the phenomenon of our society certain ideas about what is essential for the education of youth today. We can ignore them, but then we will have to accept the consequences of continued disruption of our educational system, of our legal system, of our political system. Young Americans simply reject the things we have established as important in our society. They have seen the results, and they want no part of it. S. I. Hayakawa, Administrator of embattled San Francisco State College, considers as a basic goal of education for everyone:

> to understand, appreciate and learn to live with fellow inhabitants of our planet. Every child must learn about the races and peoples of the world and the rich variety of the world's cultures. He must know something of the history of men and of nations. He must learn that there are many people in the world who differ from him profoundly in habits, ideas, and ways of life. He must perceive these differences not as occasions for uneasiness or hostility, but as challenges to his capacity for understanding.

American chauvinism is dying. Yankee ethnocentricism, which believes in the inherent superiority of our own group, and looks with contempt on other cultures, must finally be buried. And unless we want our cities to break up into hostile armed camps, we must return to the American dream of cultural pluralism, where diverse religious, ethnic, racial or other groups may cleave to their own traditions within their own group, while at the same time they live together within a single economy and polity in harmony and mutual forbearance.

Black Americans have made us viscerally aware of the self-alienation and self-hatred minority groups were made to feel. Is it any wonder today that our youths burn their draft cards, make shirts out of our flag, and reject whatever symbolizes America. The very meaning of the word "America" has become negative. Only we have the power to change that image.

There is a reaction by some non-Black ethnic groups against the current interest in Black Studies proclaimed by every college and university across the land. They feel, unfortunately, that the only way changes occur in national priorities and policies is by demonstrations and rioting. Many have lost faith in the democratic, rational process.

We are convinced that only if the Congress of the United States takes a positive stand and passes the Ethnic Heritage Studies Centers Bill to assist the many other ethnic groups which form our national ethos will progress be made even in Black Studies. A broader political base for any legislation can be achieved only if more people are involved in its results.

Laws do not make people respect other people. Only knowledge of the other person can do that. The Ethnic Heritage Bill has the potential of institutionalizing in our society the promise carved in stone on our Statue of Liberty. We can now truly become what we have always said we were.

The Orchard Lake Ethnic Tradition

The Orchard Lake Schools, for eighty-five difficult years, have defied Yankee Ethnocentricism and have represented the ideal of cultural pluralism at a time when few understood what we were talking about. The Orchard Lake Schools strongly believe that every major ethnic group in our country should be given the opportunity to study its history, language, literature, and art, and to teach others about the richness of its cultural heritage. Indian Americans must be made to feel proud of Indian culture. Black Americans must become cognizant of their race's contributions to the building of America. Spanish Americans cannot be made to feel that they are second-class citizens.

The Orchard Lake Schools, students, faculty, and administration, strongly favor the passage of this Bill. We see federal funds as the only possible source

of help for all of the small ethnic groups. They have already done much for themselves with their own money. But spiraling costs, especially for talented and professional personnel in these areas, will not permit them to continue. (The priest-faculty members of the Orchard Lake Schools alone contribute a quarter of a million dollars each year in their services to this cause for Polish Americans.)

My concern today is especially for the Polish Americans, who number some ten million citizens of the United States. They have helped build America, from the glass works of Jamestown in 1608 to the factories, foundries, and offices of Chicago, Gary, Detroit, Toledo, Cleveland, Buffalo, and New York at the present time. No youth of Polish background should ever have to feel ashamed of his national heritage in America.

In the second part of my Testimony, I will outline specifically how Orchard Lake has already implemented, is presently implementing, and is prepared to further implement the plan and program of the Ethnic Heritage Studies Centers Bill for Americans of Polish background.

PART II -- POLISH AMERICAN ETHNIC HERITAGE STUDIES -- THE ORCHARD LAKE PLAN

History of the Orchard Lake Schools

The Orchard Lake Schools were founded by a young immigrant priest from Poland who came to this country a century ago. Father Joseph Dąbrowski, significantly, began his work in America among his fellow Polish Americans and the Indian tribes of central Wisconsin. It was this gift of appreciation for the culture and heritage of other peoples different from himself that he brought to this country. In Detroit, in 1885, he established the Polish Seminary, because he understood the need for native American leaders who would understand the mentality and problems of the millions of immigrants pouring into the United States from eastern Europe.

His Schools grew and prospered, and in 1909, moved to Orchard Lake, twenty-five miles northwest of Detroit, to the campus formerly occupied by the Michigan Military Academy. Today the Schools stand as a tribute to his insight into the needs of his adopted land, still training young men with a sensitivity to cultural pluralism, men determined to preserve the very best of the Polish people's contribution to America. The atmosphere of campus today, while very much American, is permeated by a unique spirit of appreciation for the traditions, customs, language, and culture of Poland, which is studied in the classroom by all of the students. The majority of the faculty are of second, third, and even fourth generation Polish ancestry, who contain within themselves a beautiful harmony of a sincere and warm love of America and a profound respect and

admiration for the Polish background which has made them what they are. The Schools, built entirely from the free will contributions of Americans who are convinced of their work, embrace three academic institutions and several related research centers.

Academic Institutions

The three academic institutions include:

Saint Mary's Preparatory, a four-year secondary program of pre-college studies in a disciplined, boarding school environment preparing young men for future study and service. Enrollment is between 200 and 250.

Saint Mary's College, a four-year liberal arts program offering majors in theology, philosophy, Polish, and communication arts, in a small, residential atmosphere of individual attention. Enrollment is between 100 and 125.

Saints Cyril and Methodius Seminary, a four-year program of graduate studies in theology preparing men for the priesthood, the permanent diaconate, and lay leadership in the Catholic Church. Enrollment is between 50 and 75.

The total campus population numbers over 400. It is small in comparison to the great state universities surrounding it, but in its eighty-five years of service to America, the Schools have educated more than 12,000 men, 10,000 as laymen and 2,000 as clerics who have served their country through the ministry of the Catholic Church. A recent study indicates that 72% of the alumni use Polish in their professional careers. The majority of these men, low-income sons of the Polish American Community, would never have had the advantage of such education had it not been for Orchard Lake. (Students pay less than half of the cost of room, board, and tuition.) The education they receive, stressing a three-fold cultural formation -- Christian, American, and Polish, prepares leaders who appreciate the cultural diversity of the United States population, leaders who can create the kinds of community, especially in our inner cities from which they come, where a human being can grow and prosper.

Research Centers

The research centers of the Orchard Lake Schools, although distinct from the academic institutions, mutually support each other. They have done, and

will continue to do whatever is necessary to serve the Polish American Community.

They include:

Center for Pastoral Studies, which trains permanent deacons for Church work, offers programs of continuing education for priests and laymen in theology, and sponsors a program of field work in pastoral activity for students of the Schools.

Polish American Liturgical Center, which supplies Polish speaking people and their priests with homiletic and liturgical materials, and provides a special apostolate for the sick and aged.

Polish American Historical Association, which sponsors research in Polish American history, and publishes the quarterly Polish American Studies.

Center for Polish Studies and Culture, which develops curriculum materials for use in elementary and secondary schools dealing with the history, geography, society, economy, literature, art, music, drama, language, and general culture of Poland, and disseminates these materials to interested teachers. It is precisely this Center which is already equipped to furnish the kinds of material requested in the Ethnic Heritage Bill. It could well serve as a model for other ethnic groups in the establishment of their own centers.

What Orchard Lake Has Done

The Orchard Lake Schools have long felt that an academic institution must have a much broader responsibility than merely classroom teaching. Their ability to respond to the needs of the community which they serve has assured them of the continuing financial support so necessary in private higher education today. Some of the accomplishments of the Schools in recent years in the area of ethnic study have certainly answered the needs of the Polish American Community.

Development of Language Curriculum Materials

1. Present Polish Curriculum:

The Orchard Lake Schools are better prepared than anyone else to develop curriculum materials for the teaching of Polish. Eighty-five years of experience of teaching Polish on a secondary, college, and graduate level have taught us much about the kind and quality of material which is interesting to American youth. Our language teachers are very young, very American, and very much in

love with the culture of Poland. The excitement of this love is clearly contagious.

2. Polish Language and Heritage Program (FLICS):

Orchard Lake, in cooperation with the University of Michigan working under a Federal grant, has developed the Polish Language and Heritage Program as part of the Foreign Language Innovative Curriculum Series (FLICS). It consists of a teacher's manual and student text, with accompanying slides and tapes, of units on the history, culture, art, literature, customs, geography, social life, and architecture of Poland, and a unit on Polish American immigration. The materials have been tested on a secondary level for several years with our own preparatory students and others, have been revised, and have been distributed to more than four hundred Polish teachers throughout the United States. Although existing only in mimeographed form at present, the Program will be further tested, revised as necessary, and published in permanent format. (A copy of the FLICS Program is available for examination upon request.) It too could serve as a model for other ethnic groups wishing to develop materials of this kind.

3. Language Laboratory:

The complete facilities of the Orchard Lake Language Laboratory are also available for the further development of tapes for teachers interested in using the audio-lingual method of language instruction. While other large language groups have many commercially developed tapes, lesser known languages must develop their own at great expense. We are willing to share our experience in this area, as well as furnish copies of tapes we have already developed for classroom use.

4. Polish Room:

Of particular merit in ethnic heritage studies is the Polish Room, a special demonstration laboratory furnished with a collection of books, art objects, and folk art from Poland, where students may come into contact with some of the things they study about. Seasonal traditions and customs are displayed, and students participate in recreating them for their own classmates.

5. Polish and Polish American Books:

Sorely needed in the classroom by every teacher are books relating to the study of a foreign culture. Through the efforts of Prof. Robert Geryk, Director of the Center for Polish Studies and Culture, the Schools have published a bibliography of Polish books, Polish books in English translation, and Polish American books in the field of history and literature, and the College's Bookstore has served as a supply and distribution center for such materials. Many of the young Polish writers (Polanski in films, Grotowski in drama, Penderecki in music, Mrozek in literature, Kolakowski in philosophy), whose works are already available in English, spark much interest and enthusiasm among our youth.

6. Library and Archives:

Another key factor in supplying books, filmstrips, films, and records of things Polish is the Alumni Memorial Library and its Archives. The Orchard Lake Library already has one of the largest collections in the United States, numbering 60,000 volumes, of which more than 10,000 are Polish, including many first editions and autographed copies, Polish translations of English works, and an outstanding collection of books on Polish genealogy and heraldry, and many other items of interest. In addition, it annually receives 90 different current Polish periodicals and newspapers published here and abroad, and has a historical file of such items as the Prasa Podziemna of World War II, and the now extinct Dziennik dla Wszystkich of Buffalo.

The Archives continue to grow each day with additions from estates and older people who wish to preserve some memorabilia of Poland or the Polonia for permanent safe-keeping. Orchard Lake still issues requests for any and all materials of a historical nature having to do with Poland or the Polish American Community. The presence of the Polish American Historical Association gives added continuity and permanence to this dimension.

7. Art Gallery:

The Galeria of the Orchard Lake Schools has also provided a location for the display of Polish, Polish American, and Slavic art, and provides a source of information about it. It has already sponsored such exhibits as Marian Owczarski, sculptor; Helen Klisz Dudzinska, painter; Richard Kubinski, posters; Donna Wessell and Helen Szpakowski, painters, and many others, and plans to continue frequent exhibits in the future. Students are given a vivid experience of the best art a culture can provide.

8. The Museum:

In time the Schools would like to provide facilities for the permanent display of historical objects in a Museum. Its Galeria and Polish Room already contain a nucleus of material upon which a permanent collection can easily be based.

9. Artists-in-Residence:

Perhaps the most exciting aspect of the Schools is the Artists-in-Residence facility, which provides subsidized facilities for poets, novelists, painters, sculptors, composers, etc., to create original works of art. The stay on campus of the great Polish pianist Severin Turel several years ago was an experience which students will never forget. The more recent stay of Marian Owczarski also proved memorable. Further facilities can be developed on a thirty-eight acre island in the center of Orchard Lake, across from campus, and is presently available -- an ideal location for such a facility to provide for the living continuation of works of art.

Training Programs and Workshops

1. Workshops on Cultural Pluralism:

The Schools have hosted their second Workshop on Cultural Pluralism, in cooperation with the Michigan Department of Education. In 1969, the Workshop

consisted of fourteen different ethnic groups (Italian, Portuguese, Arbic, Russian, Polish, Scandinavian, Dutch, Greek, French, Spanish, Oriental, Black, American Indian, and Finnish) who met on campus to hear a guest speaker on cultural anthropology, and then broke up into individual groups to examine available instructional materials and discuss target problems for the teaching of language and culture within their respective ethnic group. In 1970, the Workshop addressed itself to the problem of how to introduce studies into social studies curricula in public schools. These two workshops prepared the way for the formation of a special committee in Lansing -- the Committee on Cultural Democracy, whose chairman is an Assistant Superintendent of Education for the State of Michigan. This Committee has been meeting regularly for the past ten months in formulating official policy for Michigan embodying the principles of cultural pluralism for all public schools. A "Position Paper" has been presented to the State Board of Education recently, and the Committee is now discussing ways of implementing this philosophy in the curriculum of the schools. (A copy of the Position Paper is available upon request.)

2. Conference on Racial Prejudice:

In 1969, the Schools hosted a Conference on Racial Prejudice, in cooperation with the Priests' Conference for Polish Affairs of the Archdiocese of Detroit, in an attempt to understand the problems of the inner-city in relationship to the Catholic parishes of Detroit. The Conference examined prejudice from a psychological and sociological perspective, and presented recommendations on how to deal with inner-city problems. This conference eventually became the spark behind the formation of the Black Polish Conference of Detroit, a coalition between the Black and Polish communities of Detroit, which constitute over 60% of the total metropolitan population.

It has received national recognition for its work in overcoming polarization between the Black Community and the white ethnic blue-collar working class, and has served as a model for coalition-building in other cities (Gary, Toledo, Cleveland, Newark, etc.)

3. Summer Abroad 1970 Program:

In cooperation with the Catholic University of Lublin, the Orchard Lake Schools has sponsored special intensive courses in Poland in Language and culture, with a guided cultural tour and an optional trip to Rome, for academic credit. Such a trip proves to be invaluable for Polish teachers and students.

Research

1. Polish Language Teaching in the United States:

In cooperation with the Southeast Educational Laboratory and their Bi-Lingual Design Project, Austin, Texas, the Schools initiated a research project into the amount and type of Polish language teaching in the United States. This information served the Congress in its recent passage of the Bi-Lingual Education Act, the first recognition by our Government of foreign languages as a natural resource which should be carefully preserved. Although Polish has long been listed by the Department of Defense as one of the "critically needed" languages, little has been done to encourage its teaching.

2. Polish Language Usage in Religious Services:

The Schools have also undertaken a research project in the use of the Polish language among priests of Polish background, in order to come to some objective evaluation of the need of Polish materials for liturgical and religious use. Through the Polish American Liturgical Center, the Schools have translated, published, and distributed the new Eucharistic Prayers and the new Ordo of the Mass to all Polish priests of the United States. The Center has also undertaken the responsibility of supplying other Polish liturgical materials needed -- prayerbooks,

missalettes, sermon outlines, prayers of the faithful, etc. After only one year of operation, the Center already mails over 35,000 Polish missalettes to 67 parishes nationally. Through a special apostolate to the aged and sick, the Center offers Polish materials of devotion for their use.

3. Original Research in Polish and Polish American Topics:

In the realm of scholarship, the Schools have sponsored original research into history, literature, and culture of Poland and the Polish American Community, and have published translations and reprints, in cooperation with the Eagle Yearbook of the Schools. Many of these are already available in reprint form: (*)

The Kopernik Quadricentennial (1943)

Polonia Panorama (1946)

The 700th Anniversary of the Canonization of St. Stanislaus (1953)

Centennial of the Massive Immigration of Poles to America (1954)

The Life of John Cieplak, Bishop and Martyr (1955)

*Polish American Fraternal Organizations (1956)

*The Polish American Press (1957)

Polish Forebears Who Settled at Jamestown in 1608 (1958)

*A Seventy-Five Year History of the Polish Seminary (1960)

*American Council of Polish Cultural Clubs (1961)

*Polish American Clergy (1962)

*Polish American Parishes (1963)

Our Lady of Orchard Lake Shrine

Poland's Millenium, 1,000 Years of Christianity (1965)

Celebrating 1,000 Years of Polish Christianity, The World Polonia (1966)

*The Orchard Lake Schools (1967)

Our Lady of Czestochowa (1968)

*Outstanding Men and Women of Poland (1969)

*The Arts in Poland Since 1945 (1970)

*Polish American Customs and Traditions (1971)

16

4. Historical Research -- the Founder's Day Symposia

The annual Founder's Day Historical Symposia have, through the years, undertaken various themes related to the Polish American experience. The results have been published continuously in the Polish American Studies, quarterly of the Polish American Historical Association.

5. Visiting Artists and Scholars:

The Schools have long served as a host for most artists and scholars visiting this country from Poland, most of whom have either addressed our student body, or presented musical or literary programs of some kind. The recent appearance of a very young Polish Folk Rock Group (No To Co and the Alibabki) was enthusiastically received by the youngest and oldest set on campus. Several other groups are planned for the year.

6. Professional Contact with Poland:

A school which teaches a foreign language and culture cannot long exist without contact with theculture's source. The Orchard Lake Schools have had close contact with the Catholic University of Lublin, the Universities of Warsaw and Cracow, and with the leaders of the Catholic Church. Annual trips to Poland by students under faculty supervision have always produced very positive results. Students have returned with a new love for America and a new-found love for the country of their ancestry. Of particular merit is time spent among Polish peasants in the villages, some of them distant ancestors of our young. Nothing can match this kind of living contact in the laboratory of life.

Polish American Public Relations

1. Polish-Jewish Relations:

The Schools have cooperated with the Jewish Anti-Defamation League, especially in the Chicago area, in trying to find solutions to mutual problems of ethnic identity. The work of the American Jewish Committee in the area of ethnicity should be praised and supported. Much can be learned by such mutual support.

2. Polish-Black Relations:

One of the pivotal problems of the Polish American Community is its relations with Black Americans. Polish Americans bear a significantly greater proportion of criticism for racial prejudice because they happen to live closest to the problem. It is quite easy for white liberals who live in the antiseptic suburbs to level their charges then return to their ivory towers.

Poland's history of friendliness toward minorities is a fact of history. Present racial controversies generate far more heat than light. But when the dust finally settles, we are convinced that Polish Americans will emerge, in the long suffering tradition of their forbears, as those who weathered the storm.

The Orchard Lake Schools unequivocally support the efforts of the Priests' Conference for Polish Affairs in Detroit to find solutions to the magnitude of problems which we share with our fellow Black Americans. The experience of Polish Americans in dealing with the problems posed by a dominant culture decades ago can well serve our fellow Black Americans with some important lessons in acculturation and assimilation. And we laud the discovery that Black Americans have recently made of the necessity of respect and love for their cultural heritage.

Community work in these areas is slow and tedious, as many of our alumni who work with these problems are quick to testify. But much can be done. The Orchard Lake Schools laud the work of the Detroit "Black-Polish Conference," and the kind of thing it attempts to accomplish.

3. Polish-Canadian Relations:

The Schools also seek to establish closer ties with the Polish Americans of Canada. While Canada's problems differ from our own, many of the efforts we have exerted can benefit them. We have already made significant contacts with priests of Canada and their parishes. With the cooperation of Polish organizations in the United States, we will extend and strengthen the bonds we share in common.

What Orchard Lake Plans To Do

The Orchard Lake Schools would like to do much more. There has never been a dearth of ideas. Passage of the Ethnic Heritage bill would enable work in these areas to increase significantly, and would enable us to offer services not now provided. The Center for Polish Studies and Culture would also be happy to advise any other ethnic group on methods of procedure and areas of priority. Much of its past work could already serve as a guide to other groups interested in the preservation and dissemination of their cultural legacy.

Development of Language and Curriculum Materials:

1. Distribution of FLICS Program:

Although the Polish Language and Heritage Program is rather complete, much work is revision and re-editing must be done to make it a more effective program. Personnel and facilities for the adequate distribution to elementary and secondary schools throughout the nation is very inadequate. Further testing of the materials, especially in the so-called "Saturday Schools," where Polish is taught to children under private auspices, is essential.

2. Translation and Publication of Books:

Translation and publication facilities for historical, literary, and sociological studies must be provided as soon as possible. A special effort should be made to encourage new research, especially in the field of literary criticism of Polish works. Americans know very little of Poland's great literature beyond, perhaps, Sienkiewicz's Quo Vadis. Doctoral dissertations are especially productive of useful material.

3. Films and Filmstrips:

Newest educational technology must embrace audio-visual materials for classroom use. Orchard Lake has all of the necessary resources for the production of a professional film and/or filmstrip for social studies teachers about the Polish

American experience, and Polish culture in general.

Training Programs and Workshops

Lacking personnel, facilities, and financial support, the Orchard Lake Schools have a special need to provide for persons utilizing or preparing to utilize the curriculum materials eventually to be developed.

1. Summer Workshops:

Summer workshops can prove to be invaluable for language and social studies teachers, to introduce them to existing materials, and instruct them on newest teaching methodology. Additional personnel is available, but funds are not.

2. Summer Sessions:

With the rebirth of interest in ethnicity, there is much demand for summer courses in Polish language, history, literature, art, and culture. Facilities and personnel again are available, but funds are not.

3. Adult Education Classes:

A remarkable interest in things Polish can be found in the third and fourth generation Americans of Polish background who suddenly have realized the treasures of wisdom and beauty contained within their own ethnic heritage. Evening classes for adults could do much to enhance ethnic pride. Such study cannot be contribute to "a more harmonious, patriotic, and committed populace."

4. Seminars and Lectures:

In addition to sponsoring seminars and conferences on Polish subjects, the Schools plan to provide slides, films, recorded tapes, and traveling exhibits for possible use at schools and meetings of Polish American organizations. Lectures, dramatic presentations, music festivals, and film festivals can also be sponsored.

Sociological Research

Sociological research among America's ethnic groups in general, and within the Polish American Community in particular, is almost non-existent. Social

scientists know more about Australian aborigines than they do about the Polish Community in Buffalo, New York. Although research in this area has begun, largely through the efforts of the National Opinion Research Center of the University of Chicago, no systematic study has yet been attempted. Orchard Lake is anxious to begin a detailed and scholarly sociological study of Polish America. The preliminary outline for such a study was already presented by Dr. Lawrence Cizon, former Director of Research at Loyola University, Chicago. Such a study could provide invaluable information on the problems of our inner cities, especially those with large contiguous populations of Poles and Blacks, like Chicago, Gary, Detroit, Cleveland, Toldeo, Buffalo, New York, Philadelphia, and Baltimore.

The Orchard Lake Schools are anxious to contribute to this research. With the help of the Ethnic Heritage Bill, resources now diverted toward the development of curriculum materials could be used in this area.

Polish American Public Relations

1. Orchard Lake -- Focal Point for Polish American Organizations:

Orchard Lake has long served as the spiritual and educational focal point for the organization of the Polish American Community in the United States. Meetings of fraternals, professional organizations, mass media people, and religious leaders have always been hosted by the Schools. Only limitations of staff and personnel have limited this contribution. These organizations have much power to influence the rank and file Americans of Polish background for constructive effort and creative response to the needs of our country. The positive contribution of Polish Americans to this country cannot be calculated. It is significant to note, however, that there has never been a riot, a demonstration, or a march of any kind, nor has there been a destructive or disruptive movement toward America, despite the fact that they are more organized than any other national group, and stronger in

political influence in many sections of the country.

2. General Information Center for Polish Americans:

Many ethnic groups in the United States lack any kind of centralized facility for providing general information on their own ethnic group. Orchard Lake could well serve Polish Americans in this regard, especially in view of its personnel and resources.

3. Bi-Lingual Radio Program:

In keeping with this desire to serve Polish Americans, Orchard Lake now plans for a fifteen-minute bi-lingual radio program with a cultural emphasis, which will broadcast weekly. Its range of information and formation can thus be magnified many times over.

Conclusion

This Orchard Lake Plan, in its academic and non-academic aspects, is already well underway. We have 110 acres of land, 18 buildings, and a present staff of 30 priests and 20 laymen, all dedicated to the cause of the preservation and dissemination of Polish culture in the United States. The growth of the physical plant continues with the construction of a two million dollar residence facility which will house 300 students in semi-private rooms. The building has been purposely designed to function as a multi-purpose facility, especially during the summer months, when workshops and conferences can be held more easily. Future campus development includes a separate building to house the facilities of the Center for Polish Studies and Culture, and academic buildings like a fieldhouse, an auditorium, a faculty residence, and an addition to the Library. If we can serve the needs of America as we have in the past, we are confident that this plan will be realized before our centenary in 1985.

This, then, is the plan of the Orchard Lake Schools for implementing the

provisions of the Ethnic Heritage Studies Centers Bill. Orchard Lake stands ready, willing, and able to devote its entire resources, personnel, and facilities for the realization of these goals. The philosophy of Orchard Lake has its roots in its history and tradition of service to those who have supported it -- the Polish American Community in the United States. It stands as a monument to the faith and sacrifice of an immigrant America, a tribute to the deeply religious values carried to this country by our forefathers a century ago.

At a time when our country is undergoing profound social changes, the Schools continue to uphold the ideal of cultural pluralism -- the selection of the very best from the heritages of all the groups which make up the American mosaic, and the preservation of these elements in youth to enrich our American culture. The current movement on college and university campuses to establish Black Culture programs reinforces our rejection of the "melting pot theory," in which each minority in America would lose its complete identity. In a world moving painstakingly toward more vital cooperation and more meaningful brotherhood, Orchard Lake upholds the goal of true unity without absolute conformity, demanding the right to individual differences in a culturally pluralistic society.

This is the contribution that Orchard Lake has made, and will continue to make, to a country which has welcomed our forefathers to its shores, allowed them to grow and prosper, and permitted them their ethnic ways. We still have hope in the American dream.

ORCHARD LAKE CENTER FOR
POLISH STUDIES AND CULTURE

WHO AM I?

Reflections of a Young Polish American On the Search for Identity

by

Rev. Leonard F. Chrobot

MONOGRAPH NUMBER 4

February, 1971

SAINT MARY'S COLLEGE/ORCHARD LAKE, MICHIGAN 48034

Exploring the new ethnicity in America

THE ORCHARD LAKE CENTER FOR POLISH STUDIES AND CULTURE

. . . searches for a new way to define what it means to be an American. We embrace the American dream as culturally pluralistic -- a nation having a unity of spirit and ideal, but a diversity of origin and expression, a nation not of atomic individuals, but of dynamic, interacting groups, each of which brings forth its best to help build a just and equitable society, free of isolation, segregation, and racism.

We believe that people who are secure in their past and joyful in their present cannot but be hopeful in their future.

We call this the "new ethnicity."

ABOUT THE AUTHOR . . .

Rev. Leonard F. Chrobot

. . . is the youthful Dean of Saint Mary's College.

Graduating magna cum laude from the College in 1960 with a Bachelor of Arts degree in philosophy, he was ordained to the priesthood in 1964. He completed his work toward the Master's degree in English at Purdue University, and is presently a candidate for the doctorate in higher education at Wayne State University.

His early interest in ethnicity first appeared in his bachelor's thesis -- "The Philosophical Foundations for Cultural Pluralism." His doctoral research is exploring the same field. In addition, he serves as an ethnic consultant to the Committee for Cultural Democracy for the Michigan Department of Education, and to the Urban Task Force on Ethnic America of the United States Catholic Conference.

OTHER MONOGRAPHS . . .

Other Monographs published by the Orchard Lake Center for Polish Studies and Culture, and available upon request, include:

Number 1 -- "Polish Language and Polish Area Course Offerings at Colleges and Universities in the United States," a Survey. 1970.

Number 2 -- "Instructors and Professors Involved in the Teaching of Polish Language and Polish Area Courses at Colleges and Universities in the United States," a Survey. 1970.

Number 3 -- "Polish American Relations with Poland," by Zbigniew Stypulkowski, November, 1970.

CURRENT ATTITUDES ABOUT POLISH AMERICANS

The first ethnic joke was probably told at the Tower of Babel. Man's congenital need for structuring his universe very early found him dividing manking into groups. In the evolutionary process of the naked ape, experience soon taught him that physical violence and survival of the fittest could not long remain the criteria of continued existence on this planet. Man learned that to survive he must cooperate. But the memory of physical domination over others was buried deep within his collective unconscious. In order for man to find out who he was, he soon discovered a need to gather in tribes to support his own ego and to talk about the superiority of his own group. Just as a child begins a very long and careful process of self-actualization by discovering that he is not his mother, his father, or his sister or brother, man, too, discovers who he is by discovering who he is not.

National stereotypes began with nations. We classify men by the color of their skin, by the size of their noses, by the texture of their hair, by the sound of their language. And when we are bored, or insecure, we make jokes about them. If we know that they are not really true, then we can laugh with the objects of our jokes, not at them. Unfortunately, stereotyping is also a lazy man's way of dealing with reality. He classifies all people of a certain type according to his standards so that he doesn't have to make the effort to know an individual person. Most white Americans rely on these racial stereotypes in dealing with Blacks. And they can never penetrate appearances until they really get to know the person underneath.

The stereotype of the "Polak" is typical -- a dumb peasant worker who dances polka and drinks vodka. Were you ever to sit in a classroom at the University of Warsaw, or ride a bus in Cracow, it would be difficult to find such a "Polak." Many of these "dumb peasants" read poetry on their way to work. Most people in the larger cities of Poland are very familiar with the theater, while Americans watch their endless hours of T.V.

The Polish joke is not as popular today as it once was. I suppose the emotional reaction of the Polish press in America has killed them. Insofar as they perpetuated a negative stereotype of the Polish American, it is good that they are dead. But the reaction of some Polish Americans to this kind of joke tells us something about him. If he is secure in his identity, knows who he is and is proud of it, he should have been able to laugh, simply because he knew that the jokes were not true. If he ever feared that they might be true, then the problem was not with the joke-teller.

A far more damaging stereotype of the Polish American resulted from racial conflicts in our major cities. The white elite liberal who lives in the suburbs can easily charge bigotry of the Polish family that has lived, worked, played and prayed next to his Black fellow American long before the Selma March.

Most youth today have mixed emotions about their Polish American background. They have been kiddes about their multi-syllabic name. A few of their classmates have laughed at their grandmother's babushka. If they knew suburban

friends, they may have noticed that their city church tended to be more conservative than its suburban counterpart. But all of their friends respected some things too. They all knew how much real fun one can have at Polish wedding. When they visited their homes, they enjoyed Polish specialities -- homemade sausage, gołąbki, or pączki. They respected the Polish home's friendliness and hospitality. And they sometimes saw alcholic beverages used by the family in a truly Christian way -- to help people relax and enjoy each other, without puritanical fear.

The young Polish American today is probably third or fourth generation in America. He has never considered himself anything but an American. He has perhaps recently become intellectually curious about the language he sometimes hears his parents or grandparents use. He has heard the names of Chopin, Sienkiewicz and Stan Musial (and he probably knows most about the last one). He probably saw a statue of Kościuszko in a park somewhere, but he doesn't know why it is there. He has heard his sophisticated friends talk about Penderecki and Polański.

Even though his name is Polish he probably studied French or Spanish in high school. He heard that the Nazis overran Poland to begin World War II, but he doesn't understand why the Poles weren't better prepared. He knows that Poland is largely Catholic, but doesn't understand why they have a Communist government.

Above all, he is curious, about all the forces, traditions, and customs he has witnessed and experienced, but which he does not understand. He wants to know who he is, where he came from, and what he can do with his life. And he is ready for the discipline involved to find the answers. He is, in short, ready to study all these things, but he doesn't want to wave a flag about it.

If he is willing to sacrifice a little, he will grow to understand and appreciate his forefathers, and he will learn to love their land. He will begin to understand the role of Poland in the history of Europe, in the past, the present, and the future. He will learn about the literature, art, and culture of Poland. And by so doing, he will better understand America and himself. He will walk proudly as an American of Polish descent, and he will spell out his name carefully to fellow Americans. And for the first time he will see that the strength of America depends on its pluralism -- the selection of the very best from the heritages of all the groups which make up the American mosaic, and the preservation of these elements to enrich a nascent culture.

POLISH AMERICANS AND THEIR LANGUAGE

No ethnic group in America is probably as attached to its language as Polish Americans. It has been a century since the first large wave of immigration brought Eastern Europeans to this shore, and yet there are millions of Americans of Polish descent who still cultivate a love for their language. The emotional content of this love cannot be understood without a knowledge of the history of the people.

The Polish nation was born in 966 with the baptism of the Slavic chieftain Mieszko I. The acceptance of Roman Catholicism was one of the most important aspects of the nation's development, since it linked Poland, an eastern nation, with the great tradition of Rome and western Europe. Because of its geographical location, Poland has served through the centuries as a bridge between east and west, the eastern-most outpost of western civilization and the transmitter of that civilization to the "barbarian" civilizations of the Russians, Turks, Mongolians, and Tartars.

Poland's growth as a nation was steady. By the year 1600, it was probably the largest country in Europe, stretching from the Baltic Sea in the north to the Black Sea in the south, including much of what is now the Soviet Union and the Ukraine. But internal disorder and greedy neighbors sounded a death knell in the latter part of the eighteenth century.

Poland reached the depths of despair in 1795, when the country was finally partitioned by its three neighbors -- Russia, Prussia, and Austria. A map of Europe between 1795 and 1918 shows no such country as Poland. It did not exist. Yet the Polish people existed, and they continued as their ancestors had for centuries before, but now living the life of quiet desperation of a people without a country. A nation without a political existence is an anomaly. The people knew they were Polish; their history, language, culture, and especially their faith told them this. The anguished cry for the freedom to be themselves echoed through their poets, their novelists, their priests. Their national anthem -- "Poland is not yet lost," could not be sung without tears. Poland existed, in the hearts and minds of a people holding on to the only thing their conquerors could not take away -- their language. When conditions became worse, when it became illegal to even use their language, they revolted again and again. Some emigrated to the "new world," but carried with them the memory of a language as dear to them as life itself.

No nation in the world depended so deeply upon its language for its identity. When independence finally came in 1918 through the efforts of Woodrow Wilson, the victory was sweet indeed. But even that was to be short-lived. A country only twenty years old, an infant in the family of nations, had to face the greatest war machine ever built -- Nazi Germany. That September morning in 1939 is etched in the memory of all who remember it -- a Polish cavalry, on horseback, valiantly fighting for its country against German tanks. The battle was short-lived. Adolph Hitler decided to wipe the country off the map again. And he systematically and calculatingly destroyed every vestige of Polish growth and development of the previous twenty years. Some villages were leveled to the ground and bulldozers spread the dirt around so grass could be planted. By the end of the war, the mighty capital of Warsaw was reduced to rubble. The nation's leaders -- politicians, priests, doctors, lawyers, teachers -- were exterminated, buried in mass unmarked graves. Again, Poland ceased to exist on the map of Europe.

It is any wonder then that Poles sometimes cry when they sing their national anthem -- "Poland is not yet lost." Is it any wonder then that the Polish language is of special importance to these people? Is it any wonder then that Poles throughout the world share a type of fraternity unknown to many people of other nationalities.

The end of the war did not bring an end to political oppression. Stripped of its resources, of its leaders, of its very soul, Poland was again made a pawn, this time at Yalta and Potsdam. Another familiar chapter in Poland's long history of anquish and suffering began again.

The faith of the Polish people in themselves and in their God is the only explanation possible for so remarkable a comeback. Despite a Marxist ideology, despite the death and suffering which surrounded them on all sides, the Polish people set upon the task of rebuilding. The city of Warsaw stands today as a symbol of that indomitable spirit -- completely rebuilt; it is a thriving and exuberant capital of a nation too proud to even consider despair. In 1961, Stefan Cardinal Wyszynski addressed his priests by comparing the Polish nation to Ernest Hemingway. Hemingway had suffered much, sensitive that he was, but his end came in suicide. The Poles are made of sterner stuff. And the spirit manifested even today proves this. The nation goes on, despite the total control of its economy by the Soviet Union.

The central phenomenon of the Polish people's faith has been Roman Catholicism. The Communist atheistic ideology cannot explain packed churches on weekdays. Its visible personification today is Stefan Cardinal Wyszynski, who commands more support from its people than ten Communist parties. Each year on August 15th young and old from all corners of the country walk on foot, despite the harrassment of officials, to the Shrine of Our Lady of Częstochowa, there to renew their pledge of loyalty to the Queen of Poland. And the Queen reigns, despite party chieftains. It is an extraordinary experience to be at Częstochowa on August 15th. One touches the essence of faith there. It is an experience that one can never forget. Despite the concentration camps of nearby Lublinka and Oświecim, where over a million human beings were sacrificed on the pagan altar of racism, the spirit of man lives, ever new, ever fresh, ever conquering the evil that exists in the hearts of all men.

The memory of this experience is evoked every time a Polish word is heard. Youngsters may laugh at the tenacity with which their grandparents cling to their language. American Catholics may condemn the Polish parish with its seemingly medieval devotions. But until the condemners experience the same Gotterdamerung, they might do well to remain silent and respectful in the face of a mystery which challenges the very imagination of man. Polish Americans who know this heritage cannot reject it as "old country" thinking because they can see in it the real drama of the human condition and the real spirit which makes man what he is, "of all God's creation, the greatest."

THE POLISH IMMIGRANT IN AMERICA

Immigration to the United States at the turn of the century was an ordeal few of us fully understand. It is difficult enough to make a decision to leave your land, let alone suffer a three-month journey in the hold of a ship across a dangerous ocean to a land growing increasingly suspicious of foreigners. The sight of the State of Liberty in the New York Harbor was probably not too different from Moses' first sight of the promised land. The inscription on the base of the Statue was poetry, but when the "teeming masses" began to flood the principal cities of the east, America reacted with a characteristic ambivalence. Professing a doctrine of welcome, the earlier immigrants of older stock closed their ranks to the "foul smelling" peasants.

The drama of endurance suffered by the immigrants at the turn of this century is well documented in Sinclair Lewis' The Jungle. Its hero, Jurgis Rudkis, a Lithuanian, embodied the spirit of these immigrants, dumped into the great American Melting Pot. The old idea of America as a melting pot was a romantic notion about something which never really happened. As early as 1782, St. John de Crevecoeur wrote: "Here individuals of all nations are melted into a new race of men." The myth persisted, and in 1908, Israel Zangwill gave it almost religious significance:

> America is God's Crucible, the great Melting Pot where all races of Europe are merging and reforming . . . Germans and Frenchmen, Irishmen and Englishmen, Jews and Russians -- into the Crucible with you all! God is making the American!

But from the viewpoint of reality the minorities in the crucible continued to behave separately and distinctly, probably because of the opposition they received in the land of their adoption. Foreigners were defined as any individual who differed from the basic white Protestant Anglo-Saxon settlers by religion, language, and culture. Despite the fact that these "foreigners" numbered some 65% of the population, White Anglo-Saxon Protestantism (WASP) had long remained the most dominant and influential culture. In politics, business, and religion, WASP influence continues to this day, dictating many of the norms by which Americans must lead their lives.

Extremist views of the dominant culture became embodied in several movements -- the Know Nothingism and Ku Klux Klan of earlier in this century, which made being a foreigner a crime of the lowest kind. Immigrants were made to feel ashamed of their fatherlands, of their languages, of their customs and traditions. Everybody had to become "American," which meant WASP, since the only other Americans were the Indians, and they had been successfully packed off to their reservations decades before.

Many succumbed. They changed their names, forbade their children to speak any language but English at home, and disassociated themselves completely from anything which smattered of old-country thinking. And they rose to power, became successful and rich. But they lived a lie. Many people of this type are so opposed to Black Culture movements today because they are convinced that the only good Black is one who dresses in a Brooks Brothers suit, drinks his martini dry, and knows how to act in "polite" society. The lie was believed for centuries by the Blacks, until the recent civil rights movement made him aware that black can be beautiful, and one does not have to bleach his skin and straighten his hair to become an American. If a man can be himself in any country in the world, it should be America. The almost total

rejection of this kind of mass conformism by youth today shows signs of a deeper need.

But not all of the immigrants were willing to sacrifice their identity on the altar of success and advancement. Some reacted. They gathered in groups where they felt secure. They formed associations and fraternities, they built their own churches, printed their own newspapers, and fought for their right to be themselves. They felt that the American ideal had to be more than mass conformity, that unity could be achieved without uniformity, that a nation could be richer and stronger in its spirit if it allowed the preservation of the various heritages which made it up, that the separation of the various ethnic strains should always remain voluntary, yet characterized by a cheerful appreciation of another's differences.

The neighborhood in which I grew up was a living example of this kind of Americanism. We were all Americans, but of Belgian, Hungarian, Polish, and Black heritages. On Sunday morning we worshipped separately, but in the afternoon, we played football together. We retreated to our homes in the evening for our ethnic meals in ethnic traditions, but we grew up to love the country which made all of this possible.

John Graves, a Texan, expressed this ideal well when he wrote in Goodbye to a River:

> If a man couldn't escape from what he came from, we would most of us still be peasants in Old World hovels. But if, having escaped or not, he wants in some way to know himself, define himself, and tries to do it without taking into account the thing he came from, he is writing without any ink in his pen. The provincial who cultivates only his roots is in peril, potato-like, of becoming more root than plant. The man who cuts his roots away and denies that they were ever connected with him withers into half a man . . . It's not necessary to like being a Texan, or a Midwesterner, or a Jew, or an Andalusian, or a Negro, or a hybrid child of the international rich. It is, I Think, necessary to know in that crystal chamber of the mind where one speaks straight to oneself that one is or was that thing, and for any understanding of the human condition, it's necessary to know a little about what the thing consists of.

Polish Americans seem to have gone through four stages of development which bring them to today's concern for their background. The first generation, those Poles who came to this country and had to wrest a livelihood from its land by the sweat of their brow, fought gallantly to establish themselves and their families in their adopted land. In their struggle to meet their very basic needs, they had little time to pose philosophical questions about assimilation. The second generation, the sons of these immigrants, had to face the WASP culture, which frowned upon any old world ties as un-American and undemocratic. As a result, many of those whose first spoken words were Polish, fell prey to this attitude and rejected any connection wit it as soon as they meet the opposition of the dominant culture. The third generation of Polish Americans, who heard Polish spoken only when they visited their grandparents, began for the first time to question the source of their origin.

They underwent an "identity crisis," knowing full well that the only true Americans were the Indians, and that the vast majority of the people they worked and played with had some European ties. Many of these were ambivalent. Either they maintained some ties with this Polish past, or they looked with nostalgia at the colorful traditions and old world customs of their fellow Americans. The fourth generation of Polish Americans inherited this tradition of the past. Because most of their basic needs were already satisfied by the hard work of their ancestors, their needs became more complex. For the first time they looked to the higher aspects of civilization and culture to satisfy the longing of their hearts. For the first time, they were unafraid to assert and admit that they knew who they were. Feeling fully American, they no longer feared the multi-syllabic name they bore. They traveled to Poland, some of them, to touch their roots. They take pride in their folk art, read the literature (even if in translation), and dance their music. And many of them have developed a profound respect for the ethnic differences of the people who surround them.

Proof of this is the renewed interest on the college and university level to study the language. Although modern language requirements for advanced degrees almost always includes only German, French, Spanish, or Russian, many of these young men are anxious to do some research in Polish, if only because so few scholars are able to tap the vast resources of this country. The United States Department of Defense has listed Polish as one of the critical languages because it is necessary for the conduct of world politics and commerce. And only recently, with the passage of bi-lingual education legislation in the Senate, has the government become aware that native speakers of foreign languages are a natural resource that should be preserved and encouraged as much as possible. This change in thinking is full circle from the Know Nothingism at the turn of the century.

MONOLINGUALISM -- THE AMERICAN HERESY

Estimates vary, but it is generally agreed that man speaks about 3,500 different languages. The fact that Americans use English is quite an accident. When one ponders the accident he cannot but feel that Karl Marx was very close to the truth when he said that movements of culture and civilization are largely dictated by economics. Americans speak English today largely because it was economically more profitable to do so at the beginning of our country.

We always study foreign languages for the wrong reasons. The current interest in Chinese developed only because China has become a military threat to the rest of the world. The study of Russian became popular when Sputnik took to the heavens. And if Poland were to develop an atomic bomb tomorrow, within a week everybody and his brother would be memorizing Polish declensions. One woult hope that the study of foreign languages could have a more noble causation.

Foreign language study in the United States has never garnered the support it should. For most Americans, it is a luxurous fringe studied purely out of boredom. Foreign language teachers are looked upon as dreamers, while the real people who move the world are the engineers and technicians.

Such an attitude betrays a serious lack of understanding of the nature of man. Language is very closely related to the way a man thinks and acts, and masters of language have been able to move the world when they understood how very basic to man language really is. The language we speak not only determines what we say, but it also determines to a great extent what we perceive around us. As S.I. Hayakawa says in his The Use and Misuse of Language:

> Words . . . are more than descriptions of the territory of human experience; they are evaluations. How we think and evaluate is inextricably bound up with how we talk. The behaviorist school of psychology goes so far as to assert that all thought is subvocal speech . . . . How we act is determined by how we think. But even when we act without thinking, our actions are likely to follow in turn the lines laid down by our patterns of thought, which in turn are determined by the language we use.

The language we use not only frees us from silence, but it enslaves us to a view of reality imposed by that culture. The Polish language, for example, enshrines its notorious individualism by carefully avoiding use of the verb "musić," meaning "must," substituting the verb "powinien," meaning "should" instead. A freedom-loving people are not easily told they must do something.

A knowledge of many languages, or at least two, frees a man from the bondage of one world view. He then becomes able not only to see reality more richly, but he becomes aware of the strait-jacket imposed by monolingualism. Most Europeans are blessed by their geography in knowing several languages. Americans, on the other hand, are cursed with the provincialism that one language for man is sufficient. To really penetrate the surface of

another person in another culture, knowledge of his language is essential.

Alfred Korzybski, the founder of general semantics, the study of language, maintains that the structural assumptions implicit in language are of necessity reflected in how we act and what we are:

> A language, any language, has at its bottom certain metaphysics, which ascribe, consciously or unconsciously, some sort of structure to the world. Now these structural assumptions are inside our skin when we accept a language, any language. We do not realize what tremendous power the structure of an habitual language has. It is not an exaggeration to say that it enslaves us through the mechanism of semantic reactions and that the structure which a language exhibits, and impresses on us unconsciously, is automatically projected upon the world around us.

Every additional language a person knows opens the world to him in an entirely different way. Students of language wonder how long the present tendency to do away with language study in our high schools and colleges will last, and with what long-range effect.

It may be that the reaction of youth to the excessive rationalism of society and culture today is related to this limitation of man's view of reality. The phenomenon of the Woodstock Rock Music Festival of the summer of 1969 is a case in point. The experience was described by some of its commentators as almost mystical. The principal agent of this mysticism was drugs, said to be mind-expanding. They are supposed to enable the taker to see and experience more of reality and in a new light. Martin Duberman, in the June 1968 issue of the New Republic, said that

> . . . today's student radicals are . . . disenchanted . . . . Their disgust with traditional procedures is grounded in a growing distrust of rationality itself, of the importance of gathering and transmitting factual information and technical expertise. They are angry because they know that their growth depends on more than the accumulation of information. The kind of growth they value -- increased openness to a range of experience, emotional honesty, personal interaction -- seems actually threatened and compromised by additional proficiency in the manipulation of ideas and things.

The heightened awareness induced by a drug state lasts only as long as the drug itself. We wonder if any such human progress so easily attained can endure long enough to make the deep changes that are necessary in our society. There are no shortcuts to evolutionary breakthroughts.

Duberman continues:

> The rationalist tradition, as the student rebels see it, has produced a race of deformed human beings, or rather, a race of thinking machines; heads without bodies or feelings. The new generation does not wish men to become mindless; they wish them to become something more than minds.

It would be foolish to conclude that the study of foreign languages is the answer to the world's problems. But the hyper-rationalist world of technology produced by monolingual culture does not seem the answer either.

EXTREMES OF ETHNIC IDENTITY

There is an extreme to which any person of ethnic origin can go in the United States in the presentation of his world view -- excessive nationalism for either America or the country of his ancestors. And both are equally reprehensible.

Teilhard de Chardin has prophetically written "The age of nations has passed; now we must set upon the task of building the earth." We have seen the evils of excessive nationalism in the catastrophe of Nazism. With the memory of thirty million bodies from the concentration campus still with us, it is impossible for us to say what an earlier generation of Americans found it easy to say -- "My country, right or wrong." Our own experience of My Lai makes us painfully aware of the viciousness of man beneath the delicate facade of civilization. Modern youth culture and its internationalism also rejects any kind of nationalism. The under-thirty crowd of all the world has more in common with each other today than ever before. The Beatles are probably more universal in their appeal than a pope ever could be.

But man is a strange creature. He can only exist if he has one foot in the future and one foot in the past. Many a modern youth, cosmopolitan and sophisticated, international and tolerant of excess, with both feet in the future, suffers from an alienation that would make Sartre's Nausea read like Alice in Wonderland. Kenneth Keniston's description of him in the Uncommitted makes it understandable why he should seek escape from the pain of being in sex, alcohol, or drugs. Absence of roots can do this to a man. It makes him all shell and no substance, ready to splinter by the slightest breeze through his life. Such a man seeks his redeemers in the passing fad of the moment, and he is ready to follow any Pied Piper who promises relief from the gnawing pain of existence. Self-appointed saviours, be they Hefner of Playboy fame, or Leary of LSD, serve as the gurus of a new but frightening age.

The mature Polish American must try to maintain the delicate balance between the old and the new, the old because it tells him what man has been, and the new because it tells him what man can become. He must love and respect the land of his forefathers and his own land, but he must be critical of both. He must understand that a knowledge of both came make him a richer man.

We can afford to condemn the closed "ghetto mentality" of the few, who have a whole panoply of prejudices and stereotypes to comfort them in their laziness. The fiery individualism which has marked their ancestors can become a selfish egotism which destroys any common effort toward human progress. The ghetto mind is born of insecurity and fear. It closes itself off from the broader context of human life, be it in religion, ethnicity, education, or politics. It isolates petty concerns and makes them into major issues. It is a refusal to be human in the most profound sense of that term. It revels in a romantic past that never existed and refuses categorically to listen to the voice of the spirit expressed in our time. It fears the new and the different, becomes paranoic in the face of change, and is threatened by everything which is happening. While society collapses around it, it fritters away its time in the form of things, never allowing itself to find the substance. It creates imaginary monsters who personify all of its frustrations and weaknesses, then tries to fight them by making others believe that they are the cause of all the world's ills. It holds on to the

past not as a source of enrichment for contributions to the future, but as a comfortable retreat from the nitty-gritty problems of the present. This kind of mentality is found in many places, and it deserves the condemnation we give it.

Equally as bad are forms of the "new breed." Whereas the ghetto mind deifies the past, the extreme "new breeder" rejects forthwith all of the wisdom of the past because of his own ignorance and laziness. His fear and insecurity express itself in constant change, always hoping that something new and different will allay the terror he feels in facing himself. He wants to "do his own thing" because he lacks the self-discipline necessary to accomplish anything of worth. He prides himself in his openness, but upon investigation we find he is open only to people who think as he does. His naive optimism in human nature is possible because he has never examined, or refuses to examine, the evil he finds in himself. His is a constant search for some secret formula which will solve all. He is as prejudiced and stereotyping as the ghetto dweller he so abhores. The love which he proclaims glorifies titillation, while carefully avoiding sacrifice. He lacks a profound respect for persons, especially the old, the poor, the uneducated, the sick, and the lonely. He loves the beautiful people of fashion and form, and ignores the less attractive who sometimes know more about life than he could ever hope to. The ideal world he projects in the future is the object of his fantasy, not the product of his experience. And one cannot but wonder if the world might not be even more unlivable when he takes over its control. Age and experience may simply produce in him the next generation of the ghetto mentality. Perhaps, like the poor of the Gospels, this kind will always be around.

CULTURAL PLURALISM -- AN AMERICAN IDEAL

America, as Archibald Macleish wrote, is

> . . . a symbol of union because it is also a symbol of differences, and it will endure not because its deserts and seacoasts and forests and bayous and dead volcanoes are one mind, but because they are of several minds and are nevertheless together . . . . It is where the sand and the marsh and the rock and the grass and the great trees of the eternal wind compose the frontiers of diversity that there is greatness.

In the early years of our republic the United States was variously described as "mankind's one last hope." F. Scott Fitzgerald in The Great Gatsby described it as "the last and greatest of all human dreams." He added:

> . . . for a transitory enchanted moment man must have held his breath in the presence of this continent, compelled into an aesthetic contemplation he neither understood nor desired, face to face for the last time in history with something commensurate to his capacity for wonder.

It is precisely because so much was expected from this country that the disappointment in its failure has been so keen. The streets that were to flow with milk and honey are now blocked by the rubble of the latest interracial riot. Our embassies in remote parts of the world have been burned, and our representatives have been stoned and mocked. Some of our greatest leaders have been shot down in an orgy of violence. America is in a time of crisis, the winter of its discontent. And we search for the structure of a spring we hope for. The greatness of a country does not depent upon its military or economic strength; our experience of history should have taught us that. Greatness depends upon the vision of man we are able to institutionalize in our society.

The path of the melting pot seems at last to have been rejected. It took the Black Revolution in America to finally put it to rest. The paternalistic attitude of the dominant Anglo-Saxon culture tolerated the minorities "playing" with their various cultures until they grew mature enough to accept the "right" one. We are a bit wiser today. Although WASP domination is still the most effective force within our institutions, the climate has changed significantly in the past few years.

The ideal we set before us is that of cultural pluralism, the selection of the very best from the heritages of all the groups which make up the American mosaic, and the preservation of these elements in youth to enrich a nascent American culture. In a world moving painstakingly toward more vital cooperation and more meaningful brotherhood, we try to uphold the goal of true unity without absolute uniformity, demanding the right to individual differences in a culturally pluralistic society.

The term "cultural pluralism" can mean just about anything to anybody, however. Some understanding of the meaning we give it can be grasped by analogy. It has been called "an orchestration of diversity" by Horace Kallen

in his Cultural Pluralism and the American Idea. The analogy of an orchestra is a fitting one. By it we understand that in a symphonic orchestra diversity is a sine qua non for symphonic music. Each individual group of instruments, the violins, the cellos, the flutes, the clarinets -- must differ from the other groups, each must produce its characteristic tone, in its own characteristic way, in order that a symphony result. The perfection of the whole consists exactly in the harmony of the diverse. The drum has not the perfection of the flute, nor the cello of the violin. Each has its own perfection, and when combined in an orchestra, these perfections must be retained. Equalization would not produce harmony, but a solo. It is only when the drummer perfects himself in the use of his drum, the flutist in the use of his flute, et alia, and when each of these combine in harmony with the others that the symphony results. The difference between instruments and the characteristic way they produce their sounds creates a new perfection, infinitely greater than the perfection of the individual members, even greater than the sum total of all the members -- the perfection of symphonic music. The violinist cannot disdain the drummer because the violinist without the drummer cannot emit the perfection which both combined can.

From this analogy certain principles can be formulated to govern the individual and the way he looks at himself and his background.

1. In order to know any culture we should first know our own, know ourselves, our being, and all those things which have contributed to making us what we are, the spiritual values around which we have built our ideals.
2. Since each individual is a unique person before God, once we know who we are, we have an obligation to cultivate and develop that uniqueness, that difference, enhancing our own perfection so that it becomes truly an effective expression of our own unique selves, all the while we remain conscious of our own personal limitations.
3. Moreover, once we have developed that uniqueness, we will inevitably begin to study that which makes others unique, and cooperate with them to supplement the limitations of ourselves. We need always be conscious of the fact that in cooperation with others we can achieve a perfection which we cannot achieve by ourselves.

America needs this kind of diversity in its people. Our society gravely violates the dignity of any human being when it insists on conformity to a certain life style at the expense of a man's dignity. Insofar as white culture has insisted that the Black become a middle class suburbanite in order to reap the riches of the white harvest, we have sinned. Insofar as we have mocked the cultural heritage of any group of people by insisting they adopt the value system of the antiseptic suburbs, we have added to the destruction of the American dream. Insofar as we have created a climate in which a person must change his name to merit our respect, we have violated the very principles upon which this country was founded. There is real hope, however, that we have finally become aware.

THE CULTURALLY PLURALISTIC POLISH AMERICAN

The ideal Polish American is convinced that the future of America and his own personal future must be nourished and sustained by the past. We believe in the validity of this tradition because of the type of person it has produced. If you have ever met one you will not forget him. From a wasteland of conformity, he emerges as a refreshing exception.

The ideal Polish American knows who he is. He is able to stand erect because he has achieved a self-identity. He is an authentic human being, not a plastic imitation of form without substance. So many contemporary novels and motion pictures dwell on the theme of man's search for identity. The anti-hero of the recent "Five Easy Pieces" can find peace not in his past, his family traditions, not in his present, the love of a woman, nor in his future. The Polish American who is secure within himself does not have to agonize over such a search. He does not give in to the pressure to conform because his self-identity comes from a source that is rich indeed.

The basis of this self-identity must come from a source outside of himself. For a Christian it must come from a faith in God and an encounter with the God-Man-for-others -- Jesus Christ. His ultimate sense of worth is derived not from what he can do, but from what he is as a unique person. This faith must be tempered by the experience of suffering. It is not sectarian, but it must come from a tradition which has deeply felt this faith, and has suffered to prove it.

The ideal Polish American loves his country, not because of what it can do for him, but because it has given him the freedom to become truly himself. He deeply respects the amount of blood, sweat, and sacrifice that was necessary to build it. And he is anxious to add his own unique contribution to make it still better.

He really loves people, all kinds. He understands their differences and is tolerant of their faults. While remaining an individual himself, he realizes the importance of community, and how important it is in effecting real change in mankind. He knows the art of dealing with people of various minds and welding them together to achieve a common goal. He is able to penetrate the surface of social change because he knows that people do not change by changing laws, but by a gentle but dynamic tension between their own inner security and the ideal toward which they strive. He would like to go where the real social ferment is taking place today, in the inner-city communities which he knows so well.

The ideal Polish American is sympathetic with the plight of his fellow Americans who are black, because he understands far better than most the path which they must follow. He knows that the temporary necessity of separatism for Blacks is a step he had taken long ago to achieve his own identity. He does not wish for two separate Americas, one black and one white, but he knows of the pressures of the majority to mock a heritage and force uniformity.

The ideal Polish American is warm and hospitable, because he springs from a tradition which welcomes a guest as one of his own. He respects the customs of his family and his church, because they embody real human values which have weathered the test of time. Above all he loves life, not with a puritanical fearfulness or a Victorian facade, but with a robust passion. He is down-to-earth, because his ancestors knew the earth so well.

He knows the language, literature, and culture of at least two nations and is therefore able to appreciate his own so much more. He thanks God on his knees each day for what he has in America, because he knows what the suffering of two wars has inflicted on his ancestors. While he will never take his standard of living for granted, he knows that life is infinitely more precious than the gadget-ridden world he has been exposed to.

And the next time he hears a Polish joke, he will sit back and smile at the ignorance of a people too shallow to share his inestimable heritage.

Senator SCHWEIKER. I certainly appreciate the cooperation you have shown us before, and your help. So I appreciate your thoughts.

Now we will turn to Dr. John Buoncristiani, of the Boston Urban Planning Office.

Did I pronounce that right?

Dr. BUONCRISTIANI. Thank you, Senator Schweiker, for permitting me to come here to testify in behalf of this bill.

The way which I view ethnicity and culture is that there are phenomena in people. So cultural studies or ethnic studies are ways by which people learn of people to enhance understanding.

It is a forward-looking concept. These centers would promote studies of people by people as they are living now as they have lived and as they will live: Culture is an evolving phenomena.

From personal experience I hope that your mosaic Senator Schweiker does not turn out to be a souring smorgasbord. I have lived for 4 years in a black community in Boston—Roxbury—and I frequent the north end which is an Italian ghetto. Perhaps centers of the type proposed in this bill would help alleviate the despair and dislike that is perceivable among the working class in communities of the north end type.

Many outsiders, tourists, come to the north end and may remark, "Oh, aren't these Italians wonderful? They are out, they are so gregarious." These outsiders look but really don't see.

The north end community in a sense is a cafe society. It retains many old country traditions in its life. People in this community, whether they are here 1 year, 2 years, or 5 years, really don't feel as if they are a part of America. There is a feeling that America is beyond their community, out there somewhere. It is a sad attitude many wish and will return to Italy. Some come here; work here 5 or 10 years, and return to Italy to retire and live again. Among these people there is a low self-image in their present circumstances.

Later I will submit a formal statement, these remarks come from personal experience.

The situation in the north end is sad too, for the people don't tolerate blacks. Yet I am of Italian parents living and welcomed in a black community. They are all the same people!

Blue collar or working class people (blacks, Italians, Chicanos, Poles, etc.) struggle with many similar problems. These proposed centers would help people to understand themselves and other people of different cultures to enhance their coming together to resolve their common problems.

Senator SCHWEIKER. Doctor, we would appreciate getting some additional thought, because you are right on the firingline so to speak, and I think your views and specifics would—we would be very glad to get subsequently, so if you could, send it to us, we would like to have it for our deliberations.

Now we would like to call on Father Kubik, the director of the Polish Daily News, Detroit, Mich.

Dr. BUONCRISTIANI. Thank you, Mr. Chairman.

I appreciate the opportunity to testify here.

Mr. KUBIK. First of all, greetings to you, Senator, and to your panel there. You know, I own property in Pennsylvania, so some way I feel

akin to you. I lived in western Pennsylvania for quite awhile before moving to Michigan, Pittsburgh, McKees Rocks, Imperial.

I am making this statement on behalf of the Polish ethnic community.

I am prepared to answer questions relative to the following summarized comments and observations:

PERSONAL QUALIFICATIONS FOR REPRESENTATION

Twenty-two years as teacher and professor of modern history and economics at St. Mary's College, Orchard Lake, Mich. President of Priests' Conference for Polish Affairs 1967–71. Member of Board of Polish Daily News, member of and officer in over 20 foremost Polish- and Slavic-American organizations, including the Polish Roman Catholic Union, the Polish National Alliance, the Polish Legion of American Veterans, the Polish-American Activities League, American Polish Action Council, Polish Festival, Inc., and the Polish American Congress, Michigan division, where I am vice president.

SUMMARIZED OBSERVATIONS

Background for present demand by young Americans for ethnic studies, particularly history, culture, literature, arts, et cetera, of their own heritage.

1. Anglo-Saxon arms and swords conquered and suppressed vast areas of the world.

2. Military conquest again was followed by the total cultural suppression in the Colonies; literature and arts were subordinated to British even in India to such an extent and a generation of people grew up in India, as well as other colonies, on Shakespeare, Shelley, et cetera, while their own writers were forgotten.

3. Anglo-Saxon philosophy of conquest, exploitation and domination set the pattern for colonial America, so much as that we must today search for Indian arts, crafts, literature, et cetera, as if it came from the stone age.

4. Anglo-Saxons gave us slavery; the logical step from exploitation of natural resources is the exploitation of human resources of the Colonies.

5. Despite independence from England, Anglo-Saxon philosophy dominates the thinking and action of the American power structure—post Civil War American, after its manifest destiny to the Pacific, reaches for its manifest mission to the world, as witness involvement in regional defense treaties which cover the entire world.

6. When supply of slaves proved inadequate and the slaves themselves inefficient, doors of immigration were opened by Yankee-Anglo-Saxon business and commercial barons to channel needed manpower and skills into mines, mills, forests, and farms.

This immigration, like the colonial slave, was forced to accept the notion of Anglo-Saxon superculture and the notion that it must lose its ethnic identity in the huge American melting pot.

7. The immigrant and his children were persecuted mercilessly for his ethnicity; then in the public schools the child was really ridiculed for the food, clothing, customs, accent, et cetera which identified his heritage.

60-433 O—71—pt. 2——24

In the mills and mines, in public offices the immigrant was denied service, promotion, or the commonest courtesy unless he spoke English.

8. In self-defense he clustered in closed ethnic communities. The Anglo-Saxon could advertise in tourist leaflets that he could be found in Dago Town or Greek Town, Polish Village, Hunky Town, et cetera.

9. He built his own schools, organized his own fraternal societies, and in every way struggled to assert his identity in this free America.

10. The American Anglo-Saxon press, the communications media. the schools, the government, all made him and his children feel so inferior that the physically, morally, and intellectually weaker members began to hide their ethnic identity behind Anglo-Saxon names and some, unfortunately, to deny their ethnic heritage.

All evil contains a self-destruction element. The evil of imperialism set this self-destructing element free during the Second World War.

The Polish-American realizes now that he was forcibly robbed of his language and that the poets, novelists, artists, scientists, and so forth of his heritage were equal in quality to others of the world.

The Polish-American and other ethnics see their culture rich in everything that is good, noble, and just in sharp contrast to the Anglo-Saxon culture built on other men's sweat, blood, and tears.

This rebellion is called antiestablishment in philosophy and mentality. The rebellion is far from point of explosion. There is time to correct the situation, to create an America which will not be a melting pot, but rather a beautiful bouquet of identifiable cultures, blended into colorful and harmonious unity.

The rebellion can be cooled, if discrimination against ethnics is ended by the WASP power structure in the United States.

SPECIFIC EXAMPLES OF DISCRIMINATION

1. Federal judgeships, held in heavily Polish-American Detroit by a Polish-American for over 20 years, has been granted, after death of Judge Machrowicz. to Kennedy, Feikens, Pratt, and now DeMascio. This type of discrimination is practiced by both parties at all levels of government and in all departments of government.

The naturalized ethnic citizen realizes that he is helpless but the native born ethnic intends to overthrow this type of vicious oppression by the power structure.

2. One-third of the teachers in the Detroit public school system is of Slavic heritage, but the power structure will not admit them to executive positions and in the board of education or its departments.

3. Ethnic newspapers and communications media are completely ignored by business and commerce. Lack of advertising revenue led to their early demise.

4. In predominantly Slavic-American areas the preferred American holds over 75 percent of all executive positions in the shops, mines, mills, and so forth, which his parents helped to build. All this despite an education level equal to that of his competitors.

5. Approximately 10 percent of population of the United States is Slavic heritage. You, ladies and gentlemen, establish what percentage of membership in the President's Cabinet, in the regulatory commissions, in various other departments of Federal Government and in the military reflects this reality.

The Polish-American community is uniting with other minorities to overthrow this establishment. Witness the Black-Polish Conference in Detroit and the Project Bridge in Cleveland.

There is some fear expressed about alleged antagonism between Slavic ethnics and blacks. Remember that both were equally exploited and suppressed.

There is urgent need for overhauling the education programs at all levels. Ethnic studies must begin in the primary grades. Ethnic studies centers should be established at our high schools, colleges, and universities. Scholars should be given grants to correct the omission of the contributions of the ethnics to American history and American society.

Ethnics are very interested in finding out as much as they can about their heritage. They can't find it in existing books in the schools they attend nor in the libraries which are open to them. They are clamoring for the truth and they will have it.

Ancentral traditions are being revived by ethnics. Throughout the United States of America, ethnic festivals are gaining in popularity.

Although I am a clergyman, I have spoken only of the people and for the people, not for any religious denominations. Ethnic Americans were and continue to be closely tied to their churches, despite the godless and amoral education forced upon them in the public school system of an America which professes: "In God We Trust."

RECOMMENDATIONS

Establish Slavic ethnic studies centers throughout the educational system in the United States

The areas of heavy concentration of Slavic Americans should receive particular favor: Boston-Northampton, New York City, Syracuse-Utica, Buffalo-Erie, Trenton-Philadelphia, Pittsburgh-Greenburg, Cleveland, Detroit-Toledo, Chicago-Milwaukee, St. Louis, Los Angeles, Miami.

CONCLUSION

There is a national identity crisis. Establishment of ethnic studies centers, promotion of ethnic studies and promotion of all programs which help all Americans to understand themselves to appreciate their fellow citizen, should unite the Anglo Saxon and the ethnic, the black, everybody into the one people we can be and must be, if we are to prosper and to survive.

(The prepared statement of Rev. Kubik follows:)

PREPARED STATEMENT OF REV. JOSEPH J. KUBIK ON BEHALF OF THE POLISH ETHNIC COMMUNITY WHICH REFLECTS OPINION, THOUGHT, AND HOPE OR FEAR OF AMERICANS OF THE POLISH, CZECH, SLOVAK, UKRANIAN AND OTHER EASTERN EUROPEAN HERITAGE

I am prepared to respond to any questions relative to the following summarized comments and observations.

PERSONAL QUALIFICATION FOR REPRESENTATION

Twenty two years as teacher and Professor of Modern History and Economics at St. Mary's College, Orchard Lake, Michigan. President of Priests' Conference for Polish Affairs 1967–1971. Member of Board of Polish Daily News, and of the defunct Polish-American Publishing Co. Member of and Officer in over twenty

foremost Polish and Slavic American Organizations, including the Polish Roman Catholic Union, The Polish National Alliance, the Polish Legion of American Veterans, the Polish American Activities League, American Polish Action Council, Polish Festival, Inc., and the Polish American Congress, Michigan Division, where I am Organizational Vice-President.

SUMMARIZED OBSERVATIONS

Background for present demand by young Americans for ethnic studies, particularly history, culture, literature, arts, etc. of their own heritage.

1. Anglo-Saxon arms and swords conquered and suppressed vast areas of the world.

2. Military conquest was followed by the total cultural suppression in the colonies: literature and arts were subordinated to British even in India to such an extent and a generation of people grew up in India, as well as in other colonies, on Shakespeare, Shelly, etc.

3. Anglo-Saxon philosophy of conquest, exploitation, and domination set the pattern for colonial American, so much as that we must today as Miss Harris indicated search for Indian arts, crafts, literature, etc., as if it came from the Stone Age.

4. Anglo-Saxons gave us slavery: the logical step from exploitation of natural resources is the exploitation of human resources of the colonies.

5. Despite independence from England, Anglo-Saxon philosophy dominates the thinking and action of the American power structure—Post Civil War American, after its manifest destiny to the Pacific. reaches for its manifest mission to the world, as witness involvement in regional defense treaties which cover the entire world.

6. When supply of slaves proved inadequate and the slaves themselves inefficient, doors of immigration were opened by Yankee-Anglo-Saxon business and commercial "barons" to channel needed man power and skills into mines, mills, forests, and farms. This immigration, like the colonial slave, was forced to accept the notion of Anglo-Saxon "Super-culture" and the notion that it must lose its ethnic identity in the huge American "melting-pot".

7. The immigrant and his children was persecuted mercilessly for his ethnicity: in the public schools the child was ridiculed for the food, clothing, customs, accent, etc. which identified his heritage. In the mills and mines, in public offices the immigrant was denied service, promotion, or the commonest courtesy unless he spoke English—His acceptance into Society was conditioned on this language: no driver's license, no citizenship, no job unless he spoke English!

8. In self-defense he clustered in closed ethnic communities. The Anglo-Saxon could advertise in tourist leaflets that he could be found in "Dago-Town", "Greek-Town", "Polish Village". "Hunky Town" etc.

9. He built his own schools, organized own fraternal societies, and in every way struggled to assert his identity in this free America.

10. The American, Anglo-Saxon press, the communication media, the schools, the government all made him and his children feel so inferior that the physically, morally and intellectually weaker members began to hide their ethnic identity behind Anglo-Saxon names and some, unfortunately, to deny their ethnic heritage.

All evil contains a self-destruction element. The evil of imperialism set this self-destructing element free during the second World War. The British Empire crumbled. Anglo-Saxon philosophy of life was exposed for what it really was historically: rapacious, villainous. During the War the child of the slave and of the immigrant had opportunity to see the cultures of other nations. One thing this child carried home: the best things of the world are certainly not Anglo-Saxon. The ethnic American, the Black, and even the Anglo-Saxon searched for truer values in their heritage. This was the beginning—Rebellion grew in their soul when the power structure continued its oppression and suppression and attempted to carry it into other parts of the world. Rebellion reached boiling point with the involvement in Viet Nam.

The Polish-American realizes now that he was forcibly robbed of his language—that the poets, novelists, artists, scientists, etc. of his heritage were equal in quality to others of the world.

The Polish American and other ethnics see their culture rich in everything that is good, noble and just in sharp contrast to the Anglo-Saxon culture built on other men's sweat, blood, and tears.

This rebellion is called "Anti-establishment", in philosophy and mentality. The rebellion is not far from point of explosion. There is time to correct the

situation, to create an America which will not be a melting pot, but rather a beautiful bouquet of identifiable cultures, blended into colorful and harmonious unity.

The rebellion can be cooled, if discrimination against ethnics is ended by the WASP power structure in the United States.

SPECIFIC EXAMPLES OF DISCRIMINATIONS

1. Federal Judgeship, held in heavily Polish-American Detroit by a Polish American for over twenty years, has been granted, after death of Judge Machrowicz, to Kennedy, Feikens, Pratt, and now DeMascio! This type of discrimination is practiced by both parties at all levels of government and in all departments of government. The naturalized ethnic citizen realizes that he is helpless, but the native born ethnic-American intends to overthrow this type of vicious oppression by the power structure.

2. One third of the teachers in the Detroit area public school system is of Slavic heritage, but the power structure will not admit them to executive positions in the Board of Education or its departments.

3. Ethnic newspapers and communication media are completely ignored by business and commerce. Lack of advertising revenue leads to their demise.

4. In predominantly Slavic-American areas the "Preferred American" holds over 75% of all executive positions in the shops, mines, mills, etc. which his parents helped to build. All this despite an education level equal to that of his competitors!

5. Approximately 10% of population of U.S. is Slavic heritage—You, Ladies and Gentlemen, establish what percentage of membership in the President's Cabinet, in the Regulatory Commissions, in various other departments of Federal Government, and in the Military reflects this reality!

The Polish American community is uniting with other minorities to overthrow this "establishment". Witness the Black-Polish Conference in Detroit. I was instrumental in establishing this Conference—the Project Bridge in Cleveland is another example.

There is some fear expressed about alleged antagonism between Slavic-ethnics and Blacks. Remember that both were equally exploited and suppressed. The ethnics work as hard and died as frequently as any slave ever did—The slave in the fields, the ethnic in the mines, the steel mills, the forests, the farms. The ethnic lived and worked in harmony with the Black for decades in our cities.

After the second World war came the rapid rise of "Black Power". The ethnic sees history passing him by—He worked hard to provide for himself and his children without aid or assistance from government agencies. Now a paternalistic government showers generous favors on the Blacks and continues to ignore him. The Black creates a "Points-in-Our-Favor" Society at all levels. The Black demands and receives "points" which qualify him for better housing, promotions on jobs, scholarships, and other benefits to the detriment of the ethnic American who worked patiently within the system.

The Slavic ethnic can live with his Black neighbor when the discriminatory policy is stopped and when racism in reverse is ended.

There is urgent need for overhauling the education programs at all levels. Ethnic studies must begin in the primary grades. Ethnic studies centers should be supported at our High Schools, Colleges and Universities. Scholars should be given grants to correct the ommission of the contributions of the ethnics to American History and American Society. Support should be given to the many organizations which are already carrying on this work, as for example the Cultural Center at St. Mary's College, Orchard Lake, Michigan; the Polish American Studies Center at Alliance College, Cambridge Springs, N.Y., the Cultural exchange program of the Kosciuszko Foundation of New York; the intensified programs of the Polish-American Congress, of the Fraternal Organizations like the Polish-Roman Catholic Union, the Polish National Alliance, the Polish Women's Alliance, the Polish Falcons, National Associations of Polish Cultural Clubs, the Polish-American Historical Association and numerous others. Remember that these labor among the Slavic-Americans to maintain the highest values of this culture to the benefit of all Americans.

SOME PLUS FACTORS

Ethnics are very interested in finding out as much as they can about their heritage. They can't find it in existing books in the schools they attend nor in the libraries which open to them. They are clamoring for the truth and they will have it.

Ancestral traditions are being revised by ethnics throughout the U.S.A. Ethnic Festivals are gaining in popularity. Polish Festival in Detroit in 1970 prompts 12 ethnic festivals in Detroit in 1971, including a Far Eastern Festival.

Ethnics are reacting to abuse by individuals and by communications media. The reaction was peaceful against the Detroit Free Press and against the "Laugh In," but may not be controlled in future.

The Ethnics do not resent the English language which is forced on them. This is major plus factor because they can learn of their heritage in that language, rather than in their native tongue. Learned scholars are in ample supply to provide translation. Publishers are reluctant to publish, except at a profit, so subsidies are needed. Libraries are reluctant ot accept contributions of literature on ethnic heritage. This must be corrected.

The Ethnics have served notice repeatedly to governments of their parents' homeland that they are Americans, not Poles or Czechs or Slovaks in exile. They feel that they are part of this Pluralistic, fragmented Society.

ADDED OBSERVATION

Although I am clergyman, I have spoken only of the people and for the people, not for any religious denomination. Ethnic-Americans were and continue to be closely tied to their Churches, despite the Godless and amoral education forced upon them in the public school system of an America which professes: "In God We Trust."

RECOMMENDATION

Establish Slavic Ethnic Studies Centers throughout the educational system in the United States. The areas of heavy concentration of Slavic-Americans should receive particular favor: Boston and Northampton, New York City, Syracuse-Utica, Buffalo-Erie, Trenton-Philadelphia, Pittsburgh-Greensburg, Cleveland, Detroit-Toledo, Chicago-Milwaukee, St. Louis, Los Angeles, Miami.

CONCLUSION

There is a national identity crisis. Establishment of Ethnic Studies Centers, promotion of Ethnic Studies and promotion of all programs which help all Americans to understand themselves, to appreciate their fellow citizen, should unite the Anglo-Saxon, the Ethnic, the Black, everybody into the one people we can be and must be, if we are to prosper and to survive.

Congratulations to you, sir, for this step in the right direction.

Senator SCHWEIKER. Thank you very much. I certainly appreciate the remarks of all the members of the panel and the fine cooperation, and we will be keeping in touch with you as the legislative picture unfolds.

I regret because of our time we won't have additional time for the panel. I want to thank you very much for coming, and we appreciate your help and support.

Now, we will call on the Pittsburgh panel. I want to insert two previous statements at this time, however, into the record, one submitted for the record by representatives from the Center for Migrations Studies, the Reverend Silvano Tomasi, and Mr. Michael Wenk.

These gentlemen have been authorized by Mr. Anthony Scotto, the executive director of the International Longshoremen's Association, to thank the committee for its invitation to appear before it and to express his regrets for being unable to appear due to a previous commitment.

Mr. Scotto wishes to go on record as supporting S. 23 and he hopes that should additional information be contemplated by this committee he would again be requested to share his views with us.

(The prepared statement of Reverend Tomasi and Mr. Wenk follows:)

Statement of Rev. Silvano Tomasi and Mr. Michael Wenk

CENTER FOR MIGRATION STUDIES

New York

As members of CENTER OF MIGRATION STUDIES, we are honored and pleased to be asked by this committee to submit a statement in reference to S. 23, the Ethnic Heritage Studies Center Bill, which we believe to be a farsighted measure and one of the most important acts of legislation that should be passed as an auspicious opening to the year 1972.

Over the past few years, we at the Center for Migration Studies have spoken out many times on what we consider to be the identity crises in our society today. We have on numerous occasions suggested that the realization of the American dream is gradually - especially when viewed in terms of some of our urban communities, - turning into a cataclysmic nightmare.

That there is a great deal of confusion in our nation today is evident. Many individuals within our nation, who consider themselves the legitimate heirs to the American dream feel that the American dream is no longer achievable. On the contrary, it is felt that the American dream is becoming more and more allusive and will soon be altogether impossible to achieve.

The real issue that faces us, - this committee, and the American people, is how to respond to and effectively deal with the pessimism and the sense of anonymity, and confusion in our people.

We feel S. 23 is a constructive step toward coping with the current purvasive sense alienation. We see the establishment of

Ethnic Heritage Studies Centers, as creating a new source of stability. We see increased scholarship, - a fuller awareness of, and an added application of the traditional ethnic values serving to establish the in-depth personal identity and stability, so very necessary to our working class society today.

Most important, we see the necessity of the American people learning in realistic terms about the cultural pluralism that exists in their society, and we see that the prospects of members of one race, color or creed learning about the background of other groups, - comprehending their different approaches to life and their traditions, may bring about, through new understanding, a positive response of individual to individual; - a getting along better with each other, a working together, and a beginning in the effort to make the American dream a reality.

To this end, the Center of Migration Studies has been devoting its energies. To this end, our publications including our latest book entitled The Italian Experience in the United States (recently adopted as a textbook by the State Universtiy of New York), are intended. In addition, our daily contact with prominent leaders of the Urban ethnic community (also hopefully) serves this purpose.

We are priviledged at this point to relate to the committee, the support for S. 23 by Mr. Anthony Scotto, Executive Director of the International Longshoreman's Association. Mr. Scotto, we feel, has for a number of years exemplified his concern and interest in this subject by supporting many constructive programs on behalf of minority groups and ethnic communities, programs which sought to make

the American dream a reality.

In conclusion, may we say that the unity and identity which will be created through S. 23, can be paramount in eliminating many of the tensions so evident in our urban communities today. Members of all ethnic groups, of all races, creeds and color realize that their common quest for meaningful employment, safe and healthy families and harmonious and peaceful communities is a necessary goal.

The creation of ethnic centers will become the focal point for this goal. Nothing can be more fundamental to the American ideal and to our democracy than close and harmonious relations among citizens of all racial and ethnic groups. Walt Whitman's definition of America: "Not merely a nation, but a teeming nation of nations" expresses our sentiments that the passage of S. 23 would significantly contribute not only to the restoration of equlibrium in the U.S. but to the future enrichment of this country as a leader in world affairs, and in final analysis, forge true understanding and unity of purpose among our communities for the general well being of all mankind.

Senator SCHWEIKER. I would like to make a specific comment about a written statement which is to be submitted for the record on behalf of Anthony W. Novastitis, from Philadelphia, Pa., vice president of the Lithuanian American Committee of the U.S.A., Inc., and also cochairman of the Nationalities Division of the Philadelphia Republican City Committee.

Mr. Novastitis reminds us that in a few short years we will be celebrating the 200th anniversary of our great country, and points out that no celebration could be complete without paying tribute to the contributions each respective ethnic group has made to the development and growth of America.

He suggests that the ethnic centers envisioned in the bill could be unifying vehicles for the national bicentennial focus on these ethnic contributions.

When educators and sociologists refer to the point that the melting pot theory has not really worked in our country, they are really making the point that many different groups of people have forged a life in our country, and in so doing have made the contributions to America which Mr. Novastitis refers to.

His statement is incisive and interesting, and I ask that it be inserted at this point in the record.

(The document referred to follows:)

STATEMENT OF ANTHONY W. NOVASITIS, JR., VICE PRESIDENT, LITHUANIAN-AMERICAN COMMITTEE OF U.S.A., INC., AND COCHAIRMAN OF NATIONALITIES DIVISION, PHILADELPHIA REPUBLICAN CITY COMMITTEE

Mr. Chairman and members of the (Sub)committee: I want to thank you for the opportunity to present the views of several organizations I represent regarding Senate bill 23, creating the Ethnic Heritage Study Centers Act of 1971.

The Lithuanian-American Committee U.S.A., Inc., is a national cultural organization representing in excess of 200,000 Lithuanian-Americans throughout the nation. The nationality division is an organization consisting of responsible representatives of 17 nationality groups centered in Phila. They are: Chinese, Estonian, German, Greek, Hungarian, Indian, Irish, Italian, Latvian, Lithuanian, Norwegian, Polish, Puerto Rican, Rumanian, Slovak, Ukranian.

In this dual capacity, I want to express to the members of this committee that both organizations strongly and whole-heartedly endorse and support the intent, purpose and objectives of Senate bill 23. Regarding the nationalities division, the endorsement is not politically inspired nor is the endorsement local in character but it is national in scope. Each of the representatives of the nationalities division has reported that their respective nationalities organizations—civic, religious, fraternal, cultural and educational call for favorable action on this bill.

Today this committee will hear many sound presentations for the adoption of this bill. In the interest of brevity and to avoid repetition, I desire at this time to present to this committee a most opportune and unique circumstance as a further substantial reason for prompt, favorable action on this bill. I specifically refer to a program of implementation on one of the substantial policies of the bill relating to "contributions of those ethnic groups to the American Heritage." What I am going to suggest at this point to the committee would in my opinion be one of the most potent reasons and purposes of this bill "creation and unity among and within heterogeneous American society."

Shortly, the American nation will commemorate its 200th anniversary through the Bi-centennial celebration. This celebration, it is respectfully suggested, would present a most appropriate stage to illustrate the substantial contribution of each particular group to the greatness of America. The Centers contemplated by this bill are the unifying vehicles for such joint or individual expositions and have as a further purpose the education of the American people and the world. Accordingly, it is recommended that serious appropriate consideration be given by this committee to provide for this specific means of implementation. This recommendation would create a unique stimulus and also provide a means to measure the effectiveness of this program.

Senator SCHWEIKER. There are more than 20 groups in Pittsburgh that support this ethnic centers bill. It reminds me a little bit of the

whole movement of what we are trying to do, the concept "E Pluribus Unum" one out of many.

We have emphasized the melting pot theory, but when you see a city that can get together in the way they have in Pittsburgh, this will explain the emphasis on one out of many. I think it shows why we need a change in our approach.

I think their experience in Pittsburgh of bringing a city together with all the nationality backgrounds shows why the one out of many is an important change in our direction.

STATEMENT OF JOHN RADZYMINSKI, JOSEPH SABOL, JR., AND CHARLES T. KOVAL, PITTSBURGH COMMITTEE FOR ETHNIC HERITAGE STUDIES CENTER, PITTSBURGH, PA., COMPOSING A PANEL

Senator SCHWEIKER. I call on Mr. Radzyminski.

Mr. RADZYMINSKI. Thank you, Senator. I just want to say that I worked with the United Steel Workers for some 30 years, and I am also president of Council 38 of the Polish National Alliance, the Pan-Slavic Alliance of Pennsylvania, and I am chairman of the Pittsburgh Ethnic Heritage Study Center Committee, and am vice president of the recently established National Heritage Association.

I am here today to support the Senate bill 23 calling for here the establishment of ethnic heritage studies centers in this Nation and to tell you why I hope this bill is passed soon and why one of these centers ought to be in Pittsburgh.

Every American has his own cultural heritage and tradition. But has been more difficult for some of us to get equal respect and recognition for our heritage.

I am Polish American and my parents came to this country from Poland. My daughter is a student at the University of Pittsburgh where she is studying linguistics.

She has heard Polish since she was little and studied it at Alliance College in Cambridge Springs, Pa.; but there is only one professor at Pittsburgh that teaches Polish.

And in only a few secondary schools can a young person learn Polish. Usually if they are interested, a family member can teach them the language or give them a sense of their heritage. But many parents don't have time or don't know enough of the language, to even teach our children.

There are more than 200,000 Polish Americans living in and around Pittsburgh who are interested in knowing more about their heritage. I am not speaking just for Poles. I now know Italians, Serbians, Ukranians, and members of many other groups who think the same way I do. Many of us still have close ties with our heritage, but the younger people seem to know less about it and be less proud of it.

I don't know if the school system is to blame or if parents are to blame or what is to blame. I only know that something should be done to allow young people to take pride in who they are, and what they are, and where they came from. I think if young people knew these things, they would be much better off.

Last year Secretary Rostow, in the Department of Labor, wrote a report about the situation of workers. A lot of these people are union members. They work hard and their labor and taxes go a long way in

supporting the Government. Yet, few if any Government programs are aimed at the workers' problems.

People in the newspapers call us the forgotten Americans. The silent majority, and white racists, but we came to this country later than a lot of other immigrant groups and we do have problems in the schools, and in our neighborhoods, and even in our unions, and we work hard to preserve what we have.

I am not denying that the civil rights movement is important. I can walk into any bookstore and find lots of books on the black culture, but it is almost impossible to find anything on the Slavic groups.

Yet these two groups are comparable in size and have similar needs. The Government and the foundations are spending thousands of dollars to study blacks, Puerto Ricans, and Mexican Americans, but who's spending money studying other groups?

This country could not have been a great industrial power without our help. I wonder how many people realize that the Poles established the first factory in America in Jamestown in 1609.

You never read about it. You also never read about the fact that the Polish people had the first strike in America, when the King of England extended the right to vote to the colonists in Jamestown, and did not include the Poles.

The Polish workers laid down their tools and struck because that privilege was not extended to them. They won that strike. This was in 1619. One year before the Pilgrims came to Plymouth Rock. But you don't read about those things.

As a public relations man for the Steelworkers Union I talk to people all over the country, and I believe the economic situation is a big problem, but as someone said, "man cannot live by bread alone." Whoever said that was right. We want for ourselves and our children to be able to learn about our heritage and be proud of it just like the English, Germans, and Irish have learned to be proud about theirs.

Our homelands, Poland, Yugoslavia, Hungary, and others have fallen under the domination of communism. But this surely does not mean that the cultures that were there before that time are any less worthy of learning about.

We are loyal Americans too, and we believe that each American has a right to know about his heritage.

Knowing about our heritage will make us better able to understand other peoples'. After all, the United States is a multiethnic society; the more we learn and know about each other and the more we understand each other, the more respect there will be.

America can only gain by ethnic studies. This legislation if enacted can go a long way to accomplishing this goal. I want to urge its early passage.

Now I would like to make several points about why I think Pittsburgh is a natural place for one of these ethnic study centers. First, Pittsburgh is logical from a geographic standpoint because it is located right in between the north-central and northeast regions.

Second, compared to other cities in the northeast and north-central regions of the United States, there is a large population of eastern and southern European origin. There are other groups in the area also, but the Slavic and southern Europeans predominate. I include a map of the United States to show that Pittsburgh geographically is a good place for a center.

(The information referred to follows:)

REGIONS AND GEOGRAPHIC DIVISIONS OF THE UNITED STATES

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

10723 01

Mr. RADZYMINSKI. Third, in Pittsburgh there are all together about 77 ethnic associations. I ask that a list of these be appended to my statement in the record.

(The information referred to follows:)

**The 18 national fraternals headquatered in Pittsburgh are:

Italian Sons and Daughters of America

Serbian National Federation

Polish Falcons of America

Afro-American Fraternal Society

National Slovak Society

United Societies of the U.S.A.

Zivenia Beneficial Union

United Russian Orthodox Women's Mutual Aid Society

Greater Beneficial Union (German)

United Russian Orthodox Brotherhood of America

Greek Catholic Union of the U.S.A.

Ukranian Aid Association of America

William Penn Fraternal Association (Hungarian)

Croatian Fraternal Union of the U.S.A.

Lithuanian Alliance of America

United Lutheran Society (Slovak)

Catholic Knithts of Saint George

Workingmens' Beneficial Union of Pittsburgh

Mr. RADZYMINSKI. Pittsburgh is headquarters of 18 national fraternal societies, including the new Afro American Fraternal Society are located in Pittsburgh. I submit a list of these for the record. Nearly all have archives, publish newspapers and hold special days to celebrate their traditional customs.

Except for one other State, Pennsylvania has the highest number of fraternal insurance policies in force in the entire country. They number just short of one million and have assets of more than one billion dollars.

(The information referred to follows:)

FRATERNAL INSURANCE POLICIES IN FORCE BY STATES*

	No. of Policies	Amount
Illinois	901,366	$1,775,906,126
Pennsylvania	874,293	1,270,572,598
Wisconsin	779,610	2,233,442,980
Ohio	603,592	1,177,583,877
Minnesota	521,611	1,499,150,203
California	514,661	1,639,087,829
Michigan	483,920	1,162,942,816
New York	456,371	858,124,813
Texas	386,529	790,933,266
Indiana	261,970	564,423,544

*Statistics of Fraternal Benefit Societies, 1970, The Fraternal Monitor, Indianapolis, Indiana, 1971.

Mr. RADZYMINSKI. The leaders of these fraternals participate in the Pittsburgh Ethnic Heritage Study Center Committee. This committee actually represents a widespread interest for an ethnic study center in Pittsburgh.

Members include representatives from the Italian, Rumanian, Carpato-Russian, Afro-American, Ukrainian, Serbian, Russian, Lithuanian, Latvian, Bulgarian, Slovak, Czech, Slovene, Greek, Croatian, Jewish, Arabic, Polish, English, Hungarian and Irish groups.

In fact all the groups in the Pittsburgh regional area are represented. In addition to these, there are representatives from the labor unions, jaycees, foundations and colleges and universities in the regional area. The committee has been developing broad based support for the legislation and I am sure some of you Senators have probably heard from some of our committee members.

There is also a planning committee composed of persons from various colleges and universities in western Pennsylvania. This group has been developing a national model for an ethnic center which is national in scope but is related to the local situation in Pittsburgh.

Besides these committee efforts, Pittsburgh has a tradition of ethnic recognition. There are the nationality rooms at the University of Pittsburgh which were established in 1936 to recognize the contributions of various ethnic groups in the area; Pittsburgh also has an International Folk Festival which is sponsored by Robert Morris College and holds yearly festivals in the Civic Arena. The Tamburitzen Cultural Center at Duquesne University has a wonderful folk arts and dance program, children in the program travel around western Pennsylvania, the United States of America, and to European countries performing the traditional dances of eastern European peoples.

In the western Pennsylvania area is Alliance College, in Cambridge Springs, Pa., which has a Kujawaki group that also travels at home and abroad performing traditional dances. All of these activities testify to the fact that Pittsburgh regional area has a variety of resources that could and would make possible the establishment and maintenance of an ethnic heritage study center.

Thank you.

Senator SCHWEIKER. I thank you. And I would again want to commend you and the other leaders for what you have done in Pittsburgh. I think what you have done is outstanding.

I would like to call on Charles T. Koval to explain his interest and participation and also the group he represents.

Mr. KOVAL. I am Charles Koval from Pittsburgh, Pa. I am Secretary Treasurer of the Pittsburgh Ethnic Heritage Study Center Committee, advisor-director to the Scholarship Committee of Pan-Slavic Alliance, a member of the Croatian Fraternal Union, the National Heritage Association, and various other fraternal orders.

I was born the son of a former coal miner. I grew up in a small residential town in Pennsylvania south of Pittsburgh, and like many small towns in that area, we were so surrounded by mines and steel mill towns composed of different ethnic groups.

Some people used to look down on us because we were so-called hunkies and because we were Catholic. Therefore I always figured I had to work 10 percent harder than other guys to get ahead.

I can understand some of the problems that the Negro has had and because of color, he must work 20 percent harder. People burned crosses on our lawns and because we were foreign and had different ways, and thoughts, and perhaps actions, and because we supposedly posed an economic threat. They had a lack of understanding and prejudice toward us because of it.

I worked my way through college, spent 5 years in the Marine Corps as an aviator and 6 years ago started my own business, Allegheny Planned Income, Inc., a brokerage firm.

Although I am third generation, I inherited my interest in fraternal societies and other ethnic organizations from my parents and grandparents and have gotten a lot of satisfaction out of helping other young people whose background is similar to mine.

Fraternal societies that I belong to have really done a great deal to help young people get ahead and get an education. They have also instilled pride, love of country and helped foster a greater understanding of other peoples.

Their scholarship fund that I am advisor to, have given over $200,000 in the past years, and also year—last year alone we gave $25,000 to needy young students, primarily of Croatian and Slavakian backgrounds.

At the present time in America I think we need a new understanding of fraternalism. I think due to the downgrading of fraternals and a lack of awareness of fraternals that this is changing, and this is one reason we need an ethnic study center, to bring back the awareness that these children that we have, that was instilled in me when I was a child—most of the people I know who were proud of their own heritage are considerably more tolerant of other people, and it is those who have pride about who they are and where they came from and those who have the lack of pride are the most prejudiced people.

We're also considerably better educated than our forefathers, and this helps break down suspicion. We also have more leisure time, ignorance is one of the main ingredients of prejudice.

As an aside from my statement I would like to say, No. 1, we have to emphasie attacking prejudices and intolerance from a different angle, by accentuating the differences between the cultures.

A second thing is to keep in mind our No. 1 goal which is to stop the divisiveness in American society, and thirdly, the bill has a built-in—how would you phrase it?—for people who have an ax to grind, creating jobs. We already find people who are looking for a job to teach, administrative positions, and I think it will have to be handled very delicately in a sense as to who the people who head up this board will be, so that people do not have an ax to grind, whatever group they belong to.

Thank you very much.

(The prepared statement of Mr. Koval follows:)

PREPARED STATEMENT OF CHARLES KOVAL, SECRETARY-TREASURER OF THE PITTSBURGH ETHNIC HERTITAGE STUDY CENTER COMMITTEE

I am Charles Koval from Pittsburgh, Pennsylvania. I am Secretary-Treasurer of the Pittsburgh Ethnic Heritage Study Center Committee, Advisor-Director to the Scholarship Committee of Pan-Slavic Alliance, a member of the Croatian Fraternal Union, the National Heritage Association, and various other fraternals.

I was born the son of a former coal miner. I grew up in a small residential town in Pennsylvania south of Pittsburgh, and like many small towns in that area, we were surrounded by mines and steel mill towns composed of different ethnic groups. Some people used to look down on us because we were so called "hunkies" and because we were Catholics. Therefore, I always figured I had to work 10% harder than other guys to get ahead. I can understand some of the problems the Negro has had and because of color, he must work 20% harder. People burned crosses on our lawns too because we were foreign, had different ways, and thoughts, and perhaps actions, and because we supposedly posed an economic threat. They had a lack of understanding and prejudice toward us because of it.

I worked my way through college, spent five years in the Marine Corps as an aviator and six years ago started my own business, Allegheny Planned Income, Incorporated, a brokerage firm. Although I am third generation, I inherited my interest in fraternal societies and other ethnic organizations from my parents and grandparents and

have gotten a lot of satisfaction out of helping other young people whose background is similar to mine. Fraternal societies that I belong to have really done a lot to help young people get ahead and get an education. They have also instilled pride, love of country and helped foster a greater understanding of other peoples.

Fraternalism is a word familiar to most of us. It means brotherhood, peace and goodwill. This grew out of the need of various immigrant groups to deal with their problems - when they came to this country. Fraternal associations formed to establish ethnic parishes. They were also mutual aid societies that helped individuals and their families to solve such problems as paying for medical aid and death benefits when a breadwinner was taken from the family. You must remember that in the early days around the turn of the century there were no government agencies like, Health, Education and Welfare or insurance companies like Blue Cross and Blue Shield to provide financial help in time of need. Since most of the men who worked in the steel mills and the mines were not citizens at first, whatever minimal benefits that companies provided its employees were not available to them. Fraternal societies were also organizations that made it possible for people of similar backgrounds to get together after work to hear and talk their own native language, and to perpetuate traditions they brought with them from their homeland.

As an example, the Croatian Fraternal Union organized in 1894, like other fraternals, still celebrates these traditions. The Croatian Fraternal Union has a cultural federation that continues to encourage folk art and folk lore, and organizes Tamburitzan groups among children throughout the country fostering in them a love for Croatian songs and music. We have held four National Tamburitzan Festivals that have attracted as many as 700 boys and girls age 8-18. Through our scholarship foundation we have distributed over $200,000.00 in grants to needy and deserving young people for their college educations. Through both organizations that I advise we gave over $25,000.00 last year.

At the present time in America, we need a new awareness of fraternalism, a new sense of brotherhood; not just for members of one ethnic group or fraternal society but for members of all groups whatever their ethnic or racial background. We must achieve this new awareness as American citizens in order to solve the many basic problems facing us.

One of the best ways I know, to develop this new sense of brotherhood and to begin to solve some of these problems, is through the Ethnic Heritage Study Center Act of 1971, and I urge that it be passed as soon as possible.

Now some people think that ethnic studies might cause problems, that ethnic studies might increase prejudice rather than diminish it.

I don't believe this. Most of the people I know who are proud of their heritage are also more tolerant of other people. It's those who don't have pride about who they are and where they came from who are the most prejudiced. Also we are considerably better educated than our forefathers. This helps to break down suspicion, distrust and we also have more leisure time to contemplate the consequences of divisibleness on our nation.

After all isn't ignorance the main ingredient of prejudice. If people could learn more about themselves through ethnic studies programs, the new leadership which America needs might be developed.

The future leaders of America are certainly not going to be those undisciplined young radicals who have rejected the past, and along with it all the good things which America has stood for. What has made America great and will continue its ideals as a nation are those well proved virtues of discipline, hard work, respect for society and its laws, and respect for parents who care about what their children become. All societies who have "made it" have had traditions of strong family ties, religion, respect for law and order, and feeling for the best of the past. If America wants to realize the most from its people, it must begin to be honest about ethnic diversity; and it must begin to provide an equal start for its children as they move through the American school system and into the mainstream of American life.

I believe that the school and the educational system is probably the best place for developing a sense of ethnic pride and at the same time for developing responsible American citizens. First of all, our hope for a better world lies with our children. They aren't born with prejudice but we help give it to them. Young people spend a lot of time in school from the time they are 3, 4 or 5 years old to the time they graduate. Unfortunately some school systems don't really "educate". Kids complain that classes aren't relevant. What could be more "relevant" than ethnic studies, which, properly taught, can develop a sense of ethnic pride, foster greater mutual understanding among different groups, and turn out young people who have an ability to feel and act as well as to think responsibly. Furthermore, I can't help but think that such instruction would develop a renewed sense of America, its ideals and goals as a Nation. Second, how, after all, can we be critical of oppression abroad if we don't have our own house in order. The United States has a great opportunity to come forth with and develop a new sense and awareness of brotherhood. The Ethnic Heritage Study Center Act of 1971 is right on target. It would begin to put us on the right track in achieving this. We are not subscribing to the theory that this Bill would be a panacea to all of our social ills. However, we feel it would certainly help toward eventual goals of total brotherhood.

This Bill should be passed quickly and money should be appropriated immediately, so that ethnic studies can get under way.

Moreover, the people in Washington charged with developing the guidelines must seek out those educators and experts who have the most knowledge and experience with various ethnic groups for their advice and consultation. We have in Pittsburgh, for example, a Planning Committee composed of persons knowledgeable in a variety of disciplines who are planning and developing programs in some of the schools. We need this kind of non-political support to make sure that those put in charge are not just out for themselves or trying to make a fast buck. I hope that America really means it this time, when it seeks to demonstrate genuine respect for the cultural heritage of all its peoples. Lets stop the old thoughts of 'lets not stir the pot' - lets face this problem of ethnic differences head on, and lets foster togetherness in this country in times other than national disasters.

Naturally, as a native Western Pennsylvanian, I think Pittsburgh would be an ideal place for an ethnic center. Besides its central geographic position, 18 national fraternal benefit societies are headquartered in Pittsburgh and altogether there are about 77 ethnic associations in the area. The population of the region contains a broad distribution of ethnic background - Americans of South and East European origin as well as those of Scottish, Irish, German, Scandinavian, Afro-American origin. Religious organizations also include a wide variety - Russian Orthodox, Greek Catholic, Roman Catholic, Polish National Church,

and various Protestant sects. Furthermore, Pittsburgh is a center for higher education - there are several universities there, namely Pitt, Duquesne, Carlow, Chatham, Carnegie-Mellon, Point Park, Robert Morris, Allegheny Community College, Alliance College in Cambridge Springs, Pa., W & J, and the Pennsylvania State system, which has several community extensions in the region. I could go on and talk about many other resources. But in my view, Pittsburgh is an ideal site for a center. Thank you.

Senator SCHWEIKER. Thank you very much and now I would like to call on another leader in the Pittsburgh movement, Mr. Joe Sabol, Jr.

Mr. KOVAL. Thank you, Senator Schweiker.

Mr. SABOL. I am Joseph Sabol, Jr. I am in the real estate and insurance business in the city of Duquesne. I was a former mayor of the city of Duquesne, and a former national president of the gymnastique branch of the Greek-Catholic Union.

It is a national organization, and I was president from the term of 28 years.

Being a fraternalist, I belong to and am a member of 11 Slavic fraternities, in addition to being active in 25 other civic, fraternal, or religious organizations.

I am a Carpato-Russian by extraction. I am unique insofar as I am the only Byzantine Catholic here, and I was instrumental in founding the St. Cyril Seminary as well as a Byzantine club.

I read, write and speak seven languages, so I guess I could be termed a polyglot.

I am, of course, deeply appreciative and truly grateful for the invitation to be present, because I am at once proud and pleased to be here.

Just as all of those who have appeared or who will appear before this committee I too am most desirous of having the Ethnic Heritage Studies Center created. However, unlike some I want very much when this bill is passed, to put in a plug as it were, for the city of Pittsburgh.

While it is true that steel is basic and important to Pittsburgh, her populace of the various ethnic backgrounds are truly termed a melting pot and as such they also bring fame and glory to the city.

The creation of the Ethnic Heritage Studies Center would present to the world a moral unity, identity, growth, continuity and a particular personality. The centers would win the admiration of the youth by their creation, they would kindle the affections of the middle aged by their associations, and they would firmly fasten the fidelity of the aged by their traditions, that still flourish because they are firmly fixed in the will of a faithful people.

We all know that over the years there have been many changes and transformations, that there were forces powerful enough to destroy yet helpless to reconstruct.

Because of this adversity as well as prosperity, now gives us a singleness of purpose, a fixed grasp of our aims, and a noble earnestness to make positive that U. S. Senate bill S. 23 is enacted.

With the passage of this bill and under the leadership of the bills godfather, Senator Richard S. Schweiker, there will be a rebirth and a resurgence of the good past practices of our forbearers.

This most assuredly would be a strange, majestic contrast to the agitation and turmoil of confused passions, hesitating ideals, tentative virtues, and the groping panaceas of this jet age.

Our people must be restored to a pride of place and a pinnacle of power and prestige. You cannot afford the luxury to err in this. By following the paths and precepts of our pioneers and predecessors, we

can and we will pass onto posterity our proud heritage, our many fine, time honored cultures, and customs.

Today time is of the essence, for if time is allowed to run its natural course, our people will be absorbed, we will be assimilated, and we will suffer the loss of our identity. I am sure that none of us want to see this happen. I sincerely hope that bill No. S. 23 which promises so much, does not cease to exist nor be disappointing in its own promises.

Gentlemen, I thank you for your kind indulgence and patience.

Senator SCHWEIKER. I think you for your testimony, Joe. I would like to come back to one point that I think is important, and reemphasize it.

John, you mentioned the various groups that are centered in Pittsburgh, who have their national centers there. Just how many groups is that?

Mr. RADZYMINSKI. Eighteen have their national offices in and around the city of Pittsburgh.

PITTSBURGH AS A CULTURAL CENTER

Senator SCHWEIKER. I know that even though I am from Pennsylvania, I was not clear until recently how many groups look to Pittsburgh as a cultural center, and therefore perhaps this explains the phenomenal success you folks have had in coalescing the community from many diverse backgrounds.

I think this is extremely interesting because I think it portends what can happen in the country to a great extent when you see so many divergent groups getting together and agreeing in terms of a common approach, in terms of a common goal and common objective. I think this really is the essence of what the bill tries to do, and I think you folks by your own spontaneous approach have demonstrated that it is possible, and that even Pittsburgh, with all those various ethnic backgrounds, can get together and agree on goals and objectives and national purpose, which I think is really the meaning of this.

Mr. RADZYMINSKI. What I mean to say, Senator, is that there are 18 national offices of franternal offices in and around Pittsburgh. All together in the Pittsburgh area there are some 77 organizations, churches, lodges, or what have you. I believe they are all around the Pittsburgh area. This is why we have such a large committee.

One time somebody took a quick count, and we had 50 different nationalities present at one of the meetings.

Senator SCHWEIKER. I attended one of those, and I was impressed with the ability to bring together those groups.

Joe?

Mr. KOVAL. I think we should include the names of the people who were able to come together in Pittsburgh.

Senator SCHWEIKER. We should include it.

Mr. KOVAL. We have a list of people and their affiliations an so forth. Maybe we could submit that later in writing.

(The document referred to follows:)

PITTSBURGH COMMITTEE FOR ETHNIC STUDIES CENTER

1. OFFICERS AND DIRECTORS

Chairman, John Radzyminski (Polish)
Vice Chairman, Joseph Sabol, Jr., (Carpatho-Russian)
Treasurer, John Kolesar (Slovak)
Recording Secretary, Patricia French (Bulgarian)
Financial Secretary, Charles T. Koval (Ukrainian)
Public Relations, David Vinski (Croatian)
Director, Walter W. Kolar (Croatian)
Director, Nicholas Jordanoff (Bulgarian)
Director, Clarence Huff (African)
Director, Joseph Borkowski (Polish)
Director, John Badovinac (Croatian)
Director, James Federoff (Russian)
Director, Dora M. Alski (Polish)
Director, Florence Knapp (Polish)

Mr. SABOL. I would like to comment on the organizations which are domiciled in Pittsburgh. Although they are domiciled there, they may spread from Maine to California. Under the lodge system, each city has a lodge, where our people are predominantly in numbers. The effect of the national headquarters in scope, because as I said before, you may have lodges in Texas, in Minnesota, Colorado, Wyoming, I know when I was the president, we had 1,814 lodges extending from Bangor, Maine, to Van Nuys, Calif., and from Anchorage, Alaska, to Miami, Fla.

Senator SCHWEIKER. 1,814 in your group?

Mr. SABOL. Yes. So this will have an impact across the country.

Senator SCHWEIKER. Once again, I thank you all sincerely. You folks have made a contribution and you have indicated the direction our country ought to go.

Thank you for being here.

Senator SCHWEIKER. I have additional statements for the record which I will submit, and I would like to announce that when we adjourn this morning, the next meeting of the committee will be at 10 a.m., Wednesday, April 21.

(The information referred to follow:)

STATEMENT OF SENATOR FRANK E. MOSS (D-UTAH)
EDUCATION SUBCOMMITTEE
SENATE COMMITTEE ON LABOR AND PUBLIC WELFARE
APRIL 20, 1971

SUBJECT: S. 23, ETHNIC HERITAGE STUDIES CENTERS ACT OF 1971.

Mr. Chairman, I asked to appear personally in behalf of S. 23, the Ethnic Heritage Studies Centers Act of 1971, because of the great interest in my state of Utah in ethnic studies, and in increasing educational emphasis on ethnic heritages, backgrounds and traditions.

We established some time ago at the University of Utah in Salt Lake City a Center for the Studies of the American West, and one of its activities has been the study of Indian history and culture. We also have under way at the University a number of other programs relating to Indian education and opportunities. We would be very much interested in the establishment and funding at the University of an Ethnic Heritage Studies Center as proposed by this bill since it would allow the expansion of many programs already in progress and the establishment of others. We approve of the new and challenging approach suggested in S. 23 by Senator Schweiker and feel it holdsgreat promise for finding solutions to some of the educational and social problems ~~of our~~ American minorities.

Dr. Floyd A. O'Neil, Assistant Director of the Centers for Studies of the American West, has described to me in some detail the work of the Center with respect to Indian Affairs, and because I feel his

experiences may be of value to the subcommittee in evaluating S. 23, I would like to quote from Dr. O'Neil's letter:

"For about four years the Center has been involved in the collection of documents and tape recordings relating to American Indian history and culture. Miss Doris Duke, the tobacco heiress, has given yearly grants to the Center which has enabled us to obtain the largest Indian oral history collection in America and accomplished here at the University of Utah under the direction of Dr. C. Gregory Crampton.

"Our efforts have been to collect material relating to the history and culture of the American Indians which has yielded more than one-third million pages of primary documents which are unpublished.

"In the past year we have cooperated with many tribes to develop curricular materials for use in the public school systems, which included Ute People, An Historical Study, developed jointly with the Uintah School District. We are currently working on additional texts to be used in the public schools for the Southern Utes in Colorado; the Zuni Pueblo in New Mexico; the Fort Hall Reservation in Idaho; and the Pyramid Lake Reservation in Nevada. These projects are actually in process now.

"In conjunction with UCLA and California State College at

Fullerton, the Center is conducting a survey of the Urban Indians and compiling a guide for California Indian Affairs. We are gathering together personnel and resources which will contribute to the education of the American Indian students particularly on the graduate level."

Dr. Wick R. Miller, Associate Professor of Anthropology and Linguistics at the University has been conducting basic linguistic research on the Shoshoni language in the Great Basin for the past 6 years, and he has written to me of his work, and of how he feels it could be expanded and improved through the establishment of the type of centers envisioned by S. 23. Dr. Miller writes:

"I expect in the next two years to concentrate on language replacement, that is the process that is involved as English replaces the native language. While most of my research has been of a basic theoretical nature, it has some applied implications, particularly in the area of education.

"In the past few years, I have become involved to some extent in questions of policy and goals in teacher training in Indian education. In my work with Indians, it has become clear to me that educational policy for American Indians must take into account the linguistic and cultural context of the child, something which up until now has been done only peripherally

and in a rather haphazard fashion. Those of us at the University of Utah that are concerned with this problem have been able to make some progress in developing teacher training programs. It is clear that if we were able to establish a center for Indian studies, we could do a better job."

The University of Utah is also engaged in many other activities which would expand ethnic awareness and opportunities for Indian minorities, and would train both Indians and non-Indians for work with Indian groups. There are probably more faculty members at the University of Utah with knowledge about and experience with the American Indianthan in any other university in the United States, so there is naturally great interest in any bill which would establish programs and channels to help encourage members of this minority group to study and have a greater awareness of their own background, as well as the backgroundsof other minorities, and furthermore to establish, through self understanding and mutual understanding - basic groundwork for mutual cooperation.

I sincerely hope that the subcommittee will report this bill favorably at an early date.

4

THE IMPORTANCE OF ETHNIC STUDIES AND INTERCULTURAL UNDERSTANDING IN AMERICAN EDUCATION

Statement by Ward Morehouse, Director, Center for International Programs and Comparative Studies, State Education Department, University of the State of New York, and President, National Council of Associations for International Studies, Submitted to the Senate Committee on Labor and Public Welfare, April 20, 1971

My name is Ward Morehouse. I am Director of the Center for International Programs and Comparative Studies, State Education Department, University of the State of New York. I am also serving currently as President of the National Council of Associations for International Studies, an organization composed of a dozen regional associations of over 400 colleges from Vermont to Hawaii concerned with strengthening the international and intercultural dimensions of American education. I appreciate very much this opportunity to present my views in support of the bill entitled "The Ethnic Heritage Studies Centers Act of 1971" (S.23) to the Senate Committee on Labor and Public Welfare.

The need for a legislative enactment such as the present bill should be readily apparent to all concerned Americans. Over the past decade, polarization of cultural and ethnic groups in the United States has surfaced as a major source of tension in our society, sometimes erupting into violence and often resulting in the breakdown of meaningful social relationships. This phenomenon involves not only Blacks, Puerto Ricans, and Mexican Americans, but also American Indians, Chinese Americans and various ethnic groups in our society from Eastern and Southern Europe as well as elsewhere in the world.

This polarization also exists on a world scale, involving not only cultural and racial differences within and between other nations and the United States but also growing disparities in personal income levels between the developed nations and the Third World of Asia, Africa, and Latin America. By the year 2000, the operative time frame for today's students who will then be assuming positions of adult responsibility

in our society, four out of five human beings will live in the Third World. The gap in per capita income between, for example, the United States and India is expected to virtually double by that time. Whether we like to contemplate this future or not, North America, along with Europe and Japan, will have become, in a very real sense, a "golden Ghetto" in a vast worldwide slum of grinding poverty. Something must be done now to prepare today's students for this kind of future.

While I support strongly the basic provisions of this bill, I would like to suggest an important additional emphasis which I believe should be reflected in the language of the bill and in its implementation if it should become law. The statement of policy in the bill properly emphasizes the importance of providing students with "an opportunity to learn about the nature of their own cultural heritage" and also indicates that they should have an opportunity to "study the contributions of the cultural heritages of the ethnic groups of this nation," which presumably includes study of cultural heritages of ethnic groups other than the students' own. I believe that it is essential to give greater emphasis than does the present bill to the importance of understanding other cultural groups, not only within the nation but also within the world, and the relationships between different cultural groups.

To underscore this point, I recommend that the language of the bill be amended, wherever the context makes this appropriate, to include the phrase "and intercultural" between "ethnic" and "studies". I also urge that consideration be given to a revised statement of policy along the lines of the following, which I believe would incorporate all the essential features of Section 1201 of the present bill as well as the additional emphasis which I am advocating:

> The Congress hereby finds and declares that the United States of America is composed of peoples with ethnic and cultural backgrounds from Europe, Asia, Africa, the Pacific area, and Latin America, in addition to our indigenous Indian cultures;

60-433 O - 71 - pt. 2 - 26

that a greater understanding of one's own heritage and those of one's fellow men will contribute to a more harmonious nation and world, and will enrich the quality of life in America; that future generations of Americans should be assured ample opportunity to develop to the fullest extent possible their knowledge and understanding of all ethnic and cultural groups in the United States and the world; and that it is therefore necessary and appropriate for the federal government to assist in the development of opportunities and resources for ethnic and intercultural studies and programs.

Intercultural relations are far too often consigned to a place of secondary importance in the curriculum. The study of man's relationship and responsibility to his fellow man, the concept of social justice, the value of cultural diversity--these ideas form the very foundation of human civilization. Thus we tend to take for granted their presence in our educational institutions. Unfortunately, such assumptions are totally unwarranted.

In 1968, the conferees attending a symposium on "Patterns of American Prejudice" at the University of California at Berkeley agreed that "virtually no one in educational institutions is trying--very much--to do anything about prejudice." It was recommended that "American public schools should grasp 'missed opportunities' to reduce racial and ethnic prejudices, despite the limitation of their powers to change the social system" ("Schools Urged to Attack Prejudice," Education USA, April 1, 1968, p.169.)

A study released at the conference by M. Brewster Smith, Director of the Institute for Human Development at the University, found that children enter the eighth grade already furnished with prejudices--and they do not change greatly during their high school years. Teachers questioned in connection with the study were found to be generally unconcerned about the issue. These findings and many others underscored the fact that "Americans are failing to reduce prejudice even while we are trying to eliminate discrimination." (Ibid.) The tolerance of injustice and racism at home inevitably

affects our relationship with other nations and their peoples. If we are to fulfill our larger responsibilities to the family of man, however, it is not enough to set our own house in order. For the principles of equality and justice which we espouse apply equally to men of all races, colors, creeds, and nationalities.

The Kerner Commission Report brought home to the nation a critical awareness, if not action, with its assertion that "our nation is moving toward two societies, one black, one white--separate and unequal." Let us hope that the tragic events surrounding our involvement in Viet Nam during the past decade will serve a similar purpose with regard to our understanding of supranational human rights and responsibilities. The 60's have been a decade in which we have become increasingly aware of the existence of social injustice; in the 70's, we must find ways to translage that awareness into constructive social action.

That our young people could profit greatly from better instruction in intercultural understanding is illustrated in a study entitled Children's View of Foreign Peoples. The authors of the study found that at the age of 6, children do not yet have any stereotypes about foreign peoples. By the age of 10, they have become aware of foreigners as people, and are particularly open to new ideas and information. The more the child knows about a particular country or people, the more friendly he is likely to feel toward them. The study indicates that the age period between 10 and 14 provides important opportunities for the development of openmindedness and friendliness toward other cultures. Yet children in this age group rarely mentioned their teachers as important sources of information. Rather they depend on television, movies, books and magazines. One reviewer discussing the implications of this study, suggests that parents and teachers--

> must help children, from early childhood on, to understand that although there are many distinct peoples and cultures in the world,

mankind is one; that although there are many distinct varieties of human behavior in the world, they all reflect social environments created by man in response to common basic needs and problems; that although there are various viable alternative solutions to these basic human problems, "other" ways of solving the common human problems are not necessarily unnatural or perverse. ("How Do National Stereotypes Originate in Children's Minds?" Phi Delta Kappan, December, 1967, p.235.)

I should like to address myself to one other point concerning the language of S.23. In the statement of policy in this bill, reference is made to "all students in elementary and secondary schools" while elsewhere in the bill (for example in Clause 1 of Section 1202 the language includes institutions of higher education as well as elementary and secondary schools. Formal education is a continuous process for the individual student experiencing it, even though we may divide it up into four and six year compartments for administrative convenience, and I believe, therefore, that the provisions of this bill should include institutions of elementary, secondary and higher education. A revised statement of policy along the lines I suggested above would help to remove ambiguity on this point; additional changes in language might also be incorporated elsewhere in the bill or in the Committee's report, as appropriate, to clarify congressional intent.

I believe that the present bill, amended along the lines I have suggested, would constitute a major piece of social legislation and a constructive innovation in public educational policy which would command widespread support not only from the educational community but also from all segments of our multi-cultural society.

Thank you for giving me this opportunity to submit my views on the importance of ethnic and intercultural studies in American education.

STATEMENT OF THE GREATER WASHINGTON CHAPTER OF THE NATIONAL CONFEDERATION OF AMERICAN ETHNIC GROUPS, INC. IN SUPPORT OF S. 23.

The Greater Washington Chapter of the National Confederation of American Ethnic Groups greatly welcomes S. 23 providing for the establishment of Ethnic Heritage Research Centers and for the distribution of the knowledge of the ethnic heritage of the peoples of America to our children in the elementary and secondary schools.

As one of our well-known historians, Oscar Handlin stated, the history of the immigrant in America cannot be written. For the immigrants were American history as such. Yet, we must state that university-sponsored research has generally neglected the sociology, politics, economic structure and literature of the various ethnic groups in the past. This neglect was a result of the belief that the immigrants and their children would finally become "Americans," which meant that they would assume in a modified form, the value judgments and the cultural milieu of the early settlers from Europe, those of the English.

Several witnesses from among the ethnic organizations, have pointed out the consequences of this neglect and the negative aspects of socio-psychological enforcement of the "melting-pot" theory on the first and second American-born generations of non-English European settlers, particularly on those who had entered this country at the end of the 19th and in the 20th century.

Our chapter wants to emphasize at this juncture the interrelationship of individual and cross-ethnic research and its importance in connection with S. 23 which it supports wholeheartedly.

First, there are serious lacunae even in individual ethnic group research in the United States. Local historical and state historical associations have often shied away from relating the story of the cultural, religious and social institutions of the non-English immigrants in the past. Sociological studies, while sometimes analyzing city life and city problems and the immigrant's role therein from a class viewpoint, also lack the depth usually associated with the fine traditions of American sociology in other fields. The phenomena of group life, identity, succession, separatism, cultural pluralism, assimilation and acculturation must be studied further and put into a larger framework of historical reference. Until now ethnicity was dealt with only from a problematical viewpoint and was not analyzed as a source of potential strength to American society.

Thus, we believe that the overriding need is for the interpolation of the results of existing individual ethnic group research and its expansion in the areas and with regard to particular ethnic groups (if and when applicable) to a cross-ethnic level. This way we will emphasize the ties and trends which bind the ethnic groups together, and analyze the experiences which shape an invisible, but very real, community of value systems, cultural archetypes and socio-economic

and even political interests on a cross-ethnic basis in the United States. This integrative, cross-ethnic process would be immensely assisted by project-oriented, sociological and behabior research on the one hand, and by a comparative cultural and literary research into the literature and cultural value systems of Americans on the other.

Second, we believe that the need for self-appreciation and self-knowledge of the individual ethnic groups as to their place role and functions in American history and society exists and should be promoted. Both in the research field and in community realization this integrative cultural and sociological process has already created in the last decade a community of socio-economic and political interests among the various ethnic groups in the United States and American scholarship has also been increasingly realizing the invalidity of the melting pot theory on a socio-economic and cultural level.

The Greater Washington Chapter of the National Confederation of American Ethnic Groups underlines the need for cross-ethnic research. As an organization which includes in its leadership many of the Washington representatives of the major ethnic organizations of the country, including several professors and researchers, ut expresses its willingness to cooperate in solving the research tasks inherent in S. 23 upon its enactment.

It should be mentioned in passing that several of our ethnic national organizations, among them the Joint Baltic Committee and the American Hungarian Federation, are also testifying in support of S. 23 and join us in stressing the need for expanded individual and cross-ethnic group research and the distribution of knowledge of our ethnic heritage in American history and society among our schoolchildren as foreseen in S. 23.

277 CHESWOLD LANE
HAVERFORD, PA. 19041

April 22, 1971

The Honorable Clairborne Pell
United States Senate
Chairman of the Subcommittee on Education
Of the Senate Labor and Public Welfare Committee
Washington, D. C. 20510

Dear Senator:

ETHNIC HERITAGE STUDIES CENTERS ACT OF 1971

In view of the heterogenous composition of our country, it seems essential that a better understanding of the contributions of one's own heritage and those of one's fellow citizens be established. I feel that the enactment of the Ethnic Heritage Studies Centers Act would contribute to a stronger and healthier nation by making available to schools, colleges, and community groups materials concerning the history and culture of the various ethnic groups in our country.

I therefore hope that you will do everything in your power to expedite the enactment of Senate Bill 23.

Sincerely yours,

Otto J. Patzau

Honorable Richard S. Schweiker
United States Senate
Washington, DC 20510

Dear Senator Schweiker:

Notice has reached us that the first public hearings on your Bill S-23 titled "Ethnic Heritage Studies Centers Act of 1971" have been scheduled for the morning of April 20, 1971, and our Society, the Croatian Fraternal Union, would like to go on record of endorsing this Bill wholeheartedly.

Our organization, a fraternal benefit society, has 117,000 members with insurance in force totaling $143,000,000. We operate in 27 States of the United States and in 6 Canadian provinces. Our people are very much interested in the establishment of an ethnic center and they endorse the idea of having one such center in the City of Pittsburgh, because it is here in Pittsburgh and Western Pennsylvania that we have the largest representation of the various ethnic groups in the United States. People from every ethnic group will be found in Western Pennsylvania, and Pittsburgh would be an ideal location for such a center.

I am sure that you are familiar with the fact that in our Society alone there has been a great resurgence of interest by our children in their background. They have taken a great interest in Croatian music and culture and all that is best of their race. I am sure that the establishment of an Ethnic Heritage Center in Pittsburgh would encourage an even greater pride in their heritage than now exists, and this can be applied to every other nationality group in Pittsburgh.

We are grateful to you for introducing this Bill in Senate, and if we can be of any help to you in any way to further the adoption of this Bill, please let us hear from you.

Sincerely and respectfully yours,

JBadovinac

Dear Senator Schweiker:

The Joint Baltic American Committee is a nationwide organization representing over a million Americans of Estonian, Latvian, and Lithuanian descent.

We want you to know that our Committee heartily endorses and supports your bill S. 23, known as "The Ethnic Heritage Studies Centers Act of 1971." We urgently need the proposed assistance to improve our educational opportunities and to maintain our schools. This country's ethnic groups are loyal citizens. Their contributions range from scientific achievements to the supreme sacrifice in military service. At long last, your ethnic heritage studies act promises us a proper and deserved recognition.

We respectfully suggest that public hearings should be held soon on S. 23. Our Joint Baltic American Committee would be proud to testify and present significant data in support of this bill.

You, sir, as a sponsor of this bill and your fellow co-sponsors merit our great respect.

Sincerely yours,

Honorable Richard S. Schweiker, M.C.
United States Senate
Washington, D.C. 20510

Dear Senator Schweiker:

I would like to have the following statement inserted in the record of the Hearings on Senate Bill #23.

I have been informed recently that excellent progress has been made in the efforts by yourself and co-sponsors of "The Ethnic Heritage Studies Centers Act of 1971" in bringing Senate Bill #23 before the U.S. Senate for consideration and passage.

It is my firm belief that the passage of this very important bill will open a new era of understanding among the diverse races and ethnic generations of the American descendants of the immigrants that came to this country seeking a new life, and the rest of the American people, the old stock Americans. We are all descendants of colonizers and immigrants of the past 300 years, truly reflecting the cultures and heritage of the entire world of peoples and nations.
